The area of the City of London is 673 acres—a little more than 1 square mile. The area of the County of London is 117 square miles. The population of the County at the census of 1911 was 4,521,685, being one-tenth of the population of the United Kingdom and about one twentieth of the population of the British Empire, exclusive of India. Greater London, comprising the City and the Metropolitan Police District, has an area of 692·84 square miles, excluding tidal water, and is defined as containing every parish the whole of which is within 15 miles of Charing Cross, or any portion of which is within 12 miles. Its population in 1911 was 7,251,358.

There are 30 Municipal bodies in the Administrative County of London, consisting of the London County Council, the Corporations of the Cities of London and Westminster, and 27 Metropolitan Borough Councils; there are also 28 Boards of Guardians of the Poor and other authorities—170 in all, the members constituting these numbering 5,339; while in Outer London, which signifies the part of the Metropolitan Police District lying outside the Administrative County, there are 142 Local Authorities comprising 5 County Councils, 9 County and Municipal Borough Corporations, 62 Urban District Councils, 14 Rural District Councils, and 52 Parish Councils; there are also 19 Boards of Guardians of the Poor.

THE LONDON COUNTY COUNCIL

The Council was constituted by the Local Government Act, 1888, and is the authority for the administration of the County of London, which has an area of 116·95 miles. The Council consists of **19 Aldermen and 118 Councillors** (but in Oct. 1908 the Council adopted a recommendation in favour of the increase of the membership from 137 to 154). The aldermen sit for six and the councillors for three years. Under the London County Council Electors' Qualification Act, 1900, every parochial elector is entitled to vote at the election of a London County Councillor. No elector can legally vote more than once in the county at the same election.

The last election, the ninth, took place on Thursday, March 6, 1913. The party results of this and the previous elections were as follows :—

	Progressives	Municipal Reformers*	Independents
1889 . .	71	47	—
1892 . .	84	34	—
1895 . .	59	59	—
1898 . .	70	47	1
1901 . .	84	32	2
1904 . .	83	34	1
1907 . .	38	79	1
1910 . .	58	60	—
1913 . .	51	67	—

* Called Moderates 1889–1904.

MEMBERS OF THE COUNCIL

The members elected on March 6, 1913, or since that date, to represent the various electoral divisions are given below. The figures in brackets denote the number of electors on the last-compiled register. An asterisk denotes that the member was also in the former Council.

Battersea (18,717)

W. R. Warren (P.) .	5483
W. J. West (P.) . .	5451
Capt. H. Ramsden (M.R.) . . .	4502
G. B. Piggott (M.R.) .	4502

Bermondsey (12,959)

*W. H. Ecroyd (P.) .	2951
M. Shearman, jun. (P.) .	2820
Ald. Stickland (M.R.) .	2462
Maj. Swiney (M.R.) .	2409
Dr. A. Salter (Lab.) .	1632
C. G. Ammon (Lab.) .	1374

Bethnal Green, North-East (10,044)

*Garnham Edmonds (P.)	2731

Those marked *e* form the Education Committee, together with the following co-opted members: Miss Mary Beeton, G. L. Bruce, Miss C. S. Bulcraig, Dr. Morgan I. Finucane, Miss Margaret Frere, Harold Hodge, Dr. Sophia Jevons, T. B. Napier, Rev. W. J. Sommerville, Rev. Canon R. D. Swallow, and Miss Amy Tomes.

Chairman of the Council, Alfred F. Buxton.
Vice-Chairman, W. J. Squires.
Deputy-Chairman, H. H. Gordon.
Chairman, Education Committee, J. W. Gilbert.
Vice-Chairman, H. W. Liversidge.

THE COUNCIL'S OFFICERS

Clerk, James Bird	£1,600
Deputy do. M. H. Cox	£800
Comptroller, H. E. Haward	£2,500
Deputy do. C. D. Johnson	£1,000
Chief Engineer, G. W. Humphreys	£2,000
Chief Assist. Eng. W. C. Copperthwaite	£1,000
Architect, W. E. Riley	£2,000
Chief Assist. do. J. Briggs	£1,000
Solicitor, E. Tanner	£1,500
Deputy do. D. P. Andrews	£1,000
Medical Officer of Health, W. H. Hamer	£1,250
Deputy do. Dr. W. Butler	£1,000
Valuer, Frank W. Hunt	£1,500
Chief Officer, Public Control, J. Ollis	£1,000
Chief Officer, Parks Department, Major P. Maud, C.M.G.	£750
Housing Manager, S. G. Burgess	£800
Educational Adviser, Dr. W. Garnett, D.C.L.	£1,500
Education Officer, Sir Robert Blair, M.A.	£1,500
Deputy do., B. M. Allen	£1,000
Chief Officer Fire Brigade, Lt.-Commdr. Sampson Sladen, R.N. (£1,000, with allowances).	
Chief Officer of Tramways, A. L. C. Fell	£2,000
Deputy do., J. K. Bruce	£1,000
Chief Officer of Stores, F. W. Mackinney	£1,000
Central Offices, County Hall, Spring Gardens, S.W.	

The **new County Hall** which was being built on the Surrey side of the Thames between Westminster and Charing Cross Bridges, from the plans of Mr. Ralph Knott, who in 1908 won the architects' competition for designs for the Hall, is temporarily suspended during the war. The building, the foundation-stone of which was laid by the King in March 1912, will be in the English Renaissance style, over 700 ft. long, and 6 stories high.

STATISTICS

The estimated **expenditure** for 1916–17 on rate and debt accounts amounted in total to £11,784,349. The estimated **income** was £3,498,536, giving a net expenditure of £7,105,582 to be raised by rate. Of the total estimated net expenditure £3,247,857 was on account of debt, and £1,066,277 on account of education (£447,995 for elementary and £6,427,686 for higher education). The net additional cost to the Council in 1916–17 on account of war service allowances is £5,199,685.

The **assessable value of the County** was, on April 6, 1916, £45,252,413, of which sum £5,830,988 represented the assessable value of the City of London and the inner and Middle Temples. A penny rate was estimated to produce to the Council £188,552.

The **Council's rates** have been as follows:—

1889–90	12½*d.*	1907–8	Ord. 17*d.*, Ed. 18*d.*
1890–91	13¼*d.*	1908–9	Ord. 17*d.*, Ed. 19*d.*
1891–92	11¾*d.*	1909–10	Ord. 17*d.*, Ed. 19¾*d.*
1892–93	12½*d.*	1910–11	Ord. 17*d.*, Ed. 20¼*d.*
1893–94	13*d.*	1911–12	Ord. 17*d.*, Ed. 21¼*d.*
1894–95	14*d.*	1912–13	Ord. 17*d.*, Ed. 21¼*d.*
1895–96	15*d.*	1913–14	Ord. 17*d.*, Ed. 23*d.*
1896–97	15*d.*	1914–15	Ord. 17½*d.*, Ed. 25*d.*
1897–98	14*d.*	1915–16	Ord. 17¾*d.*, Ed. 23¼*d.*
1898–99	14*d.*	1916–17	Ord. 17*d.*, Ed. 21*d.*
1899–1900	13½*d.*		
1900–1	14½*d.*		
1901–2	15*d.*		
1902–3	15½*d.*		
1903–4	16¾*d.*		
1904–5	Ord. 17·750*d.*, Ed. 8·125*d.* (½-year's charge)		
1905–6	Ord. 17*d.*, Ed. 18*d.*		
1906–7	Ord. 17*d.*, Ed. 19*d.*		

The Council's **net debt** at the end of March 1916 stood at £51,162,653, the principal items therein being one million pounds odd for bridges, £900,000 for fire brigade, six million odd pounds for main drainage, one million pounds for parks and open spaces, nine million odd pounds for street improvements, two and a quarter million pounds for tunnels, eleven and three-quarter million pounds for education, two million pounds for asylums, four million pounds for dwelling-house improvement and housing of the working classes, and nine and three-quarter million pounds for tramways.

The total **stock** outstanding, with the dates of redemption in brackets, in 1916 was:—Metropolitan Consolidated Stock, 3½% (1929) £14,556,678, 3% (1941) £9,958,571, 2½% (1949) £6,027,577; London County Consolidated Stock, 2½% (1920), £5,442,930, 3% (1920) £25,876,716, 3½% (1929) £10,000,000, or a grand total of **£71,862,472.**

London has 54 **theatres** with seating accommodation for 64,919 persons, 51 **music-halls** and **theatres of varieties** with seating accommodation for 76,370 persons, and 790 other places licensed for public entertainments. It has 5,927 on-license **public-houses** and beer-houses, and 2,290 off-licensed premises. It has 6,665 acres of **parks** and **open spaces**, 92 **public libraries**, 18 **museums** and **art galleries.** The number of **post offices** transacting ordinary post-office business is 1,114; the number of employees in the London postal service is 37,530, of whom 12·2 % are women. There are 172,404 dogs in London. Public telephone call offices number 2,672, and private call stations, 14,811.

The supply of **gas** in London is in the hands of three companies, the Commercial, Gas Light and Coke, and South Metropolitan Cos. The Commercial has 290 miles of mains and 111,947 customers; the Gas Light and Coke 2,620 miles of mains and 774,913 customers; and the South Metropolitan 1,292 miles of mains and 369,731 customers. Of the 1,256,591 gas meters in use, 856,885 are automatic meters. The total gas sold in 1913 was 43,922,191,000 cubic ft. The number of public lamps lit by the companies was 74,455. The revenue of the three companies was £7,887,828, and their working expenses £6,217,767. The supply of **electricity** to London is in the hands of no less than 16 local authorities and 13 companies. The local authorities had in 1913 44,333 customers and a capacity of 87,621 k.w. The companies had 99,647 customers and a capacity of 172,711 k.w. The local authorities generated 134,175,831 units and the companies 230,080,277 units. The local authorities had a revenue of £882,910 and an expenditure of £401,774; the companies had a revenue of £1,843,345 and an expenditure of £727,067.

Consult "London Statistics," published annually by the Council. For the work of the London Education Committee *see* article on EDUCATION.

LONDON TRAFFIC

In 1914 there were 628 **railway stations** in Greater London and 669 route-miles of railway.

The total length of **tramways** in London is about 157 street miles, almost entirely owned by the County Council. The total **capital expenditure** of the Council on its tramways undertaking to March 31, 1915, amounted to £13,357,696. The estimated passenger receipts for 1915–16 are put down at £2,478,000, giving a surplus on working of £795,735, but owing to payment of interest on capital expenditure and provision for repayment of debt, an estimated deficiency of £91,614 is expected.

The total mileage of tramways in Greater London is 353 miles. The London County Council tramways in 1914–15 carried 550,497,993 passengers; 58,978,792 car miles were run, and passenger receipts amounted to £2,399,846. The average revenue from passengers per car mile was 8·93*d.* and the average working expenses per car mile 6·55*d.* Workmen's cars carried 77,031,743 passengers. The length of streets traversed by **motor omnibuses** in the county of London in 1914 was 278—158 miles being north of the river and 120 south of the river. The number of motor omnibuses licensed in 1914 was 3,522.

The problem of London traffic has for many years been an urgent one. In 1903–5 it was inquired into by a Royal Commission [Report Cd. 2597 of 1905 and 7 vols. of evidence and Appendices], which considered the problem from the point of view of the means of locomotion rather than the safety of the pedestrian. The Royal Commission recommended the formation of a Central Traffic Board and made many other suggestions which, if adopted, would have tended in the direction of public safety. Nothing, however, was done to carry out the recommendations of the Commission. In the meantime the development of mechanical traction and the alarming increase of fatal accidents once more drew attention to the problem, and in 1912 a Select Committee was appointed to inquire into and report upon the best means for securing greater safety in the streets of the Metropolis. Its Report pointed out the change of conditions in the London streets in the last few years. In 1907 there were 3,866 horse cabs and 5,952 hansoms licensed. In 1914 there were only 1,391 of the two together. In 1907 there were 2,961 horse omnibuses and tramcars and 2,973 electric trams and motor omnibuses. In 1913 there were 6,308 electric trams and motor omnibuses, and only 182 horse omnibuses and tramcars, while 8,387 motor cabs had been registered up to June 30, 1914, and the disproportion is daily increasing, especially in the case of heavy commercial vehicles, which are steadily replacing horse power. The faster moving motor vehicle has helped in the migration of population from the Inner Ring to the Outer Ring, as evidenced by the growth of traffic in the seven years. The following figures give the London traffic for 1914:—

Tramway passengers .	846,000,673
Omnibus passengers .	756,591,847
Local railway passengers .	462,019,537
Trunk railways from a 30-mile limit	250,000,000
	2,314,612,057
Population of Greater London .	7,465,278

At the same time the number of fatal street accidents in Greater London continues to increase:—

1911	1912	1913	1914
451	562	625	658

The number injured were:—

1911	1912	1913	1914
20,798	22,270	25,839	26,492

Of the fatal accidents during the three years 1910–11–12, 34% were children and 16% over 60 years of age. From the statistics presented to the Committee they came to the conclusion that neither lack of lighting nor narrow roads had any great bearing upon the number of fatal accidents. As a whole, power-driven vehicles are twice as dangerous as horse-drawn vehicles, and although the motor omnibus stands out as the most dangerous type of vehicle, each year has recently shown a substantial reduction in its danger.

LONDON FIRE BRIGADE

Since its establishment in 1866 the strength of the Brigade has increased six-fold, and the appliances, etc., have increased in proportion. There are now 1,355 officers and men, as well as a civil staff of about 128, engaged in the (*a*) inspection,

(*b*) workshops, and (*c*) hydrant departments; of these about 300 are on war service. The horsed fire-engines are gradually being replaced by motor fire-engines, of which there are 38. The **area protected** is about 117½ square miles, including the City and County of London, and extends roughly from Highgate in the North to Sydenham in the South, and from Roehampton in the West to Plumstead in the East. The estimated cost of maintaining the brigade during the financial year 1915–16 (including pensions) was £301,355. Towards this sum the **fire insurance companies** contribute £39,704, the **Government** £10,000, and miscellaneous receipts amount to £2,750. The **report** of the chief officer of the brigade for the year 1914 shows an increase in the number of fires of 232 as compared with those in 1913. The number of **calls** for fires, or supposed fires, received during the year was 6,125. Of these 1,859 were **false alarms,** and 657 were calls for chimneys on fire.

Chief Officer, Lieut. S. Sladen, R.N. . . £1,000
Divisional Officers, Sidney G. Gamble, C.E. (£650), and A. R. Dyer . . . £500
Assistant Divisional Officers, C. C. B. Morris and Lieut. H. Spencer, R.N. (both latter on war service) . . £400
Chief Clerk, W. G. Coles.
Headquarters: 94 Southwark Bridge Road, London, S.E.

LONDON SALVAGE CORPS

Established in 1866 by the Fire Insurance Companies on the transfer of the London Fire Establishment to the Board of Works, when the Metropolitan (now London) Fire Brigade was organised. The Corps is maintained by contributions from the principal Insurance Companies. There are five stations, all in connection by telephone, and also in communication with the Fire Brigade, in various parts of the Metropolis, and the men and plant are highly efficient. The number of fires attended by the Corps during 1915 was as follows: Inside the Metropolitan area, 2,168; outside, 94; total, 2,262. At nearly all of these, services of a valuable character were rendered on behalf of the Offices interested. The staff of the Corps consists of 1 chief officer, 5 superintendents, 12 foremen, 20 1st-class men, 19 2nd-class men, 50 3rd-class men, a number of auxiliaries in training, and 12 chauffeurs and coachmen. Only men of the Royal Navy are taken. The following is a list of the stations: (East) Commercial Road, E., Supt. W. Sleat; (South) Southwark Bridge Road, S.E., Supt. R. E. Dobbing; (West) Shaftesbury Avenue, W., Supt. W. J. Blyth; (North) Upper Street, Islington, Supt. W. Haughton; (Central) *Headquarters:* 63–66, Watling Street. Supt. C. Allison is in charge, and the *Chief Officer*, Lieut.-Col. Fox, resides there.

THE CORPORATION OF THE CITY

The Corporation of the City of London consists of the whole body of the citizens or freemen, under the style of "the Mayor, Commonalty, and Citizens." The small portion of this great Metropolis which is comprised within the **City** and its liberties is divided into 27 **wards,** including Bridge Without. There is an alderman for this ward, but no freemen and no common councillors. Each of the other wards, with the exception of the two wards of Cripplegate Within and Without (which

L. A. Newton	Cordwainer	1916	1916	—

return an alderman jointly), **elects one alderman** and **a number** of **common councillors** varying from 4 to 16, but amounting in all to a total of 232; or, in other words, 26 aldermen and 206 commoners. An **alderman** is elected when a vacancy occurs, and **holds office for life**; the **councilmen** are elected on St. Thomas's Day (Dec. 21), and hold **office for one year**, but are of course eligible for re-election. The **electors** must in each case be rated householders before they can vote at a ward-mote, as a meeting of the ward is termed. A **liveryman** is a **freeman** who, **by payment** of a fee, has entered the livery of one of the ancient City companies or guilds, and was first so called because he was entitled to wear the livery of his company. He has the right to vote at the elections of Lord Mayor, Sheriffs, Chamberlain, and other Corporation officers, and also for M.P.'s for the City.

The **Lord Mayor** is **elected** on Sept. 29 by the **liverymen** of the several companies assembled together at the Guildhall, and as it is termed in Common Hall; to be eligible he must have served as Sheriff of London. The Livery may select any alderman thus qualified, but they almost invariably accept the names of the two senior aldermen who have not passed the civic chair. The Lord Mayor is styled "right honourable," and, although not actually of the Privy Council, he attends when, on the demise of the Crown, the new sovereign is proclaimed; and at the Coronation he is present as chief butler, receiving therefor a golden cup and cover.

Each alderman is a justice of the peace, and may preside at the Guildhall or Mansion House justice rooms. Each is a commissioner of the Central Criminal Court, which is held in the Sessions House on the site of the Old Bailey.

The Aldermen are the bench of magistrates for the City, the visiting justices to the prisons; they admit freemen, and decide disputes at ward elections. When a vacancy in the aldermanic representation of the ward of Bridge Without occurs, they choose one of their number, usually the senior alderman, to fill it, whose successor in the ward he retires from is elected in the usual manner. They sit in the Court of Common Council, the full title of which is "Lord Mayor, Aldermen, and Commons of the City of London in Common Council assembled," and no business can be done unless some of each body be present. Meetings are held at the Guildhall on alternate Thursdays.

The Common Council manages the financial and general affairs of the Corporation, has charge of its own police, lets its lands, has full power over its funds, and has charge of certain of the Thames bridges. There are 30 committees. The work until then done by the Commission of Sewers was given to the Corporation of 1898, the Commission being dissolved.

Candlewick.— *Ald.*, Sir D. Burnett, Bt. *Dep.*, C. G. Algar; C. Game, W. Dennis, Sir E. H. Lamb, C.M.G., M.P., A. Gill, G. R. Blades.

Castle Baynard.— *Ald.*, Sir T. V. Bowater, Bt. *Dep.*, J. R. Brough; T. B. Callard, J. Wann, Rev. P. Clementi-Smith, J. Liddiard Evans, W. W. Jaggard, E. S. Jacob, Charles Newell.

Cheap.— *Ald.*, Sir W. H. Dunn, Kt. *Dep.*, W. H. Thomas; J. R. Pakeman, Col. J. W. Beningfield, Maj. L. A. Newton, M. Jenks, E. J. Trustram, W. H. Peat, E. S. Underwood.

Coleman Street.— *Ald.*, Sir J. C. Bell, Bt. *Dep.*, Sir F. G. Painter, Kt.; H. S. Dove, F. Brinsley-Harper, J. Gunton, F. Walker, L. Taylor, G. Billings, R. W. Regge.

Cordwainer.— *Ald.*, L. A. Newton; *Dep.* (vacant); J. F. Bennet, H. F. Hepburn, E. Hughes, C. P. Whiteley, F. Dean.

Cornhill.— *Ald.*, Sir E. E. Cooper, Kt. *Dep.*, M. Wilkinson; C. E. Atkins, M. R. Sewill, T. Goldney, A. C. Hays, W. A. Waterlow.

Cripplegate Within.— *Ald.*, Sir H. E. Knight, Kt. *Dep.*, Sir R. H. Rogers, Kt.; Sir R. Stapley, Kt., G. Briggs, W. Oatley, T. H. Wye, T. F. Rider, J. Hicks, H. Taylor-Taylor.

Cripplegate Without.— *Ald.*, Sir H. E. Knight. *Dep.*, J. Lake; G. T. S. Tranter, B. T. Swinstead, C. E. Scholes, F. H. Brundle, J. W. James, M. M. Samuel, W. J. Trice.

Dowgate.— *Ald.*, Sir G. W. Truscott, Bt. *Dep.*, J. D. Mathews; G. J. Berridge, E. H. Haywood, G. G. Stanham, A. T. Snell, A. E. L. Slazenger.

Farringdon Within.— *Ald.*, Sir J. J. Baddeley, Kt. *Dep.*, W. H. Pitman; *Dep.*, J. L. Grossmith; R. Peachey, D. G. Collins, S. J. Sandle, C. W. Whitaker, H. H. Wells, H. J. Dorée, B. F. Fletcher, F. Dewsbury, W. Fortescue, Col. G. P. Botterill, M. J. Lindsey, J. E. Hodder Williams.

Farringdon Without.— *Ald.*, Sir W. P. Treloar, Bt. *Dep.*, B. Turner; *Dep.*, A. C. Morton, M.P.; T. A. Woodbridge, W. H. Key, N. Fortescue, Sir A. L. Bower, S. Alderton, C. Hentschel, G. Lavington, F. Link, A. Jerrold-Nathan, C. Wilkinson, H. Shirreff, T. Darrington, Col. W. R. Smith, M.D., J. T. Hart.

Langbourn.— *Ald.*, J. W. Domoney, L.C.C. *Dep.*, W. M. Cross; Sir J. J. Runtz, Kt., H. D. Kimber, H. M. Gaydon, E. L. J. Durant, C. J. Smith, W. H. Savery, A. V. N. Neville.

Lime Street.— *Ald.*, Sir W. Wilkin, K.C.M.G. *Dep.*, J. K. Brown; H. D. Singer, A. Moore, H. R. Barrett.

Portsoken.— *Ald.*, Sir M. Samuel, Bt. *Dep.* L. M. Myers; B. Aarons, J. J. Redding, I. N. Jacobs, J. L. Venables, H. Jacobs, W. Leuw, F. S. Leuw.

Queenhithe.— *Ald.*, Sir T. V. Strong, K.C.V.O.

Dep., W. R. Pryke; E. E. Bond, T. Pimm, A. Todd, T. H. Platt, Capt. A. H. Teuten.

Tower.—*Ald.*, Lt.-Col. Sir J. Humphery, Kt. *Dep.*, F. Farman; Capt. R. G. Hall, W. W. Green, J. E. Layton, H. J. Newman, A. H. Heath, W. H. Pinnock, J. Aste.

Vintry.—*Ald.*, Sir H. B. Marshall, Kt. *Dep.*, Col. V. Dunfee; S. Spencer, F. G. Dray, W. J. B. Tippetts, J. S. Pollock, Sir F. Hadyn Green, Bt.

Walbrook.—*Ald.*, G. A. Touche, M.P. *Dep.*, G. H. Heilbuth; C. F. J. Jennings, H. P. Monckton, C. G. Kekewich, J. M. R. Francis, H. S. A. Foy.

Sheriffs, Major L. A. Newton and George Haysom.

Under-Sheriffs, E. J. Trustram and E. V. Huxtable.

The **Recorder** (Sir Forrest Fulton, K.C., salary £4,000, and £57 as steward of Southwark) is principal adviser of the Lord Mayor, and attends him on all occasions of State ceremony. He tries cases in the Lord Mayor's Court, is one of the judges in the Central Criminal Court, and is chairman of quarter sessions for the City. This officer is appointed for life by the Court of Aldermen, but he may not exercise any judicial functions unless he is appointed by His Majesty to exercise such functions. Sir Forrest Fulton was so appointed in 1900.

The **Chamberlain** (Adrian D. W. Pollock, salary £2,000) is elected by the Livery on Midsummer Day, and comes up annually for re-election. He receives the revenues of the Corporation or City cash, pays all salaries, charges, and outgoings, and has the custody of accounts, admits all duly qualified persons to the freedom, and is custodian of the records relating to freemen. He has also jurisdiction to punish refractory City apprentices, whom he sometimes commits to Bridewell. App. 1912.

The **Common Serjeant** (Sir F. A. Bosanquet, K.C., salary £3,000) is now appointed by the Crown; he attends the Lord Mayor on all state occasions, and is present at meetings of the Courts of Aldermen and Common Council; he is a legal adviser of the Corporation, one of the commissioners at the Central Criminal Court, a judge of the Mayor's Court, and acts on certain occasions as Deputy Recorder. App. 1900.

The **Town Clerk** or Common Clerk (Sir James Bell, salary £3,000) has the special privilege of signing documents with his surname only. App. 1902.

The **Remembrancer** (H. S. Sankey, salary £1,500) is the Ceremonial Officer of the Corporation, attends the Parliament House during session and watches the interests of the Corporation in all legislative matters. App. 1913.

Other officers include:—

Judges of City of London Court, L. A. Atherley-Jones, K.C.	£2 500
J. A. Rentoul, K.C.	£2,000
Assist. Judge of the Mayor's Court, F. S. Jackson	£750
Comptroller, E. A. Baylis	£2,000
Solicitor, Sir Homewood Crawford	£2,500
Secondary and High Bailiff of Southwark, Wm. Hayes	£1,300
Surveyor, S. Perks	£1,250
Engineer, E. E. Finch, M.I.C.E.	£700
Medical Officer, City of London, Dr. W. J. Howarth	£1,250
Medical Officer, Port of London, Dr. W. M. Willoughby	£800
Registrar of Mayor's Court, D. Harrison	£1,000
Registrar, City of London Court, J. Anstey Wild	£1,700
Assist. to do. E. B. Tattershall	£800
High Bailiff of do. R. Goodwin	£400
Principal Clerk to the Chamberlain, G. H. Payne	£750
Principal Clerk, Town Clerk's Office, A. Saunders	£750
Principal Clerk, Public Health Dept. W. P. Bicknell	£750
Head Master, City of London School, Rev. Arthur Chilton, D.D.	£1,250
2nd Master, F. W. Hill, M.A.	£600
Head Master of Freemen's Orphan School, W. W. Parkinson	£250
Head Mistress, City of London School for Girls, Miss Ethel Strudwick, M.A.	£400
Sword Bearer, Lt.-Col. J. C. Ker-Fox	£400
Common Crier and Sergeant-at-Arms, Col. T. J. Kearns, C.B.	£350
Librarian, B. Kettle	£700
Clerk to Sitting Justices, Guildhall, H. G. Savill	£1,000
Assist., S. Richards	£600
Clerk to the Lord Mayor, C. G. Douglas	£1,150
Keeper of the Guildhall, T. H. Hodges	£350
Marshal, Capt. A. E. Wood	£300

The **rateable value** of the City is £5,960,368; the **rateable value** of the City of Westminster is £6,821,491.

London Livery Companies

There have been 109 companies founded, but the **latest return** of the liverymen entitled to vote in elections in Common-hall only gives a total of 77. The liverymen of the Guilds who reside within twenty-five miles of the City borders have a vote in the parliamentary elections for the City. In 1880 it was estimated that the **trust and corporate income** of the companies was between £750,000 and £800,000, and the capital value of their property £15,000,000. The value of their plate and furniture was returned at about £300,000. The total **rent** of the **real property** is about £600,000, and there is a further source of income exceeding £100,000 a year from **investments.**

LIVERY COMPANIES

The Twelve Great Companies

	Income.	Master or Prime Warden.	Clerk.	Hall or Address of Clerk.
Mercers	£111,000	L. Peel Yates	L. W. E. Bicknell	4 Ironmonger Lane.
Grocers	38,000	Wm. Jas. Thompson, jun.	R. V. Somers-Smith	Princes Street.
Drapers	78,000	Gerald W. Williams	E. H. Pooley	27 Throgmorton Street.
Fishmongers	50,000	Rt. Hon. Sir Matthew Ingle Joyce	Sir Wrench Towse	London Bridge, E.C.
Goldsmiths	58,000	J. F. W. Deacon	Sir W. S. Prideaux	Foster Lane.
Skinners	66,000	W. Graham Thompson	J. J. Lambert	Dowgate Hill.
Merchant Taylors	50,000	Sydney E. Bates	E. Nash	30 Threadneedle Street.
Haberdashers	6,000	F. W. Imbert-Terry	J. Eagleton	The Hall, Gresham Street.
Salters	22,000	Wm. Thos. Pugh	S. W. Luard	St. Swithin's Lane.
Ironmongers	23,000	Chas. Edwin Noverre	J. F. A. Beck	117½ Fenchurch Street.

The Twelve Great Companies—*continued*

	Income.	Master or Prime Warden.	Clerk.	Hall or Address of Clerk.
Vintners	11,000	B. I'Anson Breach	C. Lomas	68½ Upper Thames St.
Clothworkers.	60,000	W. E. Horne, M.P.	P. M. Evans, M.A.	41 Mincing Lane.

The **other companies** (with order of precedence in brackets) are:

Apothecaries (58)	A. H. W. Ayling	A. M. Upton	Water Lane.
Armourers and Brasiers (22)	Michael B. Snell	Sydney Pitt	81 Coleman Street.
Bakers (19)	William Hatch.	F. C. Lingard	16 Harp Lane.
Barbers (17)	Francis Weston	F. C. Lingard	Monkwell Street.
Basketmakers (52)	W. W. Bullworthy	H. H. Bobart	Gresham College, E.C.
Blacksmiths (86)	E. C. D. Poulter	W. H. Garrett	65 Lower Thames Street.
Bowyers (38)	Norman D. Slee	H. E. Griffith	11 St. Bride's Avenue.
Brewers (14)	C. Lubbock	W. Higgins	Addle Street, E.C.
Broderers (48)	Rt. Hon. Viscount Midleton	G. W. Barber	13 St. Swithin's Lane.
Butchers (24)	John Thomas Hart	A. Pearce	87 Bartholomew Close.
Carmen (89)	R. N. Stollery	H. W. Capper	Cripplegate Inst., Golden Lane, E.C.
Carpenters (26)	Fred. Geo. Fitch	J. H. Freeman	68 London Wall.
Clockmakers (61)	G. W. Atkins	H. C. Overall	2 Basinghall Av., E.C.
Coachmakers (79)	John Philipson	Thos. Hy. Gardiner	8 Lincoln's Inn Fields, W.C.; The Hall, Noble Street, E.C.
Cooks (35)	Alfred Evans	G. C. Sherrard, M.A.	34 & 36 Gresham Street.
Coopers (36)	Adam Wm. Burn	E. L. Boyer	71 Basinghall Street.
Cordwainers (27)	F. S. Lidiard	C. H. W. Mander, M.A., LL.M.	7 Cannon Street.
Curriers (29)	Joseph Hicks	E. H. Burkitt	6 London Wall.
Cutlers (18)	Wm. C. Beaumont	W. H. Beaumont	4 Warwick Lane, E.C.
Distillers (74)	A. J. Norris	T. G. Vickery.	Guildhall, E.C.
Dyers (13)	Walter Dancer	M. M. Merriman	10 Dowgate Hill.
Fanmakers (84)	A. P. Bartley	H. D. P. Francis	19 Gt. Winchester St.
Farriers (55)	Robert McConnell	B. F. Popham	140 Leadenhall Street.
Feltmakers (64)	Fredk. James Asbury	A. Peachey	Arundel House, W.C.
Fletchers (39)	H. R. Simpson.	P. B. Shepheard	4 Broad St. Place, E.C.
Founders (33)	Edmund Lucas	C. F. Corbould-Ellis, J.P.	13 St. Swithin's Lane.
Framework Knitters (65)	Ernest T. Walker	P. Hedderwick	18 Essex Street, W.C.
Fruiterers (45)	R. M. Reid	J. Eagleton	40 Chancery Lane.
Gardeners (66)	Joseph Francis, J.P.	E. A. Ebblewhite, J.P.	5 Essex Court, Temple.
Girdlers (23)	Eustace Sherrard	W. D. Smythe	39 Basinghall St.
Glass Sellers (77)	Wm. H. Lock	G. J. Leckie	13 Queen Anne's Gate.
Glaziers (60)	G. P. Walford	Percy Tippetts	11 Maiden Lane.
Glovers (81)	Alderman James Roll	A. W. Burn	2 Moorgate St. Buildings.
Gold and Silver Wyre Drawers (112)	D. Haes	W. E. Baxter	9 Laurence Pountney Hill.
Gunmakers (80)	H. T. Barnett	D. C. Lee	46 Queen Victoria St.
Horners (60)	G. Rowland Blades	T. H. Deighton	90 Cannon St., E.C.
Innholders (32)	J. T. Gardner	F. Druce	10 Billiter Square.
Joiners (41)	John Russell Bedford	A. Bedford	11A Wormwood Street.
Leathersellers (15)	W. W. Palmer	G. F. Sutton, M.A.	St. Helen's Place.
Loriners (57)	W. Hardy King	C. F. J. Jennings	27 Walbrook.
Masons (56)	G. H. Judd	R. C. Hunter	9 New Sq., Lincoln's Inn.
Musicians (141)	Sir G. Wyatt Truscott, Bt.	T. C. Fenwick	16 Berners Street, W.
Needle Makers (53)	Edwin Arthur Fisher	C. D. King Farlow, B.A.	3 & 4 Crooked Lane.
Painters (28)	H. Mallam-Williams	T. M. Pritchard, B.A.	9 Little Trinity Lane.
Patten Makers (76)	Arthur C. Davidson	C. Fitch	Guildhall, E.C.
Paviors (56)	Charles Sheath.	W. P. Neal	62 London Wall.
Pewterers (16)	Sir Stephen Finney	C. W. Sawbridge	15 Lime Street, E.C.
Plaisterers (46)	Frederic Hudson	A. F. Mott	22 Bedford Row, W.C.
Playing Card Makers (83)	Wm. Hayes, M.A.	Edwin Hayes (*actg.*)	28 Basinghall St., E.C.
Plumbers (31)	W. D. Caroe	W. R. E. Coles	28 Fish Street Hill, London Bridge.
Poulters (34)	H. A. de Colyar, K.C.	C. R. Rutherford, M.A.	87 Bishopsgate.
Saddlers (25)	H.R.H. Duke of Connaught	H. Jenner-Fust, jun. M.A.	141 Cheapside.
Scriveners (44)	Alan C. Comerford	T. J. Wootton	65 London Wall.
Shipwrights (59)	Rt. Hon. Ld. Allerton, F.R.S.	A. D. Hansell.	14 Gray's Inn Square.
Spectacle Makers (60)	Sir John F. L. Rolleston		Temple House, Temple Avenue, E.C.
Stationers (47)	H. Hanslope Cox	R. T. Rivington, M.A.	Stationers' Hall, E.C.,
Tallow Chandlers (21)	Percy E. Johnson	M. F. Monier-Williams	4 Dowgate Hill.
Tin Plate Workers (67)	Col. W. N. Davis, V.D.	E. A. Ebblewhite, J.P.	5 Essex Court, Temple.

The Livery Companies—*continued*

	Master or Prime Warden.	Clerk.	Hall or Address of Clerk.
Turners (51)	Thomas Estall, J.P.	W. M. Shirreff	53 Gresham House, E.C.
Tylers and Bricklayers (37)	Richard Moreland, jun.	A. H. Bird	6 Bedford Row, W.C.
Upholders (49)	G. S. Fish	D. J. Crump	17 Leadenhall St.
Wax Chandlers (20)	Ed. Chas. Todd	T. R. Bridgwater	Gresham Street, E.C.
Weavers (42)	Horace B. Nelson, D.C.L.	W. Wickens	70 Basinghall Street.
Wheelwrights (73)	Lt.-Col. T. H. Openshaw, C.M.G.	T. Harvey Hull	Guildhall, E.C.
Woolmen (43)	J. A. Cowland	P. C. C. Francis, M.A.	19 Great Winchester St.

LONDON BOROUGH COUNCILS

The **London Government Act, 1899**, divided the administrative county of London (with the exception of the City), which had formerly been under the rule of over 120 local authorities, including Vestries, District Boards, Burial Boards, etc., into 28 Municipal Boroughs, each under a Municipal Council.

All **persons qualified to vote** at a Parliamentary and County Council election in London can vote at an election of borough councillors, with certain "separate list" voters in addition. Women, if otherwise qualified, may vote. This franchise is the same as that in the case of the elections of guardians and vestries since 1894. A woman is eligible for the office of councillor. The **Mayor of a London Borough** is by virtue of his office a justice of the peace for the County of London; he is not disqualified by reason of being a solicitor practising or carrying on business in the County of London or the City, but he is not to practise as a solicitor before any justices of the County of London.

The **first election** of councillors took place on Nov. 1, 1900; the **second** on Nov. 2, 1903; the **third** on Nov. 1, 1906; the **fourth** on Nov. 1, 1909; and the **fifth** on Nov. 1, 1912.

The **strength of parties** on the Councils elected in 1906, 1909, and 1912 was as follows:

	1906	1909	1912
Moderates or Municipal Reformers	996	1,004	1,002
Progressives	260	260	252
Independents	72	57	60
Labour and Socialist	34	41	48

METROPOLITAN WATER BOARD

The Metropolitan Water Board came into existence in 1903 under the provisions of the Metropolis Water Act, 1902. The fourth Board was elected in June 1913, and would have gone out of office in June 1916, but by order of the Local Government Board was continued in office for another year, under the Elections and Registration Act, 1915.

The Board is constituted on the principle of indirect election, namely, of representatives (66 in all) appointed by the County Councils of London, Essex, Herts, Kent, Middlesex, and Surrey, and by the Borough Councils and Urban District Councils comprised within the 559 square miles statutory area of the Board. There are on the fourth Board 15 original members of the Board first appointed in 1903.

Chairman, E. B. Barnard, D.L.
Vice-Chairman, G. S. Elliott, J.P.

Officials

Clerk, A. B. Pilling, F.C.I.S.	£1,750
Supervisor, F. W. Drake	£800
Surveyor, Harold Oxley, F.S.I.	
Statistical Officer, G. P. Warner Terry	
Chief Engineer, J. W. Restler, M.I.C.E., M.I.M.E.	£2,750
Chief Assistant Engineer, C. F. Marsh, M.I.C.E., M.I.M.E.	£700
Senior Assistant Engineer, G. O. Ritchie	
Accountant and Registrar of Debenture Stock, Arthur Newton	£1,100
Deputy Accountant, D. P. Hutchings	£750
Revenue Officer, Frederick Coffee	
Solicitor, Walter Moon	£1,200
Senior Assistant Solicitor, C. A. Hunt	
Director of Water Examination, A. C. Houston, M.D., D.Sc., 20 Nottingham Place, W.	£1,100
Senior Bacteriological Assistant, D. G. Sutherland, M.A., B.Sc., M.B.	
Senior Chemical Assistant, R. B. Floris, F.C.S., F.I.C.	
Head Offices, Savoy Court, Strand, W.C.	

The county distribution of the Board's statutory area is as follows:—

County.	Area. Sq. m.	Acres.
London	116	576
Essex	107	56
Hertford	22	556
Kent	159	82
Middlesex	97	431
Surrey	55	160
Total	558	581

The **funded debt** of the Board as at April 1, 1916, was:—

	Amount of Stock.	Interest.
(1) Metropolitan Water (A) Stock	£ 6,060,165	£ 181,805
(2) Metropolitan Water (B) Stock	35,115,839	1,053,475
(3) Redeemable Debenture Stocks	7,217,838	216,911
(4) Mortgage Loans	312,000	13,040
	£48,705,842	£1,465,231

In addition to the annual interest shown above, there are certain annuities and rent charges amounting to £7,900, making a total of £1,473,131—equivalent to 3·96d. per thousand gallons supplied.

The net **water rental** received by the Board during 1915–16 was approximately £2,929,221, or an increase of £7,305 over 1914–15. Notwithstanding the disturbance caused by the war, the collection for the half-year ended March 31, 1916, in respect of domestic supplies and fixed charges, was 94·23%.

The effect of the new charges imposed by the Board's Act, 1907, was to create a yearly **deficiency** which had amounted in 8 years to a sum of £602,022 by the end of the year 1915–16. But this deficiency is counterbalanced by the fact

that the Board have set aside no less a sum than £640,849 to a New Works Sinking Fund, being bound to do so by law. The total rateable value of the boroughs and districts in the Board's area directly represented on the Board, and liable to meet precepts for any deficiency that may arise, is as follows:—

In London	£45,259,046
In Extra-Metropolitan Counties .	11,700,039
	£56,959,085

The Board's staff numbers 918 officers (including 57 women), 3,374 workmen and others on weekly wages, and 139 service staff on weekly wages, at April 1, 1916. These figures include men on war leave, whose names accordingly remain on the pay-sheets, and temporary workmen engaged to fill their places.

The Board's supply of water is derived from the Rivers Thames and Lee, gravel beds near the Thames, the Chadwell Spring—which is the beginning of the New River—and wells sunk in the Lee Valley on the north of the Thames, in Kent, and certain other points south of the Thames.

The Board's supply (direct, and in bulk to adjacent undertakings) during the year was 89,264·2 million gallons of water, or a daily average of 243·9 million gallons. The grand total volume is equivalent to 398·5 million tons of water. The Thames furnished 57·6%, the Lee 25%, and the wells, etc. 17·4% of this total.

The total estimated **population** directly supplied by the Board at the close of the year was 6,773,105. It is estimated that in the direct area 55·6% was supplied from the Thames, 26·7% from the Lee, and 17·7% from the wells and springs. Of the total population 65·2% is north Thames, and 34·8% south of the river. The population inside London is 67·1% of the whole. The **daily average supply** per head was 35·76 gallons, compared with 36·08 gallons in 1914–15.

The effective amount of **storage** and subsidence reservoir capacity for unfiltered water possessed and in use by the Board at the end of the year was as follows:—

	No.	Area in acres.	Capacity in million gallons.
Thames Valley .	31	1,026·5	7,267·5
Lee Valley .	17	955·0	5,639·5
	48	1,981·5	12,907·0

Acting under the Defence of the Realm Acts, the Ministry of Munitions of War, on ground of urgent national necessity, directed the cessation of work on the reservoir in course of construction at Littleton, the plant and labour being required for the production of war material. This reservoir at Littleton will contain 7,000 million gallons, part of an authorised scheme to include a further reservoir to be constructed at Stanwell to contain 3,300 million gallons. The War has also interrupted the construction of the Board's new offices at Rosebery Avenue on the site of the New River Head, as also other works for the perfecting of the supply of water to the metropolis. This suspension includes a number of new works authorised by the Metropolitan Water Board Act, 1915, embracing the construction of reservoirs at Southgate, Eltham, Farnborough, Bromley, and Shoreham; a subway or tunnel underneath Dog Kennel Hill and Grove Lane, Camberwell; well and pumping-station in Eynsford; and a number of mains and pipes joining up these new reservoirs with existing reservoirs and works, and other subsidiary operations.

The Director of Water Examination submitted his 11th Report on Research Work during the year, which dealt with the excess lime method of purification of river water, with a note on water microbes, giving the cholera red reaction on first test. The report is not only of scientific interest, but of great practical importance. Copies were circulated to constituent and scientific authorities and placed on sale.

The following table shows at a glance the increases which have taken place under the Board in the active equipment of the water-works since the transfer of the undertakings:—

	Before June 1904	At Mar. 31, 1916
Storage reservoirs for unfiltered water . .	44	48
Acreage . . .	843	1,981·5
Capacity in million gals.	4,115·7	12,907·0
Service reservoirs for filtered water . . .	75	86
Capacity in million gals.	244·5	310·9
Filter beds . . .	137	172
Acreage . . .	139	170·7
Engines	235	280
Horse-power . .	32,177	43,252
Miles of water-pipes .	5,759	6,470

DOMINIONS ROYAL COMMISSION

In pursuance of a resolution of the Imperial Conference of 1911 (see 1912 ANNUAL), a Royal Commission was appointed in April 1912 "to inquire into the natural resources, trade and legislation of certain portions of His Majesty's Dominions." The Commission at present consists of Lord d'Abernon (Chairman), Sir A. E. Bateman, Mr. J. Tatlow, Sir H. Rider Haggard, Mr. Tom Garnett, and Mr. Wm. Lorimer (representing the United Kingdom); Sir G. E. Foster, K.C.M.G. (Canada); Donald Campbell (Australia); Hon. J. R. Sinclair (New Zealand); Sir J. W. S. Langerman (South Africa); Sir E. R. Bowring (Newfoundland), and Mr. E. J. Harding, Secretary.

The inquiry is embracing an investigation and report on natural resources and facilities for the production, manufacture, and distribution of articles of commerce in Canada, Australia, New Zealand, South Africa, and Newfoundland; on the trade of the Dominions with the United Kingdom and with the rest of the world; and on the food and raw material requirements of these Dominions and of the United Kingdom. The Commission took evidence in London during October and November 1912 on migration, natural resources, trade and legislation, and this evidence was published in two volumes during 1913. In Jan. 1913 the Commission embarked upon a tour of Australasia. Interim Reports and evidence dealing with Australasia, the Union of South Africa, Newfoundland, and the Maritime Provinces of Canada were published in 1914-15. The Commission was recalled from Canada, where it was taking evidence, in August 1914 owing to the war. In Sept. 1915 the Commonwealth of Australia withdrew its representative, believing that for the present the Commission could do no useful work. At the instance of the Canadian Government the Commission revisited Canada in the autumn of 1916, when it resumed its investigations and completed the hearing of evidence in the Dominion.

SCOTLAND

Scotland has an area of 29,796 square miles, nearly one-fourth of the area of the United Kingdom and about one-320th of the British Empire, exclusive of India. The population at the census of 1911 was 4,760,904—a little more than the population of London—constituting rather more than one-tenth of the population of the United Kingdom, and about one-twentieth of the population of the Empire, exclusive of India.

POPULATION

Year.	Males.	Females.	Total.
1861	1,449,848	1,612,446	3,062,294
1871	1,603,143	1,756,875	3,360,018
1881	1,799,475	1,936,098	3,735,573
1891	1,942,717	2,082,930	4,025,647
1901	2,173,755	2,298,348	4,472,103
1911	2,308,839	2,452,065	4,760,904

Year.	Births.	Deaths.	Marriages.
1912	122,790	72,340	32,516
1913	120,516	73,069	33,691
1914	123,934	73,557	35,049
1915	114,181	81,631	36,272

Of the total population of Scotland 3,140,419 live in the burghs, and 1,620,485 in the extra-burghal portions of the country. The burghal population has increased since 1901 by 188,999, or 6·4%; the extra-burghal population being 99,802, or 6·6%.

BOARD OF AGRICULTURE

Edinburgh

In 1911 a separate Department was created for Scotland, which up to that time had been within the jurisdiction of Whitehall. Estimates, 1916-17, £68,959.

Chairman, Sir Robert P. Wright . £1,200–1,500
Private Sec. J. J. Fogarty . . . .
Commissioners, R. B. Greig, LL.D., J. D. Sutherland (*Small Holdings*). . £1,000–1,200
Secretary, H. M. Conacher . . £850–1,000
Assist. ditto and Accountant, C. Weatherill £550–700
Head Inspector, J. Wood . . £600–800

LOCAL GOVERNMENT BOARD

125 George Street, Edinburgh

Estimates, 1916–17, £28,924

The **Annual Report** of the Local Government Board for the year ended Dec. 31, 1915, shows that on May 15, 1915, there were 103,072 (as compared with 104,124 in 1914) poor persons in receipt of relief, of whom 65,298 were paupers and 37,774 their dependants. Of the paupers 17,321 were lunatics and mental defectives. Male paupers numbered 25,056, and females 40,242. Of the sane poor, 75,037 received outdoor and 10,714 indoor relief. Of the sane paupers about 22% were 65 years of age or upwards, 19% children, and 59% between the ages of 14 and 65. The total number of persons in receipt of relief amounted to 22 per 1,000 of the population, but fully 9% of the poor relieved, chargeable to Scotland, were natives of England and Ireland.

The Board consists of the following :—

Ex-officio Members, The Secretary for Scotland (*President*), The Solicitor-General for Scotland, and the Permanent Under-Secretary for Scotland.

Appointed Members, Sir George McCrae (*Vice-President*). £1,200–1,500

Assist., Studio, Robert M. Adam . £150–250
Principal Gardener, Robert L. Harrow £150–250
Plant Propagator, Laurence B. Stewart £150–250

SCOTTISH LAW COURTS AND OFFICES

The principal Scottish Courts of Law having **civil jurisdiction** are (1) **the House of Lords,** which is the final Court of Appeal in Scottish as well as in English and Irish cases; (2) **the Court of Session,** sitting in Edinburgh, with its two main divisions, **the Inner House** and **the Outer House**; (3) **the Sheriff Courts.**

The principal Courts having **criminal jurisdiction** are (1) **the High Court of Justiciary,** (2) **the Sheriff Courts.**

The **Inner House** hears appeals from the **Lords Ordinary,** who are the judges of the Outer House sitting singly. The **Sheriff Courts** are territorial courts which try actions on contract, however great their value, and actions relating to heritable right or title, if the subject-matter is not more than £50 a year or £1,000 in value, but not actions relating to status. In most cases there is a right of appeal to the Inner House.

The **High Court of Justiciary** tries the more serious criminal cases, and hears appeals from the inferior quasi-criminal courts.

The following is a list of the **judges of the Court of Session,** or, as they are more properly designated, Senators of the College of Justice:

INNER HOUSE—*First Division*

The Lord President (Lord Strathclyde) . £5,000
Lord Mackenzie £3,600
Lord Johnston £3,600
Lord Skerrington £3,600

Second Division

The Lord Justice-Clerk (Lord Scott Dickson) £4,800
Lord Dundas £3,600
Lord Salvesen £3,600
Lord Guthrie. £3,600

OUTER HOUSE—*Permanent Lords Ordinary*

Lord Cullen £3,600
Lord Dewar £3,600
Lord Ormidale £3,600
Lord Hunter £3,600
Lord Anderson £3,600

Principal Clerk of Session, Edwin Adam, K.C. £1,100

Inner House Depute Clerks, John Paton, S.S.C.; I. Antonio . . . £500–600

Inner House, Ordinary Clerks, William Drummond, S.S.C.; R. A. Hannah £250–400

Outer House Depute Clerks, John Moir; John Cairns; Andrew Ross, S.S.C.; J. S. Saunders; John Smart . . £500–600

Outer House Assist. Clerks, R. Maxwell Main; Walter Stewart; R. A. Roxburgh; David D. McLaren; George Hume . . £250–475

High Court of Justiciary (1672)

Lord Justice General, Rt. Hon. Lord Strathclyde.
Lord Justice Clerk, Rt. Hon. Lord Scott Dickson.
Lords Comm. of Justiciary, all the other Judges.
Lord Advocate, Rt. Hon. Robert Munro, K.C., M.P.
Solicitor-General, Thomas Brash Morison, K.C.
Clerk of Justiciary, G. L. Crole, LL.B., K.C.
Assistants and Deputes, Geo. A. Slight; Alex. Rae.
Circuit Clerks, Geo. A. Slight; Alex. Rae.
Honorary Depute Clerk, Harry H. Macbean, W.S.
Advocates Depute, James Duncan Miller, K.C., M.P.; George Morton; James Crabbe Watt, K.C.; M. P. Fraser.
Crown Agent, Sir W. S. Haldane, W.S.

Crown Office

9 Parliament Square, Edinburgh

Crown Agent, Sir W. S. Haldane, W.S. . £1,300
Chief Clerk, W. D. Smart.
Second Clerk, J. K. Young.
Other Clerks, H. Weaver; R. L. Gauldie; V. S. M. Marshall; (one vacancy).

Justiciary Office

2 Parliament Square, Edinburgh

Clerk of Justiciary, G. L. Crole, M.A., LL.B., K.C. £700
1st Assistant and Depute Clerk, George A. Slight £600
2nd Assistant and Depute Clerk, Alexander Rae £475

Court of Lords Commissioners for Teinds

The Judges of the Inner House, and Lord Hunter, *Lord Ordinary on Teinds.*
Clerk of Teinds and Extractor, Andrew Murray £500

Exchequer

1 Parliament Square, Edinburgh

Lord Ordinary, Lord Cullen.
King's Remembrancer, Sir Kenneth Mackenzie, Bt.
Chief Clerk, P. P. Sealy, I.S.O.
1st Class Clerks, R. Mackinlay, William Vickers, D. G. Mackie.

Sheriff Court of Chancery

2 Parliament Square, Edinburgh

Sheriff of Chancery, George Watt, K.C., Adv. £500
Sheriff Clerk of Chancery, James Marchbank, S.S.C.
Depute Sheriff Clerk, D. C. Marchbank.

H.M. Commissary Office

2 Parliament Square, Edinburgh

Commissary Clerk, Ralph Richardson, W.S.
Depute ditto, Joseph Steele.

THE SCOTTISH POLICE

H.M. Inspector of Constabulary for Scotland, appointed under the County and Burghs Police Act, 1857, submits a report annually. According to that for the year ended Dec. 31, 1915, the authorised **strength of the force** was 5,952, of which 2,100 belonged to county forces and 3,852 to city and burgh forces. There are also 282 additional police who are privately employed. 305 temporary and 14,299 special constables were also enrolled. The aggregate cost of the police, excluding the additional police, privately employed and paid for, was £566,942, of which sum £180,000 was the Exchequer contribution, the rest falling on the local rates.

LOCAL TAXATION STATISTICS

The expenditure of the Parish Councils for the year ended May 15, 1914, for poor law purposes amounted to £1,609,358. Towards this £1,308,866 came from rates and £249,327 from grants and Local Taxation moneys.

The expenditure was divided as follows:

Ordinary Poor—Outdoor . .	£594,035
,, ,, Indoor . .	394,114
Lunatic Poor	451,946
General Administration Charges .	169,263

The average annual cost of maintenance of outdoor paupers was £7.19.7¼ per head, and of indoor paupers £30.5.7½.

The total payments to **local taxation accounts** in respect of duties assigned by various Acts to local purposes amounted for the year 1915-16 to £1,167,033, made up of £152,248 additional beer and spirit duties, £380,285 liquor and other licences, £354,085 under the Finance Act, 1894, and £181,975 under the Agricultural Rates Acts.

Carnegie Trust for the Universities of Scotland, The, was constituted in 1901 to administer a sum of $10,000,000, in bonds of the United States Steel Corporation, given by Mr. Andrew Carnegie for improving and extending the opportunities for scientific study and research in the Universities of Scotland, and rendering attendance at these Universities more available to the deserving and qualified youth of that country to whom the payment of fees might act as a barrier to the enjoyment of these advantages. *Chairman*, The Earl of Elgin. *Treasurer*, John Ross, solicitor, Dunfermline; *Sec.* Sir William S. McCormick; *Offices*, The Merchants' Hall, Edinburgh.

IRELAND

Ireland has an area of 32,559 square miles (including 31,798 square miles land area, and 761 square miles of rivers, lakes, and tideways). This area, which is somewhat greater than that of Scotland, constitutes rather more than a quarter of the area of the United Kingdom, and about one-300th part of the British Empire, exclusive of India. The population at the 1911 census was 4,390,219.

Population by Counties and Religion (with Acreage)

County.	Acres.	Roman Catholic Pop. (with percentages).	Non-Roman Catholic Pop.	Total Pop.	Emigrants, 1915.	Lieutenant.

* The figures for Antrim and Down include those parts of Belfast County Borough situated therein.

The population of Ireland has declined since 1841 as shown by the following figures:

Year of Census.	Population.	Population per sq. mile.
1801 . .	5,395,456	166
1811 . .	5,937,856	186
1821 . .	6,801,827	209
1831 . .	7,767,401	239
1841 . .	8,175,124	251
1851 . .	6,552,385	201
1861 . .	5,798,564	178
1871 . .	5,412,377	167
1881 . .	5,174,836	159
1891 . .	4,704,750	144
1901 . .	4,458,775	137
1911 . .	4,390,129	134

In 1911 the **males** numbered 2,192,048 and the **females** 2,198,171. Of the total population in 1911, 73·9% were returned as Roman Catholics, 13·1% as Protestant Episcopalians, 10·0% as Presbyterians, and 1·4% as Methodists. The **number of families** returned was 910,748. The number of **inhabited houses** was 861,879.

Year.	Births.	Deaths.	Marriages.
1912 . .	101,035	72,187	23,283
1913 . .	100,094	74,694	22,266
1914 . .	98,806	71,345	23,695

The Report on the Banking, Railway, and Shipping Statistics of Ireland for 1915 shows that on Dec. 31, 1915, the deposits in Ireland in Joint Stock Banks amounted to £66,803,000, the balances in Post Office Savings Banks to £11,781,000, and in Trustee Savings Banks to £2,490,000. Each of these three groups of deposits increased in the first six months, but decreased in the second six months of the year; the decrease is said to be largely due to investments in War Loan. The amount of Government stocks on which dividends are payable at the Bank of Ireland was £46,936,000 on Dec. 31, 1915; they increased by £2,232,000 in the first six months, and by £2,662,000 in the second half of the year. The total amounts of bills discounted, advances to customers, and loans on securities by the Irish Joint Stock Banks have decreased owing (1) to the much smaller accommodation required by farmers in consequence of the high prices they are receiving; (2) to the smaller requirements for such industries as building which have had to be curtailed; and (3) to the fact that the Banks, instead of investing large sums as formerly in discounting first-class paper in London, have preferred to buy Treasury Bills. The gross receipts of Irish railways increased from £4,634,000 in 1913, to £4,661,000 in 1914 and to £4,831,000 in 1915.

Imports and Exports at Irish Ports

	Imports.	Exports.
1911 . .	£66,784,536	£65,071,018
1912 . .	73,167,699	67,167,904
1913 . .	73,673,149	73,877,389
1914 . .	73,659,168	77,311,052

Live Stock Exports, 1914

Horses.	Cattle.	Sheep.	Pigs.
36,846	767,838	572,103	153,102

Local Taxation Account, Ireland

For the year ending March 31, 1915, payments in respect of the Local Taxation (Ireland) Account amounted to £1,562,389, made up of £41,244 Exchequer contribution under the Land Purchase (Ireland) Act, 1891, £727,655 agricultural grant under the Local Government (Ireland) Act, 1898, and £292,907 other grants under the same Act, £124,566 payment of customs and excise duties under the Finance Act, 1907, and £187,985 estate duties.

Poor Law Statistics

The number of indoor **paupers** on the last Saturday of March 1916 was 32,095, and of outdoor paupers 36,658. These figures represent a pauperism of 1 in every 63 of the estimated population of the country, as compared with 1 in 43 eleven years ago. The total poor relief expenditure amounted to £1,357,838.

Emigration

The collection of emigration returns for Ireland commenced in 1851, and the total number of emigrants who left Ireland from that date to the end of December 1915 amounts to 4,309,300, almost equally divided between males and females. The years of greatest emigration were 1851-4, 1863-5, and 1883, the total for *each* of these years being over 100,000. The total for 1915 (10,659) is the lowest yet recorded, those for 1914 (20,314), and 1908 (23,295) coming next. The following are the figures for the present century:

1900	45,288	1908	23,295
1901	39,613	1909	28,676
1902	40,190	1910	32,457
1903	39,789	1911	30,573
1904	36,902	1912	29,344
1905	30,676	1913	30,967
1906	35,344	1914	20,314
1907	39,082	1915	10,659

Of the 10,659 persons who emigrated in 1915, 2,905 came from Leinster, 1,550 from Munster, 3,790 from Ulster, and 2,414 from Connaught. The United States still takes the largest proportion, 6,681 making that country their destination in 1915; 597 emigrated to Canada, 347 to Australia, 53 to New Zealand, and 68 to South Africa.

ADMINISTRATION

Lord-Lieutenant, Rt. Hon. Lord Wimborne £20,000

THE IRISH JUDICIARY, ETC.

The House of Lords is the final Court of Appeal. There is a Supreme Court, divided into a Court of Appeal and a High Court of Justice, the latter being subdivided into (1) the Chancery Division (including the Landed Estates Court) and (2) the King's Bench Division (including the Courts for Probate and Matrimonial Causes, Admiralty, and Bankruptcy).

County Courts.—These have jurisdiction in matters of contract and tort up to £50, in equity and probate up to £500, and in lunacy up to £700. There is an appeal, in equity, to the Chancery Division or to a Judge of Assize; and, in common law, to a Judge of Assize.

Criminal Courts.—There are (1) the Court of Crown Cases Reserved, and (2) the Assize Courts, similar to those in England; also (3) Courts of Quarter Sessions (presided over by a County Court judge), with wider jurisdiction than in England; (4) the Courts of Summary Jurisdiction and Petty Sessions for preliminary inquiries and minor offences.

SUPREME COURT OF JUDICATURE IN IRELAND

Four Courts, Dublin—£112,570

Court of Appeal

Ex-officio Judges, Lord Chancellor, Lord Chief Justice, Master of the Rolls.

Chief Clerk, M. Colgan £600

ROYAL IRISH CONSTABULARY

This is a semi-military force, consisting of, in 1916–17, 235 head constables, 1,695 sergeants, 294 acting sergeants, and 7,636 constables; total, 9,860. They are drilled and disciplined as soldiers, live in barracks, and are armed with rifles, swords, bayonets, and revolvers. It was established by Act of Parliament in '36, is paid for out of Imperial funds, and is directly controlled by the Irish Government. In '67 the title of Royal Irish Constabulary was conferred on the force by command of H.M. Queen Victoria. The force discharges numerous civil services not imposed upon police forces in the United Kingdom.

Inspector-General, Brigadier-General J. A. Byrne £1,500–1,800
Deputy Insp.-Gen. W. A. O'Connell £1,000–1,200
Assist. do. W. M. Davies, E. H. Pearson, and H. D. Tyacke . . . £700–800
Prin. Staff Officer, H. M. Metcalfe . £600–800
Clerk in Charge of Acts, W. Campbell £600–800
Assist. do. G. McConkey . . £350–550
Staff Officers (*1st Class Clerks*), W. Kelly, J. Robb, W. J. Rundle (£350–500), J. J. Moore £300–400
Depot, Phœnix Park: Commandant, E. H. Pearson £600
Surgeon to the Force, Pryce Peacock, L.R.C.P. and S.I. £400
Barrack Master, O'Neill F. Kelly.
Adjutant, G. A. Morant.
Commissioner of Police, Belfast, Thomas J. Smith £600

County Inspectors (£350–500)

Antrim, R. D. Morrison, Lisburn.
Armagh, C. C. Oulton, Armagh.
Carlow, J. H. Price, Carlow.
Cavan, T. E. Galt-Gamble, Cavan.
Clare, J. F. Gelston, Ennis.
Cork, E.R., T. H. Howe, Cork.
Cork, W.R., Thos. Tweedy, Bandon.
Donegal, A. A. Roberts, Letterkenny.
Down, William Irwin, Downpatrick.
Dublin, R. G. C. Flower, Howth.
Fermanagh, John Hughes, Enniskillen.
Galway, E.R., E. M. Clayton, Ballinasloe.
Galway, W.R., G. B. Ruttledge, Galway.
Kerry, H. O'H. Hill, Tralee.
Kildare, K. L. Supple, Naas.
Kilkenny, P. C. Power, Kilkenny.
King's County, H. W. Crane, Tullamore.
Leitrim, R. C. Rainsford, Carrick-on-Shannon.
Limerick, H. E. W. Yates, Limerick.
Londonderry, E. G. Cary, Londonderry.
Longford, W. H. R. Heard, Longford.
Louth, F. C. V. Ireland, Dundalk.
Mayo, D. A. Steadman, Castlebar.
Meath, G. B. Heard, Navan.
Monaghan, E. P. Tyacke, Monaghan.
Queen's County, C. C. Yeldham, Maryborough.
Roscommon, F. R. St.L. Tyrrell, Roscommon.
Sligo, R. I. Sullivan, Sligo.
Tipperary, N.R., E. W. Mulliner, Nenagh.
Tipperary, S.R., W. H. Langhorne, Clonmel.
Tyrone, W. J. Miller, Omagh.
Waterford, W. P. C. Hetreed, Waterford.
Westmeath, R. I. Maunsell, Mullingar.
Wexford, J. R. Sharpe, Wexford.
Wicklow, H. B. Morell, Wicklow.
Offices, Lower Castle Yard, Dublin.

Table showing for Ireland and certain other countries the numbers of persons, cattle, sheep, and swine per 1,000 acres of total area.

—	Per 1,000 Acres of Total Area.			
	Persons.	Cattle.	Sheep.	Swine.

STATISTICS OF THE EMPIRE

The area of the British Empire and its Protectorates is about 11,500,000 square miles—more than one-fifth of the total land-surface of the world. The population exceeds 417,000,000—about one-fourth of the world's inhabitants.

The area and population of the British Empire are shown in the following table :

	Area in sq. m.	Population, 1911	Population per sq. m.
United Kingdom	121,000	45,217,000	373
India	1,802,000	315,156,000	177
Other Colonies and Possessions	9,451,000	56,845,000	6
	11,374,000	417,218,000	37

The following table shows the increase per cent. of the population of the United Kingdom and the principal colonies as compared with those of other countries in three intercensal periods :

Countries.	Increase per cent. in 1881 to 1891	Increase per cent. in 1891 to 1901	Increase per cent. in 1901 to 1911
United Kingdom	8·2	9·9	9·1
England and Wales	11·7	12·2	10·9
Scotland	7·8	11·1	6·4
Ireland (*decrease*)	*9·1*	*5·2*	*1·7*
Australian Commonwealth	41·1	18·9	18·1
New Zealand	27·9	23·3	30·5
Dominion of Canada	11·8	11·1	34·1
Indian Empire	13·2	2·5	7·1
Ceylon	9·0	18·6	15·1
Union of South Africa	—	—	15·1
Denmark	10·3	12·8	12·6
Norway	10·3	12·0	6·8
Sweden	4·8	7·3	7·5
German Empire	9·3	14·0	15·2
Austria	7·9	9·4	9·3
Hungary	11·0	10·3	8·5
The Netherlands	12·4	13·1	14·8
Belgium	9·9	10·6	10·9
France	1·8	1·6	1·6
Switzerland	3·1	13·4	13·2
Italy	—	—	6·8
United States	25·5	20·7	21·0

The following table compares in "round numbers" the area and present population of the United Kingdom with the areas and populations of other countries forming the motherlands or administrative centres of widespread dominion :

	Sq. miles (Thousands)	Pop. (Millions)
United Kingdom	121	45
China	1,532	407*
France	207	40
Germany	209	65
Russia	2,052	105
U.S.A.	2,974	92

The following table compares the area and present population of the over-sea dominions and dependencies of Great Britain with the areas and populations of the provinces and dependencies of the countries named above :

	Sq. miles (Thousands)	Pop. (Millions)
British	11,254	372
Chinese	2,745	26
French	4,000	46
German	1,026	13
Russian	6,326	23
U.S.A.	716	10

The following table, combining the figures of the two tables which precede it, compares the area and population of the whole British Empire with the areas and populations of the countries above named and their provinces and dependencies :

	Sq. miles (Thousands)	Pop. (Millions)
British	11,375	417
Chinese	4,277	433*
French	4,207	86
German	1,235	78
Russian	8,378	128
U.S.A.	3,690	102

The total **revenues of the Empire** amounted to about £75,000,000 in 1837. In 1913 the revenues of the Empire amounted to over £400,000,000.

The total **trade of the British Empire with Foreign Countries** was :

	1890	1912	1913
Imports	£408,053,000	£823,850,000	£845,475,000
Exports	319,795,000	669,158,000	711,684,000

The **trade of the United Kingdom with British Colonies and Possessions** was :

Imports	101,080,000	236,316,000	240,899,000
Exports	106,518,000	218,267,000	231,566,000

The **Intercolonial Trade** was :

Imports	34,697,000	82,705,000	79,062,000

The **percentage proportions** were :

Foreign trade	75·0	73·5	73·8
Inter-Imperial trade	25·0	26·5	26·2

The late Sir Robert Giffen, at the meeting of the British Association in 1903, put forward the following estimates as to the **aggregate income and wealth** of the people of the British Empire at that date :

Aggregate Income

United Kingdom	£1,750,000,000
Canada	270,000,000
Australasia	210,000,000
India	600,000,000
South Africa	100,000,000
Remainder of Empire	200,000,000
Total	£3,130,000,000

Capital or Wealth

United Kingdom	£15,000,000,000
Canada	1,350,000,000
Australasia	1,100,000,000
India	3,000,000,000
South Africa	600,000,000
Remainder of Empire	1,200,000,000
Total	£22,250,000,000

* The figures for China are official, but are believed by European authorities to be greatly exaggerated.

THE EMPIRE OF INDIA

The Indian Empire is a great country of Asia under British rule, having an *area* of 1,802,657 sq. miles and a *population* at the 1911 census of 315,156,396, an area and population almost equal to the area and population of Europe without Russia. Part of the territory is under the direct administration of British officials, and part consists of native states, all subordinate, in varying degrees of relationship to the suzerain power. There are many different races, speaking upwards of 200 different languages.

Boundaries.—India is separated on the N. from the rest of Asia by vast ranges of mountains, known as the Himalayas. The north-west corner is formed by Kashmir, from where southwards India is separated from Afghanistan by the Safed Koh and Suliman ranges; on the W. and S.W. the Arabian Sea and Indian Ocean form boundaries. On the E. the Bay of Bengal stretches, until on the N.E. the Himalayas again, as on the N.W., throw out spurs which separate Eastern Bengal from Assam and Burma. On the S.E. a succession of ranges separate Burma, running down to Point Victoria (9° 59′ N., 98° 32′ E.) from the neighbouring kingdom of Siam. In addition to the territory comprised within these boundaries there are the Andaman and Nicobar Islands, the Laccadive Islands, Aden, and Perim, as well as protectorates over Socatra, Bahrein, Basra, and other districts and chieftainships in Arabia and the coast of the Persian Gulf.

Population.—The population of the Indian Empire at the 1911 Census showed that it constituted more than three-fourths of the population of the entire Empire. The details are as follows:

PROVINCE, STATE, OR AGENCY.	Area in Square Miles.	PERSONS.				
		Male.	Female.	Total.	Urban.	Rural.
Ajmer-Merwara	2,711	266,198	235,197	501,395	140,394	361,001

Physical Features.—Apart from Burma, the whole territory of India may be described as consisting of three separate and well-defined tracts, viz. the Himalaya region, the northern river-plains, and the southern table-land.

The Himalayas.—The Himalayas consist of ranges of mountains, with the loftiest peaks in the world. They extend for a distance of some 1,500 miles along the northern frontier of India, and contain the sources of all the great rivers that drain India and Burma. The three highest peaks are those of Mount Everest, 29,002 ft.; Mount Godwin-Austen, 28,250 ft.; and Kinchinjunga, 28,146 ft. The

ordinary limit of perpetual snow is about 18,500 ft., though there are years in which the ranges may be crossed at that height without finding any snow upon them. On the slopes of the Himalayas are many "hill stations," such as Simla, Naini Tal, Darjeeling, etc., the mean summer temperature of which is about 65° F. The flora of this district varies considerably, the humid regions of the east being covered with dense forest up to 12,000 or 13,000 ft., though the tropical forms usually cease at about 5,000 ft. Cultivation, except in the valleys behind the largest peaks, seldom extends above 7,000 ft. Rhododendrons begin at about 6,000 ft., and flourish right up from 10,000 to 14,000 ft. The pine, oak, fir, deodar, and other trees are common, but few are of much value. The cinchona, introduced from South America, is being successfully grown in the Sikkim Himalaya. The fauna of the Himalayas, owing to the vast range of temperature, is extremely varied, particularly with regard to birds. The yak, musk-deer, wild sheep and goat, fox, wolf, lynx, ounce, marten, and ermine are common. Bears and leopards are frequent, and the tiger wanders to considerable elevations. The elephant occurs in the outer forests as far as Jumna, and the rhinoceros as far as the Sarda. Of reptiles, the python and other venomous species occur in the hotter regions, and the cobra is found as high as 8,000 ft.

The Great Plains extend from the Bay of Bengal on the east to the Afghan frontier and the Arabian Sea on the west. They contain the most densely populated provinces of the empire, and are watered by the three great river-systems of the Indus, Ganges, and Bramaputra. These rivers collect the drainage of the slopes of the Himalayas, and with it, water the great plains through which they flow. By modern developments of engineering, the waters of the Indus and Ganges, with their tributaries, are available, through an extensive system of irrigation by canals, over a wide area.

The Southern Table-land or Deccan (Dakshin) covers the southern part of the Indian Peninsula. It rests, on its northern side, on the range of the Vindhya mountains, which, in ancient times, formed a barrier between northern and southern India. The other two sides of the southern triangle are known as the Eastern and Western Ghats. Within these ranges is a triangular plateau of from 1,000 to 3,000 ft. above the level of the sea. Here and there are various ranges, the best known being the Nilgiris, which contain the summer capital of Madras, Ootacamund, some 7,000 ft. above the sea. The climate varies much according to the height of the mountain ranges; near the coast the moisture is excessive, but in the central table-lands the rainfall is low and the heat excessive. Forests, under the India Forest Service, cover nearly 20,000 sq. miles. teak, ebony, rosewood, sandalwood, and redwood abounding. The elephant, bison, sambar, and ibex are common, and snakes everywhere abound. Crops include cotton, indigo, coffee, tea, cinchona, tobacco, sugar-cane, and chilies. The principal food staples are rice and millet.

Climate.—The climate of India ranges through all the extremes of climate known to the tropical and temperate zones. In Northern India the characteristics are land winds, with dryness of the air; the winters are rather cold. In Southern or tropical India there is a greater uniformity of temperature, with greater dampness of the air. There are two great divisions of the year, the dry season or N.E. monsoon, and the rainy season or S.W. monsoon. This latter usually sets in during the first fortnight in June and lasts the better part of three months. The most unhealthy part of the Indian year follows after the rains, and malaria is then most prevalent.

Caste.—Caste is defined in the Census report of 1901 as a collection of families or groups of families bearing a common name, which usually denotes or is associated with a specific occupation; claiming common descent from a mythical ancestor, professing to follow the same calling, and forming a single homogeneous community. The whole life of the modern Indian is regulated by the inexorable rules as to caste, which forbid him to marry outside the group to which he belongs, his social status also being regulated or the occupation of his group, and their habits in respect of diet. At the census of 1911 six chief castes were distinguished, the Sheikh, the Brahman, and the Chamar being the most numerous.

Religions.—The religions of India, according to the 1911 census, include 217,569,343 Hindus, 65,841,928 Mahommedans, 10,721,228 Buddhists (mostly in Burma), 3,876,196 Christians (mostly in Madras, Travancore, and Cochin), 3,011,095 Sikhs, 1,248,182 Jains, 100,096 Parsees, and 10,217,544 Animists.

Occupations.—72·27% of the population were in 1911 dependent on exploitation of the surface of the earth. Industrial occupations support 35,323,041 persons, of whom 8,306,501 are engaged in the textile industries; 2,648,005 persons were engaged in public administration, and 5,325,357 persons in the professions and liberal arts; 4,599,080 persons were engaged in domestic service.

Languages.—The number of languages spoken in India totals 220. They fall into four principal families: (1) the Indo-European (Aryan), 232,822,511; (2) the Dravida, 37,094,393; (3) the Andhra, 24,097,411; and (4) the Tibeto-Burman, 10,932,775. The principal languages are Hindu, spoken by 82,003,235 persons; Bengali, 48,367,915; Telugu or Andhra, 23,542,861; Marathi, 19,806,636; Tamil, 18,128,365; Panjabi, 15,876,758; Rajasthani, 14,067,590; Western Hindi, 14,037,882; Gujarati, 10,682,248; Hanarese, 10,525,739; Oriya, 10,162,321; followed by Malayalam, Western Panjabi, and Sindhi.

POPULATION OF PRINCIPAL TOWNS (*with Cantonments*)

Calcutta	1,222,313	Allahabad	171,697	Surat	114,868

The New HAZELL, 1917

THE GOVERNMENT OF INDIA

The British territory in India was acquired by the East India Company, by conquest or treaty, in the course of one hundred years, dating from the battle of Plassey (1757). As a result of the mutiny of the Sepoy army (1857–8), the East India Company ceased to exist; and the direct sovereignty was vested, by the Government of India Act, 1858, in the Crown. In accordance with the Royal Titles Act, 1876, the King of Great Britain and Ireland assumes the additional title of Emperor of India. The Parliament of the United Kingdom is supreme over India; but all the statutes relating to India were in the nature of either constitutional enactments or financial provisions. The law is now consolidated by the Government of India Act, 1915.

The **Secretary of State for India** presides over **a Council** which consists of not fewer than 10 nor more than 14 members selected for seven years from among Indian ex-officials for the most part. Since 1907 two of the members have been natives of India. The Council controls the expenditure of the Indian revenues, both in India and elsewhere, and generally conducts the business done in England in regard to the government of India. In England every measure concerning India runs in the name of the Secretary of State; and he alone is responsible to Parliament. In practice he is always a Cabinet minister of the first rank.

In India the supreme authority, both executive and legislative, is vested in the **Governor-General in Council.** The Governor-General, or **Viceroy,*** who generally holds office for five years, receives a salary of £16,720 a year, and has power to overrule his Council in cases of emergency. The **Council** is composed of six ordinary members, all appointed, like the Governor-General himself, by the Crown for a period of five years. Since 1909 one of the members has been a native of India. For *personnel* of Governor-General's Council see p. 381. For purposes of legislation this Council is expanded into an Imperial Council of 68 members, of whom 36 are nominated and 32 elected by various native and commercial interests under the provisions of the Indian Councils Act, 1909. No person is eligible if the Government is of opinion that his election would be contrary to public interest. The **seat of the Supreme Government of India** was in 1912 removed from Calcutta to Delhi; where new capital buildings are in course of construction, at present estimated to cost £2,800,000. The Government migrates to the hill-station of Simla for the hot season. It is anticipated that the Government city at Delhi, which is a separate province under a chief commissioner, will be completed in 1917. Meanwhile the staff is housed in temporary buildings. (See p. 382.)

The Administration

As regards the **work of administration,** Madras, Bombay, and Bengal are styled Presidencies, and enjoy a certain precedence, are each ruled by a Governor, appointed by the Crown, with legislative and executive councils modelled on those of the Governor-General. The United Provinces, the Punjab, Burma, and the Province of Bihar and Orissa are each under a Lieut.-Governor appointed by the Viceroy with the approval of the Crown, and have each a legislative council. Bihar and Orissa has also an executive council. The Central Provinces, the N.W. Frontier Province, and Assam are under Chief Commissioners appointed by the Viceroy in Council. A Chief Commissioner presides over each of the following: Delhi, Coorg, Ajmer-Merwara, British Baluchistan, and the Andaman Islands. Powers to create legislative councils in districts under a Chief Commissioner are granted by the Government of India Act, 1915. In addition, there are some smaller tracts under the direct administration of the Governor-General. Within the provinces, and under the control of the secretariat, or central provincial bureau, the actual unit of administration is **the district,** which forms the charge of an officer, usually styled **Collector** or **Deputy-Commissioner.** His principal duties are executive, magisterial, and fiscal; but he also exercises supervision over police, jails, schools, public works, forests, etc. There are 267 districts in British India. As to justice, the collector in each district is usually judge both of first instance and appeal. Madras, Bombay, Bengal, and Agra have each a High Court, from which there is an ultimate appeal to the Privy Council in England. The Punjab has a Chief Court, and Burma, the Central Provinces, Oudh and Sind have each a Judicial Commissioner's Court, Burma having also a Chief Court. For local government purposes there are 713 **municipal bodies,** appointed on the elective principle as to the majority, but with some Government members in all cases, and having charge of municipal business generally, including the care of roads, fairs and markets, open spaces, water supply, drainage, education, hospitals, etc. Their aggregate income amounts to about £6,500,000. In the rural districts there are 1,131 district and local boards, and committees having charge of local roads, sanitation, education, hospitals, etc. Port trustees have charge of harbour works, pilotage, etc.

The **staff of administration*** consists of: (1) the covenanted civil service, appointed after competitive examination in England; (2) the statutory civil service, selected from among natives; (3) military officers of the staff corps in civil employ; (4) a miscellaneous class of uncovenanted civil servants of different grades, who may be either Europeans or natives.

Candidates for the covenanted Civil Service are required to pass a competitive examination in England—the examinations being as a rule held annually during August in London. Candidates must be above 22 and under 24 on Aug. 1 of the year in which the examination is held; but during the continuance of the war, and for two years

* Viceroys of India under the Crown:

Sir John (Lord) Lawrence	1861–69
Lord Mayo	1869–72
Lord Northbrook	1872–76
Lord Lytton	1876–80
Marquess of Ripon	1880–84
Marquess of Dufferin	1884–88
Marquess of Lansdowne	1888–94
Lord Elgin	1894–99
Lord Curzon	1899–1905
Lord Minto	1905–10
Lord Hardinge	1910–16
Lord Chelmsford	1916–

* The offices reserved to the covenanted Civil Service are: (1) secretaries, joint secretaries, deputy secretaries, and under secretaries to the several Governments in India, except the secretaries, deputy secretaries, and under secretaries in the Army, Marine, and Public Works Departments; (2) accountants-general; (3) members of the Board of Revenue in the Presidencies of Bengal and Madras, the United Provinces, and the Province of Bihar and Orissa (4) secretaries to those Boards of Revenue; (5) commissioners of customs, salt, excise, and opium; and in the "Regulation Provinces," (7) district and sessions judges; (8) additional district or sessions judges and assistant sessions judges; (9) district magistrates; (10) joint magistrates; (11) assistant magistrates; (12) commissioners of revenue; 13) collectors of revenue, or chief revenue officers of districts; and (14) assistant collectors.

thereafter, by a special Act of 1915, appointments can be made without examination. Applications for information as to the **India Forest Service** and **India Police Force** should be addressed to the Secretary, Judicial and Public Department, India Office, London, S.W.

Educational institutions are of two kinds—public, which are under the Department of Public Instruction, and private, which are not. There are five non-teaching universities (Calcutta, Bombay, Madras, Punjab, and Allahabad), and a sixth, with residential colleges, at Decca. A seventh is being constructed at Benares; it also will be residential, and will have special facilities for instruction in the Hindu religion. In addition, there are 197 arts and professional colleges, teaching 47,337 scholars; 6,876 secondary schools, teaching 1,075,724 scholars; 131,444 primary schools, teaching 5,522,043 scholars; 7,208 institutions for special instruction (training schools, art, law, medical, engineering, technical and industrial, commercial and agricultural schools), teaching 206,062 scholars; and 39,859 private institutions, teaching 680,349 scholars. The number of natives able to read and write rose in the last census decennium from 98 males and 7 females per 1,000 to 106 males and 11 females.

In order to assist **Indian students in the United Kingdom** (of whom there are in normal times some 1,500 or 1,600), the India Office has established a Students' Department under a *Secretary for Indian Students*, Mr. C. E. Mallet (£1,000). Dr. T. W. Arnold, C.I.E. (£800), acts as Educational Adviser in London, Mr. S. M. Burrows at Oxford, Mr. E. A. Benians at Cambridge, Mr. H. Richardson at Manchester, Dr. J. Miller at Edinburgh, and Mr. H. Bamford at Glasgow—all as officers of this department. At 21, Cromwell Road, S.W., the Secretary of State has leased a large house, which is the headquarters of several activities connected with Indian students, and here students arriving from India can find accommodation, and receive information and advice.

Indian National Congress

The *Chairman of the British Committee* is Sir W. Wedderburn. The **official report** of the various sessions of the **Congress** may be obtained from the British Committee, 84 and 85, Palace Chambers, Westminster, S.W. A weekly journal, named *India*, is published at the same address.

All-India Moslem League

The League is established to promote concord and harmony among the different nationalities of India, to work in the furtherance of the general interests of the country so far as possible in concert with other communities, and to safeguard and prosecute by all constitutional and loyal methods the special interests of the Moslems of India. *Headquarters*, Lucknow. *President* of the London Moslem League, Rt. Hon. Ameer Ali, P.C., C.I.E.; *Vice-President*, C. A. Latif. *Hon. Sec.* Syed Aziz Qutb. *Offices*, 41 Sloane Street, S.W.

Industries

The large majority of the population are engaged **in agricultural pursuits**, nearly 200,000,000 being either engaged in tilling the soil or dependent upon those so engaged; and the land-tax is, next to the income from railways, the chief source of Indian revenue. There is an Agricultural Department in every large province, for the purpose of improving agricultural methods and disseminating information, with an Inspector-General of Agriculture appointed by the Supreme Government. **Co-operative credit societies** are making headway. In 1914–15 there were 16,295 societies (of which 16,016 were agricultural), with a membership of 761,935, and a working capital of £5,718,380. Metal and textile workers, glass and pottery workers, with their dependants, number close on 20,000,000, and there are large numbers employed in service. Great irrigation works have been carried out, the area irrigated being 46,836,019 acres.

The **principal crops** cultivated are rice, wheat, millet, pulse, and other food grains, oil-seeds, tea, cotton, sugar-cane, tobacco, and indigo. The acreage and yield of wheat in 1914–15 was 32,230,000 acres, yielding 10,269,000 tons, of rice 76,181,000 acres, yielding 27,964,000 tons, of sugar 2,315,100 acres, yielding 2,367,200 tons. The **area devoted to tea** in 1914–15 was 622,600 acres, chiefly in Assam and Bengal, and the production was 312,976,200 lb., the greater part of which was exported to the United Kingdom. There were 3,328,900 acres under linseed, the yield being 394,800 tons. The indigo crop greatly increased owing to the high prices on account of the war. The acreage under indigo in 1915–16 was 314,300 acres. The cultivation of opium is a Government monopoly. The area under cultivation is 170,503 acres, but is contracting as the result of an agreement with China to restrict the export. The Government receive the crop and manufacture it at the factories at Patna and Ghazipur for the foreign market. Malwa opium is grown in Baroda and in some of the Native States, and heavy duties are levied on the exports of this opium, a duty being also paid to the Indian Treasury. All salt imported into or manufactured in India has to pay duty. There were in 1914–15 24,634,000 **acres under cotton**, the yield being 5,233,000 bales. The cotton mills of India represent a paid-up capital of £13,045,000. There are 96,869 looms and 6,209,000 spindles. Of the 266 cotton mills at work, 104 are exclusively spinning and 21 exclusively weaving mills. The majority of the mills are in the Bombay Presidency, and the industry as a whole is largely in the hands of Indians. 3,358,700 acres were under **jute** in 1914–15, the yield being 10,443,900 bales. The jute industry represents a paid-up capital of £9,295,000, and the 70 mills have 38,379 looms and 796,716 spindles. Other industries in 1914–15 included 5 **woollen** mills (1,154 looms and 39,028 spindles, producing goods valued at £493,000), 8 paper mills (producing 28,700 tons of paper, valued at £548,000), 21 breweries, and various other factories.

There are two kinds of tenure under which the land is held. The first, the **zamindárí tenure**, prevails principally in Bengal, the Punjab, and the United Provinces, while it also exists in the Central Provinces, Madras, and Assam. Under this system the land is held in large estates, averaging about 800 acres, by zamindárí and by village communities, and the state revenue is assessed and paid on each estate as a whole for stated periods. About 318,000,000 acres are held under this system. **The ryotwárí system** prevails in Bombay, Madras, Sind, Burma, Assam, and to some extent in the Central Provinces. Under this system the land is held by petty proprietors direct from the Government, and the revenue is assessed with each holding, and is paid directly to the State. About 278,000,000 acres are held under this system.

Special attention is paid to **afforestation**, and huge forest tracts have been demarcated and

The New HAZELL, 1917

reserved in recent years, while the Forest Department has a less complete control over the "protected" and "unclassed" forests. The forest area in 1914 was 82,621,975 acres. The country is rich in **coal**, though little mining has as yet been done. The production in 1914 was 16,464,263 tons, of which more than four-fifths came from Bengal and Bihar and Orissa. The production of **gold** was 607,388 oz., valued at £2,338,355, the greater part coming from the Mysore gold-fields. The production of petroleum was 259,342,710 gall., valued at £958,565. Since the introduction of European drills the production of **petroleum** in Burma has rapidly risen. Other minerals are manganese (682,898 tons, value £877,264), mica (of which India is the leading producer, although the output returns are unreliable), tungsten, iron-ore, lead, chromite, tin-ore, and monazite. The **railways** of India have been constructed either by private companies to which the State guarantees interest, or directly by the State. The **chief exports** are wheat, rice, jute, cotton, hides and skins, opium, tea, and oil-seeds.

Besides the three Presidency **banks**, there are 513 joint-stock banks, as well as small native banks. In the autumn and winter of 1913–14 there was a banking and commercial crisis of some severity in Northern and Western India, and among the more important institutions that failed were the People's Bank, the Credit Bank, and the Indian Specie Bank. The question of the future regulation of banking methods in India is engaging attention.

Budget, 1916–17

The Budget of 1916–17, owing to the necessities of the war, introduced additional taxation to the extent of £3,500,000 a year. Nearly two-thirds of this additional revenue was proposed to be obtained by raising the general import tariff from 5% to 7½%, with small export duties on jute and tea. The free list was curtailed and the sugar duty raised to 10%. A fractional increase was put on the salt duty. A graduated income-tax, bringing the highest rates up to 1*s.* 3*d.* in the £, was also introduced.

Burden of Taxation.—On the assumption that the whole of the taxation, including that on salt, excise, and customs, is paid by the inhabitants of British India, the payment per head works out at: 1913–14, 2*s.* 2·4*d.*; 1914–15, 2*s.* 0·9*d.*; 1915–16, 2*s.* 0*d.*

Debts and Assets.—On March 31, 1915, the debt of India amounted to £284,248,976 (viz. rupee debt, converted into sterling at 1*s.* 4*d.* the rupee, £100,684,219, and sterling debt, £183,564,757). Other obligations (savings bank balances, etc.) amounted to £29,854,446, as well as the annual charge on railway annuities of £929,427. Up to the same date the Government of India had devoted £162,383,319 to the construction of railways, and £41,166,300 to the construction of irrigation works. It had purchased nine railways, on which, at the time of purchase, £108,092,386 had been spent from capital raised by the companies. It had advanced to railway companies £7,943,337, and had lent £12,602,956 to native states, etc. Other assets were the gold standard reserve, consisting of £5,238,184 held in rupees in India, £7,000,000 temporarily advanced to Treasury Balances in India, sterling securities of a market value of £12,148,746, £1,250,000 in gold at the Bank of England, and £8,150 in cash at short notice in London, cash balances in India of £14,733,333, and cash balances in England, £7,905,201.

Railways.—The total length of railways in India open for traffic on March 31, 1914, was 34,656 miles, of which 1,053 miles were opened in the preceding year. The total mileage under construction or sanctioned for construction was 2,442 miles. Consequent on the large decline in the traffic carried in 1914–15, the Budget estimate shows a decrease under surplus profits, the payments on this account being based on the profits earned in the preceding year.

Irrigation.—The capital outlay on irrigation works up to March 31, 1915, amounted to £38,514,877. The net earnings in 1913–14 gave a return of 8·40% on the capital expenditure.

Home Charges.—The net expenditure in England charged on the revenue of the year amounted in 1913–14 to £19,455,055, the principal items being: Interest on debt, £1,768,519; railway revenue account, £8,923,098; non-effective charges (including India Office pensions), civil £1,443,371, army and marine £3,056,824; furlough, £1,044,835; and India Office, £204,914.

Currency.—Up to 1893 the standard of value in India was silver. In view of the embarrassment arising from the depreciation in the sterling value of silver, it was decided in that year that silver should no longer be coined on presentation by the public, but the right was given to the public to demand from Government rupees in exchange for gold at the rate of 15 rupees for £1 without limit of amount (*i.e.* 1*s.* 4*d.* to the rupee). Since 1898–9 the exchange value of the rupee has remained steady at about 1*s.* 4*d.* In 1914 a Royal Commission on Indian Finance and Currency made a number of recommendations on particular aspects of Indian currency (see ANNUAL for 1915), but a decision on the main questions is likely to be deferred in view of the abnormal conditions arising out of the war. Owing to the present low price of silver, there is a considerable net profit from its coinage. Up to 1906 practically the whole amount was remitted to England and applied to the purchase of British Government securities, but in that year it was decided that a portion of the reserve should in future be held in silver in India. In 1907–9 half the profits were applied to capital expenditure on railways. In June, 1912, it was decided to form a gold standard reserve, and that no portion of the profits on coinage should be used for railway purposes until the total sterling assets of the gold standard reserve amounted to at least £25,000,000. The constitution of the reserve on March 31, 1915, was: sterling securities held in England, £12,148,746; cash held in England, £8,150; gold held at the Bank of England, £1,250,000; gold held in India, £5,238,184; due from Treasury balances, £7,000,000—total, £25,645,080. India has a paper currency, paper notes of, 5, 10, 50, and 100 rupees being legal tender throughout India, whilst 500, 1,000, and 10,000 rupee notes are legal tender in seven currency circles. The total value of the notes in circulation is £44,078,400. The reserve to meet the paper issue comprises: gold, £21,056,900; silver coin, £13,689,900; Indian Government securities, £6,666,700; British Government securities, £2,666,600. The smaller coins are the *pice* (¼*d.*) and the *anna* (1*d.*).

The principal Indian journals are largely the organs representative of the services or the English trading classes living at the centres of government. There are a large number of vernacular papers published in India. The total number of newspapers is 673, and of periodicals, 2,395.

FINANCES

The following statement shows the revised estimated **Revenue** and **Expenditure** for 1915–16, compared with the results of 1914–15.

Revenue

	1914–15.	1915–16.
Principal Heads of Revenue:	£	£
Land Revenue	21,221,539	21,837,000
Opium	1,572,218	1,887,000
Salt	3,910,790	3,490,500
Stamps	5,082,043	5,414,500
Excise	8,856,881	8,546,200
Provincial Rates	38,814	39,300
Customs	6,347,201	5,825,400

Total Expenditure	£82,942,936	84,982,580

The figures in the foregoing statement are of gross revenue, and include the net receipts of railways without any deduction on account of interest charges, the total receipts (without any deduction on account of interest charges, working expenses, etc.) derived from the other commercial undertakings of the Government of India, *i.e.* irrigation works, post-office and telegraphs, and from the sale of opium, and the receipts of certain spending departments; while the figures of expenditure are also gross, and include refunds and assignments, the interest charges of railways, the working expenses and interest charges of other commercial undertakings, and the cost of cultivation and manufacture of opium. The revenue and expenditure available for administrative purposes appear, therefore, much greater than they really are. The following are the latest figures published giving the net revenue and expenditure:

Director of Statistics, G. Findlay-Shirras, M.A. . . . . Rs. 1200–1,400

PROVINCES OF INDIA

Delhi, proclaimed the capital of India in 1911, was constituted a province in 1912. It has an *area* of 573 sq. m., and a *pop.* of 416,656, the population of Delhi city being 225,471.

Chief Commissioner, Hon. William Malcolm Hailey, C.S.I., C.I.E. . . . . Rs. 3,000

Madras (officially styled Fort St. George), with the native states of Mysore, Travancore, Banganapalle, and Pudukkotai, occupies the entire south of the Indian peninsula; it is the oldest of the three original Presidencies, although the territories comprising it were acquired at different dates. The greatest accession of territory was that of the dominions of the Nawab of the Carnatic in 1801. The total *area* is 142,330 sq. m., with a *pop.* of 41,405,404, of whom 36,806,978 are Hindus, 2,740,408 Mahommedans, and 1,191,266 native Christians. The languages principally spoken are Tamil (16,692,417) and Telugu (15,735,835). The province is very hilly and artificial irrigation is impossible over the greater part of the area, but in the deltas of the Godavari, Kistna, and Cauvery rivers good and profitable results have been obtained from irrigation. Rice, millet, and other food-grains, oil-seeds, coffee, indigo, tea, cotton, and cinchona are grown. The mineral wealth of the Presidency is undeveloped, but manganese is mined and exported. Garnets are abundant, and diamonds of moderate value. There are few manufactures, but the sea-coast, 1,730 m. in length, has helped to create a widely-diffused trade; there are not, however, any natural harbours, and Madras, through which comes the bulk of the trade, is purely artificial. Large sums of money have been spent on it without much success, and it is practically an open roadstead, protected by two breakwaters. The Governor is assisted by an Executive Council of three members. The Legislative Council consists of a maximum of 50 members, part nominated and part elected. The CAPITAL is Madras city (518,660), and other towns are Madura (134,130) and Trichinopoly (122,028). The *Laccadive Islands* (pop. 10,274) for administrative purposes form a part of the Presidency.

Governor, H.E. Rt. Hon. Lord Pentland, P.C., G.C.I.E. (Oct. 1912), *b.* '60 Rs. 10,000
Private Sec. T. E. Moir . . . Rs. 1,500
Military Sec. Capt. H. F. Collingridge, 2/9th Gurkha Rif. . . . . .
A.D.C.s. W. D. F. Liston; L. B. Gasson, Ind. Police; Capt. E. H. Gilpin, 1st Bn. Durham L.I.; Lt. L. M. Peet, 6th Jat. L.I.; Risaldar Maj. Malik Sher Bahadur, 26th K.G.O. Lt. Cav.
GOVERNOR'S COUNCIL: Hons. Sir Harold Stuart, K.C.V.O., K.C.S.I.; Sir P. S. Sivaswami Aiyar, K.C.S.I., C.I.E.; Sir Alexander Cardew, K.C.S.I. . . Rs. 5,333

SECRETARIES TO GOVERNMENT

Chief Sec. L. Davidson, C.S.I. . Rs. 3,750
Revenue Dept. Sec. J. P. Bedford . Rs. 3,000
Local, etc., Departs. C. G. Todhunter Rs. 2,750
Home Dept. Diwan Bahadur P. Rajagopala Achari . . . . Rs. 2,750
Public Works, Col. W. M. Ellis, R.E., C.I.E. Rs. 2,750
Public Works (Joint Sec.), S. B. Murray Rs. 2,750
Board of Revenue, R. B. Clegg (Rs. 3,750); N. S. Brodie (Rs. 3,500); L. E. Buckley and H. F. W. Gillman (Rs. 3,000).

HIGH COURT OF JUDICATURE

Chief Justice, Hon. Sir J. E. P. Wallis (on leave); Hon. Abdur Rahim (*offg.*) Rs. 5,000
Judges, Hons. Abdur Rahim, Sir W. B. Ayling, F. Du Pre Oldfield, T. S. Ayyar, C. G. Spencer, V. M. C. Trotter, T. V. S. Ayyar, C. Krishnan (*offg.*) . each Rs. 4,000

Bombay.—The first English settlement in Bombay was in 1618, when a factory was established at Surat. In 1661 the island of Bombay was ceded to the English Crown, as part of the dower of the Infanta Catherine of Portugal on her marriage with Charles II, and, as it was not esteemed of much value, it was made over, in 1668, to the East India Company, for an annual payment of £10. The present territory of the Presidency was obtained by conquest over the Mahrattas, and by lapse of various native states. The *area*, including Sind (conquered in 1843) and Aden, is 123,059 sq. m., with a *pop.* of 19,672,642; of whom 14,922,965 are Hindus, 4,024,485 Mahommedans, and 233,246 Christians. The principal languages spoken are Marathi (9,016,228), Gujarati (3,347,490), Sindhi (2,897,267), and Kanarese (2,462,195). Millet, rice, wheat, and barley are cultivated. Cotton is largely grown—the American varieties having been introduced with great success—and is manufactured into finished goods in the numerous factories in the neighbourhood of Bombay city, Ahmedabad, and Khandesh. Deccan hemp is of great importance. Other manufactures include silk-weaving, pottery, and brass ware. The chief railways are the Great Indian Peninsula, Indian Midland, Bombay, Baroda & Central India, and the North Western. The Governor has an Executive Council of three members, while the Legislative Council has a maximum of 50 members, part nominated and part elected. The CAPITAL is Bombay (979,445), and other chief towns are Ahmedabad (216,777), Poona (158,856), Surat (114,868), and Karachi (151,903).

Governor, H.E. Rt. Hon. Lord Willingdon, G.C.I.E. . . . . Rs. 10,000

Bengal.—The Presidency of Bengal comprises the deltas and lower valleys of the Ganges, and has a total *area* of 78,412 sq. m., and a *pop.* of 45,483,077, or, with the native states of Cooch Behar and Hill Tippera the *area* is 83,805 sq. m. and the *pop.* 46,305,655. The old Bengal Presidency, which formerly included Eastern Bengal and Assam, Orissa, Chota Nagpur, and Bihar, was under the immediate control of the Governor-General of India until 1854, when a lieutenant-governor was appointed. Assam was made a separate province in 1874, and in 1905 a further distribution took place, Eastern Bengal and Assam being formed into a new province. To this new province certain districts were transferred, and the arrangement existed until 1912, when the Presidency was re-created, and a new province—that of Bihar and Orissa—formed. Of the inhabitants 23,989,719 are Mahommedans and 20,380,720 Hindus. Bengali is spoken by the bulk of the people (41,899,210), the other chief language being Hindi, spoken by 1,712,602. Owing to the richness of the soil and a regular and copious rainfall, agriculture flourishes, the chief products being rice, jute, maize, wheat, barley, grain, millet, oilseeds, sugar-cane, and tobacco; tea is cultivated at Darjeeling. Muslin and cotton goods are manufactured, and jute is worked up into gunny-bags, sails, and quilts. The chief town and port is CALCUTTA (1,222,313); Chittagong, which is older than Calcutta, is concerned with the shipment of jute, rice, and tea; Dacca (108,551), the second city in size, lies inland on a branch of the Meghna.

**Governor*, H.E. the Rt. Hon. Lord Carmichael, G.C.I.E., K.C.M.G. (*app.* 1912) Rs.10,000
Private Sec. W. R. Gourlay . Rs. 1,500

The United Provinces of Agra and Oudh

The province of Agra was first formed in 1834; in 1836 its name was changed to that of the "North-West Provinces"; Oudh was annexed in 1856, and in 1902 the provinces received their present name. The provinces occupy the upper basins of the Ganges and Jumna, and have an *area* of 107,494 sq. m.; the two native states, Rampur and Tehri, have an area of 5,079 sq. m. The total *pop.* is 47,182,044, of whom 40,253,433 are Hindus and 6,658,373 Mahommedans. The Hindi or Western Hindi languages are universal. About 66% of the people are dependent on pasture and agriculture. The chief products are rice, wheat, barley, gram, maize, pulse, and oilseeds. The provinces contain the richest wheat-growing country in India, and the natural fertility has been increased by a magnificent series of irrigation works. The sugar-cane and indigo are also grown. There are over 13,000 sq. m. of forests. Iron and copper are found in the Himalayan districts, but they are not worked with commercial success. The chief city of Agra is ALLAHABAD (171,697), the capital of the provinces; Lucknow (259,798) is the chief city of Oudh; other important cities are Agra (185,449), which contains the Taj Mahal and other well-known architectural works; the sacred city of Benares (203,804), a great manufacturing centre; Bareilly (129,462); Meerut (116,227).

Lieutenant-Governor, Hon. Sir James Scorgie Meston, K.C.S.I., LL.D., V.D. (*app.* 1912) Rs. 8,333

2*nd Add. ditto*, Rai Kanhaiya Lal Bahadur Rs. 3,333

Punjab.—The Punjab, or land of the five rivers, occupies the extreme north-west corner of the Indian Empire, and with the exception of the North-West Province, comprises all of British India north of Sind to Rajputana, and west of the river Jumna. Inclusive of the 34 feudatory states which form part of the administration, most of

them of small importance, the Punjab includes an *area* of 136,330 sq. m., with a *pop.* of 24,187,750. The main elements of the population are Mahommedans, who comprise one-half; Hindus three-eighths, and Sikhs one-eighth, the last-named forming a distinctive feature of the province. Punjabi and Hindi are the chief languages. The British portion of the Punjab is divided into 28 districts, with an area of 99,779 sq. m. and a pop. of 19,974,956. The climate is of the most pronounced continental character, extreme heat alternating with great winter cold. Earthquakes of a severe character are not uncommon. Agriculture is the main industry, occupying 56% of the people. The rainfall is not plentiful, and artificial irrigation is required, mainly from wells and canals. The principal crops are wheat (of which about 500,000 tons are exported annually), barley, maize, rice, cotton, oilseeds, hemp, sugar-cane, tea, and indigo. The Punjab is not rich in minerals; saltpetre, carbonate of soda, and sal-ammoniac are produced in the plains. Coal is mined near Dandot, and iron and copper ores could be worked but for difficulties of carriage and absence of fuel. There are rich deposits of rock-salt. Cotton-spinning is the great domestic industry, cotton cloth, cotton rugs, and cotton-pile carpets being produced, as well as blankets and woollen rugs. The carpets of Amritsar, made of *pashm*, the fine hair of the Tibetan goat, have a great reputation. The town and surrounding area of Delhi were separated from the Punjab and constitution on Oct. 1, 1912, and formed into a separate administration, reducing the area and population given above by some 500 sq. m. and 380,000 souls respectively. The capital of the Punjab is LAHORE (228,687), but during part of the year Simla is shared with the Supreme Government as the summer headquarters.

Lieutenant-Governor, Hon. Sir Michael Francis O'Dwyer, K.C.S.I. (app. 1913) Rs. 8,333

SECRETARIES TO GOVERNMENT

Chief Secretary, Hon. J. P. Thompson .Rs. 3,000

Chief Judge, Hon. Sir D. C. Johnstone Rs. 4,000
Judges, Hons. H. A. B. Rattigan, Mian Muhammad Shah Din, W. Chevis, H. S. Smith, R. B. Shadi Lal, W. A. Le Rossignol . . . . . each Rs. 3,500

Burma.—Burma comprises a vast tract of country in southern Asia, bounded on the N. and N.E. by the mountainous ranges of Tibet, Assam, and Manipur, on the W. and S. by the Indian Ocean, and on the S.E. by Siam. It has an *area* of 230,839 sq. m. and a *pop.* of 12,115,217. There are nine main racial groups in the country, the chief being the Burman, which, with its allied groups, is derived from the great prehistoric invasion of Burma by the Tibeto-Burman family of tribes which probably started originally from the interior of Tibetan China. The Chin, Kachin, and numerous other tribes inhabit the outlying highlands that skirt Upper Burma. The Shan States lie on the east between Burma and China.

Burmese (7,883,299) and Karen (1,067,363) are the chief languages. In the neighbourhood of the Irrawaddy delta and the plains round Mandalay is practically the only level ground in the country. The climate had at one time an unenviable notoriety for unhealthiness, but jungle-clearing and conservancy have very greatly improved it. Agriculture is the main industry, rice being grown everywhere where there is sufficient moisture; the export of rice in 1914–15 amounted to 2,191,769 tons; it is milled at Rangoon. Other crops grown are wheat, cotton, tobacco, chillies, sugar-cane, onions, plantains, mango-trees, pine-apples, and oranges. There are extensive forests of teak, and the minerals include petroleum, wolfram, rubies, and jade-stone. The capital of Lower Burma is RANGOON (293,316), and of Upper Burma, Mandalay (138,299).

Lieutenant-Governor, Sir Spencer Harcourt Butler, K.C.S.I., C.I.E. (*app.* 1915) .Rs. 8,333
Private Sec. Capt. F. L. Roberts, I.A. . Rs. 650

Bihar and Orissa.—The Province of Bihar and Orissa, constituted in 1912, comprises the Patna, Tirhut, Bhagalpur, Chota-Nagpur, and Orissa divisions. It has an *area* of 83,181 sq. m., with a *pop.* of 34,490,084. Hindus constitute 81% of the population, Mahommedans 10%, and Animists 3%. The languages spoken chiefly are Hindi (24,146,192), Oriya (4,905,470), Bengali (2,186,020), and Santali or Har (1,172,460). The climate is somewhat similar to that of Bengal; there have been, on several occasions, disastrous famines, as well as earthquakes of considerable violence. The rainfall is copious and regular, and irrigation is not so necessary as in some other parts of India. Rice is the principal crop, Patna being the centre of the great rice-growing areas; wheat, barley, oilseeds, tobacco, and sugar are also grown. Coal is the chief mining industry, over 85% of the total output of coal in India is mined in this province; iron is smelted at Barakar; mica is found in the Gaya, Hazaribagh, and Monghyr districts; some saltpetre is also worked. The capital is PATNA (136,153). The town of Puri contains the famous shrine of Juggernaut.

Lieutenant-Governor, Hon. Sir Edward Albert Gait, K.C.S.I., C.I.E. (*app.* 1915) Rs. 8,333

COUNCIL OF THE LIEUTENANT-GOVERNOR

Hon. Sir Edward Vere Levigne, K.C.I.E., C.S.I.; Hon. Maharaja Bahadur Sir Rameswar Singh, G.C.I.E., of Darbhanga; Hon. Sir William Hy. Hoare Vincent, Kt. . . . each Rs. 5,000

Central Provinces.—The Central Provinces comprise a large portion of the broad belt of hill and plateau country which lies between the plains of Hindustan and the Deccan. Berar, permanently leased to the British Government by the Nizam of Hyderabad, is attached to the Central Provinces for administrative purposes; the *area* of the whole is 130,997 sq. m., of which 99,823 are British territory, and the remainder held by feudatory chiefs. The *pop.* is 16,035,043, including 2,117,406 in native states. The bulk of the population is Hindu, and the languages spoken comprise Hindi (6,044,184), Marathi (4,865,980), Eastern Hindi (1,032,832), and Gond (917,113). 75% of the population are either wholly or partially engaged in agriculture: wheat, linseed, grain, cotton, and millet are grown, but rice is the most important crop. Coal is found and worked at Ballarpur in the Chanda district, Mohpani in the Narsinghpur district, and in the Pench Valley in the Chhindwara district. The only important manufactures are cotton spinning and weaving, while pottery and cement are manufactured on a small scale in Jubbulpore; but the industry of extracting and exporting manganese ore is of some importance, and industries connected with cotton are rapidly expanding.

The capital is NAGPUR (101,415).

Chief Commissioner, Sir Benjamin Robertson, K.C.S.I., K.C.M.G., C.I.E., LL.D. Rs. 5,667
Financial Commissioner, Hon. H. A. Crump, C.S.I. . . . . Rs. 3,500

Public Works Secs. A. J. Wadley (*Irrigation*), Lt.-Col. S. G. Rivett-Carnac (*Roads and Buildings*) . . . . each Rs. 2,650
Commissioner of Settlements and Director of Land Records, Hon. P. Hemingway . .
Judicial Commissioner, Sir H. V. Drake-Brockman, Kt. . . . . Rs. 3,500
Addit. Jud. Commissn. J. K. Batten, H. J. Stanyon, C.I.E. (each Rs. 3,000); H. F. Hallifax (on military duty), F. W. A. Prideaux (*actg.*), J. C. Mitra.

The North-West Frontier Province comprises five British districts and also the tribal areas under the political control of the British Government which stretch northward and westward towards Afghanistan. In 1901 it was constituted a separate administration and placed under the control of a Chief Commissioner with his headquarters at PESHAWAR (pop. 1911, 97,935). The total *area* of the province is 38,918 sq. m., and the *pop.* at census 3,819,027. The British districts, from north to south, are Hazara, Peshawar, Kohat, Bannu, and Dera Ismail Khan, all but the first-named being situated west of the Indus. The tribal area is divided for administrative purposes into five political agencies, viz. Dir, Swat and Chitral, Khyber, Kurram, Tochi and Wana; and there are in addition certain tracts under the political control of the Deputy Commissioner in charge of the adjoining British district. The tribal area, which comprises some 25,500 sq. m., is mountainous and barren, except in certain favoured spots, and only contributes 1,622,094 to the total pop. of the province. In the British districts the soil is fertile and water abundant, except in Dera Ismail Khan. The principal crops are wheat, barley, and gram in the spring, and maize and various varieties of millet in the autumn.

Chief Commissioner, Hon. Sir George Roos-Keppel, K.C.S.I., K.C.I.E. . . Rs. 4,000
Resident in Waziristan, Sir John S. Donald, K.C.I.E., C.S.I. . . . .
Revenue Commissioner, Lt.-Col. D. B. Blakeway, C.I.E. . . . . .
Judicial Commissioner, W. P. Barton, C.I.E.

Assam, which in 1905 was united with Eastern Bengal to form a Lieutenant-Governorship, was in 1912 again made a separate province under a Chief Commissioner. It has an *area* of 53,015 sq. m. and a *pop.* of 6,713,635, of whom 3,637,828 are Hindus, 1,886,528 Mahommedans, and 1,109,187 Animists. Bengali is the principal language (3,224,130), but Annamese is spoken by 1,532,332. The cultivation and manufacture of tea is the great commercial industry of the province; in 1915 there were 779 gardens, the total area under crop being 383,821 acres, producing 245,385,920 lb. of manufactured tea. The capital is SHILLONG (13,639).

Chief Commissioner, Hon. Sir Archdale Earle, K.C.I.E. . . . . Rs. 5,000
Chief Secretary, Hon. B. C. Allen . Rs. 2,650
Second Sec. Hon. A. W. Botham . Rs. 1,950
Sec. Public Works, Hon. F. O. Oertel Rs. 2,650

The **Andaman and Nicobar Islands** lie in the Bay of Bengal. They have an *area* of 3,143 sq. m., and a *pop.* of 24,801, including 1,882 Andamanese, 6,310 Nicobarese, and 16,914 resident in the convict settlement. They are administered by a Chief Commissioner. The Andamans contain valuable forests, and the Nicobars produce coconuts. The convict settlement is in the Andaman Islands.

Chief Commissioner, Lt.-Col. M. W. Douglas, C.I.E., I.A. . . . . Rs. 3,000

Ajmer-Merwara is a British district in Rajputana, and has an *area* of 2,711 sq. m. with a *pop.* of 501,395, consisting mainly of Hindus, though there are 81,000 Mahommedans. The principal crops produced are millet, wheat, cotton, and oil-seeds, but the value of the harvests is dependent upon the monsoons, which are very variable.

Chief Commissioner, Sir Elliot G. Colvin, K.C.S.I. . . . . Rs. 4,000

Coorg, a province on the plateau of the Western Ghats, has an *area* of 1,582 sq. m. with a *pop.*

of 174,976. It is for the most part under forest, but rice is cultivated.

Chief Commissioner, Hon. H. V. Cobb, C.S.I., C.I.E. . . . . .Rs. 4,000

Baluchistan is a country in southern Central Asia, lying to the south of Afghanistan, and extending to the Persian Gulf. Persia is on the west and British India on the east. It includes (1) **British Baluchistan,** consisting of the tahsils of Shahrig, Sibi, Duki, Pishin with Shorarud, and the Chaman subdivision; (2) **the Agency territories,** consisting of the Quetta, Loralai (excluding Duki tahsil), Zhob and Chagai districts, the Nasirabad subdivision, the Kohlu subtahsil, and the Bolan Pass; (3) **the tribal areas,** inhabited by the Marri and Bugti tribes; and (4) **the Native States of Kalat and Las Bela.** The districts of Sibi and Pishin were assigned to Britain by the Treaty of Gundamak. Quetta, the Bolan, the Nasirabad subdivision, including the Manjuthi lands and Nushki, are held on a perpetual lease from the Khan of Kalat. The total *area* is about 134,638 sq. m.; population 834,703. The British territory is administered from Quetta, the headquarters of the Province, by a Chief Commissioner, and the Agency territories and other portions of Baluchistan by the same officer as Agent to the Governor-General. This administered territory has an *area* of 54,228 sq. m.; *pop.* 414,412. There are six administrative districts under Political Agents, one of whom is also Agent for Kalat. The principal chief of the *native states* is H.H. Sir Mir Mahmud Khan, G.C.I.E., Khan of Kalat, who receives an annual subsidy from the Indian Government of 100,000 rupees, and enjoys a salute of 19 guns. He succeeded his father in '93. The ruling chief of Las Bela is Jam Mir Kamal Khan, C.I.E., who succeeded in '96 (personal salute of 9 guns). Kalat has an area of 73,278 sq. m.; pop. 359,086. Area of *Las Bela* 7,132 sq. m.; pop. 61,205. Baluchistan is of great strategic importance, commanding the numerous passes to the south of the great caravan route through the Gomal to Ghazni, Kabul, and Kandahar. The railways include the Quetta-Nushki line (83 miles), and their total length is 482 miles. The trans-frontier trade in 1915-16 amounted to: **imports** into India, £139,791; **exports** from India to Afghanistan and Persia, £165,029.

Chief Commissioner and Agent to the Governor-General, Hon. Lieut.-Col. Sir J. Ramsay, K.C.I.E., C.S.I. . . .Rs. 4,000
Judicial and Rev. Commr. Lt.-Col. A. McConaghey, C.I.E. . . . . .Rs. 2,750

Bhutan is a state in the Eastern Himalayas, whose external relations are controlled by the Government of India. It is bounded on the north-east and north-west by Tibet and on the south by British India, and has an *area* of 18,000 sq. m. with a *pop.* estimated at 400,000. The population is mostly Buddhist. Part of Tibet runs between Sikkim and Bhutan, and forms the valley of Chumbi, through which is the best route from India to Tibet. The Indian Government pay to Sir Ugyen Wangchuk, K.C.I.E., Maharaja of Bhutan, a subsidy of £6,666.

Nepal.—A kingdom in the Himalayas, with Tibet on the N., Sikkim on the E., and British India on the S. and W., which is independent, but maintains friendly relations with the Indian Government, who have a Resident at the capital, **Katmandu** (pop. 50,000). It has an *area* of 54,000 sq. m. and a *pop.* estimated at 5,939,092, mostly of mixed character, but the Ghoorkas predominate. The titular ruler is the Maharajadhiraja, but the real power is in the hands of the Prime Minister.

Resident at Katmandu, Lieut.-Col. S. F. Bayley, I.A. (Rs. 2,750).

Sikkim is a state in the Himalayas, bounded on the N. and E. by Tibet, on the S. by Darjeeling, and on the W. by Nepal. It has an *area* of 2,818 sq. m. and a *pop.* of 87,920. It is under the protection of Great Britain, which controls both its foreign relations and internal affairs, a *Political Officer* advising the Maharaja and his Council. Trade with Tibet is carried on through Sikkim.

Political Officer, C. A. Bell, C.M.G.

The Native States.—The native or feudatory states occupy more than one-third of the country. The British Government has control over them, but not of the direct character which it exercises over the wholly British territory. Some, but not all, of these states pay tribute to the Supreme Government. The nature of British control over these states varies, and is exerted chiefly through a Political Resident, who assists the native prince. These princes can manage their internal affairs, but have no power to make war or peace. Their external relations are in the hands of the Supreme Government, and they can only maintain a limited military force. They have a total *area* of 709,583 sq. m., with a *pop.* of 70,888,854. The states may be divided into two main heads: (1) states having direct political relations with the Government of India, and under the direct supervision of the Governor-General in Council; (2) states having direct political relations with the several local Governments of India. Those belonging to Class I are Hyderabad, Mysore, Baroda, Kashmir and Jammu, Baluchistan Agency (which includes Kalat, Kharan, and Las Bela), Rajputana Agency (includes 17 Rajput states, 2 Jat, and 1 Mahommedan—the chief states are Jaipur, Jodhpur, and Udaipur), the Central India Agency (includes 8 principal states—Gwalior, Indore, Bhopal, etc.), Sikkim (*see ante*), Bhutan, Nepal (*see ante*), and North-West Frontier Province.

Hyderabad is the premier state in India with an *area* of 82,698 sq. m. and a *pop.* of 13,374,676. The ruling dynasty is of Turkoman origin, the first sovereign, Asaf Jah, having been appointed Viceroy of the Deccan with the title of Nizam-ul-Mulk in 1712. Telugu and Marathi are the principal languages, but over 3,000,000 speak either Kanarese or Western Hindi. Wheat, rice, and cotton are produced. *Mysore.*—This state is situated in Southern India, and has an *area* of 29,433 sq. m., with a *pop.* of 5,449,800, of whom more than 94% are Hindus. Kanarese is the chief language. In early times Mysore was the chief seat of the Jains. Owing to the misrule of the native chief, the administrative control of the province was resumed by the British Government from 1831 to 1881, when it was handed over to the native diwan, and a political resident appointed to represent British interests. Millet, pulse, and rice are the chief crops; there are some important goldfields. *Baroda* consists of four isolated divisions, interlaced in the most intricate fashion with British territory, situated in Western India, three in Gujarat and the fourth in Kathiawar. The total *area* is 8,099 sq. m., with a *pop.* of 1,952,692, over 79% of whom are Hindus. The reigning Gaekwar, who was adopted on the deposition for misrule of the previous Gaekwar in 1875, is a descendant of the founder of the family. *Kashmir and Jammu* include, in addition

to the district of Kashmir proper, Jammu, Pooneh, and the governorships of Ladakh and Gilgit; subordinate to it are the petty chiefships of Hunza and Nagar. The *area* is 80,900 sq. m., with a *pop.* of 3,157,352, three-fourths of whom are Mahommedans, chiefly of the Sunni sect, but the ruling family is Hindu. After the victory of the British against the Sikhs in 1846, the possession of the kingdom was confirmed to Gulat Singh, the first Maharaja. *Rajputana* has, within the limits given to the district, 20 native states, together with the British district of Ajmer-Merwara. The combined *area* is 127,541 sq. m. with a *pop.* of 10,530,432. The more important of these are Jaipur (pop. 2,644,072), Jodhpur or Marwar (pop. 2,050,131), and Udaipur or Mewar (pop. 1,276,472). The states of *Central India* comprise an *area* of 78,772 sq. m. with a pop. of 9,356,980. The principal states are 8 in number: Gwalior (pop. 2,933,001), Indore, Bhopal, Rewa (pop. 1,327,385), Dhar, Jaora, Datia, and Orchha; besides these there are a multitude of petty states held by their rulers under the immediate guarantee of the British Government, but having feudal relations with one or other of the larger states. The total number of states amounts to 153. The *Madras Presidency* includes 5 native states having an *area* of 10,087 sq. m., with a *pop.* of 4,811,841. The more important of these are *Travancore* and *Cochin*, which represent ancient Hindu dynasties, and Pudukattai, which is the inheritance of a chieftain called the Tondiman. The native states in the *Bombay Presidency* number 377, and have an *area* of 65,761 sq. m. with a *pop.* of 7,411,675. The largest is *Kolhapur*, with a pop. of 910,011. Under the Government of *Bengal* are two states—*Cooch Behar* (*area*, 1,307 sq. m., *pop.* 592,965) and *Hill Tippera* (*area*, 4,086 sq. m., *pop.* 229,613). Under the Government of *Bihar and Orissa* are 24 native states, the inhabitants being mostly hill-men of Holarian or Dravidian origin, and their condition is still very primitive. Under the Government of the *United Provinces of Agra and Oudh* there are two native states, *Rampur*, with a Mahommedan dynasty, and *Tehri* or *Garhwal*, with a Hindu dynasty. Under the Government of the *Punjab* are 34 native states, varying considerably in size and importance. The whole have an *area* of 36,532 sq. m., with a *pop.* of 4,212,794. 23 of the states are hill states. By far the most important of all the states in Bengal is *Patiala*, with a pop. of 1,407,659. Under the Government of *Burma* are 4 Shan states, with an *area* of 7,374 sq. m. and a *pop.* of 67,051, mostly Buddhists. There are in addition 48 petty states, with an *area* of 58,835 sq. m. and a *pop.* of 1,358,498 Buddhists and Animists. In *Assam* there is *Manipur*, with an *area* of 8,456 sq. m. and a *pop.* of 575,835, as well as 15 petty chiefships. In the *Central Provinces* there are 15 native states with an *area* of 31,114 sq. m. and a *pop.* of 2,117,002. The principal states are *Bastar* and *Sirguja*.

Table of Salutes to Ruling Chiefs

Salutes of 21 *guns*

Baroda, The Maharaja (Gaekwar) of
Hyderabad, The Nizam of
Mysore, The Maharaja of

Salutes of 19 *guns*

*Bhopal, The Begam (or Nawab) of
*†Gwalior, The Maharaja (Sindhia) of
*Indore, The Maharaja (Holkar) of
*Jammu and Kashmir, The Maharaja of
Kalat, The Khan (Wali) of
†Kolhapur, The Maharaja of

Rajgarh, The Raja of
Rajpipla, The Raja of
Ratlam, The Raja of
Sailana, The Raja of
Sanathar, The Raja of
Sirmur (Nahan), The Raja of
Sitamau, The Raja of
Suket, The Raja of
Tehri (Garhwal), The Raja of

There are also 31 other chiefs entitled to salutes of 9 guns. As to other salutes, the major ones are: the Imperial Salute to the King and Emperor when present in person, 101 guns; to members of the Royal Family, the Royal Standard and Royal Salute, and the Viceroy and Governor-General in India, 31 guns; the Governors of Presidencies, 17 guns; Lieutenant-Governors of provinces, 15 guns; General and Admirals, or their flags, 15 guns; Chief Commissioners of provinces, 13 guns; Residents, 13 guns.

* Within their own territories these chiefs have salutes of 21 guns permanently.

† The present chief has a personal salute of 2 additional guns, or, in the case of Jaipur, of 4 additional guns.

PRECEDENCE IN INDIA

1. Governor-General and Viceroy of India.
2. Governors of Madras, Bombay, and Bengal.
3. President of the Council of the Governor-General.
4. Lieut.-Governor when in his own territories.
5. Commander-in-Chief in India.
6. Lieutenant-Governor.
7. Chief Justice of Bengal.
8. Bishop of Calcutta, Metropolitan of India.
9. Ordinary Members of the Council of the Governor-General.
10. Commander-in-Chief of Her Majesty's Naval Forces in the East Indies.
11. Chief Justice of a High Court other than that of Bengal.
12. Bishops of Madras and Bombay.
13. Ordinary Members of Council in Madras, Bombay, and Bengal.

BRITISH DOMINIONS BEYOND THE SEAS

The area of the British Dominions beyond the Seas, exclusive of India, is 9,451,000 square miles—seventy-eight times the area of the United Kingdom. The population at the 1911 census was 56,845,000, the population of the United Kingdom being then 45,217,000.

COLONIES IN EUROPE

Gibraltar

Gibraltar is a rocky promontory 2¾ m. long with an extreme breadth of ¾ m., on the south of Spain, connected with Andalusia by a low isthmus. The name is a corruption of Jebel el Tarik, the Mount of Tarik. It has an *area* of 1⅞ sq. m. and a *pop.* (1916) of 17,943, excluding the navy and garrison. The rock rises to 1,439 ft. and is strongly fortified; it was under the dominion of the Moors until the 14th century, when it was incorporated with the Spanish kingdom of Granada. It was captured by the British in 1704, and ceded by the Treaty of Utrecht in 1713. It was successfully defended in the great siege of 1779–83, by General Elliott (afterwards Lord Heathfield). It is ruled as a Crown colony by a military governor. The town lies within the bay, on the western side. There are small port and harbour dues (maximum £4), and a small duty is paid on wines, spirits, and tobacco imported otherwise. The port is free, and is the *entrepôt* of a considerable trade between North Africa and the United Kingdom. It is also an important coaling-station. The customs, post office and rents of Crown property are the principal sources of revenue. The naval harbour contains a water area of 440 acres; there are three large graving docks for naval purposes, and a small dock for merchant vessels of light draught.

	1913	1914	1915

Malta

An island in the Mediterranean Sea, 58 m. from Sicily and about 180 from the African coast; about 17 m. in length, by 9 m. in breadth, and having an *area* of 91½ sq. m. The colony includes the adjoining island of Gozo (area 25·8 sq. m.) and Comino (about 1 sq. m.), the whole having an area of 117 sq. m. The civil *pop.* in 1916 numbered 220,968. Malta alone contains about 196,866 inhabitants. The religion of the island is Roman Catholic. The Maltese dialect, which is generally spoken, is of Semitic origin, and considered to be derived from the Carthagenian and Arabic tongues, but contains a large admixture of Italian terms. The inhabitants of the country districts are of Phœnician origin, but the upper classes are of Norman, Spanish, and Italian origin. The Maltese order of nobility consisted at the British occupation of about two dozen families, bearing titles of nobility granted or recognised by the Grand Masters. The climate of the island is equable and very healthy in winter. In August the heat is, however, almost tropical. The mean maximum temperature during the three coldest months (Dec. Jan. Feb.) is 58·8°, and the mean minimum 50·6°; during the four hottest months (June, July, Aug. Sept.) the maximum is 81·6° and the minimum 70·6°. Malta is the chief coaling-station of the British Mediterranean Fleet, and is provided with extensive dockyard accommodation. It is a port of call for nearly all the Mediterranean lines of steamers, and for vessels passing to Egypt and the East. Internal communications include a railway of 7¾ m. and an electric tramway service. The government is administered by a Governor (military), advised and assisted by an Executive Council. Legislation is carried on by a Council of Government, consisting of the Governor (President), a Vice-President, the Lieutenant-Governor and Chief Secretary to Government, the Crown Advocate, with other official and elected members. Education is free in the day and night elementary schools—1915–16 enrolment, 24,188—while secondary education is provided at a very moderate rate. The Lyceum is attended by about 500 boys, and the University by about 180 students. There are also many private schools. The island is highly cultivated, the principal **products** exported being potatoes, onions, cummin-seed, and oranges. The CAPITAL is Valletta (civil pop., with suburb of Floriana, 30,028); it is a fine city, commanding two noble harbours, and surrounded by massive fortifications which are picturesque, but antiquated. The old capital, Citta Vecchia, is in the interior of the island, and has a pop. of 8,896. The number of vessels which entered the port of Valletta in 1915–16 was 1,532, with a tonnage of 2,372,512, while 1,501, with a tonnage of 2,366,055, cleared.

The earliest inhabitants of Malta were a race from Northern Africa, who were the original builders of the megalithic monuments found in the island; after them came the Phœnicians. In the 6th century B.C. the Carthagenians came to the island, to be subsequently displaced by the Romans. Publius was chief of the island when St. Paul was shipwrecked in A.D. 58 and converted the island to Christianity. It was for a time under

the domination of the Moors, but in 1090 was conquered by Count Roger the Norman, master of Sicily. Under the rule of that kingdom and subsequently of the Aragonese it remained until 1530, when it was handed over to the Knights of St. John. In 1565 began the great siege of Malta which made the island and its knights famous. The Turks, with a force of some 40,000, were finally repulsed by the valour of the Grand Master, de la Valette. Under the rule of the Knights much money was expended in fortifying the island and carrying out many magnificent works, until, in 1798, they were expelled by Napoleon. Before the year was out the Maltese rose in rebellion against the French, and Nelson, with the assistance of Neapolitan troops, compelled the French to capitulate in 1800. The Treaty of Amiens (1802) provided for the restoration of the island to the Order of St. John, but the inhabitants strongly protested against this, and the Treaty of Paris (1814), with the strong assent of the Maltese, confirmed the British in possession of the island.

Cyprus

An island in the Eastern Mediterranean, lying between 34° 33′ and 35° 41′ N. and 32° 20′ and 34° 35′ E., 40 m. south of Asia Minor and 60 m. west of Syria; for the most part it has an average width of from 35 to 50 m., but towards the north-east it narrows to about 10 m., from whence a long, narrow tongue of land runs out, to about a distance of 46 m. The total *area* of the island is 3,584 sq. m., with a *pop.* (1911) of 274,108, of whom 214,480 are Greek Christians, 56,428 Turks, and 144 military. From 1439 to 1571 Cyprus belonged to the Republic of Venice, when it was conquered by the Turks, who retained possession of it until 1878, when it was ceded to Great Britain for administrative purposes. Under the Convention an annual tribute of £92,800 was payable to the Sultan. On the outbreak of war with Turkey in 1914 the island was formally annexed by proclamation (Nov. 5, 1914). The island is administered by a High Commissioner, with an Executive Council of 7 members and a Legislative Council of 18 members, of whom 12 are elected—3 by Moslems and 9 by non-Moslems, on separate registers. The island is divided into six districts. An annual grant of £50,000 is made from the Imperial Exchequer.

The climate is varied, being hot and dry in the plains in the summer and damp on the coast, but on the hills bracing and healthy. The rainy and cool season is from October to March. Agriculture is the chief industry, the soil being remarkably fertile; methods and appliances, however, are still in a primitive state, but a great deal of instructional and experimental work is now being undertaken by the government. Cyprus was noted in antiquity for its forests, but these in course of years were destroyed; the government has taken in hand reafforestation, and mulberry, olive, carob, and other fruit trees are increasing rapidly. Efforts are being made to revive the tobacco industry, which was once flourishing. In the past the island has suffered much from plagues of locusts, but the "screen and pit" system was successful in combating them, and now there are only scattered locusts, which are purchased alive by the government. Cyprus wine, which is pure and strong, enjoys a considerable reputation; the practice of storing it in tarred skins, which spoiled the flavour, is being gradually given up. A large amount of copper was produced in the island at one time, but little has been extracted of recent years; salt, gypsum, and asbestos are at present mined. The chief **products** of the island are cotton, wine, currents, wheat, barley, wool, silk, spirits, asbestos, sponges, and raisins. A new harbour has been made at Famagusta, and a railway runs from Famagusta to Evrychou, a distance of 76 m. *Principal towns:* Nicosia (16,052) the capital; Larnaca (9,262); Limassol (10,302).

COLONIES IN ASIA

Aden

A town and territory on the south coast of Yemen, Arabia, 100 m. east of the Straits of Bab-el-Mandeb. It has a total *area* of 75 sq. m., and a *pop.* of 46,165. A Resident acts as military and civil governor, subject to the Government of Bombay. The harbour is the *entrepôt* of trade between Europe and America on the one hand, and India, Southern Arabia, and the east coast of Africa on the other. It is a coaling station for the British Navy, and as such is strongly fortified. The islands of *Perim* and *Kuria-Muria* off the coast of Arabia, and *Socotra* off the coast of Africa, are dependencies of Aden. Perim has an area of about 5 sq. m., and is used as a coaling depôt for the mercantile marine. Socotra has an area of 1,382 sq. m. and a pop. of 12,000 of Arab descent. CAPITAL, Hadibo. Products, aloes, dates, figs, etc.

	1913	1914	1915
Exports to U.K.	£309,120	£231,554	£501,743
Imports from (and of) U.K.	483,171	377,791	337,780

Political Resident, Maj.-Gen. J. M. Stewart, C.B. (Rs. 3,500 *per mensem*).
First Assistant Resident, Lt.-Col. H. F. Jacob, I.A.
Second ditto, Lt.-Col. W. Beale.
Third ditto, Maj. W. M. P. Wood.
Fourth ditto, Capt. B. R. Reilly.
Chairman, Port Trust and Aden Settlement, J. B. S. Thubron.
1st Class Magistrate, Khan Bahadur Syed Rustornali.

Bahrein Islands

These islands in the Persian Gulf have been under British protection since 1847. They have a *pop.* of 105,000. The chief town is Muharrak, on the island of that name (pop. 20,000), but the commercial capital is Manama (pop. 20,000). The ruling chief is Sheikh Esa bin Ali Al Khalifa, C.S.I. Since 1904 a British officer has resided at Manama, as Political Agent of the Government of India, working under the Resident in the Persian Gulf. The chief industry is pearl fishing, but there is a large transit trade with Arabia.

	1914–15	1915–16
Imports	£758,418	£1,172,764
Exports	461,624	368,903

Resident in the Persian Gulf, Hon. Lt.-Col. Sir Percy Cox, K.C.I.E., K.C.S.I. (Basra).
Deputy Resident, Persian Gulf, Maj. A. P. Trevor, C.I.E. (Bushire).
Political Agent, Capt. T. C. Fowle (Manama).

Mesopotamia, Occupied Territories of

The rich country at the head of the Persian Gulf was occupied by the British in view of the military expedition to Baghdad. It is the former Turkish vilayet of Basra, and has an *area* of 53,580 sq. m. with a *pop.* of 600,000. The country is one of the most fertile in the middle east, but its cultivation has been entirely hampered by Turkish methods. CAPITAL, Basra.
Resident in the Persian Gulf, Hon. Lt.-Col. Sir Percy Cox, K.C.I.E., K.C.S.I. (Basra).
Principal Military Governor, Lt.-Col. d'Arcy Charles Brownlow, C.I.E.
Adviser to ditto, R. W. Bullard, C.I.E.
Deputy Military Governor, Lt.-Col. F. W. Radcliffe, C.I.E.
Assist. Political Officer, Maj. G. E. Leachman, C.I.E.
Revenue Commissioner, H. R. C. Dobbs, C.S.I.
Telegraph Officer, E. L. Bagshawe, C.I.E.
Postal Officer, C. J. E. Clerici, C.I.E.

British North Borneo

British North Borneo comprises the northern portion of the island of Borneo (*q.v.*). It is not an official dependency, but is the property of the British North Borneo Company, to whom a royal charter was granted in 1881. In 1888 a formal protectorate was proclaimed over the territory. It has an *area* of 31,000 sq. m. and a *pop.* of 208,183. Acting under the instructions of the Court of Directors, the administration of the territory is in the hands of a Governor, assisted by a Council of 7 official and 5 unofficial members. Residents preside over the 5 residences into which the territory is divided; these again are subdivided into districts. The laws are based on the Indian Penal, Criminal and Civil Procedure Codes, supplemented by local ordinances and proclamations. There is an Imaum's Court for Mahommedan law.

The chief wealth of the country at present lies in its jungle produce. There is a great profusion of excellent timber, and guttapercha, rattans, mangrove bark, edible birds' nests, guana, are

also largely exported. The principal cultivated produce includes tobacco (export in 1915, £273,322), sago, coconuts, coffee, pepper, gambier, and sugar-canes. The export of rubber in 1915 was £274,422. Coal of excellent quality is now being worked in the neighbourhood of Cowie Harbour and elsewhere.

A railway, 125 m. long, inclusive of sidings, runs from Jesselton, Gaya Bay, on the west coast, to Melalap in the interior; a branch some 20 m. long runs from Beaufort Junction to Weston, Brunei Bay. Wireless telegraph stations have been constructed at Jesselton, Sandakan, Tawao-Sebatik, and Kudat.

The chief town and seat of the administration is SANDAKAN (pop. 8,256) on the east coast; Jesselton, on the west coast, is the other important town.

Gen. Manager Railways, J. W. Watson	£1,000

Mail transit: 24 days.

Brunei

Brunei, or Borneo Proper, is a state in the island of Borneo, lying N.E. of Sarawak. It has an *area* of 4,000 sq. m. and a *pop.* of 30,000. The CAPITAL is Brunei, with a pop. of about 12,000. It is ruled by a Sultan, Mohamed Jemalulalem, C.M.G. (*b.* '89). A protectorate was proclaimed over Brunei by England in 1888, and in 1906 a British Resident was appointed with governors to control the general administration of the State.

High Commissioner, The Governor of the Straits Settlements.
British Resident, (vacant).

CEYLON

Ceylon is an island in the Indian Ocean off the southern extremity of India, lying between 5° 55′ and 9° 51′ N. and 79° 41′ and 80° 54′ E.; it is almost joined to the mainland by a chain of reefs and sandbanks, called Adam's Bridge, now surmounted by a viaduct. Its extreme length is 266 m. and its width 140 m. It has a total *area* of 25,481 sq. m., and a *pop.* in 1915 of 4,424,309; more than half of the population are Buddhists, the Hindus number 997,384, and the Mahommedans and Christians number about 303,761 and 441,718 respectively. The bulk of the population are Singhalese, then Tamil, Moormen (Arabs), Burghers, Eurasians, and Malays. An aboriginal nomadic race, the Veddahs, occupy the interior, and number about 5,000. Europeans number 7,500.

The **Government** is in the hands of a Governor nominated by the Crown, an Executive Council of 6, and a Legislative Council of 21 members, which is composed of the Executive Council, 5 other official members, and 10 non-official members, of whom 6 are nominated and 4 elected. Colombo, Kandy, and Galle have municipal government, and there are 21 local boards. The basis of the law is Roman-Dutch, but the criminal law has been remodelled from the Indian Penal Code. *Education* is unsectarian, and in the case of vernacular schools, free.

The *climate* is comparatively healthy, the temperature being cooler than on the mainland. There is hardly a month without rain, so that the vegetation is luxurious. Coffee was formerly Ceylon's principal product for export; but the tea industry has developed by leaps and bounds, the export in 1915 being 215,632,727 lb.; rubber has also remarkably developed of late years, 435,748 cwt. being exported in 1915, and these, with the products of the coconut, are now the chief staples. Other products are plumbago, cocoa, grain, rice, and cinnamon. Experiments are being made with cotton in the dry zones. Railways, owned and worked by the Government, extend 672 m.

The **Maldive Archipelago** is tributary to Ceylon; it consists of groups of islets 400 m. west of Ceylon, inhabited by a Mahommedan population estimated at 72,237. Mali is the chief island. The produce consists of millet, fruit, and coconuts.

CHIEF TOWNS: COLOMBO (251,338), the capital of the island, has an excellent harbour, at which most ships for the East and for Australasia call: there are graving-dock, patent slip, and a coaling depôt. Other towns are Galle (39,960); Jaffna (40,441); Kandy (29,451).

	1913	*1914	1915
Revenue	£3,411,502	£4,481,464	£3,436,365
Expenditure	3,178,061	4,624,493	3,343,200
Public debt	—	—	5,750,862

* Owing to the decision that the financial year of the Colony should in future run from Oct. 1 to Sept. 30, instead of from July 1 to June 30, the figures for 1914 are for a period of 15 months.

HONG-KONG

An island and Crown colony, situated close to the mouth of the Canton river, and divided from the southern coast of China by the Ly-ee-moon pass, about ¼ mile in breadth. It lies between 22° 9′ and 22° 1′ N., and 114° 5′ and 114° 18′ E. and has an area of 35 sq. miles. It was ceded to Great Britain in 1841, being then a desolate island, inhabited by a few fishermen. *Kowloon Peninsula*, with various small adjacent islands, was added in 1860, and other territory on the mainland (356 sq. miles) in 1898. The total *area* of the colony is 392 sq. miles with a *pop.* (in 1916) of 509,160. The island of Hong-Kong itself is mainly composed of granite, and rises in irregular masses to a height, in Victoria Peak, of 1,825 ft. The CAPITAL, Victoria, built on the slope of the hills, and facing the sea, is very picturesque; the harbour, with its area of 10 sq. miles, is one of the most magnificent in the world. The Praya reclamation or esplanade, completed in 1903, is more or less devoted to shipping and shipping interests. The Government buildings are situated midway up the island, and at the top, or "Peak" District, are the summer quarters of the wealthier inhabitants. The temperature has a yearly range of from 45° to 99°, and the mean rainfall is about 90 in., the greater portion of which falls in the wet season, May–August. Hong-Kong is a free port, and the centre of a vast distributive trade for China and the East, cottons, coal, iron and steel, and other manufactured articles being the principal **imports**, whilst tea, silk, sugar, flax, rice, salt, umber, sandalwood, ivory, betel, etc., are the chief **exports**.

Government is in the hands of a Governor, with executive (eight members) and Legislative Councils (fourteen members), the latter including seven official and six unofficial members, four of whom are nominated by the Crown on the recommendation of the Governor (two being usually Chinese); one is nominated by the Justices of the Peace from their body, and one by the Chamber of Commerce. The island is a naval and military station, with an Imperial garrison; it is strongly fortified. **Education** is grant-aided. The Hong-Kong University was opened in 1912; it had 172 students in 1915—101 taking engineering, 37 medicine, and 34 arts. In the various schools subject to Government supervision there were 19,856 pupils in 1915. The **shipping** entered and cleared in 1915 was 531,602 vessels, with a tonnage of 33,884,919.

	1913	1914	1915
Revenue	$8,512,308	$11,007,273	$11,786,107

SARAWAK

Sarawak is a state on the north-west coast of Borneo, with a sea-board extending 500 m., an *area* of about 50,000 sq. m., and a *pop.* in 1915 of 600,000.

In 1888, while remaining an independent state, it came by treaty under the protection of Great Britain, all its foreign relations being conducted by H.M. Government. The government of Sarawak was handed over by the Sultan of Brunei in 1842 to Sir James Brooke, who ruled as Raja

until 1868, when he was succeeded by his nephew, H.H. the Raja Sir Charles Johnson Brooke, G.C.M.G. The Raja married in 1869 Margaret Alice Lily de Windt, and his *heir* is the Raja Muda, Charles Vyner Brooke (*b.* Sept. 26, 1874). Under the just and equitable rule of the Brookes, Sarawak has been reclaimed from barbarism. Further concessions of territory have been obtained from time to time—in 1861, 1882, 1885, and in 1890, when the Limbang River was obtained. The Lawas River was added in 1905. At Paku, in Upper Sarawak, and in the Batang Lupar Residency, Chinese are engaged in working gold, the output in 1914 being $1,078,600. The Borneo Company possesses a monopoly of the mineral rights, other than coal and oil, over most of Sarawak. Oil is worked by the Anglo-Saxon Petroleum Company at Miri. The output of coal in 1914 was 47,049 tons. There is a considerable export of timber from the Rejang River to Hong Kong. Coffee, pepper, and sago are extensively cultivated, and other products include diamonds, quicksilver, gutta-percha, rubber, canes, rattans, camphor, bees' wax, birds' nests, tapioca, gambier, and silver.

CAPITAL: Kuching (pop. 25,000), on the Sarawak River, about 23 m. inland; it is the headquarters of the Bishop of Labuan and Sarawak. Sibu has a large population of Chinese traders.

In 1912 a Government Agency was established in London.

	1913	1914	1915

WEI-HAI-WEI

The territory of Wei-hai-wei was leased to Great Britain by China by a Convention signed at Peking, July 1, 1898; it lies in latitude 37° 30′ N., longitude 122° 10′ E., on the Shantung promontory, about 40 miles east of Chefoo, and nearly opposite Port Arthur. The harbour is sheltered, and can accommodate a large number of vessels, which are able to lie close to the shore. The climate is one of the best in China—the winter being cold and bracing, and the summer heat not excessive. With the town and harbour there passed under British jurisdiction the island of Liu-Kung, on the north side of the bay, and all other islands and waters in the bay, together with a belt of land 10 miles wide along the entire coast-line of the bay. The *area* is 285 sq. miles, and the Chinese *pop.* 150,000; while the sphere of influence over which the British Government holds military rights has an area of 1,500 sq. miles. Gold and other minerals exist, but have not yet been worked to any extent. The territory is administered by a commissioner under the Colonial Office, residing at Port Edward, on the mainland.

	1913–14	1914–15	1915–16

STRAITS SETTLEMENTS

The Straits Settlements, comprising Singapore, Penang, and Malacca, were transferred from the control of the Indian Government to that of the Secretary for the Colonies in 1867. The Colony derives its name from the Straits of Malacca, which form the great trade route between India and China. The total *area* of the colony is about 1,600 sq. m., with a *pop.* of 778,160, including 397,508 Chinese, 248,304 Malays, and 87,268 natives of India. The *capital* of the colony and seat of Government is Singapore. The Governor is assisted by *Executive* and *Legislative Councils*, the first consisting of seven official members, and the second of ten official and eight non-official members, two of whom are nominated by the chambers of Commerce of Singapore and Penang. The *law* in force is that contained in local ordinances, and in such English and Indian Acts and Orders in Council as have been made applicable to the colony. The Indian Penal Code, with slight alterations, has been adopted, and there is a Civil Procedure Code based on the English Judicature Acts. There is a Supreme Court, which holds assizes at Singapore and Penang every two months, and quarterly at Malacca; and which holds civil sittings, monthly at Singapore and Penang, and quarterly at Malacca. The *climate* varies but little during the year, the mean maximum and minimum temperatures being between 87·9° and 75° F. The rainfall is pretty evenly distributed throughout the year, the average in Singapore being 102·95 in. The chief **exports** are tin, gums, spices, gambier, sago and tapioca, gutta, para rubber, rattans, hides, phosphates of lime, and pine-apples. The export of cultivated rubber for 1914 was 19,727 tons, and for 1915 34,891 tons. The chief imports are rice, cotton piece goods, opium, petroleum, and coal. A railway through the peninsula connects Singapore with Penang. The shipping which entered and cleared the ports in 1915 was of a total tonnage of 20,896,952, as compared with 24,859,917 in 1914.

	1913	1914	1915
Revenue	$12,397,747	$14,016,882	$14,131,691

* And quarters.

Governor and Commander-in-Chief, His Excellency Capt. Sir A. H. Young, G.C.M.G. (b. 1854) £5,000 + duty allow. £1,500
Private Sec. W. H. Lee-Warner . . .
A.D.C. (vacant) 330
G.O. Commdg. Troops, B.-Gen. D. Ridout, C.M.G., R.E. 650–750
Colonial Secretary, F. S. James, C.M.G. 1,500 + 300
Assist. ditto and Clerk of Councils, P. A. F. David (E. C. H. Wolff, actg.) . 800–1,000
2nd Assist. ditto, R. Crichton . .
Registrar of Companies and Official Assignee, C. J. Saunders . . 1,050–1,200
Treasurer, A. M. Pountney . . 1,050–1,200
Assist. ditto, H. P. Polglase . . 400–540
Auditor-General, H. Marriott . 800–1,000
Director of External Audit, G. P. Bradney 800–1,000
Colonial Engineer and Surveyor-General, F. J. Pigott . . . 1,050–1,200
Executive Engineer, H. V. Towner . 600–720
Master Attendant, Lieut.-Commdr. B. A. Cator, R.N. . . . 750–900
Postmaster-General, G. G. Wilson (*actg.*) 800–1,000
Chief Justice, Sir J. A. S. Bucknill . 2,000
Puisne Judges, L. M. Woodward . . 1,300
Do. L. P. Ebden . . 1,200
Do. A. Earnshaw . . 1,200
Do. R. C. Edmonds . . 1,200
Do. P. J. Sproule . . 1,200
Registrar, F. H. V. Gottleib . . 800–1,000
Attorney-General, G. A. Goodman . 1,500
District Judge and First Magistrate, G. A. Hall $6,000
District Judge, H. W. Firmstone . £800–1,000
2nd Magistrate, R. D. Acton . . 650–750
Colonial Chaplain, Rev. F. G. Swindell . 700
Director of Education, (vacant) . 1,050–1,200
Principal Civil Medical Officer, W. Gilmore Ellis 1,050–1,200
Chief Medical Officer, General Hospital, F. B. Croucher . . . 750–900
Senior Health Officer, Singapore, W. S. Sheppard 600–720
Surgeon, C. J. Smith . . . 600–720
Chief Health Officer, G. E. Brooke . 750–900
Government Pathologist, G. A. Finlayson . 750–900
Insp.-Gen. of Police, Capt. A. R. Chancellor 1,050–1,200
Supt. of Police, G. H. May . . 720–840
Insp. of Prisons, S. Codrington . 650–750
Director of Gardens, I. H. Burkill . 650–750
Supt. Government Monopolies, F. M. Baddeley 800–1,000
Resident Councillor, Penang, A. T. Bryant $9,600
Solicitor-General, Penang, A. B. Voules £800–1,000
District Judge and 1st Magistrate, Penang, W. C. Michell 1,175
Resident, Malacca, L. E. P. Wolferstan 800–1,000

Singapore is an island off the southern extremity of the Malay Peninsula, about 27 m. long by 14 m. wide, having an *area* of 206 sq. m. and a *pop.* of 303,321. It is hilly and forested, fertile, and not unhealthy for Europeans. The island was scarcely inhabited until taken possession of by Sir Stamford Raffles by virtue of a treaty with the Johore princes. The city of Singapore, on the south side of the island, is a great commercial centre for the East. It has a commodious harbour, protected by fortifications. It is the headquarters of H.M. military forces in these regions.

Penang, or Prince of Wales' Island, lies 360 m. north of Singapore and about 2 m. off the coast of Province Wellesley. *Area*, 107 sq. m.; *pop.* 141,559. Penang was the first British settlement in the Malay Peninsula, having been acquired by the East India Company from the Raja of Kedah in 1786. The port and capital is Georgetown, better known as Penang.

Province Wellesley, a strip of land 45 m. along the mainland, was originally acquired from the Raja of Kedah in 1800 in consequence of the prevalence of piracy. It has been gradually enlarged from time to time to its present size. It is politically one with Penang. It has an *area* of 288 sq. m. and a *pop.* of 128,978. It is fertile plain, largely covered by rice-fields and sugar plantations; between Oct. and Feb. there is excellent snipe-shooting in the paddy-fields.

The Dindings, *area* about 265 sq. m., *pop.* 7,466, about 80 m. south of Penang, consist of the island of Pangkor and a small strip of territory on the mainland, where is Lumut, the headquarters, with a fine harbour. Politically this settlement is part of Penang. They are sparsely inhabited and financially unimportant.

Malacca is a town and territory 240 m. south of Penang, with an *area* of 659 sq. m. and a *pop.* of 124,081. It is one of the oldest European settlements in the East, having been captured by the Portuguese in 1511, under whose tenure it remained until 1641, when it fell to an attack of the Dutch. It was retained by the Dutch till 1795, when it was taken from them by Great Britain, but was restored to them in 1818. In 1824, however, it was again transferred to British rule, being exchanged for the British settlements in Sumatra. It is administered by a Resident, subject to the Governor of the Colony. The chief exports are tapioca, rubber, copra, and gambier.

The **Cocos**, or Keeling Islands, are a small coral group lying some 700 m. S.W. of Java, with an *area* of 9 sq. m. and a *pop.* of 749. They were annexed to the Straits Settlements, 1903. There are large coconut plantations on the islands, and copra, oil, and nuts are exported. In 1902 a station on the Cape-Australia cable route was established on Direction Island, in the N.E. part of the group. The *Emden* was destroyed off these islands.

Christmas Island lies 200 miles S.W. of Java, and was annexed to Singapore in 1900. The island is densely wooded and has an *area* of about 62 sq. m. The *pop.* is about 1,100—all, with the exception of the District Officer and his staff, employees of the Christmas Island Phosphate Company, which works the extensive deposits of phosphates of lime.

Labuan is an island situated in a bay on the N.W. coast of Borneo. It was administered by the British North Borneo Company from 1889–1905; it was then put under the administration of the Governor of the Straits Settlements, and in 1906 was made part of the Straits Settlements. It has an *area* of 31 sq. m. and a *pop.* of 6,546, mostly Malays. Port and town, Victoria (1,579). Extensive coal beds exist in the island.

Mail transit: Singapore, 22 days; Penang, 20 days; Malacca, 23 days.

THE MALAY STATES

1. THE FEDERATED MALAY STATES

On the mainland there are several protected Malay States, which, though not part of the Colony, are subject to the supervision of a *High Commissioner* (the Governor of the Straits Settlements), which is exercised through British Residents, who assist the native rulers in the administration of the States. Perak, Selangor, Pahang, and Negri Sembilan agreed to form one adminis-

trative federation under a British Resident-General (now known as the Chief Secretary to Government) in July 1896. The total *area* of the Federation is 27,506 sq. m. with a *pop.* in 1913 of 1,117,625. A Federal Council was constituted in 1909. Each native State is represented on the Council, and special representation has also been arranged for the rubber and tin interests. The Council deals with matters of general concern to the States. Care has been taken to preserve the autonomy of the chiefs in local affairs. These countries are exceptionally rich in natural resources, and for several years have exported the greater part of the Straits tin. In 1915 the exports of *tin and tin ore* amounted to 46,766 tons, valued at £7,176,054. The tin output of the States is smelted locally, and is exported to Europe and America. The soil is fertile, and there are vast areas of forest land available for plantations. Rubber and coconuts are most cultivated at present. In 1915, 44,523 tons of rubber of various kinds, valued at £10,927,072, were exported. Copra exports were £214,493. There are (1915) 872 m. of railway, chiefly in Perak and Selangor, all owned and managed by the Government. At present, considerable railway extension is in progress, which will result in the eventual linking up of Singapore, Penang, and Bangkok. The Malay States Guides, a regiment of Sikh troops, are maintained by the Government.

Perak, on the western coast of the peninsula, has an *area* of 7,800 sq. m. and a *pop.* of 494,057. *Sultan,* H.H. Abdul Jalil Nasruddin Mukhtaram Shah. Capital, Taiping (21,577). The ports are Teluk Anson and Port Weld. Ipoh (27,875) is the chief commercial centre.

Selangor adjoins Perak along its southern frontier. *Area,* 3,156 sq. m.; *pop.* 294,035. *Sultan,* H.H. Ala-'idin Suleiman, K.C.M.G. The capital is Kuala Lumpur (58,107), the largest town on the mainland and the seat of the Federal Government. Port Swettenham provides accommodation for ocean steamers.

Negri Sembilan is the name given to a federation of small states lying between Selangor, Malacca, Pehang, and Johore. *Area,* 2,550 sq. m.; *pop.* 130,199. They are administered by one resident, who resides at Seremban (10,594). *Ruler,* H.H. Tunku Muhammad, K.C.M.G. The port is Port Dickson.

Pahang is less opened up, but contains much mineral and agricultural wealth. *Area,* 14,000 sq. m.; *pop.* 118,708. *Sultan,* H.H. Mahmud, C.M.G.

	1913	1914	1915
Revenue	£5,172,149	£4,352,826	£4,757,081

Director of Museums and Fisheries, H. C. Robinson 760

Chemist, B. J. Eaton 700

Supt. of Printing, B. Mahony 690

Mail transit: Kuala Lumpur, 21 days (*via* Penang).

(The Malay States Information Agency, 88 Cannon Street, London, E.C., has been established by the Government of the Federated Malay States to furnish information to inquirers interested in the States, and to act for firms and individuals established or resident in the Malay Peninsula.)

2. THE MALAY STATES NOT INCLUDED IN THE FEDERATION

The Malay States not included in the Federation consist of five, namely, Johore, Kedah, Perlis, Kelantan, and Trengganu. The relations of Johore with Great Britain are defined in the Treaty of 1885, as amended in 1914, whereby the Sultan agrees to accept, and to act upon the advice of a British officer called the General Adviser. In respect of the other four States, the Siamese Government, by the Treaty of 1909, transferred to the British Government all rights of suzerainty, protection, administration, and control which they possessed.

Johore occupies the southern extremity of the peninsula. It has an *area* of 9,000 sq. m. and a *pop.* of 250,000. CAPITAL, Johore Bahru. The most important industry is rubber; gambier, pepper, copra, arecanuts, and some tin are also exported.

The New HAZELL, 1917

	1913	1914	1915
Revenue .	$4,378,555	$4,352,896	$5,790,393
Expenditure .	3,267,484	3,899,698	3,645,421
Public debt .	—	—	6,750,000
Imports . .	—	8,692,734	9,163,665
Exports . .	—	16,535,450	28,917,800

Sultan, H.H. Ibrahim, G.C.M.G. (*b.* 1873).
General Adviser, F. J. Weld (*acting*).
Legal Adviser, M. H. Whitley.

Kedah lies on the west coast, and has an *area* of 3,800 sq. m. and a *pop.* of 255,000. North Kedah, where the soil is heavy fertile clay, is almost entirely given over to rice cultivation; coconut, betel-nut, and rubber are the products of the south; there is a small export of wolfram. CAPITAL, Alor Star (12,000).

	1914	1915
Revenue . .	$2,197,527	$2,592,024
Expenditure . .	2,396,477	2,273,522
Public debt . .	2,989,518	—

Regent, H.H. Tengku Ibrahim.
British Adviser, G. A. Hall (*acting*).

Perlis lies to the north of Kedah on the coast. *Area*, 305 sq. m.; *pop.* 37,796. Principal product, rice. There are tin and ground deposits. CAPITAL, Kangar.
Raja, H.H. Saiyid Alwi.
British Adviser, H. C. Eckhardt.

Kelantan is situated on the east coast of the peninsula. *Area*, 5,500 sq. m.; *pop.* 287,000. The state is flat and fertile in the north, but mountainous and uncultivated in the south. The chief industry is agriculture; *exports* include live stock, rice, copra, betel-nuts and rubber. Gold, pyrites, and tin are mined. CAPITAL, Kota Bharu (12,000).
Sultan, H.H. Muhammad, K.C.M.G.
British Adviser, R. J. Farrer.

	1914	1915
Revenue . .	$762,772	$692,556
Expenditure . .	805,965	753,586

Trengganu lies south of Kelantan on the east coast. *Area*, 6,000 sq. m.; *pop.* 155,000. Exports consist of tin ore, padi, copra, pepper, and wolfram. CAPITAL, Kuala Trengganu (14,000).
Sultan, H.H. Zainal-Abidin, K.C.M.G.
British Agent, J. L. Humphreys.

	1914	1915
Revenue . .	$166,380	$183,723
Expenditure . .	178,424	183,470

EGYPT AND THE SUDAN

Sultan, H.H. Hussein Kâmil Pasha, G.C.B., *b.* Nov. 21, 1853, the eldest living prince of the family of Muhammad Ali, who reigned in Egypt, 1811–1848. On the declaration of a British protectorate over Egypt on Dec. 18, 1914, and the deposition of the late Khedive, the Khediviate was offered, with the title of Sultan of Egypt, to His Highness Prince Hussein Kâmil Pasha, and accepted by him. The Sultan was *married* (2nd marriage) in 1886, and has offspring: Prince Kamal ed-Din, *b.* 1875 (*m.* 1901, Princess Ni'mat Hânem), and three daughters. Brothers of the Sultan are: Prince Ibrâhîm Hilmi, *b.* 1860; Prince Mahmûd Hamdi, *b.* 1863; Prince Ahmed Fûâd, *b.* 1868.

The *area* of Egypt (excluding the provinces reconquered in the Sudan) is about 363,000 sq. m., of which about 12,976 sq. m. are settled. The *pop.*, according to the census of 1907, was 11,287,359; of these 62,793 were Greeks, 34,926 Italians, 20,653 British, and 14,591 French.

Egypt was formerly nominally dependent on Turkey. From 1879 to 1883 the country was under the dual control of France and Great Britain, but in the latter year Great Britain intervened after Arabi Pasha's rebellion, and from that date until 1914 practically governed the country. The British occupation, at first regarded as temporary, by force of circumstances became firmly established, and the predominant position of Great Britain was formally recognised by France by the **Anglo-French Agreement** (signed April 8, 1904). The French, German, and other Governments also assented to very considerable modifications in the international arrangements established in Egypt for the protection of foreign bondholders, the modifications being contained in a draft Khedivial Decree annexed to the Agreement. H.M. Government gave an assurance to those Powers that their commerce with Egypt should enjoy most-favoured-nation treatment for thirty years.

There is a **High Commissioner at Cairo**, who has a seat in the **Council of Ministers**, in which, with the Sultan, rests the real legislative authority. There are, however, provincial councils for local affairs. In July 1913 the previously existing General Assembly and Legislative Council were amalgamated into one, termed the **Legislative Assembly.** The new body consists of 89 members, 66 being elective. The whole system of representation was at the same time improved by the introduction of elections in two degrees, with one elector-delegate for every 50 inhabitants. In the event of a minimum representation not being secured at the elections, an Organic Law requires the Government to secure such representation. The Legislative Assembly is given a certain power of initiative which was not possessed by the previous bodies, but certain matters are reserved from the Legislative Assembly, such as the service of the Civil List, and all questions concerning foreign powers and the relations of Egypt with them [see Cd. 6875 of 1913]. **The judicial system,** as existing before the declaration of the protectorate, was somewhat complex, but will in due course be revised. The Consular Courts try cases of crime brought against foreigners, and civil cases between foreigners of the same nationality; the Native Courts, instituted 1884–9, are occupied with civil actions between natives, and crimes by natives; and there are also courts of religious law for Mahommedans. The **Mixed Tribunals,** which were instituted in 1875, deal with civil actions between persons of different nationalities, or between natives and foreigners, and to some extent with criminal offences of foreigners. They were set up for a period of five years, and have been renewed periodically for periods of five years. The **chief religion** is that of Islam, the Moslems numbering over 9,000,000, but there are about 730,000 Christians, of whom 608,000 are Copts with the Patriarch of Alexandria at their head. In 1897 only 5·8% of the population over 7 years of age could read and write. The remainder were illiterate, but progress is being made. In 1906 a Supreme Council of Education was reconstituted and a department of Agriculture and Technical Education established, and in 1910 local education was handed over to the Provincial Councils. There are many Government Coptic and Mahommedan schools. The Indian rupee has been made legal tender by a Decree of March 1916.

Suez Canal

This waterway is the property of an Egyptian company, authorised by the Viceroy in 1856, and confirmed by the Sultan ten years later, the

concession having been granted to the late M. de Lesseps for 99 years from Nov. 1869. A **proposal to extend the concession** from 1969 to 2008 was put forward in 1910, but was rejected by the Egyptian National Assembly. The **length** of the waterway is 90 miles, of which 66 miles are canal and 24 miles natural lakes. The cost of construction and enlargement was £24,000,000. The width of the canal is 120 ft., and the depth is sufficient for vessels drawing up to 30 ft. The depth when first opened in 1870 was 24 ft. 4 in. It was increased in 1890, 1902, 1906, and again in 1908 (to 28 ft.). In 1914 the depth was increased to 29 ft., and in 1915 to 30 ft. The *Franconia*, of the Cunard Line, and the *Ceramic*, of the Ocean S.N. Co., of a gross tonnage of 18,685 and 18,659 respectively, passed through the Canal for the first time in 1915 without difficulty. The **general management** is conducted from Paris, and the statutes are framed in accordance with French Company Law. In 1875 the British Government purchased the Khedive's shares for nearly £4,000,000 sterling. Their present value is £29,993,000. The affairs of the Canal are carried on by an **Administrative Council** of 32 members, of whom 10 are British, 3 of the latter being nominated by the Government. *President*, M. Jonnart; *Hon. President*, Prince d'Arenberg. British members: Sir H. A. Lee, K.C.M.G., C.B., H. T. Anstruther, Sir W. E. Garstin, G.C.M.G. (nominated by the Government); R. S. Donkin, Sir F. Green, Lord Inchcape, G.C.M.G., Lord Rathmore, J. W. Hughes, Sir T. Sutherland, G.C.M.G., and D. Sanderson. Transit dues, 7·75 fr. per ton; for ships in ballast, 5·25 fr. (The transit dues were increased in 1916 by over 100 centimes per ton.) The transit receipts in 1869 were £2,178; in 1912, £5,456,953; in 1913, £5,066,037; in 1914, £4,889,954; and in 1915, £3,740,904. The following table shows the traffic:

Year.	No. of Vessels.	Net tons.	British Vessels.	Per cent. British tonnage.
1910 .	4,533	16,581,898	2,778	62·9
1911 .	4,969	18,324,794	3,089	64
1912 .	5,373	20,275,120	3,335	63·4
1913 .	5,085	20,033,884	2,951	60·2
1914 .	4,802	19,409,495	3,078	66·5
1915 .	3,708	15,266,155	2,736	76·3

Industries.—The development of the country's commerce and industry has been most marked in recent years, and her prosperity is steadily increasing; about two-thirds of the population are engaged in agriculture, but the cultivated area can never extend beyond the region which is capable of being watered by the Nile. Of late years extensive reservoir works have been completed, consisting of a dam at Aswân, a barrage at Esna, and a lock at Asyût, greatly increasing the storage capacity of the existing reservoir; irrigation is now assured to a very wide area of land. The total cultivable area is reckoned at 7,975,258 feddans (1 feddan = 1·038 acre). The fellaheen, or small cultivators, receive advances from the **Agricultural Bank** up to £307.10*s.*, or in a few cases to £512.10*s.*, the loans being limited to 50% of the selling value of the land on which the advance is made. The Government guarantees interest at the rate of 3% on the Bank's capital, and the Bank charges 9% interest on its advances to the cultivators. The Bank takes all responsibility, but the Government through its tax-gatherers collects the money due to the Bank with the land tax. The fellaheen are also protected by the five-feddan law, which prevents distraint being levied on the agriculture property of cultivators consisting of five feddans or less. There are three seasons or crops in the year. Cereals are the winter crops, sown in November and harvested in May and June; cotton, sugar, and rice are sown in March and harvested in October and November; and rice, maize, millet, and vegetables are sown in July and harvested in September and October. In 1915 the area of wheat was 1,592,085 acres; of barley, 462,577 acres; of maize and millet, 2,194,031 acres; and of rice, 330,923 acres. In 1915 the export of sugar amounted to 26,257 tons, valued at £E573,615, and of cotton 6,899,192 kantars (kantar = 99·05 lb.), valued at £E19,145,644. Petroleum is now being worked in increasing quantities. There were, in 1915, 2,065 miles of *State railways*, and 816 miles of light agricultural railways owned by companies.

PRINCIPAL TOWNS.—CAIRO (726,075), the capital; Alexandria (413,611), the principal port; Port Said (58,804); Tantah (57,623); Damanhour (44,841); Mansourah (44,273); Assiout (42,751); Fayoum (40,499); Zag-a-Zig (38,152); Damietta (35,407).

Port Said—Consul, F. G. Freeman.
Vice-Consul, R. E. W. Chafy.

Mail transit : Cairo, 5–7 days.

THE ANGLO-EGYPTIAN SUDAN

By the campaigns of 1896–99 the Government re-established its authority over the provinces in the Sudan, temporarily abandoned in 1882, and during the rule of the Mahdi, and his successor, the Khalifa. A convention between the British and Egyptian Governments, settling the details for the administration of the Sudan, was signed in 1899. The *area* is estimated at 950,000 sq. m., with a *pop.* of 3,000,000, including 3,104 Europeans, and 9,815 Abyssinians, Egyptians, and Indians. The supreme military and civil command is vested in a Governor-General appointed by the Sultan, with the consent of H.M. Government. The Sudan has been divided into 14 provinces, each under a Governor. The provinces are divided into districts under Egyptian officers.

Darfur, which had been conquered after a stout resistance in 1874, was left under the rule of its Sultan. This country has an *area* of 150,000 sq. m. and a *pop.* of 750,000. The inhabitants are mostly negroes and Arabs. The Sultan, prompted by German emissaries, revolted during the great war. An expedition was sent against him, and he was defeated and killed in 1916, and in November of the same year it was announced that all his sons had been captured and the rebellion completely crushed.

The civil and criminal codes in force are based on that of India, and a judicial commissioner sits at Khartoum, to whom an appeal lies from the provincial tribunals. An educational system is being built up, and there are training colleges for teachers at Khartoum (Gordon Memorial College, opened Nov. 1902), Omdurman, Suakin, and Rufaa.

A railway runs from Cairo to Khartoum, and is being extended southwards to meet the line from the Cape. It has reached El Obeid, the capital of Kordofan, about 400 m. south of Khartoum. The Nile—Red Sea Railway, 331 m. long and 3½ ft. gauge, has been built from Port Sudan to the mouth of the Atbara River, about 20 m. south of Berber, where it joins the railway to Berber and Khartoum.

Products.—Gum arabic and ivory are the principal products, producing the bulk of the world's supply. Cotton, ostrich feathers, palm-nuts, dates, senna leaves, ground-nuts, hides, skins, and gold are also produced. Durra, a species of millet, used for making bread, is largely grown. There are large forests of ebony, gum acacia, and bamboo. Cotton growing is being successfully undertaken, the crops comparing favourably with those grown in Egypt proper.

UNION OF SOUTH AFRICA

AREA AND POPULATION

Provinces and Capitals.	Area, Sq. Miles.	Population. 1904.	Population. Census of 1911.
Cape of Good Hope (Cape Town)	276,995	2,409,804	2,564,965
Natal (Pietermaritzburg)	35,290	1,108,754	1,194,043
Transvaal (Pretoria)	110,426	1,269,951	1,686,212
Orange Free State (Bloemfontein)	50,389	387,315	528,174
Total	473,100	5,175,824	5,973,394

Of the total 5,973,394 persons (1911), 3,069,392 were males and 2,904,002 females. The increase for the Union (1904–11) was 15·41%. For the Provinces it was as follows: Cape, 6·44%; Natal, 7·69%; Transvaal, 32·78%; Orange Free State, 36·37%.

The population comprised (1911) 1,276,242 Europeans or whites (591,078 females); 4,019,006 natives (1,996,057 females); and 678,146 other coloured races (316,867 females). In 1904 the figures were: Europeans, 1,116,806 (increase 1904–11 of 14·28%); natives, 3,491,056 (increase 1904–11 of 15·12%); and other coloured races, 567,962 (increase 1904–11 of 19·40%). The total non-European increase (1904–11) was 15·72%. The proportion of Europeans in the total population in 1904 was 21·58%; in 1911, 21·37%.

Physical Features

Boundaries.—In the geographical sense South Africa, which lies between 16° and 35° S. and 12° and 36° E., includes the Provinces of the Cape of Good Hope, Natal with Zululand, Orange Free State, Transvaal, Basutoland, Bechuanaland, Swaziland, and Southern Rhodesia.

The coast-line is for the most part low-lying, and behind it rise ramparts of hills shutting off the interior. In places the mountains, which run parallel to the coast, run down close to the sea, as at Table Bay (3,582 ft. high). In the south-east is the great range of the Drakensbergen, which in places rise to a height of 10,000 to 11,000 ft. The various ranges lead, as it were, by a succession of steps to the great table-land of the interior, the Transvaal Province being practically a large plateau at an altitude of from 4,000 to 6,000 ft. The highest part of the Transvaal—the High Veld—has consequently a healthy, cool, and bracing climate. The drainage of South Africa is effected by the Orange River flowing into the Atlantic, the Zambesi, Limpopo, and other streams into the Indian Ocean, as well as numerous small streams. Owing to the steep fall, and the intermittent supply of rain, only the Zambesi is at all available for navigation. A large part of the interior plateau is covered by the great Kalahari Desert, and other parts are largely or wholly semi-desert or arid (Karroo). The most fertile regions lie on the southern and eastern coastlands.

GOVERNMENT

By the South Africa Act, 1909, the colonies of the Cape of Good Hope, Natal, the Transvaal, and the Orange River Colony were united in a Legislative Union under one Government under the name of *The Union of South Africa*. Provision was made for other territories, such as the British South Africa Company's territory, joining the Union later. The Governor-General of the Union of South Africa is appointed by the King at a salary of £10,000 a year. There is an Executive Council to advise the Governor-General in the government of the Union. The members of the Council are chosen and summoned by the Governor-General and sworn as Executive Councillors, and hold office during his pleasure. The **Parliament** consists of a Senate and House of Assembly. Cape Town is the **seat of Legislature,** Pretoria the **seat of the Executive Government.** The English and Dutch languages are official languages of the Union, and are treated on a footing of equality and possess and enjoy equal freedom, rights, and privileges. The **Senate** consists of 40 members, 8 elected by the Legislature of each province and 8 members nominated for 10 years by Governor-General. The membership of the Union **House of Assembly** is: Cape, 51; Natal, 17; Transvaal, 45; and Orange Free State, 17. The membership of either House is limited to persons of European descent. Parliament may by law prescribe the qualifications of voters; but no such law shall disqualify any person in the province of the Cape of Good Hope who, under the laws existing in the Colony of the Cape of Good Hope at the establishment of the Union, is or may become qualified to vote, by reason of his race or colour only, unless the Bill be passed by both Houses of Parliament sitting together and at the third reading be agreed to by not less than two-thirds of the total number of members of both Houses. No person who, at the passing of any such law, is registered as a voter in any province shall be removed from the register by reason only of any disqualification based on race or colour. The control and administration of native affairs and matters affecting Asiatics in the Union is vested in the Governor-General in Council. The command in chief of the **naval and military** forces within the Union is vested in the King or in the Governor-General as his representative. Bills passed by the Union Parliament require the assent of the Governor-General, and may be disallowed within one year by the King. The four original colonies became provinces of the Union, all, except the Orange River Colony—which became the Orange Free State—retaining their names. The Union assumed the Colonial debts and the control of railways, ports, and harbours. In each of the provinces an Administration, appointed for five years by the Governor-General in Council, represents the executive authority. There is a Council for each province, consisting of twenty-five members or as many more as the number of members the province is entitled to send to the Union Parliament. Four members are elected by each Provincial Council to

form, with the Administrator of the province, an executive committee. The election of senators and of members of the executive committees of the Provincial Councils is according to the principle of proportional representation, each voter having one transferable vote. In June 1915 a Commission was appointed to inquire into the system under which the provincial administrations are carried on. The first Union Parliament was opened by H.R.H. Duke of Connaught, K.G., in 1910.

Governor-General (Pretoria), His Excellency Rt. Hon. Viscount Buxton, P.C., G.C.M.G.	£10,000
Secretary (acting), P. Horsfall	800

Chief Clerk, F. Easton 725
Accountant, J. Fair 725
Engineer-in-Chief, N. Harrison . . . 1,000
General Plant Supt. A. J. Drakes . . 725

DEFENCE

The South Africa Defence Act, 1912, became law on June 14, 1912. This Act provides for the establishment of Defence Forces, comprising:
(1) a Permanent Force,
(2) a Coast Garrison Force,
(3) a Citizen Force,
(4) a Royal Naval Volunteer Reserve, and
(5) Special Reserve.

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 21 and 25 are liable to undergo a prescribed peace training with the Active

Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50% of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number. The establishment of Rifle Associations is a marked feature of the Act; citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rifle. Provision is also made in the Act for the cadet training of boys between 13 and 17 in urban and other populous areas where facilities can conveniently be arranged.

The permanent force—South African Mounted Riflemen—was established on April 1, 1913.

The Union has been divided into 15 military districts. To each military district has been allotted various units of different arms, to which the citizens entered for peace training in their 20th and 21st years are posted. The establishments of units for peace time have been fixed, regulations prepared and a Garrison Artillery formed. A cadet organisation is always in existence and Rifle Associations have been formed.

Education

In the South Africa Act, s. 85 (iii), it is provided that "Education, other than higher education, for a period of five years and thereafter until Parliament otherwise provides," shall be and remain under the jurisdiction of the respective Provincial Councils. For practical purposes it has been provisionally determined that all post matriculation instruction shall be deemed to constitute higher education. The Department of Education, under the Minister, is therefore concerned with:

(1) The University of the Cape of Good Hope, Capetown, established in 1873—it is empowered to grant degrees, but it has no attached teaching institutions; (2) the South African College, Capetown, founded in 1829; (3) Victoria College, Stellenbosch, incorporated in 1881; (4) Rhodes University College, Grahamstown, incorporated in 1904; (5) Huguenot College, Wellington, incorporated in 1907; (6) Grey University College, Bloemfontein, incorporated in 1910; (7) Transvaal University College, Pretoria, incorporated in 1910; (8) South African School of Mines and Technology, Johannesburg, incorporated in 1910; (9) Natal University College, Pietermaritzburg, incorporated in 1909. The department has also under its administration the training of first-class teachers.

Proposals were brought forward in 1916 for the establishment of a new university at Pretoria, comprising the Cape University and all the university institutions, except the South African College at Cape Town, and the Victoria College at Stettenbosch, which are to be separate universities. The seat of the Cape Town University is proposed to be at Groote Schuur.

The total number of students at the above Colleges in 1914 was 1,266, and the State expenditure on higher education during 1914-15 was £112,300.

Finance

The Revenue and Expenditure of the Union for the past five years are:

Year.	Revenue.	Expenditure.
1911–12 . .	£17,228,418	£16,547,380
1912–13 . .	17,292,519	17,064,386
1913–14 . .	17,108,550	17,623,747
1914–15 . .	15,329,230	17,401,197
1915–16 * .	13,412,000	13,737,000

* Estimates.

Public Debt

The Public Debt of the Union at March 31 1915, was £138,210,777, composed as follows:

Permanent Debt

3% loans	£54,105,11
3½% loans	26,650,76
3¾% ,, ...	3,000,00
4% ,, ...	37,010,65
4½% ,, ...	1,133,66
5% ,, ...	419,50
	£122,319,70

Floating Debt

3½% from Imperial Government .	£11,678,94
Treasury Bills	4,212,12
	£15,891,07

PRODUCTION AND INDUSTRY

The development of agriculture in South Africa has been overshadowed by the extraordinary progress of mining. Agriculture, however, suffers from lack of rainfall, and the problems of the future are water conservation and irrigation. Much was being done in the way of irrigation schemes, but matters have practically not changed since 1913, owing to the outbreak of the European war and the disturbed state of the country. Loans for irrigation purposes have been practically suspended except in cases where funds have been necessary to complete schemes which were already begun, or settled upon. There are 45 co-operative irrigation schemes in operation. Of the exporting agricultural industries, wool and mohair are the most considerable. The export of mohair in 191 was valued at £834,202. South Africa is the chief source of supply of mohair to the British market, its main rival being European Turkey. Of wool, the export is increasing; in 1914 it amounted to a value of £4,238,205, and in 191 to a value of £5,380,031 (170,003,173 lb.), while cattle hides and sheep and goat skins to a value of £1,668,410 were also exported. Ostrich farming, previously a successful industry, is now rapidly declining; feathers to the value of £743,772 were exported in 1915, as compared with £1,342,717 in 1914 and £2,953,587 in 1913. The export of maize in 1915 reached the highest total recorded for six years—viz. 298,765,234 lb. Practically the whole of the export was in response to orders within the British Empire. The potentialities of maize production in the Union are enormous. Cotton-growing is being undertaken, but the export at present is small (79,950 lb.). There are 5,037 acres under tea, giving a production of 5,010,091 lb. The last census showed the live stock to be as follows:

The New HAZELL, 1917

Stock.	Cape.	Natal.	Trans.	O.F.S.
Cattle	2,715,330	456,087	1,339,298	1,286,234
Horses	333,962	75,567	89,160	220,725
Sheep	18,594,746	2,031,146	5,024,898	10,060,053
Pigs	505,730	110,332	302,882	162,656

There were also, 11,762,979 goats, 746,736 ostriches, and 10,533,909 poultry.

Manufactures.—South Africa is not yet to any extent a manufacturing country, although the increasing output of the Natal and Transvaal coal mines will enable more to be done in this direction in the future. Furniture making is carried on in many of the coast towns, and the Cape lobster-canning industry is a growing one.

Mines and Minerals.—The coal deposits are enormous, particularly in the Transvaal, but comparatively undeveloped; the gold-mining industry is centred in the Transvaal, and since its rise, less than thirty years ago, has contributed over £400,000,000 to the world's stock, and its output is nearly 40% of the world's total annual output of gold. There are various base metals, such as asbestos, lime, graphite, magnesite, lead, flint, etc., produced, as well as bricks, cement, coke, tar, etc. Particulars of the exports of raw gold from South Africa will not be made known until the cessation of hostilities. Figures are, however, published as to the output, which, with other metals, was:

—	1914.		1915.	
	Quantity.	Value.	Quantity.	Value.
		£		£
Gold fine ozs.	8,396,068	35,664,230	9,096,398	38,639,043
Silver ,, ,,	890,781	102,433	966,168	106,244
Coal ,, tons	8,477,923	2,225,041	8,281,311	2,121,884
Base minerals, other than coal	—	1,147,659	—	1,342,480
Total . .£	—	39,139,363	—	42,209,651

The war had a serious effect on the diamond industry in 1914, the mines being immediately closed down, but a large portion of the white staff was retained. The discharge of the natives involved no real difficulty, as there is always a demand in other industrial centres for native labour. The output of diamonds was:

—	1914.		1915.	
	Carats.	£	Carats.	£
Transvaal	1,142,683	1,162,031	35,674	128,067
Cape	1,350,536	3,544,072	66,471	266,198
Natal	—	—	—	—
Or. Free S.	307,798	781,091	1,241	5,545
Total .	2,801,017	5,487,194	103,386	399,810

The total value of diamonds in South Africa, to the end of 1914, has been £169,342,868.

The labour employed in gold mining in 1915 was 21,975 whites and 178,367 coloured. The labour employed in diamond mining at the outbreak of the war was Transvaal, 367 whites, 222 coloured; Cape, 1,552 whites, 3,839 coloured; Orange Free State, 147 whites, 53 coloured; total, 2,066 whites, 4,114 coloured.

External Trade

The total value of the imports and exports (exclusive of specie) was as follows:

Year.	Imports.	Exports.	Total Trade.
	£	£	£
1909 .	27,355,877	49,296,673	76,652,550
1910 .	36,727,367	53,609,340	90,336,707
1911 .	36,925,384	57,024,000	93,949,384
1912 .	38,838,960	62,974,219	101,813,179
1913 .	41,828,841	66,569,364	108,398,205

Communications.—The total open mileage at the end of 1915 was 8,942 miles (comprising Cape, 3,964; Orange Free State, 1,265; Transvaal, 2,491; and Natal, 1,203). The mileage under construction amounts to 641½ miles.

The total capital expenditure up to the end of 1914 was £84,777,765. The total receipts were £11,573,204, and the net loss, after payment of interest, £191,024. The total working expenses were £8,840,208; the earnings per train mile were 7*s*. 9·5*d*. and the expenditure 5*s*. 11·4*d*. The railway revenue for 1915-16 showed a surplus of £958,000, due mostly to military traffic.

Posts and Telegraphs.—At the end of 1914 there were in the Union 1,301 combined post and telegraph offices, 1,150 post offices only, and 339 telegraph offices only—a total of 2,790 offices. 159,087,197 articles of inland mail matter were dealt with, and 1,231,870 inland registered packets; 5,998,515 telegraph messages, 6,396 wireless messages, and 57,400,000 telephone calls were handled; 436,541 money orders of a total value of £2,634,608 were issued, and 366,709 of a value of £2,125,878 were paid; postal orders issued numbered 3,458,662, amounting to £2,156,313, and those paid 2,795,233 valued at £1,669,566. The revenue and expenditure in respect of the postal service amounted to £1,015,836 and £1,060,231 respectively, and the telegraph and telephone revenue was £635,469 against an expenditure of £622,676. 15,021 miles of telegraph line, carrying 50,352 miles of wire, and 19,870 telephone exchange lines were open. The number of depositors in the Government Savings Bank was 242,739, and the total amount standing to their credit £6,287,108.

Shipping.—Excluding coastwise movements, the number of vessels which entered Union ports in 1915 was 1,100 with a net registered tonnage of 3,323,215 tons, as compared with 1,513 vessels with a tonnage of 5,046,922 tons in 1914, and 1,598 vessels with a tonnage of 5,349,621 tons in 1913. The number of vessels which cleared in 1915 was 1,121, with a tonnage of 3,355,882 tons, compared with 1,478 vessels with a tonnage of 4,914,661 in 1914, and 1,577 vessels with a tonnage of 5,277,324 in 1913.

Harbours.—Harbour works on an extensive scale have been constructed at Table Bay (Cape Town), Port Elizabeth, East London, and Durban. These ports are now under the direct control of the Department of Railways and Harbours.

Railways and Harbours Board

Chairman, Hon. Hy. Burton, K.C., Minister of Railways and Harbours; *Members*, Sir Thos. Rees Price, K.C.M.G.; T. S. McEwen, A.M.I.C.E.; Sir Thomas Hyslop, J.P.; *Secretary*, T. M. Berrangé.

Chief Officers

General Manager, Johannesburg, Sir W. W. Hoy, Kt.; *Assist. Gen. Man. Johannesburg*, G. C. S. Clark, C.M.G.
Assist. Gen. Man. Bloemfontein, W. H. Barrett.
Assist. Gen. Man. Cape Town, H. Salmon.
Engineer-in-Chief, Johannesburg, A. M. Tippett, M.I.C.E.
Chief Mechanical Engineer, Pretoria, D. A. Hendrie
Chief Accountant, Johannesburg, G. A. Reid.
Chief Ry. Storekeeper, C. Cock.
Catering Manager, Johannesburg, R. A. Simmons.

PROVINCES OF THE UNION OF SOUTH AFRICA

Cape of Good Hope

The Cape of Good Hope was discovered on Sept. 14, 1486, by Bartholomew de Diaz. In 1652 it was taken possession of on behalf of the Dutch East India Company. In 1795, Holland having

The New HAZELL, 1917

yielded to the French Revolutionary Government, it was taken possession of by the British, but evacuated in 1803. In 1806 it was again captured by a British force, and at the General Peace of 1814 was ceded in perpetuity to the British Crown. The Province extends from 26° to 35° S. and from 17° to 30° E. The *area* and *population* of the province and its territories are:

	Sq. m.	Pop. 1911.
Colony proper	206,860	1,553,630
East Griqualand	7,594	249,088
Tembuland	4,129	236,086
Transkei	2,552	188,895
Walfish Bay, etc.	430	3,076
Pondoland	3,906	234,637
Bechuanaland	51,524	99,553
Cape Province	276,995	2,564,965

Of the coloured population (1,982,588 in 1911), 19,763 were Malays and 415,282 a mixture of various races; the rest are Hottentots, Fingoes, Kaffirs, and Bechuanas. Of the white population in 1911, 301,268 were males and 281,109 females; of the coloured population 954,403 were males, and 1,028,185 females. Of the European population in 1911, 24,245 were professional, 143,925 domestic, 37,796 commercial, 87,795 agricultural, 50,031 industrial, 232,730 were dependants, and 5,855 indefinite and unspecified. Of the coloured population, the great majority are engaged in agricultural or domestic employments.

Religion.—In 1911 there were 1,437,688 Christians, 479,825 Dutch churches, 282,619 Anglican Communion (including Church of England, Church of Province of South Africa, Church of Ireland, Episcopal Church of Scotland, Episcopalian), 74,005 Presbyterians, 147,378 Independents or Congregationalists, 285,283 Wesleyans, 19,161 other Methodists, 21,506 Lutherans, 21,167 Moravians, 22,953 Rhenish Mission, 12,234 other Lutherans, 13,704 Baptists, 35,934 Roman Catholics, 21,919 other Christians. Mahommedans, 24,189; Jews, 16,744; "No religion," 1,077,998, of whom 1,047,233 were natives.

Administration.—The Province is administered by an Administrator, appointed for five years by the Governor-General, and a Provincial Council—consisting of 51 members. The electors are qualified, whether white men, Indians, or natives, as occupiers of property worth £75, or receiving a salary equivalent to £50. The Province possesses a complete system of local self-government, 82 elective councils maintaining the roads, and having powers as to public works, licensing, and police in all the 82 divisions. There are also 123 municipal councils and 86 village management boards.

Education.—The Province is divided into 120 school districts, each under the control of a school Board. Education is compulsory for children of European extraction. The necessary grants are provided from the general revenue to supplement local contributions of at least equal amount. Aided schools, 1916, 4,593; enrolment, 239,013; attendance, 207,501. There are 103,909 European and 135,104 non-European; teachers, 9,293. Provincial expenditure on education, £920,000.

There is no system of poor-law relief, but there are various charitable institutions, hospitals, etc.

The chief diamond fields are at and near Kimberley, in Griqualand West. Minerals worked are copper, coal, and gold. Agricultural operations include the production of wool, wine, wheat, and other cereals, and the breeding of horses, cattle, sheep, and ostriches. The principal exports are gold, diamonds, wool, mohair, ostrich feathers, hides and skins, Turkish tobacco, copper ore, and aloes.

CAPITAL, Capetown (pop. white and coloured, 67,159; with suburbs, 161,579); other towns are Port Elizabeth (pop. 30,688), the chief commercial port; Grahamstown (13,830), the capital of the eastern province; Kimberley (29,525), the seat of the diamond trade; Beaconsfield (14,294); King Williamstown (9,028); and Panmure, or East London (21,292).

	1914–15	1915–16
Provincial revenue	£1,426,831	£1,269,050
Provincial expenditure	1,839,377	1,486,049

	1913	1914	1915
Exports to U.K.	£9,380,716	£7,547,731	£7,184,774
Imports from (and of) U.K.	10,812,259	9,215,507	8,084,219

Administrator, Hon. Sir N. F. de Waal, K.C.M.G. £2,740
Provincial Sec. Noel Janisch, C.M.G. . . . 1,200
Assist. Provincial Sec. L. Mansergh, I.S.O. . 1,100
Executive Committee, C. R. Arnold, D. Retief, W. Ross, A. C. A. van Rooy.

Mail transit: Cape Town, 16 days.

Natal

Natal derives its name from its discovery by Vasco da Gama, on Christmas Day, 1497, and hence named Terra Natalis. The first English settlement was made in 1824, but was broken up about four years later. Towards the close of 1837 a large body of Boers formed a settlement in the country, and for two years waged continuous war against the Zulus. Owing to these disturbances, the country was taken possession of by the British and annexed to Cape Colony; in 1856 it was erected into a separate colony. The province of Zululand was annexed to Natal in 1897. The districts of Vryheid, Utrecht, and part of Wakkerstroom, formerly belonging to the Transvaal, were annexed to the Colony in 1903. It lies on the south-east coast of Africa, and has a seaboard of about 376 miles, with an *area* of 35,290 sq. m.

Population.	Census, 1904.	Census, 1911.
Europeans	97,109	98,114
Indians and Asiatics	100,918	133,439
Natives	910,727	962,490
Totals	1,108,754	1,194,043

The number of males in 1911 was 564,648, and of females 629,395.

The Provincial Council consists of 25 members elected by voters having a property qualification of £50, or paying £10 rent per annum, or having an income of £96. For local government there are municipal corporations at Durban, Pietermaritzburg, Newcastle, Ladysmith, Dundee, Pryheid, and Estcourt, and there are also 9 local boards in the Province.

Education.—There are Government schools as follows: 3 high schools, 2 preparatory schools, 68 primary schools, 2 art schools, 1 agricultural and trades' school, 5 Indian schools, and 2 schools for coloured children. There are besides 111 Government-aided schools and 154 Government-aided farmhouse schools for European children; also a large number of native schools, as well as private schools. At the Government high and preparatory schools there is an average daily

attendance of 1,208 pupils. The direct Government expenditure on education in 1915 was £118,952.

Many natives live apart in locations provided for them by the Government, about 2,250,000 acres of land being vested for this purpose in the *Native Trust*. A Native High Court administers civil justice, and deals with all political crimes and crimes arising out of native law and custom —ordinary crimes falling under the ordinary criminal law. Natives can acquire the franchise under certain conditions.

The chief **products** of the Province are wool, wattle bark, fruit, cereals, coal, iron, and sugar (1915-16 crop 112,000 tons). Tea is also grown, 1,800,000 lb. being manufactured in 1915–16. The coal deposits are in the northern portion of the colony, the Dundee district being the best developed area.

CAPITAL, Pietermaritzburg (30,555), the only port is Durban (70,710; with suburbs, 89,998).

	1914–15	1915–16

Orange Free State

Founded by Boers who trekked from Cape Colony in 1836, and recognised in 1854 as an independent Dutch republic under the title of the Orange Free State. The Government of the Free State threw in their lot with the Transvaal Government in Oct. 1899, and the first act of hostility in the Boer war was committed by Free State forces. The country was, on May 28, 1900, formally annexed by Great Britain after its occupation by Lord Roberts, proclaimed as the Orange River Colony, and put under military rule. Executive and Legislative Councils were also established, the latter containing 6 official and 8 unofficial members. Letters Parent establishing a new Constitution were published at Bloemfontein (June 10, 1907). By the provisions of the South Africa Act, 1909, the Colony became a province of the Union, under the name of the Orange Free State Province.

The Province has a total *area* of 50,392 sq. m. and a *pop.* at the last census of 528,174. Of these 175,189 were Europeans (94,488 males, 80,701 females), and 352,985 coloured persons. The predominant religion is that of the Dutch Reformed Church (175,311); others are Wesleyans, 88,857; Anglicans, 42,401; Presbyterians, 7,549; Congregationalists, 8,368; Lutherans, 8,727; Roman Catholics, 5,696; Jews, 2,808; and "No religion," 173,336 (173,192 natives).

Education.—There are about 800 Government or Government-aided schools in the Province, with a total enrolment of about 30,000; except where the parent objects, both official languages are taught.

Administration.—The Government is administered by an Administrator, aided by a Provincial Council of 25 members. There is an Executive Committee of 4 members.

The country is not well suited for agriculture, but good grazing is afforded by the rolling plains, of which it chiefly consists, and stock and sheep farming are extensively carried on. Coal is abundant in the north of the Province.

CAPITAL, Bloemfontein (26,929); other chief towns are Harrismith (5,306), Kroonstad (5,797), Jagersfontein (5,650), and Ladybrand (3,207).

Transvaal

The Transvaal was founded in 1831 by Boers, who journeyed thither from Cape Colony, and gradually formed a settled Government, whose independence was acknowledged by Great Britain by the Sand River Convention in 1852. Serious difficulties with the natives arose from time to time, and in 1877 the country was annexed by the British Government. In 1880 the Boers took up arms to regain their independence. Majuba and the 1881 Convention followed, giving the Transvaal complete self-government subject to the suzerainty of Great Britain. Another Convention was signed in 1884, under which the country was renamed the South African Republic, the control over foreign relations, except with the Orange Free State, being reserved to the British Crown. In 1886 gold was discovered on the Witwatersrand range of hills, and these have since, after the first rush and the inevitable collapse, proved to be of immense value. It was the discontent amongst the "Outlanders" of Johannesburg—the centre of the gold fields—which ultimately led to the war between the Transvaal and Great Britain. Fighting began in Oct. 1899, and after some initial successes the Boers were driven back, Lord Roberts reaching Bloemfontein March 13, and Pretoria June 5, 1900. On Sept. 1, 1900, the country was formally annexed to the British Empire, though terms of peace were not signed till May 31, 1902.

The Province has a total *area* of 110,426 sq. m., divided into 24 districts. The census of 1911 showed a *population* of 1,686,212, of whom 971,555 were males, and 714,657 females. The population comprised 420,563 Europeans or whites, 1,219,845 natives and 45,805 other coloured races. In 1914 there were 15,160 European births and 4,483 European deaths.

BECHUANALAND PROTECTORATE

The Bechuanaland Protectorate comprises the territory lying between the Molopo River on the S. and the Zambesi on the N., and extending from the Transvaal Province and Matebeleland on the E. to the South-West Africa Protectorate. It has an *area* of about 275,000 sq. miles, with a *pop.* in 1911 of 125,000, including 1,692 whites. The country is essentially pastoral and not agricultural. The natives, where possible, raise scanty crops of Kaffir corn and maize, but these are liable to failure, owing to the drought. The **administration** is carried on by a Resident Commissioner, whose headquarters are at Mafeking, under the High Commissioner, with two Assistant Commissioners, one at Francistown, and another at Gaberones. There is a small force of mounted native police. A hut tax of £1 per annum is levied. Cattle form the chief wealth of the country.

	1913–14	1914–15	1915–16
Revenue . .	£65,139	£56,414	£70,224
Expenditure . .	66,749	71,234	68,623

There is no public debt, the deficiency in revenue in past years having been met by an Imperial grant-in-aid.

Imports of U.K. produce . .	1913 £11,667	1914 £8,773	1915 £6,200

Resident Commissioner, Lt.-Col. E. C. F. Garraway, C.M.G. . . £1,300 and allow.

Assistant Commissioners, J. Ellenberger (£800); R. M. Daniel . . . £750
Accountant, Vernon Eason . . . £500
Magistrate, Ngamiland, A. G. Stigand . £680

SWAZILAND

Swaziland, which lies at the S.E. corner of the Transvaal, was transferred to the High Commissioner for South Africa by Order in Council of Dec. 1, 1906. It has an *area* of 6,536 sq. miles, and a *pop.* in 1911 of 99,959, of whom 98,733 were natives (of Zulu type), 143 other coloured persons, and 1,083 whites. **The Paramount Chief** Sobhuza, son of the late Paramount Chief Bunu, is a minor about 19 years of age, and the regency is in the hands of his grandmother, Nabotsibeni, widow of Mbandini. The numerous mineral and land concessions and monopolies granted by Mbandini, many of which carried exemption from customs dues or invested private individuals with powers properly exercisable by the Crown, rendered any satisfactory form of government difficult. A Proclamation, therefore, provided for the constitution of a Commission to inquire into the question of the concessions. The High Commissioner has, under this Proclamation, exercised the power to expropriate monopolies, compensation for which has been made out of loans raised for the purpose. Gold is subject to a tax of 10% on profits, base metals to a royalty of 2½% on output in addition to any rentals now payable. The rights of Europeans and natives have been delimited; a general survey of the territory in connection with concession claims and partition of native reserves has been carried out. By Proclamation certain laws of the Transvaal have been extended to Swaziland; other laws are promulgated by High Commissioner's Proclamations. A Special Court, having the full jurisdiction of a Superior Court, and Courts of Assistant Commissioners with a limited jurisdiction have been established. Native chiefs continue to exercise jurisdiction according to native law and customs in all civil matters between natives, subject to a final appeal to the Resident Commissioner. A local Swaziland **police force** was created in 1907. There are seven primary schools provided by Government, six for European children and one for natives. There are also numerous schools under the charge of the various native missions to which the Government contribute annual grants.

The agricultural **products** are maize, millet, pumpkins, ground nuts, beans, and sweet potatoes, grown only in sufficient quantities for local supply. Tobacco is grown in parts, and experiments in cotton growing have met with success. Mining is carried on under the authority of concessions granted by Mbandini, the late King of Swaziland, and a Proclamation has been issued to enable the Government to throw open certain Crown mineral areas. Alluvial tin and gold are being mined and shipped. For the year ended March 31, 1916, 584 tons of **tin**, valued at £56,067, and 6,497 oz. of fine **gold**, valued at £27,595, were exported. By arrangement with the Union of South Africa, Swaziland is treated for customs purposes as part of the Union, and receives a *pro rata* share of customs revenue. There is bi-weekly communication by coach between Mbabane and Breyten on the Springs-Ermelo Extension. Elsewhere communication is by runners. There are telegraph offices at Mbabane, Pigg's Peak, Bremersdorp, and Ezulweni. The present seat of the administration is at Mbabane; altitude 4,000 ft.

	1913–14	1914–15	1915–16

Deputy ditto and Gov. Secretary, D. Honey (acting Res. Commr.).

Rhodesia

On Oct. 29, 1889, a Royal Charter was granted to the **British South Africa Company**, conferring upon it large administrative powers in the region north of the Transvaal, now known as Rhodesia, authorising it to promote trade and commerce

* Incurred in connection with the Concessions Commission, the partition of concessions, and the expropriation of monopolies.

and to work mineral and other concessions in those regions. The authorised share capital of the Company amounts to £9,000,000, of which £8,937,559 has been issued. Rhodesia is divided into two portions by the river Zambesi.

Area and Population

	Area. Sq. m.	Population.
Southern Rhodesia (Salisbury)	148,575	744,559
Northern Rhodesia (Livingstone)	290,000	826,000
Totals	438,575	1,570,559

NORTHERN RHODESIA

is the British sphere lying between the Portuguese settlements, German East Africa, and the Congo Free State, excepting the Nyasaland Protectorate. Of the population, as given above, only 1,497 are Europeans. The exports include ivory and rubber, also tobacco and cotton, which are being grown with considerable success. This territory was previously divided into the two provinces of North-Eastern and North-Western Rhodesia; but by the Order in Council of May 4, 1911, they were amalgamated under the title of "Northern Rhodesia." The amalgamation took effect from Aug. 17, 1911.

SOUTHERN RHODESIA

Southern Rhodesia includes the two provinces Matabeleland and Mashonaland. The Europeans number approximately 32,882. It lies between the northern boundary of the Transvaal on the south, and the Zambesi on the north, with the Portuguese provinces of Manica and Sofala as the eastern boundary. The **Rhodesia Railways** include the following sections: Vryburg to Bulawayo, 588 miles, Bulawayo to Salisbury, 301 miles, Bulawayo to Victoria Falls, 280 miles, Victoria Falls to Kalomo, 94 miles, Heany Junction to West Nicholson, 103 miles, and Gwelo to Selukwe, 24 miles—total, with sidings, 1,397 miles. The **Mashonaland Railway** includes the following sections: Umtali to Salisbury, 170 miles, Kalomo to Broken Hill, 281 miles, Salisbury to Sinoia, 82 miles, Mount Hampden to Shamva, 73 miles—total, 606 miles. Branch lines from Gwelo to Victoria, 126 miles, and Westacre Junction to Matopos, 9 miles, are owned by the Blinkwater Railway Co. and the Rhodes Trustees respectively. A line has been constructed from Broken Hill to the Congo Border, a distance of 132 miles, by the Rhodesia Katanga Junction Railway and Mineral Co., Ltd., and a further extension in the Belgian Congo has been built by the Compagnie du Chemin de fer du Katanga to Tshilongo, a distance of about 458 miles north of Broken Hill. **The output of gold** from the mines amounted in 1912 to £2,707,368, in 1913 to £2,903,267, in 1914 to £3,580,209, and in 1915 to £3,823,168. Other mineral exports include silver, lead, copper, coal, chrome ore, and asbestos.

The Government is conducted by the Executive Council of Southern Rhodesia, consisting of the **Administrator of Southern Rhodesia** and not less than three members appointed by the Company, with the approval of a Secretary of State, and by a **Legislative Council** consisting of the Administrator, the Resident Commissioner, and eighteen other members, of whom six are appointed by the Company with the approval of a Secretary of State and twelve elected by the registered voters of Mashonaland and Matabeleland. The Resident Commissioner is a member of both the Executive and Legislative Councils, but without a vote. The duration of each Legislative Council is for three years. The ordinances of the latter are subject to confirmation by the High Commissioner and to disallowance by the Secretary of State. **Native affairs** are administered, under the Administrator, by a Chief Native Commissioner, assisted in each case by Commissioners and Assistant Commissioners. Land has been reserved for tribal settlements, and an annual poll tax of £1 is imposed. **The Judicial Establishment** consists of the High Court of Southern Rhodesia with two judges, the Attorney-General, Solicitor-General, and local magistrates. The territory is divided into magisterial districts, and appeal lies from the magistrate to the judges, from the High Court to the Supreme Court of the Union of South Africa, and thence to the Privy Council. There are magistrates at Salisbury, Bulawayo, Hartley, Victoria, Umtali, Gwanda, Gwelo, Charter, and Melsetter. Civil cases between native and native are tried in accordance with native law, with certain restrictions. **High schools** have been opened at Salisbury, Bulawayo, and other centres, to provide a secondary education specially adapted to the needs of the future generation of Rhodesian farmers.

In Nov. of 1913 the Board of the Company issued a memorandum containing proposals for the encouragement of land settlement and immigration in Southern Rhodesia, proposals which were subsequently embodied in a draft Ordinance, and read a first time in the Legislative Council. The proposals caused considerable discussion on the ground that the scheme involved the admission that the unalienated land of Southern Rhodesia was the private property of the British South Africa Company, and that it involved the principle of a public debt on the future Government of the country. It was agreed that the measure should not be further dealt with in the Legislative Council until the question had been submitted for decision to the Judicial Committee of the Privy Council.

SEAT OF GOVERNMENT: Salisbury (3,979); it is also the capital of Mashonaland; Bulawayo (5,300) is the capital of Matabeleland.

Commercial Representative in South Africa (Bulawayo), W. Olive (*acting*).
Resident Mining Engineer in Rhodesia, A. H. Ackermann, Bulawayo.
Director of Land Settlement, F. W. Inskipp, Salisbury (*acting*).

BRITISH EAST AFRICA

NYASALAND PROTECTORATE

The Nyasaland Protectorate was known, until July 6, 1907, as the British Central Africa Protectorate. The Protectorate comprises the western shore of Lake Nyasa, with the high tablelands separating it from the basin of the Loangwa River, and the region lying between the watershed of the Zambesi and the Shiré Rivers on the west, and the Lakes Chinta and Chilwa and the River Ruo (an affluent of the Shiré) on the east, including the mountain systems of the Shiré Highlands and Mlanje.

The total *area* is 39,573 sq. m. with a *pop.* of 1,139,900 (1916). The European inhabitants number 785, Indians 379, and natives 1,138,736.

The *administration* is in the hands of a Governor, with Executive and Legislative Councils. The Protectorate is divided into 15 Districts, and these are managed by a number of Residents and Assistant Residents, judicial officers, etc. There is a High Court for the Protectorate. The armed forces consist of the 1st battalion of the King's African Rifles. The *port* is Chinde, at the mouth of the Zambesi, where a small concession has been granted by the Portuguese Government.

The principal occupation of the European settlers is planting; and many thriving plantations of coffee, Virginia tobacco (export, 1916, 3,706,203 lb.), and cotton (export, 1916, 3,065,248 lb.) have been established. Other products are tea, chillies, rubber, rice, maize, wheat, and fibre. The chief imports are provisions, cotton goods, earthenware, hardware, salt, silk and woollen goods, and agricultural machinery. 84% of the imports come from the United Kingdom and British Colonies. The **chief towns** are: Blantyre, Zomba (headquarters of the Government), Fort Johnston (the principal port on Lake Nyasa and Marine Transport Department Depôt), Karonga (north end of Lake Nyasa), the starting-point for Tanganyika, and Kota-kota (west coast of Lake Nyasa). The Shiré Highland Railway (113 m.) connects Port Herald and Chiromo on the Shiré River with Blantyre, and will be continued to Lake Nyasa. An extension southward from Port Herald to the northern bank of the Zambesi at Chindio is now complete and open for traffic; and arrangements have been made for the construction of a line from the opposite bank, through Portuguese territory to Beira.

	1913–14	1914–15	1915–16

EAST AFRICA PROTECTORATE

The East Africa Protectorate extends about 400 miles along the coast northwards from Umba, at the mouth of the Umba River, and inland to the borders of Uganda. It adjoins the Italian and Abyssinian spheres of influence on the N., and German East Africa on the S. The Imperial British East Africa Company opened up the country, having in 1887 obtained a concession of territory from the Sultan of Zanzibar, and in 1888 a charter from the British Government. An arrangement for buying them out was, however, come to in 1895, and the direct administration of the country was undertaken by H.M. Government. The Protectorate has an *area* of 248,000 sq. m., with a *pop.* estimated at 4,000,000, including 3,500 Europeans. On the coast Arabs and Swahilis predominate; further inland are races speaking Bantu languages, and non-Bantu tribes, such as the Masai, the Somalis, and the Gallas. The prevailing religious beliefs are Pagan, but on the coast Mahommedanism has made great strides. There are various Christian mission-stations, supported by the societies of various countries. The Protectorate is *administered* by a Governor and Commander-in-Chief, who has the advice of Legislative and Executive Councils. A hut tax, and in some districts a poll tax, is levied upon the natives. There is a police force of about 1,700. The so-called Uganda Railway (*see* Uganda) runs through the Protectorate and connects Mombasa with Lake Victoria Nyanza. There were 2,342 miles of telegraph and 882 miles of telephone line in 1915. The *climate* in the Lowlands, or districts near the coast, is fairly healthy for the tropics, while the Highlands, or central plateaux, have a temperate climate, with a mean average at noon of 78° F. Agricultural operations are increasing

The New HAZELL, 1917

articularly in the Highlands, where a large body f English farmers are devoting their efforts to tock-raising and general farming. The lowlands roduce coconuts, rice, maize, and various native rains; cotton, sisal, rubber, and tobacco are also eing cultivated. Experiments with a view to a arge extension of cotton growing are being made, nd the introduction of other seeds and plants of conomic value is being tried. In the highlands, otatoes, fruit and vegetables, maize, sim-sim, and eans grow freely, and are now exported; coffee, wheat, and barley are successfully cultivated and n an increasing scale. On the uplands extensive asture-grounds are available for cattle, sheep, and strichos. The forest products of the coast are mangrove bark, rubber, gum-copal, and timber, ncluding ebony. The highland forests contain edar, podocarpus, ironwood, croton, and many aluable timber trees. In 1911 the Imperial Government granted the colony a loan of £250,000, o be used in the construction of a small light railway to act as a feeder between Nairobi and the Thika River, the improvement of the harbour facilities at Kilindini, and the supplying of good water to Mombasa. A further loan of £375,000 was advanced in 1912 for the development of the Uganda Railway and the ports which it serves, and £1,868,000 in 1915 for the general improvement of the country.

CAPITAL: Nairobi (pop. 30,000); chief ports are Mombasa (27,000), Lamu, Malindi, Vanga, and Kismayu.

UGANDA PROTECTORATE

The Uganda Protectorate for administrative purposes is divided into five provinces, viz. (1) the Province of Buganda; (2) the Eastern Province; (3) the Western Province; (4) the Northern Province; and (5) the Rudolf Province. It lies between the Belgian Congo on the west and the East Africa Protectorate on the east, the southern boundary being 1° S. lat. and the Anglo-German frontier, and the northern the Egyptian Sudan. It has a total *area* of 109,119 sq. m., with a *pop.* in 1915 of 2,927,494, including 1,903 Europeans. The native capital of the country is Mengo, but the British administration, under a **Governor,** has its **headquarters** at Entebbe, on the N.W. shore of Lake Victoria. The Imperial Government took over the administration from the Imperial British East Africa Company in 1893, and Uganda was proclaimed a British protectorate on June 19, 1894. Its limits were extended to include the adjoining native confederacies of Bunyoro and Busoga in 1896; subsequent additions have been made to include Bukedi, Teso, Lango, and Karamojo in the east, the countries to the north adjoining the Nile on the confines of Sudan and Belgian Congo territories and Kigezi and Ankole in the western area of the Protectorate. A High Court for the Protectorate was established in 1902, with an Appeal Court at Mombasa. **The King,** or "Kabaka," is H.H. Daudi Chwa (b. 1896), who attained his majority Aug. 8, 1914. He is assisted in his native administration by three native ministers. He receives a stated allowance from the Government, and has been educated by an English tutor at the expense of the British Government. He paid a visit to England in June 1913. There is also a Lukiko, or **native council,** of 80 chiefs.

The export trade, which is increasing, is mainly in cotton (£351,146), coffee (£41,005), skins (£22,307), cotton seed (£18,172), ghee (£12,264); the trade in ivory has decreased owing to war. Iron ore abounds, and wheat grows well. **Imports,** chiefly provisions (£102,018), yarns and textiles (£146,144), hardware (£17,033), cotton blankets (£16,584), bicycles (£15,894), apparel (£14,631), railway materials (£14,117), and machinery (£14,017). The **Uganda Railway** lies wholly in the East Africa Protectorate. It runs from Mombasa, on the coast, to Port Florence, on the north-east corner of the Victoria Nyanza, a distance of 584 miles. It was built by the Imperial Government at a cost of £5,500,000. A railway, 61 miles in length, runs from Jinja to Namasagali, connecting Lakes Victoria and Kioga. A railway, 7 miles in length, was opened for public traffic on June 1, 1915, between Kampala and Port Bell. Road motor services have been organised in the Buganda and eastern and northern provinces and steamers are now plying on Lakes Victoria, Albert, and Kioga, and a loan of £125,000 was granted in 1912 by the Imperial Government for the further development of communications. The prosperity of the country was threatened between 1906–8 by **"sleeping sickness,"** which has destroyed thousands of natives, but the vigorous measures introduced by the administration have almost stamped out the disease.

ZANZIBAR PROTECTORATE

The Zanzibar Protectorate consists of the island of Zanzibar, which has an *area* of 640 sq. m. and a *pop.* of 114,069, and of the island of Pemba, which has an *area* of 380 sq. m. and a *pop.* of 83,130. Seyyid Said, Sultan of Muscat, transferred his capital to Zanzibar in 1832, and after his death in 1856 his son, Seyyid Majid, was confirmed in the African possessions by Lord Canning, then Governor-General of India. In the year 1890 the supremacy of British interests in the islands was recognised by France and Germany, and in the same year the mainland possessions which extended over the east coast of Africa were ceded to Italy, Great Britain, and Germany respectively. The present Sultan is Seyyid Khalifa bin Harub, K.C.M.G., *b.* about 1880, who succeeded on the abdication of his brother-in-law in 1911.

The government is conducted by a High Commissioner and a British Resident, who are appointed by commissions under His Majesty's Sign Manual and Signet, and are subject to the control of the Secretary of State for the Colonies. The legal status of slavery was abolished in April 1897, and domestic slavery in 1908. A railway 7 miles long runs from Zanzibar to Bububu. The **clove industry** is important, and forms 92% of the entire clove crop of the world. The industry dates from 1818; in 1872 the plantations were devastated by a hurricane, and consequently most of the trees in the island date from that time. Pemba, on the other hand, escaped, and the large plantations in that island are therefore much older, varying from 60 to 90 years. It is estimated that there are in both islands about 60,000 acres under clove cultivation, and about 5,500,000 trees in cultivation. The output varies considerably, the trees bearing heavy crops periodically—every three to five years. The average output of recent years has been about 14,000,000 lb. The products are mainly cloves, copra, chillies, ivory, rubber, hides, and gum.

CAPITAL: Zanzibar (pop. 35,000), the port of which is one of the finest in Africa.

SOMALILAND PROTECTORATE

The British sphere of interest in Somaliland and on the coast of the Gulf of Aden, which has existed since 1884, is known by this name. It has an *area* of 68,000 sq. m. with a *pop.* of 300,000, besides 26 whites and 2,786 Asiatics, and is administered by a **Commissioner**. It has about 400 miles of coast, and extends inland 300 miles at its deepest point. Within this territory lie the ports Zaila, Bulhar, and Berbera, but their trade is affected by the railway which runs from Jibutil in French Somaliland to Harrar. The boundaries were fixed by agreements with Italy in 1894, and with Abyssinia in 1897. The Somaliland Battalion of the King's African Rifles formed the military force originally. It was strengthened from 1908 to 1909 by reinforcements of Indian troops, owing to the threatening attitude of the Mullah Mohammed Abdullah, the restriction of whose activities from 1901 to 1904 had cost the British Government between £2,000,000 and £3,000,000. In January 1909 the Mullah was denounced at Mecca as an impostor, and in March 1910 the Government, adopting the view that his influence was declining and that the friendly tribes, if assisted with arms, would be able to defend themselves against his raids, announced that the regular troops were to be withdrawn to the coast. The 6th King's African Rifles (Somali Battalion) was then disbanded, and an Indian contingent 200 strong, with 4 British officers, was retained as the garrison of the coast towns. These troops were, however, dispensed with in April 1913, reliance being placed on a new camel constabulary 500 strong. While the camel corps was engaged on a reconnaissance at Odwein in August 1913 it encountered a strong force of the Somaliland Mullah, and suffered a severe reverse, its commandant, Mr. R. C. Corfield, being killed. As a consequence, an Indian contingent 400 strong has been restationed in Somaliland, and the camel corps increased to 450. There is wireless com-

The New HAZELL, 1917

munication with Aden. The **products** are chiefly cattle, coffee, skins and hides, ostrich feathers, ivory, and gum; cotton-growing is being experimented with.

CHIEF TOWN: Berbera (pop. 30,000).

BRITISH WEST AFRICA

GAMBIA

The Gambia is a great river of Western Africa, falling into the Atlantic Ocean by a large estuary 27 m. wide at some parts, but contracting to 10 m. between Bird Island and Cape St. Mary, and to about 2 m. between Barra Point and Bathurst on St. Mary's Island. The Crown colony and protectorate on the river Gambia consists of the Island of St. Mary, British Kombo, Albreda, the Ceded Mile, the territories of Brefet and Bajana, and MacCarthy Island—153 m. from the mouth. Its *area* is about 3,980 sq. m., with a *pop.* in 1915 of 153,101 (Europeans 128). The Gambia was discovered by Portuguese merchants in 1447, but no settlement was made. In 1588 a patent was granted by Queen Elizabeth to some London merchants to trade with the Gambia; in 1618 James I granted a Charter to Sir Robert Rich and others, and Fort James was built by them on a small island; it is now being washed away gradually. In 1631 another, and in 1662 yet another company was chartered, but they were unsuccessful. In 1672 a fourth company was formed, but not until the Treaty of Versailles in 1783 abandoned to England the right of trade did commercial prosperity arrive. The settlement was annexed to Sierra Leone in 1821, but was created an independent colony in 1843. The climate from the end of November to the middle of May is pleasant and fairly healthy, but during the rainy season the general conditions of the West African climate prevail. The government is vested in a Governor, assisted by an Executive Council of 3 members, and a Legislative Council of 8 members, 3 being non-official. The groundnut is the staple article of cultivation (value, 1915, £400,435), but calabashes, hides, ivory, palm-kernels, rubber, and wax are also **exported**. The chief **imports** are cotton goods, hardware, kola nuts, rice, spirits, sugar, salt, tobacco, and wines. The military force consists of the Gambia Company of the W.A.F.F. A hut tax of about 4*s.* per annum is levied.

GOLD COAST COLONY

The Gold Coast Colony, with Ashanti and the Protected Northern Territories, is situated on the Gulf of Guinea, between 3° 7′ W. and 1° 14′ E., and is bounded on the W. by the French colony of the Ivory Coast, on the E. by Togoland, on the N. by the French Sudan, and on the S. by the sea. The total *area* of the Colony is 24,200 sq. m., of Ashanti 20,000, and of the Northern Territories 35,800. The census of 1911 gave the *pop.* at 853,766, but the actual population is considered to be in excess of these figures. There are 2,206 Europeans (1916). The returns for Ashanti give 287,814, and for the Northern Territories 361,806. The first European settlement on the Gold Coast was in 1482, when the fort San Jorge da Mina (Elmina) was built and garrisoned by the Portuguese, who subsequently made several other settlements. The Dutch eventually ousted the Portuguese in 1637. In 1618 the first English settlement was established at Cormantyne, and

various companies were formed for trading purposes. In 1672 the Royal African Company of England was incorporated, and under its influence English interests steadily advanced, and forts were established at Dixcove, Seccondee, Commendah, Anamabu, Tantumquerry, Winnebah, and Accra. The Company gradually declined and dissolved in 1752. A new company, the African Company of Merchants, was subsequently formed, and received annual subsidies until 1821, when the Company was dissolved and its possessions vested in the Crown, and placed under the government of the West African Settlement, the seat of government being at Sierra Leone, from which they were finally separated in 1874. Hitherto the forts of the various nations were intermingled with one another, but in 1850 Great Britain bought the Danish forts. An interchange was effected with the Dutch in 1867 by which the portion of the coast lying to the west of the Sweet River was allotted to Holland, England taking the territory to the east of the river. In 1871 the Dutch transferred all their forts and possessions on the coast to Great Britain. The transfer of Elmina fort was greatly resented by the King of Ashanti, who in 1873 invaded the British Protectorate with a large army, his grievance being that Ashanti territory had been occupied by the British. In this war, and in the subsequent ones of 1896 and 1900–1, the Ashantis were completely defeated and their territory added to the Empire. In 1897 the territories to the north of Ashanti were constituted a separate district with the title of the "Northern Territories," and placed in charge of a Commissioner.

Administration.—The Government includes a Governor, an Executive Council, and a Legislative Council of 9, 5 of whom are non-official. For defence there is the Gold Coast regiment of the West African Frontier Force, 1,353 strong, with headquarters in Ashanti. Education is chiefly in the hands of five missionary societies, but the Government has established nine primary schools, which contain 2,098 children and are entirely supported and equipped from Government funds.

The chief **products** of the colony are palm oil, rubber, palm kernels, lumber, cocoa, kola, and gold. The cultivation of cocoa was started in 1879 and has made rapid strides, the value in 1915 being £3,651,341. Gold has been exported more or less continuously since the discovery of the country. Up to 1874 the industry was almost entirely in the hands of the natives, but the formation of various English companies has brought about a remarkable development. The output in 1915 was 462,062 oz., valued at £1,755,552. Cotton is grown, and its cultivation is now being encouraged. A railway runs from the port of Seccondie via Tarquah and Obuassi to Coomassie, a distance of 168 m., and a line from Accra to Akwapim has been constructed, and is being extended to Komfrodua.

The number of vessels which entered and cleared in 1915 was 354, as compared with 637 in 1914. The total tonnage was 818,356, of which 687,167 was British.

The Gold Coast is peculiarly free from many of the discomforts associated with tropical countries: hot nights and intense heat by day are the exception rather than the rule, while insects are comparatively unobtrusive. The poor quality of the food ordinarily obtainable by Europeans is in many cases accountable for their lowered vitality and renders them an easy prey to mosquito and water-borne diseases. The efforts of the sanitary and medical authorities in promoting hygiene and treatment of disease continue to exercise a beneficial effect on the general health of Europeans.

Native aspirants to various kinds of employment, skilled and unskilled, being plentiful, it is not the policy of Government to encourage European immigration; and, living being expensive, it is highly inadvisable for Europeans in search of employment to go to the colony without previous engagement by Government or representatives of mercantile firms in Europe.

CHIEF TOWN: Accra (pop. 20,000), which is the administrative centre of the colony.

NIGERIA

The Colony and Protectorate of Nigeria includes the territories situated on the Bight of Benin, between Dahomey on the west and the Kameruns on the east. The Protectorate is in two main divisions, the Northern Provinces and the Southern Provinces, of which the northern group coincides with the former Protectorate of Northern Nigeria, and the southern group with the former Protectorate of Southern Nigeria. The headquarters of Government is at Lagos, but it is proposed to establish a new **capital** at Kaduna, in the heart of the country. The *area* of the whole territory is 336,000 sq. miles, and the *population* roughly 16,500,000.

The chief industry is agriculture, and crops consist of cotton, cocoa, ground-nuts, maize, guinea-corn, millet, rice, coffee, yams, cassava, and tobacco. The natural **products exported** are palm-oil and kernels, gum copal, rubber, mahogany, shea-nuts, hides, and skins; and the export of ground-nuts is steadily increasing. During the last few years a considerable industry has arisen in connection with tin-mining in the Northern Provinces. A railway is in operation between Lagos and Zungeru, a distance of 430 miles, crossing the Niger at Jebba; and a junction between this railway and the railway from Baro to Kano, in the Northern Provinces, is effected by means of an extension to Minna, 38 miles east of Zungeru. There is thus direct rail communication between Lagos and Kano, over a total distance of 712 miles. Further railway extensions are in progress, a line being under construction from Port Harcourt, at the head of the Bonny estuary, to Kaduna to form a junction with the main line from Lagos to Kano. **Centres of trade** are Lagos, Abeokuta, Ibadan, Oshogbo, Ilorin, Zaria, Kano, Onitsha, Lokoja, Warri, Bonny, Sapele, Calabar, Opobo, Forcados, and Port Harcourt.

The principal **imports** are cotton goods, provisions, spirits, hardware, cutlery, cycles, kerosene, tobacco, building material, soap, and haberdashery.

Transit to Lagos from Liverpool, 16 days. Cable communication to Lagos and Bonny. Inland telegraphs, Lagos, Zungeru, and majority of important places.

SIERRA LEONE

Sierra Leone is a British colony on the West African coast, founded in 1787. Sierra Leone proper is a peninsula, containing about 300 sq. m., but the colony has a coast-line of 210 miles in length. *Area*, with the Protectorate in the hinterland, 31,000 sq. m.; according to the census of 1911, the *population* of the Colony amounted to 75,572, while that of the Protectorate is estimated at 1,327,560; Europeans, 1,267. It is bounded on the N. and N.E. by French Guinea; on the S.E. by the Republic of Liberia; and on the W. by the Atlantic Ocean. On the east the frontier was settled by an agreement made between Great Britain and France in Jan. 1895, by which the colony relinquished all control of the head waters of the Niger, and became inclosed on every side. By the Anglo-French Agreement, April 8, 1904, the Los Islands (pop. 1,422) were ceded to France to form part of French Guinea. The interior is divided into 5 districts—Karene, Ronietta, Railway, Koinadugu, Northern Sherbro—each under a District Commissioner. A house tax is levied on the natives. The leading tribes are the Temnes in the west, the Mendis in the south, the Korankos and Yalunkas in the north. A railway runs from Freetown to Pendembu, a distance of 227 miles. It was completed in August 1905. From Bóia Junction, 64¼ miles from Freetown, a branch line runs to Kamabai, a distance

of 104 m. from Boia, and a further extension to Baga in the Koinadugu District will be undertaken. There are 546 miles of combined telegraph and telephone lines. The military forces include the West African Regiment and a battalion of the West African Frontier Force. There is also a police force 285 strong, and an establishment for victualling and coaling ships of the Royal Navy. The chief **exports** are palm oil (exports, 1915, 481,576 gall., value £45,671), palm kernels (exports, 1915, 39,624 tons, value £504,033), kola nuts, hides, piassava, and ginger. The colony is administered by a Governor, assisted by an Executive Council composed of 5 official members, and by a Legislative Council with an official majority.

CAPITAL: Freetown, with a pop. of 34,000 and municipal government.

Canada is bounded by three oceans, and has 13,000 miles of coast line; it is 3,500 miles by 1,400 in area, and is almost as large as Europe. At the 1911 Census the rural population was 3,925,502; the urban, 3,281,141. Three-fourths of the population is British-born. Of the 3,821,995 males at the Census of 1911, 2,369,766 were single. The population is estimated at the end of 1915 as 8,075,000.

The New HAZELL, 1917

The native Indians in Canada numbered 103,661 in 1911, and 103,531 in 1915. They own 2,415,569 acres, of which 192,478 acres are under cultivation, and the whole valued at $46,530,823. The number of Eskimos in 1911 was 4,600, and in 1915, 3,447.

Chronology

Canada was first discovered by John Cabot on June 24, 1497, and in 1534 a French expedition under Jacques Cartier ascended the St. Lawrence as far as Hochelaga (Montreal). Subsequently it was visited by Samuel de Champlain, who founded Quebec, and spent many years of his life in developing the colony. In 1713, Acadia (Nova Scotia) was ceded to England by the Treaty of Utrecht. In 1756 began the Seven Years War between England and France, and 1759 (Sept. 18) saw the capture of Quebec by General Wolfe. In 1763 the Treaty of Paris was signed, by which Canada was finally ceded to Great Britain. In 1837 occurred the rebellion in Upper and Lower Canada. In 1841 Upper and Lower Canada were united. In 1843 Victoria, British Columbia, was founded. In 1851 responsible government was given to Prince Edward Island, and in 1858 parliamentary government established in British Columbia, which was united with Vancouver Is. in 1866. In 1867 the British North America Act was passed, uniting Ontario, Quebec, Nova Scotia, and New Brunswick under one federal government. Dominion Day was established on July 1 of that year. In 1870 Manitoba and the North-West Territories were added to the Dominion, the latter by purchase from the Hudson's Bay Company for £300,000. British Columbia joined in 1871 and Prince Edward Island in 1873. In 1880 an Order in Council annexed to the Dominion such British possessions in North America, other than Newfoundland, as were not previously in the Dominion. The North-West Rebellion and execution of Louis Riel occurred in 1885. The unnamed portions of the North-West Territories were named as Ungava, Franklin, Mackenzie, and Yukon Districts, in 1895. In 1898 the Canadian preferential tariff in favour of Great Britain came into force. 1903 saw the settlement of the Alaskan Boundary. In 1905 new provinces of Saskatchewan and Alberta were created. In 1912 the boundaries of Quebec, Ontario, and Manitoba were extended. 1915 saw the first Canadian Contingent of nearly 33,000 men, 7,500 horses, and 70 pieces of artillery, the largest military force that ever crossed the Atlantic, come to the help of the Mother Country.

Physiography

Canada may be conveniently divided into five sections: (1) the peninsula which in Canada forms the Gaspé and the three Maritime provinces; (2) the lowlands of southern Ontario and southern Quebec, with the Great Lakes and the Ottawa and St. Lawrence Rivers draining the interior into the Atlantic Ocean; (3) the Central plain; (4) the Lauretian highland; (5) the western Cordillera. In the western Cordillera are found the highest mountain ranges and peaks in Canada. In the Yukon is Mount Logan, 19,539 ft., the highest known point in Canada. In the Rocky Mountains are many high peaks, Mount Robson, in the Yellowhead Pass, being the highest, 13,700 ft. Canada has a fine series of rivers—the Mackenzie 2,525 m., St. Lawrence 1,900 m., Yukon 1,765 m., Nelson 1,600 m., Saskatchewan 1,205 m., Columbia 1,150 m., Peace 1,065 m., and Churchill 1,000 m. The interior continental plain or Red River Valley was once part of the bed of a great lake which reached southward into the United States and northward 100 m. beyond Lake Winnipeg; it is the great grain-producing part of Canada, and owes its fertility in part to the mineral constituents of the soil, and in part to the great accumulation of nitrogenous organic matter, the remains of ages of vegetable growth.

Climate

The climate of such a large country as Canada, ranging from lat. 42° to the Arctic regions, and touching three oceans, shows great variations. In the east it is cold but clear in winter, warm in summer; while the climate of the British Columbian coast resembles that of England. Alberta, Saskatchewan, and Manitoba are subject to great extremes of temperature, Saskatchewan having registered a maximum of 107° and a minimum of — 56°. The Chinook, or westerly wind, is a characteristic of the Alberta climate, and it keeps the prairies usually bare of snow in the winter.

Governors-General of Canada, 1867–1917

Name.	Date of Appointment.	Date of Assumption of Office.
Viscount Monck	June 1, 1867	July 1, 1867
Lord Lisgar (Sir John Young)	Dec. 29, 1868	Feb. 2, 1869
Earl of Dufferin	May 22, 1872	June 25, 1872
Marquess of Lorne	Oct. 5, 1878	Nov. 25, 1878
Marquess of Lansdowne	Aug. 18, 1883	Oct. 23, 1883
Lord Stanley of Preston (Earl of Derby)	May 1, 1888	June 11, 1888
Earl of Aberdeen	May 22, 1893	Sept. 18, 1893
Earl of Minto	July 30, 1898	Nov. 12, 1898
Earl Grey	Sept. 26, 1904	Dec. 10, 1904
H.R.H. Duke of Connaught	Mar. 21, 1911	Oct. 13, 1911
Duke of Devonshire	1916	1916

GOVERNMENT

Governor-General and Commander-in-Chief, His Excellency the Duke of Devonshire, K.G., P.C., G.C.V.O., G.C.M.G.

Military Secretary and Secretary, Lt.-Col. H. G. Henderson.

THE EXECUTIVE

Prime Minister and President of the Privy Council, Rt. Hon. Sir Robert Laird Borden, P.C., G.C.M.G., K.C., LL.D. (*b.* '54) . $12,000

Minister of Trade and Commerce, Rt. Hon. Sir George Eulas Foster, K.C.M.G., D.C.L. (*b.* '47) $7,000

Minister of Justice, Hon. Charles Joseph Doherty, D.C.L., LL.D. (*b.* '55) . . $7,000
Postmaster-General, Hon. T. Chase Casgrain, K.C. (*b.* '52) 7,000
Secretary of State and Minister of Mines, Hon. Pierre Edouard Blondin (*b.* '74) . 7,000

The Royal North-West Mounted Police Office

Comptroller, A. E. Blount $5,000
Commissioner, Aylesworth B. Perry, C.M.G. 4,000

Department of Agriculture and Statistics

Minister of Agriculture, Hon. Martin Burrell $7,000
Deputy Minister, George F. O'Halloran . 6,000
Assist. ditto & Secretary, A. L. Fitzgerald Jarvis, I.S.O. $3,500
Director of Experimental Farms, Joseph H. Grisdale 3,200
Director-General of Public Health, F. Montizambert, C.M.G., I.S.O., M.D. . 5,000
Veterinary Director-General, F. Torrance . 5,000
Dairy and Cold Storage Commissioner, J. A. Ruddick 4,000
Registrar Trade Marks and Copyright, P. E. Ritchie 3,500
Exhibition Commissioner, Wm. Hutchison 4,500
Chief Clerk Patents, W. J. Lynch, I.S.O. . 3,100
Accountant, F. C. Chittick 3,200

Department of Marine and Fisheries

Minister, Hon. John D. Hazen . . $7,000
Deputy Minister, Alexander Johnston . 5,000
Assist. ditto, Cameron Stanton . . 4,000
Chief Engineer, Lt.-Col. W. P. Anderson, C.M.G. 4,000
Supt. of Meteorological Service (Toronto), Sir R. F. Stupart 4,000
Chief Accountant, Alexander Boyle . . . 3,200

Department of the Naval Service

Minister of the Naval Service, Hon. John D. Hazen (Minister of Marine and Fisheries)
Deputy Minister and Comptroller, G. J. Desbarats, C.M.G. $6,000
Director of Naval Services, V.-Adm. C. E. Kingsmill 5,000
Commander and Chief of Staff, Lieut. R. M. T. Stephens, C.M.G., R.N.
Consulting Engineer (vacant).
Supt. Radio-Telegraph Service, C. P. Edwards 2,800
Chief Hydrographer, W. J. Stewart . 3,750
Supt. of Tidal Surveys, Dr. W. Bell Dawson 3,200
Commissioner of Fisheries, Edward E. Prince 4,000
Supt. of Fisheries, Wm. A. Found . . 3,200
Accountant, L. J. Beausoleil 2,900

Department of Labour

Minister of Labour, Hon. Thomas W. Crothers, K.C. $7,000
Deputy Minister, F. A. Acland . . 5,000
Assist. ditto, G. H. Brown 3,300

High Commissioner in London

High Commissioner (Offices: 19 Victoria Street, London, S.W.), (vacant) . . $10,000
Secretary, William Linney Griffith . . 6,000

Commissions

Permanent Railway Commission

Chief Commissioner, Sir Henry L. Drayton, K.C. $12,500
Assist. ditto, D'Arcy Scott . . . 9,000
Deputy ditto, Hon. Wilfrid B. Nantel . 8,000
Commissioners, S. J. McLean, A. S. Goodeve, one vacancy . . . each 8,000
Chief Engineer, G. A. Mountain . . 5,000
Secretary, A. D. Cartwright . . . 4,000

Transcontinental Railway Commission

Commissioner, Hon. Francis Cochrane (Minister of Railways).
Chief Engineer, Gordon Grant.
Secretary, (vacant).

Civil Service Commission

Commissioners, Adam Shortt, C.M.G., Michel G. La Rochelle, K.C. . . . each	$5,000
Secretary, Wm. Foran	3,500

Conservation Commission

Chairman, Hon. Sir Clifford Sifton, K.C.M.G.	
Assist. Chairman and Sec. James White .	$5,000
Medical Adviser to Committee on Public Health, Chas. A. Hodgetts, M.D. . .	4,000
Mining Engineer, W. Dick . . .	2,500
Hydro-Electric Engineer, L. G. Denis .	2,500
Agriculturist, F. C. Nunnick . . .	2,500

International Joint Commission, Canadian Section

Chairman, Charles A. Magrath . . .	$7,500
Commissioners, H. A. Powell, K.C., Pierre B. Mignault, K.C. . . . each	7,500
Secretary, L. J. Burpee	4,000

The Legislature

Parliament consists of the King, a Senate, and a House of Commons. The Senate now consists of 96 members nominated for life by the Governor-General, so chosen that 24 belong to Ontario, 24 to Quebec, 10 to Nova Scotia, 10 to New Brunswick, 4 to Prince Edward Island, 6 to British Columbia, 6 to Manitoba, 6 to Saskatchewan, and 6 to Alberta. Each Senator must be in the possession of property worth $4,000, age of thirty years, and resident within the province for which he is appointed. The House of Commons at present consists of 221 members. The basis on which the number of members allotted to each province is regulated, is that Quebec shall always have 65, and the other provinces such a number of members as will bear the same proportion to the number of their population, as ascertained at each decennial census, as the number 65 bears to the population of Quebec. Parliament lasts for five years, unless dissolved sooner, and on the dissolution of the present (12th) Parliament, which was elected for the period 1910–16, the House of Commons will consist of 234 members, distributed as follows: P.E.I., 3; N.S., 16; N.B., 11; Que., 65; Ont., 82; Man., 15; Sask., 16; Alberta, 12; B.C., 13; Y.T., 1. Each member of the Senate receives $2,500 per annum, and each member of the Commons a maximum of $2,500 per session, with certain deductions for days of non-attendance. Election is by ballot, and the franchise is regulated by the several Provincial Legislatures, which also regulate the polling divisions and the voters' lists. The session usually extends from Nov. to May. The limits of **federal and provincial jurisdiction** are regulated by the British North America Act, 1867. The Dominion Parliament has exclusive legislative power in all matters, including finance, trade, postal service, currency, banking, navigation, defence, etc., except those specifically delegated to the provincial legislatures. Bills passed by the Dominion Parliament require the assent of the Governor-General, and may be disallowed within two years by the King.

Speaker of the Senate, Hon. Auguste C. P. Landry	$4,000
Clerk of the Parliaments and of the Senate, S. E. St. Onge Chapleau . . .	5,000
Law Clerk, J. G. A. Creighton, C.M.G., K.C.	4,000
Gentleman Usher of the Black Rod, Ernest J. Chambers	3,100
Sergeant-at-Arms, J. de St. Denis Le Moine, I.S.O.	2,600
Clerk of Routine and Proceedings, J. C. Young	$3,100
Accountant, Harrison Gross . . .	2,900
Speaker of the House of Commons, Hon. Thomas S. Sproule, M.D. . . .	$4,000
Deputy Speaker, Albert Sevigny . .	2,000
Clerk, T. B. Flint, D.C.L. . . .	5,000
Clerk Assistant, (vacant) . . .	4,000
Sergeant-at-Arms, Lt.-Col. H. R. Smith, C.M.G., I.S.O., A.D.C. . . .	4,000
Parliamentary Counsel, F. H. Gisborne, I.S.O., K.C.	5,000
Joint Librarians of Parliament, A. D. De Celles, C.M.G.; M. G. Griffin, C.M.G. each	5,000
Clerk of the Crown in Chancery, Jas. G. Foley	3,500

The Judicature

The judges are appointed by the Governor-General in the superior, district, and county courts throughout the Dominion, except in the probate courts of Nova Scotia and New Brunswick.

THE SUPREME COURT OF CANADA

Chief Justice of Canada, Rt. Hon. Sir Charles Fitzpatrick, P.C., G.C.M.G., LL.D.	$10,000
Puisne Judges, Hons. Sir Louis H. Davies, K.C.M.G., John Idington, Lyman P. Duff, Frank Anglin, L. P. Brodeur each	9,000
Registrar, E. R. Cameron, K.C. . .	5,000
Reporter, Chas. H. Masters, K.C. . .	3,100

COURT OF EXCHEQUER OF CANADA

Judge, Hon. Walter G. P. Cassels . .	$8,000
Asst. Judge, Hon. L. A. Audette . .	6,000
Registrar, Charles Morse, K.C. . .	3,500

Defence

By the Militia Act of 1904 service in the militia is universal and compulsory on all male inhabitants who are British subjects between the ages of 18 and 60. The Militia is divided into the *active* and the *reserve*; the latter, organised in 1915, has not yet been developed. The male population is divided into four classes, who are called into service in succession: unmarried men and widowers (without children) between 18 and 30; unmarried men and widowers between 30 and 45; married men and widowers (with children) between 18 and 45; all men between 45 and 60. The authorised establishment in 1914 was: officers, 5,615; non-com. officers and men, 68,991; horses, 17,044. The total *war strength* of all classes would be 2,153,000.

The Naval Service of Canada was established by the Naval Service Act, 1910. For the branches of the Department see *ante*. Owing to a division of opinion (see Ed. 1914) no steps have yet been taken for the formation of a Canadian Navy. There is a Royal Naval College at Halifax for the training of cadets, and graduates of the college who have joined Imperial ships have been most favourably reported on by the commanding officers.

Minister of Militia, (vacant) . .	$7,000
Parliamentary Sec. Fleming B. McCurdy, M.P.	
Deputy Minister, Surg.-Gen. Eugène Fiset, C.M.G., D.S.O., M.D.	5,000
Accountant and Paymaster-General, J. W. Borden	3,950
Assist. Deputy Minister and Sec. of Militia Council, Ernest F. Jarvis . . .	3,650

The New HAZELL, 1917

Director of Contracts, H. W. Brown	$3,650
Chief of the General Staff, Col. W. Gwatkin	
Quartermaster-General, Maj.-Gen. D. A. Macdonald, C.M.G., I.S.O.	
Master-General of the Ordnance, Col. T. Benson	
Adjutant-General, Col. V. A. S. Williams, A.D.C.	
Inspector-General, Eastern Canada, Maj.-Gen. F. L. Lessard, C.B.; *Western Canada*, Maj.-Gen. S. B. Steele, C.B., M.V.O.	

Education

Education is under the control of the provincial governments; it is aided by local taxation, and liberally supported by grants from the several governments. There are 25,619 public schools of all grades, with 37,287 teachers and 1,258,751 pupils. There are 20 universities, with 500 professors and teachers, and about 10,000 teachers.

Cities

The following table shows the population of the larger Canadian cities, with their increase at various censuses:

Cities.	Census Population.		
	1871.	1901.	1911.

Industries

Agriculture is the main industry in the Dominion and in Manitoba and the North-West the wheat-growing as well as general farming capabilities are immeasurable. For the whole of Canada the area sown to field crops in 1915 was 37,063,455 acres as compared with 33,436,675 acres in 1914—wheat, 12,986,400 acres; oats, 11,365,000; barley, 1,509,350; rye, 112,300; peas, 196,210; beans, 43,310; buckwheat, 343,800; mixed grains, 466,800; flax, 806,600; corn for huskiug, 253,300; potatoes, 478,600; turnips, mangolds, etc., 172,700; hay and clover, 7,875,000; fodder corn, 343,400; sugar beet, 18,000; and alfalfa, 92,685;

The New HAZELL, 1917

representing a total value of $797,609,500. The yield of these crops was in 1915:

Crop.	Yield.	Crop.	Yield.
	Bush.		Bush.
Wheat	376,303,600	Potatoes	62,604,000
Oats	520,103,000	Turnips, Mangolds, &c.	64,281,000
Barley	53,331,300		
Rye	2,394,100		Tons.
Peas	3,478,850		
Beans	723,400	Hay and Clover	10,953,000
Buckwheat	7,865,000	Fodder corn	3,429,870
Mixed grains	17,523,100	Sugar beet	141,000
Flax	10,628,000	Alfalfa	217,000
Corn for husking	14,368,000		

Of the total yield of wheat as given above there was an exportable surplus of 264,173,200 bush. The largest quantity of wheat previously exported in any one year was 142,574,000 bush. in 1913–14. The *live-stock* in Canada in 1915 comprised 2,996,099 horses, 2,666,846 milk cows, 3,399,155 other cattle, 2,038,662 sheep, and 3,111,900 swine. At the census of 1911 there were 3,625 factories and creameries producing 199,904,205 lb. of cheese and 64,698,165 lb. of butter. There were also 11 factories for condensed milk products, with an output of 27,831,596 lb.

The *fisheries* of the east and west coasts are very productive—salmon, cod, herring, mackerel, and lobsters being the fish chiefly caught, though halibut and anchovies are also exported. The total value of the catch in 1914–15 was $31,264,631.

Forestry.—The total estimated area of the Canadian forests is between 500,000,000 and 600,000,000 acres, of which between 200,000,000 and 300,000,000 acres are covered by timber of commercial size. Nova Scotia has an area of 5,000,000, New Brunswick 9,000,000, Quebec 100,000,000, and Ontario 70,000,000 acres. Lumber, lath, and shingles production was valued at $67,500,000 in 1914 and firewood at $60,500,000; the total value of all forest products in 1914 being $176,672,000. Spruce is mostly used for lumber and pulp; maple for firewood, as well as for furniture, cars, agricultural implements, hardwood flooring and distillation; cedar for poles, fence-post and rails, cross-ties and shingles; white pine and Douglas fir for lumber; while beech, poplar, and jack pine are used in largest quantities for firewood. The production of pulpwood in 1915 was valued at $15,590,000, of which $6,164,000 was exported.

Manufactures.—The census of manufactures of 1911 showed 19,218 establishments, with a total capital of $1,247,583,609, the value of the products being $1,165,975,639. 515,203 persons were employed, receiving salaries and wages amounting to $241,008,416.

Minerals.—The value of the mineral production in Canada in 1915 was $139,600,000, an increase of $11,000,000 over 1914, due mostly to increased production of copper and lead in British Columbia. Canada now produces over 80% of the world's nickel production. The mineral output of 1914 included gold $15,925,044, silver $15,097,269, copper $10,301,935, nickel $13,655,381, lead $1,627,568, and pig iron $10,002,856; the non-metallic minerals included coal $33,433,108, Portland cement $9,187,924, asbestos and asbestic $2,909,806, petroleum $343,124, natural gas $3,511,302, clay products $7,090,898, and stone $5,593,485.

Commerce

The following table shows the external trade of Canada for certain years ($4·86⅔ = £1 sterling):

Fiscal Year.	Exports.	Imports.	Total.
	$	$	$
1870	73,573,490	74,814,339	148,387,829
1880	87,911,458	86,489,747	174,401,205
1885	89,238,361	108,941,486	198,179,847
1890	96,749,149	121,858,241	218,607,390

Canals.—There are six canal systems under the control of the Dominion government in connection with navigable lakes and rivers, having a total length of 1,594 m. The volume of traffic through the canals for 1914 amounted to 37,023,237 tons, of which 12,050,856 tons belonged to Canadian vessels and 15,636,414 tons to U.S. vessels. 287,326 passengers were carried; the merchandise was for the most part grain, coal, and iron.

Posts and Telegraphs.—The number of post-offices in 1914 was 13,811, dealing with 673,145,000 letters (15,500,000 registered), and 64,493,000 postcards. 7,227,964 money orders of a value of $109,500,670 were issued, and 4,970,067 postal notes of a value of $9,231,326; 286,672,522 postage stamps of a value of $14,623,142 were issued. The net revenue of the Post Office Department was $12,956,216, and the expenditure $12,822,058. At the end of the year there were 2,737 rural mail delivery routes, on which were erected 116,683 boxes. The length of Government telegraph lines was 10,312 m., of which 288 knots were submarine cables. The number of offices was 771, and the messages sent numbered 442,200. Of chartered telegraph companies operating, there were 3,342 offices, sending 10,348,295 messages; they had 38,503 m. of wire and 184,606 m. of line. There were in 1914 50 radio-telegraph stations, of ranges from 100 to 750 m., including a long-range station of 3,000 m. at Glace Bay, Cape Breton. The messages handled numbered 312,560. The number of telephones in 1914 was 521,144, with a wire mileage of 1,343,090; of the latter 962,947 was urban and 380,143 rural. The earnings amounted to $17,297,269 and the expenditure to 12,882,402.

Shipping.—The number of vessels on the Registry of Shipping, Canada, in 1914 was 8,545 (which included 3,847 steamers and 2,721 schooners), with a tonnage of 896,965. The number of sea-going vessels which entered and cleared at Canadian ports in 1914 was 36,015 (7,418 British, 12,786 Canadian, and 15,811 foreign), of a tonnage of 29,568,486.

Commercial Tariffs

By the **Tariff Act 1897** a rebate of 12½% of the Customs Duties was granted to countries whose tariff was judged as favourable to Canada as the Canadian tariff so reduced, and the United Kingdom and New South Wales were at once given the benefit of the reduction, with the result that the concession had to be extended to all countries entitled to most-favoured-nation treatment in Canada. The Commercial Treaties of the United Kingdom with Germany and Belgium were, however, denounced in view of this, and on Aug. 1, 1898, a rebate of 25% was given to the United Kingdom and the West Indies, and to such other countries in the British Empire as accorded reciprocal treatment to Canada. In 1900 the preferential treatment was increased from 25% to 33⅓%.

Under the Budget proposals introduced Nov. 29, 1906, **a new tariff** was established on a new system. There is a General Tariff substantially the same as the old tariff. The British Preferential Tariff was altered from a flat rate and particularised for every item imported. The Canadian Government said that on the whole the preference to Great Britain was larger than before. An Intermediate Tariff was also set up for application to countries giving reciprocity to Canada. In order to qualify for the British Preference, imports must have 25% of their value made up of British labour.

A Commercial Convention with France was signed on Sept. 19, 1907, ratified by Canada on April 3, 1908, and by France a year later. It gave Canada the benefit of the French minimum tariff, and extended to France the benefit of Canada's intermediate tariff for certain products, and a special tariff for others. A supplementary Convention, signed in Jan. 1909 and put in force a year later, admitted certain French exports on terms generally identical with and in some few cases lower than those accorded to British goods by the preferential tariff. In 1910 the provisions of the intermediate tariff on the articles covered by the French treaty were extended to **Belgium** and the **Netherlands**, and, to a limited extent, to **Italy.** Some concessions were also made to the United States.

In 1912 an agreement was entered into with the West Indies for mutual trade preference. It has been of great advantage to the West Indian sugar industry, in particular. In 1913 the preference granted to British goods was extended to the products of the remaining colonies and dependencies of the Empire which had not hitherto enjoyed it.

PROVINCES OF CANADA

ONTARIO

Ontario, formerly called Upper Canada, has a total *area* of 407,262 sq. m., with a *pop.* (1911) of 2,523,274 (1,096,640 males, and 1,086,307 females). It extends along the north shores of the River St. Lawrence and the Great Lakes, and northward to Hudson's Bay. The district of Patricia, added in 1912, has an area of 157,400 sq. m. The province is *administered* by a Lieutenant-Governor and responsible Ministry. There is only one chamber, the Legislative Assembly, which has 106 members elected by manhood suffrage for 4 years.

Cities and Towns.—The chief cities, with populations in 1915, are OTTAWA, the federal capital (100,163); Toronto (534,322), the second city in Canada in wealth and population, it has 1,500

factories with 90,000 employees, 90,235 buildings, 50 parks, 95 public schools, 10 high schools, 32 colleges, 10 public hospitals, 263 churches, it has a police force of 626, and 334 firemen, it is Canada's greatest live-stock market; Hamilton (101,344), with 415 manufacturing industries; London (70,000), through which pass 4 trunk and 7 branch railways; Brantford (25,420), with 73 industrial establishments, and a cost of living the lowest of any city in Canada; Fort William (25,000), almost as old as Quebec; Kingston (21,325), with municipally controlled water, light, and power plants; Peterborough (23,000); Windsor (25,000); Port Arthur (25,000), a great grain shipping and grain storage port—has an elevator with a capacity of 9,500,000 bush.; Kitchener (19,266); Guelph (20,000); and St. Thomas (16,000).

Agriculture and Live-stock.—Ontario is the leading agricultural province in the Dominion. The land is very fertile and produces cereals and mixed crops in abundance. There are over 14,500,000 acres of cleared farm land, the farms averaging 115 acres in extent, of which 81% are owned by the occupants. The average value of farm products per acre is greater than in any other province, and the total annual production is placed at $200,000,000. The *yield of field crops* in 1915 was: wheat, 30,252,000 bush.; oats, 122,810,000 bush.; barley, 15,369,000 bush.; mixed grains, 13,769,000 bush.; potatoes, 14,362,000 bush.; turnips and mangolds, 44,175,000 bush.; the total value of field crops in 1915 was $217,043,500. 1,012 cheese factories produced 101,712,336 lb. of cheese, valued at $13,602,745. 167 creameries produced 23,104,537 lb. of butter, valued at $6,115,425. There were in 1915 779,131 horses, 1,022,518 milch cows, 1,652,228 other cattle, 908,095 sheep, 1,769,295 swine, and 14,273,071 poultry. All the fruits grown in the temperate zone are produced in Ontario to a very high degree of excellence. From 700,000 to 1,000,000 barrels of apples are exported annually.

Manufactures and Mining.—Practically half the manufactures of Canada are produced in this province. The Government-formed Hydro-Electric Commission sells electric power at cost price, and has materially stimulated industry in recent years. Mining resources cover practically the entire list of metallics and non-metallics, with the exception of coal. The value of the mineral production in 1914 was $46,295,959, and included gold $5,529,767, silver $12,795,214, nickel $5,109,088, copper $2,081,332, Portland cement $2,931,190, natural gas $2,346,687. The lumber trade, mostly spruce, pine, and poplar, is a very important one, and was valued at $26,791,702 in 1914.

Lieutenant-Governor, His Honour Col. Sir J. S. Hendrie, K.C.M.G., C.V.O. (*b.* '57, app. 1914) $10,000

QUEBEC

The Province of Quebec (formerly called Lower Canada) lies eastward of Ontario, occupying both banks of the St. Lawrence. It has an *area* of 706,834 sq. m., with a *pop.* of 2,003,232 (1,011,502 males and 991,730 females), mostly descendants of original French colonists. In 1912 the boundaries were extended northwards to Hudson's Bay and Straits, so as to embrace the whole of the peninsular except the coast-strip of Labrador which belongs to Newfoundland.

Government.—The government of the Province is administered by a Lieutenant-Governor and responsible Ministry. A Legislative Council of 24 members appointed for life by the Lieutenant-Governor. The Legislative Assembly has 81 members, elected for five years.

Cities and Towns.—The principal cities are QUEBEC (100,000), the capital, a picturesque and very strong fortress, with historic associations—proposals have been mooted to develop Quebec

as a premier port and railway terminal; Montreal (617,130), a splendid city on the St. Lawrence, the chief seaport and the most populous town in the Dominion—it is the head of ocean navigation—total tonnage arrived in 1915 2,261,274 tons; St. Hyacinthe (11,116); Hull (20,689); Sherbrooke (19,314); and Westmount (14,579).

Agriculture and Live-stock.—The farm land occupied amounts to 1,202,347 acres. All cereals and fruits are produced in abundance, but the lumber trade is the great industry of Quebec. The yield of the principal crops in 1915 was: wheat, 1,411,000 bush.; oats, 42,182,000 bush.; barley, 2,255,000 bush.; buckwheat, 2,568,000 bush.; mixed grains, 2,997,000 bush.; potatoes, 17,510,000 bush.; turnips and mangolds, 3,144,000 bush.; and hay and clover, 3,682,000 tons. The *live-stock* numbered in 1915 372,567 horses, 720,420 milch cows, 612,500 other cattle, 554,491 sheep, and 632,729 swine. There were 1,947 butter and cheese factories, with an output of butter and cheese of $16,156,022. The wood-pulp industry is growing fast, having in 1914 31 mills with a production of 515,409 tons. The value of the mineral production was asbestos and asbestic, $2,900,839; copper, $801,129; cement, $13,325,055; brick, $1,194,351; and limestone, $1,745,855.

Lieutenant-Governor, His Honour Sir Pierre Evariste Leblanc, K.C.M.G. (app. 1915) $10,000
Aide-de-Camp, Maj. V. Peletier

Executive Council

Premier and Attorney-General, Hon. Sir Lomer Gouin, K.C.M.G. . . . $6,000

Agent-General for Quebec in England, Lt.-Col. P. Pelletier, 36 Kingsway, London, W.C. . . . . .

NOVA SCOTIA (including Cape Breton Island)

Nova Scotia is a peninsula between 43° 46′ N. and 61° 67′ W., connected with New Brunswick by an isthmus about 14 m. wide. The colony was originally French and called Acadia. It was ceded to the British Crown in 1714. It has an *area* of 21,428 sq. m. and a *pop.* of 492,338 (251,019 males and 241,319 females).

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, a Legislative Council of 21 members and a Legislative Assembly of 38 members.

Cities and Towns.—HALIFAX (53,000), the capital, has one of the finest, best buoyed, and lighted harbours in the world, capable of accommodating the combined naval fleets of the world—its harbour and pilotage dues are exceptionally cheap, and its distance of only 2,422 m. from Liverpool (as compared with New York's 3,100) make it the ideal trade route to Europe—it is the terminus of the Canadian Government railway and the contemplated Atlantic terminus of the other important Canadian lines; Sydney (25,000), the Pittsburg of Canada; Truro (7,500); Yarmouth (6,600).

Agriculture and Live-stock.—Nova Scotia is particularly favoured in her climate, and ranks second only to Ontario in the production of apples and peaches; 950,000 barrels of apples, value $1,950,000, were shipped in 1915. Owing to the cool temperature in the height of summer, the country is particularly fitted for stock-raising. Notwithstanding the attention paid to lumbering, fishing, and shipping, mixed farming and dairy farming are on the increase. The only important grain crop is oats, the 1915 product being 3,487,700 bush. Potatoes (4,759,000 bush.) and turnips and mangolds (3,589,000 bush.) were other important crops; hay yielded 958,000 tons. The value of agricultural products was $34,019,144. The *live-stock* in 1915 numbered 67,688 horses, 138,534 milch cows, 161,300 other cattle, 217,698 sheep, and 57,817 swine.

Minerals.—The principal mineral is coal, of which $21,000,000 were produced in 1915; gold, iron, copper ore, etc., are also found; there are practically inexhaustible deposits of gypsum, and tungsten has lately been discovered. Extensive iron and steel works have been established at Sydney, Cape Breton, New Glasgow on the mainland, and employ several thousand men.

Fisheries.—The fisheries of the province are the most extensive in Canada. Some $6,000,000 are invested in the industry, and 40,000 persons employed; the total catch of cod, lobsters, mackerel, herring, and haddock in 1914 was $9,500,000.

Lieutenant-Governor, His Honour David MacKeen (app. 1914) . . . $9,000
Private Sec. John Hicks, R.N. . . 1,250

Executive Council

Premier and Provincial Secretary, Hon. George H. Murray $6,000

NEW BRUNSWICK

New Brunswick is situated between 45° 2′ and 48° 3′ N. and 63° 46′ and 69° 3′ W. It has an *area* of 27,985 sq. m., and a *pop.* of 351,889 (179,867 males and 172,022 females).

New Brunswick was part of the old French province of Acadia, and was ceded to England in 1713, but full possession was not gained of it until 1759. It was first colonised by British subjects from New England in 1762, and in 1783, at the close of the Revolutionary War, it received a large body of loyalists from the Thirteen Colonies.

Government.—The province is administered by a Lieutenant-Governor, aided by an Executive Council of 7 members, and a Legislative Assembly of 48 members, elected on a liberal franchise.

Cities and Towns.—FREDERICTON (7,208) is the capital; St. John (58,650) is the winter port of Canada, a new harbour, at a cost of some £5,000,000, is being constructed at Courtenay Bay, now known as East St. John—St. John is the commercial centre of the colony, and was the first city in Canada to adopt a town-planning law; Moncton (12,260); Chatham (4,666).

Agriculture and Live-stock.—The climate of New Brunswick is healthy, and the extremes of temperature are not so great as in the interior of Canada, the mean summer temperature being 60° F. and in winter 19° F. The country offers splendid advantages to intending immigrants, especially farmers, farm labourers, and skilled mechanics in all branches of industry. In 1915 14,000 acres were under wheat, 201,000 under oats, 58,000 under buckwheat, and 2,100 under barley. The product in 1915 was 267,000 bush. of wheat, 5,559,000 bush. of oats, 1,315,000 bush. of buckwheat, and 48,000 bush. of barley. There were also produced 5,772,000 bush. of potatoes, and 2,633,000 bush. of turnips and mangolds. The *live-stock* comprised 64,075 horses, 126,200 milch cows, 127,073 other cattle, 142,141 sheep, and 88,167 swine. Cheese made amounted to 1,002,026 lb., and butter to 1,090,501 lb. The *fishing-grounds* are among the richest in the world, employing 20,000; the catch includes salmon, cod, mackerel, herring, and shad.

Manufactures.—In 1910 there were 1,158 industrial establishments, with a capital of $36,125,012, employing 24,755 persons, and paying in wages $8,314,212. The value of the output was $35,422,302, an increase of 68% in 10 years. The lumber industry is important; in 1915 291,000,000 board feet were cut in Crown lands; pulp and paper mills have been erected. Copper, coal (especially in the Grand Lake region—118,953 tons in 1915), and iron are abundant, and antimony, lead, manganese, gypsum, petroleum, natural gas, oil shales, and other valuable minerals exist in large quantities.

Lieutenant-Governor, His Honour Josiah Wood (*b.* 1843, app. 1912) . . . $9,000

Executive

Premier and Minister of Lands and Mines, Hon. Geo. J. Clarke, K.C. . . . $2,100

MANITOBA

Manitoba, formerly known as the Red River Settlement, bounded on the N. by the 60th parallel of latitude, is situated in the centre of the Dominion, of which it became a province in 1870. It has an *area* of 251,832 sq. m., its boundaries being extended in 1912 to the shores of Hudson's Bay. Its *pop.* is 455,614 (250,056 males and 205,558 females).

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 7 members, and a Legislative Assembly of 49 members, elected by districts for 5 years.

Cities and Towns.—WINNIPEG (242,000), the third city in Canada, and the greatest grain market on the continent, surpassing Chicago and Minneapolis—its manufacturing output in 1915 was $43,000,000, it had over 400 factories and workshops employing 18,000 in 1915—assessable value, £324,944,610; Brandon (13,839); St. Boniface (7,483); Portage La Prairie (5,892).

Agriculture and Live-stock.—The climate is healthy, but there are great extremes of temperature. The soil is very fertile, being a rich, black loam, the surface deposit showing a very high content of nitrogen, phosphoric acid, and potash. It is, therefore, peculiarly adapted to the growth of cereal grains, and owing largely to the nitrogen in the soil, the wheat grown possesses a high percentage of gluten. "Manitoba No. 1 Hard" is the world's standard wheat. The 1915 grain crop was a record one, and produced 96,425,000 bush. of wheat, 69,471,000 bush. of oats, and 17,763,000 bush. of barley; other crops were rye, 155,000 bush.; flax, 374,000 bush.; potatoes, 3,104,000 bush.; turnips and mangolds, 1,157,000 bush.; and hay and clover, 317,000 tons. The *live-stock* numbered in 1915 36,843 beef cattle, 183,229 milch cows, 329,994 horses, 76,577 sheep, and 286,433 swine. There were 35 creameries and 21 cheese factories with an output of $3,845,183.

Manufactures.—The value of Manitoba's manufactures in 1910 was $53,673,609; there is now developed on the Winnipeg River electric power for transmission to and use in Winnipeg 60,000 h.p.; there is possible of development within easy transmission distance of Winnipeg 500,000 24-hour h.p.

Lieutenant-Governor, His Honour Sir J. A. M. Aikins, K.C.M.G. (*b.* 1854, app. 1911) $9,000

BRITISH COLUMBIA

British Columbia, Canada's maritime province on the Pacific, extends from the U.S. boundary to 60° N. lat., and is bounded on the E. by the province of Alberta. It has an *area* of 395,610 sq. m. with a *pop.* of 392,480 (251,619 males and 140,861 females).

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 7 members, and a Legislative assembly of 42 members, elected by manhood suffrage.

Cities and Towns.—VICTORIA (55,000), the capital, on Victoria Island, the leading tourist city in Canada on the Pacific coast, with an unequalled temperate climate (highest, 1914, 82°; lowest, 26°)—it is also the second largest port in Canada according to tonnage; Vancouver (101,000), on the mainland, a young city of rapid growth—it has 80 m. of water-front and 40 m. of anchorage; New Westminster (20,000) on the Fraser River, an important freshwater port, has a million-dollar bridge, and great lumber mills, one of them the largest in the world; Nanaimo (10,000); Nelson (7,000); Prince Rupert (6,000).

Agriculture and Live-stock.—Although mountainous in character, the province contains many tracts of good farming land, best adapted to mixed farming. The total production of agriculture in 1915 was $30,872,901, and included 525,000 bush. of wheat, 4,390,600 bush. of oats, 3,956,000 bush. of potatoes, and 1,511,000 bush. of turnips and mangolds. The fruit-growing industry is well established, and exported in 1915 787,000 boxes of apples, 200,000 crates of plums and prunes, 85,000 crates of peaches, 60,000 crates of cherries, 50,000 crates of apricots, 35,000 crates of pears, and 165,000 crates of small fruits. The *live-stock* in 1915 included 62,000 horses, 165,000 beef cattle, 81,000 dairy cattle, 40,000 sheep, and 36,500 swine.

Manufactures and Industries.—The estimated

product of manufactures in 1914 was $50,000,000. The 1910 census showed capital invested $123,027,521 on 651 plants having 33,312 employees on salary of $2,646,251 and wages of $14,594,419. A large proportion of British Columbia's wealth is in standing timber estimated at 350 billion feet. The lumber production in 1915 was $29,150,000. The *mineral* wealth of the province is great, the minerals consisting chiefly of coal, copper, silver, gold, and iron. Vancouver Island contains large deposits of good steam coal, and there are other large deposits in East Kootenay and other parts. Gold has been found in the Kootenay, Cariboo, and Cassiar districts, near the Columbia River, in great abundance. The mineral production in 1915 was $29,447,503. The salmon, halibut, cod, whale, and herring *fisheries* produced during 1915 $11,575,068. There are 3,419 m. of railway in operation and 439 m. under construction.

Local Judge in Admiralty, Hon. Archer Martin 1,000

PRINCE EDWARD ISLAND

Prince Edward Island, admitted into union with the Dominion in 1873, lies between 46° and 47° N., and between 62° and 64½° W. It has an *area* of 2,184 sq. m., with a *pop.* of 93,728 (47,069 males and 46,659 females).

Government.—It is administered by a Lieutenant-Governor with an Executive Council, and a Legislative Assembly of 30 members, half elected by real-property holders and half by manhood suffrage.

Cities and Towns.—CHARLOTTETOWN (11,203), the capital, on the shore of Hillsborough Bay. Other towns are Georgetown, Summerside, Sauris, Kensington, and Alberton.

Agriculture and Live-stock.—The climate is milder than the neighbouring provinces and the soil is fertile, agriculture being the staple industry. The island claims the title of the "Garden Province." The production of crops in 1915 was: wheat, 623,000 bush.; oats, 6,832,500 bush.; barley, 106,800 bush.; mixed grains, 309,200 bush.; potatoes, 3,558,000 bush.; turnips and mangolds, 3,551,000 bush.; and hay and clover, 351,000 tons. The *live-stock* included 36,144 horses, 46,365 milch cows, 62,000 other cattle, 110,500 sheep, and 43,800 swine. Black fox and silver fox breeding has become an important industry; at the end of 1913 there were 277 fox ranches, a number since considerably increased, and an official numeration reported 3,130 foxes of all classes. The estimated value of the foxes and ranches reaches a figure of no less than $15,186,150, of which the ranches and ranch property only constituted $207,750. The importance of the fox industry is best realised by stating that while Prince Edward Island is essentially an agricultural community, the above estimated valuation of foxes is about double that of all the cattle, sheep, horses, swine, and poultry shown in the official census of 1911. Foxes are at present being sold only for breeding purposes, none being killed for their skins. As agriculture continues to develop and flourish, the value of this new industry to the province is great, and the taxation on foxes furnishes a large increase to the ordinary revenue of the Provincial Government.

Lieutenant-Governor, His Honour Augustine C. Macdonald (app. 1915) . . $7,000

Executive Council

President and Attorney-General, John A. Mathieson, K.C. . . . $2,700

County Judges, W. S. Stewart, $3,500; A. L. Fraser, Neill McLeod . each 3,000

SASKATCHEWAN

Saskatchewan, which became a province in 1905, comprises the greater portion of the territorial divisions formerly known as Assiniboia, Saskatchewan, and Athabasca. It has an *area* of 251,700 sq. m. and a *pop.* in 1911 of 492,432 (291,730 males and 200,702 females); the 1915 *pop.* is estimated at 691,000.

Government.—The province is administered by a Lieutenant-Governor, assisted by an Executive Council of 7 members and a Legislative Assembly of 54 members. The Dominion Government retains control of the public lands, and in consideration thereof pays an annual allowance to the Provincial Government.

Cities and Towns.—REGINA, the capital, "the City of Certainties," was incorporated as a city in 1903—its pop. in 1882 was 200, and in 1915 50,000; Moose Jaw (24,000); Saskatoon (25,000); Prince Albert (10,000); North Battleford, Swift Current, Weyburn (each 5,000).

Agriculture and Live-stock.—The agricultural capabilities of Saskatchewan are similar to those described under Manitoba (*q.v.*). It stands first amongst the wheat-producing provinces of Canada. Free grants of land can still be had, and there are millions of acres awaiting settlement and cultivation. The crop production for 1915 was: wheat, 195,168,000 bush.; oats, 157,628,000 bush.; barley, 10,570,200 bush.; rye, 75,600 bush.; flax, 9,061,000 bush.; potatoes, 4,428,000 bush.; turnips and mangolds, 2,936,000 bush.; and hay and clover, 94,000 tons. The number of *live-stock* in 1915 was 667,443 horses, 358,540 milch cows, 573,021 other cattle, 192,024 sheep, 392,246 swine, and 5,049,612 poultry.

The province has 6,101 m. of railway. In 1915 an Act came into force absolutely abolishing all public-houses and hotel-bars in the province.

Manufactures.—The value of manufactures in the province was, according to the 1910 census, $6,332,132.

Lieutenant-Governor, His Honour Richard S. Lake (app. 1915) $9,000

Executive Council

Premier and Minister of Education, Hon. W. M. Martin $6,000
Minister of Railways, Hon. J. A. Calder . 5,000
Attorney-General and Provincial Secretary, Hon. W. F. A. Turgeon . . . 5,000

District Court Judges, R. Rimmer, T. O. Gordon, E. A. McLong, A. G. Farrell, J. W. Hannan, F. A. G. Ouseley, J. F. Maclean, C. E. D. Wood, A. D. Dickson, A. E. Doak, W. J. Leahy, C. H. Bell, E. R. Wylie, J. O. Baldwin, W. O. Smyth . . . . . each 3,000

ALBERTA

Alberta, a province proclaimed Sept. 1, 1905, was carved out of the North-West Territories. It includes the former district of Alberta, the southern half of Athabasca, and a strip off the western side of Assiniboia and Saskatchewan districts. The total *area* is about 253,000 sq. m., with a *pop.* in 1911 of 374,663 (223,989 males and 150,674 females); estimated *pop.* 1915, 550,000.

Government.—Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 8 members and a Legislative Assembly of 55 members elected for 5 years. There is equal suffrage, also prohibition, and a moratorium for soldiers.

Cities and Towns.—EDMONTON (80,000), the capital, is the principal railway centre between Winnipeg and the Pacific Coast—assessment 1915, $168,923; Calgary (75,000), Medicine Hat (10,000), with a large supply of natural gas, 16 wells drilled by city; Lethbridge (10,170) under commission government; Wetaskiwin (3,000); and Red Deer (3,000).

Agriculture and Live-stock.—Agriculture is the chief industry of the province; there are free homesteads available for thousands of settlers in desirable localities. The 1915 production of crops was: wheat, 51,355,000 bush.; oats, 107,741,000 bush.; barley, 6,984,000 bush.; rye, 463,000 bush.; flax, 1,124,000 bush.; potatoes, 5,155,000 bush.; turnips and mangolds, 1,356,000 bush.; and hay and clover, 311,000 tons. The *live-stock* comprised 609,125 horses, 357,938 milch cows, 723,945 other cattle, 501,188 sheep, and 760,789 swine. Packing houses have been established at Edmonton and Calgary, and have much increased the hog industry. The butter output was 11,000,000 lb. from creameries and farm dairies; the cheese output was 70,580 lb.

Minerals.—The mineral outlook is promising, there being large quantities of coal, petroleum, and asphalt. The coal output in 1915 was 3,667,816 tons. Length of railways, 4,200 m.

Lieutenant-Governor, His Honour R. G. Brett (app. 1915)	$9,000
Private Sec. Grace B. Brown	1,200

NORTH-WEST TERRITORIES

The North-West Territories comprise those territories formerly known as Rupert's Land and the North-Western Territory (except the provinces of Manitoba, Saskatchewan, and Alberta and the Yukon Territory), together with all British territories and possessions in North America and all islands adjacent to any such territories or possessions, except Newfoundland and its dependencies. They have an *area* of 1,242,224 sq. m. and a *pop.* of 18,481 (9,346 males and 9,135 females). They are governed by a Commissioner appointed by the Governor-General, with a Council of not more than 4 members.

Commissioner, Frederick White, C.M.G.

YUKON TERRITORY

The Yukon Territory was in 1898 constituted a separate Territory, and is administered by a Commissioner. It has an *area* of 196,976 sq. m. and a *pop.* of 8,512 (6,508 males and 2,004 females). There is a Legislative Council composed of 10 elected members. The *Klondyke* district, which is only a small section of Yukon, is the scene of the rich placer gold discoveries. Promising finds of quartz have also been made, and much copper and quartz development is in progress around Whitehorse. Valuable copper properties have been located at the head of White River. The total production of minerals from 1896 to 1914 has been $135,138,335. An excellent system of roads has been made, and there is a railway (102 m.) and steamboat service from Dawson (3,013), which is situated at the junction of the Klondyke and Yukon Rivers, to the Pacific coast.

Commissioner, Hon. George Black	$6,000
Gold Commissioner and Crown Timber and Land Agent, G. P. Mackenzie	5,000
Assist. Gold Commr. R. C. Miller, Whitehorse	2,500
Legal Adviser and Public Administrator, John Black	
Registrar, Albert E. Lamb	3,800
Comptroller, G. A. Jeckell	2,700

NEWFOUNDLAND

The island of Newfoundland—the oldest British colony—is situated between 46° 37′ and 51° 39′ N. and 52° 35′ and 59° 25′ W., on the north-east side of the Gulf of St. Lawrence; its greatest length from north to south is 350 m., and its average breadth about 130 m.; its *area* is 42,734 sq. m.

Population.

	Males.	Females.	Labrador.	Total.
1901	111,311	105,726	3,947	220,984
1911	122,578	116,092	3,949	242,619
1914	126,239	121,471	4,016	251,726
1916	—	—	—	254,750

The coasts of Newfoundland appear from the sea to be bleak and rocky; they are, however, indented at frequent intervals by deep fjords and large bays, which are the seats of prolific fisheries. The climate is not so severe as that of the neighbouring continent, although the north and east coasts are chilly in winter owing to the Arctic currents, and fogs prevalent through the influence of the Gulf Stream; the thermometer rarely sinks below zero in winter, and then only for a few hours, in summer it ranges between 70° and 80° F.; the inhabitants are an exceptionally healthy race. In the Codray valley and on the west coast the climate is favourable to agriculture, and there are large forests of pine, spruce, birch, juniper, and larch.

Newfoundland was discovered by John Cabot in 1497; it was as early as 1500 frequented by the Portuguese, Spanish, and French for its fisheries. In August 1583 Sir Humphry Gilbert took possession of it in the name of Queen Elizabeth, but the effort to colonise it was not successful. In 1634 and subsequently parties of English colonists settled in the island, whilst the French had established a station at Placentia in 1620. At the Peace of Utrecht, 1713, the exclusive sovereignty of Great Britain over the island was acknowledged, certain rights being granted to French fishermen, the extent of which being long a matter of dispute between the two countries. The dispute was finally settled by the Anglo-French Convention of 1904.

The *government* is administered by a Governor, with a *Legislative Council* of 24 members appointed by the Crown, and a *House of Assembly* of 36 members elected for four years, from 18 districts, by manhood suffrage and the ballot. A branch of the *Royal Naval Reserve* has existed in the island since 1900.

The *religious bodies* are: Church of England, 78,616; Church of Rome, 81,177; Methodists, 68,042; other denominations, 14,784. *Education* is purely denominational and fees are charged; in 1914 there were 1,183 schools, with 52,824 scholars; grants are made for higher and technical education.

Cities and Towns.—ST. JOHN'S (33,779), the capital, the most easterly city of America, 1,700 m. from Queenstown and 2,030 m. from Liverpool; has a well-equipped dry dock and two fine cathedrals, Anglican and Roman Catholic—through it passes practically all the commerce of the island. Other towns are Harbour Grace (4,279); Carbonear (3,540); Twillingate (3,348), and Bonavista (3,911).

Production, Industry, etc.—The chief agricultural crops are oats, potatoes, and turnips. The *live-stock* at the last census comprised 13,288 horses, 40,427 cattle, 100,447 sheep, and 27,575 swine. The island abounds in copper and iron, particularly at Bell Isle, in Conception Bay; the output of iron ore in 1914–15 was 511,990 tons, and of copper ore 3,250 tons. Coal is abundant, but the output is still inconsiderable. There are fine pine forests in the north, and the new railways laid down have given great impetus to the pulp and paper manufacture, as well as to mining, lumbering, and general trade. At Grand Falls and Bishop's Falls there are extensive paper mills in operation, and another has been erected at Deer Lake. Most of the paper is exported to England; the paper and pulp exports in 1913–14 amounted to £368,936 and in 1914–15 to £451,317. Newfoundland is a great place for sport; caribou shooting is excellent, and there is good fishing for salmon and trout.

Fisheries.—The seal, cod, and herring fisheries are the mainstay of the island, but there are still thousands of miles of fisheries which have never been touched; there is room for an immense trade in fish between Newfoundland and Europe by means of cold storage. The exports of codfish in 1914–15 amounted to 1,094,242 quintals; the catch of whales in 1914–15 was 161, and of seals 241,302.

Railways.—The railway was begun in 1881 and has now been extended across the island to Port aux Basques, and steamship connection with the railway system of Canada and the United States is maintained. Branches from the main line extend to all important towns and connect with the steamers which ply in the great bays. Total length of railways, 723 miles. At the present time additional extensions of the railway are under construction, the cost of which will approximate $4,000,000.

Post and Telegraphs.—There were 736 post offices in 1915, dealing with 3,843,000 letters and postcards, 3,510,000 newspapers and books, and 162,230 parcels. There are 4,524 miles of telegraph line and 926 of telephone wire. Newfoundland is also practically the resting-place for the cables connecting Europe with North America.

Shipping.—In 1915 the mercantile marine consisted of 3,310 sailing vessels of 130,060 tons, and 92 steam vessels of 20,895 tons. The total tonnage of vessels entered and cleared was 2,731,278, of which 1,730,840 were British.

Labrador.—A great peninsula on the east coast of British North America, lying between the Gulf of St. Lawrence and Hudson's Bay. From Cape Chidley (Hudson's Strait) to Blanc Sablon (Strait of Belle Isle), including the basin of the Hamilton, it belongs to Newfoundland, the remainder of the peninsula forming part of Quebec. The *area* is about 120,000 sq. m., and *pop.* about 4,000, the number being greatly increased in summer by fishermen and sportsmen.

NORTH ATLANTIC COLONIES

BERMUDA

The Bermudas or Somers Islands form a group or cluster of about 300 small islands, situated on the Western Atlantic Ocean, 32° 15′ N. and 64° 51′ W., about 580 m. to the eastward of Cape Hatteras in North Carolina, the nearest point of the neighbouring American Continent. The *area* of the group is 19 sq. m., the principal island containing 16 sq. m. with a *pop.* of 7,219 whites and 13,582 coloured persons, excluding the garrison. The islands were discovered in 1515 by the Spanish Juan Bermudez, after whom they were called. The Spaniards made no attempt to colonise them and they were entirely uninhabited when, in 1609, Admiral Sir George Somers, on his way to Virginia, was wrecked upon one of the numerous sunken reefs which surround the islands on every side. Somers died in Bermuda the following year, and his companions called the group after him. The largest island, generally known as the Main Land, is about 14 m. in length, and about 1 m. in average width; it contains about 9,000 acres of land, the highest point being only 240 ft. above the sea. The city of Hamilton, now the seat of Government, is situated about the centre of the main island, where a deep inlet, running up for two or three miles into the land from the sheltered waters, forms a safe and convenient harbour. The other principal islands of the group are St. George, Ireland Island (entirely given up to the accommodation of H.M. Dockyard and a number of other naval establishments), Boaz and Watford Islands (exclusively occupied by military depôts and garrisons), Somerset, Smith's, St. David's, Cooper's, Nonsuch, Rivers, Ports, and Godets, all inhabited by a civil population. The colony is administered by a Governor with an executive Council of 6 members, a Legislative Council of 9 members, and an elected House of Assembly of 36 members. The climate is celebrated for its mildness and salubrity; there is no winter, and the summers are never very hot. The soil is poor in quality, and three-fourths of the area is quite unfit for cultivation. But as there is no fear of winter frosts, large crops of early potatoes, onions, lily bulbs, tomatoes, and other vegetables are raised for the New York market. Small quantities of arrowroot and cut flowers are also exported. A number of Boer prisoners of war were confined in the colony during the South African War. Of late years the islands have become a favourite winter resort for Americans seeking to escape the rigours of the winter climate of the continent. Large hotels have sprung up; the number of tourists arriving in 1915 was 10,831, as compared with 14,773 in 1914 and 21,595 in 1913. There is a total want of streams and wells of fresh water, and the inhabitants are dependent on the rain, which they collect and store up in tanks. The total tonnage of vessels which entered and cleared in 1915 was: British, 1,171,811 tons; foreign, 576,526 tons.

CAPITAL: Hamilton (pop. 2,627).

BRITISH GUIANA

British Guiana is a portion of the South American continent, extending from east to west about 270 m. and from north to south about 540 m. It includes the settlements of Demerara, Essequebo, and Berbice, and is bounded on the E. by Dutch Guiana, on the S. by Brazil, on the W. by Venezuela, and on the N. and N.E. by the Atlantic Ocean. Its *area* is about 90,277 sq. m., of which only 130 sq. m. are under cultivation. The *pop.* in 1913 was 304,149, exclusive of aborigines; East Indians numbered 126,517, Portuguese 10,084, and Europeans other than Portuguese 3,937. The climate is hot, but not unhealthy. Rich, alluvial low-lying plains extend 40 to 70 m. from the coast, and are the seat of cultivation and settlement. The staple products in former years were sugar, rum, molasses, cotton, and coffee. The latter two industries have given place to the cultivation of the sugar-cane and allied products—rum, molasses, and molascuit or cattle foods—which at present is the chief industry of the colony, and furnished 73% in value of its domestic exports. There are 42 sugar estates in active operation, with a total area of 165,055 acres under cultivation. During 1915 116,244 tons of sugar, 4,698,230 gall. of rum, and 2,233 tons of molascuit were exported. Further attention is being given to the planting of coconuts, cocoa, and coffee on the vegetable soils on the banks of the rivers, and especially to the cultivation of Para rubber. Rice is being grown to a considerable extent, chiefly by the coolies. Gold and diamond working is carried on by about 10,000 diggers. Of gold, 58,401 oz. were exported in 1915, valued at $1,015,152, and diamonds valued at $51,369. Other articles exported are timber (in which the colony abounds), balata, and charcoal.

The **Executive** is in the hands of a Governor and Executive Council; legislation is conducted by a Court of Policy of 16 members—the Governor (President), 7 official and 8 elected. For finance measures 6 elected representatives are added, forming Combined Court. Civil law is modified Roman-Dutch; criminal law is English.

CAPITAL: Georgetown (Demerara), pop. 60,000, a picturesque, well-built city and port, provided with various excellent modern institutions; second town and port, New Amsterdam (Berbice), pop. 7,000.

BRITISH HONDURAS

British Honduras is a Crown Colony in Central America, lying between 18° 29′ and 15° 54′ N. and 89° 15′ and 87° 50′ W. It is bounded on the N. by Yucatan, on the W. and S. by Guatemala, and on the E. by the Caribbean Sea. It has an *area* of 8,598 sq. m., with a *pop.* in 1916 of 41,928, which includes whites, aboriginal Indians, Caribs, negroes, and East Indians. The climate for a tropical country is not unhealthy. The highest shade temperature recorded is 98° F., and conditions are more bearable by comparison with the West Indies or Central American States. Near the coast the country is swampy, but rises towards the interior. The northern district is a flat plain; it remained wholly unexplored until 1879, when it was traversed by the Colonial Secretary, Mr. Fowler, from Garbutt's Falls, on the Belize River, at the western frontier, to the sea coast south of Deep River. Excellent pasture land exists in the western part, as well as rich soil, and indications of minerals. No inhabitants were seen, but ancient Indian ruins, consisting of large stone buildings, were found. On the west, away from the coast, hills and valleys, clothed with timber, abound, and rich, grassy plains afford excellent pasturage. The chief rivers are the Hondo, the New River, and the Old or Belize River. The main industry is wood-cutting, now over 200 years old, mahogany, cedar, and logwood being the staples; of mahogany 13,858,327 superficial feet were exported in 1915. Of fruit, bananas (673,433 bunches in 1915), plantains, and coconuts are the most important. Rubber and sapodilla gum are grown, and the soil and climate are suitable for cotton. The export of rum in 1915 was 2,258 gall.

A railway 25 m. long has been built in the Stann Creek Valley.

The Government, which was reconstituted in 1909, is composed of the Governor, an Executive Council of 3 official and 3 unofficial members, and a Legislative Council of 5 official and 7 unofficial members. The Governor is President of both Councils.

CHIEF TOWN: Belize (pop. 10,478); other towns are Stann Creek (2,640) and Corozal (1,789).

	1913–14	1914–15	1915–16

† And £200 as Chairman of Sea Defence Commissioners.

WEST INDIES

The West Indies, sometimes called the Antilles, are an archipelago, stretching from Florida in North America and Yucatan in Central America to Venezuela in South America, and enclosing the Caribbean Sea and the Gulf of Mexico. The land *area* of all the islands is nearly 100,000 sq. m., with an estimated *pop.* of about 6,500,000; that of the British islands about 12,000 sq. m. They were so named in 1492 by Columbus, who believed that through the islands he had discovered a new route to India. The following list gives their areas and populations:

Islands and Capitals.	Area, Sq. m.	Population. 1901.	Population. 1911.
BRITISH:			
Jamaica (Kingston)	4,450	806,690	855,600

BAHAMAS

The Bahamas (*Lucayos*) are an archipelago lying between the S.E. corner of Cuba and Florida, stretching over 600 m. in length, between 80° 50′ and 72° 50′ W. and 22° 25′ and 26° 40′ N. Twenty islands of the group are inhabited, but there are besides about 3,000 islets and rocks. The whole has an *area* of 4,403 sq. m. with a *pop.* (1915) of 55,639, the majority being of the negro race. The chief island politically is New Providence (area, 58 sq. m.), containing the capital, Nassau; the other main islands are Abaco, Great Bahama, Eleuthera, Cat, Watling or Guanahani, Rum Cay, Long Island, Andros, Crooked Islands, Mayaguana, and Inagua. Originally settled by Englishmen from the Bermudas in 1646 and 1666, the settlement was laid waste by the French and Spaniards in 1703. After this they became a regular rendezvous for pirates, who were finally extirpated in 1718 by the English under Captain Woodes Rogers. In 1781 the Bahamas were surrendered to the Spaniards, but at the conclusion of the war were again annexed by the British, who were confirmed in their possession by the Peace of Versailles, 1783. In 1848 the Turks and Caicos Islands, which geographically form part of the Bahamas chain, were separated from the other Bahamas, and formed into a distinct presidency.

The climate is salubrious and very pleasant in

the winter season, and the colony has in recent years become a favourite winter health resort for Americans and Canadians. The cultivation and preparation of the sisal fibre plant is an important industry, and sponge-gathering is rapidly increasing. There is a considerable fruit trade with the United States, the produce including tamarinds, olives, oranges, lemons, limes, citrons, pomegranates, pine-apples, figs, sapodillas, bananas, sour-sops, melons, yams, potatoes, gourds, cucumbers, pepper, cassava, sugar-cane, ginger, and coffee. Cotton is indigenous, but has ceased to be a staple. In some islands there are rich salt-ponds, but salt-raking, an early industry, has fallen off altogether. The imports are chiefly textile fabrics, bread stuffs, spirits and wines.

Andros Island and the Abaco Islands have much excellent wood, including mahogany, mastic, lignum-vitæ, iron, and bullet-woods. Most of the trade is with the United States.

The Government is representative. There is a Governor and an Executive, a Legislative Council, and a House of Assembly of 29 members. Education is free, compulsory, and unsectarian.

CAPITAL: Nassau (pop. 12,000), which has a safe harbour.

	1913	1914	1915

BARBADOS

Barbados is geographically but not politically one of the Windward group. It is an island situated 13° 4′ N. and 59° 37′ W., is nearly 21 m. long by 14 m. in breadth, and has an *area* of 166 sq. m. It had a *pop.* in 1915 of 180,516.

The exact date of its discovery is unknown, but it is said to have been first discovered by the Portuguese, by whom it was named Las Barbados, from the number of bearded fig-trees in the island. The island, unlike most of its neighbours, has never changed hands, but has remained in possession of the British since its first settlement in 1628. The climate is pleasant, and as the soil is porous and there are no swamps, the island is healthy. The chief industry is sugar-growing, some 64,000 acres being devoted to it. The chief exports are sugar and molasses, which go very largely to Canada, Newfoundland, and the United Kingdom; some cotton and rum are also exported. A geological survey reported in 1913 that a prosperous, if not very large, local industry in oil-producing and refining could be established in the colony, and steps for establishing such an industry are being considered by the Legislature. The administration consists of a Governor, with an Executive Council of 4 members, an Executive Committee composed of the Executive Council and 5 members of the Legislature, a Legislative Council of 9 members, and a House of Assembly of 24 members, elected annually. Education is well provided for; in addition to Codrington College (founded 1745, and affiliated to Durham University), there are 9 secondary schools and 146 primary schools, with an average attendance of 13,652 pupils.

CAPITAL: Bridgetown (pop. 16,648).

	1913–14	1914–15	1915–16
Revenue	£214.865	£223.091	£212,484

JAMAICA

Jamaica is the largest of the British West India Islands, lying 90 m. to the south of Cuba, within 17° 43′ to 18° 32′ N. and 76° 12′ to 78° 24′ W. It is 144 m. in length and 49 m. in extreme breadth, having a total *area* of 4,450 sq. m., and a *pop.* in 1916 of 894,953, of whom 15,605 were whites. The illegitimate birth-rate in the island is very high, being 66·9 per 100 in 1915–16.

Jamaica was discovered by Columbus on May 3, 1494. He called it St. Jago, after the patron saint of Spain, but the new name was soon dropped in favour of the native one of Jamaica (Xaymacu—well watered). It remained in possession of the Spaniards for 161 years, when it capitulated in 1655, after a trifling resistance, to a force sent by Cromwell. Until the Restoration, Jamaica remained under military jurisdiction, but in 1660 a regular civil government was established, with an Elective Council. In 1670 the title to Jamaica was recognised by the Treaty of Madrid. During the 18th century the island suffered from hurricanes, earthquakes, numerous slave insurrections, as well as wars with the maroons, or mountaineers, the descendants of African slaves left by the Spaniards, who inhabited mainly the east of the island, among the Blue Mountains. When the slave trade was abolished, in 1807, there were 323,827 slaves in Jamaica. On the abolition of slavery in Jamaica, in 1833, Jamaica received £6,161,927 of the £20,000,000 granted by the Imperial Government as compensation to the slave owners. A serious rebellion among the black population in 1865 was suppressed by Governor Eyre with unnecessary violence, and he was recalled. In Jan. 1907 Kingston was devastated by a terrible earthquake, which caused great loss of life and immense

destruction of property. In 1916 the island again suffered great loss from the devastating effects of a hurricane, which almost destroyed the banana crop.

The island is very mountainous, the main ridge running east and west, with numerous subsidiary ridges, some parallel to the main ridge, others spreading out in a N.W. and S.E. direction from it, terminating in the famous Blue Mountains in the east, the highest peak being 7,388 ft. high. Upwards of a hundred rivers and streams find their way to the sea, but for the most part, having a very rapid fall, are not navigable.

The climate of Jamaica has a great variety: near the coast it is warm and humid, but that of the uplands is extremely mild and equable. The island is intersected by a system of excellent main roads (2,213 m. in length). There are 197¼ m. of railways. A line of inland telegraph (1,091½ m.) connects all the principal towns. Guinea-grass, which was accidentally introduced in 1750, grows to profusion and makes most valuable pasturage for horses and cattle, accordingly pen-keeping or cattle farming is very remunerative. There are forest trees fit for every purpose, including ballata, rosewood, satinwood, mahogany, lignum-vitæ, lancewood, and ebony. Sugar and rum are manufactured and exported; sugar is largely grown in Westmoreland and the seaward parts of St. James and Trelawney, where the best rum in the world is produced. Coffee is chiefly grown by small landowners on the limestone formation; other exports include oranges, cocoa, ginger, pimento, and dyewoods. Of the exports, 47% go to the United States and 38% to the United Kingdom; of the imports, 33% are sent by the United Kingdom and 54% by the United States. There is an Imperial garrison at Kingston; the naval station has been reduced to a *cadre*.

Elementary education is provided for from public funds; the number of schools is 696, with 63,926 scholars in average attendance. The Government includes a Governor, a Legislative Assembly of 29 members, 5 official, 10 nominated by the Crown, and 14 elected, and a consultative Privy Council.

CAPITAL: Kingston (pop. 59,314), the seat of government and the principal port; other towns are Spanish Town (7,119), the old capital; Montego Bay (6,616); Port Antonio (7,074), and Falmouth.

CAYMAN ISLANDS

The Cayman Islands, lying between 19° 16′ and 19° 45′ N. and 79° 38′ and 81° 30′ W. are dependencies of Jamaica. Grand and Little Cayman have an *area* of 55 sq. m., with a *pop.* of 5,564. They were discovered by Columbus in 1503, and were named by him Las Tortugas, on account of the turtle with which the coast was swarmed; the present name is supposed to be derived from "Caiman"—the alligator—which animal abounded on the islands of Cayman Brac and Little Cayman, and even now is frequently caught there; alligators were never seen on the largest island, Grand Cayman. Pedro Cays and Morant Cays, two guano islands, are uninhabited.

Commissioner, A. C. Robinson (*with residence and fees*) £300

TURKS AND CAICOS ISLANDS

The Turks and Caicos Islands, geographically the most south-eastern of the Bahamas, lie between 21° and 22° N. and 71° and 72° 37′ W. Their *area* is 169 sq. m., with a *pop.* of 5,930. The islands were discovered by John Ponce de Leon in 1512, but remained uninhabited till the end of the 17th century, when Grand Turk began to be annually visited by salt-rakers from Bermudas. In 1799 the islands were included, for purposes of government, in the Bahamas, but in 1848 were placed under the Governor of Jamaica. Salt-raking is the only industry of any importance, the export in 1915 being £22,667; sponges and sisal-hemp are also exported. The legislature consists of Legislative Board comprising the Commissioner and Judge, and not less than 2 nor more than 4 other persons appointed by the Governor of Jamaica. Taxation and expenditure and all local matters are regulated by this Board.

	1913	1914	1915
Revenue	£10,867	£9,051	£8,036
Expenditure	8,505	9,391	9,133
Imports	—	28,191	27,620
Exports	—	28,348	30,487

Commissioner and Acting Judge, G. Whitfield Smith. £500–600

TRINIDAD AND TOBAGO

Trinidad is an island of rectangular shape, separated from the mainland of Venezuela by the Gulf of Paria. It lies between 10° 3′ and 10° 50′ N. and 60° 55′ and 61° 56′ W. Its average length is about 69 m. and its average breadth 54 m. It has an *area* of 1,754 sq. m. The *pop.* of the whole colony in 1915 was 364,535. Trinidad was discovered by Columbus on his third voyage in 1498, but for many years the Spanish had the greatest difficulty in maintaining a footing in the island. It was visited by Sir Walter Raleigh in 1628, who signalised his visit by burning the newly founded town of St. Joseph. In 1640 it was raided by the Dutch, and again in 1677 and 1690 by the French. Towards the end of the 17th and the beginning of the 18th centuries cocoa was extensively and successfully planted, but a blight fell upon the plantations about 1725, and the island was stagnant until 1783. In that year, M. de St. Laurent, a French planter of Grenada, struck by the extraordinary fertility of the island, made representations at Madrid, which resulted in extraordinary advantages being offered to foreigners of all nations to settle in the island. These advantages caused a large influx of settlers, especially of French, driven from San Domingo and elsewhere through the events of the French Revolution, and the French element has predominated ever since. In 1797 the island surrendered to a British force and was finally ceded to England by the Treaty of Amiens.

The Government consists of a Governor, an Executive Council of 5 members, and a Legislature composed of the Governor, 10 official and 11 unofficial members, all appointed by the Crown.

Trinidad has several mineral springs and two mud volcanoes, but its most striking natural features are the Maracas Falls and the Pitch Lake. The Maracas Falls, situated to the north-east of Port of-Spain, have a drop over a sheer wall of rock 312 ft. high. The Pitch Lake, in the ward of La Brea, is circular in form, about 3 m. in circumference, and 104 acres in extent. Near the centre of the lake the pitch is always soft, and can be seen bubbling up in a liquid state. The lake is the property of the Crown, but is leased to the Trinidad Asphalt Company; the output in 1915 of asphalt was 113,646 tons, value £138,917; the revenue received by the Crown from export dues and royalty was over £45,000. The other principal products of the island are cocoa (export in 1915, £1,865,266), sugar (1915 export, £1,070,423), rum, coconuts, oil, fibre, Angostura and other bitters.

Oil.—The oil industry has made considerable progress. In 1916 there were ten companies actively engaged therein; the export of oil for 1915 was 14,113,855 galls., valued at £72,437. A fairly large quantity of petrol, as well as some kerosene, has been produced at two of the oil-field refineries, and the greater portion of this production is sold and consumed locally. One of the largest companies operating in the colony has erected a large refinery for the production of oil fuel according to Admiralty specification, as well as oil fuel for bunkering purposes, and for the use of sugar factories. There are 124 m. of railway. The total number of vessels entered and cleared in 1915 was 3,679, with a tonnage of 2,584,130. In 1915 41·6% of the trade was with the United States, and 38·6% with the United Kingdom.

CAPITAL: Port-of-Spain (pop. 59,796), which is considered one of the finest towns in the West Indies; it is in the north-west corner of the island, has the best harbour in the West Indies, good streets, abundant water-supply, and an excellent service of tramways. It has many fine public buildings and a famous botanical garden. Other towns are San Fernando (8,667), about 30 m. south of the capital, Princestown (4,497), and Arima (4,020).

Tobago was in 1889 separated from the Windward Islands and joined with Trinidad; in 1898 it was made a ward of the united colony of Trinidad and Tobago, the revenue, expenditure, and debt being merged in those of the united colony. It is 18 m. north-east of Trinidad, and has an *area* of 114 sq. m. with a *pop.* of 20,762. Scarborough (729) is the chief town. Cocoa, coconuts, copra, and live-stock are the principal articles of export. Vegetables, poultry, eggs, and fruit are produced in considerable quantities for sale in the Trinidad markets.

	1913–14	1914–15	1915–16

LEEWARD ISLANDS

The Leeward Islands are the westward section of the Lesser Antilles, and are so-called in contrast to the Windward Islands, which are exposed to the N.E. Trade, the prevailing wind in the West Indies. The Leeward Islands Confederation has representative government, with a Governor, Executive, and Federal Legislative Councils, though each presidency possesses its own constitution. The Legislative Council consists of 8 official and 8 elected members. There is an armed

(1) ANTIGUA (AND BARBUDA)

Antigua, the seat of the federal government, and residence of the Governor, is about 54 m. in circumference, has an *area* of 108 sq. m. with a *pop.* of 31,394. Antigua was first discovered by Columbus in 1493, who named it after a church in Seville, called Santa Maria La Antigua. It was first inhabited by a few English from St. Kitts in 1632. In 1663 Charles II made a grant of the island to Lord Willoughby, who sent out a large number of colonists. After an interval of French occupation, it was declared a British possession by the Treaty of Breda, 1666. There are no rivers and few springs in the island, consequently it is exposed to frequent droughts. There are no forests. The chief products are sugar, cotton, limes, and pine-apples. Much of the land has become ruinate in the hands of the old planting families. The Government is administered by the Governor of the Leeward Islands, and a Council, consisting of 8 official and 8 non-official members, all nominated by the Governor. Barbuda (area, 62 sq. m., pop. 871) is a dependency of Antigua. It exports sugar, cotton, limes, and onions. Another dependency is Redonda (pop. 4), which has valuable phosphate of alumina mines.

	1913–14	1914–15	1915–16
Revenue	£52,218	£53,517	£51,526

Magistrate, W. H. Whyham, I.S.O. . . 500
Supt. of Public Works, C. K. Stretch . 400

(2) ST. KITTS-NEVIS (WITH ANGUILLA)

The islands of St. Kitts (St. Christopher), Nevis, and Anguilla were united to form one presidency in 1882. They have combined an *area* of 150 sq. m. with a *pop.* of 43,303. There is an Administrator with an Executive Council, and a Legislative Council of 6 official and 6 unofficial members.

St. Kitts, the chief island, and the first settled of the British West Indies, lies in lat. 17° 18′ N. and long. 62° 48′ W. It has an *area* of 68 sq. m. with a *pop.* of 25,250. The climate, for a tropical one, is very healthy. The island is very fertile and is cultivated right up to the slopes of the mountains which form the central part of the island; these attain their greatest height in Mount Misery, 3,711 ft. above the sea. The higher slopes of the mountains are covered with short grass, affording excellent pasturage, while the summits have dense woods. Sugar and sugar products and cotton are the chief exports of the island. The *capital* is Basseterre, with a pop. of 8,519.

Nevis has an *area* of 50 sq. m. with a *pop.* of 7,424. Its capital is Charlestown (912). The island is simply a single cone-shaped mountain, surrounded by a margin of low lands.

Anguilla is about 60 m. N.W. of St. Kitts, and has an *area* of 35 sq. m. with a *pop.* of 2,513. It is low and flat, deficient in wood and water. It produces cotton, and salt from a lake; small stock are raised.

	1913–14	1914–15	1915–16
Revenue	£53,880	£50,337	£45,324

(3) DOMINICA

Dominica, a very mountainous and picturesque island, the largest of the group, is situated between 15° 10′ and 15° 40′ N. and 61° 14′ and 61° 30′ W. It is 29 m. long and 16 broad, has an *area* of 304 sq. m. with a *pop.* of 33,863. Dominica was discovered by Columbus on Sunday (hence its name), Nov. 3, 1493, during his second voyage. It was captured by the English in 1756, but has been several times stormed and captured by the French. The island abounds in rivers, with fish in some, and there is a plentiful supply of water-power. There are many thermal, chalybeate, sulphur, and other medicinal springs. The climate is healthy and the soil rich, and well adapted to the cultivation of coffee. Cocoa, citrate of lime, lime-juice, coffee, fruits, and spices are the chief products. Two-thirds of the people speak a French patois, but the use of English is increasing. The Council consists of 12 members, 6 official and 6 non-official, all nominated by the Governor.

CAPITAL: Roseau (pop. 8,941); the other town is Portsmouth.

(4) MONTSERRAT

Montserrat is situated 27 m. from Antigua in 16° 45′ N. and 61° W., and is about 11 m. in length and 7 m. in the broadest part. It has an *area* of 32 sq. m. with a *pop.* of 12,196. It was named after a famous monastery in Spain by Columbus, who discovered it in 1493. It is of volcanic formation, and very rugged and mountainous. The cultivation of sugar, once the staple of the island, has almost disappeared, and lime-juice and cotton, which latter is being grown with favourable results, are now the chief exports. A fruit-preserving industry has been established, exporting considerable quantities of Guava preserves, pickles, chutnees, hot sauce, etc. The island is considered to be the most healthy of the Antilles. It has a nominated Executive Council, and a Legislative Council of 6 members.

(5) THE VIRGIN ISLANDS

The Virgin Islands lie immediately to the eastward of Porto Rico. Of the principal islands Denmark possesses Santa Cruz, St. Thomas, and St. John; and England owns Tortola, Virgin Gorda, and Anegada. The latter, with a number of smaller islands, form a Presidency, under a Commissioner. The total *area*, embracing in all about 32 islands, is 58 sq. m. with a *pop.* of 5,562. Sugar, cotton, and limes are cultivated, and a few cattle raised.

Commissioner and Treasurer, T. L. H. Jarvis £350

WINDWARD ISLANDS

The Windward Islands—comprising the three separate colonies of Grenada, St. Vincent, and St. Lucia—so called in distinction from the Leeward Islands, with reference to the trade winds, form part of the Lesser Antilles. The total *area* of the three colonies is about 524 sq. m., and the total *pop.* about 183,000. All the islands are, for administrative purposes, under one Governor and Commander-in-Chief, but each has its own administration and separate institutions. There is no common legislature, laws, revenue, or tariff; but there is a common Court of Appeal, consisting of the Chief Justices of the islands and of Barbados.

* On active service.

Governor and Commander-in-Chief, His Excellency Sir George Basil Haddon-Smith, K.C.M.G. £2,500
Private Sec. and A.D.C. C. N. Rice . . 200

GRENADA (AND THE GRENADINES)

Grenada, the most southerly, is situated between the parallels of 12° 30′ and 11° 58′ N. and 61° 20′ and 61° 35′ W., and is about 21 m. in length, 12 m. in its greatest breadth, and has an *area* of about 133 sq. m. with a *pop.* of 71,082. Grenada is mountainous and very picturesque, its ridges of hills being covered with trees and brushwood. The Grand Etang, a lake on the summit of a mountain ridge, is a great natural curiosity. The climate in the dry season is delightful, but in the wet season damp and hot. The chief products are cocoa (export, 1915, £402,394), nutmegs, mace, and various other spices. The forests produce valuable timber, such as bullet-wood, locust, mahogany, white cedar, galba, etc. The main imports are foodstuffs, textiles, timber for building purposes, and hardware.

CAPITAL: St. George (4,916).

	1913–14	1914–15	1915–16

Registrar, D. J. Garraway . . . 300
Postmaster, Gerald Smith . . . 250
Colonial Surgeon, E. F. Hatton, M.D. . 500

The *Grenadines* are a chain of small islands lying between Grenada and St. Vincent, some of which are subordinate to Grenada and some to St. Vincent. *Area*, 25 sq. m. The largest is Carriacou, with an area of 10 sq. m. and a pop. of 6,880. Cotton and limes are being successfully grown.

ST. LUCIA

St. Lucia is the most northerly and the largest of the three islands, situated 13° 50′ N. and 60° 58′ W.; it is 24 m. in length and 12 m. at its greatest breadth. Its *area* is 234 sq. m. with a *pop.* of 52,282. The island has an interesting history. Discovered by Columbus on his fourth voyage in 1502, it remained in the possession of its inhabitants, the Caribs, until 1635, when it was taken possession of by the French. From thence onward it was the scene of continuous struggles between the French and English, between whom it continuously changed hands. It has

The New HAZELL, 1917

been in possession of England since 1803. The scenery of the island is exceptionally beautiful. The whites are mostly French Creoles; the dominant religion is Roman Catholic, and education chiefly so; the civil law is based on old French codes. Sugar, cocoa, logwood, and spices are the chief products; the establishment of a Government lime-juice factory has given great impetus to the cultivation of the lime, and the exports are increasing rapidly. Government is in the hands of an Administrator with a nominated Executive and Legislative Council.

CAPITAL: Castries (pop. 6,266), the harbour being one of the best in the West Indies, for which it is the chief coaling-station and naval base.

	1913–14	1914–15	1915–16

ST. VINCENT

St. Vincent lies about 21 m. S.W. of St. Lucia and about 100 m. W. of Barbados. It is 18 m. in length, 11 m. in breadth, and has an *area* of 150⅓ sq. m. with a *pop.* in 1916 of 48,251. The Caribs, the original inhabitants, were transported from the island in 1797. In 1846 a number of Portuguese labourers emigrated to the island; they amounted in a few years to 2,400, and have proved a valuable addition to the general population of the island.

The chief exports are arrowroot of most excellent quality, cotton, cocoa, live-stock and poultry, fruit and vegetables. The fisheries are abundantly productive. The Government includes an Administrator and a Legislative and Executive Councils nominated by the Crown.

CAPITAL: Kingstown (pop. 4,300).

PHYSIOGRAPHY

The Australian Commonwealth, which includes the island continent of Australia proper and the island of Tasmania, is situated in the Southern Hemisphere, and comprises in all an *area* of about 2,974,581 sq. m., the mainland alone containing about 2,948,366 sq. m. Bounded on the W. and E. by the Indian and Pacific Oceans respectively, it lies between long. 113° 9′ E. and 153° 39′ E., while its northern and southern limits are the parallels of lat. 10° 41′ S. and 39° 8′ S., or, including Tasmania, 43° 39′ S. On its north are the Timor and Arafura Seas and Torres Strait, on its south the Southern Ocean and Bass Strait.

The continent of Australia is a large plateau, fringed by a low-lying, well-watered coast, particularly on the eastern side. No less than 1,149,320 sq. m. belong to the tropical zone, and 1,020,720 to the temperate zone. On the coast the rainfall is often abundant and the atmosphere moist, but in some portions of the interior the rainfall is very limited and the atmosphere dry. The distribution of forest, and its climatic influences, are very variable. In the interior there are, on the one hand, fine belts of trees, and on the other there are large areas which are treeless, and where the air is hot and parched in summer. The interior of the continent, particularly that portion usually termed the Australian Steppes, is characterised by flat and terraced hills, capped by desert sandstone, with stone-covered flats stretching over long distances; in some places it is actually below sea-level. The only important mountain range is that of the Great Dividing Range, extending along the east coast, attaining a maximum of height in Mounts Kosciusco and Townsend, 7,328 and 7,260 ft. respectively. With the exception of the country round the Great Australian Bight and Spencer Gulf the country is all well-watered by rivers. The principal are the Murray, with its tributaries, the Murrumbidgee, Lachlan, and Darling on the south coast—the Darling, with the Murray, has 2,345 m. of navigable water; on the east there are the Burdekin, Fitzroy, Brisbane, Hunter, Richmond, Clarence, Macleay, Hastings, Manning, Hunter, Hawkesbury, and Shoalhaven; on the west are the Swan, Greenough, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, Fitzroy, Panton, and Ord; in the north there are several fine rivers including the Victoria, Daly, Adelaide, Alligator, and Roper.

GOVERNMENT

The **Constitution of the Commonwealth** is contained in the Commonwealth of Australia Constitution Act, 1900. A **Governor-General,** with a salary of £10,000 per annum, represents the King. The **Senate** consists of 36 members, six for each Original State, directly chosen by the people of the State voting as one electorate (though Queensland has power to divide the State into divisions) for a term of six years. The Senate cannot originate or amend Bills appropriating revenue or moneys or imposing

taxation, but, with this exception, has equal power with the House of Representatives. If the Senate thrice rejects a Bill passed by the House of Representatives, or insists on passing it with amendments to which the other House will not agree, the Governor-General may dissolve the Senate and the House of Representatives. In the event of disagreement after the dissolution, the Governor-General has power to convene a joint sitting of the members of the two Houses, to vote together and decide the point or points at issue. The **House of Representatives** consists of 75 members directly elected for three years by the people of the Commonwealth, the number of members being, as nearly as practicable, twice the number of senators. New South Wales has 27 members; Victoria, 21; Queensland, 10; South Australia, 7; Western Australia, 5; and Tasmania, 5. Senators and members of the House of Representatives receive an allowance of £600 a year. The Federal Parliament has power to make laws for trade, taxation, bounties, borrowing, postal services, naval and military matters, currency, banking, divorce, marriage, old age pensions, immigration and emigration, etc. No amendment of the Constitution can be effected unless the amending Bill, after passing both Houses of Parliament by an absolute majority, has been submitted to a **Referendum** and approved both by a majority of all the electors of the Commonwealth and a majority of electors in a majority of States. The **State Parliaments** retain legislative authority in regard to all matters not transferred to the Federal Parliament. **State Governors** are still appointed by the Crown, and they still correspond on State business directly with the Secretary of State for the Colonies, the Governor-General being kept informed. When a proposed law is passed by both Houses of Parliament, the Governor-General may assent, withhold assent, reserve the law for the King's pleasure, or return it to the House in which it originated, with any amendments which he may recommend, and the Houses may deal with the recommendation. The King may disallow any law within one year from the Governor-General's assent, and such disallowance shall annul the law from the day when the disallowance is made known. A measure reserved for the King's pleasure is not to have any force unless and until, within two years from the day on which it was presented to the Governor-General, the Governor-General makes known that it has received the King's assent.

The **executive power of the Commonwealth** is vested in the Governor-General, with an Executive Council of 7 Ministers, whose salaries may not exceed, in all, £12,000 per annum. The **judicial power** is exercised by a Federal Supreme Court, called the High Court of Australia, and other Courts vested with Federal jurisdiction. **Trade, commerce, and intercourse among the States** are absolutely free. The Commonwealth makes uniform customs and excise duties. Under what was known as the Braddon Clause, which was in force for the first ten years of the Commonwealth, not more than one-fourth of the customs and excise duties could be applied by the Federal Government to meet its expenditure, the remaining three-fourths being shared among the States. This arrangement was replaced in 1910 by another, also made for ten years, under which each of the States except Western Australia takes a payment of 25*s.* per head of its population instead of a share of three-fourths of the Federal duties. Western Australia, in view of her special circumstances, receives an annual sum which, beginning in 1910 at £250,000, is diminished each year by £10,000.

**Governor-General*, His Excel. Rt. Hon. Sir Ronald Crauford Munro-Ferguson, P.C., G.C.M.G. £10,000.

FEDERAL FINANCE

The Revenue and Expenditure of the Commonwealth for the years 1911–12 to 1914–15 are as follows:

Years.	Revenue.	Expenditure.	Contribution to States.
	£	£	£
1911–12	20,548,520	14,299,599	5,824,423
1912–13	21,907,084	15,405,522	6,119,930
1913–14	21,740,423	16,878,328	6,282,999
1914–15	†22,419,798	31,684,188	6,363,775
1915–16*	†28,490,600	63,084,091	6,346,995

* Estimates.

† The Revenue was augmented by loans of £16,529,320 in 1914–15, and of £60,601,560 in 1915–16.

The Estimated Revenue and Expenditure for 1915–16 was made up as follows:

Estimated Revenue.		Estimated Expenditure.	
Customs	£18,200,000	Treasury	£4,015,935
Excise	3,000,000	External Affairs	783,736
Land Tax	1,900,000	Defence	49,729,975
Probate and Succession Duties	500,000	Trade and Customs	834,299
Income Tax	3,200,000	Post Office	6,448,263
Post Office	5,000,000	Home Affairs	798,066
Coinage	335,000	Contribution to States	6,346,995
Other receipts	1,355,600	Miscellaneous	447,879

DEBT

The first portion of the Commonwealth Debt was contracted at the beginning of 1911, when the Federal Government assumed responsibility for the outstanding liabilities of the Northern Territory and the Port Augusta—Oodnadatta Railway. The total Commonwealth Debt, including above, properties transferred from States, and War Loans incurred, was on March 1, 1916:

Commonwealth Inscribed Stock (3½%)	£4,580,000
4½% War Loan	35,045,020
Treasury Bills	4,290,719
War Loan from British Government	29,978,416
South Australian Debt transferred	4,690,034
Properties transferred from States	10,777,161
Total	89,361,350

The total net debt of the States on June 30, 1915, was £334,575,234, representing a sum of £67.11.5 per head.

PRODUCTION AND INDUSTRY

The estimated value of the products of the Commonwealth in 1912 and 1913 was:

	1912	1913
Agricultural	£45,754,000	£46,260,000
Pastoral	51,615,000	57,866,000
Dairying, Poultry, etc.	20,280,000	20,341,000
Forestry and Fisheries	6,432,000	6,338,000
Mining	25,629,000	25,808,000
Manufacturing	57,022,000	61,586,000

Agriculture and Live Stock.—Of the total area of the Commonwealth 15,651,974 acres were under crops in 1914–15. The following table shows the areas and yield of the various crops in 1914–15:

Crop	Acreage	Yield
Wheat	9,651,081	*bush.* 24,892,402
Oats	774,734	,, 4,341,104
Maize	339,781	,, 8,455,561
Hay	2,628,613	*tons* 1,733,944
Sugar-cane	172,616	,, 2,104,239

Live-stock

	1913	1914
Sheep	85,057,402	78,600,334
Cattle	11,483,882	11,051,573
Horses	2,522,776	2,521,272
Pigs	800,505	862,447

In 1915 the Commonwealth produced 641,786,519 lb. of wool (as in the grease), compared with 711,134,203 lb. in 1914 and 648,851,913 lb. in 1913; 193,970,412 lb. of butter in 1914, as against 198,758,238 lb. in 1913; 21,240,411 lb. of cheese as against 19,743,415 lb. in 1913; 52,574,902 lb. of bacon and hams against 52,673,688 lb. in 1913.

Mines and Minerals.—In 1914 the value of gold produced was £8,729,947; of silver and lead £3,818,076; of copper £2,349,881; of tin £758,431; of coal £4,619,689; the value of all minerals produced in 1914 was £22,264,589.

The New HAZELL, 1917

Manufactures.—In 1914 there were in the Commonwealth 15,430 establishments, employing 331,562 hands; the salaries and wages paid were £34,082,334; the value of plant, machinery, land, and buildings £80,961,915; the value of materials used £99,719,007; the value added by manufacture, £66,831,384 and the value of the output £166,550,391.

TRADE

The Imports and Exports of the Commonwealth for the years 1909–1914–15:

Year.	Imports.	Exports.	Total.
	£	£	£
1909 . .	51,171,896	65,318,836	116,490,732
1910 . .	60,014,351	74,491,150	134,505,501
1911 . .	66,967,488	79,482,258	146,449,746
1912 . .	78,158,600	79,096,090	157.254,690
1913 . .	79,749,653	78,571,769	159,321,422
1914 * . .	38,777,497	37,930,087	77,707,584
1914–15 † .	64 431,837	60,592,576	125,024,413

* First six months only.

† Statistics regarding trade are now compiled so as to make the trading and financial years coincide.

The share of the States in the trade of 1914–15 was as follows:

State.	Imports.*	Exports.†
New South Wales .	£27,323,189	£28,107,025
Victoria . .	21,050,310	12,357,334
Queensland . .	6,428,688	13,015,484
South Australia .	4,748,489	3,566,335
Western Australia .	3,986,198	3,120,798
Tasmania . .	811,255	420,007
Northern Territory .	83,708	13,319
	£64,431,837	£60,592,576

* Exclusive of Australian warships, but inclusive of specie and bullion.

† Inclusive of specie and bullion, £2,907,666.

The principal imports of *competitive* merchandise for the year 1914–15 were:

Metals, manuf. .	£9,441,123	Food-stuffs, animal origin . .	£948,368
machinery .	3,806,100	Leather & manuf.	489,787
misc. manuf. .	2,886,608	Indiarubber and manuf. .	481,811
bar, rods, blooms pig and ingot .	933,594 258,167	Ammunition and explosives .	608,146
Textiles . .	11,186,969	Chemicals, pharmaceutical .	802,389
Apparel . .	4,614,108	Industrial .	622,314
Paper . .	1,703,298	fertilisers .	99,719
Stationery, books, etc. . .	1,009,346	Paints & varnishes	609,813
Jewellery, etc. .	884,608	Instruments—scientific, surgical, &c.	543,463
Spirits . .	1,342,965	Oils, fats, waxes	331,026
Earthenware .	1,208,186	Miscellaneous .	1,830,466
Food-stuffs, vegetable origin .	888,406		

Exports.—The principal exports include wool, wheat, skins and hides, butter, copper and zinc, mutton and lamb, flour, coal, and beef. The export of wool in 1914–15 was greasy £17,462,764; scoured £4,625,545. As the Government controlled the export of the principal food-stuffs and acquired the 1915 crop of sugar, it is not possible to give figures which would convey with accuracy the incidence of exports.

COMMUNICATIONS

The total length of Government railways open at June 30, 1915, was:

	Miles open.
Commonwealth . . .	1,193
New South Wales . . .	4,134
Victoria . . .	3,875
Queensland . . .	4,838
South Australia . . .	2,157
Western Australia . . .	3,332
Tasmania . . .	533
	20,062

There are, in addition, some 2,055 of private lines. The gross earnings of all Government railways in 1914–15 were £20,966,059, working expenses £15,409,121, and net earnings £5,556,938, being at the rate of 1*s.* 10*d.* per train mile, and representing a return on the total cost (£195,545,000) of 2·84% as compared with 3·87% in 1913–14.

Shipping.—The Commonwealth now owns a "Commonwealth Government Line" for cargo only. The *General Manager* is H. B. G. Larkin; *temporary offices*, 72 Victoria Street, London, S.W.; *Brokers*, Turner, Davidson & Co., 1 Fenchurch Street, London, E.C. The number and net tonnage of vessels registered in the Commonwealth in 1914 was sailing 1,632 (tonnage 120,532), steam 1,165 (tonnage 329,105), a total of 2,797 vessels with a tonnage of 449,637. Of vessels engaged in oversea trade, the entrances and clearances, with tonnages in brackets, was:

	Entered.	Cleared.
1910 .	1,988 (4,607,820)	2,060 (4,725,326)
1911 .	2,081 (4,993,220)	2,093 (4,991,581)
1912 .	2,035 (5,163,357)	2,017 (5,111,957)
1913 .	2,014 (5,371,531)	1,971 (5,230,417)
1914–15 .	1,568 (4,174,955)	1,643 (4,424,303)

Posts and Telegraphs.—In 1914 there were 8,409 post and receiving offices, dealing with 520,518,000 letters and postcards, 136,200,000 newspapers, etc., and 4,286,000 parcels; there were 4,624 telegraph offices, with 108,931 miles of wire, dealing with 17,000,000 cablegrams and telegrams.

The following statement shows the relative position of the United Kingdom, United States of America, and Germany in competitive trade since 1909:

Year.	Total Imports of competitive merchandise.	United Kingdom.		United States of America.		Germany.	
	£	£	%	£	%	£	%
1909 . .	40,417,636	25,710,964	63·61	4,135,005	10·23	4,464,222	11·05
1910 . .	47,145,514	29,905,531	63·43	4,994,045	10·59	4,515,487	9·58
1911 . .	52,295,529	32,140,488	61·45	6,036,285	11·54	6,275,478	11·99
1912 . .	61,230,761	38,317,485	62·58	7,199,669	11·76	6,992,317	11·42

1914–15 . .	48,867,011	31,732,974	64·90	7,430,170	15·20	—	—

* First six months only.

The New HAZELL, 1917

TOWNS

CAPITAL.—At present Parliament sits at Melbourne, but the construction of the Federal Capital at Canberra, in New South Wales, is proceeding apace. The following are the larger towns in the Commonwealth:

Towns.	Pop.	Towns.	Pop.
Sydney (N.S.W.)	725,400	Hobart (Tas.)	39,107
Melbourne (Vic.)	651,000	Broken Hill (N.S.W.)	30,972
Adelaide (S.A.)	196,567	Geelong (Vic.)	28,900
Brisbane (Q.)	154,000	Charters Towers (Q.)	26,000
Perth (W.A.)	106,792	Launceston (Tas.)	21,602
Newcastle (N.S.W.)	65,500	Ipswich (Q.)	21,000
Ballarat (Vic.)	44,000	Rockhampton (Q.)	20,500
Bendigo (Vic.)	42,000	Fremantle (W.A.)	20,000

INVALID AND OLD AGE PENSIONS

Invalid and old age pensions are granted to an amount not exceeding £26, or so that the pensioners whole income shall not exceed £52 a year. The number of invalid and old age pensions at March 31, 1916, was 114,380, and the aggregate annual payment was £2,886,416. Maternity allowances of £5 on the birth of each child are allowed; the claims passed for payment in 1915–16 were 33,250.

Constituent States

(1) NEW SOUTH WALES

The State of New South Wales lies on the eastern coast of Australia between the 29th and 36th parallels of south latitude and between the 141st and 154th meridians of each longitude, and comprises an *area* of 310,367 sq. m. (inclusive of the Federal Capital area at Yass-Canberra—900 sq. m.), being a little over two and a half times that of Great Britain and Ireland. The State was founded in 1788, but has been established within its present boundaries since 1859, when Queensland was separated from it.

POPULATION

Year.	Males.	Females.	Total.
1871	275,551	228,430	503,981
1881	411,149	340,319	751,468
1891	612,562	519,672	1,132,234
1901	712,456	646,677	1,359,133
1911	858,850	789,896	1,648,746
1915	951,389	917,259	1,868,648

Year.	Births.	Deaths.	Marriages.
1912	51,861	18,862	16,666
1913	52,186	19,699	16,307
1914	53,641	16,720	17,357
1915	52,931	19,585	18,095

RELIGIONS

There is no State aid to religion. The principal denominations at the Census of 1911 were:

Church of England	734,000	Presbyterian	182,911
Roman Catholic	412,013	Methodist	151,274

GOVERNMENT

The first Legislative Council dates from 1824; it was greatly enlarged and made chiefly elective in 1842. Responsible government was established in 1855. The Governor is appointed by the Crown. The upper house, or Legislative Council, consists at present of 53 members (the number is unlimited, but is not to be less than 21) appointed by the Governor for life. The lower house, or Legislative Assembly, is composed of 90 members elected triennially on a basis of adult suffrage. Every person above twenty-one, having resided for one year in the State and for three months in an electoral district, possesses a vote. The elections take place all on the same day. Members are paid the sum of £500 a year, the Leader of the Opposition receiving £250 extra. For local government purposes the State recognises 79 boroughs and 113 municipal districts, besides Sydney.

Governor of New South Wales, His Excellency Sir Gerald Strickland, G.C.M.G. (*b.* 1861, *app.* 1913) £5,000
Private Sec. B.-Gen. H. Finn, C.B.
A.D.C.'s. Capt. A. W. M. d'Apico, Lt. G. F. Hughes.
Official Sec. H. C. Budge.
Lieutenant-Governor, Hon. Sir W. P. Cullen, K.C.M.G.

AGRICULTURE

Under-Secretary, G. Valder . . . £1,000

WATER CONSERVATION AND IRRIGATION COMMISSION

Commissioner, H. H. Dare (*actg.*) . . £1,250
Manager, J. B. Broatch 1,000

LABOUR AND INDUSTRY

Under-Secretary, J. B. Holme, B.A., LL.B. . £880

Education.—Education is compulsory between the ages of six and fourteen, and is also free; fees in State primary and superior schools having been abolished in 1906, and in high schools in 1910. There were, in 1915, 3,258 State schools, with a total enrolment of 258,562, and an average daily attendance of 190,194. The State expenditure on education, science, and art in 1915 was £1,721,441. The University of Sydney, to which 4 colleges (Anglican, Roman Catholic, Presbyterian, and one unsectarian for women) are affiliated, was established and endowed by the State in 1850. In addition to the State schools, there are 717 private schools, with 79,647 pupils.

FINANCE

The Revenue and Expenditure and Public Debt of New South Wales for years ending June 30 are as follows:

Year.	Net Revenue.	Total Exp'nditure	Public Debt.
	£	£	£
1910–11 .	13,839,139	13,807,538	95,523,926
1911–12 .	15,776,816	15,277,001	100,052,635
1912–13 .	16,057,298	16,798,500	106,170,747
1913–14 .	18,298,625	17,701,851	116,695,031
1914–15 .	18,928,464	17,928,193	127,735,405

PRODUCTION AND INDUSTRY

Agriculture is a leading industry of the State; in 1914–15 there were 4,568,841 acres under crops, with a total yield of 12,830,530 bush. of wheat in 1914–15, 4,453,309 bush. of maize, 1,835,406 bush. of oats, 185,970 tons of sugar-cane, 955,047 tons of hay, 561,100 gall. of wine, and 106,849 tons of potatoes, the total value of agricultural produce being £12,377,650. The crop of wheat in 1915–16 totalled no less than 67,323,390 bush. The cultivation of fruit does not receive much attention, although the soil and climate of large areas throughout the States are well adapted to fruit-growing. In the vicinity of Sydney, oranges, peaches, plums, and passion-fruit are most generally planted; on the tableland, apples, pears, apricots, and all fruits from cool and temperate climates thrive well; in the west and south-west, figs, almonds, and raisin-grapes can be cultivated, and in the north coast district pineapples, bananas, and other tropical fruits grow excellently. In the neighbourhood of the metropolis the cultivation of citrus fruits has been undertaken largely. The total amount of land alienated and in process of alienation in 1915 was 58,011,213 acres; the total land occupied under leases of various kinds was 121,837,047 acres.

There is a State trawling industry which supplies fish to the public at prices much lower than those previously prevailing; a scheme is on foot for the State supply of fruit, vegetables, and other primary necessaries, and a State bread trust is being initiated.

Live-stock.—The suitability of New South Wales for grazing has led to the introduction of sheep-farming on an extensive scale; many celebrated breeds have been introduced from outside, and the wool from all has been improved under the influence of the climate. In 1914 there were 32,874,359 sheep, 2,472,631 cattle, 731,735 horses, and 286,478 pigs. Camels, which are used as carriers in the Western Plains, numbered 1,792. In 1915 318,935,000 lb. of wool (as in the grease) were produced, in addition to 795,020 cwt. of tallow, 77,779,197 lb. of butter, 6,620,648 lb. of cheese, and 15,192,263 lb. of bacon and hams.

Minerals.—The goldfields of New South Wales were discovered in 1851. Since that date £61,190,551 worth of gold has been produced, the output for 1915 being £562,819; the production of silver and lead was £2,631,662, of copper £234,437, of tin £266,780, of coal £3,424,630; the total value of all minerals being £10,064,569 in 1915. Other minerals found are tungsten, platinum, molybdenite, antimony, bismuth, and chrome. There are oil shales of small extent, and diamonds and opals are also found.

There are 4,134 m. of Government railway open, the net earnings being £2,332,421; the passengers carried numbering 86,328,421.

TOWNS

CAPITAL: Sydney, on Port Jackson (pop. 752,500); other towns are Newcastle (58,650), Broken Hill (30,500), Parramatta (12,600), Maitland (11,850), Gaulburn (10,100), Granville (10,500), Lithgow (8,900), Bathurst (8,650), Auburn (10,100), Lismore (8,250).

DEPENDENCIES

NORFOLK ISLAND, the principal of three small islands lying 900 m. E.N.E. of Sydney, with an *area* of 12 sq. m. and a *pop.* of 985, was formerly under the control of New South Wales, but on July 1, 1914, was made a territory of the Commonwealth. The office of the administration is the Department of External Affairs. Communication is maintained every 5 weeks by steamer from Sydney. It is a station of the Pacific Cable Board. The village is Kingston.

LORD HOWE ISLAND, lying 436 m. N.E. of Sydney, is now the only dependency. It is administered by a visiting magistrate from Sydney.

(2) VICTORIA

Victoria is the smallest and southernmost of the States; it is situated at the south-east of the continent, and lies between the 34th and 39th parallels of south lat., and the 141st and 150th meridians of east long. Its extreme length from east to west is about 490 m. and its greatest breadth about 300 m. Its extent of coast-line is nearly 700 m. Its *area* is 87,844 sq. m. or 56,245,760 acres (nearly equal to Great Britain).

POPULATION

Year.	Males.	Females.	Total.
1912 .	689,825	690,736	1,380,561
1913 .	706,948	705,171	1,412,119
1914 .	712,594	718,073	1,430,667
1915 .	692,275	725,526	1,417,801

The New HAZELL, 1917

VITAL STATISTICS

Year.	Births.	Deaths.	Marriages.
1912	35,796	16,589	11,783
1913	35,970	15,474	11,324
1914	36,222	18,503	11,829
1915	35,009	15,823	18,095

PHYSIOGRAPHY

Climate.—From its geographical position, Victoria enjoys a climate more suitable to the European constitution than any other State in Australia. The weather is never oppressively hot, except at intervals during the summer, when hot northerly winds blow. Over a series of years the mean temperature was 57·4°. Upon the average, the thermometer rises on four days during the year above 100° in the shade, and, generally, on about three nights in the year, it falls below freezing point.

Physical Geography.—Victoria is roughly triangular; the highlands also form a triangle, and this area of high land attains its greatest elevation in the east, and gradually sinks towards the west. There are thus constituted two main drainage areas. A series of rivers flows northwards from the highlands, forming the Murray and its southern tributaries, while another series flows southwards to the sea. The water parting between the two is spoken of as the Main Dividing Range.

GOVERNMENT

The Executive is vested in the Governor and a responsible Ministry. There are two Houses of Parliament. The Legislative Council consists of 34 members, elected for six years by male citizens possessing freehold property worth £10 per annum or leasehold with tenure of at least five years, worth £15 per annum, or occupying as tenant property of the same annual value, unless possessed of educational qualification. The Legislative Assembly of 65 members is elected triennally by ratepaying qualification or adult-suffrage. Members of the Lower House are paid £300 a year. For local government the colony is divided into 61 urban and 146 rural municipalities, each with an elective Council.

GOVERNOR

Governor, Hon. Sir Arthur Lyulph Stanley, K.C.M.G. (*b.* 1875, *app.* 1914)	£5,000
Private Sec. Hon. V. A. N. Hood, C.M.G.	
A.D.C. Capt. N. C. P. Conant.	
Official Secretary, F. W. Mabbott.	
Lieutenant-Governor, Hon. Sir John Madden, G.C.M.G. (*b.* 1844, *app.* 1899).	

MINISTRY

Premier and Treasurer, Hon. Sir A. J. Peacock, K.C.M.G.	£1,200
Chief Sec. and Minister of Labour, Hon. J. Murray	1,200
Attorney-General, Solicitor-Gen. and Minister of Railways, Hon. D. Mackinnon	1,000
Minister of Mines, Forests, and Health, Hon. J. D. Brown	1,000
Minister of Public Instruction, Hon. T. Livingstone	1,000
Commissioner of Public Works, Hon. F. W. Hagelthorn	1,000
Minister of Water Supply and Agriculture, Hon. W. Hutchinson	1,000
Commissioner of Crown Lands and Survey, Hon. H. A. W. Lawson	£1,000
Honorary Ministers, Hons. J. G. Membrey, J. Gray, W. A. Adamson, W. L. Baillieu.	

Secretary to Premier, F. T. Short	£67
Clerk of the Executive Council, F. W. Mabbott	48

Clerk of the Legislative Council, R. W. V. McCall	£1,000
Clerk Assistant, H. H. Pearson	65
Clerk of the Parliaments and Clerk of the Legislative Assembly, H. H. Newton	1,000
Clerk Assistant, W. R. Alexander	70
Public Service Commissioner, G. C. Morrison	1,000
Secretary to ditto, J. D. Merson	65
Auditor-General, F. H. Bruford	1,000

CHIEF SECRETARY'S DEPARTMENT

Under-Secretary, W. A. Callaway	£1,000
Chief Clerk, H. E. Macdowell	62
Government Statist, A. M. Laughton	65
Chief Commissioner of Police, A. G. Sainsbury	90
Govt. Medical Off. J. A. O'Brien	1,000
Insp.-Gen. of the Insane, Dr. W. E. Jones	1,500

LAW DEPARTMENT

Chief Justice, Sir John Madden, G.C.M.G.	£3,500
Puisne Judges, Sir T. à Beckett, H. E. A. Hodges, J. H. Hood, each £3,000; L. F. B. Cussen	2,500

ATTORNEY-GENERAL'S DEPARTMENT

Sec. to Law Department, W. R. Anderson	£900
Parliamentary Draftsman, J. T. Collins	1,100
Crown Solicitor, E. J. D. Guinness	1,100
Prothonotary, D. F. McGrath	65
Master in Equity, T. P. Webb	1,500
Chief Clerk of Judicature, G. H. Neighbour	1,200
Commissioner of Titles, W. C. Guest	1,000

Under-Treasurer, M. A. Minogue	£1,000
Secretary for Lands, J. M. Reed	900
Director of Agriculture, Dr. S. S. Cameron	900
Beet Sugar Expert, G. S. Dyer	1,000
Secretary of Public Works, E. T. Drake	900
Secretary of Mines, W. Dickson	900
Director of Education, F. Tate	1,000

VICTORIAN RAILWAYS

Chief Commissioner, C. E. Norman	£2,500
Commissioners, L. J. McClelland, E. B. Jones each	1,750
Secretary, G. H. Sutton	850
Chief Engineer for Ry. Construction, M. E. Kernot	1,000
Chief Engineer of Ways and Works, J. H. Fraser	1,000

MELBOURNE AND METROPOLITAN BOARD OF WORKS

Chairman, W. J. C. Riddell	£1,500
Secretary, G. A. Gibbs	1,200
Engineer-in-Chief, C. E. Oliver	1,100

STATE RIVERS AND WATER SUPPLY COMMISSION

Chairman, W. Cattanach	£1,000

LONDON AGENCY

Agent-General in the U.K. Hon. Sir Peter McBride	
Secretary, H. G. W. Neale.	
Offices, Melbourne Place, Strand, London, W.C.	

The New HAZELL, 1917

Education and Religion

Public education is secular, compulsory, and free between the ages of six and fourteen. There are 2,175 State schools with 5,710 teachers, a total enrolment of 246,447, and an average attendance of 158,213 or 64%. Secondary is for the most part conducted either by private persons or proprietary bodies. There is a State-aided University at Melbourne, with three affiliated colleges. Religion is not State-aided. The principal denominations are Episcopalians, 475,203; Presbyterians, 234,553; Methodists, 176,662; other Protestants, 93,729; Roman Catholics, 286,433; Jews, 6,270.

Finance

The Revenue and Expenditure and State Debt are as follows:

Year.	Revenue.	Exp'nditure.	Debt.
	£	£	£
1912 .	10,181,840	10,171,386	57,983,764
1913 .	10,508,945	10,479,741	60,737,216
1914 .	10,958,037	10,944,718	62,776,724
1915 .	10,248,761	11,444,231	66,130,726
1916 .	11,244,382	11,477,602	73,083,927

Banking.—There were (Dec. 31, 1915) 16 banks of issue, with total assets £52,696,157 within the State, and liabilities £51,457,746. The savings bank deposits at Sept. 30, 1915, amounted to £24,533,097.

Production and Industry

Agriculture.—Of the 5,969,304 acres under cultivation in 1914–15 2,863,535 were under wheat, producing 3,940,947 bush. (the 1915–16 crop is estimated at no less than 58,521,706 bush.), 435,815 were under oats, producing 1,608,000 bush., and 895,755 were under hay, producing 569,000 tons. The yield of wine was 605,636 galls.

Live Stock.—There were in 1915 552,053 horses, 1,362,542 cattle, 12,051,685 sheep, and 243,196 pigs. The wool produced was 95,406,867 lb. (as in the grease), the quantity of butter, 62,421,288 lb.

Mining.—Gold-mining is an important industry; from the discovery of gold in 1851 to Sept. 30, 1915, the total amount of gold produced was £296,126,550, being 74,165,611 oz. The output for 1915 was £1,397,844. The total value of all minerals mined (gold, tin, coal, and antimony) was £2,086,183.

Trade and Industry.—The total number of works, factories, etc., in 1914 was 5,650, employing 118,399 persons, and paying wages of £11,099,940. The products of the State are mainly those enumerated above. The overseas imports and exports of the State are shown in the following table:

Year.	Oversea Imports.	Oversea Exports.
	£	£
1911 .	21,850,963	18,915,716
1912 .	25,081,074	19,113,121
1913 .	24,387,073	17,835,395
1914–15 .	20,997,294	12,357,334

Towns

Capital: Melbourne (*pop.* 651,000), situated on Hobson's Bay and the River Yarra; other towns are Ballarat (42,478), Bendigo (39,056), Geelong (35,444), Warrnambool (7,400), Castlemaine (7,362).

(3) QUEENSLAND

Queensland occupies the whole of the north-eastern portion of Australia. The breadth of the territory near the southern boundary is about 900 m. The whole has an *area* of 670,500 sq. m. or 429,120,000 acres.

Population

Year.	Males.	Females.	Total.
1891 .	223,779	169,939	393,718
1901 .	277,003	221,126	498,129
1911 .	329,506	276,307	605,813
1915 .	361,312	319,134	680,446

Vital Statistics

Year.	Births.	Deaths.	Marriages.
1912 .	18,738	6,921	5,627
1913 .	19,731	6,783	5,655
1914 .	19,882	6,731	5,894
1915 .	20,163	7,559	6,135

Physiography

Queensland has a coast-line of 2,500 m. An extensive mountain range divides the State from north to south into two unequal divisions. From this range numerous spurs extend towards the sea coast, the districts so enclosed being of a most fertile character and well adapted for the cultivation of maize, sugar, and similar products. On the western side of the range, vast tracts of land have been taken up for pastoral and agricultural purposes, the soil being, with a few exceptions, extremely good. There are numerous rivers and streams, many having their sources in the Dividing Range, and several being broad and navigable for many miles inland. The climate of a considerable portion resembles that of Madeira, and although at all times it is extremely warm, there is an absence of the hot winds from which the other States frequently suffer. The temperature is remarkably equal, the heat of summer being modified by the sea breezes and heavy rains. The winter season is warm, dry, and agreeable.

Government

The administration is vested in a Governor and an Executive Council. There are two Houses of Parliament—a Legislative Council and a Legislative Assembly. The former consists of an indefinite number of members nominated by the Governor, and the latter of 72 members, representing 61 electorates, the electoral franchise being extended to all males and females over 21 years of age, having resided for one year in the State and for three months in an electoral district.

Governor

Governor, Maj. Sir Hamilton J. Goold-Adams, G.C.M.G., C.B. (*b.* '58, *app.* 1915) £3,000
Private Sec. T. Thatcher.
A.D.C. Capt. Cosens.
Lieutenant-Governor, Hon. Sir Arthur Morgan (*app.* 1908).

Executive Council

Premier, Chief Sec. and Attorney-Gen. Hon. T. J. Ryan £1,300
Treasurer and Sec. for Public Works, Hon. E. G. Theodore 1,000
Home Secretary, (vacant) 1,000

Secretary for Agriculture and Stock, Hon. William Lennon	£1,000
Secretary for Public Lands, Hon. J. M. Hunter	1,000
Secretary for Railways, (vacant)	1,000
Secretary for Public Instruction, Hon. H. F. Hardacre	1,000
Secretary for Mines, Hon. W. Hamilton	—
Ministers without Portfolio, Hons. J. Huxham, J. A. Fihelly.	

President Legislative Council, Hon. Sir A. Morgan	£1,000
Speaker, Legislative Assembly, Hon. W. McCormack	1,000

Actg. Deputy Commr. C. F. Pemberton	950
Under-Sec. Public Works, Govt. Architect and Engineer, A. B. Brady, M.I.C.E.	900
Under-Sec. Depart. of Mines, H. Marshall	800
State Mining Engineer, C. F. V. Jackson, B.E.	580

EDUCATION AND RELIGION

Elementary education, which is free and unsectarian, is entirely Government provided. In 1914 there were 1,392 State and 6 high schools with an enrolment of 125,171 pupils. There are also 153 private and 10 grammar schools. There is a State-aided University with an enrolment of 231. A system of technical instruction, liberally endowed by the State, is conducted by local committees. The principal religious bodies are Church of England (212,702), Roman Catholic (137,086), Presbyterians (75,560), and Methodists (59,920). Valuable land grants were formerly made to these bodies, which they now retain free from taxation.

FINANCE

The Revenue, Expenditure, and Public Debt are given below:

Year.	Revenue.	Exp'nditure.	Public Debt.
	£	£	£
1912	5,989,347	5,965,692	47,068,186
1913	6,378,213	6,327,097	53,604,733
1914	6,973,259	6,962,516	54,523,506
1915	7,202,658	7,199,399	56,869,046
1916*	7,312,755	7,683,319	—

* Estimates.

PRODUCTION AND INDUSTRY

Agriculture and Live-stock.—Of the total area of the State, 16,244,541 acres have been alienated; in process of alienation under deferred payment systems are 10,586,914, leaving 402,288,545 still in the possession of the State. Most of the land is let out in squatting runs, and other on occupation licence. The greater portion of the country south of the Brisbane River contains an abundance of pasturage. In the western portion of the southern division large quantities of wheat are grown, but the uncertain rainfall occasionally militates against the success of the crop. In 1915 the total yield was 1,585,087 bush. from 127,015 acres. Other grain crops consist of maize, barley, oats, rice, and rye. Sugar is also a staple product of the coastal districts, the output for 1914 being 225,847 tons. Bananas, pineapples, and other tropical and semi-tropical products also grow in the greatest profusion. The live-stock in 1915 consisted of 23,129,919 sheep, 5,455,943 cattle, 742,159 horses, and 166,638 pigs. The wool produced (as in the grease) in 1915 was 155,478,740 lb.

Forests.—There are extensive forests of eucalypti, pine, cedar, and various ornamental woods, which are much utilised by cabinet makers.

Minerals.—The quantity of gold obtained from the various fields up to Dec. 31, 1914, was 18,686,625 fine oz. The most important gold-fields are Charters Towers, Gympie, and Rockhampton. The output in 1915 was £1,059,213. Of baser metals nearly every known kind has been proved to exist, whilst silver, copper (£1,118,648 in 1914), tin, lead, wolfram, and manganese are obtained in considerable quantities. The total output of all minerals in 1914 was £2,976,280. Coal has been found to exist over vast areas embracing a large portion of the whole eastern seaboard, but up to the present it has only been mined to a slight extent.

Pearl Fisheries.—On the northern coast pearl fishing affords employment to a large number of vessels. Thursday Island forms the headquarters of the industry. The bêche-de-mer fishery on the

The New HAZELL, 1917

Barrier Reef employs a considerable number of Chinese.

IMPORTS AND EXPORTS

Year.	Imports.	Exports.
	£	£
1911 . .	6,212,240	8,389,284
1912 . .	7,456,917	9,209,454
1913 . .	6,714,942	12,352,748
1914–15 . .	6,428,688	13,015,484

TOWNS

CAPITAL: Brisbane (*pop.* 154,000), on the river of that name; a straight and deep channel allows of vessels of the deepest draught to come up to the wharves in the heart of the city. Other towns are Rockhampton (20,915), Townsville (13,835), Maryborough (11,626), Gympie (12,419), Ipswich (25,000), Toowoomba (24,200), and Charters Towers (17,298).

(4) SOUTH AUSTRALIA

South Australia comprises that portion of the continent of Australia bounded on the east by 141° E. long., on the north by 26° S. lat., on the west by 132° E. long., and on the south by the Southern Ocean. It was constituted a British Province in 1836. In 1861 the territory known as "No Man's Land" was added to the State. The total *area* of these territories is 380,070 sq. m. Kangaroo Island, Nuyts Archipelago, the Gambier and other islands on the south coast are included in the State.

POPULATION

Year.	Males.	Females.	Total.

1915 .	11,798	4,694	3,965

GOVERNMENT

The Executive consists of a Governor and responsible Ministry. Parliament consists of a Legislative Council and House of Assembly. The Council consists of 20 members, each elected for six years. £50 freehold or £25 annual leasehold, or £17 annual rent with a six months' registration, qualifies for the franchise. The Assembly contains 46 members elected triennially by adult suffrage. Members of both Council and Assembly are paid £200 per annum. For local government purposes there are 32 municipal and 140 district councils.

THE GOVERNOR

Governor, Lt.-Col. Sir Henry Lionel Galway, K.C.M.G., D.S.O. (*b.* 1859, *app.* 1914) £4,000

Commissioner Harbours Board, E. A. Farquhar	800
Director of Education, M. M. Maughan, B.A.	800

EDUCATION AND RELIGION

Education is compulsory and secular, but not to the exclusion of the Bible. In 1914 there were 839 primary schools, with 2,108 teachers and 60,729 scholars. The expenditure was £328,801. There is an endowed University at Adelaide, with all classes open to women. It has 425 undergraduates and 291 non-graduating students, besides those attending extension lectures. There is also a State School of Mines and Industries, supported by an annual parliamentary grant of £7,000; the students number about 3,260. The principal religious denominations are: Church of England, 113,781; Roman Catholic, 50,964; Methodists, 100,402; and Lutherans, 26,681.

FINANCE

The Revenue, Expenditure, and Public Debt for the 5 years 1912–16 are stated below:

Year.	Revenue.	Exp'nditure.	Debt.
	£	£	£
1912 .	4,450,739	4,175,589	29,440,113
1913 .	4,506,698	4,330,282	30,147,883
1914 .	4,822,766	4,604,129	33,564,332
1915 .	3,973,310	4,662,421	35,081,116
1916 * .	4,760,830	4,751,902	—

* Estimates.

Banking.—There are 9 banking institutions in the State, with assets £13,377,597 and liabilities £12,033,623. The Government Savings Banks had, in 1915, 215,731 depositors, with £9,017,061 depositors' balances at the end of the year.

PRODUCTION AND INDUSTRY

Agriculture.—It may be roughly estimated that not more than 150,000 sq. m. of the area of the State are at present put to profitable use. Agricultural settlement has not extended 300 m. from the coast; and pastoral settlement may be said to have reached 1,200 m. 53,825,920 acres only have been proclaimed, leaving 189,418,880 acres still to be proclaimed. Of the area of the State, only 13,126,633 acres have been or are being alienated from the Crown; 2,456,595 acres are in process of alienation under systems of deferred payment. About two-thirds of the total area of land cultivation is being cropped with wheat; the product of wheat has already made this State the "granary of Australia." In 1915–16 the total yield of wheat was estimated at 34,134,504 bush. Vine culture is an important and progressive industry; 26,864 acres were devoted to this purpose in 1915; wine trade, 1,507,196 gals.; exported oversea, 375,134 gals. Considerable attention has also been paid to the drying of raisins and currants; of the former, 35,305 cwt. and of the latter 24,744 cwt. were made in 1915. Almond trees are of rapid growth, and apple, apricot, orange, lemon, pears, plums, and other fruit trees, thrive. Potatoes, onions, turnips, and practically all kinds of vegetables grow well in the State, their production in 1915 being valued at £222,547. The production of wool (as in the grease) in 1915 was 38,848,978 lb.

Live-stock.—The number of live-stock in 1915 was 4,208,461 sheep, 300,579 cattle, 267,877 horses, and 69,893 pigs.

Industries.—The number of manufactories is 1,323, employing 26,874 hands, and 39,543 horse-power actually used. Wages paid, £2,946,296. Total value production, £13,215,970. There are 2,157 m. of railway.

Minerals.—The State is not strong in mineral production, the total value for 1914 being only £590,616, of which copper was valued at £417,487.

IMPORTS AND EXPORTS (OVERSEAS)

Year.	Imports.	Exports.
	£	£
1912 . .	6,972,765	9,615,279
1913 . .	7,348,340	9,809,763

† Year ended June 30, 1915.

TOWNS

CAPITAL: Adelaide (*pop.* with suburbs, 196,567); other towns are Moonta, Port Pirie, Port Augusta, and Gawler.

Mail transit: Adelaide, 30 days.

(5) WESTERN AUSTRALIA

Comprises that portion of Australia which lies to the west of 129° E. Its greatest length is, from north to south, 1,480 m., and its greatest breadth about 1,000 m. Its total *area* is 975,920 sq. m. The first settlement was made in 1829 at Swan River; Perth also was founded the same year.

POPULATION

Year.	Males.	Females.	Total.
1901 .	112,875	71,249	184,124
1911 .	161,565	120,549	282,114
1912 .	174,205	131,578	305,783
1913 .	181,304	139,353	320,657
1915 .	171,304	146,712	318,016

VITAL STATISTICS

Year.	Births.	Deaths.	Marriages.
1912 .	8,689	3,335	2,524
1913 .	9,218	2,934	2,572
1914 .	9,204	3,043	2,660
1915 .	9,017	2,992	2,581

Climate.—The climate varies considerably, for the State stretches over twenty degrees of latitude, from the tropics to the temperate zone. In the north and north-east the climate is very dry, but there are large pastoral tracts and areas suitable for tropical products. The middle and southern portions of the State, which embrace the agricultural area, have two distinct seasons—summer and winter. Although in these districts the maximum temperature may sometimes exceed 90° in the shade, the evenings and nights are generally cool. The heaviest rainfall is in the East Kimberley district, the average for the year 1914 having been 34·29 in.

GOVERNMENT

Representative government was first given to the colony in 1870 in a limited form; amending Acts of 1899 and 1911 vest the administration in

The New HAZELL, 1917

Governor and Parliament. The *Legislative* **Council,** or Upper House, contains 30 members elected for six years; the *Legislative* **Assembly,** or Lower House, contains 50 members elected for three years. Electors to the Council must have resided in the State for six months, and possess £50 freehold or £17 per annum leasehold, or be householders to the value of £17, or occupy or mine Crown lands rented at £10 per annum. The qualifications of electors to the Assembly, who may be of either sex, are—six months' residence in the State, and either natural-born subjects of the Crown or naturalised, and one month's residence in the district. For local government purposes there are 42 municipal councils and 105 district roads boards.

GOVERNOR

Governor of Western Australia. On the retirement of the late Governor it was decided (Dec. 1916) not to fill the post during the war	£4,000
Lieutenant-Governor, Hon. Sir Edward A. Stone, K.C.M.G. (*b.* 1844, *app.* 1906)

Chief Justice, Hon. Sir R. F. Macmillan	£2,000
Puisne Judges, Hons. R. B. Burnside, J. Rooth, J. A. Northmore each	1,700

Pres. of the Legislative Council, Hon. H. Briggs	£700
Speaker of the Legislative Assembly, Hon. M. F. Troy	700

EDUCATION

Education at school is compulsory upon all children between the ages of 6 and 14. There are some 600 Government schools, a School of Mines at Kalgoorlie, and a university. The amount spent on education in the year 1914–15 was £326,799.

FINANCE

The Revenue, Expenditure, and Debt for the past four years are as under:

Year.	Revenue.	Exp'nditure.	Debt.
	£	£	£
1911–12	3,966,673	4,101,082	21,159,141
1912–13	4,596,659	4,787,063	23,364,789
1913–14	5,205,343	5,340,754	26,967,091
1914–15	5,140,725	5,706,542	30,728,078

There are six cheque-paying banks (formerly banks of issue) in the State, and their assets on June 30, 1915, amounted to £15,300,827, with liabilities £7,929,824.

AGRICULTURE AND MINING

Agriculture.—In 1915, of the total acreage, 1,863,023 acres were under crop, and of this total wheat accounted for 1,376,012 acres. The yield of crops in 1914 was: wheat, 13,496,242 bush.; oats, 1,663,147 bush.; barley, 169,542 bush. The live stock in 1915 numbered 4,456,186 sheep; 863,835 cattle, 161,625 horses, 59,816 pigs, and 4,284 camels. The timber trees of the south-west are some of the best in the world; the jarrah or mahogany (*Eucalyptus marginata*) is the most valuable, as its wood resists the teredo and the ant, but other important species are the karri (*E. colossea*), York gum (*E. loxophleba*), red gum (*E. calophylla*), tuart, or native pear (*E. gomphocephala*), morrel and sandalwood (*Sandalum cygnorum*). Before the war a vigorous immigration policy, with assisted passages, was carried on, and it is intended to resume it at the conclusion of peace, as there are millions of acres of land still available under liberal terms of settlement. The State Government gives every assistance to farmers, a State Agricultural Bank helping them to finance their undertakings.

Mining.—Gold-mining is the principal mining industry, but other metals worked are silver, coal,

The New HAZELL, 1917

tin, and copper. The gold is found at Kimberley, in the N.W., Murchison, Yilgarn, Kalgoorlie, Coolgardie, etc., in the S.W., and at several points between these two districts. The goldfields rank as second of the world's goldfields as regards output, but the total production has been falling off steadily since 1906. There was a slight recovery in 1913, but another marked decline in 1914. The production in 1914 was 1,232,977 oz., valued at £5,237,351. The total amount produced in the State since 1896 is 29,488,257 fine oz., of which 18,601,622 oz. were received at the Royal Mint, Perth.

Commerce and Shipping

The most important article of export is gold and gold specie (£3,825,714 in 1914), but others are timber (£1,022,622 in 1914), wool (£614,894), pearls and shell (£268,386), hides and skins (£173,363), copper (£22,823), tin (£36,649), silver (£20,787), sandalwood (£65,919), mallet bark for tanning (£22,823), wheat £1,343,856), flour (£184,593), and fruit (£70,846).

Imports and exports for the last three years:

	1912	1913	1914
Imports	£9,550,457	£9,892,705	£8,944,554
Exports	8,941,465	9,128,607	8,406,182

The number of vessels which entered Western Australian ports in 1914 was 829, of a tonnage of 2,854,522, whilst 831, of a tonnage of 2,862,714, cleared.

Towns

Capital, Perth, *pop.* (1911 census) with suburbs, 106,792; other towns are Fremantle, the chief port (20,847); Boulder, (10,824); Claremont (4,222); Midland Junction (3,484); Albany (3,586); Coolgardie (2,000); Kalgoorlie (8,781); Geraldton (3,478); and Northam (3,361).

Mail transit: about 25 days.

(6) TASMANIA

Tasmania is an island at the southern extremity of the continent of Australia, from which it is divided by Bass Straits, 120 m. wide. It lies between 40° 33′ and 43° 39′ S. lat. and 144° 39′ and 148° 23′ E. long, and has an *area* of 26,215 sq. m.

Population

Year.	Males.	Females.	Total.
1901	89,624	82,851	172,475
1911	97,591	93,620	191,211
1915	101,761	99,264	201,025

Vital Statistics

Year.	Births.	Deaths.	Marriages.
1912	5,853	2,057	1,506
1913	5,886	2,131	1,620
1914	6,017	1,918	1,543
1915	5,845	2,015	1,600

Physiography

The island has far-extending mountain tiers and hills stretching from 1,500 to 5,000 ft. in height, well-wooded, and a series of extensive open plains and plateaux. These plains and valleys have a rich chocolate soil, and are extremely fertile. There are numerous lakes and rivers, the chief of the latter being the Tamar and the Derwent, on whose estuary, the capital, Hobart, is situated. The climate is extremely healthy, there being an absence of the usual hot summer winds of the Continent and of the drought which accompanies them. The mean range of temperature for the year in Hobart is 54·9°.

Government

Government is under a Governor and Executive Council. There are also a Legislative Council of 18 members elected for a term of six years, and a House of Assembly of 30 members elected for three years by manhood suffrage with a 6-months's residential qualification. Members are paid £200 per annum. For local government there are 46 municipal councils, which now perform the duties originally discharged by town boards, road trusts, etc.

Governor

Governor of Tasmania, His Excellency Rt. Hon. Sir Wm. G. Ellison-Macartney, K.C.M.G. (*b.* 1852, *app.* 1913)	£2,750

Solicitor-General, L. E. Chambers	600

Agent-General in London, Sir John McCall, M.D., C.M.G.	£1,000
Secretary, H. W. Ely	315
Offices, 56 Victoria Street, London, S.W.	

Education and Religion

The educational system is free, national, and compulsory, with non-sectarian religious instruction. In 1915 there were 457 State schools, with an average attendance of 22,581. There is a university, established in 1890, and State sup

ported. The Government contribution to education in 1915 was £121,031. The Church of England, 88,158 members, is the leading denomination; Roman Catholics number 28,581, Methodists 24,975, and Presbyterians 15,735.

FINANCE

The Revenue, Expenditure, and Debt of Tasmania are as follows:

Year.	Revenue.	Exp'nditure.	Debt.
	£	£	£
1910–11 .	970,092	1,016,963	11,077,790
1911–12 .	1,084,663	1,064,703	11,302,411
1912–13 .	1,206,292	1,095,883	11,495,963
1913–14 .	1,238,085	1,235,514	12,265,012
1914–15 .	1,244,095	1,384,149	13,133,046

PRODUCTION AND INDUSTRY

Agriculture and Live-stock.—The land in crop on March 1, 1915, was 274,474 acres, and 647,602 acres permanently artificially sown grasses; 23,865 acres were under wheat, producing 384,220 bush. The great agricultural industry of Tasmania is that of fruit culture, the markets of New South Wales and of Great Britain absorbing practically all the produce. The fruit crop was valued at £432,421 in 1915, besides jam pulp and canned fruit valued at £325,011. All fruits grown in Great Britain are produced in profusion. The live-stock in 1915 included 1,674,845 sheep, 176,524 cattle, 42,232 horses, and 34,960 pigs.

Minerals.—Tasmania is rich in minerals, iron ore, silver, tin, copper, and wolfram being the principal metals. It was at one time the largest producer of tin in Australia, but the production has fallen off in late years. The output of copper in 1914 was £496,041, of tin £259,300, and of all minerals £1,007,038.

	1912	1913	1914–15
Imports .	£1,009,198	£1,025,081	£811,255
Exports .	507,414	522,865	420,007

There are 533 miles of railway, of which 311 are State owned.

TOWNS

CAPITAL: Hobart (*pop.* 39,107); the other chief town is Launceston (21,602).

Mail transit: Hobart, 30 days.

Territories

NORTHERN TERRITORY

The Northern Territory, previously known as the Northern Territory of South Australia, was taken over by the Federal Government in 1911. The *area* is 523,620 sq. m., constituted as on Jan. 1, 1914, as follows: Pastoral Lease 107,562 sq. m., Pastoral Permit 26,595 sq. m., Annual Pastoral Lease 591 sq. m., Grazing Licence 11,733 sq. m., Agricultural Lease 37,606 acres, Freehold 7,406 sq. m., Crown Lands 368,601 sq. m., together with a few square miles held under Town Miscellaneous and other small leases. The total *population* of the Territory on Dec. 31, 1915, was 4,563, of which about 3,000 were whites. There are about 20,000 Aboriginal natives scattered throughout the country. The capital is *Darwin*.

The chief industries are cattle, horse, and a little sheep raising, for which the country is well adapted, and mining.

The pastoral industry is capable of great development. It is at present receiving a great impetus by the erection of enormous freezing works in Darwin by Messrs. Vestey Brothers of London at an estimated cost of about one-quarter of a million sterling. A great extent of the country is blessed with permanent water—and where this does not exist indications are that plentiful supplies of sub-artesian, and, in some localities, artesian, waters can be obtained.

The mining resources of the Northern Territory are considered to be immense. They have not been properly tested, most of the mining having been confined to surface work. The deepest mine is about 260 ft. During the last year or two there has been a stir in mining, and several rich lodes are being opened up. The Maranboy tin-field, on which the Government has erected an up-to-date battery, it is considered may prove to be one of the largest and richest in the world. A large wolfram-bearing area was discovered in 1916.

Very little agriculture has been carried on in the past, not more than 1,000 acres in the whole Territory being under cultivation. Large areas are suitable for agriculture, and the policy of the Government as introduced to Parliament in June 1914 is to stimulate and encourage closer settlement. Liberal assistance by way of Government advances is given.

The country, being as it were to a great extent in its natural state, affords great fields for sport. The rivers and small lakes (or billabongs as they are called) teem with fish and wild fowl; buffaloes roam in thousands over the plains. Buffalo shooting is excellent sport, and moreover a lucrative one, inasmuch as there is a profitable industry in exporting the hides.

Lack of transport facilities is one of the greatest drawbacks to development. There are only 216 miles of open railway, but it is intended to proceed with railway extension until the Northern Territory is ultimately connected by rail with the other States of Australia.

	1911–12	1912–13	1913–14
Revenue .	£46,682	£80,773	£73,657
Expenditure .	126,294	246,307	532,535
Debt . . .	—	—	3,359,891

	1912	1913	1914–15
Imports .	£18,130	£20,977	£83,708
Exports .	59,106	67,911	13,319

Administrator, Col. J. A. Gilruth, D.V.Sc.

PAPUA

The Territory of Papua, previously known as British New Guinea, comprises the south-east portion of the island of New Guinea, which (with the exception of Australia) is the largest island in the world. It lies wholly within the tropics, the northernmost point touching 5° S., whilst the southernmost lies between 11° and 12° S. The length of Papua from east to west is upwards of 800 m., towards either end the breadth from north to south is about 200 m. The territory comprises also the islands of the Trobriand, Woodlark, D'Entrecasteaux, and Louisiade groups. The total *area* is about 90,540 sq. m., of which 87,786 are on the mainland and 2,754 on the islands, with a *pop.* of about 500,000, of whom 1,186 are Europeans. At the conclusion of the war the wish of the Australian people will no doubt be met by the inclusion of the former German territory in the colony; this will give an almost equal division of the island between the British (51·4%)

The New HAZELL, 1917

and the Dutch (48·6%). The island was discovered by Abreus in 1511, and visited first by the Portuguese and afterwards by the Dutch. The whole territory is well-watered; and the climate favourable to the cultivation of all tropical products. The great mountains and a great portion of the lower country are covered with forests. The islands are mountainous, and principally of volcanic origin. The largest rivers of the mainland flow into the Gulf of Papua. The Fly river is the most important, its length in British territory being about 620 m.; other rivers are the Turama and the Purari. There are many excellent harbours. The total area planted in 1915 was 42,921 acres, on which coconuts, rubber, sisal hemp, and cotton are the chief crops; secondary agricultural industries are bowstring hemp, coffee, vanilla, kapok, cocoa, tapioca, cinnamon, tea, maize, and tobacco. It is estimated that the total area so planted amounts to 350,000 acres. There is a large variety of useful timbers; sandalwood is indigenous, and is largely used for cabinet work, and santal oil is distilled from its roots. Ebony is also produced for export. Drugs, dyewood, and spices are also obtained from indigenous plants. Pearl-fishing is an important industry; bêche-de-mer is found along the coasts and reefs. Minerals have been discovered in many places, and include gold (yield, 1914–15, £50,889), copper, silver, tin, lead, zinc, cinnabar, iron, osmiridium, gypsum, manganese, sulphur, graphite, and petroleum, of which last there is now an important output. Beds of good coal also exist.

A protectorate was proclaimed over the territory in 1884, and in 1888 it was definitely annexed. In Nov. 1901 the Government of the Australian Commonwealth undertook the administration, and the transfer was made in 1906. A grant of about £30,000 a year towards the revenue is made by the Commonwealth. It is administered by a Lieutenant-Governor. There are nine magisterial divisions, each under a resident magistrate.

	1912–13	1913–14	1914–15
Revenue	£48,346	£54,703	£51,960
Expenditure	85,170	81,095	82,534
Imports	218,323	212,134	202,055
Exports	128,016	123,140	94,354
	1913	1914	1915
Exports to U.K.	£14,532	£11,816	£7,494
Imports from (and of) U.K.	18,338	30,190	21,971

Lieutenant-Governor and Chief Judicial Officer, J. H. P. Murray, C.M.G.	£1,250
Commissioner for Lands, Staniforth Smith	800
Government Secretary, H. W. Champion	700
Treasurer, R. W. T. Kendrick	700
Deputy Chief Judicial Officer, C. E. Herbert	1,000
Commr. for Native Affairs, B. W. Bramell	500
Director of Public Works, G. W. W. Chrisp	500
Chief Govt. Surveyor, G. Sabine	550
Chief Medical Off. Dr. D. Buchanan	550

NEW ZEALAND

The Dominion of New Zealand consists of three main islands, with several groups of smaller islands lying at some distance from the principal group. The main islands, known as the North, the South, and Stewart Islands, have a coast-line 4,330 m. in length: North Island, 2,200 m.; South Island, 2,000 m.; and Stewart Island, 130 m. Other islands included within the Dominion are the Chatham, Auckland, Campbell, Snares, Antipodes, Bounty, and Kermadec Islands. The Cook Group of islands and certain neighbouring islands were included in the Dominion by proclamation of June 10, 1901.

The total *area* of the Dominion proper (*i.e.* excluding the islands annexed in 1901) is 66,292,232 acres or 103,581 sq. m. The land area of the Cook Group is about 150 sq. m., and of the other islands annexed in 1901 about 130 sq. m.

The west coast of the South Island was first discovered by Abel Jansen Tasman, the Dutch navigator on Dec. 13, 1642. The islands were visited by Captain Cook in 1769, who visited them again in 1773, 1774, and 1777. After occasional intercourses between New Zealand and the settlements in New South Wales, H.M.S. *Dædalus* was sent to the island on a mission by the New South Wales Government. The first attempt at colonisation was made in 1825 by a company called the New Zealand Company. In 1840 the first body of immigrants arrived, and British sovereignty was proclaimed. On May 3, 1841, New Zealand was created a separate colony by Royal Charter. The Constitution rests upon the Act of 1852 which granted representative institutions.

PHYSIOGRAPHY

The central physical feature of North Island is the unbroken mountain chains which run N.E. from Cook Strait to East Cape; they range between 3,000 and 6,000 ft. in height, and contain several volcanoes. In the centre of a pumice-covered plateau is Lake Taupo, with an area of over 238 sq. m. Round and about it are many thermal springs. A great natural feature of the district, the Pink and White Terraces, were destroyed by the eruption of Mount Tarawera in 1886. The Government maintain a sanatorium at Lake Rotorua. There are many good rivers, the Waikato, the longest in the colony, being navigable for some 70 m. though obstructed by a bar like all western and most eastern New Zealand rivers.

The South Island has also its mountain chain, more imposing than that of North Island; the highest peak is that of Mt. Cook, 12,349 ft. Large and deep lakes fill many of the mountain valleys, and there are numerous glaciers and waterfalls. The largest river, the Clutha, is 80 m. long, but all, though useful for irrigation, are almost useless for communication or transport.

The climate is temperate and very healthy, the summers being as cool as those of England and the winters as warm as those of Italy. The extreme range of temperature at Wellington is 50°, from 82° in summer to 32° in winter.

POPULATION

Year.	Males.	Females.	Total.
1909	520,406	462,520	982,926
1910	529,998	474,388	1,004,386
1911	539,729	485,677	1,025,406

1913	25,891	18,697	44,588
1914	22,526	15,120	37,646

GOVERNMENT

Government is carried on by a **Governor,** who is advised by a responsible Ministry. Of the two houses of parliament, the **Legislative Council** consists of 42 members nominated by the Governor for life (except those nominated subsequently to Sept. 17, 1891, after which date all appointments are for seven years only), the **House of Representatives** of 80 (including 4 Maoris) members elected triennially on an adult suffrage. The qualifications for electors are residence in the Dominion for a year, and in the electoral district for three months. Women vote, and in many of the electorates they outnumber the male voters. Members of the Lower House receive £300, and of the Upper House £200 a year. For local government the country is divided into 117 counties and 110 boroughs, the counties being further divided into town districts and road districts. There is a Government Insurance Department (life, accident, fire), and all the more important public works are in the hands of the Government and other public bodies, and have been carried out for the most part on the co-operative system, the Government providing the materials and letting out the work to parties of artisans and labourers at fixed rates. An eight-hours day prevails, and a Conciliation and Arbitration Act is in force.

GOVERNOR

Governor and Commander-in-Chief of New Zealand, His Excellency the Earl of Liverpool, G.C.M.G., M.V.O. . . £5,000
Private Sec. Gavin M. Hamilton.
Official Sec. A. Cecil Day.

EXECUTIVE COUNCIL

Prime Minister, Minister of Lands, Labour, Industries and Commerce, Commissioner of State Forests, and Minister in charge of Lands for Settlements, Valuation and Scenery Preservation Departments, Rt. Hon. W. F. Massey, P.C. . . . £1,600
Minister of Finance, Postmaster-General, and Minister of Telegraphs, Minister in charge of Land and Income Tax, State Advances, Public Trust, and Govt. Life Insurance Departments, Rt. Hon. Sir J. G. Ward, Bt., P.C., K.C.M.G. . . 1,000
Minister of Defence, Hon. J. Allen . . 1,000
Minister of Railways and Native Minister, Hon. W. H. Herries 1,300
Attorney-General, Minister in Charge of Police and Crown Law Departments, and the Welfare of Returned Soldiers, Hon. A. L. Herdman 1,000
Minister of Justice, Minister of Marine, Minister of Stamps, and Minister in Charge of Tourist and Health Resorts Departments, Hon. Dr. R. McNab . . £1,000
Minister of Public Works and Minister in Charge of Roads Department, Hon. W. Fraser 1,000
Minister of Internal Affairs, Minister of Public Health, Minister in Charge of Printing and Stationery, High Commissioner's, Audit, Museum, Registrar-General's, and Laboratory Departments, Hon. G. W. Russell 1,000
Minister of Immigration and Leader of the Legislative Council, Hon. Sir F. H. D. Bell, K.C.M.G., K.C. 1,000
Minister of Customs, Minister in Charge of Munitions and Supplies, Pensions, Advertising, and National Provident Fund Departments, Hon. A. M. Myers . . 1,000
Minister of Agriculture, Minister of Mines, Minister in Charge of Legislative, Public Buildings, Inspection of Machinery, State Fire and Accident Insurance Departments, Hon. W. D. S. MacDonald . 1,000
Minister of Education, and Minister in Charge of Friendly Societies, Hon. J. A. Hanan 1,000
Minister representing the Native Race, and in charge of Maori Councils, Cook and other Islands Administration, Hon. Dr. M. Pomare 400

Clerk of Parliaments and Clerk of the Legislative Council, L. Stowe, C.M.G. . . £650
Clerk of House of Representatives, A. F. Lowe 650

HIGH COMMISSIONER IN LONDON

High Commissioner in London, Hon. Sir Thomas Mackenzie, K.C.M.G., F.R.G.S. . £2,000
Secretary, C. Wray Palliser, C.M.G. . . 700
Offices, 413–416 Strand, London, W.C.

GOVERNMENT OFFICIALS

Secretary to the Treasury, G. F. C. Campbell £875
Commissioner of Stamps and Reg. of Companies, P. C. Corliss 725

Surveyor-General, Lands and Survey, E. H. Wilmot	700
Reg.-General of Land and Deeds, G. G. Bridges	725
Director of Live Stock and Meat, Dept. of Agriculture, C. J. Reakes	800
Director of Education, W. J. Anderson, M.A., LL.D.	850
Secretary for Education, Sir Edward O. Gibbes, Bt.	700
Public Trustee, F. Fitchett, C.M.G., M.A., LL.D.	1,000
Commissioner, Govt. Insurance Dept. J. H. Richardson	1,000
Under-Sec. Public Works Dept. H. J. H. Blow, I.S.O.	950
Engineer-in-Chief, Works Dept. R. W. Holmes, M.I.C.E.	900
Electrical Engineer, Works Dept. E. Parry	900

DEPARTMENT OF JUSTICE

Chief Justice—Wellington, (vacant)	£2,000
Judges:	
Wellington, Hons. F. R. Chapman, J. H. Hosking, each	1,800
Auckland, Hons. W. E. Edwards, T. Cooper, each	1,800
Christchurch, Hons. J. E. Denniston, T. W. Stringer, each	1,800
Dunedin, Hon. W. A. Sim	1,800
Solicitor-General, J. W. Salmond	1,250
Under-Secretary, G. C. B. Jordan	700

EDUCATION AND RELIGION

Education is compulsory, free and secular, between the ages of 7 and 14. In 1915 there were 2,301 public primary schools, with an average attendance of 158,134. There were also 33 incorporated or endowed secondary schools, as well as private schools, schools of mines, normal schools, schools of art, and industrial schools. The University of New Zealand is solely an examining body; it has 4 affiliated colleges—at Dunedin, Christchurch, Wellington, and Canterbury. No State aid is given to religion. Over 41% of the population belong to the Church of England, 23·32% are Presbyterians, and 9·43% Methodists.

FINANCE

The revenue, expenditure, and debt for the five years 1910–11 to 1914–15 are as follows:

Year.	Revenue.	Exp'nditure.	Debt.
	£	£	£
1910–11	10,297,023	9,343,106	79,323,636
1911–12	11,032,544	10,340,368	82,193,310
1912–13	11,734,271	11,082,038	87,457,121
1913–14	12,229,661	11,825,864	91,689,835
1914–15	12,451,945	12,379,803	96,644,455

Banking.—The banks of issue had, in 1914, deposits of £27,640,507, assets of £32,502,312, and liabilities of £29,808,349. The Savings Banks had 559,203 depositors, with £20,924,754 standing to their credit. The number of insurance policies in force was 52,273, and the sums assured and bonuses amounted to £13,797,075.

PRODUCTION AND INDUSTRY

Agriculture and Forestry.—New Zealand is primarily a grazing country, but while more of the land is each year being given up to the cultivation of fodder crops, it will always remain a country for stock-raising, principally of dairy cattle and sheep. In the season 1914–15 the area under wheat was 229,600 acres, yielding 6,644,336 bush.; oats, 287,561 acres, yielding 11,436,301 bush., and barley, 18,347 acres, yielding 596,828 bush.; other largely grown crops are rye-grass, cock's-foot, and potatoes. About 17,000,000 acres are still under forest; there are no fewer than eighty-six different varieties. The staple supply of the timber trade are kauri, and red, white, and black pine. Kauri gum to the value of £497,444 was exported in 1914.

Live-stock and Produce.—The number of sheep in the colony in 1914–15 was 24,901,421. There are also 404,284 horses, 2,020,171 cattle, and 348,754 pigs. Of wool 220,472,898 lb., valued at £9,318,114, were exported in 1914; frozen meat, valued at £5,863,062; butter, £863,776; and cheese, £19,702.

Minerals.—Coal, varying in grade from anthracite to lignite, occurs in many parts of New Zealand; the output in 1914 was 2,275,593 tons. Gold-mining is an important industry; in the earlier years it was obtained mostly from alluvial diggings, but at the present time the greatest quantity is taken from gold-bearing quartz, which is widely distributed through several parts of the country. The output in 1914 was 227,954 oz., valued at £895,367. Other metals are chrome, antimony, manganese, and scheelite concentrate. The total value of the mineral output in 1914 was £2,752,682.

Railways.—There are 2,974 m. of Government railways, 1,239 m. in North Island, and 1,706 in South Island, the receipts for 1914 being £4,105,457. There are 13,434 m. of telegraph. Letters received and dispatched through the post numbered 233,901,320; the postal revenue was £698,898.

IMPORTS AND EXPORTS

	1913–14	1914–15	1915–16
Imports	£22,286,367	£21,856,095	£21,728,834
Exports	22,986,712	26,261,447	31,748,912
	1913	**1914**	**1915**
Exp'ts to U.K.	£20,338,057	£22,994,319	£30,407,581
Imports from (and of) U.K.	10,837,647	9,416,924	9,373,843

The principal articles of export in 1915 were: wool, £10,387,875; gold, £1,694,553; frozen meat, £7,794,395; kauri gum, £279,133; tallow, £780,828; hides, skins, and pelts, £1,444,887; butter and cheese, £5,430,836, and phormium fibre, £571,621. Of imports, the principal items were: clothing and materials, £3,672,424; iron and steel goods, machinery, etc., £3,127,515; sugar, £1,069,096; tea, £455,240; spirits, wines, and beer, £512,413; tobacco and cigars, £533,948; oils, £753,089; paper, printed books and stationery, £701,186; and manures, £476,584.

Shipping.—During 1915 the vessels entered inwards, numbered 646, with a tonnage of 1,724,849, and those entered outwards 657, with a tonnage of 1,781,981, exclusive of coasting vessels.

TOWNS

CAPITAL: Wellington, on North Island. The estimated population of the chief cities and towns on April 1, 1915, was as follows: Wellington (and suburbs), 74,811; Auckland (and suburbs), 117,793; Christchurch (and suburbs), 87,756; Dunedin (and suburbs), 69,168; Gisborne, 11,125; Napier, 12,701; Wanganui, 16,235; Palmerston North, 12,206; Nelson, 8,748; Timaru, 13,123; Invercargill, 18,067.

DEPENDENCIES OF NEW ZEALAND

Auckland Islands.—50° 32′ S., 166° 13′ E. Uninhabited. The largest of the islands is about 27 m. long by 15 m. broad; on it the N.Z. Government maintains a depôt of provisions and clothing for shipwrecked mariners.

Chatham Islands.—About 480 m. E.S.E. from Wellington. The largest island contains about 222,490 acres, of which a lake or lagoon absorbs 45,960 acres. Pitt Island is the next in size. The greater portion of both islands is used for grazing sheep. They have a pop. of 267.

Cook Islands.—The Cook or Hervey Islands, with a few islets, were with other groups annexed to the Dominion in Oct. 1900. They lie in the eastern Pacific, between 18° 15′ and 21° 47′ S. lat. and 157° and 160° W. long. They are very fertile and healthy. They have a total area of 150 sq. m. and a *pop.* of 12,598. The chief island is Rarotonga, rising to a height of 3,000 ft., and clothed to the tops of the mountains with splendid vegetation; the other islands are Mangaia, Atiu, Aitutaki, Mauke, Mitiaro, Hervey Islands, Palmerston Island, Niue, Penrhyn Island, Manahiki, Rakaanga, Danger Island, and Suwarrow Island, which has one of the best harbours in the Pacific. The principal products are bananas (£28,939 in 1914), copra, and oranges, with some coffee, pearl-shell, pineapples and tomatoes, and hats from Niue. The exports in 1914 were valued at £77,512, and the imports at £91,132. The islands are administered by a Resident Commissioner and a Federal Council. Niue has its own Resident Commissioner and Federal Council.

Resident Commissioner, Rarotonga, H. W. Northcroft £600

Resident Commissioner, Niue, H. G. Cornwall.

Kermadec Group.—This group is situated between 29° 10′ and 31° 30′ S. lat. and 177° 45′ and 179° W. long., and includes Raoul or Sunday Island, Macaulay Island, Curtis Islands, and L'Espérance or French Rock.

WESTERN PACIFIC

The office of **High Commissioner for the Western Pacific** was created by an Order in Council of 1877 to provide a Civil Court for the settlement of disputes between British subjects living in these islands. The High Commissioner's jurisdiction extends over all islands in the Western Pacific not within the limits of the colonies of Fiji, Queensland, and New South Wales, and not within the jurisdiction of any civilised power. In 1893 the jurisdiction was extended to foreigners, and in most cases to natives residing in British settlements or protectorates within the limits of the Order, including the New Hebrides (*q.v.*) and the Melanesian groups. The High Commissioner is the Governor of Fiji, and his Court includes the Chief Justice of Fiji and every other Judge of the Supreme Court acting as Judicial Commissioners, and a number of Deputy Commissioners appointed by the High Commissioner. Certain naval officers commanding men-of-war on the New Zealand station are at times appointed Deputy Commissioners.

High Commissioner for the Western Pacific, His Excellency Sir Ernest Bickham Sweet-Escott, K.C.M.G. *£1,000

Chief Judicial Commissioner, C. S. Davson, K.C.

Sec. to High Commissioner, C. H. Hart-Davis 450

Resident Commissioner, Solomon Islands, (vacant) . . . . . .

Resident Commissioner, Gilbert and Ellice Islands, E. C. Eliot 700–800

Resident Commissioner, New Hebrides, M. King. 900

Agent and Consul, Tonga, H. E. W. Grant, C.M.G. 800

FIJI

The colony of Fiji comprises all islands, rocks, and reefs lying between lat. 15° and 22° S. and between long. 177° W. and 175° E. It is distant from Sydney about 1,900 m. and from Auckland 1,200 m. Fiji is a corruption of the native name, Viti. The principal inhabited islands are Viti Levu, 4,112 sq. m., Vanua Levu, 2,435 sq. m.; Taviuni, 217 sq. m.; Kadavu, 124 sq. m.; Koro, 58 sq. m.; Gau, 45 sq. m.; and Ovalau, 43 sq. m. The whole colony has a total *area* of 7,435 sq. m. (about the size of Wales), with a *pop.* in 1915 of 159,321. Europeans number 4,552, and there are about 56,853 Indian and 2,515 Polynesian labourers. The Fijian population, who are Polynesian with Papuan intermixture, is estimated at 89,562.

In 1874 the "king" and chiefs voluntarily ceded the group to England. Fiji is administered by a Governor, who is also H.M. High Commissioner and Consul-General for the Western Pacific. The Legislative Council consists of 11 official, 7 elected members, and 2 native members, appointed by the Governor. Local government is largely in the hands of the natives through village and district councils.

The more important islands are hilly and mountainous, rising to between 4,000 and 5,000 ft. Upon the south-east or windward sides the islands are covered with dense forests. The country is well watered and there are frequent rains. The climate is cool for the tropics, the highest shade temperature at Suva in 1914 being 93° in February, and the lowest 57·4° in August. The three staple industries are sugar (export in 1915, 85,563 tons, valued at £1,065,643), copra, bananas; other exports are sici-shell, molasses, bêche-de-mer, hides and felts, and maize. Minor exports consist of timber, peanuts, kava, pearl-shell, and cocoa. The forests contain valuable timber.

The CAPITAL is Suvu, in Viti Levu; the second town is Levuka, in Ovalau.

The island of Rotumah (area 14 sq. m., pop. 2,114) to the north, annexed to Fiji in 1881, is administered by a Commissioner.

GILBERT AND ELLICE ISLANDS COLONY

The Gilbert and Ellice Islands, with which are incorporated the Union Group and Ocean Island, are a colony comprising 28 inhabited islands, with an *area* of 180 sq. m. and a *pop.* of 32,000, including 300 Europeans and 300 Asiatics. The islands were proclaimed as a British Protectorate in 1892; in 1915 the native governments expressed their desire to be formally annexed to H.M. Dominions, and an Order in Council to this effect was gazetted on Nov. 12, 1915. The islands are under the jurisdiction of the High Commissioner for the Western Pacific. Ocean Island, the headquarters of the colony, is the site of most successful operations by the Pacific Phosphate Company. The exports are principally phosphates and copra.

	1912–13	1913–14
Revenue . .	£30,273	£42,791
Expenditure .	17,952	21,615
Imports . .	103,559	—
Exports . .	318,000	350,000

Resident Commissioner, E. C. Eliot . £700–800

Union or Tokelau Islands include Nassau and Danger Islands. Area, 7 sq. m.; pop. 1,050.

Phœnix Group includes eight islands. Area, 16 sq. m.; pop. 59.

Pitcairn Island. Area, 2 sq. m.; pop. 169. Administered by a chief magistrate and council. Arrowroot and coffee of excellent quality are produced.

SOLOMON ISLANDS

The British Islands lie in the Western Pacific, between 7° 30′ and 13° S. lat. and 150° and 163° E. long., and include Guadalcanar, San Christoval, Malaita, New Georgia, Gela, Tulagi, as well as Santa Cruz, Vanicoro, and the islands ceded by Germany in 1899, including Choiseul, Ysabel, the islands in Bougainville Straits, and Lord Howe's group. British protection extends over all the islands between the Solomon and the Torres groups, and a Resident has his headquarters at Tulagi. *Area*, 8,357 sq. m.; *pop.* 150,000, including 660 Europeans. The chief exports are copra, ivory, nuts, pearl-shells, etc.

	1913–14	1914–15	1915–16
Revenue . .	£24,520	£22,646	£22,006

Deputy Commissioner and Resident, (vacant) £950
Assist. ditto and Treasurer, F. J. Barnett.

TONGA ISLANDS OR FRIENDLY ISLANDS

The Kingdom of Tonga embraces the groups of islands of Tongatabu, Haabai, and Vavau, together with the outlying islands of Niuatobutabu, Tafahi, and Niuafoou. The main group was discovered by Tasman in 1643. Capt. Cook visited the islands on his second voyage in 1773 and again on his third voyage in 1777. On account of the disposition of the natives he named the group the Friendly Islands. They are governed, under a British protectorate, proclaimed 1900, by an hereditary monarch, King George Tubou II, and a legislative assembly of 7 nobles, and 7 elected representatives of the people, and the ministers of the Crown, numbering 7. Three groups of islands, called Tonga, Haabai, and Vavau, constitute the kingdom. The trade of the islands is mainly with Australia and New Zealand. Chief exports are copra, bananas, and oranges. *Area*, 390 sq. m.; *pop.* Europeans, 565, Tongans and others, 23,391. CAPITAL, Nukualofa, in Tongatabu.

	1912–13	1913–14	1914–15

British Agent and Consul, H. E. W. Grant, C.M.G. £850

MISCELLANEOUS ISLAND POSSESSIONS

ASCENSION

Ascension Island, in the South Atlantic, lat. 7° 53′ S., long. 14° 18′ W., is 960 m. from the African coast. It has an *area* of 35 sq. m., with an extreme length of 7½ m. and breadth of 6 m. The *pop.* is about 180. The island is a barren, rocky peak of purely volcanic origin, and destitute of vegetation, except at the highest point, 2,870 ft. high, but there is sufficient cultivation for the maintenance of 3,000 sheep. Turtles, for which the island is famous, are found in abundance between December and May. The port is called Georgetown, and is furnished as a naval station, with batteries and storehouses, for British ships on the west coast of Africa, and is under the control of the Admiralty. It is connected by the Eastern Telegraph Company with St. Helena, Sierra Leone, and Buenos Aires.

Commandant, Capt. H. C. Benett, R.M.L.I.
Surgeon, A. C. Rusack, R.N.
Assist. Paymaster in Charge, C. F. Webber.

FALKLAND ISLANDS

The Falkland Islands are situated in the South Atlantic Ocean between 51° and 53° S. lat. and between 57° and 62° W. long., about 300 m. east of Magellan's Strait. They consist of the East Falkland (area 3,000 sq. m.), the West Falkland (area 2,300 sq. m.), and about 100 small islands, with an area of nearly 1,200 sq. m., giving a total *area* of 6,500 sq. m. with a *pop.* in 1916 of 3,451. Mount Adam, the highest ground in the Colony, rises 2,315 ft. above the level of the sea. The islands were discovered by Davis in 1592, and visited by Hawkins in 1594. After being in possession of France and Spain successively, the Republic of Buenos Aires established a settlement in 1820, which was destroyed by the Americans in 1831. In 1832 the islands were taken possession of by the English for the protection of the whale fishery. The colony received regular grants-in-aid down to 1885, since which date it has been self-supporting. The entire

country is wild moorland, interspersed with rocks and stone runs. The climate is severe, but healthy, except for those predisposed to pulmonary affections. The islands are so well adapted for sheep farming that the whole acreage is devoted to that purpose. Whale-oil, wool, tallow, sheepskins, hides, and sealskins are the principal **exports.** The Governor is assisted by an Executive and a Legislative Council.

South Georgia, an island group 1,000 m. E.S.E., has been annexed to the colony. Its *area* is 1,000 sq. m., with a *pop.* of 1,000; it is snow-covered and sterile, but possesses eight whaling factories. The number of whales captured in 1914–15 was 5,097; 233,299 barrels of oil, with an approximate value of £658,583, were produced. Among other dependencies are the South Shetlands, Graham's Land, the South Orkneys (where the Argentine Government have, with the permission of H.M.'s Government, established a meteorological station), and the Sandwich group. Whaling operations are also carried on in these dependencies. The capital and port of the Falklands is Stanley, on East Falkland.

MAURITIUS

An island in the Indian Ocean 500 miles east of Madagascar, 2,000 miles from India, and 2,300 from the Cape, between 57° 18′ and 57° 48′ E. and 19° 50′ and 20° 31′ S. It is a British Crown colony. It has an extreme length of 39 m., an extreme breadth of 29 m., with an *area* of 720 sq. m.; a *pop.* of 375,420, including 260,882 of Indian origin or descent. It was discovered by the Portuguese in 1505, being then uninhabited and without any traces of previous occupation. Abandoned by them, it came in 1598 under the Dutch, who named it Mauritius, in honour of Prince Maurice of Nassau. They too made no permanent settlement, and abandoned the island in 1710. From 1715 to 1810 it was in the possession of the French, being called Ile de France, under whom it prospered greatly. During the war with France, it was taken by a British force, and by the Treaty of Paris (1814) it was ceded to England, the inhabitants being allowed to retain their own laws, customs, and religion. Its original name was reverted to. The island is divided into nine districts. Capital and chief port, Port Louis (*pop.* 48,489). A Governor presides over the administration, which is conducted by Executive and Legislative Councils. Of the Council of Government, numbering 27 members, 8 are *ex-officio* members, 9 nominated by the Governor, and 10 elected. There is a constabulary of about 600. French is spoken all over the island, but both languages are used in the Council of Government, and English in the Courts of Justice. The State aids the Churches with grants, the Roman Catholics being in a large majority. Length of railways 130 miles. The chief exports are sugar, rum, vanilla, molasses, spice, aloe-fibre, copra, and oil. About 95% of the value of exports is due to shipments of sugar, the crop of which in 1915 was valued at £3,360,000. 190 vessels with a tonnage of 374,810 entered and cleared in 1915. There are 432 m. of telegraph and 120 m. of telephones. There are various dependencies of the colony, under the administration of its Governor, scattered over the Indian Ocean. Their *total area* is 89·39 m.; *pop.* 6,690. Rodrigues comes first in importance, and its chief exports are beans, maize, salt fish, cattle, and fruit. It lies 320 miles east of Mauritius, and is under the administration of a Magistrate appointed by the Governor of Mauritius. *Pop.* 4,829. The Lesser Dependencies include the Chagos and Trois Frères Islands. Diego Garcia (pop. 517) is the most important, and its spacious bay was used as a coaling station for steamers. The St. Brandon or Cargados Islands are rich in guano deposits.

	1912–13	1913–14	1914–15

ST. HELENA

An island in the South Atlantic, 1,140 miles from the African coast, and 700 miles S.E. of Ascension, the nearest land. It is 10½ m. long, 6½ m. broad, has an *area* of 47 sq. m., with a *pop.* in 1916 of 3,594. It was discovered by the Portuguese commander, Juan de Nova Castella, on St. Helena's Day, May 21, 1502. Its discovery was kept secret until 1588. The Dutch held it from 1645 to 1650, when they abandoned it. The East India Co. took possession of it in 1651, but in 1665 it was again seized by the Dutch, who were, however, expelled the same year. Again, from Jan. to May 1673 it was in possession of the Dutch. From 1673 to 1834 it remained under the East India Co., who obtained a charter from Charles II, with the exception of the period 1815–21, when it was used as a place of imprisonment for Napoleon (*d.* May 5, 1821). In 1900 Boer prisoners were interned in the island. The island is well watered by clear springs; the climate is

mild and varies little. Port and capital is Jamestown, pop. 2,000, an Imperial coaling station. The opening of the Suez Canal and the consequent diversion of shipping from the island have led to its continuous decline, but the cultivation of flax is increasing, three mills being in operation, with an output of 385 tons of fibre and tow in 1915. A lace industry has also been started. The other industries are fishing and agriculture. The number of vessels calling at the island in 1915 saw 45, with a tonnage of 200,393. It is administered by a Governor and Executive Council.

	1913	1914	1915
Revenue	£9,411	£8,060	£6,466
Expenditure	10,632	15,884	12,253

SEYCHELLES ISLANDS

The Seychelles Islands are situated between 4° and 5° lat. S., and comprise altogether 90 islands. They are believed to have been discovered in 1505, but were first defined in 1743 by Labourdonnais, French Governor of Mauritius, whose name they originally bore. They were in possession of the French (and subsequently renamed Seychelles, in honour of the Vicomte Moreau des Séchelles, Controller-General under Louis XV) until 1794, when they were captured by H.M. ship *Orpheus*, and permanently ceded to Great Britain in 1814. They were, until 1903, dependent upon Mauritius, but in that year were erected into a separate Crown colony. They lie in the Indian Ocean, about 935 miles north of Mauritius, and include the Amirantes, Cosmoledo, Providence, Aldabra, Coëtivy, and other groups. They have a total *area* of 156 sq. miles, with a *pop.* in 1916 of 24,435 (12,435 males, 12,000 females). The largest and most populous island is **Mahé** (area 55½ sq. m.), whose capital, Victoria, has a safe and commodious harbour and is a coaling station. Smaller islands of the group are Praslin, Silhouette, La Digue, Curieuse, and Félicité. The Seychelles are under a Governor, with Executive and Legislative Councils. Although near the Equator, the *climate* is healthy and equable, and the islands are free from hurricanes and earthquakes. Apart from fisheries, the islands are entirely agricultural. The **exports** include coconut oil, vanilla, copra, guano, whale oil, and essential oils. The Government maintains a secondary school (King's College), a preparatory school, and a free school, with technical classes. The coinage consists of the Indian rupee and the Mauritius subsidiary coinage.

TRISTAN DA CUNHA

Tristan da Cunha is the principal of a group of islands lying in lat. 37° 6′ S., long. 12° 2′ W. It was taken possession of by a military force during the residence of Napoleon at St. Helena. Upon his death the garrison was withdrawn except three men, who, with certain shipwrecked sailors, were the founders of the present settlement. For a long time only one of the settlers had a wife, but subsequently the others contracted with a sea captain to bring them wives from St. Helena. The *pop.* numbers 102 (1916). The Cape Government offered in 1904 to settle the inhabitants in Cape Colony, but out of eleven families only three families elected to go. It was at one time proposed to give the island laws and a regular government, but it was found unnecessary, as the inhabitants practically enjoy everything in common, there is no strong drink on the island and no crime.

FORMER PACIFIC COLONIES OF GERMANY, NOW ADMINISTERED BY THE COMMONWEALTH OF AUSTRALIA

Samoa Islands.—By an agreement made between Great Britain and Germany Nov. 9, 1899, and approved by the United States in Jan. 1900, Upolu (area 345 sq. m.), Savaii (area 660 sq. m.), Manono, and Apolima were assigned absolutely to Germany; and Tutuila and the other islands to the United States. Equality as to freedom of trade was reserved to all three nations, which had previously jointly guaranteed the independence of the islands. The *pop.* is 36,000, of whom 500 are whites and 1,000 half-castes. The islands were administered by a Governor, with a native High Chief and Council. The seat of government is Apia, in Upolu. Chief **exports**, copra and cocoabeans. **Imports**, 1912, £251,263; 1913, £298,743; **exports**, 1912, £252,224; 1913, £266,962. **Imports**, American Samoa, £18,838; **exports**, £28,548. (Native population of American Samoa, 6,000.)

The former seat of government of the **Bismarck Archipelago** was Herbertshöhe, now named Kokopo, and the colony comprises islands formerly called New Britain, New Ireland, and New Hanover, and the **Solomon Islands**, Bougainville and Buka (area 4,200 sq. m., pop. 45,000). They had been a German possession since 1884. *Area* 27,200 sq. m.: *pop.* 250,000, including 685 Europeans. Chief exports, copra and coconut fibre.

Kaiser Wilhelm's Land was the German portion of New Guinea, and lies to the north of Papua. Its area, with Long Island, Dampier Island, etc., is about 70,000 sq. m., and the population 450,000, including 283 Europeans. Capital, Rabaul. Tobacco, cotton, coffee, and the coco-palm are cultivated with much success, and there are rich forests; petroleum deposits were discovered near Eitape in the south-west in 1914, but the quality

and extent of the supply are still doubtful. **Imports,** 1911, £400,741; 1912, £460,352. **Exports,** 1911, £601,342; 1912, £604,340.

Caroline and Marshall Islands.—This group of islands, in the Pacific Ocean, lies to the north of that portion of New Guinea which formerly belonged to Germany. The Carolines were purchased from Spain by Germany in 1899 for about £837,500. The chief islands in the **Caroline group** are Yap, Ponape, and Kusai. *Area* 560 sq. m.; *pop.* 50,000. The **Pelew group,** the most westerly of the groups, consists of 26 small islands, the largest of which is Babel-thuap. The *pop.* is about 10,000. The **Ladrones** are divided into two groups, the northern and southern. The former are volcanic and uninhabited, and the latter have a population of about 10,000. *Area* of Ladrones 250 sq. m. For administrative purposes there were three divisions: (1) the Eastern Carolines, capital **Ponape**; (2) the Western Carolines and Pelew Islands, and the Ladrones, capital **Yap**; (3) the **Marshall Islands,** capital **Jaluit.** These had been German since 1885. They include the Ratack and Ralick Islands. *Area* 150 sq. m.; *pop.* 15,000.

Australian Commissioner in the North-Western Pacific, Col. S. A. Pethebridge.
Chief of the Native Dept. T. Trood.

ISLE OF MAN

The Isle of Man (Mona) is an island in the Irish Sea, 54° 3′—54° 25′ N. and 4° 18′—4° 47′ W., nearly equidistant from England, Scotland, and Ireland. It has an *area* of 220 sq. m. (140,986 acres), with a *pop.* (1911) of 52,016. The total area of arable land is 71,851 acres and of permanent grass 17,711 acres. The live-stock consists of 5,851 horses, 21,519 cattle, 77,446 sheep, 3,954 swine. The island came into possession of the Crown in the reign of Henry IV, by whom it was granted to the Stanley family. The sovereignty passed to the Dukes of Atholl in 1736. The Crown purchased the rights of the Atholls in 1828 for £417,144. The island is divided into 6 sheadings or counties; there are 4 municipalities and 17 civil parishes. There is a separate Legislature—the Court of Tynwald, consisting of the Governor, appointed by the Crown; the Legislative Council, composed chiefly of ecclesiastical and judicial dignitaries appointed by the Crown, numbering 9 members, including the Governor; and the House of Keys, an assembly of 24 members, elected on a property qualification for 7 years. Imperial Acts of Parliament do not bind the Isle of Man, unless it is specially mentioned in them. The island possesses considerable mineral resources, lead ore (annual output, 323 tons), zinc ore (1,621 tons), salt (6,700 tons), limestone, slate, and sand being mined. The agricultural produce includes oats, barley, turnips and swedes, and potatoes. There are 46½ m. of railway, 25 m. of electric railway. The Prisoners of War Camps contain a population of 28,000.

CAPITAL: Douglas (21,192); other towns are Castletown (1,817), the ancient capital; Ramsey 4,247); Peel (2,605).

THE CHANNEL ISLANDS

The Channel Islands lie in the southern part of the English Channel, 8½ to 30 m. from the French coast. Anciently an appanage of the Duchy of Normandy, they have belonged to England since the Conquest. The total *area* is 76 sq. m. with a *pop.* of 96,900. They are divided into two separate governments, called Bailiwicks, that of Jersey (*area* 45 sq. m., *pop.* 51,903), and that of Guernsey (*area,* with Alderney, Sark, Herm, Jethou, etc., 31 sq. m., *pop.* 44,997). The capitals are respectively St. Helier and St. Pierre. The Crown appoints a Lieutenant-Governor and a Bailiff to each, and each has its representative legislature called the *States.*

The English Church is the established religion, and the islands are included in the see of Winchester. The people are an inter-mixture of French and English; the language is a *patois* of Norman-French, but modern French is the official language; English is taught in the schools, and is familiar to most of the inhabitants. The climate is mild and equable; agriculture is the chief industry, and the production of grapes and tomatoes (which ripen early in glass houses without any artificial heat), flowers and early vegetables has increased considerably of late years. The fisheries are important, embracing lobster and cod. Excellent granite is mined in Guernsey.

FOREIGN COUNTRIES

Note.—The information given in the following pages concerning the countries now at war must be considered as liable to modification, in view of present and future events. The times of mail transit are those for normal conditions.

The Editor has to express his warmest thanks to the various Governments of Foreign Countries, the British Representatives at Foreign Courts, and the Embassies and Legations in London, for invaluable help, freely given, in the revision of the articles.

ABYSSINIA, OR ETHIOPIA

Emperor (*Negus Negust*, "*King of Kings*"), Lij Yasu, G.C.V.O., *b.* 1896, *suc.* Dec. 1913.

(In the last week of September 1916 a revolution took place in Abyssinia, the revolutionary party deposing Lij Yasu, on the ground that he had pursued an anti-Christian and pro-Mahommedan policy, and nominating a daughter of the late Emperor Menelik, Empress of Abyssinia.)

Abyssinia, or Ethiopia, is an inland country of North-east Africa, lying, chiefly, between 5° and 15° N. and 35° and 42° E.; it occupies a highland region S.W. of the Red Sea. It is bounded N. by Eritrea (Italian), W. by the Anglo-Egyptian Sudan, S. by British East Africa, S.E. and E. by the British, Italian, and French possessions in Somaliland and the Red Sea, and has an *area* of 400,000 sq. m., with a *pop.* estimated at 8,000,000. The country is made up of a number of states, the chief of which are *Tigré* in the N., *Amhara* in the centre, and *Shoa* in the S.

On Dec. 13, 1906, an *Agreement* was signed between Great Britain, France, and Italy as to their interests in Abyssinia. It provided for the maintenance of the political and territorial *status quo* and of the open door; clauses dealt also with railway construction.

Each large province is under a Ras or feudal chief, the more important of whom form a Council of State, while under them are the governors of districts and the chiefs of villages. In October 1907 the formation of a Ministry was decreed; it is supposed to consist of about 8 members. The **army** numbers potentially some 250,000, mostly irregulars. The **religion** is a form of the Armenian and Coptic Christian Church, called Monophysite. The people are a mixed race: Semitic or Arabic type most prevalent; colour yellow-brown to black. There are also Mahommedans, Gallas and Somalis, and the Jewish Falashas, who number about 250,000. A decree ordering compulsory *education* for all male children over 12 was issued in October 1907, but is at present a dead letter.

Industries.—Cattle-raising (cattle, sheep, and goats) is the chief industry, there being a considerable export trade in hides and skins, the most of which eventually find their way to the United States. Although the country is pre-eminently suited for agriculture, little is done in this direction, mainly through indolence. Coffee, of which the export is not inconsiderable, might be much further developed. The Harrari coffee, grown in plantations in the Harrar district, is a fine yellow berry, and is mostly sent to Aden, where it is mixed with Mocha and sold as "long-berry Mocha" in the U.K. and America. In the S.W. there are enormous forests of Abyssinian coffee, which are as yet hardly exploited. Other products are civet, wax (which is found all over Abyssinia, the best being in the S.W.), rubber from wild trees, ivory, and gold, which is washed by the natives in many of the rivers and streams of the west (value, 1914, £50,000). The postal service is under the superintendence of French officials; there are two telegraph lines—one under Italian control and the other under Abyssinian Government control—and also some telephone lines. A *railway* runs from the port of Jibuti to Diré Dawa, 187 m., and in 1915 was extended to Adis Ababa. Import duties vary according to the place of entry, but as the officials as a rule cannot read the invoices, and have but a vague idea of the value of goods, the duty of 10% *ad valorem*, which is the usual duty at Harrar and Diré Dawa, varies in practice from 8 to 15%. The currency is the Maria Theresa silver dollar (value 2*s.*), but the Bank of Abyssinia has lately made an issue of bank-notes of 5, 10, 50, 100, and 500 dol.

CAPITAL, Adis Ababa (50,000); Harrar, in Eastern Abyssinia, has a *pop.* of 45,000.

Western Ethiopia—Consul, C. H. Walker (Gore) . . . .
Southern Ethiopia—Consul, A. W. Hodson (Mega) . . . .

Mail transit: 22–23 days.

AFGHANISTAN

Amir, Habibullah Khan, G.C.B., G.C.M.G., *b.* July 3, 1872; *succ.* Oct. 3, 1901; *enthroned*, Mar. 1902. *Heir*, his eldest son, Inayatulla, *b.* Oct. 20, 1888.

Afghanistan is an inland country of Asia, lying between 29° and 38° 20′ N. and 61° and 72° E., and forms the north-eastern portion of the great Iran plateau. Its breadth is about 500 m., and its length, from the Herat territory to the Khaibar, about 600 m. Its *area* is about 245,000 sq. m. The *capital* is Kabul. There is no Afghan nation; the *pop.* 4,500,000, consists of discordant tribesmen, the chief being Durranis and Ghilzáis, who are only kept in subjection by the strength of the Amir. The four principal provinces are Kabul, Turkestan, Herat, and Kandahar. Most of the tribesmen are Suni Mahommedans. The languages spoken are Persian and Pushtu. The Amir has a subsidy of 18 lakhs (£120,000) per annum from the Indian Government. By a treaty of 1893, confirmed in 1905, the Amir accepts the advice of the British Government in regard to his relations with foreign powers, and is guaranteed against unprovoked aggression on his dominions. By the *Anglo-Russian Convention*, 1907, the British Government declared that it had no intention of changing the political *status quo*, would not annex or occupy the country, nor intervene in its internal administration, and undertook not to act or encourage Afghanistan

to act in a way to threaten Russia. The Russian Government declared that Afghanistan was outside the Russian sphere of influence, and undertook to act in all political relations with Afghanistan through the British Government, and not to send agents to Afghanistan. Equality of treatment in trade matters for both countries was agreed upon. The *army* numbers on peace strength about 40,000 regulars and 25,000 irregulars, whilst the State possesses sufficient rifles to equip another 100,000 men.

The country is for the most part mountainous, but there are wide tracts of well-irrigated and productive land. On these there are generally two crops a year, the spring crop consisting of wheat, barley, and a variety of lentils; the other, the autumnal, consists of rice, maize, tobacco, beet, and turnips. Melons, water-melons, and grapes, as well as all European fruits, are produced in abundance, and form a principal article of food, the surplus being exported. Madder and saffron are also important crops. Manufactures include silk, felts, praying-carpets, and articles made from camels' and goats' hair. There is little mineral wealth in the country, but some iron and gold are found.

Agent to the Governor-General of India at Kabul, Hafiz Saifullah Khan (Rs. 1,250).

ALBANIA

An autonomous state, carved out of the former possessions of Turkey in Europe, and declared independent at the Conference of London, 1913. The country is in a perpetual state of anarchy, not improved by the European war. The people being of an independent and lawless nature, Turkish authority over the country was authority only in name. The cultivation of grain and cattle-rearing are the chief industries, but there is some mining (mineral pitch), and olive oil, valonia, sumach leaves, and tobacco are also produced. The *pop.* is probably about 1,500,000, of whom 1,200,000 are Albanians. The majority of the population is Mahommedan. The principal towns are Scutari and Durazzo. An International Commission of Control was set up by the powers to direct the organisation and progress of the State (*British Representative*, Harry H. Lamb, C.M.G.). Prince Frederick William of Wied was elected Mpret, but Essad Pasha has claimed the dignity of ruler, and is acknowledged by the Entente Powers.

ANDORRA

A small republic in the Pyrenees under the joint suzerainty of France and the Spanish Bishop of Urgel. There is a Council General of 24, elected by the inhabitants. *Area*, 175 sq. m., *pop.* 6,000.

ARABIA

Arabia is a large peninsula in S.W. Asia, lying between 34° 30′ and 12° 45′ N., and 32° 30′ and 60° E., bounded W. by the Red Sea, S. by the Gulf of Aden and the Indian Ocean, and E. by the Gulf of Oman and the Persian Gulf. It has an *area* of about 1,000,000 sq. m., and a *pop.* of about 12,000,000. The country is very little known to Europeans, but Burckhardt, Sir Richard Burton, the Blunts, and Baron E. Nolde have made interesting expeditions, which have added much to our knowledge of the peninsula. One-third of the area is desert, but there are many tracts of fertile soil, round which the population is settled, and agricultural, otherwise it is nomad and pastoral. The two best-known provinces are those of the Hedjaz and the Yemen on the west. They contain the Holy Places of the Mahommedans, Mecca and Medina; they were formerly under Turkish rule, but the Arabs revolted in 1916 against the subservience of the Young Turks to Germany, and declared their independence. **H.H. the Grand Sherif of Mecca** is the ruling sovereign. Outside these provinces the country is practically divided between the Bedouin tribes, the chief of which, the great Shammar tribe, has its centre at Hail, with a permanent pop. of about 10,000; and the fanatical Wahabite tribes of the oases, whose gathering-place and centre is at Riadh. The chief **exports** are dates, sheep and goat skins, mother-of-pearl and gum, but all in very small quantities.

ARGENTINE REPUBLIC

President, Señor Hipolito Irigoyen (1916).
Vice-President, Pelagio Luna.
Ministry: Minister of the Interior, Ramon Gomez.
Foreign Affairs and Worship, Carlos Becu.
Finance, Francisco J. Oliver.
Justice and Public Instruction, Jose Salinas.
Agriculture, Onorio Puerredon.
War, Elpidio Gonzalez.
Marine, Francisco Alvarez Toledo.

Minister in London (vacant), 2 Palace Gate, W.
Secretaries, Jacinto L. Villegas, Luis H. Dominguez.
Attaché, Carlos M. Dominguez.

Consul-General, Dr. S. Garcia Uriburu, 601 Salisbury House, Finsbury Circus, E.C.
Consul Assist. Arturo Parker.
Consuls at Liverpool, Señor Don Juan Carlos Godoy; Señor Don Eugenio C. del Busto.
Consul at Manchester, Señor Don Arnaldo, Torres.

The Argentine Republic is a group of 14 provinces and 10 territories with an extensive seaboard on the east coast of South America. It extends from 21° 55′ S. to 55° 2′ S., and from 53° 40′ to 73° 17′ W., and has an *area* of 1,135,840 sq. m. *Pop.* (census of 1914—the first for 20 years), 7,885,237, of whom 2,357,952 were foreigners, the great majority of Spanish and Italian origin, the Anglo-Argentine population being about 40,000. Spanish is the language of the country.

The **constitution** of 1853, modified in 1862 and 1898, closely resembles that of the U.S. It vests the executive power in the hands of a President, who is also Commander-in-Chief of the troops, elected by representatives of the provinces for six years, not being immediately re-eligible; and the legislative authority in that of a Senate of 30 members, two chosen by the capital and two by the legislature of each province, and a House of Deputies, of 120 members, elected for four years by the people, one-third of the Senate retiring every three years and one-half of the House retiring every two years. The President has a salary of about £6,000 per annum, and the Vice-President about £3,000. Senators and Deputies are paid about £1,060 a year. The provinces elect their own governors and legislatures, and have complete control over their internal affairs. The **State religion** is Roman Catholic, but all others are tolerated. **Education** is free, secular, and compulsory between 6 and 14, but there is quite 50% of illiteracy.

Army and Navy.—In the army there is compulsory service from 20 to 45 years—1 year with the colours, 9 army reserve, 10 years national guard, 5 years territorial guard. Peace strength, about 24,000; war strength, about 250,000. Armament, a new model Mauser rifle and a Krupp

quick-firing 7·5 c.m. field-gun. Navy consists of 4 battleships, 4 armoured cruisers, and 40 other craft; the principal naval base is Port Belgrano; the *personnel* numbers 6,500 with 569 officers.

The climate is temperate and healthy, and the soil gives scope for every kind of pastoral and agricultural pursuit. The Republic is gradually taking its rank with the largest nations of the mercantile world, and the resources which still lie undeveloped promise for it a still more important position. There are at present only some 60,000,000 acres under cultivation, leaving 305,000,000 acres of available agricultural land. Argentina occupies the first place among the world's linseed-producing countries (export, 1915, 981,192 metric tons), and is in the forefront as a shipper of maize (4,330,594 metric tons in 1915) and of wheat (2,511,514 metric tons in 1915). Other important exports are wool, meat, hides and quebracho logs and extract. In the total number of sheep (85,000,000) the country occupies the second place in the world; there are also 30,000,000 cattle, 10,000,000 horses, 600,000 mules, and 3,100,000 pigs. Mining has not developed to any extent, only a small amount of copper and wolfram being produced, but attention is now being paid to petroleum, and it is estimated that the output of the Comodoro Rivadavia oilfields (which was 75,000 tons in 1915) will be 151,600 tons in 1916. The cultivation of cotton has been seriously undertaken in the semi-tropical districts of the Chaco, and in Misiones. In the Andean province of Mendoza may be said to be centred the wine and fruit industries of the country. Well irrigated by the waters of the Andes, the soil is of remarkable fertility. Some £6,500,000 worth of wine, much of it of most excellent quality, is produced yearly, but there is scope for expansion, as the production falls far short of the importation of foreign wines. Fruits grown comprise the custard apple, oranges and lemons, apples, peaches, plums, figs, quince and cherry. There is said to be nearly £500,000,000 of British capital invested in Argentina, most of it very profitably. The length of railways is 21,880 m., connecting the capital with the principal cities of the Republic; telegraphs, 43,790 m.

CAPITAL, Buenos Aires (*pop.* 1914, 1,596,000); other large towns are Rosario (219,677), Cordoba (135,000), La Plata (106,382), Tucuman (78,695), Bahia Blanca (72,706), Mendoza (60,000), and Santa Fé (48,600).

AUSTRIA-HUNGARY

Reigning Sovereign, Karl I (Karl Franz Josef, son of the late Archduke Franz Josef Otto), *b.* Aug. 17, 1887; *suc.* Nov. 21, 1916, on the death of his uncle, Franz Josef I; *m.* Oct. 21, 1911, Princess Zita of Bourbon Parma, and has *issue*: (1) Archduke Franz Josef Otto, *b.* Nov. 20, 1912 (*Heir Apparent*); (2) Archduchess Adelheid, *b.* Jan. 3, 1914; and (3) Archduke Robert Karl Ludwig, *b.* Feb. 9, 1915.

The Common Ministry

Minister for Foreign Affairs, Baron Stephan Burian (*b.* 1851).
Finance, Dr. E. von Körber.
War, Ritter von Krobatkin.
Navy, Admiral Anton Haus.

The second largest country on the continent of Europe, having an *area* of 239,977 sq. m., and a *pop.* of 51,340,603.

Austria-Hungary is a dual monarchy composed of a Cisleithan portion known as Austria, and a Transleithan portion known as Hungary. The reigning dynasty is the Hapsburg-Lorraine dynasty, and the law of succession is that the Crown passes by right of primogeniture and lineal succession to males, or, in default of males, to females. Each country has, according to the **Ausgleich**, or Compromise made in 1867, its own constitution, a limited monarchy, and each possesses a separate parliament, but they have united in the establishment of a common army and navy, and in the conduct of foreign affairs. The examination of the requirements of the common services and the recommendation of the money to be voted for common purposes are entrusted to the **Delegations**. Of these there are two, each composed of 60 members, representing the legislative bodies of Austria and Hungary, the Upper Houses returning 20 and the Lower Houses 40 delegates. The members of the Delegations are appointed for one year, and are summoned annually by the Emperor alternately at Vienna and at Budapest. They are, in effect, select committees of the legislative bodies. There are three executive departments for common affairs, viz. Foreign Affairs, War,

and Common Finance, besides the Common Court of Public Accounts. The **Ausgleich** is expressly subject to periodical revision, only so far as it affects the regulation of the fiscal and commercial affairs of the two countries, the quota paid by them to the common expenses of the Empire, and the privileges of the Austro-Hungarian Bank. The customs and commercial treaty, agreed to in 1867 was denounced in Dec. 1896 by the Hungarian Government in order to secure, if possible, more favourable terms for the future. The treaty expired Dec. 31, 1897, but was prolonged provisionally. During 1899 the contributions to the common expenditure were fixed thus: Austria, 65·6%; Hungary, 34·4%. In 1902 the Szell and Körber Ministries arrived at an agreement, but this was never formally approved by the two Parliaments.

After prolonged negotiations a new Customs and Commercial Treaty was signed, Oct. 8, 1907, which recognised the equality and freedom of action of each contracting party, and a separate (but identical) customs tariff for each country. It provided for a Court of Arbitration for the settlement of differences between the two countries; and for the redemption by Hungary of her share of the old joint debt by capitalisation of her interest at the rate of 4·325% within ten years. In regard to joint expenditure, the Hungarian Government consented to raise its quota from 34·4 to 36·4. The Treaty was ratified by both Parliaments during Dec. 1907, and came into force on Jan. 1, 1908.

The **revenue** and **expenditure** for Common Affairs was: in 1912, £23,980,295; 1913, £24,966,757; 1914, £24,405,105.

The principal exports are sugar, eggs, timber, glass and glassware, lignite, woollen-ware, leather gloves and shoes, malt, cattle, and hops, and the principal imports, raw cotton, coal and coke, raw wool, raw silk, hides and skins, coffee, maize, tobacco, and books.

	1912	1913	1914
Imports	£146,093,342	£141,433,000	£114,716,666
Exports	118,199,993	115,129,000	83,995,833

Exports to U.K., 1913, £7,705,949 (the last representative year):

Eggs	£375,943	Glass	£188,395
Sugar	4,250,696	Leather & manuf.	508,637

Imports from (and of) U.K., 1913, £4,480,768:

Coal and Coke	£859,241	Metals & manuf.	£263,646
Chemicals	79,550	Ships and Boats	382,415
Cottons	373,630	Woollens, etc.	295,704
Machinery	474,466	,, manuf.	476,760

In 1914 Austrian exports to the U.K. amounted to £4,421,712, and imports of U.K. produce to £2,676,345.

Austria

Ministerial Council, Premier, Dr. Ernst von Körber.
Finance, Karl Marck.
Education, Dr. Max von Hussarek.
Commerce, Dr. Franz Stibral.
Railways, Gen. E. Schaible.
Interior, Baron von Schwartzenau.
Justice, Dr. Franz Klein.
Agriculture, Count Heinrich Clam-Martinitz.
National Defence, Marshal von Georgi.
Works, Ottokar Trnka.

Austria has an *area* of 115,903 sq. m., and a *pop.* in 1911 of 28,826,940. The variety of races and languages is very great: there are 9,950,266 Germans; 6,435,983 Bohemians, Moravians, and Slovaks; 4,967,984 Poles; 3,518,854 Ruthenians; 1,252,940 Slovenes; 783,334 Serbians and Croats; and 768,422 Italians. The empire is governed by an Emperor and by the **Reichsrath**, or Council of the Empire, consisting of an Upper House and a Lower House. The present Upper House contains 237 members. It is composed of the Princes of the Imperial family who are of age, of whom there are 14, of 74 hereditary nobles, of 18 archbishops and bishops, and of a minimum of 150, with a maximum of 170, life-members nominated by the Emperor for distinguished services in science or art, or to the Church or State. The Lower House is elected for 6 years, by universal equal and direct suffrage. Every male above 24 who has resided for a year in his district is entitled to a vote. The number of deputies is 516, and they are returned by the 17 provinces in the following proportions: Lower Austria (64), Upper Austria (22), Salzburg (7), Steiermark or Styria (30), Carinthia (10), Carniola (12), Trieste (5), Görz and Gradisca (6), Istria (6), Tyrol (25), Vorarlberg (4), Bohemia (130), Moravia (49), Silesia (15), Galicia (106), Bukowina (14), and Dalmatia (11). Members of the Lower House receive 16*s.* 8*d.* per day while in attendance, with travelling expenses. Each of the 17 provinces has also a separate Diet of its own.

Agriculture is the principal industry, employing nearly 14,000,000 of the population, wheat, barley, oats, and rye being the chief crops. There are 1,802,848 horses, 9,160,009 cattle, 2,428,101 sheep, and 6,432,080 pigs. Iron ore is worked extensively (29,266,857 metric tons), also coal and brown coal, while quick-silver is found in Carniola, manganese in Bukowina and Carniola, graphite in Bohemia, Lower Austria, Styria, Moravia, and petroleum and ozokerit in Galicia.

CAPITAL: Vienna (2,031,498); other chief towns are Prague (223,741), Lemberg (206,113), Trieste (160,993), Krakan (154,141), Gratz (151,781), Brünn (125,737).

Hungary

Ministerial Council, Prime Minister, Count Stephen Tisza.
Interior, Johann Sandor.
National Defence, Field-Marshal Samuel Hazai.
Education and Public Worship, Dr. Adalbert Yankovich.
Justice, Dr. Eugen Balogh.
Finance, Dr. John de Teleszky.
Commerce and Industry, Baron Johann Harkanyi.
Agriculture, Baron Emeric Ghillanyi.
Croatia and Slavonia, Count Theodore Pejacsevich.

Hungary has an *area* of 125,430 sq. m., and a *pop.* of (including Croatia and Slavonia) 21,030,000. The various races include 10,050,575 Magyars, 2,037,435 Germans, 1,967,970 Slovaks, 2,949,032 Rumanians, 1,833,162 Croats, and 1,106,471 Serbs. The kingdom includes Hungary, Croatia-Slavonia, and Transylvania, and is governed by a King (the Emperor of Austria) and a **Reichstag**, consisting of a House of Magnates and a House of Representatives. The former comprises 227 hereditary peers, paying land-tax of at least 6,000 crowns a year, some 50 high ecclesiastical dignitaries of the Roman Catholic, Greek, and Protestant Churches, 69 life peers, all the archdukes who have attained their majority, 3 delegates from the Diet of Croatia-Slavonia, and

17 state dignitaries and judges. The House of Representatives contains 453 members, elected for five years; of these 413 represent Hungary and 40 Croatia-Slavonia. Members of the Lower House receive £200 a year, with £66.13.0 for house rent. Of the various religions in Hungary Roman Catholics number 10,888,133, Greek Catholics 2,025,508, Greek Orientals 2,987,163, Calvinists 2,621,329, Lutherans 1,340,195, and 932,458 Jews.

Agriculture is the chief industry, providing employment for 68·4% of the population, but most of the peasantry live in grinding poverty, and consequently emigration is heavy. The live stock comprises 2,005,000 horses, 6,206,800 cattle, 6,659,858 sheep, and 6,824,657 pigs. The chief mineral products are coal and lignite, iron, silver, and gold. Salt and tobacco manufactures are government monopolies.

CAPITAL: Budapest (880,371). The only other town with a pop. of over 100,000 is Szeged (118,328).

	1912	1913	1914–15
Revenue	£77,197,791	£84,156,000	£94,339,745
Expenditure	77,195,583	84,154,000	94,337,368
Public debt	—	225,289,900	—

Mail transit: Vienna, 31 hours; Budapest, 38 hours.

BELGIUM

King, Albert, *b.* April 8, 1875; *suc.* his uncle, Leopold II, Dec. 17, 1909; *m.* Oct. 2, 1900, Princess Elisabeth of Bavaria, and has issue: (1) the Heir Apparent; (2) Prince Charles Theodore, *b.* Oct. 10, 1903; (3) Princess Marie-José, *b.* Aug. 4, 1906.
Heir Apparent, H.R.H. Prince Leopold, Duke of Brabant, *b.* Nov. 3, 1901.

Temporary Seat of Government: Havre.

Ministry, Prime Minister, and Minister of War, Ch. de Broqueville.
Science and Arts, M. P. Poullet.
Finance, M. A. Van de Vyvere.

Minister in London, M. Paul Hymans, 59 Sloane Gardens, S.W.
1st Secretaries, G. de Ramaix, Ch. Maskens, Count Ph. de Beauffort.
2nd Secretaries, Count G. de Grunne, H. Bernard.
Consul-Gen. M. E. Pollet, 37 Bedford Square, W.C.

A kingdom of North-west Europe, lying between 49° 30′ and 51° 30′ N. and 2° 32′ and 6° 7′ E., and having an *area* of 11,373 sq. m.; *pop.* (1912) of 7,571,387. By the constitution of 1831, following on the secession from the Netherlands in 1830, Belgium was declared to be a constitutional and hereditary monarchy. Belgium is a neutral power, her neutrality being guaranteed under the Treaties of London, 1831 and 1839, by Great Britain, Austria, France, Prussia, and Russia. The principle of manhood suffrage with compulsory voting prevails, tempered by the plural vote and proportional representation of minorities, based upon a somewhat intricate system. All citizens over 25, who have lived at least a year in the same commune, have a vote. An additional vote is accorded them if they are (1) either 35 years of age, married, with legitimate offspring, and pay a tax of at least 5 fr. to the State; or (2) are 25 years old and own immovable property to the value of at least 2,000 fr., or have a corresponding income from such property, or for two years have received at least 100 fr. a year from Belgian funds. Two additional votes are given to citizens of 25 years of age who possess a diploma of higher education or have filled a public or private position implying the possession of such education. No citizen can have more than 3 votes. From this electorate both Houses of the Legislature are chosen, save for those senators who are elected indirectly. The **Senate** of 120 members is elected for 8 years. The number of members elected directly is equal to half the number of deputies. The indirectly elected senators are chosen by the provincial councils, 2 for each province with less than 500,000 inhabitants; 3 for each with more than 500,000 and less than 1,000,000; and 4 for each with over 1,000,000. The **Deputies** are elected for four years, in the proportion of 1 to every 40,000 inhabitants, and number 186. One-half retire every two years. Senators must be 40, and deputies 25 years of age. Each deputy receives 4,000 fr. yearly, and travels free. There are 9 provinces: Antwerp (Anvers), Brabant, Flanders (E. and W.), Hainaut, Liége, Limbourg, Luxembourg, and Namur. Local government is carried on by 9 provincial and 2,632 communal councils. The country is divided by a difference of language, the Flemish inhabitants in the north using the Flemish tongue in all its varieties of local *patois*, while the Walloons of the southern provinces speak French. There are 3,220,662 who speak Flemish only, 2,833,334 who speak French only, and 871,288 who speak French and Flemish. The north, too, is chiefly agricultural, and the south industrial. Almost the entire population is of the Roman Catholic faith, but full religious liberty prevails, and grants are made from the national treasury to all denominations. Primary **education** is compulsory; higher education is well provided for. There are universities at Ghent, Liége, Louvain, and Brussels. Education is very largely under clerical control, which is a great grievance from the Liberal and Socialist point of view. The success of the manufacturing industries of the country is attributed, to a certain extent, to the high standard of technical education prevailing. The amount of damage and destruction wantonly caused by the Germans in their endeavour to bring about a reign of terror has been very great, and it will take a considerable amount of time to repair their ravages, as well as to reclaim the polders near the coast, which were flooded as a means of defence.

Industries.—Agriculture, mining, iron, sugar, and textile manufacturing were the chief industries, and textiles, sugar, machinery, and agricultural products the chief exports. There was an Agricultural Commission for each province, and a Special Council advised the Government as to the best means of promoting the various national industries. There are 2,915 m. of **railway** in operation, of which 2,697 were owned and worked by the State. The total length of the canals and navigable waterways was 1,350 m., 35% of which were under the direct control of the State, and the cheap transport thus rendered possible gave to all industries an incalculable advantage. Raw materials were admitted free of duty, but there were small duties on manufactured goods imported.

CAPITAL, Brussels, with a pre-war pop. of 720,347; other large towns were Antwerp (402,328), Liége (242,357), and Ghent (210,428).

	1913	1914
Revenue	£30,306,185	£32,292,541
Expenditure	30,221,604	32,270,175
Public debt	148,378,323	—
Imports	186,429,000	185,464,000
Exports	156,064,000	145,383,000

Exports to U.K., 1913, £23,382,268 (the last normal year):

Apparel	£218,772	Iron, Nails	£257,191
Brooms & brushes	125,732	,, Ship's Plates	464,567
Chemicals	245,248	Linen yarn	769,297

Naval Attaché, Captain M. H. Hodges, M.V.O., R.N.	
Hon. Attaché, Charles K. Webber	

BRITISH CONSULAR OFFICERS
(Suspended)

Mail transit: Brussels, 9 hours.

POLITICAL PARTIES IN BELGIUM

Before 1893 there were practically only two parties—the Clerics or Catholics, and the Anti-Catholics or Liberals. Gradually, however, after the amendment of the Constitution in 1893 a strong and well-organised party of Socialists sprang up. As a general rule, the Socialists are stronger in the Walloon provinces, and the Catholics in the Flemish provinces. The Clerical party has been predominant in the Chamber since 1884, but its strength has diminished. Of late years it has been divided by a breach between the Old Right and the Young Right, and in 1911 a union of the Liberals and Socialists against the Clerical education policy resulted in the downfall of M. Schollaert's Cabinet. The result of the elections of 1912 was, however, favourable to the Clerical party. Before the Dissolution the Chamber, which then consisted of 166 members, contained 86 Clericals, 44 Liberals, 35 Socialists, and 1 Christian Democrat. The new Chamber, consisting of 186 members, contained 101 Clericals, 45 Liberals, 38 Socialists, and 2 Christian Democrats.

The Belgian Congo

In 1908 the Congo Free State became a Belgian colony. It had previously been recognised by the International Congo Conference of Berlin, 1885, as a sovereign power under Leopold II. The *area* is about 909,000 sq. m., and the *pop.* is variously estimated at 15,000,000 and 9,000,000. The white population is not more than 5,465. The greater portion of the colony lies between 4° N. and 10° S. and 18° and 30° E. and is situated inland, the coast-line having a length of only 25 m. The King of the Belgians is represented in the colony by a **Governor-General** who is the head of the Government; there are 4 subsidiary governments, each under a Vice-Governor-General; European Commissioners, aided by civil and military officials, govern the twenty-two administrative districts into which the country is divided. The inhabitants belong to the Bantu-Negro stock, and are divided into a great number of tribes, each autonomous, and each speaking a different language or dialect of Bantu. Sleeping-sickness, a parasitic disease due to the *trypanosoma gambiense*, was for long a scourge, being particularly prevalent in Central Africa. By systematic examination and vaccination of the natives it is now kept well under. The short and barren coast-line is divided by the Crystal Mountains from the central zone, which is well-watered, and extremely fertile. The Congo, one of the largest rivers in the world, is an important means of communication; it is navigable for large vessels from its mouth to Matadi, a distance of 90 m. The State has 11 steamboats on the Lower Congo and 36 on the Upper Congo, besides a small flotilla of sailing-boats. At the termination of the Upper Congo are the celebrated Stanley Falls, extending in a series of seven cataracts a distance of nearly 60 m. The **railway system** is extending rapidly; one, 250 m. in length, connects Matadi and Leopoldville. Another, 127 kilometres in length, connects Stanleyville and Ponthierville. Other lines are the Mayumbe from Boma to Ischela (86 m.); the Grand Lacs, which stretches 116 m. from Kabola up to Lake Tanganyika, thus linking the whole of the Upper Congo with the railway from Dares-Salaam to Udjidgi; the Katanga railway stretches from Elizabethville to Bukama (204 m.). The **exports** consist mainly of rubber, ivory, nuts, and palm oil. Coffee, cocoa, tobacco, and rice are grown to some extent. Mining is developing, gold, copper, tin, and other metals being found. Copper is the chief metal, the Union Minière working a large and rich belt in the Katanga district.

CAPITAL, Boma.

Governor-General, M. Henrij (app. 1915).

* Temporary seat of Government at Havre.

The New HAZELL, 1917

Envoy Ex., Min. Plen. and Consul-General in London, Col. Don Pedro Suárez, 74 Compayne Gardens, West Hampstead.
Secretary, (vacant).
Consulate-General, 81 Cannon Street, E.C.

The Republic of Bolivia is bound N. and E. by Brazil, S.E. by Paraquay, S. by Argentina, S.W. by Chile, and W. by Peru, and extends, approximately, from 9° 44′ to 22° 50′ S. lat., and from 58° to 70° W. long. Bolivia has no sea-coast, having lost her own to Chile during the war of 1875–80. A treaty with Chile was signed on Oct. 17, 1904. Bolivia was given free transit through Chile to the Pacific ports, with Customs Officers at Antofagasta and Arica, from which a railway runs to La Paz. *Area* est. at 708,195 sq. m., with a *pop.* (1914) of 2,520,000, comprising 50% Indians, 27% mixed, and 13% white.

The executive power is in the hands of a *President*, elected for four years, with a **Congress** of two chambers, a Senate of 16 members, elected for six years, and a Chamber of 75 Deputies, elected for four years, by universal suffrage, as is also the President. Prefects administer the 9 departments into which the country is divided, and subordinate officers the 55 provinces and 437 cantons making up the departments. The Roman Catholic is the State **religion**, but liberty prevails. *Education* is free and obligatory, though the law is not strictly enforced. **Army** service nominally universal and compulsory, with two years' colour period; peace strength, 4,000; war strength said to be 85,000. As to *currency*, the standard is a gold one, English and Peruvian sovereigns and half-sovereigns circulating as legal tender. The exchange is fixed at 12 Bolivianos 50 c. to the £1, but in practice this exchange varies considerably.

Bolivia is a very rich country, abounding in minerals, but commercially it is yet new, and the articles it buys and sells are naturally characteristic of such a country. Minerals and rubber represent more than 80% of the exports, and more than 50% of the imports are manufactured articles. It is the second rubber-producing country of South America (coming next to Brazil), with an annual output of over 2,000 tons. Its minerals are varied; the chief are tin (amount exported in 1915, 91,612 tons, being a record for the state) and silver (mainly in the hands of the Huanchaca Company at Palacayo), others being copper, bismuth, and wolfram. But industry is wanting in the country, which offers a wide field to European labourers. Agriculture is very backward, due to primitive methods and implements. The valleys of the eastern cordillera are fertile, and, with the aid of irrigation, are well suited for growing varied crops; potatoes, maize, rice, barley, indigo, quinine bark, various fruits, and medicinal herbs are grown. The length of **railways** is about 800 m., but much construction is going on. Laws have been passed establishing State monopolies on alcohol, tobacco, and spirituous liquors of all kinds.

CAPITAL: La Paz (79,910); other towns are Cochabamba (24,512); Potosi (23,450); Sucre (23,416); Oruro (20,670); and Santa Cruz (20,535).

	1913	1914	1915
Revenue	£1,765,800	£1,724,348	£1,282,760

BORNEO

A large island of the Malay Archipelago, extending from 7° N. to 4° 20′ S., and from 108° 53′ to 119° 22′ E., and divided into various states. Estimated total *area*, 300,000 sq. m.; *pop.* 1,846,000. The Netherlands claims as a possession 212,737 sq. m. of territory on the S., E., and W. of the island, with a pop. of about 1,250,000. In reality this immense tract is parcelled out into various native states. Those on the coast are more or less under Dutch influence. The principal Dutch settlements are at Sambas, Pontiana, Banjarmassin, and Koti. On the N.W. coast is Sarawak, to the N.E. lies Brunei, and beyond that British North Borneo. Between British North Borneo and the Dutch territories on the east is the native state of Sulu. The whole island is rich in valuable timber, woods, fruits, spices, drugs and gums, and has a varied fauna. Minerals: coal, iron, gold, diamonds, antimony, and quicksilver, while petroleum (output, 1914, 1,500,000 tons) is found in Koti and portions of the east coast. Soil exceedingly fertile, and well adapted for the cultivation of all tropical products. Principal **exports:** sago, beeswax, edible birds' nests, camphor, rattans, gold, pepper, caoutchouc, gutta percha, spices, drugs and dyes, etc. The people belong to various races—Malays, Dyaks, Kyans, Negritos, Bugis, and Chinese. Tattooed races, Kanowits, Pakatans, and others, inhabit the interior.

BRAZIL

President, Senhor Wenceslao Braz (1914–18).
Vice-President, Senhor Urbano dos Santos.
Ministry: Foreign Affairs, Dr. Lauro Müller.
Interior, Senhor C. Maximiliano Pereirados Santos.
Finance, Senhor J. Pandia Calogeras.
Marine, Admiral A. Faria de Alencar.
War, General José Caetano de Faria.
Agriculture, Senhor José Bezerra.

Minister in London, Senhor A. da Fontoura Xavier, 51 Upper Brook St., W.
1st Sec. Senhor Arminio Mello Franco.
Secs. Sylvio Rangel de Castro, Antonio Fialho.
Commercial Attaché, F. Guimarães.
Consul-General in London, F. A. Vieira, Coventry House, South Place, Finsbury, E.C.
Consul-Gen. in Liverpool, Sully José de Souza.

The republic of Brazil, the largest state in South America, extends between lat. 4° 21′ N. and 33° 45′ S. and long. 34° 50′ and 73° 50′ W., and comprises an *area* of 3,291,416 sq. m. and a *pop.* (1913) of 24,308,219, consisting of whites, negroes, or mixtures of these, and Indians. Brazil touches every other country in South America except Chile. The language is Portuguese. Brazil, until 1889, was an empire under Pedro II, of the house of Braganza. A revolution then, however, broke out, and a new Constitution was adopted in February 1891. The chief feature of

this was the establishment of the old provinces as twenty-one separate states, self-governed except that all fiscal matters, the maintenance of order, the defence of the country, and the currency were reserved to the Federal Government. The Executive authority is in the hands of the *President*, elected for four years by the people directly. Legislative authority is exercised by the **National Congress,** composed of a Senate of 63 members, directly elected by the states for nine years, one-third retiring every three years, and a Chamber of Deputies of 212 members directly elected, with minority representation, for three years. Deputies and Senators are paid. The former must have been citizens for four, and the latter for six years. All citizens, except soldiers, beggars, etc., possess the franchise. **Army** service is compulsory from 21 to 44, but there is voluntary enlistment as far as possible, with the ballot for filling vacancies. Terms of service: 2 years colours, 7 reserve, 7 second line, 4 National Guard, and 4 in its reserve. Peace strength of the army, 30,000; the war strength is mere speculation. There is no connexion between Church and State, and all religions are tolerated, but the Roman Catholic prevails. Education is free, but not compulsory, and illiteracy is very prevalent.

Industries.—As to **exports**, coffee and rubber together account for over 80% of the exports of Brazil. She is the largest producer of coffee, providing three-fourths of the world's supply—in 1915, 17,061,319 sacks, value £31,792,899. (The U.S. is the largest *consumer* of coffee, Germany and France coming next in the order named, the U.K. being only 14th in order.) The rubber production in 1915 was 35,165 tons, valued at £6,952,786. The other principle articles exported are yerba maté (value £2,400,000), which is becoming increasingly popular in Europe and the U.S. as a cheap substitute for tea—it grows wild in great abundance in the state of Parana; cotton (value over £2,000,000), hides (mostly to Germany), cocoa, principally in Bahia (value £1,600,000), tobacco, also mostly in Bahia, skins, and sugar. Agriculture is now being developed in a scientific spirit, and the production of such crops as rice, maize, and wheat is on the increase. There are inexhaustible mines of iron, and organised efforts are being made to develop them. Diamonds, gold, and manganese are also found, and there are inexhaustible forests, with over 5,000 species of wood, at least 40 of them being first-class; the timber trade, however, is not developed owing to difficulties of transport, costly rates, and a lack of good ports for quick loading and shipping. There are (1915) 17,290 m. of railway. A network of wireless telegraph stations is being constructed over Brazil. The **imports** to Brazil consist of every class of article, but principally of manufactured goods and food supplies. It is estimated that there are now in Brazil 3,664 industrial establishments, having a capital value of £48,030,000, giving employment to 168,764 persons. These establishments provide a large proportion of the necessities of home consumption. Of late years immigration has been encouraged, the immigrants coming mostly from Portugal Spain, and Italy.

CAPITAL: Rio de Janeiro (975,782); it is, however, an article of the Constitution that the capital of the Republic shall, at some future time, be built on the central plateau of Brazil—a lofty plateau in the State of Goyaz has been suggested for the purpose. Other large towns are Sao Paulo (332,000), Bahia (230,000), Recife (230,000), Belem (190,000), and Porto Alegre (147,000).

	1914	1915
Revenue	£37,980,000	£38,914,055
Expenditure	39,791,900	26,930,515
Debt (external)	81,945,760 (excluding state governments and municipalities £31,687,227)

The New HAZELL, 1917

BULGARIA

Tsar, Ferdinand I, *b.* Feb. 26, 1861, *y.s.* of the late Prince Augustus of Saxe-Coburg and Princess Clémentine of Bourbon-Orleans, a dau. of Louis Philippe. After the deposition of Prince Alexander in Sept. 1886, Prince Ferdinand was elected Prince of Bulgaria. His election was not formally recognised by the Porte and the Powers until Feb. 1896. In 1908 Bulgaria declared herself an independent kingdom and Prince Ferdinand was proclaimed Tsar. His sovereignty was recognised by the Powers in April 1909. He *mar.* April 20, 1893, Princess Marie Louise (*d.* Jan. 31, 1899), dau. of the Duke of Parma. *Issue:* (1) Prince Boris, *b.* Jan. 30, 1894 (*Heir Apparent*); (2) Prince Cyril, *b.* Nov. 17, 1895; (3) Princess Eudoxia, *b.* Jan. 17, 1898; and (4) Princess Nadejda, *b.* Jan. 30, 1899. Ferdinand I *mar.* secondly, Feb. 28, 1908, Princess Eleanora, *e. dau.* of Prince Henry IV of Reuss-Köstritz.

Ministry—Prime Minister, Foreign Affairs and Interior, M. V. Radoslavoff.
Agriculture, M. Dimtcheff.
Finance, M. Toncheff.
Justice and Education, M. Pecheff.
War, Gen. Naidenoff.
Commerce, M. Bakaloff.
Public Works, M. Dincheff.
Railways, M. D. Apostoloff.

The Kingdom of Bulgaria is bounded on the N. by Rumania, on the W. by Serbia and Greece, on the E. by the Black Sea, and on the S. by Turkey and the Ægean Sea; it has an *area* of 43,310 sq. m. and a *pop.* of 4,467,000. Bulgaria, in conjunction with Greece, Serbia, and Montenegro, began war with Turkey on Sept. 30, 1912 (*the first Balkan War*), and by the Treaty of London, May 30, 1913, gained a large amount of territory from Turkey. Bulgaria, owing to discontent with her share of the spoil, on June 29, 1913, went to war with her former allies (*second Balkan War*), and was badly defeated, loosing much that she gained, as, in addition, Rumania intervened, and exacted some 2,900 sq. m. of territory. The portion finally acquired from Turkey was about 10,000 sq. m. In Oct. 1915 Bulgaria again went to war, throwing in her lot with Germany, Austria, and Turkey, and attacking her old enemy Serbia.

The executive power in Bulgaria is vested in the King, assisted by a council of ministers, and the legislative power in a single chamber, the **Sobranje**, or National Assembly, elected for five years by manhood suffrage in the proportion of one member to every 20,000 of the pop. There is also a **Great Sobranje,** consisting of delegates selected in the proportion of 1 to 10,000 of the pop., to which constitutional and other questions, such as a vacancy in the throne or the acquisition of territory, must be referred. The State **religion** is that of the Orthodox Greek Church, to which over 3,000,000 of the pop. belong, but its Government is independent of the Orthodox Communion, and is carried on by the Bulgarian exarch and the national Synod of Bishops. There are a large number of Mahommedans among the population. Education is free and compulsory. Theoretically the State owns the land, but the practice is that the land is held on a perpetual lease by a multitude of small farmers, who pass it on to their heirs, and pay one-tenth of the produce as rent. All minerals belong to the State.

The chief **exports** are cereals (particularly wheat), eggs, attar of roses, and other agricultural and pastoral produce, while tobacco is largely grown round the new districts of Xanthi and Gumuljina; the chief **imports** are textiles, metal goods, machinery, colonial goods, hides, skins and leather goods, vegetable oils and soap, mineral oils, wood articles and coal.

Railways, 1,388 m., connect Sofia with Constantinople and Belgrade, and branches extend to Varna and Philippopolis.

CAPITAL: Sofia (102,769); other towns are Philippopolis (47,981), Varna (41,419).

	1912	1913	1914
Revenue	£7,610,920	£5,765,344	£10,279,800

CHILE, REPUBLIC OF

President, Señor Don Juan Luis Sanfuentes (1915–20).
Ministry—Interior, Señor Don Luis Izguierdo.
Foreign Affairs, Señor Don Juan Enrique Focornal.
Justice, Señor Alberto Romero Herrera.
Finance, Señor Luis Devoto.
War and Marine, Señor Jorge Boonen.
Industry, Señor Justiniano Sotomayor.

Envoy Ex. and Min. Plen. Señor Don Agustin Edwards.
1st Sec. Señor Don Manuel Salinas.
2nd Secs. Señors Don Ricardo Pepper, Raul Cousiño.
Financial Attaché, Señor Don Luis Waddington.
Naval Attaché, Lt.-Commdr. Señor Luis Barrie.
Attachés, Señors Don Julio Bittencourt, Horacio Sandford, Santiago Monk.
Legation in London, 48 Grosvenor Square, W.
Consul in London, Vicinte Echeverria Larrain, 94 Gracechurch Street, E.C.

A republic on the W. coast of South America, bounded by Peru on the N. and the Argentine on the E., which declared itself independent of Spain on Sept. 18, 1810. It is a long, narrow strip of territory between the Andes and the Pacific, extending from 17° 25′ S. to 55° 59′ S. It has an extreme length of 2,661 m., a breadth ranging from 46 to 228 m., an *area* of 289,829 m., and a *pop.* of 3,641,477 in 1915. A great proportion of the surface of the country consists of mountains and barren hills, and desert provinces in the north, the arable lands being only about one-eighth of the total area. There are practically no rivers and few harbours. The volcanic region of the Andes makes the country subject to continuous earthquake shocks and disturbances.

Under the Constitution voted in 1833 Chile is governed by a President, who is elected for five years by delegates nominated by ballot, who is not re-eligible, and to whom the executive power is confided, and a Senate and Chamber of Deputies forming the legislature. The **Senate,** of 37 members, is elected by the provinces for six years; the **Chamber,** of 118 members, by the departments for three years, by electors over 21, able to read and write. The President receives a salary of $60,000 (£2,062).

The republic is divided into 23 provinces, and these are subdivided into 80 departments and

1 territory. The **Army** has a peace strength of 21,890; war strength, about 75,000, or, with untrained men, 250,000. Service compulsory from 20 to 40, 1 year with the colours, and 9 in the first reserve. The Roman Catholic is the State **religion**, but all others are tolerated. Gratuitous education is given at the national charge, but is not compulsory. Agriculture and mining are the principal occupations. The former is largely in the central provinces, including Coquimbo and Concepcion, although new tracts of land are being continually developed in the southern provinces. In the northern provinces the population is engaged in mining industries; they are hardy, and endowed with industrial ingenuity. The climate is well suited to cattle-raising, and wheat, maize, barley, potatoes, beans, peas, and walnuts are extensively grown, as well as oranges lemons, figs, melons, and pine-apples in the sub-tropical districts; the vine is also cultivated most successfully, over 100,000 acres being devoted to it. The *live-stock* comprises 470,000 horses, 1,900,000 cattle, 4,900,000 sheep, and 170,000 pigs. The mineral wealth of the country is considerable. The export of **nitrate of soda**, in which industry a large amount of British capital is employed, was, in 1915, 2,022,226 metric tons, valued at £16,273,864. Copper is a most important mineral, the desert provinces being rich in the metal; gold and silver are also found, as well as tin, borate of lime, lead, cobalt, vanadium, coal, salt, and sulphur. The nearness of the mountains to the sea renders nearly all the rivers potential generators of an enormous amount of water-power. The Transandine Railway has brought Santiago within 36 hours of Buenos Aires; there is also a longitudinal railway, which connects the extremities of the country. The total length of **railways** is 5,002 m., of which 2,691 belong to the State. Port works, costing £948,525, are in course of construction at Valparaiso and San Antonio, and a large dry dock, costing £1,200,000, at Talcahuano; it will hold vessels of the largest tonnage. In 1915 25,160 steamers (net tonnage 28,962,470) and 1,268 sailing vessels (net tonnage 1,155,516) entered and cleared at Chilean ports; 3,196 of these were British.

CAPITAL: Santiago (408,247); other chief towns are Valparaiso (191,078), Concepcion (72,127), Talca (39,744), Iquique (45,750), Chillan (39,929), and Antofagasta (37,219).

Attachés, Hsiaochang Sze-Ping, Tsin Tsung Chang.
Student Interpreter, Lao Wei Shiu.

The Chinese Republic, lying mainly 20° and 50° N. and 80° and 130° E., is the most populous and, excluding Siberia, the largest country in Asia. China Proper is remarkable as the most compact nationality in the world, having an *area* estimated by the Chinese Government at 1,532,420 sq. m., with a *pop.* of 320,000,000. The rest of the country includes the dependencies of Manchuria, Mongolia, Inner Tibet, and Turkestan,

The New HAZELL, 1917

which cover an *area* of about 2,744,750 sq. m., with a *pop.* of about 29,000,000. A Republic was established on Feb. 12, 1912, on the abdication of the five-year-old Emperor Hsuan-Tung, the last reigning representative of the Manchu dynasty, which, after a sovereignty of 267 years, was dethroned by the revolution of 1911–12. The last Imperial Act was an Edict conferring upon Yuan Shih-kai, the Emperor's Prime Minister, plenary powers to establish a republic. Yuan-Shih-kai was subsequently unanimously elected to the office of President. He died in 1916. The President is assisted by a Cabinet, whose appointment must be approved by the Advisory Council, an elected body with parliamentary functions. During 1915 a movement was on foot for the conversion of the republic into a monarchy, with Yuan Shih-kai as the figure-head, but in 1916 the eight principal provinces, one after the other, declared themselves independent, and effectually put an end to the design. The three chief **religions** are Confucianism, Buddhism, and Taoism, the Buddhists largely preponderating. The worship of ancestors is everywhere practised. Roman Catholic and Protestant missions claim over 1,000,000 adherents. Western education is spreading rapidly, a large number of young Chinese studying in the U.S., Europe, and Japan. The land is freehold, and is held by families in small holdings, an annual land-tax of from 1*s.* to 6*s.* 6*d.* per acre being paid to the Government. A remarkable feature on the boundary of China and Manchuria is the Great Wall, begun in the 3rd cent., and added to in the course of years down to the 16th cent. In its total course it is 1,500 m. long, 20 to 30 ft. high, 15 to 25 ft. thick at the base and 12 ft. at the summit, with 40 ft. towers at intervals of 600 ft. Much of it is now in decay. The area over which China extends is so extensive that great varieties of climate are met with, the neighbourhood of the capital, Peking, having a climate as severe as Northern Europe, that of Shanghai being temperate, while that of Canton is almost tropical.

Agriculture is the principal industry of the people, rice being the staple article of food in the centre and south, and millet in the north. The soil being fruitful and well-watered, large crops are produced, although the methods of husbandry are generally primitive. Other grain crops are wheat, barley, and maize. Cotton, tobacco, and fruit are grown in the more sheltered parts of the north, tea, cotton, and ramie thread in the central and southern provinces, and in the latter also, in addition, sugar-cane and cinnamon, as well as various sub-tropical fruits, such as the orange, mango, banana, and pine-apple. The poppy, for the production of opium, was extensively grown in China, but the suppression of opium-smoking is releasing the land for other crops. The mineral wealth of the country is great, but as yet hardly developed. There is much coal in all the provinces, and in the Lui-Yang district, in the province of Hu-nan, there is a vast coalfield, the area of which is about 21,000 sq. m. There are also large quantities of coal in the provinces of Chih-li, Shan-tung, Sze-ch'uen, Shan-si, and Ho-nan. Iron ore is also plentiful in Shan-si, and copper ore in Yun-nan. Some tin, antimony, quicksilver, and gold are also found, while petroleum is being developed in the upper Yangtsze region. The country has been so unsettled, however, of late years, that capitalists have little or no security as an inducement to further enterprise. Apart from the preparation of the agricultural products, and tea, for the market, the two outstanding manufactures of the country are silk and porcelain. Manufactured and raw silk from Suchow, Nanking, and Hang-chow are particularly famous. About one-fourth of the world's supply of raw silk comes from China. Porcelain comes from the province of Kiang-si. Cotton-spinning and weaving looms have been established, particularly by the Japanese, and other minor industries are Indian ink, fans, lacquer ware, and matting. Railways extend some 5,500 m., with another 3,000 m. under construction. The great waterways of China make it prosperous, despite lack of railways, and even despite of internal turmoil.

Various districts have been "leased" to other powers: *e.g.* Wei-hai-Wei, and the Kowloon peninsula opposite Hong-Kong, to Great Britain; Port Arthur and Talien-wan to Russia, though the latter transferred the lease to Japan as a result of the Russo-Japanese war; the Liao-tung Peninsula to Japan; Kiao-Chan to Germany (it is now in possession of Japan); and the bay of Kwang-Chau-Wang, with two islands commanding the entrance to the bay, to France. The Treaty Ports, and other ports opened by China to foreign trade, number 64. 164,807 foreigners were resident in China in 1915, of whom 84,918 were Japanese, 56,319 Russian, 8,914 British, 4,365 American, 3,187 Portuguese, 3,013 German, and 1,864 French. Shanghai is the great foreign centre, with a very considerable foreign population. The *Customs* dues on foreign trade are collected and the coast-lights are administered by the great service known as the Maritime Customs of China. Nearly 900 Europeans, of whom about 500 are British, are engaged in its service.

The coinage used by the people is the "*cash*," made of copper and zinc, 40 of which go to 1*d.* and 9,600 to a £. The "*tael*," or "*liang*" as the Chinese call it, is a silver standard, the weight and the fineness of which differ in different towns, but the *Haikwan tael* is that in which duties are paid to the Maritime Customs, and this is a weight of 583·3 grains of pure silver 1,000 fine, the average value of which was 3*s.* 0½*d.* in 1913, and 2*s.* 8¾*d.* in 1914; 100 Haikwan taels = 111·40 Shanghai taels, for which exchange quotations are made.

CAPITAL: Peking (1,000,000); other chief towns are Singan (1,000,000), Canton (900,000), Hankow (826,000), Tientsin (800,000), Shanghai (651,000), Fu-chow (624,000), Ch'ung-k'ing (614,500), Suchow (500,000), Hang-chow (594,000), Ning-po (450,000), and Nanking (270,000).

The Maritime Customs is the only Government department in China that publishes intelligible statistics of revenue. The foreign debt at the end of 1914 was £180,000,000.

The salt-tax, or gabelle, is an important source of revenue, bringing in some £10,000,000 a year; in 1913 it was placed under a foreign Inspector-General and Staff. The net imports and exports have been:

Year.	Imports.	Exports.	Total.
	£	£	£
1911 .	63,481,130	50,803,081	114,284,211
1912 .	72,196,578	56,542,957	128,739,535
1913 .	86,118,303	60,915,941	147,034,244
1914 .	76,022,000	47,116,000	123,138,000
1915 .	60,596,755	55,848,222	116,444,977

The imports from the British Dominions were as follows:

	1913	1914	1915
Hong-Kong	£14,637,591	£22,399,180	£19,791,490
India	7,294,133	5,219,900	5,433,759
Singapore, Straits, etc.	1,349,620	1,021,962	717,518
Other British Dominions	387,839	294,141	110,265

Exports to U.K., 1915, £7,034,852 :

Bristles	£467,351	Poultry	£169,801
Hair	81,466	Soya beans	69,211
Peas and beans	236,817	Straw plaitings	99,323
Egg yolk	741,115	Tea	1,546,320
Silk, raw	596,877	Tallow	115,672
,, manufactures	294,760	Wool	187,843
Hides	196,892		

Imports from (and of) U.K., 1915, £8,545,505 :

Tobacco	£1,649,533	Woollen goods	£216,754
Cotton goods	5,649,571	Machinery	353,332
Iron and steel manuf.	736,532		

In 1915 the foreign shipping which entered and cleared at the various Treaty Ports amounted to 66,503,996 tons, of which 37,675,657 tons were British, 23,873,016 Japanese, and 1,922,055 Russian.

BRITISH LEGATION, Peking

Envoy Ex. and Minister Plen. Rt. Hon. Sir John N. Jordan, P.C., G.C.I.E., K.C.B., K.C.M.G. (*b.* 1852) . . . £5,000

Tientsin and Peking—Con.-Gen. H. E. Fulford, C.M.G. 1,200
Vice-Consul, L. Giles 700
Tsinan—Consul, J. T. Pratt . . . 950
Wuchow—Consul, C. C. A. Kirke . . 950
Wuhu—Consul, H. Porter . . .
Yun-nan-fu—Con.-Gen. H. Goffe, C.M.G. . 1,150

Mail transit : Peking, via Siberia, 17 days ; via Vancouver, 31 days ; via Suez, 30–33 days. Steamship fares to Hong-Kong, £30–65.

Dependencies

Manchuria lies between the province of Chih-li and the Amur river, and touches Korea on the E. ; it has an *area* of 363,610 sq. m. and a *pop.* of 16,000,000. It consists of three provinces, the capitals of which are Mukden (pop. 150,000), Kirin, and Tsitsihar. Manchuria was occupied by Russia at the time of the Boxer outbreak, and though it should have been evacuated under the terms of the Manchurian Convention, 1902, it remained under Russian control. This was the immediate cause of hostilities between Russia and Japan, which ended in 1905 in the Treaty of Portsmouth. The country is well supplied with railways. At Kharbin there is a connexion with the Trans-Siberian railway to Vladivostock.

Mongolia lies between Manchuria and Chinese Turkestan. It includes the desert of Gobi, and is inhabited by nomadic Mongols and Kalmucks. It has an *area* of 1,367,600 sq. m. and a *pop.* of 2,600,000. The chief town is Urga, which the Russian Government proposes to connect with the Siberian railway. In 1912 the Mongolian princes declared for independence, and by a Russo-Mongolian Agreement Russia undertook to assist Mongolia to maintain the autonomous *régime* she has established. In 1915 Russian, Chinese, and Mongolian delegates signed an agreement recognising Chinese suzerainty over Outer Mongolia, which was declared to be part of Chinese territory ; but provision was made for full autonomy therein, and non-interference by China. The Agreement implied the recognition of the Chinese right to full control of Inner Mongolia.

Chinese Turkestan, with an *area* of 550,340 sq. m. and a *pop.* of 1,200,000, lies to the N. of Tibet and to the E. of the Pamirs. It contains the important towns of Kashgar, Yarkand, and Khotan. British and Russian representatives are stationed at Kashgar, which is a large trading centre.

Tibet, Inner (*see* TIBET) is a semi-autonomous zone, over which the authority of China is at present somewhat vague. An endeavour was made in 1914 between the representatives of Great Britain, China, and Tibet to settle the boundaries between Outer Tibet and Tibet proper, but it was not successful.

COLOMBIA, REPUBLIC OF

President, Señor Dr. José Vicente Concha (1914–18).
Ministry—Interior, Señor Miguel Abadía.
Foreign Affairs, Señor M. F. Suarez.
War, Señor Salvador Franco.
Finance, Señor Tomás Surí Salcedo.
Treasury, Señor Alfonso Robledo.
Education, Señor Emilio Ferrero.
Public Works, Señor Jorge Vélez.
Commerce and Agriculture, Señor Jorge Vélez.

The New HAZELL, 1917

Envoy Ex. and Minister Plen. in England, Dr. Ignacio Gutierrez-Ponce, 42 Holland Road, Kensington, W.
Consul-General, Josez M. Nuñez, Sicilian House, Sicilian Avenue, Southampton Row, W.C.

Colombia is a republic of South America, bounded on the E. by Venezuela, on the S. by Brazil and Ecuador, on the W. by the Pacific, and on the N. by the Caribbean Sea. It has an *area* of 482,329 sq. m. and a *pop.* at the last census (1912) of 5,472,604. It is divided into 15 departments and 4● "intendencias," the governors of which are nominated by the President of the Republic, whose term of office is four years. The legislature consists of a House of Representatives and a Senate, freely elected by the people. The national **religion** is Roman Catholic, but other religions are tolerated. Primary **education** is free, but not compulsory. All able-bodied citizens are liable to military service. The standing army consists of about 6,000 men, and the men who have served with the colours constitute a reserve.

About two-fifths of the area of Colombia comprises the rugged, mountainous regions of the Cordilleras, the terminal ranges of the Andes, divided into the Western, Central, and Eastern Cordilleras. The Central range is that of the loftiest peaks, while the Eastern contains large areas of plateau and elevated valley, within the temperate zone; in this latter region the greater part of the white population is to be found, as well as the greatest industrial development. The portion of the country to the south-east of the Andes consists of heavily forested plains, with continuous rainfall, situated in the basins of the Orinoco and Amazon. The country is very little developed, the chief difficulties being the absence of capital and lack of adequate communications; there are only some 650 m. of railway in the whole country, some centred round Bogota, others isolated lines running from various ports a short distance inland. There is no direct railway communication between Bogota and the coast, goods being carried on the Magdalena river as far as Girardat, and there transhipped. Consequently, although the country with its fertile soil is eminently suited for agriculture and cattle-rearing, in which most of the population is engaged, little more is produced than is necessary for home consumption. Coffee is being successfully grown, the province of Cundinamarca producing the celebrated Bogota coffee; the United Fruit Company has developed the banana trade, which has now an export of over 7,000,000 bunches a year; cotton is also grown, and under the protection of the high tariff several cotton mills are now firmly established in the local trade; tobacco, rice, and wheat are also grown. The great attraction of Colombia is its **mineral wealth.** Rich mines of gold (production over £1,500,000 a year), silver, iron, and lead exist, as well as large deposits of coal, and platinum is also found. The emerald mines, now the main source of the world's supply, are the property of the government.

In April 1914 a Treaty was signed between Colombia and the United States for the settlement of their differences arising out of the proclamation of independence by Panama in Nov. 1913. The treaty permits Colombia at all times to transport through the Panama Canal troops, material of war, and ships of war, even if Colombia be at war with another country. It also places products of Colombia passing through the Canal on the same footing as those of the U.S. The £ has been made legal tender, and the rate of exchange placed at 500 pesos paper money on paper dollars to the £. Silver and nickel coins have been substituted for paper notes of small value.

CAPITAL: Bogota (121,257). Other towns are Medellin (71,004), Barranquilla (48,907), the chief port, Manizales (34,720), and Cartagena (36,632).

COSTA RICA, REPUBLIC OF

President, Señor Don Alfredo González (1914–18).
Ministry—Foreign Affairs, Don Julio Acosta.
Interior, Don J. R. Arias.
Finance and Commerce, Don Mariano Guardia C.
Public Works, Don Enrique Pinto.
War, Don F. A. Tinoco.
Public Instruction, Don L. F. González.

Envoy Ex. and Min. Plen. in London, Señor Don Wenceslao de la Guardia, 66 Holland Park, W.
Consul-General, W. J. Le Lacheur, 58 Lombard Street, E.C.

Costa Rica is the southernmost republic of Central America, lying between Nicaragua on the N. and Panama on the S. It has an *area* of 23,000 sq. m., with a *pop.* (1915) of 420,179. Spanish is the universal language.

It is governed by a President elected for four years and a chamber of 43 representatives, elected for four years by universal male suffrage of all who can support themselves, half retiring every two years. All religions are tolerated, but the Roman Catholic is the State religion. Education is compulsory and free. In 1914 there were 428 primary schools, with 34,624 scholars. The country is more especially agricultural, and has abundance of moisture and a wonderfully fertile soil; bananas are the staple product (value, 1915, £1,062,824), but rice, maize, potatoes, and beans are grown in the interior, as well as cocoa, vanilla, sugar-cane, cotton, oranges, and indigo on the warmer coast-lands. There are large forests of excellent woods—cedar, mahogany, rosewood, ebony, fustic, and other dye-woods. Gold and silver are also found, four gold-mines being at work in 1916. Length of railways, 385 m.

CAPITAL: San José (34,784; with suburbs, 49,750), Cartago (12,756).

	1913	1914	1915

Exports from (and of) U.K. .	236,357	186,563	97,432

BRITISH LEGATION

Envoy Ex., Min. Plen. and Consul-Gen. Sir Claude C. Mallet, C.M.G. (*b.* 1860) (£1,550), resides at Panama.

BRITISH CONSULAR OFFICERS

San José—Consul, F. Nutter Cox.
Port Limon—Consul, Wm. McAdam.

Mail transit: 15–18 days.

CUBA, REPUBLIC OF

President, General Mario G. Menocal (1913–17).

Envoy Ex. and Min. Plen. in London, Gen. Carlos Garcia Velez, 30 York Terrace, Regent's Park, N.W.
1st Secretary, Miguel A. Campa.

Cuba is considerably the largest of the West India Islands, and lies between 74° 7′ and 84° 57′ W. long. and 19° 48′ and 23° 13′ N. lat. Its *area* is 44,164 sq. m. with a *pop.* of 2,473,600, of whom nearly one-third are mulattoes or negroes. Cuba was a Spanish possession from the time of its discovery in 1492 till, by the Treaty of Paris, 1898, after a war with the United States, it was relinquished by Spain and became an independent State under American suzerainty. The Constitution of 1901 provides for a republican form of government, with a President, Vice-President, Senate, and House of Representatives. In 1906 an insurrection broke out, and a United States Commission undertook the provisional government; organic laws were enacted in reference to the Executive and Judicial Powers, the national Civil Service, the electoral system, and the Municipal and Provincial authorities. The country is divided into six provinces. Education, neglected for years, was reorganised under the American administration, and is now compulsory.

The climate of Cuba is tropical, with a dry season from Nov. to April, and a hot, wet season during the remainder of the 12 months. The soil is very fertile throughout the island, and grows abundant crops of sugar (value £23,000,000 yearly) and tobacco (value over £6,000,000 yearly); bananas, pine-apples, coconuts, oranges, etc., are also produced. There are large forests of timber, particularly mahogany and cedar, which are increasingly exported. There are also valuable iron, manganese, and copper mines, as well as beds of asphalt, which latter, however, are not yet worked. Railways, 2,380 m.

CAPITAL: Havana (297,159). Other towns are Santiago (45,470), Matanzas (36,009), and Cienfuegos (30,100).

	1913–14	1914–15	1915–16
Revenue .	£7,569,000	£8,365,717	£8,365,717
Expenditure.	7,551,382	8,052,581	8,052,581
Debt . .	—	—	14,416,620

Envoy Ex., Min. Plen. and Consul-Gen.
Stephen Leech (*b.* 1864) . . . £1,800

BRITISH CONSULAR OFFICERS

Havana—Vice-Consul, Denys Cowan £600–800
Vice-Consul, G. F. Plant . . .
Cardenas—V.-Consul, A. FitzGibbon .
Cienfuegos—V.-Consul, G. Woodhouse .
Santiago—Consul, Wm. Mason . .

Mail transit: Havana, 12 days.

DENMARK

King—Christian X, *b.* Sept. 26, 1870, *suc.* May 14, 1912; *m.* April 26, 1898, Princess Alexandrine of Mecklenburg; *issue*, H.R.H. Prince Christian Frederick (Crown Prince and Heir Apparent), *b.* Mar. 11, 1899; H.R.H. Prince Knud, *b.* July 27, 1900. King Christian has a Civil List of £55,555.
Ministry—Premier and Minister of Justice, C. T. Zahle.
Finance, Edward Brandes.
Defence, Peter Munch.
Foreign Affairs, Erik Scavenius.
Public Worship and Instruction, Rev. Keiser-Nielsen.
Interior, Ove Rode.
Agriculture, K. Pedersen.
Public Works, Hassing Joergensen.
Commerce, C. Gage.
Without Portfolio, J. C. Christensen, Th. Stauning, C. Rottboell.

Envoy Ex. and Min. Plen. in London, Kammerherre Grevenkop-Castenskiold, 29 Pont Street, S.W.
1st Secretary, Count Reventlow.
Attachés, Baron de Bertouche Lehn, M. Torben de Bille, M. Joergen de Wichfeld.
Consul-General in London, J. E. Boggild (*actg.*), 8 Byward Street, Great Tower Street, E.C.

The Kingdom of Denmark, the smallest of the Northern European States, lying between 54° 33′ and 57° 45′ N. and 8° 5′ and 12° 47′ E., consists of Zealand, Funen, Laaland, and other islands in the Baltic, the peninsular of Jutland, Iceland, and the Faroe Is. in the N. Atlantic. It has an *area* of 15,592 sq. m. and a *pop.* in 1911 of 2,775,076.

Under the constitution of 1915, the executive power is vested in King and ministers, the legislative in the Rigsdag or Diet acting jointly with the Sovereign. The **Rigsdag** is composed of the **Landsthing** (or Upper House of 72 members—indirectly elected on the proportional system for eight years), and the **Folkething** (or House of Commons of 140 members, also elected on the proportional systems for three years). Both sexes vote in the elections for the upper and lower houses, and women are also eligible for election thereto. The franchise age for either sex is 25 years. Members of both houses are paid about 11*s.* a day while the Rigsdag is sitting, and their travelling expenses. For **local government** the country is divided into 18 counties, each under a governor, and these are sub-divided into hundreds and parishes. The towns are administered by mayors. The State religion is Lutheran, and the King must be a member of that Church, but all religions are tolerated. **Education**, compulsory and free, for children from 7 to 14 years of age the public schools being maintained by communal rates. There are 21 agricultural or horticultural schools in the country, and a veterinary and agricultural college at Copenhagen.

Of the whole population 37·8% live by agriculture, 31·5% by manufactures, and 15% by commerce and transport. There appears to have been a steady increase of late in the number of the population gaining a livelihood from industrial pursuits, particularly beet sugar, margarine, etc. About five-sixths of the land is possessed by small freeholders and peasants, the law forbidding the union of small farms into large estates. The total area under cultivation, according to the latest returns (1915), is 6,928,817 acres, of which 6,126,341 acres were arable; of this area 4,352,001 acres were under tillage. The live stock numbered 568,240 horses, 2,462,862 cattle, 514,918 sheep and 2,496,661 swine. There are 2,390 m. of railway, of which 1,243 m. belong to the State. The **exports** include bacon, hams, butter, margarine, eggs, hides, skins, horses, and cattle, and the **imports** include raw minerals, yarns and rope, iron manufactures, colonial produce, and an increasing amount of agricultural articles and raw materials, such as maize, oil-cakes, and foreign manures.

CAPITAL: Copenhagen (pop. 630,418, with suburbs); other towns, Aarhus (61,755); Odense (42,237).

Dependencies

Greenland is an extensive island lying N.E. of America, extending into the Polar regions; the *area* of the colonised portion is 46,740 sq. m., with a *pop.* of 11,895, of whom 309 are Europeans. The interior is all ice, but parts of the south and west coast are habitable, with verdant pasture, some shrubbery, and mossy valleys. **Exports** consist of oil of seals and whales, fox, seal, and reindeer skins, eiderdown, feathers, and cryolite. The chief trade is with Denmark.

Faroe, or Sheep Islands, are a group lying between the Shetlands and Iceland. Of a total of 21 islands, 17 are inhabited. *Area*, 115 sq. m.; *pop.* 18,000. Little of the surface is under cultivation, owing to the rugged nature of the soil. Sheep, however, thrive, there being over 100,000 in the islands. Industries, cod and whale fishing, and woollen goods. CAPITAL, Thorshavn (*pop.* 2,300, in Strömö.

Iceland is a large island, 130 m. E. of Greenland and 850 m. W. of Norway. *Area*, 40,447 sq. m.; *pop.* 85,183. The Legislature, called the *Althing*, consists of 40 members elected by popular suffrage. Every man and woman over 25 years of age may vote, and women may hold any office in the State. Under laws adopted in 1903, a *Minister for Iceland* (Einar Arnórsson), nominated by the King, resides at Reykjavik, and is responsible for the administration. **Exports :** wool, dried fish, mutton, ponies, and sheep. Manufactures: domestic,

CAPITAL: Reykjavik (*pop.* 13,280).

Santa Cruz, or St. Croix. A West Indian Island, the largest of the Virgin group; *area*, 118 sq. m., *pop.* 35,156. It is governed, in conjunction with *St. Thomas* and *St. John*, by an officer appointed by the Crown. The negroes, who make up the bulk of the population, are chiefly engaged in the cultivation of the sugar-cane. Cotton is also grown. St. Thomas is a good coaling station, and has engineering works for ship repairing. The U.S. have long been desirous of acquiring the islands for the defence of the Panama Canal; terms were arranged in 1916, but the proposal was rejected by the Danish Rigsdag. CAPITAL: Christiansted.

The New HAZELL, 1917

DOMINICAN REPUBLIC

President, Dr. Francisco Henriquez y Carvajal.

Acting Consul-General in London, C. Caseaux, 17 Coleman Street, E.C.
Vice-Consul, A. M. Ventura.

A republic embracing the eastern end of the island of Santo Domingo, the republic of Haiti (*q.v.*) occupying the western end. It comprises an *area* of 18,045 sq. m., with an estimated *pop.* of 600,000. It was founded in 1844, when it separated from Haitian control. It separated from Spain in 1822 to form a joint state with Haiti. It subsequently became a Spanish possession from 1861–5. It is divided into six states or provinces, and six maritime districts, and is governed by a President, chosen by an electoral college for a term of six years, and a National Congress of twelve Senators elected for six years and twenty-four Deputies elected for four years. The inhabitants are composed chiefly of mulattoes, and the Spanish language is that which is chiefly spoken. The State religion is Roman Catholic. Education is free and compulsory. The country is in a very backward state, and its natural resources have scarcely been touched. Sugar, molasses, and cocoa form the principal exports, but tobacco and coffee are of some importance, and hides, wax, honey, bananas, cotton, mahogany and other furniture woods are also exported. The bulk of the trade is in the hands of the U.S., Germany, before the war, being second; the lack of a direct line of British steamers handicaps the British trader. The customs duties are the main source of revenue, and are controlled by the U.S. Government. The years 1912–14 and 1915–16 have been marked by revolution and chaotic conditions generally, and trade conditions continue dull. In May 1916 a recurrence of disturbances caused the intervention of the United States, who are expected to assume a larger share in the control of Dominican affairs, chiefly in connection with financial and police matters. The high price of sugar has stimulated production and increased prosperity in the sugar districts.

CAPITAL: Santo Domingo (*pop.* 22,000).

ECUADOR, REPUBLIC OF

President, Gen. Leonidas Plaza (1912–16).

Minister in London, Señor Don Enriqué Dorn y De Alsua.
Consul-General, Celso Nevares, 9 Bishopsgate, E.C.

A republic of equatorial South America, constituted in 1830 by reparation from the original republic of Colombia. There are boundary disputes between Ecuador and Colombia and Ecuador and Peru, so that the actual *area* of the country is a matter of doubt, but it is considered to be about 116,000 sq. m., including the Galapagos Islands, which have an area of 2,400 sq. m., with a *pop.* of 400. The *pop.* of Ecuador is 1,500,000, of whom nearly 900,000 are Indians. Under the Constitution of 1884, modified in 1887 and 1897, it is governed by a **President** directly elected by the people for four years, with the assistance of a Congress composed of a Senate of 32 members, elected for two years, representing the 16 provinces, and a Chamber of 48 **Deputies,** representing the people, which is elected every two years. The electors to both Chambers must be adults able to read and write. The State Church is Roman Catholic, but by a law of 1904 the Church and its property are under the control of the State. Civil marriage is obligatory. Primary education is free and obligatory. The foreign commerce centres in Guayaquil. The chief products are cocoa, indiarubber, hides, coffee, sugar, and cotton. Ecuador is the largest cocoa-producing country (export, 1914, £1,468,822). Panama hats, of which £200,044 worth were exported in 1914, are now made almost exclusively in Ecuador. Gold, copper, iron, lead and coal exist in considerable quantities, but the country badly needs development. There is a railway from Duran to Quito (270 miles). **Army** about 7,000 officers and men, with a National Guard which can be made up to 90,000. Service nominally universal and compulsory from 18 to 50 years of age; three years' service with the colours.

	1914	1915	1916
Revenue and expenditure	£2,076,045	£2,088,000	£2,099,645

The New HAZELL, 1917

FRANCE

President, M. Raymond Poincaré.

[M. Poincaré, elected to the presidency Jan. 17, 1913, n succession to M. Fallières, was *b.* on Aug. 20, 1860, at Bar-le-Duc (Meuse). He is an advocate at the Court of Paris. He has been in politics since the year 1887, when he became a deputy, and, in 1903, a Senator of the Meuse. He became Minister of Public Instruction in '93 under M. Dupuy as Prime Minister, and in '94 was Finance Minister. He again held office as Minister of Public Instruction in M. Ribot's third administration ('95), and as Finance Minister the following year in M. Sarrien's Cabinet. He was Prime Minister from January 1912 until his election as President, holding the portfolio of Foreign Affairs. M. Poincaré is a zealous advocate of electoral reform and proportional representation. He is a member of the French Academy (elec. 1809), and the author of *Idées contemporaines*, and other well-known works. He married Mlle. Henriette Benucci.]

Presidents of the Third Republic:

Adolphe Thiers	1871–73
Marshal MacMahon	1873–79
F. J. P. Jules Grévy	1879–87
F. Sadi Carnot	1887–94
Casimir Perier	June–Jan. 1894–95
Félix Faure	1895–99
Émile Loubet	1899–06
Armand Fallières	1906–13
Raymond Poincaré	1913–

Ministry

President and Minister for Foreign Affairs, M. Aristide Briand.
War, General Roques.
Navy, Admiral Lacaze.

Aviation, Col. Régnier.
Shipping, M. Naïl.
Fine Arts, M. Dalimier.

Ambassador in London, M. Paul Cambon, G.C.V.O., Albert Gate House, Hyde Park, W.
Councillor, M. A. de Fleurian.
1st Secretary, M. Georges Picot.
2nd Secretaries, Baron P. de Barante, M. Roger Cambon, Comte de Montholon.
3rd Secretaries, M. Adrien Thierry, M. de La Garenne.
Attachés, M. Paul Morand, M. Jules Blondel.
Naval Attaché, Capt. Baron Mercier de Lostende.
Military Attaché, Col. Vicomte de la Panouse.
Secretary Archivist, M. J. Knecht.
Commercial Attaché, M. Jean Périer.
Consul-General, M. G. C. Kahn, 51 Bedford Square, W.C.
Vice-Consul and Chancelier, M. Mattei.

France is a country of Western Europe, situated between 51° 5′ and 42° 20′ N. and 4° 42′ W. and 7° 39′ E. From north to south its length is about 600 m., and its breadth from east to west 528 m. The total *area* is 207,218 m. The *pop.* at the last census (1911) was 39,601,509; the birth-rate is very low, and consequently the rate of increase is practically stationary. Whi the average excess of births over deaths pe 10,000 inhabitants during the quinquennial perio 1901–5 was only 18, as compared with 106 i Italy, 113 in Austria-Hungary, 121 in Englan and Wales, 149 in Germany, and 155 in th Netherlands, it was lowered during the nex quinquennial period by 50%. In 1914 there wer (for 77 departments only) 594,222 births, 169,01 marriages, and 647,549 deaths. There has alway been a large resident population of foreigners i France, the census figures showing 40,378 British 287,126 Belgians, 102,271 Germans, 14,68 Austrians, 73,422 Swiss, 419,234 Italians, 105,76 Spaniards, 35,016 Russians: total, 1,159,835.

Government

France, since the overthrow of Napoleon III in 1871, has been a republic. The **legislatur** consists of the Assembly, sitting in two houses: *viz.* the **Senate** of 300 members, indirectly electe for 9 years (one-third retiring every 3 years by delegates chosen by the Municipal Council and the Senators, Deputies, Councillors-General and District Councillors of the Departments (ther are a number of Senators originally elected fo life by the two Chambers, but as these die th vacancies are filled up by the election of Senator for a period of 9 years only); and the **Chambe of Deputies** of 584 members, elected for 4 year by universal suffrage. An Electoral Reform Bill which prior to the war had been before Par liament and the country for some considerabl time, proposed a return to the system of *scruti de liste* with proportional representation. A present each Department is divided into arron dissements returning one Deputy, though wher the population of the arrondissement exceed 100,000, it is divided into two or more con stituencies. Each elector votes for one Deput only. Candidates are compelled to declare fo which constituency they will stand. **Voter** are required to be over 21 and to have 6-months' residential qualification. Both House can initiate and frame laws, except in th case of financial laws, which must first be pre sented to and voted by the Chamber of Depu ties. Deputies and Senators are both paid at th rate of 15,000 fr. a year. The Presidents of th two Chambers each receive in addition 72,000 fr a year for the expense of entertainment. Member of both Chambers travel free on all railways o making a small annual payment.

The executive power is confided to the **President** who is elected for seven years by the two House united in National Assembly, and receives 600,00 fr. a year, and a further allowance of 600,000 fr for expenses. He appoints the Ministers and makes all civil and military appointments. Wa can be declared by the President only with consen of the two Houses, and his every act must b countersigned by a Minister.

The **Conseil d'Etat** is a special body, composed of Councillors, Maîtres de Requêtes and Auditors all appointed by the President, and presided ove by the Minister of Justice. Its function is t give advice upon administrative points submitte to it by the Government.

The **colonies** are looked upon as being politically part of France, and are represented in the Senat by 4 Senators and in the Chamber by 10 Deputies

As to a local government, the unit is the com mune, governed by a municipal council and a mayor. The 36,241 communes are combine into 2,915 cantons, containing on an average 1 communes, and the cantons into 362 arrondisse

ments, governed by elective arrondissement councils and sub-prefects, these arrondissements again forming the Departments, of which there are 86, each with a Departmental Council, besides the territory of Belfort. Prefects, with large powers, represent the Executive, and control the Departments, and Sub-Prefects the Arrondissements.

The towns with a population over 100,000 are:

Paris	1,807,044	Nice	142,940
Marseilles	550,619	Le Havre	136,159
Lyons	523,796	Rouen	124,987
Bordeaux	261,678	Roubaix	122,723
Lille	217,807	Nancy	119,949
Nantes	170,535	Reims	115,178
Toulouse	149,576	Toulon	104,582
St. Etienne	148,656		

By a law passed on Dec. 9, 1905, the Churches were separated from the State, which now recognises no **religion** officially; and the adherents of all creeds were authorised to form associations for public worship. Formerly the Roman Catholic Church, the Reformed Church, the Augsburg Confession and the Jews were so recognised, and salaries were paid to ministers of the different Churches by the State. But save for pensions and grants made during the period of transition no salaries are now paid by the State. Buildings used for public worship may still be so used, under regulations specified by the Government. Roman Catholics form the large majority of the population.

Primary **education** is free and obligatory for children from 6 to 13 years of age, and admirably organised. All teachers are laymen, and are paid by the State, except in the towns which number more than 150,000 inhabitants. Secondary education is given in the State *lycées* and communal colleges, in private establishments, and in ecclesiastical seminaries; there are also facilities, including *lycées*, colleges, and courses of secondary instruction, for over 34,000 girls. Numerous technical and special schools, besides 15 universities, complete the educational system.

The **legal system** comprises for civil cases the Justices of the Peace, and above them the 26 Appeal Courts and the Courts of Cassation. Criminal cases, except petty offences which are dealt with at the Police Courts, come before the Police Correctional Courts, consisting of three judges, but no jury. An examining magistrate, the *juge d'instruction*, makes a preliminary inquiry, and may dismiss the case or send it for trial. Above these courts are the Assize Courts, assisted by twelve jurors, the Courts of Appeal and the Criminal Court of Cassation. Tribunals of commerce and councils of experts deal with commercial cases. The chief **exports** are textiles, wine, raw silk, wool, etc., leather, skins and furs, and small ware. **Manufactures** accounted for £144,000,000 of the exports in 1913, *raw materials* for £75,000,000 and *food products* for £33,909,000. The chief **imports** are wool, silk, coal, cotton, oil seeds, timber, hides, cereals, textiles, machinery, wine, food products. *Raw materials* accounted for £197,000,000 of the imports in 1913, *food products* for £76,000,000, and **manufactures** for £67,000,000. **Agricultural operations** engage nearly half the population, and include not only the growing of cereals, wheat principally, but roots, cattle, sugar, silk, wine, vegetables, and poultry and eggs. Coal and iron mines exist, and zinc, copper, antimony, manganese, and salt are also mined; there is a considerable fishing industry, besides the ordinary manufacturing pursuits.

At the end of 1913 there were 25,390 miles of railway lines of general interest, and 6,001 miles of lines of local interest. Large advances, accounting for a considerable proportion of the public debt, have been made by the country to the railways, which will ultimately revert to the State. The total length of State lines in 1913 was 7,425 miles. There were 3,104 miles of **canals** used for internal navigation, and 5,472 miles of rivers similarly used.

Corsica, an island in the Mediterranean, separated from Sardinia by the Strait of Bonifacio, is a French Department. *Area,* 3,367 sq. m. and *pop.* 289,495. The chief town is Ajaccio (22,264); Bastia (27,338) is a torpedo-station. There is direct communication between Ajaccio and Nice by the mail steamers of the Fraissinet Line.

Ajaccio—British Consul, Hon. H. C. C. Dundas.
Bastia—Vice-Consul, W. Follett Routley.

Vice-Consul, W. J. Smith
Vice-Consul, Charles Beale (*actg.*)
Cannes—Vice-Consul, J. Taylor, M.V.O.
Mentone—Vice-Consul, H. H. Hill
Rouen—Consul-General, C. B. C. Clipperton, C.M.G.
Vice-Consul, E. W. Taylor

Mail transit : Paris, 7–8 hours.

Colonies and Dependencies

The Minister of the Colonies controls the administration of all the Colonies, but **Algiers** is under the Minister of the Interior, and **Morocco** and **Tunis** are under the Minister for Foreign Affairs. Those colonies which are not directly represented in the Senate and Chamber of Deputies, by the 4 Senators and 10 Deputies sent from the Colonies, are for the most part represented on the **Conseil Supérieur des Colonies**, which consists of colonial senators and deputies, colonial delegates, and other officials appointed to it.

Area of the colonies and dependencies about 4,500,000 sq. m.; *pop.* about 41,000,000.

COLONIES IN NORTH AFRICA

Algeria

One of the Barbary States of North Africa extending along the coast about 650 m. and stretching inland from 320–380 m. It lies between 2° 10′ W. and 8° 50′ E. and 32° and 37° N. It has an *area* of 221,771 sq. m., with a *pop.* (1911) of 5,563,828, including 752,043 Europeans. It is a French province, administered by a Governor-General assisted by a consultative Council. There is also a Conseil Supérieur, partly elected, which, with the Financial Delegations, representing the French Colonists, other French taxpayers, and the Mohammedan natives, considers the Budget annually. The country is divided into the **three departments** of Oran, Constantine, and Algiers, capital cities of same names, each sending one senator and two deputies to the National Assemblies. The products of the country include wine (1914, 226,987,818 gall.), wheat, barley, and other grains, sheep and other animals, olive oil, fruit and vegetables, iron, zinc, and other ores, wool and skins, cork, phosphates, esparto, tobacco, etc. Efforts are being made to encourage the planting of cotton. There are phosphate beds in the Department of Constantine which have been worked for some years, the export in 1914 being 438,601 metric tons. There are deposits, as yet unworked, scattered through practically the whole of Algeria. The **French forces** maintained in Algeria consist of an army corps numbering 63,827 men, and the expenditure for military and naval purposes is borne by France. The railways have a length of 2,793 miles. In 1914 the number of ships engaged in French and foreign trade which entered and cleared Algerian ports was 8,336, of a net tonnage of 10,635,271 tons.

The **Algerian Sahara** was in 1905 reorganised in four territories. It is under the Governor-General in regard to civil affairs, but has a distinct Budget, and is financially aided by France. Its *area* is estimated at 141,563 sq. m., and *pop.* at 494,306, including 5,533 Europeans.

The New HAZELL, 1917

	1913	1914	1915
Revenue	£6,289,012	£6,854,580	£6,804,132
Expenditure	6,287,876	6,853,024	6,801,420

Imports from (and of) U.K.	1,340,498	968,361	1,414,818

CAPITAL, Algiers (172,397); other chief towns are Oran (123,086), Constantine (65,173), Bône (42,039), Philippeville (27,137), and Mostaganem (23,166).

Governor-General, M. Lutaud.

BRITISH CONSULAR OFFICERS

Algiers—Consul-General, Basil S. Cave, C.B. £1,000
Vice-Consul, W. London . . £300–500
Arzeu and Mostaganem—V.-Consul, J. Madden . . . . .
Bône—Vice-Consul, H. A. Scratchley, M.V.O.
Constantine—Vice-Consul, W. Miller . .
Oran—Vice-Consul, R. Barber . . .
Philippeville—Vice-Consul, T. N. L. Barber

Tunis

Tunis lies E. of Algeria, between 11° 40′ E. and 7° 35′ E., and is bounded on the N. and E. by the Mediterranean and on the S. by the Sahara. *Area*, 51,000 sq. m.; *pop.* 2,000,000, including 46,000 French (exclusive of the army of occupation), and 109,000 Italians, the majority being Bedouin Arabs and Kabyles. Made a French protectorate 1882. A French Resident-General, under the direction of the French Foreign Office, controls the administration. There is a mixed Consultative Council of natives and Europeans. The military maintained in the country number 20,362 men, the cost falling upon France. **The Bey** is Mohamed El Nasr, *b.* 1855, who succeeded May 12, 1906. *Chief products* are barley, wine, olive oil, zinc, lead, and iron ores, phosphate of lime, dates, and esparto grass. There are now 1,143 miles of railway and 3,906 of telegraph; 285 m. of railway are also in course of construction.

CAPITAL, Tunis (205,000).

	1913	1914	1915
Revenue	£3,420,496	£2,534,402	—
Expenditure	3,400,092	2,519,551	—
Imports	5,770,187	5,299,513	—

Exports to U.K.	862,461	751,916	£1,113,719
Imports from (and of) U.K.	476,263	359,199	514,587

French Resident-General, M. Gabriel Alapetite.

BRITISH CONSULAR OFFICERS

Tunis—Consul-General, E. J. L. Berkeley, C.B.
Vice-Consul, R. Schembri . . .
Bizerta—Vice-Consul, Hon. T. Bourke .
Sfax—Vice-Consul, S. Leonardi . .

French Somaliland

French Somaliland, on the coast of the Gulf of Aden, includes the two ports of Obok and Jibutil, and the town of Tajura. It lies between the British Somaliland Protectorate on the E. and the Italian colony of Erythrea on the N.W. The *area* is about 46,000 sq. m., and the *pop.* 208,061. From Jibutil a railway has been built inland to Adis Ababa in order to open up trade with Abyssinia. The chief **exports** are coffee, gold, ivory, musk, and skins. The country is administered by a Governor.

CAPITAL, Jibutil (16,535).

	1913	1914	1915
Imports	£1,356,673	£1,147,685	—
Exports	1,908,165	1,745,728	—
Exports to U.K.	110,312	115,424	£157,957
Imports from (and of) U.K.	214,158	212,910	177,720

COLONIES IN THE INDIAN OCEAN

Madagascar

From time immemorial until the reign of Radama I (1810–28) this large island, lying mainly between 44° and 50° E., was divided into a number of petty chieftaincies; but that Hova sovereign managed to bring a considerable portion of the country under his authority, so that he and his successors became virtual rulers of Madagascar, and were acknowledged as such by European Powers. In 1895 the island was conquered by the French, becoming first a Protectorate, and then in 1896 a French colony. *Area*, 228,500 sq. m. *Pop.* (1911): native, 3,165,820; European, 12,580; Asiatics, 5,816; and Africans, 15,249. A Governor-General resides at Antananarivo, assisted by an Administrative Council. For nearly a century the Hova (of Malay-Melanesian origin) were dominant, and are still the most civilised and intelligent of the Malagasy peoples. Cattle herding and agriculture are the principal occupations. The island has rich deposits of gold (67,290 oz. in 1915), graphite (11,851 tons in 1915), corundum (327 tons in 1915), copper, iron, and lead, and magnificent forests of valuable timber. Coal and petroleum have been reported in the south-west; rice, cattle, hides, gum, india-rubber, wax, cotton, sugar, rafia cloth, fine straw hats, vanilla, lard, and coffee are exported to Mauritius, Réunion, and Europe. British trade with the island greatly diminished by the operation of the tariff instituted in 1897, but has considerably increased since the outbreak of the war. The majority of the imports come from France. Capital, *Antananarivo*, called by the French Tananarive, a striking and well-built town (pop. 70,000) upon a lofty hill about 100 miles inland from the east coast. *Ports* are Tamatave (pop. 7,073) and Majunga (pop. 5,250). A railway has been completed between Tamatave and Tananarive, a distance of 229 miles; a branch line from Moramanga to the Antsihanaka province, of which 52 m. were opened for traffic a year ago, will probably be completed in 1917; another line is in construction between Antananarivo and Antsirabe, one of the healthiest places in the island, and noted for its thermal springs (a small portion of this line—about 11 m.—was opened on Jan. 4, 1916). *Nossi Bé*, a small island on the N.W. coast, held by the French since 1843, and a flourishing trade-port, is a dependency of Madagascar. *St.-Marie*, a small island on the north coast, taken by the French in 1643, and *Diego-Suarez*, a French colony since 1885, and the *Comoro Islands*, a group of volcanic islands in the Mozambique Channel, are also dependencies of Madagascar. *Area*, 620 sq. m. The group consists of four small elevated islands—Great Comoro (pop. 57,400), Mohilla, or Little Comoro (pop. 4,500), Anjuan, erroneously called Johanna (pop. 25,500), and others. *Mayotte* (area 143 sq. m., pop. 9,500) is also a dependency. Sugar and vanilla are cultivated.

The New HAZELL, 1917

	1914	1915
Revenue and expenditure	£1,440,717	£1,507,839

	1913	1914	1915
Imports	£1,869,898	£1,894,266	£1,750,694
Exports	2,242,175	1,867,330	2,642,644
Exports to U.K.	221,626	233,603	384,206
Imports from (and of) U.K.	79,096	100,344	142,595

French Governor-General, M. H. Garbit (*acting*; app. 1914).

BRITISH CONSULAR OFFICERS

Tananarive—Consul, J. Helm Smith (*actg.*).
Vice-Consul, C. Bang.
Diego-Suarez—Cons. Agent, J. Castaing (*actg.*).
Majunga—Vice-Consul, (vacant).

Mail transit : Tamatave, 24–28 days.

Réunion

An island 420 m. E. of Madagascar, lying between 20° 51′ and 21° 22′ S. and 55° 15′ and 55° 54′ E. It has an *area* of 970 sq. m. and a *pop.* in 1911 of 173,822. It has been occupied by the French since 1698, with an interval of from 1810–1815, when it was occupied by the English. It has a *Governor* and a *Conseil-Général*, the latter elected by the inhabitants, and is represented at Paris by a Senator and two Deputies. The capital and chief centre is *St.-Denis* (pop. 27,000). Sugar is the staple product (45,000 tons in 1914), but vanilla, rum, perfumes, tapioca, and aloe-fibre are also exported. There is only one harbour (purely artificial), situated at Pointe-des-Galets. A railway connects St. Benoît and St. Pierre. There is cable communication with Mauritius and Madagascar. The Union Castle Co. now provide a direct steamship route to the United Kingdom and S. Africa.

	1913	1914	1915
Imports	£997,597	£511,500	—
Exports	663,687	691,250	—
Exports to U.K.	1,422	3,022	£6,806
Imports from (and of) U.K.	15,760	15,056	14,025

British Consul, John T. Piatt.
Vice-Consul, J. A. Mancini.

Mail transit : 28–33 days.

COLONIES IN FRENCH CENTRAL AFRICA

French Equatorial Africa

French Equatorial Africa is bounded on the N.W. by the Cameroons, on the N. by Wadai, one of the Central Sudan States, on the E. by the Bahr-el-Ghazal, on the S.E. by the Belgian Congo, and on the W. by the Atlantic. *Area* about 667,000 sq. m., and *pop.* estimated at 5,000,000. It is under the control of a *Governor-General* assisted by a Council of Government. It was in 1906 divided into three colonies—viz. the Gabun Colony, capital Libreville (pop. 3,000); the Middle Congo Colony, capital Brazzaville; and the Ubangi-Shari-Chad Colony, capital Fort de Possel. The Middle Congo Colony has an Administrator-in-Chief; the other Colonies have a Lieut.-Governor, and all three have Administrative Councils. The military forces number about 4,000. The colony entails a heavy burden on the French Colonial Budget. A railway between Point Noire and the Congo is projected, while wireless communication is established between Brazzaville and Point Noire on the coast. By a convention of 1911 France ceded to Germany some 107,270 sq. m., uniting the German Cameroons, and at the same time Germany ceded some 6,450 sq. m. of the Cameroons territory. **Exports** consisting of ivory, ebony and other woods, rubber, palm-nuts, and oil amounted in 1913 to £1,466,761, and the **imports** to £847,270.

The states of Bagirmi, Wadai, and Kanem were recognised as French by the Anglo-French Agreement of Mar. 21, '99. **Wadai,** which extends from Darfur to Kanem, and from French Congo to the Sahara, is the strongest native state in the Sudan. It has an estimated *area* of about 150,000 sq. m. and a *pop.* of about 2,000,000. The Mabas, a Mahommedan negro race, are the ruling tribe: but there are many Arabs also, and these carry on a wide commerce. The population profess adherence to the Mahdi-es-Senussi, the head of a sect which is by far the most powerful in Africa, and has its headquarters at the oasis of Kufrah, on the caravan route between Wadai and Benghazi. **Kanem** is a vassal state lying north-west of Wadai and north of Lake Chad, with an *area* of about 30,000 sq. m. and a *pop.* of about 100,000. **Bagirmi,** which lies south-west of Wadai, and to the south-east of Lake Chad, has an *area* of about 65,000 sq. m., and a *pop.* of about 1,000,000 Mohammedan negroes. At the capital, Massenia, a French Resident is stationed.

BRITISH CONSULAR OFFICERS

Boma, Belgian Congo—Consul, F. W. Manners (*acting*).
Libreville—Vice-Consul, J. Deemin.

COLONIES IN FRENCH WEST AFRICA

French West Africa includes Senegal, French Guinea, the Ivory Coast, Dahomey, the Upper Senegal-Niger Colony, and the civil territory of Mauritania, of which accounts are given separately. French territory stretches inland from the coast to the Upper and Middle Niger, thence eastwards to Barrawa, on Lake Chad, north to Tunis and Algeria, and is bounded on the west by the Spanish Coast territory of Rio de Oro and Adrar. *Area*, about 1,687,000 sq. m.; *pop.* (1910) 11,000,000. The supreme local power with regard to all French West African colonies is placed in the hands of a *Governor-General*, resident at Dakar, having as his auxiliary a Commandant-General of all the military forces in French West Africa, a Secretary-General, and a Council. Subordinate to him are the Lieut.-Governors of the Colonies. The cost of the services common to all the colonies is met out of funds provided by their customs and shipping dues. The military forces consist of about 10,000 men, of whom 7,000 are natives. A uniform system of education was established in 1903, and the Government have reorganised the administration of agriculture and are specially encouraging the production of rubber and cotton. The imports and exports are given separately below.

BRITISH CONSULAR OFFICERS

Consul-General for Western Africa and the Sudan, Capt. C. Braithwaite Wallis, F.G.S.
Dakar—Vice-Consul, P. H. Stormont.
Porto Novo—Cons. Agent, J. B. Williams.

	1914
Revenue and expenditure	£1,252,000

	1913	1914	1915
Exports to U.K.	£888,631	£682,698	£1,022,143
Imports from (and of) U.K.	1,479,321	888,307	822,841

Dahomey lies between Lagos and Nigeria on the E. and Togoland on the W., and extends inland to the Military Territories. The *area* is about 40,000 sq. m. and the *pop.* (1911) 851,000. *Capital*

The New HAZELL, 1917

Porto Novo (50,000); the old capital was Abomey, 70 m. N. of Whydah. Dahomey was taken by the French in 1892, and is administered by a Lieut.-Governor with an Administrative Council. It is self-supporting, and receives no subsidy from the Home Government. The chief **products** of the country are palm oil and palm kernels, while various manufactures are also springing up. The chief port is Kotonou, and a railway runs inland to Savé (156 miles). The bulk of the trade has been with France, Germany, and the United Kingdom, the last having much the largest share.

	1914
Revenue and expenditure	£213,550
Imports	812,403
Exports	858,052

French Guinea lies on the coast, between Portuguese Guinea, which forms the boundary on the north, and Sierra Leone on the south; but it extends inland to the Niger. The colony is administered by a Lieut.-Governor. *Area* about 95,000 sq. m.; *pop.* (1911) 1,763,000. The *capital* and only important centre is **Konakry** (6,583), which is said to be supplanting Sierra Leone in the West Coast trade. A road has been built from Konakry to the Niger, and a railway from Konakry to Kouroussa on the Upper Niger (350 m.) was completed in 1910. The colony is practically self-supporting. The climate is bad, being humid and malarious. The chief **products** of the whole region are indiarubber, hides, palm oil, sesame, and gum, but there has been a great decrease in the exports of rubber, which were valued at £382,857 in 1913.

	1914
Revenue and expenditure	£318,560
Imports	76,528
Exports	665,790

Ivory Coast, The, was organised as a separate colony in 1893. It lies between Liberia and the Gold Coast, and towards the interior adjoins the French Sudan. It is administered by a Lieut.-Governor, and is self-supporting. **Bingerville** is the capital, and Grand Bassam and Assinie are the other chief towns. Bonduku is becoming a centre of trade between the French Sudan and the coast. *Area*, 125,000 sq. m., and *pop.* (1911) 1,200,000. A railway has been built from Abidjan to Dimbokro (114 miles). The chief **exports** are rubber (£187,363 in 1913), palm-oil, ivory, coffee, and mahogany.

	1914
Revenue and expenditure	£355,764
Imports	726,179
Exports	656,072

Senegal. The colony consists of the four municipal communes of St. Louis, Dakar, Rufisque, and Goree; native territories directly administered; and the Senegal protectorate. It is represented at Paris by a deputy, elected by the four communes, but is administered by a Lieut.-Governor. *Area*, 73,750 sq. m.; *pop.* (1911) 1,172,000. *Capital*, St. Louis (pop. 22,000); Dakar has a pop. of 25,000. Chief **exports** are gum, indiarubber, nuts, and skins. The Senegal is navigable 750 miles up. A railway 165 miles long connects Dakar, on the coast, St. Louis, at the mouth of the Senegal river, and Rufisque (pop. 12,500); another Kayes to the Niger (344 miles); and another Thiés to Kayes (83 miles).

	1913	1914
Revenue and expenditure	—	£404,026
Imports	£2,989,742	3,522,831
Exports	2,135,297	2,917,513

Upper Senegal-Niger Colony, formed in 1904 from the Senegambia and Niger Territories. It is bounded on the north by the French Algerian territory, on the west by French Guinea, on the south by the Ivory Coast, Gold Coast, Togoland, and Dahomey, and on the east by a line running north from Lake Chad. *Area*, 301,000 sq. m.; *pop.* (1911), 4,500,000. It includes part of the Sahara and the upper Senegal. The Colony includes the **Military Territory of the Niger,** divided into two districts, Timbuctoo and Zinder, and administered by military authorities under the authority of the Lieut.-Governor, who resides at Kayes for the present. Bamako, on the Niger, has, however, been chosen as the capital. A railway 350 miles long has been built from Kayes to Koulikoro on the Niger.

	1914
Revenue and expenditure	£383,796
Imports	431,355
Exports	147,279

Mauritania, Territory of, consists principally of hot sandy desert, and is not very densely populated. Its inhabitants are a race of Berber Arabs, spoken generally of as Moors. They are a cruel and treacherous race, though keen traders and farmers, and are intelligent. The country is bounded on the W. by the Atlantic, on the S. by the Senegal River, and on the E. by the Assaba country. It is administered by a Commissioner responsible to the Governor-General. *Area*, 343,750 sq. m.; *pop.* 600,000. **Exports,** skins, ostrich feathers, salt, dates, and gum.

	1914
Revenue and expenditure	£74,672
Imports	320,000
Exports	480,000

COLONIES IN AMERICA AND WEST INDIES

French Guiana

French Guiana is a colony in South America, on the Atlantic Coast, and is bounded by Dutch Guiana on the W. and by Brazil on the S. *Area* about 34,500 sq. m., with a *pop.* of 49,009. The colony is used as a penal settlement, the penal population being about 9,848; and is under a Governor with a Conseil-Général of 16 members. It is represented at Paris by a deputy. Gold, balata, and essence of rosewood form the chief **exports,** though there are valuable forests in the interior.

CAPITAL, Cayenne (12,426).

	1913	1914	1915
Imports	£436,196	£408,605	—
Exports	484,699	430,956	—
Exports to U.K.	3,540	2,105	1,185
Imports from (and of) U.K.	18,077	6,186	10,868

BRITISH CONSULAR OFFICERS

Consul, G. Hewett (resides at Paramaribo, Dutch Guiana).

Cayenne—Vice-Consul, F. Rambaut.

Guadeloupe

Guadeloupe consists of two islands, Basse-Terre and Grandeterre, separated by a narrow salt-water river, with five smaller dependent islands, all situated in the Leeward group of the Lesser Antilles. *Area*, about 680 sq. m.; *pop.* 212,430. The colony is represented at Paris by a senator and two deputies. It is administered by a Governor, with an elected Council. *Capital*, Basse-Terre (8,626); chief town, Pointe-à-Pitre (18,942). **Products:** sugar, rum, coffee, cotton, cacao, bananas, vanilla, and preserved pineapples.

The New HAZELL, 1917

	1914	1915	1916
Revenue and expenditure	—	£146,812	£196,554
	1913.	1914.	1915.
Imports	£726,962	£652,681	£730,213
Exports	917,695	908,248	960,262

Martinique

Martinique is a West Indian island of the Windward group. *Area*, 390 sq. m.; *pop.* (1911), 184,004. It is administered by a Governor with a Conseil-Général, and is represented at Paris by a senator and two deputies. Fort de France (27,069) is the seat of government. The chief **products** are sugar (value, 1914, £465,612), rum (1914, £519,771), and cocoa (1914, £35,825).

	1912	1913	1914
Imports	£860,812	£885,773	£853,899
Exports	1,220,938	1,155,872	1,149,116

Martinique—British Consul, H. J. Meagher.

Exports to U.K. from French West Indies :

1913	1914	1915

British Consul, P. J. F. Staniforth.

COLONIES IN ASIA

French India

French India consists of Pondicherry, Karikal, Mahé, Yanaon, and Chandernagore. These five settlements, which are at considerable distances from each other, have a total *area* of 106 sq. m. and a *pop.* of 276,484, of which 47,426 are in the town of Pondicherry itself. Pondicherry is divided into eight communes, and Karikal into six, whilst the other places form one each, all under municipal government. A Governor, who is assisted by an elective general council, resides at Pondicherry, and a senator and a deputy represent the colony at Paris. The chief **exports** are oil seeds and cotton manufactures.

British Consul—Pondicherry, A. H. Deane.

Indo-China

Indo-China is the name given to the French possessions in the Annamese peninsula—Cochin China, Annam, Cambodia, Tonquin and Laos with the Kwang-Wan-Chau territory, and the islands leased with it to France by China in 1899 (area 400 sq. m., pop. 177,000). The whole has an *area* of about 308,900 sq. m., with a *pop.* of 16,500,000, mostly Annamese. The Governor-General has his seat at HANOI, in Tonquin. A Council of Government, consisting of the administrative heads of the subordinate colonies, with the military and naval commanders-in-chief, and representatives of commerce and agriculture, etc. controls financial affairs, both general and local. The **army** consisted in 1914 of 10,861 French and 13,968 native soldiers. A naval force is stationed there also. Agriculture is the chief industry. The **products** are rice, pepper, cotton, coal, tea, sugar, silk, salt, copra, hides, etc. There are 976 m. of railway.

	1913	1914	1915

Exports	8,845,072	11,513,057	—
Exports to U.K.	277,209	272,523	£566,371
Imports from (and of) U.K.	158,970	172,966	217,977

BRITISH CONSULAR AGENTS

Saigon—Consul, T. F. Carlisle.
Vice-Consul, J. L. O'Connell.
Haiphong—Vice-Consul, J. J. A. Gigueaux.

Annam became a French protectorate in 1884. *Area*, 61,500 sq. m.; *pop.* 5,554,822. *Capital*, Hue (pop. 60,611), near the coast garrisoned by French troops. Coal and iron have been discovered in abundance, and there are coal mines at Turane. The King, Thanh-Tai, abdicated in favour of his son Duy-Tan, in 1907, and a Council of Regency was appointed. The King, Duy-Tan, was replaced by the Council of Ministry, in May 1916, by his cousin Buu-Dao, son of a former Emperor of Annam, viz. Dong-Khaah. Prince Vinh-Sau (ex-King Duy-Tan) has joined his father in his retirement. The administration is under a French resident. The various peoples belong to the Indo-Chinese race, a link between Chinese and Malays. Religion chiefly Buddhism.

	1914
Revenue	£431,098
Expenditure	406,571

Cambodia has been a French protectorate since 1863. Its area was increased in 1907 by the cession to it by Siam of the provinces of Battambong and Siamrap. *Area*, 67,500 sq. m., *pop.* 1,634,252. *Capital*, Pnompenh (62,225), on the Mekong. The reigning sovereign is King Sisowath, but there is a French resident at Pnompenh. The cotton industry is growing steadily.

Cochin-China comprises the whole of the Mekong delta. *Area*, 20,000 sq. m.; *pop.* 3,050,000. *Capital*, Saigon (189,000). The country is divided into 21 districts, each administered by a French officer, and is represented by one deputy at Paris. The French population numbers 13,960. The chief **export** is rice.

	1914
Revenue	£733,947
Expenditure	683,608
Imports	4,576,205
Exports	7,502,518

The New HAZELL, 1917

Tonquin was made a French colony in 1884. It lies north of Annam, each of the Shan States of Burmah, and south of the Chinese province of Yunnan. *Area*, 46,400 sq. m.; *pop.* 6,119,720. *Capital*, Hanoi, on the Hanoi, or Song-koi river (pop. 100,000). Principal port and chief seat of trade, Hai-phong (pop. 20,000). The chief **export** is rice. At Hongay, near Hai-phong, and at Kebao, there are coal mines worked by French companies. Copper and iron are also mined.

Revenue	£904,353
Expenditure	801,262

The **Laos Territory,** taken from Siam in 1893, has an estimated *area* of 111,500 sq. m., with a *pop.* of 663,727. *Capital*, Vientiane. The territory includes the three protected states of Luang Prabang, Bassac, and Muong Sing. The cost of administering the Laos Territory is shared between all the colonies making up French Indo-China.

Colonies in Oceania

New Caledonia is an island in the South Pacific, lying between 20° 1′ and 22° 26′ S. lat. and 161° 30′ and 144° 40′ E. long. *Area*, 7,650 sq. m.; *pop.* 50,608. The island was formerly a penal settlement, but no convicts have been sent there since 1896, and the penal element is rapidly decreasing, there being only 5,671 of convict origin. The *Loyalty Islands* (area, 800 sq. m., pop. 14,800) to the east of it, the *Isle of Pines* (area 58 sq. m., pop. 600), the *Huon Islands*, the *Chesterfield Islands*, and the *Wallis Archipelago* (area, 40 sq. m., pop. 4,500) are dependencies. New Caledonia is governed by a Governor, with an elective Conseil-Général. The *capital* in Noumea (8,961). The chief agricultural products are coffee, copra, cotton, manioc, maize, tobacco, bananas, pine-apples. Ores and minerals (nickel, chrome, and cobalt) are worked and exported (value £244,182 in 1914).

	1912	1913	1914
Imports	£612,670	£708,316	£664,160
Exports	557,388	633,536	618,760

British Consul—Noumea, H. C. Venables.

Other islands in the Pacific belonging to France are the **Society Islands,** including *Tahiti* (area 600 sq. m., pop. 11,000, chief town, Papeete). Great expectations are formed as to the future from a discovery of valuable and vast phosphate deposits at Makatea and other islands; 1913 export, 82,076 tons, value £65,645; and *Moorea* (area 50 sq. m., pop. 1,600), the *Leeward Islands*, the *Tabuai*, and *Raivavæ* Islands (area 100 sq. m., pop. 5,000); the *Gambier* (area 6 sq. m., pop. 600), and *Marquesas* (area 480 sq. m., pop. 4,280) Islands. They are all administered by a Governor and an elective Conseil-Général of 11 members. *Total area* about 1,500 sq. m., *pop.* about 30,000, nine-tenths of whom are natives. The **exports** consist chiefly of copra, mother-of-pearl shell, and vanilla.

	1913
Revenue	£145,082
Expenditure	127,631

	1913	1914	1915
Imports	£361,218	£337,078	242.229
Exports	462.180	340.718	302,661
Exports to U.K. from French Pacific:	317,292	309,241	369,839
Imports from (and of) U.K.:	59,943	38,372	20,641

British Consul—Tahiti, W. J. Williams (*actg.*).

GERMAN EMPIRE

Emperor, William II (King of Prussia), *e.s.* of the late Emperor Frederick III by Victoria, Princess Royal of England; *b.* Jan. 27, 1859; *suc.* his father, June 15, 1888; *m.* Feb. 27, 1881, Princess Augusta Victoria of Schleswig-Holstein (*b.* Oct. 22, 1858).

Heir-Apparent, H.I. and R.H. Crown Prince Friedrich Wilhelm, *b.* May 6, 1882; *m.* June 6, 1905, H.H. Princess Cecilie of Mecklenburg-Schwerin (*b.* Sept. 20, 1886). *Issue*: Prince Wilhelm Friedrich, *b.* July 4, 1906; Prince Ludwig Ferdinand, *b.* Nov. 9, 1907; Prince Hubertus, *b.* Sept. 30, 1909; Prince Friedrich George, *b.* Dec. 19, 1911; Princess Alexandrine Irene, *b.* April 7, 1915.

Other Children of the Emperor are: Prince Wilhelm Eitel Friedrich, *b.* July 7, 1883 (*m.* Princess Sophie Charlotte of Oldenburg); Prince Adalbert, *b.* July 14, 1884 (*m.* Princess Adelheid of Sachsen-Muningen); Prince August Wilhelm, *b.* Jan. 29, 1887 (*m.* Princess Alexandra Victoria of Schleswig-Holstein); Prince Oscar, *b.* July 27, 1888 (*m.* morganatically); Prince Joachim, *b.* Dec. 17, 1890; Princess Viktoria Luise, *b.* Sept. 13, 1892 (*m.* to the Duke of Brunswick).

Ministry

Chancellor of the Empire, Herr von Bethmann-Hollweg.
Foreign Affairs, Herr Zimmermann.
Interior, Herr Dr. Karl Helfferich.
Admiralty, Admiral Eduard von Capelle.
Treasury, Count Siegfried von Rödern.
Posts and Telegraphs, Herr Kraetke.
Justice, Herr Dr. Lisco.
Colonies, Herr Dr. Solf.

Government

According to the constitution of April 16, 1871, all the states of Germany form an eternal union; the direction of political and military affairs is vested in the Emperor, who may declare war, but if it is not defensive, the consent of the Bundesrat, or Federal Council, is required. The Imperial Army is under the supreme generalship of the Emperor, and there is a Minister of War for each of the four kingdoms—Prussia, Bavaria, Saxony, and Württemberg—the Prussian War Minister being also Minister for the smaller states. The legislative functions of the empire are vested jointly in the **Reichstag** and the **Bundesrat**, and the Emperor has no veto on laws passed by these bodies. All laws for the Empire must receive the votes of an absolute majority of the Bundesrat and the Reichstag, and to take effect must be promulgated by the Emperor. The **Bundesrat,** which represents the individual states of the empire, as the Reichstag represents the German nation, consists of 61 delegates, appointed by the governments of the individual states for each session. Of these, 17 sit for Prussia, 6 for Bavaria, 4 each for Württemberg and Saxony, 3 each for Baden, Hesse, and Alsace-Lorraine, 1 each for Mecklenburg-Schwerin and Brunswick, and 1 each for the remaining states, including Hamburg, Lübeck, and Bremen. The votes of Alsace-Lorraine cannot be exercised upon a motion for the amendment of the constitution, and are governed by the "instruction" of the Statthalter, who is removable at the pleasure of the Emperor. Of its functions, it may be said that the Bundesrat is mainly a confirming body, although it has the privilege of rejecting measures passed by the Reichstag. It has also a limited initiatory power, which it occasionally exercises. Members of the

Bundesrat have the right of appearing in the Reichstag, and of speaking on any question in which the state they represent is directly interested. Members of the one chamber, however, are not eligible for election to the other, although they may sit in their respective provincial diets. The **Reichstag** is composed of 397 members, elected by universal suffrage and ballot for the term of five years. Of these 236 constitute the elected of Prussia, 48 represent Bavaria, 23 Saxony, and the remainder the other states in due proportion, ranging from 1 to 17. Members are now paid £150 per session, with a deduction of £1 for each day's absence.

Political Parties

The centre of political life in the German Empire is the Reichstag, which, however, has no effective means, except the refusal of supplies, of imposing its will upon the Government. The constitution of the Reichstag is complex, and it is the task of the Government so to manipulate parties that it shall have a majority which will give it a fairly free hand in home affairs and absolute control of foreign politics. The last four general elections have resulted as follows:

Party.	General Elections.			
	1898.	1903.	1907.	1912.
Centre	103	100	105	90
Conservatives	74	73	83	45

Bremen	99	299,526
Alsace-Lorraine	5,604	1,874,014
Total	203,780	64,925,993

Estimated population, June 30, 1914, 67,812,000.

The populations of the chief cities are: Berlin, 2,071,000; Hamburg, 931,035; Munich, 596,467; Leipzig, 589,850; Dresden, 548,308; Cologne, 516,527; Breslau, 512,105; Frankfort-on-Main, 414,576; Düsseldorf, 358,728; Nürnberg, 333,142; Charlottenburg, 305,978; Hanover, 302,375; Essen, 294,653; Chemnitz, 287,807; Stuttgart, 286,218; Magdeburg, 279,629; Bremen, 247,437; Königsberg, 245,994; Stettin, 236,113; Duisburg, 229,483; Dortmund, 214,226, and Kiel, 211,627.

Religion, Education

Owing to its federal constitution, the **relations of Church and State** vary in different parts of the empire, but liberty of conscience prevails. The Jesuit Law of 1872 excludes from the Empire the Order of the Society of Jesus and kindred orders in their corporate capacity, though the clause giving power to expel individual members of these orders was repealed in 1904. The Protestants (39,991,421) form 61·6% of the population, and Roman Catholics (23,821,453), with adherents of the Greek Church, 36·7%, Jews (615,021) making up 1% of the remainder.

Education is general and compulsory throughout the empire for children of from 6 to 14 years. At the last census there were 61,557 public elementary schools (*Volkschulen*), supported from the local rates, with 148,217 male, and 39,268 female teachers and 10,309,949 pupils. There is also an admirable system of secondary education, working-class continuation schools (*Fortbildungsschulen*), middle schools for business life (*Bürgerschulen* and *Höhere Burgerschulen*), *Gymnasien* for the universities and learned professions, differing where necessary in favour of modern subjects and modern languages (*Realgymnasien*, *Oberrealschulen*, and *Realschulen*), and special schools for technical education. There are 22 universities in the empire: Berlin, Bonn, Breslau, Erlangen, Frankfort, Freiburg, Giessen, Göttingen, Greifswald, Halle, Heidelberg, Jena, Kiel, Königsberg, Leipzig, Marburg, Munich, Münster, Rostock, Strassburg, Tübingen, and Würzburg.

Justice and Crime

Uniform codes of **civil, commercial,** and **criminal law** prevail throughout the empire. The lowest courts are the **Amtsgerichte,** each with a single judge trying both civil and criminal cases. Above these are the **Landgerichte,** with a more extensive jurisdiction, including a criminal chamber with five judges and jury courts. The **Oberlandesgerichte** are the courts of second instance, and the supreme court (**Reichsgericht**), with 92 judges, appointed by the Emperor on the advice of the Bundesrat, sits at Leipzig.

The following figures from the German Statistical Handbook for a period of years show the prevalence of serious crime and immorality in Germany as compared with England:

	Germany. 1897–1907.	England. 1900–1910.
Maliciously and feloniously wounding	172,153	1,262
Murder	350	97
Rape	9,381	216
Incest	573	56
Unnatural crimes	841	290
Illegitimate children	178,115	37,041
Divorce petitions	20,340	965
Malicious damage to property	25,759	358
Arson	610	278

Defence

See special sections, FOREIGN NAVIES, FOREIGN ARMIES.

Industries and Trade

Agriculture is a very considerable industry, employing about 10,000,000 of the population; in the production of rye, wheat, barley, oats, potatoes, and meadow hay Germany is almost self-supporting. Live-stock has increased considerably, and at the last census (1914) numbered: 4,516,300 horses, 20,153,700 cattle, 5,787,800 sheep, 21,885,100 pigs, and 3,384,000 goats. An admirable memorandum, containing much valuable information and statistics, is "The Recent Development of German Agriculture," published by the Board of Agriculture [Cd. 8305, 1916. 4d.].

The mining, metal works, textile, and other **manufacturing** industries employ more than 11,000,000, and the **chief articles exported** are iron and iron goods, groceries and food products, drugs and chemicals, wool and woollen goods, cotton and cotton goods, anthracite coal and coke, instruments, machines and vehicles, earths, ores, and precious metals, hardware, literary and art objects, fancy goods, clothing, silk and silk goods, etc. **Forestry** and **mining** are both industries of great importance. About 25% of the area of the Empire was estimated to be under forest in 1900. Mining is pursued chiefly in Prussia and Saxony. The industries of the country have been developed enormously in recent years, and in actual tonnage the **shipping** of Germany before the war stood second in the world. The **chief imports** are corn, groceries and food products, wool and woollen goods, cotton and cotton goods, earths, ores and precious metals, drugs and chemicals, wood, hides and skins, oils and fats, animals and animal products, silk and silk ware, cattle, etc. The commerce of the country has since '88 been administered by the **Zollverein** or Customs League, which embraces the whole of the states with the exception of a few small districts, as well as Luxemburg. Import duties are levied, the country's policy having been strongly protectionist since 1879. For commercial purposes there are **145** districts, each with its **Chamber of Commerce**; and these chambers have done more towards building up German commerce than any other one factor.

The value of the Imports and Exports (including coin and bullion) is as follows:

Year.	Imports.	Exports.
1890	£231,500,000	£188,000,000
1900	320,500,000	255,000,000
1911	500,350,000	411,200,000
1912	550,855,000	454,975,000
1913	560,335,800	509,965,000

For trade with the various countries the figures for 1913 are those of the last representative year.

Exports to U.K., 1913, £80,411,057:

Apparel	£1,269,541	Machinery	£2,384,142

United States	84,129	35,066

Finance

The **Imperial revenue**, as apart from State and municipal revenue, is chiefly derived from posts, telegraphs, customs, taxes, duties, and various other sources, such as the China Indemnity, rents, etc., and also the receipts from the Imperial railways in Alsace-Lorraine (the other railways in Germany for the most part belong to the respective states through which they run). Matricular contributions are also collected by the respective states and are handed over to the Imperial Government. These contributions are based upon the population of each state. In addition to the customs duties there are excise taxes on tobacco, sugar, salt, spirits, vinegar, champagne, beer, matches and contrivances for lighting, playing-cards, lotteries, stamp duties on documents dealing with freight, passenger tickets, and permission tickets for driving motor-cars. There are also stamp duties on cheques and on securities, and also on the purchase of businesses. Besides this there are also inheritance taxes, land value taxes, and increment value duties. In 1913 extra taxation was imposed to meet the increased cost of armaments. It consisted of a "single levy," varying from 0·15% to 8% according to the value of the property; and of a "property tax" to be assessed for the first time on April 1, 1917, on the increment accrued in the three years from Jan. 1, 1914, and thereafter every three years. The first basis of valuation (that of Jan. 1, 1914) is the value of the total property as assessed for the "single levy." The expenses of the war Germany is waging will, however, alter the whole basis.

Imperial Funded and Unfunded Debt

1913, £269,844,390, including Treasury bonds, for the short term bonds issued to meet the chronic annual deficits have become Consols in all but name. It had risen to this figure fr m £3,534,200 in '77. The Secretary for the Treasury stated in 1912 that the combined debts of the Empire and the States amounted to £1,000,000,000. The war has, of course, enormously swollen the debt.

Compulsory insurance against sickness, accidents, old age and infirmity, has been in operation for some years. Most of the **railways**, which traverse 38,426 miles, belong either to the Imperial or the State Governments. There are 8.832 miles of canals and navigable rivers.

STATES OF THE GERMAN EMPIRE

Alsace-Lorraine. The Reichsland Elsass-Lothringen—a former province of France—was annexed by Germany after the war of 1870. There is a Diet of two Chambers, the **Staatsrat** of 18 members, and the **Landesausehurs** of 60 members. The Emperor is represented by a **Governor** (Statthalter), who resides at Strassburg. Industries, cotton, wine, tobacco, hops.

Area, 5,604 sq. m.; *pop.* 1,874,014. **Revenue and expenditure**, 1914, £3,842,366. **Public debt**, £2,186,300.

Statthalter, Herr von Dallwitz.

Anhalt. Duke, Friederich II, *b.* Aug. 19, '56; *suc.* Jan. 24, '04; *m.* July 2, '89, to Princess Marie of Baden (*b.* July 26, '65). *H.-Presumptive, bro.* Prince Edward, *b.* April 18, '61.

Area, 888 sq. m.; *pop.* 331,128. **Capital**, Dessau (pop. 56,605). **Income and expenditure**, 1915, £901,000.

Baden. Grand Duke, Friedrich II, *b.* July 9, '57; *suc.* Sept. 28, '07; *m.* Sept. 20, '85, to Princess Hilda of Nassau. *H.-Presumptive*, Max, *b.* July 10, '67.

A sovereign state situated in the south-west corner of Germany, consisting of a portion of the valley of the Rhine, and a large mountainous district, forming the greater proportion of the whole state. Industries, agriculture, woollen and cotton goods, silks, paper, tobacco and leather. Chief towns, Mannheim, Karlsruhe (**capital**), Freiburg, Pforzheim and Heidelberg.

Area, 5,823 sq. m.; *pop.* 2,142,833. **Revenue**, 1914, £6,709,947; **expenditure**, 1914, £9,664,931. **Debt**, 1913, £27,804,804 (for railways only).

Bavaria. King, Ludwig III, *b.* Jan. 7, '45; proclaimed Nov. 5, '13; *m.* Feb. 20, '68, to the Archduchess Maria Theresa of Austria, Este (*b.* July 2, '49). *H. s.* Crown Prince Rupprecht, *b.* May 18, '69.

A kingdom in the south of Germany, and the second in area and population. Agriculture is extensively carried on, grain of various kinds, hops, tobacco and sugar-beet being grown. Nearly a third of the kingdom is forest. Exports comprise hops, beer, wine, cottons, toys, and fancy wares. Principal towns, Munich (**capital**), Nuremberg.

Area, 29,292 sq. m.; *pop.* 6,887,291. **Revenue and expenditure**, 1914, £39,253,436. **Debt**, £123,931,982.

Bremen. A state and free town with local self-government. *Area*, 99 sq. m.; *pop.* 299,526.

Brunswick. Duke, Ernest Augustus, *b.* Nov. 17, '87; proclaimed Nov. 5, '13; *m.* May 24, '13, to H.R.H. Princess Viktoria, daughter of the German Emperor. *H. s.* Ernest Augustus, *b.* March 18, '14.

A sovereign duchy situated in the north of Germany. *Area*, 1,418 sq. m.; *pop.* 494,339. Chief town, Brunswick (pop. 143,552). **Revenue**, £764,194; **expenditure**, £770,111. **Debt**, £2,073,948.

Hamburg. A state and free town with local self-government. *Area*, 160 sq. m.; *pop.* 1,014,664. **Revenue**, 1914, £8,984,217; **expenditure**, £9,677,080. **Debt**, £38,739,642.

Hesse. Grand Duke, Ernst Ludwig, *b.* Nov. 25, '68; *suc.* March 13, '92; *m.* 1st, Princess Victoria of Saxe-Coburg (dis. '01); 2nd, Feb. 2, '05, Princess Elenore of Solms-Hohensolms-Lich (*b.* Sept. 17, '71). *H. s.* Georg, *b.* Nov. 8, '06.

A grand duchy in the south central part of Germany, consisting of two main territories, separated by a portion of Prussian territory. Chief towns, Mainz, Darmstadt (**capital**), and Offenbach.

Area, 2,966 sq. m.; *pop.* 1,282,051. **Revenue and expenditure**, 1914, £3,793,015. **Debt**, £21,976,705.

Lippe. Prince, Leopold IV, *b.* May 30, '71; *m.* Aug. 16, '01, to Princess Bertha of H.-B.-Barchfeld. *H. s.* Ernst, *b.* June 12, '02.

A principality dating from the 16th cent. *Area*, 469 sq. m.; *pop.* 150,937. **Capital**, Detmold. **Revenue**, 1914, £146,750; **expenditure**, £148,167. **Debt**, £66,899.

Lübeck. A state and free town with local self-government. *Area*, 115 sq. m.; *pop.* 116,599.

Mecklenburg-Schwerin. Grand Duke, Friedrich Franz IV, *b.* April 9, '82; *suc.* April 10, '97; *m.* Jan. 7, '04, Alexandra of Brunswick-Lueneburg. *H. s.* Friedrich Franz, *b.* April 22, '10.

Area, 5,068 sq. m.; *pop.* 639,958. **Capital**, Schwerin.

Mecklenburg-Strelitz. Grand Duke, Adolph Friedrich VI, *b.* June 17, '82; *suc.* June 11, '14.

Area, 1,131 sq. m.; *pop.* 106,442. **Capital**, Neu-Strelitz.

Oldenburg. Grand Duke, Friedrich August, *b.* Nov. 16, '52; *suc.* June 13, '00; *m.* 1st, Feb. 18, '78, Princess Elizabeth of Prussia (*d.* Aug. 28, '95); 2nd, Oct. 24, '96, Princess Elizabeth of Mecklenburg-Schwerin (*b.* Aug. 10, '69). *H. s.* Nicolaus, *b.* Aug. 10, '97.

Area, 2,482 sq. m.; *pop.* 483,042. **Capital**, Oldenburg. **Revenue**, 1914, £856,180; **expenditure**, £859,067. **Debt**, £4,056,845.

Prussia. King, Wilhelm II.

A kingdom situated in the north of Germany and forming by far the largest portion of the empire. *Area*, 134,616 sq. m.; *pop.* 40,165,219.

Ministry.—*President of the Ministry and Minister of Foreign Affairs*, Dr. von Bethmann Hollweg.—*Finance*, Dr. Lentze.—*Ecclesiastical Affairs and Instruction*, Dr. von Tratt zu Solz.—*Agriculture, Domains and Forests*, Herr von Schorlemer.—*Justice*, Dr. Beseler.—*Interior*, Herr von Löbell.—*Commerce and Industry*, Herr Sydow.—*War*, General von Stein.

Revenue and **expenditure**, 1914-15, £242,311,955.

Reuss, Elder Branch. **Prince,** Heinrich XXIV, *b.* March 20, '78; *suc.* April 19, '02. *Regent*, Prince Heinrich XXVII of Reuss-Gera.

Area, 122 sq. m.; *pop.* 72,769. **Capital,** Greiz. **Revenue** and **expenditure**, 1913, £89,801.

Reuss, Junior Branch. **Prince,** Heinrich XXVII, *b.* Nov. 10, '58; *suc.* March 29, '13; *m.* Nov. 11, '84, Princess Elise of Hohenlohe-Langenburg (*b.* Sept. 4, '64). *H. s.* Prince Heinrich XLV (*b.* May 13, '95).

Area, 319 sq. m.; *pop.* 152,752. **Capital,** Gera. **Revenue** and **expenditure**, £161,883.

Saxe-Altenburg. Duke, Ernst II, *b.* Aug. 31, '71; *suc.* Feb. 7, '08; *m.* Feb. 17, '98, Princess Adelheid of Schaumburg-Lippe (*b.* Sept. 22, '75). *H. s.* George-Moritz, *b.* May 13, '00.

Area, 511 sq. m.; *pop.* 216,128. **Capital,** Altenburg (39,976). **Revenue** and **expenditure,** £284,752.

Saxe-Coburg and Gotha. Duke, Charles Edward (H.R.H. Duke of Albany), *b.* July 19, '84; *suc.* July 30, '00; *m.* October 11, '05, Princess Victoria Adelheid of S.-H.-Sonderburg-Glücksburg. *H. s.* Johann Leopold, *b.* Aug. 2, '06.

Area, 764 sq. m.; *pop.* 257,177. **Capitals,** Coburg and Gotha. **Revenue** and **expenditure,** £94,461.

Saxe-Meiningen. Duke, Bernhard, *b.* April 1, '51; *suc.* June 25, '14.

Area, 953 sq. m.; *pop.* 278,762. **Capital,** Meiningen. **Revenue,** £527,316; **expenditure,** £445,840.

Saxe-Weimar. Grand Duke, Wilhelm Ernst, *b.* June 10, '76; *suc.* Jan. 5, '01; *m.* 1st, April 30, '03, Caroline of Reuss (*d.* Jan. 17, '05); 2nd, June 4, '10, Feodora of Sachsen-Meiningen. *H.* Wilhelm Ernst, *b.* July 28, '12.

Area, 1,397 sq. m.; *pop.* 417,149. **Capital,** Weimar (34,582). **Revenue** and **expenditure,** 1914, £713,152.

Saxony. King, Friedrich, August III, *b.* May 25, '65; *suc.* Oct. 15, '04; *m.* Nov. 21, '91, Princess Louise of Tuscany (marriage dissolved, '03). *H. s.* George, *b.* Jan. 15, '93.

The third largest kingdom in Germany, and one of the chief industrial divisions of the Empire. The greater proportion of the surface is arable, and the yield of grains and potatoes is high. The chief industries are textile manufactures, mining and machinery, but paper and wood pulp factories, printing and glass industries employ a considerable number of the inhabitants. Chief towns, Dresden (**capital**), Leipzig, Chemnitz, and Plauen.

Area, 5,789 sq. m.; *pop.* 4,806,661. **Revenue** and **expenditure,** £24,624,257. **Debt,** £43,658,630.

Schaumburg-Lippe. Prince, Adolf, *b.* Feb. 23, '82; *suc.* April 29, '11.

Area, 131 sq. m.; *pop.* 46,652. **Capital,** Buckeburg. **Revenue** and **expenditure,** £49,448.

Schwarzburg-Rudolstadt. Prince, Günther, *b.* Aug. 21, '52; *suc.* Jan. 19, '90; *m.* Dec. 9, '91, Anne Luise of Schönburg-Waldenburg.

Area, 363 sq. m.; *pop.* 100,702. **Capital,** Rudolstadt. **Revenue** and **expenditure,** £168,885.

Schwarzburg-Sondershausen. Prince, Günther (see Schwarzburg-Rudolstadt).

Waldeck. Prince, Friedrich, *b.* Jan. 20, '65; *suc.* May 12, '93 *m.* Aug. 9, '95, Princess Bathildis of Schaumburg-Lippe. *H. s.* Josias, *b.* May 13, '96.

Area, 433 sq. m., *pop.* 61,707. Capital, Arolsen. **Revenue** and **expenditure,** £86,159.

Württemberg. King, Wilhelm II, *b.* Feb. 25, '48; *suc.* Oct. 6, '91; *m.* 1st, Princess Marie of Waldeck-Pyrmont (*d.* April 30, '82); 2nd, April 8, '86, Princess Charlotte of Schaumburg-Lippe. A kingdom in the south of Germany, including the Black Forest. Agricultural produce, timber and salt are the chief exports.

Area, 7,534 sq. m.; *pop.* 2,437,574. **Capital,** Stuttgart. **Revenue,** 1914, £6,089,781; **expenditure,** £6,095,337. **Debt,** £31,970,595.

FORMER COLONIES AND DEPENDENCIES

The German Colonial possessions before the war had an *area* of 1,000,000 sq. m., with a *pop.* of about 13,000,000, including about 12,500 Europeans, of whom 7,500 were Germans, not counting the military forces, which numbered 4,500 Germans and 3,825 natives. For German South-West Africa (now South-West Africa Protectorate) and Samoa, Upolu, Kaiser Wilhelm Land and Pacific Islands, Bismarck Archipelago, Caroline, Pelew, Marianne and Marshall Islands, see Index. Togoland was the first colony to go, surrendering to a British force, on Aug. 27, 1914; German Samoa surrendered to a New Zealand expeditionary force on Aug. 29, 1914; on Sept. 11, 1914, an Australian expedition hoisted the British flag in New Guinea; the Japanese took possession of the Caroline and Marshall group (subsequently handing them over to Australia) and of Kiao-Chau in Nov. 1914; the German forces in South-West Africa surrendered to Gen. Botha, after the occupation of Tsumeb on July 8, 1915, whilst the final conquest of the Cameroons was accomplished in Feb. 1916.

Cameroons

Cameroons, a territory on the Bight of Biafra, West Africa, annexed by Germany in 1884, with a coast-line of 200 m. Inland it is bounded by Nigeria on the N.W., and the French Congo on the S. and W. An agreement delimiting the frontier between the Cameroons and the French Congo was signed on April 18, 1908. *Area*, 191,130 sq. m.; *pop.* 2,500,000, of whom 1,871 were Europeans. The colony, now jointly administered by France and England, formerly had an Imperial Governor, with a Government Council of 3. A railway runs to the Mouenguba Mountains (160 kms.). **Products:** cocoa and tobacco are grown, rubber and timber exported, and a flourishing trade is carried on in ivory and palm-oil. **Capital,** Buëa. Duala (pop. 22,000) is an important trading centre.

Revenue and expenditure (1913) £767,000 (including £318,000 subsidy)

	1911	1912
Imports . . .	£1,465,875	£1,712,079
Exports . . .	1,062,544	1,166,810

The New HAZELL, 1917

German East Africa

German East Africa lies immediately to the S. of British East Africa, and has an estimated *area* of 384,318 sq. m., with a *pop.* of 7,500,000, including 5,536 Europeans, of whom 3,579 were Germans. It was administered by a **Governor,** with a Government Council. There were 24 districts, and district councils were formed where there was a sufficient white population to warrant it. The Colonial troops consisted of 14 companies, including 262 Europeans and 2,472 natives. The police force numbered 2,140. The **chief products** are hides, wax, copra, rubber, gum, fibre, coffee, and cotton. Gold has been found, and coal north-west of Lake Nyasa. Mica and garnets are found also. The **Usambara railway** now runs from Tanga to Kilimandjaro, 220 m. in length. The Central railway runs from Dar-es-Salaam to Kigoma on Lake Tanganyika, a total length of 780 m. The chief ports on the coast are Dar-es-Salaam (*pop.* about 26,000), Tanga, Lindi, Pangani, Kilwa, Bagamayo, Mikindani, and Saadani. The chief ports on Lake Victoria are Bukoba, Muansa, and Schirati. The chief ports on Lake Tanganyika are Ujiji and Bismarckburg.

	1912	1913	1914
Revenue	—	£1,025,250	£1,187,150
Imports	£2,515,000	2,667,925	—
Exports	1,570,919	1,777,552	—

Togoland

Togoland (administered at present by England and France) lies between the Gold Coast Colony on the west and Dahomey on the east; proclaimed a protectorate in 1884. It was the smallest of German colonies, but the only one which existed without State aid. It surrendered to a British force on Aug. 27, 1914. It includes Little Popo and Porto Seguro, and was administered by an Imperial Governor, assisted by a Government Council. The coast-line is only 32 miles long, but inland the protectorate widens considerably. The climate of Togoland is bad, malaria and other fevers being rife, but towards the hinterland the atmosphere becomes drier and cooler. *Area,* 33,660 sq. m.; *pop.* 1,500,000, of whom only 363 are Europeans. The **capital** is Lome, but Togo is the chief native town, and has 5,000 inhabitants. Chief **exports,** palm oil, gum, and ivory. **Cotton** is being grown with very satisfactory results. There are three railways: (1) from Lome to Anecho, 44 kilos; (2) Lome to Paline, 119 kilos; (3) Lome to Agbonu, 163 kilos.

	1911	1912	1913
Revenue	—	£187,904	£208,823
Expenditure	—	165,135	213,329
Imports	£481,000	571,392	552,668
Exports	465,800	497,945	456,819

Kiao-Chau, in the Chinese province of Shantung, was occupied by Germany in Nov. '97, and formally ceded to her on a 99 years' lease by China in Jan. '98. On the outbreak of the European War Japan lent her assistance to the Allies, and after a short siege took possession of Kiao-Chau, which is now administered by her, pending a general settlement at the conclusion of the war. For the former Pacific Islands of Germany, see p. 462. The protectorate was administered under the German Navy department by a Governor. The territory conceded with the town stretches about 160 miles along the coast, and a neutral zone, with an area of about 2,500 sq. miles and a population of about 1,200,000, surrounds the district and the bay. *Area* of the protectorate (exclusive of the bay) about 200 sq. m.; *pop.* about 33,000. A dock has been built, and the place is being made a fortified coaling station, though for commercial purposes the port is free. Railways run inland from Tsintau to Tsi-nan-fu and I-chau, so as to serve the extensive coalfields of Wei-hsien and Poshan.

GREECE

King of the Hellenes, Constantine I, *b.* Aug. 2, 1868, *suc.* Mar. 18, 1913; *m.* Oct. 27, 1889, Princess Sophia of Prussia (*b.* June 14, 1870), sister of the German Emperor. *Issue:* (1) Prince Georgios (Crown Prince), *b.* July 19, 1890; (2) Prince Alexandros, *b.* Aug. 1, 1893; (3) Princess Hélène, *b.* May 2, 1896; (4) Princess Irene, *b.* Feb. 14, 1904; (5) Princess Catherine, *b.* May 4, 1913.

Ministry.—There is a nominal and subservient ministry of King Constantine's at Athens, with control only over Thessaly; the rest of Greece, which is pro-Ally, looks to a National Ministry, established by M. Venizelos at Salonika.

Envoy Ex. and Minister Plen. in London, J. Gennadius, 14 De Vere Gardens, S.W.
Secretaries, P. N. Delyannis, M. Collas.
Consul-General, J. J. Stavridi, 40 Old Broad St., E.C.

A maritime country in the south-east of Europe, extending from 35° 50′ to 40° N. and from 19° 20′ to 26° 15′ E. As a result of the war of the Balkan States with Turkey, Greece gained substantially in territory, and now has a total *area* of 41,933 sq. m., and an estimated *pop.* (1914) of 4,821,300. The country gained its independence in the famous struggle of 1821–29, after centuries of subjection to Turkey, and was in 1830 declared a kingdom, under the protection of Great Britain, France, and Russia. Under the Constitution of 1864, revised in 1911, the **executive** is vested in the King and his responsible ministers. The **legislative authority** is in the hands of the Boulé, a chamber of 184 representatives elected by manhood suffrage for four years. Officers of the army and navy, civil functionaries, and managers of banks are ineligible for seats. The deputies are each paid about £72 per session. There is also a Council of State. Elementary education is compulsory. The **Greek Orthodox Church,** governed by a permanent council called the Holy Synod, is the State religion, but complete liberty of worship prevails.

In the war with Turkey, which arose in '97 out of Greek sympathy with Crete, Greece was defeated, and had to pay an indemnity of £T4,000,000, and to submit to a strategic reconstruction of the frontier in Turkey's favour. She also had to accept international control in financial matters in the shape of a **Financial Commission** established at Athens, to which the revenues from specified duties and the State monopolies in salt, petroleum, matches, etc., are assigned for the payment of the interest on the external debt. The Financial Commission has entrusted the administration of the monopolies and the collection of the assigned revenues to a Greek Company, which acts under the control of the Commission.

Education is compulsory between the ages of 5 and 12, but illiteracy largely prevails. Greece is mainly an agricultural country, although, owing to the mountainous nature of the country, only one-fifth is cultivable. Peasant proprietorship prevails. Cereals grown are wheat, barley, rye, and maize. The most important crop is that

of currants (exports to the U.K. in 1915, £2,163,425); olives, tobacco, and figs are also largely exported. The imports consist of agricultural products, yarns and tissues, raw minerals and wrought metals, chemicals and fishery products. There are 1,365 m. of railway open; a line of about 70 m. was completed in 1916 to link up with the European system. There is a canal, opened in 1893, through the Isthmus of Corinth; the tonnage passing through it in 1913 amounted to 1,499,991 tons. The Greek **mercantile marine** has been steadily expanding within the last twenty years, and at the end of 1914 numbered 440 steamers with a tonnage of 900,000 tons, and a total value of £6,800,000. It is estimated that the earnings of the Greek mercantile marine in 1915 as a result of the war exceeded £3,000,000.

There are large numbers of Greeks outside the limits of the kingdom, especially in Asia Minor, Cyprus, etc.

Crete.—Crete is an island in the Mediterranean, lying to the south of the Ægean Sea and Archipelago. *Area* about 3,300 sq. m.; *pop.* (1911), 336,151. Chief cities, CANDIA (25,185), Canea (24,399), and Retimo (9,086). There are about 28,000 Moslems and 307,800 Christians. The island was conquered by the Turks in 1669, but never really submitted, and continually rose in insurrection against them, and in 1898 the Powers set up autonomy under the nominal suzerainty of the Sultan. The executive power rested until 1911 in a High Commissioner and a Council of four members; but upon the retirement of M. Zaimis, who held the post of High Commissioner from 1906 to 1911, the Powers did not refill the post. The agitation in Crete for union with Greece was actively pushed forward on the outbreak of the Balkan War, and in Oct. 1912 Cretan deputies were admitted to take part in the sittings of the Greek Chamber. As a result of the treaty of peace between Greece and Turkey, the possession of Crete was handed to Greece, and it was formally recognised by the Powers in Dec. 1913. The Governor-Generalship of the island was abolished in April 1915, and it is now under 4 Prefects, viz., those of Canea, Candia, Rethymo, Lassithi.

Exploration of recent years has led to *archæological discoveries* of surpassing interest at **Knossos and Phæstos.** The chief **products** are olive oil, fruits, tobacco, cotton, and silk, and trade is carried on chiefly with Greece and Turkey. The revenue and expenditure were about £240,000. The imports in 1912 were £931,175 and in 1913 £897,668, consisting chiefly of foodstuffs and textiles; the exports were £701,978 in 1912 and £727,533 in 1913, largely olives and olive oil; there are now no separate statistics for the island, the figures for the whole of Greece including also those for Crete.

Greek Prefect, M. G. Bistakis.

BRITISH CONSULAR OFFICERS

Canea—Consul, E. C. Donaldson Rawlins.
Candia—Vice-Consul, A. Colocherinos.
Rethymo—Cons. Agent, M. Scouloudis.

GUATEMALA

President, Don Manuel Estrada-Cabrera (1917–23; 2nd term).

Chargé d'Affaires in England, Señor Don José M. Lardizábal, 11 Queen Victoria Street, E.C.

Guatemala is the most northerly republic of Central America, situated between 13° 42′ and 17° 49′ N. and 88° 10′ and 92° 30′ W.; it is bounded on the W. and N. by Mexico, N.E. by British Honduras, E. by the Gulf of Honduras and the republic of Honduras, S.E. by Salvador, and S. by the Pacific Ocean. *Area*, 47,810 sq. m.; *pop.* est. 2,000,000, of whom 60% are pure Indians. The climate is healthy, except on the coasts, where malarial fever is prevalent. It formerly formed part of the Confederation of Central America, but the Republic was established in 1848. Governed by a **President**, elected for six years. The legislative power is vested in a **National Assembly**, elected by universal suffrage (1 for every 20,000 inhabitants) for a term of four years, and a **Council of State** of 13, part elected by the Assembly and part nominated by the President. Roman Catholicism is the chief **religion**, but liberty prevails. Education free and compulsory, and 1,800 schools have been established. The **Army** numbers about 8,500 officers and men when

mobilised, with militia about 4,000. Chief **products**: coffee, bananas, sugar, timber, hides, and rubber. Minerals are found, but are little worked. The *trans-continental railway* from Puerto Barrios on the Atlantic to San José on the Pacific, was opened in 1908, and there are in all over 480 miles of line open.

Treaties were signed by Guatemala with Costa Rica, Honduras, Nicaragua, and San Salvador in Dec. 1907, setting up a High Court in Costa Rica (whose neutrality was guaranteed) for the settlement of all disputes between the countries named.

HAITI

President, Gen. Dartiguenave (elect. 1915).

Chargé d'Affaires in England, Abel Théard, Artillery Mansions, 75 Victoria Street, S.W.
Consul, Maurice Erdmann, 32 Fenchurch St., E.C.

Haiti, called Hispaniola by Columbus, and afterwards San Domingo, the second largest island of the Antilles, is between Cuba and Puerto Rico. *Area* of the whole island, 28,249 sq. m. There are two states in the island. The larger is the Dominican Republic (*q.v.*).

The **Republic of Haiti** occupies the western portion of the island. *Area*, 10,204 sq. m., *pop.* (1912) 2,500,000, 95% of whom are negroes and the remainder mulattoes. It was originally a French colony, but was proclaimed independent in 1804, and is governed under a constitution drawn up in 1889. In Feb. 1916 the U.S. Senate ratified a treaty with Haiti, under which the United States took over the control of the finances and police, guaranteeing Haitis territorial integrity, and undertaking to develop its resources. The executive power is in the hands of a **President**, elected for seven years by the Senate and Chamber of Representatives; he receives a salary of £4,800. The **Chamber** of 99 members is elected directly for three years by all male citizens, and the **Senate** of 39 indirectly for six years. The official religion is Roman Catholic, and elementary education is free. There is an army of about 7,000 imperfectly trained men, variously armed, and a navy of 4 small vessels. Agriculture is the main occupation of the country, but comparatively little is done to till the fertile soil. Cocoa, coffee, logwood, and other woods are important products. There are undeveloped mines of gold, silver, copper, antimony, tin, etc. There is a total length of railways of 64 m.

	1912–13	1913–14

HONDURAS

President, Dr. Francisco Bertrand (1916–20).
Vice-President, Dr. Alberto Membreño.

Consul-General in London, M. J. Kelly, 8 Idol Lane, E.C.

Honduras is a republic in Central America, established in 1839, just before the Confederation of Central America broke up. It lies between 13° 10′ and 16° N. and 83° 10′ and 88° 40′ W.; it has an *area* of 44,275 sq. m., and a *pop.* (1914) of 650,000, the majority of whom are Indian and European races. Governed by a **President** and **Congress**, elected by popular vote for four years. Religious liberty is guaranteed by the constitution, but Roman Catholicism prevails. Education is free, compulsory from 7 to 15 years of age, and secular. **Army** has a military strength of 55,284, of whom 35,706 are classified as of first rank. The country possesses great agricultural resources and much mineral wealth, but these have been neglected because of the lack of capital and transport. The north coast is the richest and most populous, though mostly in the hands of American fruit and mahogany companies. Agriculture is showing signs of development. The revenue is derived mainly from the customs and from government monopolies in spirit, powder, and tobacco. **Chief products**: bananas, tobacco, coffee, sugar, indigo, wheat, gold, silver, and cattle. Most of the foreign trade is with the U.S. A railway runs 61 m. inland from Puerto Cortes; it is administered by the Government; there are also six short banana lines on the north coast. Treaties were signed by Costa Rica, Guatemala, Honduras, Nicaragua, and San Salvador in 1907, setting up a High Court in Costa Rica (whose neutrality was guaranteed) for the settlement of all disputes between the countries name. A Treaty of Commerce and Navigation between the U.K. and Honduras was signed on June 21, 1915. As there are practically no means of communication between the north and south coasts, commercial inquiries should not only be addressed to H.M. Consul at Tegucigalpa, but also to H.M. Consuls at Truxillo and Puerto Cortes.

Secretaries, Cav. Gabriele Preziosi, Cav. Giovanni Balsamo, Count Camillo Tortora Brayda di Policastro, Prince Guiseppe Lanza di Scordia, Cav. Tommaso Bertele.
Chancellors, Cav. Ugo Catani, Cav. Guiseppe De Grossi.
Consul in London, Marchese Faa di Bruno, 44 Finsbury Square, E.C.
Vice-Consul, Cav. P. F. Righetti.

* The debt was raised (1867–70) for the purpose of constructing an inter-oceanic railway, but a small proportion only was expended for this purpose. No interest has been paid since 1872. The arrears amount to £30,803,868.

The kingdom of Italy is a great peninsula extending from the mass of Central Europe and lying between the parallels of 46° 40′ and 36° 38′ N. and between 6° 30′ and 18° 30′ E. It has a total *area* of 110,646 sq. m. with a *pop.* (1914) of 35,597,784. The *area*, exclusive of the large islands, is 91,277, sq. m.

Government

Under the Constitution of 1848, as subsequently modified and expanded, the Executive is vested in the King, and exercised through his Ministers. The legislative authority is exercised by the King in conjunction with a **Senate** of about 390 members (composed of the Princes of the royal house who are of age, and of an unlimited number of members selected by the Ministry and nominated by the King for life, who have rendered eminent services to the country, are upwards of forty years of age, and pay taxes to an annual amount of £120); and a **Chamber of** 508 **Deputies,** elected for a period of five years, though the King can dissolve the Chamber at any time. By the Electoral Reform Act of 1912, the suffrage is made almost universal, being open to all males over 21 years of age except those who, being under 30 years of age, have neither performed military service nor learnt to read and write. The same Act provides for the payment of deputies, who receive £240 annually, of which £160 is represented by direct payment and the remainder by a current account with the railways and post office, defraying travelling and postal expenses. All money bills must be initiated in the Chamber. The first general election under the new suffrage took place on Oct. 26, 1913.

For the purposes of **local government** the country is divided into 69 provinces administered by provincial councils and commissions, and subdivided into 8,339 communes. Each commune has a communal and a municipal council, and is presided over by a syndic elected by the communal council from among its own members. The Roman Catholic is the nominal State **religion,** and the religion of the vast majority of the people; but the Government has passed many acts so framed as to make the civil government supreme, and to secure complete freedom for all creeds. The officials of the Church are appointed by the Pope, but the royal assent is necessary in the case either of a bishop or an archbishop. Elementary **education** is compulsory between the ages of six and nine (or six and twelve in some communes where facilities exist) in all parts of the country, but the law is not rigorously enforced. Religious instruction must be given to those children whose parents desire it. Secondary and higher instruction is also provided by the State, and there are 17 State universities, besides several others. Life-insurance was created a State monopoly in 1912 with the object of providing the means for **old-age pensions.**

Agriculture is the occupation of over one-third of the population, wheat (92,825,000 cwt. in 1915), maize (61,860 cwt. in 1915), and other grains being largely produced. Poultry and dairy farming for export are making great progress. Wine (419,210,000 gall. in 1915), silk, and oil are among the other products, and sulphur (2,371,705 tons, 1915), zinc, lead, and iron are mined. There has been a very marked and rapid industrial development in recent years. The **chief industries** are the textile—silk, cotton, flax, hemp, and jute—mechanical and metal industries. Electricity is very largely used for motive power and for lighting and traction. The chief **exports** are silk, wine,

The New HAZELL, 1917

oil, cotton, sulphur, hemp and flax, skins, ores, and cattle.

The length of railways is 11,337 m., of which 8,526 are state owned.

In 1914 162,233 Italian and 10,430 foreign vessels (total tonnage 55,282,197) entered and 161,879 Italian and 10,393 foreign vessels (55,085,461 tons) cleared at Italian ports.

CHIEF TOWNS: Rome, the capital (1915, 594,873); Naples (723,208); Milan (599,200); Turin (427,773); Palermo (341,656); Genoa (289,154); Florence (232,860); Catonia (210,703); Bologna (172,789); Venice (160,719); Messina (133,830); Livorno (105,315); Bari (103,670).

Colonies

Erythrea.—The Italian possessions on the Red Sea were combined under this name by various decrees from '90 to 1901. The colony extends from Cape Kasar about 670 miles along the coast of the Red Sea to a point on the Strait of Bab-el-Mandeb. *Area* about 88,500 sq. m., with a *pop.* which is nomadic, of about 450,000. It has the control of its own administration and finance, under a civil governor appointed by the King.

Asmara is the seat of government. Massowah has about 8,000 inhabitants. Gold-mines exist near Asmara, and pearl fishing is carried on at Massowah by the Italian Pearl Fishery Company. A railway from Massowah to Asmara is open as far as Ghinda.

	1914	1915
Revenue	£709,980	£697,219
Expenditure	679,996	661,897

Italian Somaliland, in North-East Africa, is separated by the river Juba from the East Africa Protectorate (British), and has a coastline extending from the Juba to Cape Guardafui, and then along the coast of the Gulf of Aden to the Somali Coast Protectorate, also British. *Area*, 100,000 sq. m., *pop.* about 400,000. It is divided into three parts for administrative purposes: (1) The **Benadir Coast Colony**, with a coast-line from the Juba to Meregh. In Jan. 1905 Italy assumed sovereign rights over this territory, paying the Sultan of Zanzibar £144,000 therefor, and undertaking the administration instead of

The New HAZELL, 1917

the Benadir Co. Great Britain also leased to Italy five acres of land at Kismayu, with a frontage on the shore, to facilitate trade with Benadir. A Convention with Abyssinia delimiting the boundary was signed in 1907. There is a military force of 3,000 troops, and a police corps. Wireless telegraphy stations have been established for inland and coastal communication. Cotton growing promises well. (2) The **Sultanate of Obbia** under Sultan Yusuf Ali, on the eastern coast. (3) The **Sultanate of the Mijertain,** covering the Horn of Africa, the capital of which is Bandar Auâ.

	1913–14	1914–15

Imports from (and of) U.K.	29,655	38,932	25,484

Tripoli and **Cyrenaica** (*Libia Italiana*), which was formally annexed by Italy in Nov. 1911, is a province in Africa on the Mediterranean coast, bounded on the west by Tunis and Algeria, on the east by Egypt, and on the south-east and south by the Sahara. The estimated *area* is about 400,000 sq. miles, and the *population* about 1,000,000, mostly Berbers, though there are many Jews. Since August 1915 Tripoli and Cyrenaica have formed only one province, consisting of Tripolitania (capital, Tripoli, with a population of 73,000), and Cyrenaica (capital, Bengazi, population 35,000). The trade of the province, about a fourth of which consists of the caravan trade with the Sudan, practically all passes through Tripoli and Bengazi. The chief exports are esparto fibre, skins and hides, ostrich feathers and sponges.

Governor and Commander-in-Chief, Gen. Giovanni Ameglio.

	1915–16

The Empire of Japan consists of a long cluster of islands covering 37° 14′ of longitude and 29° 11′ of latitude. The islands number in all some 549, of which Nippon, Shikoku, and Kiushiu are the chief. The total *area*, excluding Cho-sen, Formosa, the Pescadores and Sakhalin, is 147,655 sq. m., with a *pop.* in 1915 of 54,282,898 (27,438,735 males, 26,844,189 females).

Government

The history of Japan is almost as ancient as that of China, the Emperor being the representative of a dynasty which claims to have possessed the throne since 660 B.C. The country was, prior to 1889, an absolute monarchy, but in that year a new Constitution was promulgated. In the Emperor are vested the executive power with the advice of his Ministers, whom he appoints, and who are responsible to him; and the legislative power with the consent of the Diet. The Privy Council is an advisory body which is consulted by the Emperor on all important State matters. The Diet is composed of a House of Peers and a House of Representatives. The **House of Peers** numbers about 370, and consists of (*a*) Peers elected for life, including: (1) male members of the Imperial family above 20 years of age; (2) princes and marquesses above 25 years of age (15 princes and 44 marquesses); (3) persons above the age of 30 nominated by the Emperor for State services or for their learning; and (*b*) Peers elected for 7 years, including: (1) counts, viscounts, and barons above 25, to the number of one-fifth of each order, elected by the respective orders (there are 103 counts, 397 viscounts, and 429 barons); (2) persons elected indirectly by the residents in the various districts who pay the highest taxes. In the **House of Representatives** there are 379 members, elected by single ballot for 4 years by male citizens over 25 paying land tax or other direct taxes of not less than 10 yen per annum who have resided in their districts for one year at least. Elected and nominated members of both Houses are paid 2,000 yen (about £200) for each session, with travelling expenses.

Local Government, Education, etc.

For **local administration** the country (except Yesso, which has a governor and a special administration, Sakhalin, Cho-sen, and Formosa) is divided into 47 prefectures, each with a governor and an elected assembly. The prefectures are subdivided into 69 muncipalities and 636 counties or rural districts, and the counties again into 1,246 towns and 11,033 villages, each with its chief magistrate, council and assembly. In **religious matters** absolute freedom is allowed, subject to the preservation of peace and order. The chief forms of religion, however, are Shintoism and Buddhism. In every Japanese home

there are shrines or places devoted to ancestor worship, not only of the family ancestors, but of the clan deities and of the Imperial ancestors. The Temple at Ise is dedicated to the worship of the first Imperial ancestor. Elementary **education** is compulsory for children of from 6 to 14 years of age. There are over 27,000 elementary schools, and about 6,500,000 pupils, while high schools and technical schools are rapidly increasing in number. For the **administration of justice** there are 310 sub-district courts of first instance, the district courts, which number 49, 7 courts of appeal, and the Supreme Court or Court of Cassation at Tokio.

Industries, Commerce, etc.

The land is largely held by peasant proprietors, and agriculture is the occupation of more than 60 per cent. of the population. The **chief products** are rice and cereals, tea, sugar, and silk, while textile and other manufactures are improving and increasing. There are about 1,300,000,000 tons of workable coal in the empire, one-half of which is found in Yesso, which island also contains large deposits of sulphur. Copper (export in 1915, 56,000 tons, valued at £4,611,000), iron, gold, and silver are also mined. **Forests** occupy 73·1 per cent. of the total area of the country, and one-third are State forests; almost every known species of tree is represented, and forestry has now become a flourishing industry, the last annual production of the forests amounting to £10,368,663; by-products and chemical products (charcoal, calcium acetate, pine black, pulp, camphor) were valued at over £4,000,000. Although Japan is most advantageously situated for the pursuit of fishery, for many years only inshore fishery was pursued; of late years, however, the fishing industry has developed rapidly, and the output is now over £11,000,000 a year, much canned fish being exported to America and Europe.

The length of **railways** was (1914) 6,593 m., of which 5,472 m. were owned by the State.

A **gold standard** was adopted in Oct. 1897, the unit of value being the yen = 0·75 gramme of pure gold. Foreign jurisdiction in the treaty ports was abolished in 1899, and in return the country was thrown open to European traders, instead of only the treaty ports. Great Britain enjoys "most-favoured-nation" treatment.

Chief Towns

Tokio is the *capital* and has a pop. of 1,818,655; other large towns are Osaka (995,945) and Kioto (380,568). Yokohama (326,025) and Kobé (285,002) are the two chief ports, and the chief centres of foreign trade.

	Revenue.	Expenditure.
1911–12	£65,719,222	£58,537,461
1912–13	58,204,012	58,204,012
1913–14	58,680,758	58,680,758
1914–15	64,520,000	64,520,000
1915–16 (est.)	55,639,600	55,639,600
1916–17 (est.)	55,300,000	55,300,000

The **public debt** outstanding on Dec. 31, 1915, was officially stated to be as follows:

Internal loans	£99,153,158
Foreign loans	148,555,066
Total	£247,708,224

	Imports.	Exports.
1908	£43,625,746	£37,824,567
1910	47,390,534	46,797,960
1911	52,450,998	45,675,542
1912	63,188,795	53,796,063
1913	74,462,813	64,563,646
1914	60,814,700	60,341,600
1915	53,242,350	70,830,087

The following countries took the principal share of the imports and exports in 1914:

	Imports.	Exports.
United Kingdom	£10,107,700	£3,447,400
India	16,522,100	2,663,700
Hong Kong	98,300	3,437,600
Australia	1,496,400	1,114,200
Straits Settlements	427,000	940,100
Canada	114,400	510,900
South Africa	—	50,300
Total British Empire	28,765,900	12,164,200
United States	10,585,900	20,644,600
China	7,506,800	17,392,200
Kwangtung Province	3,192,900	2,273,400
Germany	4,732,900	1,111,700
France	448,200	3,226,300
French Indo-China	1,593,800	82,100
Dutch Indies	2,319,700	696,700
Italy	79,100	1,132,800
Philippines	754,600	691,000
Belgium	678,000	242,100
Other Countries	3,954,200	2,602,000

Exports to U.K. 1915, £9,379,432:

Oils	£1,155,346	Straw, etc., plaiting	597,751
Timber	80,485	Silks	1,560,281
Metals	1,321,795		

Imports from (and of) U.K. 1915, £4,876,655:

Arms and Ammunition	£108,133	Machinery	£480,413
Chemicals	390,088	Manures	130,661
Cottons	502,119	Metal manuf.	1,439,766
		Woollens	454,727

Consult the "Financial and Economic Annual of Japan," published by the Government in Tokio.

Political Parties

Of late years party distinctions have been more clear in name than in policy. The chief party is known as the **Seiyu-Kai**, or Constitutional Political Association. It was formed in 1900 by the Marquis Ito, and has ever since been numerically the strongest party in the Lower House. Whether nominally in power or not, the Seiyu-Kai have always commanded the situation in the last resort.

Treaties with other Countries

For the Treaty with the United Kingdom, see article INTERNATIONAL TREATIES.

By the **Franco-Japanese Agreement,** signed June 10, 1907, and the **Russo-Japanese Convention,** signed July 30, 1907, the **independence and territorial integrity of China,** as well as the principle of equal opportunity in commerce and industry for all nations in the said Empire, were recognised.

An exchange of notes formulating a common policy in the Far East took place in November 1908, between the Japanese and **United States** Governments.

A **Convention with Russia,** signed on July 4, 1910, guarantees the maintenance of the *status quo* in Manchuria as defined in all the treaties concluded up to that date between Japan and

The New HAZELL, 1917

Russia, and between either of those Powers and China. A further Agreement for the settlement of outstanding questions was signed with Russia in August 1911; and in July 1912 the Agreements were supplemented by an understanding with regard to their respective spheres of interest in Inner Mongolia, and by an undertaking for the joint defence of those spheres in case of attack by other Powers.

In 1915 an important Agreement was come to between Japan and **China.** It consented to all the arrangements that might be made in the Treaty of Peace between Germany and Japan as to the disposal of the rights of the former; extended the lease of the Kwantung Province, and settled the rights of Japanese subjects in South Manchuria and Eastern Inner Mongolia. It also strengthened the hold of Japan over the Han-Yeh-Ping Company. China undertook that no other Power should build any naval or military establishment on the coast of the Province of Fukien. As to **Kiao-Chau,** Japan declared that if, on the conclusion of the war, she were given full disposal of it, it would be returned to China subject to its being opened entirely as a commercial port, and to the establishment of a Japanese concession in a locality to be designated by Japan. Arrangements are to be made between the Governments of Japan and China regarding the disposal of German public structures and properties.

BRITISH EMBASSY

Ambassador Ex. and Min. Plen. His Excellency Sir Wm. Conyngham Greene, G.C.M.G., K.C.B. £5,000
Councillor, H. C. Norman.
1st Secretary, C. J. F. R. Wingfield.
2nd Secretary, Count C. H. Bentinck.
Japanese Secretary, E. M. Hobart-Hampden, C.M.G.
Commercial Attaché, E. T. F. Crowe, C.M.G.
Naval Attaché, Capt. E. H. Rymer, R.N.
Military Attaché, Lt.-Col. J. A. C. Somerville.

BRITISH CONSULAR OFFICERS

Dairen—Consul, H. G. Parlett.
Hakodate—Vice-Consul, G. B. Sansom.
Kobé—Consul-General, R. G. E. Forster.
Vice-Consul, H. A. Horne.
Osaka—Vice-Consul, O. White.
Nagasaki—Consul, J. T. Wawn.
Seoul—Consul-General, A. H. Lay, C.M.G.
Vice-Consul, W. B. Cunningham.
Shimonoseki—Consul, E. H. Holmes.
Tamsui: Formosa—Consul, T. J. Harrington.
Tokio—Vice-Consul, G. H. Phipps.
Yokohama—Consul-General, A. M. Chalmers.
Vice-Consul, C. J. Davidson.

Mail transit: Tokio, *via* Vancouver 26 days; *via* Suez, 36–39 days.

Colonies and Dependencies

Cho-sen, or Korea, is the peninsula lying between the Yellow Sea and the Sea of Japan. It has an *area* of 84,000 sq. m. with a *pop.* in 1915 of 17,405,645, the Japanese numbering 291,217. Until 1894 China was the suzerain of Korea, but on the conclusion of the war in 1895, China relinquished her suzerainty, and the independence of Korea was acknowledged. Then began the struggle with Russia, which culminated in the Russo-Japanese War, and by the Peace Treaty between Russia and Japan, 1905, the paramount interest of the latter country in Korea was acknowledged. Five years later, in August 1910, Korea was formally annexed by Japan, and named Cho-sen. Treaties concluded with Korea by other Powers became void with the annexation, but Japan undertook for a period of ten years not to interfere in any way with the commercial rights enjoyed by foreigners in the peninsular. For this period the Korean tariff is to be applied indiscriminately to Japanese and foreign goods. On the other hand, the right of consular jurisdiction came to an end with the incorporation of Korea in the Japanese Empire. Rice, millet, cotton, hemp, soya beans, and tobacco are grown on the fertile territory skirting the sea, and the people are similar in their habits and customs to the Chinese on the neighbouring mainland. The worship of ancestors is carefully observed, and some educational work is done at Seoul. A strong movement towards Christianity is going on in the country, and Christian missions there are extraordinarily successful. **Gold mining** has considerably extended, the export in 1914 being valued at £1,117,201. Copper, iron, graphite, and coal are also found in abundance. There are 1,006 miles of railways working, all being the property of the Japanese Government, and other lines are under construction.

	1913–14	1914–15	1915–16
Revenue and expenditure .	£5,345,448	£5,941,296	£5,856,050
Imports . .	6,851,368	7,307,150	6,454,878
Exports . .	2,142,282	3,152,225	3,510,522

The chief exports are gold, rice, beans, and live stock.

The island of **Formosa** (Taiwan) lies off the Chinese coast; it has an *area* of 13,944 sq. m. and a *pop.* in 1915 of 3,681,888, mostly Chinese. A Governor-General (M. Sakuma) administers the island, which is divided into twenty districts, each under a chief magistrate. The *capital* of the island is Taihoku (*pop.* 96,500), and the principal *port* Keelung, both in the extreme north. Other important towns are Tainan (*pop.* 59,600) in the south and Kagi. The **chief products** are sugar (£2,824,960 in 1914) and rice (£704,640 in 1914), but tea (£694,200 in 1914), camphor and camphor oil, copper and alcohol, are also important exports. The future of the camphor industry (export in 1914, 8,853,597 lb., worth £546,890) continues to excite apprehension owing to possible exhaustion of the existing camphor forests (present area, 1,990 sq. m.), but it is claimed that present resources are sufficient to maintain an annual supply of about 6,500,000 lb. for eighteen years, and that by then the afforestation scheme (to which much care has been devoted) will be far enough advanced for that quantity still to be produced. There are 395 miles of railway.

Revenue and expenditure, 1914–15 (est.) £4,933,150.

	1913	1914
Imports . . .	£6,212,150	£5,401,490
Exports . . .	5,449,040	5,994,380

The **Pescadores** have an *area* of 85 sq. m. and a *pop.* of 55,222.

The island of **Sakhalin** (Karafuto), south of the 50th degree N. lat., was ceded to Japan at the conclusion of the war with Russia by the treaty of Portsmouth, Sept. 5, 1905. The island is separated from Japan by the narrow strait of Soya. It has an *area* of 12,582 sq. m. with a *pop.* in 1915 of 63,653. Its fisheries are valuable, and there are abundant forests. Russia engaged to grant to Japanese subjects rights of fishing along the coasts of the Russian possessions in the Japan, Okhotsk, and Behring Seas.

Revenue and expenditure, 1914–15 (est.) £249,666.

By the treaty of Portsmouth, Sept. 5, 1905, Russia transferred to Japan, with the consent of China, the lease, which was to expire in 1923, but in 1915 was extended to ninety-nine years, of the **Kwantung Province,** including **Port Arthur** (pop. 17,096) and **Dairen** (pop. 45,271), and all rights, privileges and concessions connected with or forming part of such lease, and all public works and properties in the territory, Japan undertaking that the proprietary rights of Russian subjects should be respected. Russia agreed to transfer to Japan, with the consent of the Chinese Government, the railway between Chang-chun (Kwang-cheng-tsze) and Port Arthur and all its branches, as well as all coal mines in the said region, belonging to or worked for the benefit of the railway. The whole has an *area* of 1,219 sq. m., with a *pop.* in 1915 of 522,489, of whom 49,021 were Japanese. The whole of the territory is now a free area, but the question of a customs system is being considered. **Exports,** chiefly beans (value £1,779,865 in 1914), bean-cake (value £2,347,098 in 1914) and bean-oil (value £763,370 in 1914), silk, and coal.

Revenue and expenditure, 1915–16, £432,401.

	1913	1914
Imports . . .	£5,142,290	£4,085,996
Exports . . .	6,030,029	6,456,954

LIBERIA

President, Daniel E. Howard (1916–20).

Envoy Ex. and Min. Plen. in London, J. P. Crommelin, 13 Eaton Place, S.W.
Consul in London, J. T. Grein, 29 Mincing Lane, E.C.
Vice-Consul, A. E. Donaldson.

Liberia is a negro republic on the coast of West Africa, lying between the French colony of the Ivory Coast on the east and Sierra Leone on the west, and between the French possessions in the interior and the sea. The Franco-Liberian boundary is not yet settled. It has an *area* of about 40,000 sq. m. with a *pop.* of 2,000,000, including about 10,000 Americo-Liberians and 500 British natives, the rest being aborigines. Liberia was founded in 1822 by American philanthropists for the settlement of freed slaves. It was declared independent in 1847, was recognised as a sovereign state by Great Britain in 1848, and by the United States in 1862. The **constitution** is on the model of that of the United States. The President is elected for four years, the House of Representatives (14 members) for four years, and the Senate (9 members) for six.

The Governments of Great Britain, France, and the United States have expressed special interests in the welfare of the Republic. The British Government has lent officials to reorganise the customs and the police. In April 1909 the United States Government sent out a Commission of Enquiry of three members, who reported in March 1910. The Commissioners animadverted strongly upon alleged frontier encroachment by Britain and France, and made some uncomplimentary observations upon British efforts to reform the administration. They recommended that the United States Government should make itself directly responsible for the welfare of the country. This recommendation was not favourably entertained in Europe, and though supported by Mr. Knox, it was rejected by the Senate. It was agreed, however, that a loan should be advanced in equal portions by British, American, French, and German bankers with the object of paying off existing debts and so enabling the republic to make a fresh start. It was also agreed that an American General Receiver of Customs should be appointed and three Receivers, of British, French, and German nationality respectively. The loan contract was signed in March 1912, the amount being £340,000, bearing interest at 5 per cent., and secured upon the customs duties and the rubber tax. Bonds to the amount of $715,000 were taken up in London, $460,000 in Holland, and $225,000 in Germany, making a total of $1,400,000 to date. There is a frontier police-force of some 600 men, organised by officers of the United States Government.

The development of the country is hindered by the laws prohibiting any but Liberian subjects from holding land. Until 1909 foreigners were prohibited from trading in the interior or anywhere except at the official ports of entry. There are magnificent forests in the interior, and much mineral wealth exists, some of which is being prospected by the Liberian Development Chartered Company. Valuable deposits of tin reported to have been located in Maryland County are engaging the attention of an English syndicate. The chief **products** are palm kernels and oil, coffee, rubber, and ivory. Cotton is indigenous, but is not cultivated to any extent.

CAPITAL, Monrovia; pop. 6,000.

Revenue and expenditure, 1913–14, £106,300.

	1912	1913
Imports . . .	£347,470	£282,247
Exports . . .	245,656	222,437

	1913	1914	1915
Exports to U.K. . .	£56,709	£58,450	£245,419
Imports from (and of) U.K. . . .	90,258	79,410	73,309

British Consul-General, R. C. F. Maugham, Monrovia.
Vice-Consul, M. Y. H. Parks.
British Receiver of Customs, Richard Sharpe.
Mail transit: 12 days.

LUXEMBURG

Grand Duchess, Marie Adelaide, *b.* June 14, 1894; *suc.* Feb. 25, 1912, on the death of her father the Grand Duke Wilhelm.

By the Treaty of London, 1867, Luxemburg was declared neutral territory; it was, however, violated by Germany in the Great War. For commercial purposes the Grand Duchy is included in the German Zollverein. The **Chamber of Deputies** consists of 53 members, elected directly by the cantons for six years (half retiring every three years). *Area,* 998 sq. m.; *pop.* 259,891 (with the exception of about 5,500 individuals all Roman Catholic). CAPITAL, Luxemburg, pop. 21,000. Revenue, 1914, £880,711; **expenditure,** £995,301; **industries,** chiefly mining (iron and steel) and agriculture. There is also a **province** of Luxemburg, belonging to Belgium, of which it forms the south-eastern corner; capital, Arlon.

British Minister, the British Minister to the Netherlands.
British Consul, N. le Gallais.

MEXICO

President, Gen. Carranza has been recognised by the U.S. as head of the *de facto* Government of Mexico, but complete anarchy prevails in the country.
Minister to Great Britain, Señor Sanchez Azcona.

The New HAZELL, 1917

Mexico is a republic forming the southern extremity of North America, and stretching into Central America. Bounded on the north by the United States; on the south by Guatemala and British Honduras. It has an *area* of 767,060 sq. m. and a *pop.* at the census of 1910 of 15,160,360. The country, by the constitution of 1857 with subsequent modifications, is divided into 27 states, 3 territories, and the Federal district, and these are governed as a Republic by a President, elected by the people for a term of six years. There is a **Senate** of 56 members, each state electing two members, and a **House of Representatives** elected for two years by universal suffrage, one member for every 40,000 inhabitants. Members of both Houses are paid $3,000 per annum. Each state has its own elected governor and legislature. Notwithstanding these democratic forms, Mexico has been ruled for the last thirty years or more by the simpler method of ignoring the Constitution. Thirty-eight per cent. of the population are pure-blooded Indians, and 43 per cent. of mixed Indian and European blood;—a fact which militates against the success of popular government.

Prevailing **religion,** Roman Catholic; but there is no State establishment, and all sects are tolerated. Primary **education** free and compulsory, and great progress is being made. There are 14,000 schools, with an attendance of over 1,000,000. **Industries** comprise mining and smelting of silver and other metals (which employs about 100,000), cotton factories, agriculture, and cattle-herding. The **mineral wealth** is great, comprising gold, silver, mercury, iron, tin, zinc, lead, antimony, arsenic, and sodic carbonate. Mexico is one of the two largest silver-producing countries in the world. A monetary law gives the dollar a value nearly equivalent to 2*s.* in English currency. The **other chief products** are copper, gold, petroleum, and fibres; coffee and tobacco are cultivated very largely. There were in 1912 15,870 miles of railway.

CAPITAL, Mexico; pop. 470,000.

	1912–13	1913–14	1914–15
Revenue .	£12,095,890	£13,230,715	£14,597,000

MONACO

Prince, Albert, *b.* Nov. 13, 1848; *suc.* Sept. 10, 1889; *m.* (1) Sept. 21, 1869, Lady Mary Douglas Hamilton (marriage annulled 1880); (2) Oct. 31, 1889, Alice, Duchess Dowager de Richelieu.
Issue: Prince Louis, *b.* July 12, 1870.
Consul-General in London, T. Lumley, 37 Conduit Street, W.

Monaco is a principality, surrounded on all sides by the French department of Alpes Maritimes, except to the south, where it borders on the sea. *Area*, 8 sq. m.; *resident population* (1914), Commune of Monaco, 2,247; Condamine, 11,082; Monte Carlo, 9,627; total, 22,956. Visitors in 1913, 1,692,258. Italian in language and traditions, but virtually under French control. The Constitution promulgated in 1911 established a National Council of 21 members, elected for four years, by universal suffrage with *scrutin de liste*. Government is administered under the authority of the Prince by a Cabinet assisted by a Council of State. The first stone of the **Casino at Monte Carlo** was laid in 1858. The Société Anonyme des Bains de Mer et du Cercle des Etrangers de Monaco, whose capital is £1,200,000 in 60,000 shares, holds a contract which will expire at the end of 1947. It has practically to bear the cost of spiritual and temporal government for the Principality, and in addition pays £70,000 annually to the Prince for the concession, increasing the amount every ten years from 1907 by £10,000. The revenues (derived chiefly from the Casino) are largely spent on improvements. The Harbour, of about 40 acres, is now fully protected, and allows a depth of 24 feet, and there is excellent yacht anchorage. Customs duties are the same as throughout France. The Hospital, opened since 1902, is quite up to modern requirements.

British Consul, J. W. Keogh (Nice).
Vice-Consul, C. J. Sim (Monaco).

Mail transit: 30 hours.

MONTENEGRO

King, Nicholas I, *b.* Oct. 7, 1841; *suc.* Aug. 14, 1860, as Prince; proclaimed King, Aug. 28, 1910; *m.* Nov. 8, 1860, Princess Milena, dau. of Vayvod Peter Voucotich, and has *issue* 3 sons and 6 daughters.
Heir-apparent, Prince Danilo, *b.* June 29, 1871, *m.* July 27, 1899, Princess Jutta of Mecklenburg-Strelitz.

Premier, M. André Radovitch.

Consul-General for the United Kingdom, Col. Sir John Roper Parkington, 21 Mincing Lane, London, E.C.

Montenegro is a kingdom, lying between Albania on the south and Herzegovina on the north, with

The New HAZELL, 1917

an *area* (including town and district of Dulcigno, ceded by Turkey in 1880) of 5,603 sq. m. and a *pop.* of 500,000.

The executive vests in the King, and the legislative authority in a **Council of State** (consisting of the Crown Prince, the Metropolitan Bishops, all Ministers and Councillors appointed by the King), and a **Skupschtina** created by an edict of Nov. 1905, and consisting of 74 members, 56 elected by the military districts and 6 by the chief towns, 12 being ex-officio members, the religious and official heads of the State, including 3 military officers nominated by the King. The members are elected by manhood suffrage and the ballot for 4 years.

The country is divided into 10 districts, under governors; the districts are subdivided in 69 "capitanats," which are again divided into communes. For 400 years the inhabitants of Old Montenegro struggled to maintain their independence against Turkey, and in 1878 this independence was recognised by the Treaty of Berlin. The waters of Montenegro were by the Treaty closed to the ships of war of all nations, Austria administering the maritime and sanitary police on the Montenegrin coast; but as the result of subsequent negotiations between the Powers the limitations placed upon Montenegro have been modified, so as to open the Port of Antivari to ships of war and to abolish the Austrian control. The erection of forts there or along the River Boyana remains prohibited. The Montenegrins belong to the Serbian branch of the Slav race. Prevailing religion, Greek Church. Education compulsory and free. A large portion of the kingdom is uncultivable, consisting of forest and mountain pasture, and bare limestone. Large herds of cattle are reared, and some small crops are grown. The first **railway** (length, 21 m.) in the country was opened in Dec. 1908. It runs from Antivari to the Lake of Scutari.

CAPITAL, Cetinjé (pop. 5,500). Other towns are Podgoritza, pop. 14,000; Dulcigno, pop. 5,000; and Antivari, pop. 2,514.

Revenue, 1914 (est.), £390,000; **expenditure**, 1914 (est.), £504,000; **public debt**, 1911, £250,000. An international loan of 40,000,000 francs was in course of negotiation, with the assistance of the Powers, when the war broke out. The Montenegrin Government negotiated with French and Italian financiers for advances of some 12,000,000 francs on the strength of this loan. During the Turkish war the Government issued £80,000 of Treasury "bons," which were subsequently redeemed out of the above-mentioned advances. On the outbreak of the present war these "bons" were reissued.

Imports, 1910, £340,000; **exports**, £100,000.

Exports to U.K., 1914, nil; **imports from (and of) U.K.**, 1913, £2,177; 1914, £803.

MOROCCO

Morocco is the westernmost of the Barbary States, occupying the N.W. corner of Africa. An **empire** consisting of the kingdoms of Fez and Morocco, and the territories of Sus, Draha, and Tafilet, with an *area* estimated at about 220,000 sq. m. and a *pop.* estimated at 5,000,000 including Berbers, Tuaregs, and Arabs. There are about 45,000 Europeans in the country. There are **three capitals**: Fez (pop. 100,000), Morocco (pop. 50,000), Mequinez (pop. 24,000). **Chief ports** are Mogador, Dar-al-Beida (or Casablanca), Mazagan, and Tangier, Saffi, Rabat, and Tetuan (Port Marteen). **Tangier** has a pop. of about 45,000. Tafilet is the point of arrival and departure for the caravans through the Sahara.

Morocco is nominally ruled by **Mulai Yusef**, who was proclaimed Sultan in August 1912 in place of his brother Mulai Hafid, who had abdicated and had been allotted a pension of £14,000 a year. Mulai Hafid had himself succeeded a brother, Mulai Abdul, who also retired into private life with a handsome pension. The Sultan is head of religion (the Malekite sect of the Sunnite Mohammedans) as well as of the state.

By the **Anglo-French Agreement, April 8, 1904**, the French Government declared that they had no intention of altering the political status of Morocco, and the British Government recognised that it appertained to France to preserve order in that country, and to provide assistance for the purpose of all administrative, economic, financial, and military reforms which it may require, provided that the treaty rights of Great Britain, including the right of coasting trade between the ports of Morocco enjoyed by British vessels since 1901, were left intact; and that British commerce, including goods in transit through French territory and destined for the Moorish market, were treated on a footing of absolute equality with that of France. In order to secure the **free passage of the Straits of Gibraltar**, the two Governments agreed not to permit, nor to undertake, the construction of fortifications on the Moorish coast between Melilla and the River Sebou, excepting the places occupied by Spain. The two Governments took into special consideration the interests of Spain in Morocco, and the French Government undertook to come to an understanding with the Spanish Government in regard to them, and to communicate such agreement to the British Government. The Agreement was made binding for 30 years, with provision for the extension of the period for 5 years at a time. **Spain** concluded a similar Agreement with France in Oct. 1904. In consequence of Germany's dissatisfaction with these agreements, to which she was not a party, a strained situation arose, and finally an **International Conference met at Algeciras** (Jan. 16, 1906), and an Agreement was signed (April 7), which included —(1) a declaration relating to the organisation of a police force of 2,000 to 2,500; (2) a declaration as to the suppression of the contraband trade in arms; (3) a concession for a State Bank for 40 years, worked by censors appointed by the Banks of France, England and Spain, and the Imperial Bank of Germany; (4) a scheme for improved collection of taxes and the creation of new sources of revenue by means of specified duties; (5) regulations as to Customs duties, etc., with a proviso that on the frontier of Algeria the regulation should be the exclusive affair of France and Morocco, and similarly of Spain and Morocco in the Riff country; (6) a recognition of the principle of economic freedom and the non-alienation of public services and public works. The Agreement came into force Dec. 31, 1906.

In Feb. 1909 an Agreement was signed between France and Germany reproducing the essence of clauses 2 and 4 of the Anglo-French Agreement of 1904.

A summary of the international agreements relating to Morocco from 1904 to 1911 was given in the 1912 ANNUAL.

A Franco-Moroccan Treaty of March 1912 instituted a French protectorate. This document declared that France and Morocco were in agreement as to the establishment of a new *régime* and proclaimed freedom of religion. France is allowed,

The New HAZELL, 1917

for the maintenance of order, to enter into military occupation of any points necessary for this purpose, after due notification to the Sultan. The treaty dealt with the support to be given to the Sultan for the maintenance of his authority, and defined the powers of the Resident-General. It provided for the diplomatic representation of Morocco by France and for the reorganisation of the country's finances. Loans may not be made, directly or indirectly, or concessions granted, without the assent of the French Government. In 1913 the German Government gave its adhesion to this treaty, without reservations.

Trade is carried on chiefly with Great Britain, France, and Germany (see details below), French and Spanish being the most important languages for commercial purposes. Morocco is a fine wheat-growing country, ridged with many ranges of mountains, and rich in minerals; but the country's resources are not yet much developed. The **chief exports** are cereals, eggs, skins, almonds, olive oil, and wool.

Imperial **revenue** about £400,000 per annum. Estimated revenue of French zone, £1,938,000. The principal towns are Tangier (50,000), Tetuan (30,050), Laraiche (16,000), and Alcazar (7,250).

	1913	1914	1915

THE NETHERLANDS

Queen, Wilhelmina Helena Pauline Maria, *b.* Aug. 31, 1880. She is the daughter of William III of the Netherlands, by his second wife, the Princess Emma, sister of H.R.H. the Duchess of Albany, and daughter of Prince George Victor of Waldeck-Pyrmont. Queen Wilhelmina *succeeded to the throne* on the decease of her father, on Nov. 23, 1890, but her mother acted as Queen-Regent till the young Queen came of age (Aug. 31, 1898). Her marriage with Duke Henry of Mecklenburg-Schwerin took place on Feb. 7, 1901. Prince Henry, who was b. in 1876, is a son of the late Grand Duke Frederick Francis II., who held a high military command in the Franco-German war. *Heir*, H.R.H. Juliana Louise Emma Marie Wilhelmina, Princess of Orange and Nassau, Duchess of Mecklenburg, *b.* April 30, 1909. The succession to the throne is in the direct male line, or failing males, females. If there is no legal heir, Sovereign and Parliament (or if the Sovereign is dead, Parliament alone), with its numbers doubled for the occasion, designate a successor.

Prime Minister and Minister of the Interior, Dr. T. Cort van der Linden.
Foreign Affairs, Jonkheer J. Loudon.
Finance, Dr. A. van Gijn.
Justice, Dr. B. Ort.
Marine, Capt. J. J. Rambonnet.
War, Gen. N. Bosboom.
Agriculture and Commerce, F. E. Posthuma.
Public Works, Dr. C. Lely.
Colonies, Dr. Th. B. Pleyte.

Minister in London, Jonkheer R. de Marees van Swinderen, 32 Green Street, W.
Secretary, Baron E. de Nagell.
Agriculture Attaché, Dr. van Rijn.
Chancellor, H. N. Brouwer.
Consul-General, H. S. J. Maas, Finsbury Circus House, 12 Blomfield Street, London, E.C.

A maritime country in the N.W. of Europe, extending from 53° 32′ to 50° 46′ N. and from 3° 24′ to 7° 12′ E. with a total *area* of 12,648 sq. m and a *pop.* in 1914 of 6,260,050.

The Constitution of 1848, revised in 1887, vests the executive in the Sovereign, and the legislative authority in the Sovereign and the **States-General,** the latter sitting in two chambers: the **First,** consisting of 50 members, elected for nine years (one-third retiring every three years) by the provincial States from among the most highly assessed inhabitants and from among a number of specified officials; **the Second,** of 100 members, elected for 4 years by all male citizens of 25 years or more who pay a direct tax to the State, or are householders or own boats of not less than 24 tons, or receive a minimum wage or salary of about £23, or give other evidence of their ability to support themselves and their families. The Government and the Second Chamber alone possess the initiative in legislation; the Upper House having the right of approval or rejection, but not of amendment. Alterations in constitution are made by a two-thirds vote of both houses, followed by a general election, and confirmation by a similar vote of the new States-General. Members of the First Chamber are paid 16*s.* 8*d.* a day during the Session, and those of the Second Chamber £166 per annum and travelling expenses. **A State Council** of 14 members appointed by the Sovereign is consulted on all legislative and on most executive matters.

For **local government** the country is divided into 11 provinces and 1,123 communes, each province having its own representative body, which has the power of making ordinances subject to the approval of the Sovereign; and each commune having its council elected for 6 years, with a mayor and aldermen. Entire liberty and social equality granted to all religions. Over 2,500,000 belong to the **Dutch Reformed Church,** but there are over 1,800,000 Roman Catholics, and the State pays certain fixed allowances to the different Churches. **Education** is compulsory for children from 6 to 13 years of age, and is well organised, and practically free as to the primary schools. Great importance is attached to the teaching of

* Including trade across Algerian frontier and Melilla.

modern languages and to technical and scientific education. **The judicial system** includes 106 cantonal courts, 23 district tribunals, 5 Courts of Appeal, and the High Court. Trial by jury does not exist. Length of railways, 2,295 miles. Length of canals about 2,000 miles, and of other navigable waterways about 3,000 miles.

The chief **imports** are cereals and flour, iron and steel, textiles, and raw materials and food products generally. The chief **exports** are food products, drugs, iron, steel, textiles, sugar, etc. The few duties that are levied are not for purposes of protection. Practically free trade prevails. The CAPITAL is Amsterdam (pop. 573,994), and other chief towns are Rotterdam (462,481), The Hague (301,846), Utrecht (122,853).

Mail transit : The Hague, 10 hours.

* Estimated.

Reclamation of the Zuyder Zee

According to the scheme of the Zuyder Zee Association, the time needed for the work will be 33 years, and the estimated cost 189,000,000 fl. (£15,750,000), exclusive of interest. Four separate areas will be dyked in; one around the Island of Wieringen, one to the south of the town of Hoorn, one near the River Eem along the coast of Gelderland, and the fourth at the south coast of Friesland. These areas would contain a total of roughly 211,000 hectares, equal to 521,170 acres. An embankment or dam is to run from a point in the north-east corner of the province of North Holland, near Wieringen, to the village of Piaam, on the west coast of Friesland. This embankment would have a length of 29,300 metres, with a height of 5·40 metres above Amsterdam water level. It is estimated that the constructing of this dam will take nine years. When the four areas are redeemed a fresh-water lake will have been formed in the middle, and supply the surrounding districts with water. The large fresh-water lake will facilitate the draining of the land. The lake will raise the value of hundreds of thousands of acres of grassland in the surrounding districts, and the products will improve in consequence. The Zuyder Zee fishermen, of whom there are 3,017, will be compensated. The value of the fish caught in the Zuyder Zee is a little over 2,000,000 fl., or about £167,000 annually.

Dutch East Indies

The Dutch possessions in the Asiatic Archipelago include (1) Java, with Madura, *area* 50,554 sq. m., *pop.* about 30,000,000; and (2) what are called the Outposts, viz., Sumatra, part of Bôrneo, Celebes, the Moluccas, part of New Guinea, and the Sunda and other islands, which have an estimated *area* of about 686,000 sq. m. and an estimated *pop.* of about 7,500,000, and are administered by Governors, Residents, etc., according to their status. The administrative and executive authority for the whole of Dutch East India is in the hands of a **Governor-General,** assisted by a **Council,** with partly legislative and partly advisory functions, consisting of five members. Under him the administration is carried on by Residents and subordinate officers. The army, which is purely colonial, numbers about 12,150 Europeans and 24,000 natives. The cost of the navy is borne partly by the colony and partly by the Government of the Netherlands. There is complete religious liberty, and education is well looked after. There are 2,950 miles of railroad (2,460 in Java and 490 in Sumatra) opened for traffic. The chief **exports** are sugar, coffee, tea, indigo, and tobacco. Petroleum has become an important industry, especially in Sumatra. The number of Europeans is about 76,000, the bulk of whom are Dutch. There are about 550,000 Chinese, and a number of Arabs, etc.

	1915	1916
Revenue	£25,785,755	£26,980,279
Expenditure	28,203,393	30,609,852

	1913	1914
Imports	£41,111,750	£32,074,000
Exports	56,995,500	53,382,000

The New HAZELL, 1917

Java is the chief seat of Dutch power in the East Indies. CAPITAL, Batavia; pop. 138,551. Other chief towns are Samarang (pop. 96,660) and Sourabaya (pop. 150,198). Land is Government property, except in the west, and is let on hereditary lease to individuals, or to villages in the case of communal holdings. The chief exports are sugar (export, 1914, 1,275,772 tons), coffee, rice, teak, tea (export, 1914, 71,319,635 lb.), tapioca, and petroleum. Rubber cultivation has increased rapidly (export, 1914, 8,581,043 lb.). Quinine and cinchona bark are also exported; owing to the agreement come to between planters and manufacturers the industry is in a position of great strength. The export of manufactured quinine in 1913 was 159,450 lb.

	1913	1914	1915

Borneo. Of the estimated total *area* of 300,000 sq. m., estimated *pop.* 1,846,000, Holland claims as a possession 212,000 sq. m. of territory on the south, east, and west of the island, with a population of about 1,250,000. In reality this immense tract is parcelled out into various native states. Those on the coast are more or less under Dutch influence. Of the interior little is even known. The principal **Dutch settlements** are at Sambas, Pontiana, Banjarmassin, and Samarinda.

	1913	1914	1915
Exports to U.K.	£417,485	£686,227	£440,358

Moluccas has an *area* of 72,000 sq. m.; *pop.* about 2,900,000. It is divided into two districts, Menado and Celebes.

Menado.—The northern point of Menado is Minahassa. It is occupied by Christians, and is under Dutch government. There are no native states. The south point is Gorontalo, which is also under Dutch government.

Celebes.—The south point of Celebes, viz. Macassar, Bonthain, and Balagnipa, are under Dutch government, and have no native states. The remaining parts of Celebes have native states, but entirely under the control of the Dutch government. Chief **exports,** coffee, hides, maize, copra, gum copal, and spices.
British Vice-Consul, L. S. Arathoon (*actg.*) (Macassar).

Dutch New Guinea, lying to the west of the British possessions in New Guinea, covers an *area* of 151,790 sq. m., and has a *pop.* of about 200,000. South of New Guinea is under the Residency of Ambon, and has two Assistant Residents, one in Merauke and the other in Fak Fak. The northern part is under the Residency of Ternate, and has an Assistant Resident in Manokoeri.

Dutch West Indies

Curaçao, an island in the Caribbean Sea, off the coast of Venezuela, is the chief of Hollands' West Indian possessions. The colony of Curaçao includes the islands of Curaçao, Buen Ayre or Bonaire, Aruba, St. Eustatius, and Saba, with part of the island of St. Martin. The total *area* is 403 sq. m., and the *pop.* 56,152. The colony is administered by a **Governor** with a **Council** of 4 members all nominated by the sovereign, and a **Colonial Council** of 13 nominated members. There are wireless telegraphic stations at Willemstad, in the islands of Curaçao, Kralendyk, Bonaire, and Aruba. Cattle, sheep, goats, etc., are bred for exportation. Phosphates, salt, dividivi, and straw hats are also exported.

Revenue, 1914, £56,025; **expenditure,** 1914, £99,212.

	1913	1914	1915
Imports	£351,860	£390,264	£388,786
Exports	190,477	180,859	192,199

British Consul (actg.), Ivan H. Laing.

Mail transit : 17 days.

Surinam, or Dutch Guiana, is a colony on the north coast of South America, bounded on the east by French Guiana, on the west by British Guiana, and on the south by the mountains which separate it from Brazil. It has an *area* of 46,060 sq. m. and a *pop.* of 98,962, of whom about 30,000 are free and indentured British Indians. It is governed by a **governor** and **council** of four **ex-officio** and three nominated members, all appointed by the sovereign. There is a representative body called the **Colonial States,** elected for six years by the inhabitants. The CAPITAL is Paramaribo; pop. (1915) 35,530. The chief **products** are gold, sugar, timber, balata, rice, cocoa, coffee, and rum. There are 106 miles of railway.

	1913	1914	1915

New Guinea, or Papua. An island lying directly N. of Australia, and after Australia and Greenland the largest island in the world. It is about 1,490 miles from E. to W., with a breadth at centre of 430 miles. The *area* is now computed to be 234,768 sq. m. The **British territory** comprises the south-eastern part of the island, as well as that portion formerly known as Kaiser Wilhelm's land, and neighbouring island groups. **Dutch New Guinea** lies to the west of the British territory.

New Hebrides. A long chain of volcanic islands in western Polynesia, lying W. of Fiji and N.E. of New Caledonia. *Area*, about 3,000 sq. m.; *pop.* about 100,000. The larger number of the natives are still cannibals. There are both Protestant and Roman Catholic missions. Under the Anglo-French Convention of Nov. 16, 1887, and the Agreement of June 26, 1888, the islands were, for the protection of life and property, placed under a joint commission of French and British naval officers on Pacific stations. Under the

The New HAZELL, 1917

Anglo-French Agreement of April 8, 1904, and the **Convention** signed Oct. 20, 1906, the subjects of the two Powers enjoy equal rights of residence, personal protection, and trade, each Power retaining jurisdiction over its subjects or citizens, and neither exercising a separate control over the group. As to citizens of other Powers, they must choose within six months between the legal systems of the two Powers, failing which the **two High Commissioners** decide under which system they should be placed. The two Powers undertook not to erect fortifications or establish penal settlements in the group. The two High Commissioners are appointed by the British and French Governments, and each is assisted by a Resident Commissioner. A police force sufficient to protect life and property is provided in two divisions of equal strength, each under one of the two Resident Commissioners. **Vila,** in the island of Efate, is the **seat of government.** Various public services, the posts and telegraphs, public works, public health, ports and harbours, are undertaken in common, a Joint Court is established, and regulations are made as to land suits, and grants and sales, the recruitment of native labourers, etc. The sale of arms, ammunition, and intoxicating liquors to natives is forbidden.

NICARAGUA

President, Señor Adolfo Diaz (1913–17).

Minister to Great Britain, Señor Dr. Don Santiago Pérez-Triana.
Consul in London, M. J. Herrmann (Vice-Consul in charge of Consulate), 19 Eastcheap, E.C.

Nicaragua is a Central American republic, bounded on the N. by Honduras, S. by Costa Rica, W. by the Pacific, and E. by the Caribbean Sea. It has an *area* of 49,500 sq. m., with a *pop.* of 600,000, consisting mainly of Indians and mixed races, with very few Europeans. The prevailing religion is Roman Catholic, and primary instruction is nominally free and compulsory. Military service is obligatory. The culture of the land is improving; coffee is by far the most important article grown, but the banana trade and coconut plantations are increasing. Some gold-mining is also done in the Matagolfa and Chontales districts. Some £500,000 of British capital is invested in various undertakings, mostly on the Pacific side, the Atlantic side being more or less monopolised by Americans. There are 171 miles of railways. **Imports:** cotton and woollen goods, flour, wines and spirits, drugs, hardware, provisions, etc. **Exports:** coffee, bananas, gold, rubber, hides, and cattle.

By treaties signed in Dec. 1907 a High Court was set up for Central America, to meet in Costa Rica, whose neutrality was guaranteed.

The United States Government exerted itself in 1911 to place the financial position of the country upon a sound basis; but, as in other South American States, the Budget is liable to be swollen by the cost of repressing or conducting a sanguinary revolution. The Nicaraguan Canal Treaty was ratified by the Senates of the U.S.A. and Nicaragua in 1916 whereby the U.S. have the right to build a canal through Nicaragua, obtain possession of Corn Island on the Atlantic and a certain part of land on the Gulf of Fonseca on the Pacific, for establishing naval stations, in consideration of the sum of $3,000,000. The treaty has not been made public yet.

The CAPITAL is Managua (pop. 34,872). Leon has a population of 63,000, and Granada of 17,000.

NORWAY

King, Haakon VII, King of Norway, *b.* Aug. 3, 1872, the second son of King Frederik of Denmark. His baptismal name was Charles, but he assumed the above title on becoming King on Nov. 18, 1905, on the separation of Norway and Sweden. King Haakon and Queen Maud made their formal entry into Christiania Nov 25, 1905, and the King took the oath before the Storthing on Nov. 27, and was crowned at Trondhjem on June 22, 1906. The King married Princess Maud Alexandria, sister of King George V., on July 22, 1896. His son and heir-apparent is Prince Alexander, *b.* July 2, 1903, and renamed Prince Olaf on his father's accession to the throne.
Premier and Minister of Agriculture, Gunnar Knudsen.
Public Worship, J. Lovland.
Commerce, M. Friis-Petersen.
Finance, A. Omholt.
Justice, A. T. Urbye.
Foreign Affairs, N. Ihlen.
National Defence, Gen. Holtfodt.
Labour, F. A. M. Olsen Nalum.
Social Affairs, L. Abrahamsen.
Supplies, M. Odmund Vik.

Minister in London, P. B. Vogt, 25 The Boltons, South Kensington, S.W.
1st Secretary, J. Michelet.
2nd Secretary, N. Aall.
3rd Secretary, R. M. Peterson.
Attaché, A. Lundh.
Military Attaché, Maj. C. Gulbranson.
Consul-General, H. A. W. Eckell, 22 Great St. Helen's, E.C.
Vice-Consul, Hjalmar Ohlsen.

The dissolution of the union with Sweden, which had endured from 1814 to 1905, but was dissolved by the action of the Norwegian Storthing on June 7, 1905, following on a protracted dispute between the two countries as to their diplomatic representation abroad; and the Karlsbad Convention was signed Sept. 24, 1905, settling the details of a mutual agreement for the repeal of the Union. King Oscar declined the offer of the throne to a prince of his house, and after a ple-

biscite it was offered to and accepted by Prince Charles of Denmark, who became King as Haakon VII. The maritime frontier of the two countries was determined by The Hague Tribunal in Oct. 1909. The Grisbadarna Islands, important as fishing centres, were allotted to Sweden, while Skjoette Grund was awarded to Norway.

The Norwegian Constitution of 1814, several times modified since, vests the legislative power in the **Storthing**, which has 123 members (41 urban, 82 rural); elected for 3 years. Every male citizen of 25 who has resided in the country for 5 years is qualified as an elector, except for legal disabilities. A Bill granting citizenship and the franchise to women under the same conditions as at municipal elections—*i.e.* the women or their husbands must have paid the taxes for the past year—was adopted by 96 votes to 25, June 14, 1907. The electorate was thus increased by about 300,000. Women may also be elected to the Storthing, and may fill most of the public posts, except those in the Government, the State Church, the Army and Navy, and the Diplomatic services. The Storthing is divided into the **Odelsthing**, composed of three-fourths of the members, and the **Lagthing**, consisting of the remainder; all new bills originate in the former. If the two divisions do not agree, the combined house deliberates, and the measure must be passed by a two-thirds majority. Members are paid 13*s.* 4*d.* a day during the session. The King has the right of vetoing the laws passed by the Storthing, but if the same bill pass three Storthings separately and consecutively elected, his veto is overridden. The executive power is in the hands of the King with a Council of State composed of a Minister of State and 8 Councillors.

On Nov. 2, 1907, the 1855 treaty, under which the integrity of Norway and Sweden as against Russia was guaranteed by Great Britain and France, was dissolved, and a new treaty guaranteeing the independence and territorial integrity of Norway was signed by the representatives of Great Britain, France, Germany, Russia, and Norway.

The Norwegian Government undertook to cede no part of Norwegian territory to any Power either by way of occupation or by way of any arrangement.

The treaty is in force for ten years. Should the treaty not be denounced by one or the other party at least two years before the expiry of the ten years, it will remain in force for a fresh period of ten years, and so forth. In the event of the treaty being denounced by one of the Powers which participated with Norway in its conclusion, this denunciation will only have effect in regard to that Power.

For **local government** the country is divided into 20 prefectures, and these again into urban and rural communes, all with representative government. The **State Religion** is Episcopal Lutheran, but all others are tolerated, except Jesuits. **Education** is compulsory for children from 6½ (in towns) and 7 (in the country) to 14, the local authorities chiefly providing the cost, with subsidies from the State. Of the total area, 21 per cent. or 26,678 sq. m. are under forest, and only 3·5 per cent. is cultivated. There are 1,694 miles of State railways and 284 miles worked by companies. The mercantile marine in 1915 consisted of 3,414 vessels, of a net tonnage of 1,787,887. There are important **industries** in the country, including mining, the timber and pulp trade, chemical products, canned fish, etc. Timber, wood pulp, cellulose, raw minerals, paper, skins, and fish are the **chief exports**, which go mainly to Great Britain, Germany, and the United States. Grain, metal goods, textiles, groceries, coal and coke are the **chief imports**, sent mainly by Great Britain, Germany, Sweden, and the United States. British firms with agents at Christiania are asked by the Consul to communicate their agents' names for entry in the Christiania Consulate Agents' Register. British firms not locally represented can inspect a list of the members of the Agents' Association, arranged under trade headings, at the Commercial Intelligence Branch of the Board of Trade, 73 Basinghall Street, London, E.C.

CAPITAL, Christiania, pop. 1913, 255,857; other chief towns are Bergen, 78,400; Trondhjem, 47,577; Stavanger, 37,832.

OMAN

Omān is an independent state in South-Eastern Arabia, whose territorial possessions outside have been considerably reduced during the last hundred years. It has an *area* of 82,000 sq. m. and a

pop. of about 550,000. It is ruled by a Sultan, Seyyid Taimur bin Feysil, whose capital is **Masqat** (pop. 24,000). He succeeded in Oct. 1913, and is recognised by the British Government, which has an agent at Muscat (Masqat). Under an Order in Council issued in 1867 and renewed in 1916 certain portions of the law of Great Britain and of British India have been made applicable to British and British Indian subjects resident in Omān. This law is administered by the Political Agent. Masqat was for a long time the centre of the **gun-running traffic,** which, in spite of the watchfulness of British warships, placed a large number of modern rifles in the hands of the tribes of the N.W. frontier of India. This traffic was protected by a Treaty concluded in 1862 between France and the State of Omān, and at successive Brussels Conferences on the subject France steadily refused to consent to the prohibition of the traffic, but in Feb. 1914 she consented to withdraw her opposition. The imports of arms and ammunition in 1914–15 was £157 only.

	1912–13	1913–14	1914–15
Imports . . .	£463,551	£407,768	£327,612

PANAMA

President, Dr. Ramón M. Valdés (1916–20).

Chargé d'Affaires and Consul in London, C. R. Zachrisson V., 232 Finsbury Pavement House, E.C.

The Republic of Panama was constituted on Nov. 3. 1903, having previously been a department of the Republic of Colombia. The inhabitants of the Isthmus of Panama being strongly in favour of the acquisition of the Panama Canal Concession by the United States and the construction by them of the Canal, declared their independence. The United States Government at once recognised the new Republic, and concluded with it a treaty on Nov. 18, 1903, guaranteeing and agreeing to maintain its independence. Its independence was recognised by Colombia in a treaty with the United States, signed at Bogota on April 6, 1914. The treaty has been ratified by Colombia, but not by the United States. The Republic has an *area* of 32,380 sq. m. and a *pop.* of 336,742, including a great mixture of races. There is a **President** elected for 4 years. The **National Assembly** consists of 33 members elected for 2 years. There is neither an army nor navy.

The Republic is divided into 8 provinces, each under a governor, with other subordinate officials. The chief ports are: on the Atlantic, Colon, Cristobal (Canal zone), Bocas del Toro, and Puerto Bello; on the Pacific, Balboa (in Canal zone) and Pedregal. A railway runs from Colon to Panama across the isthmus, a distance of 47 miles, and belongs to the U.S. Government, as does the **Canal Zone,** which extends 5 miles on each side of the canal, except the cities of Panama and Colon at the ends. The pop. of the Canal Zone is 34,657. The soil is very fertile, but not well cultivated. Bananas are exported, and some rubber, coconuts, and hides. Considerable railway extension is in progress.

CAPITAL, Panama; pop. 60,373; Colon, 29,331.

	1912	1913	1914
Revenue . .	£691,057	£821,843	£780,119

Colon-Consul, J. R. Murray.

Vice-Consul, F. O'Meara.

Mail transit : 19 days.

Panama Canal

The Panama Canal, which was fully described in the 1914 and earlier editions of the ANNUAL, was made available for commercial shipping on Aug. 15, 1914. The route was first surveyed by de Lesseps in 1879. In 1881 La Compagnie Universelle du Canal Inter-oceanique was formed, but went into liquidation in 1894. It was succeeded by another company, which only did sufficient work to maintain its franchise. In 1902 the U.S.A. Government bought from this company all its rights for $40,000,000, and completed a treaty with the new Republic of Panama. Under this treaty the U.S.A. guaranteed the independence of Panama, and acquired complete control of the Canal zone (a strip of land 10 miles wide through the centre of which the Canal flows) in consideration of an immediate payment of $10,000,000 and an annual rent of $250,000, beginning Feb. 26, 1913. The U.S.A. Government took formal possession of the French property May 4, 1904. The Canal is 50 miles in length, and has a minimum width of 300 ft. There is a minimum depth of 41 ft. There are three sets of locks, the Gatun, effecting a rise of 85 ft. from sea level; the Pedro Miguel, with a descent of 30½ ft.; and the Miraflores, with a descent of 54⅔ft., to sea level. The Canal Government acts as agent for ships. Shipowners may cable (Isthmian Canal) or write to the Panama Canal, Balboa Heights, Canal Zone, and all their wants that could be cared for by an agent (except that of soliciting cargo) will be attended to without charge. The service includes coaling, provisioning, chandlery, and payment of tolls. A 1,000-ft. dry-dock is being constructed at the Pacific entrance. The first year's working shows that 1,317 vessels, other than canal vessels and launches, carrying 5,909,105 tons of cargo, passed through the Canal. Slightly more than one-half of this traffic, both in vessels and cargo tonnage, was east-bound, the figures being: east-bound, 661 vessels carrying 3,346,623 tons of cargo, and west-bound, 656 vessels carrying 2,562,482 tons. The Canal was subject during 1915 to continuous

The New HAZELL, 1917

interruptions of traffic owing to **landslides**, and traffic was entirely suspended until April 1916.

Toll Rates.—On merchant vessels, carrying passengers or cargo, $1·20 per net vessel ton—each 100 cubic feet—of actual earning capacity.

On vessels in ballast, without passengers or cargo, 40 per cent. less than the rate of tolls for vessels with passengers or cargo.

Upon naval vessels, other than transports, colliers, hospital ships, and supply ships, 50 cents per displacement ton.

Upon army and navy transports, colliers, hospital ships, and supply ships, the same rate as on merchant ships with passengers or cargo.

The rules for the measurement of ships using the Canal are based principally on those for the Suez Canal, but are a little more liberal in the allowances on the net tonnage, upon which tolls are charged. All vessels applying for passage through the Canal have to present a certificate giving the gross and net tonnage as determined by the rules.

Vessels are towed through the locks by electric motors, moving on racks at the rate of 2 miles an hour, 4 to a ship. No vessel is allowed to pass through the locks under its own steam, the vessel, on reaching the approach wall of a lock, being taken in charge of the Canal authorities, who place their officers on the bridge and in the engine room. The opening and closing of a lock gate occupies 2 minutes, and a lock is filled or emptied in 30 minutes. The whole passage of the Canal takes 10 hours. Modern coaling plants have been installed at both ends of the Canal, with a stock of 200,000 tons at the Atlantic end, and 100,000 tons at the Pacific end. Part of the area served by the Government coaling plant can be leased to private individuals and firms. Similar arrangements are made with regard to oil fuel. A high-power wireless station, equipped with the Poulsen apparatus, is erected at Caimito, half way across the isthmus; it has a radius of 3,000 miles, enabling direct communication to be held with the Arlington station, near Washington, and with San Francisco.

PAPACY, THE

The Popes, or Roman Pontiffs, exercised temporal sovereignty for many ages over the central portion of Italy. In 1860 Romagna, Umbria, and the Marches were incorporated in Italy, as was the remainder, including Rome, in 1870. By a law of 1871 the territory of the Vatican and Lateran palaces, and the Villa of Castel Gandolfo, were guaranteed to the Pope, together with a yearly indemnity of £129,000 (still unclaimed and unpaid).

Supreme Pontiff, His Holiness Benedict XV (Giacomo della Chiesa), *b.* Nov. 21, 1854; ordained, 1878; Archbp. of Bologna, 1907; Cardinal, May 1914; elected Pope, Sept. 3, 1914; crowned, Sept. 6, 1914.

Secretary of State, Cardinal Pietro Gasparri (*b.* 1852).

British Envoy Ex. and Min. Plen. His Ex. Count de Salis, K.C.M.G.

PARAGUAY

President, Dr. Don Manuel Franco (1916–20).

Minister Plen. in England (vacant).

Consul-General in London, Alfred James, 18 Eldon Street, London, E.C.

An inland republic of South America, situated between 20° 16′ and 26° 31′ S. and 54° 37′ and 62° W. It has an *area* of about 65,000 sq. m., excluding the Chaco territory, which has long been the subject of dispute between Paraguay and Bolivia, and has an estimated area of 107,000 sq. m. with a pop. of 800,000, including 50,000 to 100,000 Chaco Indians.

The Republic of Paraguay is governed, under a Constitution proclaimed in Nov. 1870, by a **President,** who with five Ministers of State forms the Executive, and a **Congress** consisting of a Senate and a Chamber of Deputies, both elected by popular vote. The President is elected for four years, but the country has been so subject to frequent revolutions that since the foundation of the Constitution few have been allowed to complete the term of office. It is now hoped that settled conditions have become more securely established, for there has been no revolution since 1912. The State **religion** is Roman Catholic, but all others are tolerated. **Education** is free and nominally compulsory. The army numbers 2,000–3,000 men, but, according to a law which has not yet been put into force, every citizen is liable to serve 2 years with the colours and up to the age of 45 in the reserves. A railway, 232 miles in length, runs from Asuncion to Encarnacion in the extreme south of the country. It is joined on the opposite side of the River Alto Parana, at Posadas, by the Argentine N.E. Railway, and a through train service from Asuncion to Buenos Aires (985 m.) is in operation. A train ferry, opened in 1913, enables the journey to be made without change; these through trains are provided with sleeping and restaurant cars, and are well served and up to date. Part of a branch line from Borja in the direction of the Iguazú Falls has been constructed, and a small light railway is in operation from Conception to Horqueta (26 m.). A large part of the country is covered with forest growth, much of which is untouched. Cedar and certain hard woods find a market in Argentina. The chief products are cattle, jerked beef, yerba maté (Paraguay tea), tobacco, hides, oranges, quebracho extract, and timber. Petit grain oil, made from the leaves of the sour orange tree, is manufactured in considerable quantity for export. Cotton is being cultivated experimentally. Stock-raising is the principal industry; sugar, maize, mandioca (cassara), rice, etc, are grown for home consumption; native lace and a few other home industries are carried on to a limited extent. Some minerals are found, but are not worked.

CAPITAL, Asuncion; population estimated at 80,000.

British Minister Plen. Sir Reginald Tower, K.C.M.G., C.V.O. (at Buenos Aires).

Consul (with local rank of First Secretary in Diplomatic Service and Chargé d'Affaires in absence of Minister) at Asuncion, F. A. Oliver.

Mail transit: 23 days.

* The currency, paper dollars, is subject to much fluctuation. The rate of exchange for drafts on London was, in Aug. 1916, about $140 to the £.

PERSIA

Sovereign, Ahmed Shah, Shah, son of Mahomed Ali Shah. He was *b.* 1898. On the abdication of his father he succeeded to the throne (July 17, 1909), and was crowned at Teheran July 21, 1914. The *Heir-apparent* is the Shah's second brother Muhammad Hassan Mirza, *b.* 1899.
Prime Minister, Sipar Salar Azam (app. 1916)

Persian Minister in London, Mirza Mehdi Khan, Mushir-ul-Mulk, 47 Bramham Gardens, S.W.
Councillor, Mirza Abdol Ghaffar Khan.
1*st Secretary*, Mohamed Ali Khan, Ehtesham-Homayoun.
3*rd Secretary*, Fathollah Khan Noury Monazzemes-Saltaneh.
Consul-General, H. S. Foster.
Consul, R. Mitchell, J.P.

A kingdom of Western Asia, with an *area* of 628,000 sq. m. and a *pop.* of about 9,000,000.

Previously to 1906 the Shah was an absolute ruler, but on Aug. 5 of that year a decree was issued by Shah Muzaffar-ed-Din convoking a Mejliss or National Assembly, and a Constitution, dated Jan. 1, 1907, was confirmed on Feb. 11 by Mohamed Ali Shah, after his accession. A new Constitution, signed by the Shah in Oct. 1907, limited the sovereign's prerogatives and ecclesiastical authority, granted liberty of conscience, of the person, of education, of the Press, of associations, and of speech, and defined the duties of Parliament and the responsibilities of Ministers. This constitution was violated by Mohamed Ali, and in Nov. 1908 abolished. Under pressure from the representatives of Great Britain and Russia, Mohamed Ali again granted a Constitution and signed a new Electoral Law in June 1909. By this law, under which the elections immediately after Mahomed Ali's abdication were conducted, the National Council, or **Mejliss,** consists of 120 deputies, 40 forming a quorum. The Mejliss was dissolved in Dec. 1911, and did not meet again until 1915.

By the **Anglo-Russian Convention,** which was signed on Aug. 31, 1907, both Governments engaged to respect the integrity and independence of Persia. Great Britain undertook to seek no political or commercial concessions north of a line connecting Kasr-i-Shirin, Ispahan, Yezd, and Khakh to the junction of the Persian, Russian, and Afghan frontiers. Russia gave a similar undertaking concerning the region south of a line from the Afghan frontier to Gazik Birjand, Kerman, and Bander Abbas. Both countries agreed to institute a control over the sources of revenue in the regions thus reserved to their influence in case of irregularities arising in the redemption or payment of interest on Persian loans. Persia became a party to this Convention in 1912.

As a condition of a loan advanced in March 1912 **the Persian Government** gave an undertaking on the following points: (1) Conformity with the principles of the Anglo-Russian Convention; (2) the dismissal from the army of the *fedais* and all irregulars as soon as the ex-Shah and Salared-Dowleh left Persia; (3) that there should be a discussion with the two Legations concerning the organisation of a small regular effective army; (4) an arrangement with the ex-Shah for his departure and pension, and an amnesty to his followers.

Under the Anglo-Russian régime the collection and disbursement of all revenues is supervised by a European **Treasurer-General,** but he left the country in 1914.

By the **Russo-German Convention** signed Aug. 19, 1911, the German Government undertook not to seek concessions for railways, roads, navigation, or telegraphs for itself, or support applications for such concessions on the part of German or other subjects, in Persian territory north of a line drawn from Kasri-Shirin on the western frontier of Persia to the Afghan border along the parallel of Gazik. Russia agreed to apply to the Persian Government for railway concessions, including a concession for a railway from Teheran to Khanikin, and when this concession was obtained the building of the line must be begun not later than two years after the completion of the Sadidje-Khanikin railway and concluded in four years. A Russian company obtained a concession in February 1913, for the construction of a railway from Julfa to Tabriz. Russia reserved to herself the right to decide upon the route to be followed by the line, while taking into account the wishes of Germany in this respect. Both Governments agreed to grant facilities for international traffic on the Khanikin-Teheran and Khanikin-Baghdad lines, and not to introduce such measures as transit dues and differential tariffs. The Russian Government bound itself not to hinder the completion of the Baghdad railway and the participation of foreign capital. The Russian Government reserved the right to transfer the construction of the Teheran-Khanikin line to any foreign financial group. Both Governments pledge themselves to grant to one another participation in privileges acquired in respect of this railway. There was in England a certain current of feeling against this line, inasmuch as it was considered that it was not likely to be constructed for purely commercial purposes, but that its motive, so far as Russia is concerned, was the connection with India, but circumstances have now entirely changed this.

The country is divided into 33 provinces under governors-general, generally called Hakim, who, with the Sheikhs-el-Islam, or chief judges of the cities, administer justice. The provinces are subdivided into districts, which are placed under lieut.-governors, and every town and village has its administrative officer. The chiefs of the **nomad tribes** exercise authority over them and collect the revenues from them. The nomads consist chiefly of Arabs, Turks, Kurds and Leks, and altogether number nearly 2,000,000. The priests have great power in the country. Many colleges exist for instruction in religion, which is of the Shia sect, and in Persian literature. In addition, there are about 180 schools of various denominations under European supervision with an aggregate of 10,000 pupils of both sexes. The **chief cities** are Teheran (pop. 280,000), Tabriz (200,000), Ispahan (80,000), Meshed (60,000), and Shiraz (50,000).

The Persian provinces of **Khorasan and Seistan** lie on the western border of Afghanistan. There being no railways in Persia, all goods have to be transported by mule or camel. A **direct trade route from Quetta to Seistan** has been opened up by the Indian Government, running along the Baluch side of the Afghan border, but the experiment has not been attended with any considerable success.

The **principal ports** are Bunder Abbas, Lingah, and Bushire, on the Persian Gulf, and Enzeli, Meshed-i-Sar, and Bender-i-Gez on the Caspian. The trade and shipping of the Persian Gulf ports are very largely in British hands. The **chief products** of the country are silk, cotton, fruits, gums, opium, carpets, tobacco, and petroleum.

Dried fruits are exported in large quantities as food for the Russian peasants, and Russian money is being used to stimulate the culture of cotton. Wool is exported to Bombay and Baghdad. There are considerable mineral deposits, but they are very little worked, except petroleum, of which Persia is now an important source of supply for the British Navy. The Anglo-Persian Oil Company (to the share capital of which the British Government subscribed £2,200,000) has a concession for 60 years, giving the exclusive right to work petroleum deposits throughout the Persian Empire, except in the provinces of Azerbadjan, Ghilan, Mazendaran, Astrabad, and Khorassan. Of the whole foreign trade, 59·0 per cent. is with Russia and 23·8 per cent. with the British Empire.

Revenue, 1913–14 . . . . . £2,712,000
Debt (about) 6,500,000

Head of Oriental Chancery, Abbas Kuli Khan, C.M.G. £300–450
Physician, Dr. Anthony Neligan . . £800

BRITISH CONSULAR OFFICERS

Teheran—Consul (vacant).
Vice-Consul, G. T. Havard.
Hamadan—Consul, W. McDouall.
Resht—Vice-Consul, C. de B. Maclaren (*acting*).
Arabistan (Mohammerah)—Consul (vacant).
Ahwaz—Vice-Consul, Capt. E. W. Noel.
Bushire—Consul-General and *Political Rreident*, Lt.-Col. Sir P. Cox, K.C.I.E., K.C.S.I.
Consul, Major A. P. Trevor, C.I.E.
Vice-Consul, H. G. Chick, C.I.E., and N. Worrall.
Bunder Abbas—Vice-Consul, Capt. H. V. Biscoe.
Lingah—Vice-Consul, W. R. Howson.
Ispahan—Consul-General, Lt.-Col. T. W. Haig, C.M.G.
Vice-Consul, F. K. Harris.
Vice-Consul, M. S. P. Aganoor.
Sultanabad—Vice-Consul, Ian Moir.
Yezd—Vice-Consul (acting), J. Meriton.
Kerman—Consul, Maj. D. L. R. Lorimer.
Bam—Vice-Consul (vacant).
Kermanshah—Consul, Col. R. L. Kennion.
Kasr-i-Shirin—Vice-Consul (vacant).
Khorassan—Consul-General and Agent to Govt. of India, Lt.-Col. W. G. Grey.
Vice-Consul, Capt. H. S. Thorburn.
Seistan and Kain—Consul, Maj. F. B. Prideaux, C.I.E.
Vice-Consul, Capt. Davis Heron.
Birjand—Vice-Consul (vacant).
Shiraz—Consul, Col. H. Gough.
Tabriz—Consul, H. S. Shipley, C.M.G.
Vice-Consul, Charles Stevens.
Maragha—Consular Agent, Dr. H. M. Vatarnian.

Mail transit: Teheran, 14 days.

PERU

President, Dr. Don José Pardo (1915–19).
President of the Council and Minister for Foreign Affairs, Señor E. de la R. Agüero.
War and Marine, Col. B. Puente.
Home Affairs, Señor Dr. L. J. Menendez.
Finance, Señor Aurelio G. Lastres.
Public Works, Dr. Belisario Sosa.
Justice, Señor V. Valera.

Minister in London, Señor Don E. de la Fuente (*Chargé d'Affaires*), 104 Victoria Street, London, S.W.
Attachés, S. Caballero, Carlos Gibson.

A republic on the W. coast of S. America, having an *area* of 722,461 sq. m. and a *pop.* of 4,620,201. The disastrous war with Chile, which broke out in 1879, and resulted in the cession to Chile of Tarapaca (absolutely) and of Arica and Tacna (provisionally), completely shattered the power of Peru. It was agreed that Arica and Tacna should be subject to Chile for ten years from 1884, that a plebiscite should then decide whether or no they should revert to Peru, and that the country to which the plebiscite awarded these provinces should pay to the other the sum of 10,000,000 Peruvian soles. The plebiscite has never taken place, partly because of revolutionary outbreaks in Peru; and now Chile has consolidated her position in the two provinces there. Relations between the two republics have been strained for some time, but are now much improved. A boundary dispute with Bolivia was settled in 1912.

The **Constitution** of 1856, revised in 1860, is modelled on that of the United States, the legislative power being vested in a **House of Representatives** (116) elected by the provinces, one member for every 30,000 inhabitants, and a **Senate** (52) elected by the 18 departments and the province of Callao. One-third of the members of both Houses retire, as decided by lot, every two years. **Executive** in the hand of a President elected for four years, who receives £4,800 a year.

The **Army** service is nominally obligatory between the ages of 20 and 50, but in practice this is voluntary enlistment, with the ballot for filling vacancies. Service: with the colours 2 years, reserve 7, and remaining time in second reserve (5 years) and National Guard. Peace strength about 8,000; war strength about 24,000, with an additional 100,000 or more untrained.

Article 4 of the Constitution prohibits the public exercise of any but the Roman Catholic religion, but an amendment granting entire religious liberty was passed in Oct. 1913 by both Chambers. It requires, however, the ratification of a second Congress. **Education** is nominally compulsory and free in the elementary schools, but is badly neglected. There were in 1914 27 State colleges, and 2,253 primary schools with 146,272 pupils. More than half the population are Indians, the rest including those of Spanish descent and mixed races. The cruel treatment of the primitive Indian tribes, in the region known as the **Putumayo**, on the Upper Amazon, by the native agents of a company having its headquarters in England, was the subject of an investigation by a British Government Commissioner, whose report, published in 1912 [Cd. 6266], occasioned profound indignation throughout the civilised world. In connection with the territory in which the atrocities occurred, both Colombia and Ecuador put forward claims to it, and it will be a matter of impossibility to establish a sound administrative system until the question of sovereignty has been decided.

The New HAZELL, 1917

There are vast stretches of rich agricultural and pastoral lands, besides profitable mining (gold, copper, silver, and coal) fields and immense forests. The climate is very good, and the country is admirably suited for European immigrants. The interior is now being opened up. There are about 1,656 miles of railways belonging to the State, but ceded to the bondholders in 1890 for a term of 66 years. **Chief products** are silver (value £1,131,150), copper (27,776 tons), gold, sugar, wool, cotton, rubber, coffee, and guano. In the comparative freedom from internal dissensions since 1899 a decided improvement in commercial, mining, and railway development has been noticeable. The production of coal has increased enormously (value £1,199,250). Important petroleum deposits have been discovered in the Negritos, La Brea, and Lobitos districts (output 219,000 metric tons in 1914-15).

CAPITAL, Lima (pop. 143,500); other chief towns are Arequipa (35,000), Cuzco (20,000), and Callao (31,000).

	1913	1914	1915
Revenue . .	£3,417,974	£2,921,498	£3,925,841
Expenditure .	3,554,377	3,015,464	2,894,087
Debt . . .	—	—	8,589,679
Imports . . .	6,088,777	4,827,930	—
Exports . .	9,137,781	8,767,790	—

PORTUGAL

President, Senhor Bernardino Machado (*b.* 1851, elected 1915).
Prime Minister and Colonies, Dr. Antonio J. Almeida.
Interior, Senhor Pereira Reis.
Justice, Senhor Mesquita de Carvalho.
War, Senhor Norton de Mattos.
Finance, Senhor Dr. Affonso Costa.
Marine, Commdr. V. H. Coutinho.
Foreign Affairs, Senhor A. Soares.
Public Works, Senhor A. M. de Silva.
Education, Prof. Joaquim Pedro Martins.

Minister in London, Senhor M. Teixeira Gomes, 12 Gloucester Place, W.
Councillor, Senhor Pedro de Tovar.
Secretary, Senhor João A. de Branchi.
Attaché, Senhor P. M. do Canto e Castro.
Naval Attaché, Lieut.-Commdr. J. M. de Carvalho.
Military Attaché, Capt. F. A. Ferreira de Simas.
Commercial Attaché, Senhor D. Cinatti.
Consul-General in London, D. Cinatti, 6 South Street, Finsbury, E.C.
Vice-Consul, Maj. V. C. Hurst, Anglo-Portuguese Chamber of Commerce, 34 Clement's Lane, Lombard Street, E.C.

A republic of western Europe, forming part of the Iberian Peninsula, having an *area* (including the Azores and Madeira, which are regarded as an integral part of the kingdom) of 35,490 sq. m. and a *pop.* of 5,687,627. Previous to 1910 the country was a monarchy, the last king being Manoel II (*b.* Nov. 15, 1889), who succeeded to the throne on the assassination of his father and elder brother on Feb. 1, 1908; he married Princess Augustina of Hohenzollern, Sept. 4, 1913.

Under the Constitution of 1911 there are two legislative chambers—a National Council and a Senate. The **National Council** (164 members) is elected by direct suffrage for three years. Any Portuguese may vote who is over 21 years of age and able to read and write, or who maintains parents or relatives. Soldiers on the active list, foreigners, naturalised Portuguese, bankrupts, and proscribed persons may not vote. Members of the National Council receive 17*s.* for each sitting. Magistrates, soldiers, priests, persons who have contracts with the State, directors of companies subsidised by the State, and various functionaries of the State departments, are disqualified from election. The Senate (71 members) is elected by the Municipal Councils. Half the members retire every three years. The two Chambers united constitute the Congress of the Republic. The President of the Republic is elected by both Chambers for a period of four years. He cannot be re-elected. He must be at least 35 years of age. He elects Ministers, but these are responsible to Parliament. He may not be present in the Chambers at debates. He receives an annual salary of £2,600, with £1,300 for allowances.

The Anglo-Portuguese Alliance

Portugal is the oldest and was until 1905 the only ally of Great Britain. According to the treaties of alliance, neither party will help another nation in attacking either of the contracting Powers, or give asylum to the enemies of the other, except to political fugitives or exiles. In case of war or invasion both Powers agree to assist each other with arms, men, and ammunition when required, and will also assist in the protection of each other's colonies by sending troops or warships. If either Spain or France were to attempt to make war against Portugal or her colonies, Great Britain is to intervene and endeavour to secure peace, failing which she will lend the assistance of her troops. The text of the treaties was published in 1898 as a Parliamentary paper [Cd. 9088]. The treaties, not being concluded for any specified term, are in their nature perpetual. They are, therefore, not, technically speaking, subject to renewal unless they have previously been terminated, for instance, by war between the parties. The treaties of alliance have from time to time been "confirmed," and such confirmation was last formally referred to in the preamble of the General Arbitration Agreement between Great Britain and Portugal of 1904 (Treaty Series No. 10 of that year).

The law of 1911 for the **separation of Church and State** declared that the Roman Catholic religion was no longer the religion of the State. The State appropriated all property belonging to churches and religious congregations, and thenceforth all Churches must be maintained by the offerings of their members. Their accounts, however, would be under the fiscal supervision of the State. To all priests in the enjoyment of a benefice on July 1, 1911, the Government ensured

the same stipends as they were then receiving, the amounts to be fixed by special commissions. The churches and other property necessary for religious worship were granted by the State to the clergy, free of all expense; and all religious property which was proved to belong to private individuals, either Portuguese or foreign, would be respected.

For the **administration of justice** there are courts of first instance in all the chief towns, appeal courts at Lisbon, Oporto, and Ponta Delgada in the Azores, and a Supreme Court at Lisbon. **Education,** though nominally compulsory, is in a very backward state. Three-fifths of the people are engaged in agriculture, and about one-fifth in industrial occupations. **Chief exports:** wine, cork, cattle, sardines, fruit, and copper. There are valuable minerals, but they are very little worked. There are 1,849 miles of railway, of which 711 belong to the State.

The Azores, a group of islands in the North Atlantic; *area*, 922 sq. m.; *pop.* 243,378. *Capital*, Ponta Delgada (pop. 16,179), on San Miguel Island; but the Governor usually resides at Angra (pop. 10,057), in the island of Terceira. They are governed as a province of Portugal. Principal export, pineapples (£12,241 worth in 1914).

	1913	1914	1915
Exports to U.K.	£56,135	£62,396	£75,499
Imports from (and of) U.K.	48,827	57,032	45,790

The Madeira Islands lie off the N.W. African coast, and are also governed as a province. *Area*, 314 sq. m.; *pop.* 168,374. *Capital* and port, Funchal, a fine town of 24,687 inhabitants (imports, 1914, £380,564; exports, £144,029).

	1913	1914	1915
Exports to U.K.	£31,900	£30,610	£43,392
Imports from (and of) U.K.	249,820	161,391	207,046

	1913–14	1914–15	1915–16
Revenue	£15,453,000	£11,391,570	£12,126,000
Expenditure	14,138,000	16,143,984	12,580,000
Debt	—	—	177,558,195

	1911	1912	1913
Imports	£18,218,000	£20,177,160	£20,140,020
Exports	11,406,000	12,113,460	10,205,000

	1913	1914	1915
Exports to U.K.	£3,017,101	£3,167,158	£3,980,092
Imports from (and of) U.K.	3,270,701	2,753,047	3,203,709

BRITISH LEGATION, Lisbon

Envoy Ex. and Minister Plen. Hon. Sir L. D. Carnegie, K.C.M.G., M.V.O. . £3,500
1st Secretary, Robert Greg.
2nd Secretary, W. Seeds.
Translator, H. C. G. Oakley.

BRITISH CONSULAR OFFICERS

Lisbon—Consul, P. A. Somers Cocks, C.M.G.
Vice-Consul, H. E. Jones.
Belem—V.-Consul, C. J. Ffrench Duff.
Setubal—V.-Consul, J. P. Fryxell.

Flores and Corvo—V.-Consul, J. Mackay.

Mail transit: Lisbon, 2 days 4 hours.

Colonies

Angola, or Portuguese S.W. Africa, is bounded on the north and east by the Congo State and Rhodesia, on the south by British South-West Africa, and on the west by the Atlantic Ocean. The boundary between Angola and the Barotse region of Rhodesia was settled in July 1905. Government vested in a Governor-General. Estimated *area*, 517,000 sq. m.; *pop.* estimated at 4,000,000 to 6,000,000. *Capital*, St. Paul de Loanda; pop. 17,541. Divided into 7 districts: Congo, Loanda, Benguella, Lunda, Huilla, Mossamedes, and Quanza. The greater part of the country is in the hands of the Bantus under their tribal chiefs. There are 1,081 kms. of railway in operation. A line runs from Loanda to Malange, 504 kms. A line from Lobito Bay to Katanga (where there are rich copper-mines) and the Tanganyika Co.'s concessions is being constructed; 1,293 kms. of this line will lie in Portuguese territory, and 520 kms. are now open to traffic. A line from Mossamedes to Lubango is under construction, 147 kms. of which are open to traffic. The **chief products** are coffee, rubber, sugar, oils, and ivory, and the trade is chiefly carried on by bartering with the natives. A company working in Mossamedes has a concession for mining, cattle-rearing, and fish-curing; and minerals, including gold, are known to exist. Several companies work sugar plantations, rubber has been planted in the Golungo Alto district, and experiments are being made with cotton and sisal agave (fibre).

Revenue and expenditure, 1913-14 (est.), £980,000

	1913	1914
Imports	£1,144,630	£869,078
Exports	1,119,013	724,540

	1913	1914	1915
Exports to U.K.	£171,421	£133,080	£239,893
Imports from (and of) U.K.	543,347	393,313	371,418

Mail transit: Loanda, 20 days.

BRITISH CONSULAR OFFICERS

Loanda—Consul-General, H. Hall Hall.
Vice-Consuls, F. E. Brinjes.
,, H. Carsells (also for S. Thomé).
Fernando Po—V.-Consul, G. H. Bullock.

Cape Verde Islands lie about 350 miles from Cape Verde, the westernmost point of Africa. The group consists of ten principal islands, viz. St. Antonio, St. Vincent, St. Nicolas, St. Lucia, Sal, Boavista, St. Jago, Mayo, Fogo, and Brava, and some islets, with an *area* of 1,480 sq. m. and a *pop.* of 144,000. *Capital*, Praya (in St. Jago). Coaling and Western Telegraph station, St. Vincent. **Chief products,** sugar-cane, coffee, maize, Purgueira seeds, and fruit. The people are Portuguese and Negro.

	1913	1914
Imports	£413,321	£336,205
Exports	68,152	48,993

BRITISH CONSULAR OFFICERS

St. Vincent—Consul, Capt. A. Trevelyan Taylor, R.N.
Vice-Consul, G. J. Smallcombe.
St. Jago—Vice-Consul, J. R. Da Silva.

Guinea lies on the west coast of Africa, and is surrounded on the land side by French possessions. It includes the Bissagos Islands, off the coast opposite the mouth of the Rio Grande, and the

island of Bolama. *Area*, about 25,000 sq. m.; *pop.* 1,000,000. *Capital*, Bolama. *Chief port*, Bissao. **Principal products**, ground nuts, palm oil, skins, rubber, and wax.

	1911	1912
Imports	£260,599	£281,016
Exports	225,302	248,615

British Consul-General, Capt. C. B. Wallis (resides at Dakar, Senegal).

St. Thomé and Principe Islands, in the Gulf of Guinea, are ruled by a Governor. They are very fertile, and yield cocoa, coffee, and cinchona. One-fifth of the world's supply of cocoa comes from these islands (export of cocoa, 1914, £1,193,933), and the plantations are cultivated by imported black labour, chiefly from Angola. *Area*, 454 sq. m.; *pop.* 42,103.

Portuguese East Africa comprises the two districts of Lourenço Marques and Mozambique, which are separated from one another by the Zambesi, and the other smaller districts of Zambesia, Inhambane, Gaza, and Tete. Its coast-line extends southwards from Cape Delgado, the southern extremity of the coast-line of German East Africa, to Kosi Bay, just below Delagoa Bay, at a point separating British from Portuguese territory, as fixed by the Anglo-Portuguese Agreement of 1891. It has an *area* of about 300,000 sq. m. and a *pop.* of about 3,000,000. The colony is administered by a **Governor-General** assisted by a Government **Council.** There is a military force of about 3,000 men. The Manica and Sofala region, where gold exists, is placed under the Mozambique Company, which has a charter. The Nyasa Company, which also has a charter, administers the region between the Rovuma, Lake Nyasa, and the Lurio. Other companies are working in various other parts of the country. The two principal railways of this region are the Delagoa Bay, which has a length of 57 miles in the colony, and runs on 290 miles to Pretoria; and the Beira Railway, which runs from the river Pungwé on the east coast, a point 12 miles from the mouth of the river, to New Umtali on the frontier, a distance of 203 miles, and is then continued by the Mashonaland Railway to Salisbury, the capital of Rhodesia, about 170 miles farther on. The Quilimane Railway is under construction from the port of Quilimane to Port Herald, almost parallel to the Zambesi, with a total length of 153 miles. The construction has been begun also of a railway from the coast of Mozambique to the frontier of British Nyasaland. The **chief ports** are Mozambique (pop. 4,802), Quilimane (pop. 2,744), Beira (pop. 7,814), Chinde (pop. 1,690), and Lourenço Marques (pop. 13,353). The **principal exports** are ores, sugar, rubber, ivory, and wax. **Imports** (exclusive of bullion), Chinde (1913), £209,001; Lourenço Marques (1914), £767,407; Beira (1913), £572,812; Mozambique, £202,845; Quilimane, £84,143. **Exports**, Chinde (1913), £46,610; Lourenço Marques (1914), £107,723; Beira (1913), £555,097; Mozambique, £75,275; Quilimane, £57,517.

BRITISH CONSULAR OFFICERS

Lourenço Marques—Consul-General, Errol Mac Donell.
Vice-Consul, A. T. Long.
Pro-Consul, H. C. McClelland.
Chinde—Vice-Consul, V. C. Mercier.
Porto Amelia—V.-Consul, E. C. Baker.

The Superintendents of the Eastern Telegraph Company at Beira, Quilimane, Porto Amelia and Mozambique also act as Vice-Consuls.

Mail transit: Lourenço Marques, 20 days.

Goa (Portuguese India) is situated on the west coast of India between the Madras and Bombay Presidencies. It has an *area* of 1,638 sq. m. and a *pop.* of 531,800. The *capital* and seat of government is Pangim (Nova Goa), situated to the north of Mormugao harbour, which latter is connected by rail with the British India railway systems. The principal exports are coco-nuts, fruit, spices and salt. The harbour of Mormugao has a frequent service of coasting steamers to Bombay and is well equipped with loading and unloading facilities. There are 5 berths at the quayside for dealing with ocean-going steamers which visit the port direct from European and other countries. There are 16 cranes on the quay for loading and unloading direct between steamers and railway wagons. The harbour accommodation is being extended to keep pace with the rapidly increasing trade.

	1913	1914	1915
Imports .	Rs. 8,076,825	8,412,882	—
Exports .	Rs. 2,858,776	2,675,109	—
Exports to U.K.	£273,704	£192,427	£7,07
Imports from (and of) U.K.	212,793	90,720	46,22

British Consul, J. G. R. Marsh, M.Inst.C.E. *(acting)*

Macao is an island at the mouth of the Canton River, in China, forming with small islands adjacent a Portuguese dependency. *Area*, sq. m.; *pop.* 64,000.

Timor is an island in the Malay Archipelago. The eastern portion of it, with the island of Pulo Cambing, is Portuguese. Chief products coffee and wax. The port is Dilly. *Area* 7,290 sq. m.; *pop.* 300,000.

RUMANIA

King, Ferdinand I, a son of Prince Leopold of Hohenzollern-Sigmaringen and a nephew of the late King, *b.* Aug. 24, 1865. He succeeded to the throne on the death of his uncle, Oct. 10, 1914. He married, Jan. 10, 1893, Princess Marie of Saxe-Coburg and Gotha (she was *b.* Oct. 29, 1875), and has *issue*: Carol, Crown Prince (*b.* Oct. 15, 1893); Elisabeth (*b.* Oct. 17, 1894); Marie (*b.* Jan. 8, 1900); Nicolas (*b.* Aug. 18, 1903); and Ileana (*b.* Jan. 5, 1909).

Premier, M. Ion I. C. Bratianu.
Foreign Affairs, M. Em-Porumbaru.
Finance, M. E. Costinesco.
War, M. Vintala Bratianu.
Justice, M. V. Antonesco.
Industry, M. A. Radovici.
Interior, M. V. Mortzun.
Agriculture, M. A. Constantinesco.
Education, M. G. Duca.
Public Works, Dr. Anghelesco.

The New HAZELL, 1917

Minister in London, M. Nicolas Mishu, 4 Cromwell Place, S.W.
1st Secretaries, M. Michel B. Boeresco, Prince A. Bibesco.
3rd Secretary, M. Costiesco-Ghyka.
Chancellor, M. Marca Beza.
Commercial Agent, M. G. Boncesco.
Consul-General in London, Lt.-Col. Sir A. K. Rollitt, LL.D., 3 Mincing Lane, E.C.

A State of south-east Europe, comprising Moldavia and Wallachia, formerly autonomous provinces of the Ottoman empire, which, with Dobrudja, have since Dec. 23, 1861, formed an independent kingdom; the *area* is 53,689 sq. m. with a *pop.* of 7,516,418. The executive power is vested in the King, with a Cabinet of eight and the Prime Minister. The legislature is composed of a **Senate** of 120 members, indirectly elected for eight years by two colleges representing the propertied electors, and a **Chamber** of 183 members elected for four years by three electoral colleges or classes of voters. These three colleges consist of (1) electors possessed of property insuring an annual income of not less than £50; (2) those paying direct taxes of not less than 20 francs annually, or following a profession; and (3) all Rumanian subjects of full age, most of whom vote indirectly by choosing delegates who vote with the direct electors of the other colleges. The members of both houses are paid 20 francs a day while Parliament sits. The King has a veto on all measures passed by the two chambers.

For **local government** purposes the country is divided into 32 districts, each under a prefect, a receiver of taxes, and a civil tribunal. **Education** is free and compulsory, but still in a backward condition. The prevailing **religion** is that of the Orthodox Greek Church. By the Berlin Treaty of 1878 it was provided that there should be no discrimination against any resident of Rumania on account of religious belief, but the Jews have been harshly treated. Many Rumanians are to be found in neighbouring countries, particularly in Hungary and Transylvania, where they have given some trouble.

Cereals, wines, and timber are the **chief products**, the large majority of the population being engaged in agricultural pursuits. Over 40% of the agricultural land is in small holdings of 25 acres or less held by 1,015,302 peasant proprietors. The crops of 1915 produced 86,472,803 bush. of wheat, 28,156,007 bush. of oats, and 27,851,818 bush. of barley. A Land Bank has been formed by the Government to afford peasants the means of buying or leasing land, and to act as a bank for peasant farmers and Co-operative Societies. Minerals are said to abound, but only coal and petroleum (total exports, 1914, 654,024 metric tons, of which the U.K. took 77,971 tons) are worked. The latter is the country's chief industry, and nearly £19,000,000 of capital, mostly foreign, is invested in it; the output in 1915 was approximately 1,673,145 tons. There are very large and valuable State forests, and salt-mining is a State monopoly. There are 2,333 miles of railways, of which the State owns 2,100 The CAPITAL is Bucharest (pop. 338,109); other towns are Jassy (pop. 75,882), Galatz (pop. 71.719). Braila (pop. 64,730), Ploësti (pop. 56,594), and Craiova (pop. 51,973).

Revenue and expenditure, 1914-15 and 1915-16, £24,009,310.

	1911	1912	1913
Imports	£22,789,801	£25,516,220	£23,600,504

War, Gen. Shuvaieff.
Marine, Admiral Grigorovitch.
Justice, (vacant).
General Control, M. Pocrowsky.
Imperial Household, Count Freedericks, G.C.V.O.

President of the Council of the Empire, M. Koulomzen.
President of the Duma, M. Rodzianko.
Procurator of the Holy Synod, M. Nicolas Raieff.

Ambassador in London, Count A. de Benckendorff, G.C.V.O., Chesham House, Chesham Place, S.W.
Councillor, C. Nabokoff.
1st Secretary, E. Sabline.
2nd Secretaries, G. Wolkoff, L. Zarine.
Acting 2nd Secs., Baron C. Wrangel, T. Gruenman.
Attaché, G. de Ciechanowiecki.
Naval Attaché, Rear-Adm. N. Wolkoff, C.B., A.D.C.
Military Attaché, Gen. N. Yermoloff, K.C.B., K.C.V.O.
Commercial Attachés, M. Routkowsky, C.B., M. Ostrogadsky.
Consul-General in London, Baron A. Heyking, 30 Bedford Square, W.C.
Vice-Consul, E. Gambs.
Official Sec. A. Klapiers de Colongue.
Swedish-Finnish Translator, Capt. L. Norrgren.

An empire stretching over a vast territory in East Europe and North Asia, with a European *area* of 1,996,743 sq. m., or, with the Asiatic pos-

sessions, a *total area* of 8,647,657 sq. m. or something like one-sixth of the land surface of the globe. The total *pop.* in 1916 was estimated at 182,182,600, and it increases at the rate of about 2,500,000 per annum. The fifty governments of **European Russia,** excluding Poland and Finland, contain 125,683,800 people, the Vistula Province (Poland) 11,960,500, and Finland 3,196,700. The governments and provinces in **Asiatic Russia** contain 33,258,600 people, including the Caucasus 12,512,800, Siberia 9,788,400, and Central Asian possessions 10,957,400. The Slavs, including the Poles, constitute about 63% of the population, Turco-Tartars about 10%, Finns about 2%, and Jews about 3%; the rest of the population being made up of Lithuanians, Germans, Armenians, and a variety of Asiatic peoples.

The **Government** is an autocracy, the Tsar being the supreme ruler and legislator, and the only source of power in the body politic. This still appears to be true, although on Aug. 19, 1905, **the Tsar issued a Manifesto** announcing the formation of a representative body called the **Duma** "to take a constant and active part in the elaboration of laws"; and on Oct. 30, 1905, **signed a Constitution,** granting to the population the immutable foundations of civic liberty, based on real inviolability of the person, and freedom of conscience, speech, assembly, and association; calling to participation in the Duma those classes of the population who were completely deprived of electoral rights, leaving the ultimate development of the principle of the electoral right in general to the newly established legislative order of things; and establishing it as an immutable rule that no law should come into force without the approval of the State Duma, and that it should be possible for the elected of the people to exercise a real participation in the supervision of the legality of the acts of the authorities appointed by the Emperor.

On March 6, 1906, an Imperial Manifesto, together with Imperial Ukases, announced the **reorganisation of the Council of the Empire** as a Second Chamber, with an equal number of elected members and members nominated by the Tsar. The elected members are chosen, 1 each by the Zemstvos, 6 by the Synod, 6 by the representatives of the Academy of Sciences and the Universities, 12 by the representatives of the bourses of commerce and industry, 18 by the representatives of the nobility, and 6 by the representatives of the landed proprietors of Poland. In provinces where no Zemstvo exists, congresses of representatives of the landed proprietors elects one member for each province. They are elected for 9 years, a third retiring every 3 years; they must be over 40, and have a degree; and they receive £2.10.0 a day during the session. The President and Vice-President are appointed by the Tsar.

The members of **the Duma** (reduced in number from 524, the original figure, to 442 by the Manifesto of June 16, 1907) are elected for five years. The mode of election is indirect, and was altered in 1907. Delegates are chosen by the district or town elective assemblies, and these delegates in turn elect the Deputies. The total number of Deputies is made up as follows: European Russia, 403; Poland, 14; Caucasus, 10; Asiatic Russia, 15. The Duma elects its President and Vice-President annually. Members receive £1.1.0 a day and travelling expenses. The first Duma sat from May 10 to July 22, 1906; the second from March 5 to June 16, 1907; the third from Nov. 1, 1907, to June 21, 1912; the fourth was elected in Sept. 1912. The **competence of the Duma** extends to all questions relating to new laws and the modification, etc., of existing laws, to the departmental, Ministerial and National Budgets, to the construction of railways by the State, and to matters submitted to it by Imperial Decree. It is provided, however, that "the fundamental laws of the Imperial Administration" shall not be touched. The Council and the Duma have equal legislative powers and can both initiate measures. All measures must be passed by both bodies before being submitted for the Imperial sanction, and bills rejected by one of the legislative bodies cannot be brought forward again without the Imperial consent.

The **Ruling Senate,** which was established in 1711, is a partly deliberative and partly executive body, and promulgates all laws, superintends courts of law, and is the high court of justice for the empire. The **Holy Synod,** which is composed of the Metropolitan Bishops of Petrograd, Moscow, and Kieff, the Archbishop of the Caucasus and other bishops, superintends religious matters, the President being the Metropolitan of Petrograd. The **Council of Ministers,** which was reorganised by a decree issued Nov. 1, 1905, consists of all the Ministers and heads of the administration.

For purposes of **local government** the empire is divided into 78 **Governments** (50 in European Russia, 9 in Poland, 8 in Finland, 7 in the Caucasus, and 4 in Siberia), each under a Civil Governor with a Council; and 19 **Provinces** (1 in European Russia, 5 in the Caucasus, 9 in Central Asia, 4 in Siberia), each under a Military Governor. The island of Saghalien is under a Military Governor. Some of the Governments are united into General Governments, and in Siberia the Governors-General are assisted by deliberative Councils. The Governments are divided into **districts,** with their own administrative institutions, and special Governors are placed over the large towns. In European Russia the country is divided into **communes,** groups of which are united to form **cantons.** Communal and cantonal affairs are decided by communal and cantonal assemblies. The administration of the districts is to some extent, and in some governments (though great extensions of the system were ordained in 1905), entrusted to elective district and provincial assemblies, called **Zemstvos,** in which the land-owning nobles have great power. These assemblies were founded in 1864 by Alexander II, and are of two kinds, the smaller being elected to deal with the affairs of a single district, while the larger are elected by the Zemstvos of all the districts in a Province or Government, and form Provincial Zemstvos to deal with the affairs common to the districts in that Government. **District Zemstvos** are indirectly elected, and consist of from 60 to 65 persons, about half being nobles, and the remainder chiefly peasants, including 3 or 4 representative merchants from the towns. The Zemstvo sits once a year for about 15 days, and has a standing committee of paid officials appointed for 3 years. **Provincial Zemstvos** consist chiefly of noblemen or members of the aristocracy. The Governor of the Province has a veto on all resolutions of both bodies. The rate levied must not exceed 3% of the annual value of the real property in the district. There are also elective administrative bodies in most towns and cities.

The **State religion** is Græco-Russian, called the Orthodox Catholic Faith. The Emperor is the head of the Church, but the Holy Synod is the board of government, and the Procurator has very large powers. The Orthodox number over 87,000,000; Dissenters about 2,200,000, Roman

Catholics 11,500,000, Protestants and other Christians 5,030,000, Jews 5,200,000, Mahommedans 13,900,000. All religions are professedly tolerated, but the Jews labour under certain disabilities, and some other dissenters have at times suffered repression. In 1905 a decree conceding liberty of worship was issued, and in 1906 a Ukase removed all restrictions on the sect called Old Believers, which numbers 11,000,000 adherents.

In **educational matters** Russia is perhaps the most backward country in Europe; about 79% of the inhabitants are illiterate. There were in 1911, 100,295 elementary schools, with 6,180,510 pupils. There are also secondary, technical, and special schools, and about 40,000 students in the 10 Universities. An Elementary Education Act was passed in 1912. The **administration of justice**, though nominally reformed in 1864, is still much in need of reform and reorganisation.

The great majority of the population are engaged **in agriculture.** Grain, eggs, butter, and other agricultural products, timber, mineral oils, flax, linseed, and hemp are among the **chief products** of the country. There are immense forest areas, the State owning 950,500,000 acres, and timber is largely exported. Coal, iron, gold, asbestos, and other minerals exist in large quantities, and the **mining industry** is increasing. 90% of the world's platinum is produced from the Urals (output, 1913, 158,084 oz.). There is a very large petroleum industry in the Baku and other districts. The manufacturing industries, which are concerned chiefly with textiles and metals, have recently been in a depressed and stagnant condition. The **railways** of the Empire have a total length of 47,479 miles, of which 33,928 miles belong to the State. The figures do not include Finland (2,226 miles) or the Eastern China Railway (1,079 miles). An important line is almost completed, designed to give Russia access to an ice-free port in the Arctic Ocean. It will run from Petrograd by the shores of Lake Ladoga to Petrozavodsk, through Saroka, Kem, and Kandalaksha to Kola, and thence to a port to be constructed on the Murman coast, on Motovsk Gulf. There will also be connection between Archangel and Kola *via* Plesetzkaia. There are in European Russia, exclusive of Finland, 77,721 miles of navigable rivers, canals, and lakes, and 73,848 miles in Asiatic Russia. By an Imperial Ukase, issued Nov. 26, 1897, the **currency** was established on a gold basis, and the relative value of silver and paper roubles in gold was permanently fixed.

The prohibition of the sale of State vodka has worked a revolution in the life of the people. In 1915 only 8,748,000 gall. of vodka were sold, as against 146,791,000 in 1914. The revenue from the sale of liquor accordingly diminished by £44,000,000 as compared with the year before. On the other hand, the influx of cash deposits in the State savings banks reached the record figure of £55,600,000 in 1915, whereas, in the previous year, when the crops were particularly abundant, the total deposits were only £9,600,000. The total amount of cash deposits in the State savings banks on Dec. 14, 1915, was £239,100,000, and in paper deposits £55,800,000.

CAPITAL: Petrograd (which name replaced that of St. Petersburg by Imperial Ukase, Sept. 1, 1914) (pop. 2,018,596); other large towns are Moscow (1,617,157), Warsaw (872,478), Odessa (620,155), Kiev (506,060), Lodz (450,000), Baku (379,886), Riga (370,000), Tiflis (344,629), Tashkent (271,650), Kharkov (248,281), Ekaterinoslav (217,848), and Saratov (217,418).

	1913	1914	1915
Revenue	£318,000,000	£355,826,149	£319,114,000
Exp'd're	318,000,000	355,826,149	364,656,000
Imports	129,150,687	98,826,000	—
Exports	150,355,026	91,421,000	—
Debt	—	—	*1,679,499,987

Exports to U.K., 1913, £40,270,539:

Butter	£3,831,366	Hides, raw	£579,910
Corn and grain	5,395,774	Oil and petroleum	1,059,166
Eggs	4,745,229	Paper and materials	724,362

Provinces and Dependencies

Bokhara is a feudatory Central Asian State attached to Turkestan, and lying between it and Afghanistan. It has an *area* of 80,000 sq. m. and a *pop.* of 1,250,000, and is the most populous khanate of Turkestan, while Bokhara (75,000) is the principal trade centre of the region. It was conquered in 1868. **Chief towns,** Bokhara 75,000; Karshi, 25,000. The **Ameer,** Sayid Mir Alim Khan (*b.* Jan. 3, 1880), is allowed to maintain an army of 11,000 troops for administrative purposes, and these are drilled by Russian instructors. The **products** of the country are fruit, tobacco, cotton, corn, silk, and hemp, and the trade is almost entirely in the hands of the Russians. There is a considerable trade with Afghanistan.

The **Grand Duchy of Finland** was ceded to Russia in 1809. It has an *area* of 144,255 sq. m. and a *pop.* of 3,154,825. The Tsar has been the Grand Duke since the treaty of Fredrikshavn, 1809. By various decrees from 1899 to 1903 the powers of local self-government which Finland possessed under its old constitution were taken away. In 1905 the Tsar restored the independence of the Finnish army, re-established the irremovability of the judges, and granted the demand of the people for the restoration of its legislative independence. A Diet or National Assembly was established, and the responsibility of the Secretary of State to the Diet was admitted. In 1908, however, the Tsar gave his sanction to a protocol of the Russian Council of Ministers which gave that body wide powers of control over Finnish legislation, and which was drawn up without the co-operation of the Finnish authorities. Embittered controversies followed, the Imperial Government demanding that Bills affecting Imperial interests should be submitted to the joint preliminary examination of the Secretary of State for Finland and the Council of Ministers. An Imperial Rescript, issued in Oct. 1909, decreed that legislation concerning military service in Finland should be withdrawn from the competence of the Finnish Diet and transferred to that of the Imperial Legislature. In the meantime Finland was to pay to the Imperial Exchequer an annual contribution of £400,000, which by a Bill passed in November 1911 was increased to double that amount.

The 200 members of the National Assembly are elected by universal suffrage for three years. Every Finnish citizen, male or female, aged 24, can vote, and is eligible for election. At the first election, in 1907, 22 women were returned as members of the Diet. At the 1911 election the number of women elected was 19. Members are paid £56 for the session.

The bulk of the population are Lutherans. Education is well looked after. The school age is from 7 to 18. There is a University at Helsingfors. The percentage of pauperism is 2·83. The **chief products** are timber, farm produce, etc. The Crown Forests cover 12,615,841 hectars. There is a large class of small peasant proprietors. The State railways have a total length of 3,558 kms., of which 200 kms. are double track; private railways 319 kms. CAPITAL, Helsingfors (pop. including Sveaborg, which is variable on account of military movements, 161,091); Abo, 52,057.

	1913
Revenue	£6,796,000
Expenditure	5,950,000
Imports	19,813,600
Exports	16,142,000

Helsingfors—British Consul, V. Kestell-Cornish (temporarily at Brest, France; H. Montgomery Grove, *acting*).
Vice-Consul, S. W. Wancke.

Khiva.—A state in Central Asia lying to the south of the Sea of Aral, and bounded on the east by the Oxus and on the south and west by Transcaspia; it has an *area* of 22,320 sq. m. and a *pop.* of 800,000. It has been subject to Russia for about two hundred years, but in 1872 it became definitely a Russian vassal state. The reigning Khan is Seyd Asfendiar, who succeeded in 1910. The inhabitants are Mahommedan Sunnis. The chief products are silk and cotton.

Poland includes ten provinces, with a total area of 49,159 sq. m. and a pop. in 1911 of 12,467,300. The population increases very rapidly, and of the above total about 14½% are Jews and about 5% Germans. The country had a separate constitution 1815-30, and a separate government 1830-64; but in the latter year it was deprived of its administrative independence, and in 1868 it was incorporated as an integral part of Russia, trial by jury was abolished, and the official use of the Polish language was prohibited. The majority of the inhabitants are Roman Catholics. There are two main parties, one the Nationalist party and the other the Socialist party. The National Democrats, who advocate a policy of autonomy, secured a large majority of the seats in the elections for the Duma in 1906. An **electoral law** introducing changes greatly to the advantage of the Russian element in Poland and to the detriment of the Poles was passed by the Duma

in 1909, but on the outbreak of the European War the Tsar announced his intention of conferring Home Rule on Poland. The country has been in the possession of the Germans since 1915, and in November 1916 they announced their intention of erecting a separate kingdom in Poland, but the scheme they outlined was absurd in its reservations. About 76% of the population live in the rural districts, and the peasants own about 49% of the land; but of the total rural population of 7,000,000, about 3,000,000 own no land, and are dependent on hiring themselves out as labourers. Russian Poland is one of the largest pig-producing countries in Europe. Industrial development is proceeding rapidly. CAPITAL, Warsaw; pop. 872,478.

Siberia is a Russian province, larger than Europe, which is only separated from the rest of the empire by the low-lying Ural Hills, a slender barrier which has now been broken down by the extension of the Russian railway system into Siberia, and by incorporating the West Siberian governments with the European Russian administrative system. It has an *area* of 4,833,496 sq. m. and a *pop.* of 8,719,200. The Zemstvo system was extended to the province in April 1905. A uniform system of public justice was instituted in July 1897 by order of the Tsar, in place of the existing arbitrary administration of autocratic officials. Trial by jury was not conceded, but justices of the peace are appointed by the Crown, and they also act as *juges d'instruction.* The higher tribunals consist of eight circuit Courts in the towns of Tomsk, Tobolsk, Chita, Krasnoyarsk, Irkutsk, Yakutsk, Blagovestchensk, and Vladivostok, and a Court of Appeal or Palace of Justice above these at the CAPITAL Irkutsk (pop. 108,060). Other towns are Tomsk, 112,083, Vladivostok, 91,464. **Valuable goldfields** have been discovered in the Government of Yeniseisk, and in the basins of the Obi, Lena, and Amur rivers, 50,000 men being employed in mining. Of recent years thousands of Russian peasants have settled here to carry on agriculture, and nearly all the fertile soil free of forest and outside the steppes has been occupied. **A sea route** through the Kara Sea to Siberia has been opened up, chiefly by English enterprise.

The **railway connection between Russia and Siberia** forms the greatest railway undertaking in the world. The first sod was cut at Vladivostok on May 24, 1891, and on Dec. 28, 1899, the last rails were laid on **the Trans-Baikal section,** thus establishing steam and boat communication between Western Europe and the Pacific coast. The Trans-Siberian line divides into two branches at Stretensk—one going south to Port Arthur and Peking and the other eastward to Vladivostok; another branch is being constructed along the course of the River Amur to connect also with Vladivostok. The **total distance** from Petrograd **to Vladivostok** is 6,521 miles, and to Port Arthur (Dalny) 5,913 miles. The construction of a **Southern Siberian Railway** was approved by the Council of Ministers in 1911. The cost is estimated at £15,000,000. The line is to run along the line of the Urals, Orenburg, Akmolinsk, and Semipalatinsk.

Transcaspia is a Russian province in Central Asia, including the Turkoman region between the Caspian and the Oxus. *Area,* 214,237 sq. m.; *pop.* 451,300. The **administrative centre** is Askabad. In this province is **Merv,** an oasis situated almost midway between Meshed and Bokhara, and Herat and Khiva. It has an area of 1,600 sq. m. and a pop. of 250,000 Turcomans. There is no town of Merv—the thickly packed prosperous settlements spread over the oasis constituting what is recognised under that name. About 10,000 Russian troops are maintained in the oasis, which is distant 200 miles from Herat.

Turkestan is another province in Central Asia. It comprises the khanates and deserts annexed by Generals Tchernaieff and Kaufmann between 1860 and 1875, and now known as the provinces of Samarcand, Ferghana, and Syr-Daria. *Area* about 400,000 sq. m., with a *pop.* of 6,336,800. The principal towns are Tashkent, pop. 271,650; Kokand, pop. 113,700; and Omsk, pop. 129,422.

SALVADOR

President, Carlos Melendez (1915-19).

Chargé d'Affaires in Great Britain, Dr. Arturo R. Avila, 7 Union Court, Old Broad Street, E.C.

Salvador became an independent republic of Central America on the dissolution of the Central American Federation (which included Costa Rica, Guatemala, Honduras, Nicaragua, and Salvador) in 1839. It is bounded on the south by the Pacific, on the north by Guatemala and Honduras, on the west by Guatemala, and on the east by Honduras; its *area* is 7,225 sq. m., with a *pop.* of 1,254,000, of whom about 85% are of mixed race and 15% Indians. It is governed by a **President** and a **Congress** of forty-two Deputies, elected respectively for four years and one year, by universal suffrage. Education is free and obligatory. The army numbers about 10,000 men, on a war footing, the training being entrusted to Spanish and Chilian officers, but there is a militia of about 25,000. The bulk of the population is engaged in agricultural pursuits. The chief **products** are coffee, indigo, balsam, sugar, rubber, and tobacco. Cotton-growing now receives State encouragement, and cocoa is being extensively planted. There is some mining done also, chiefly gold mining. Trade is carried on chiefly with the United States, the United Kingdom, France, and Germany. In December 1907 the Central American States agreed to maintain the neutrality of Honduras, and to establish a High Court in Costa Rica for the settlement of disputes.

CAPITAL, San Salvador; pop. 66,000.

SAN MARINO

San Marino is an independent republic in the north-east of and under the protection of Italy, 9½ m. from Rimini, on the Adriatic, with an *area* of 33 sq. m. and a *pop.* of 11,000. It is surrounded by Italian territory, and governed by a Great Council of 60 members (20 nobles, 20 townsmen, and 20 peasants), two of whom are appointed every six months to act as Regents. It consists of the CAPITAL (San Marino), 1,500 inhabitants, and four villages. It was founded in the 5th century by a pious mason from Dalmatia, who became a monk; and its independence was respected both by Napoleon and by Garibaldi, who found asylum there when escaping from the Austrian troops in 1849. The form of government has little changed during the last thousand years. **Exports,** wine, cattle, and stone.

Consul-General in London, Commendatore Arthur Serena, J.P., F.R.G.S., 34 Leadenhall St., E.C.
British Consul, M. Carmichael, residing at Leghorn.

SERBIA

King, Peter Karageorgevitch I, who succeeded Alexander I on the murder of the latter, June 11, 1903, was *b.* in 1844, and is a grandson of George Czerny, surnamed Karageorge or Black George, who was the first chief of the Serbian insurrection against the Turks in the beginning of the last century. He was joined by Milosch, who added to his name that of his mother, Obrens. These two chiefs founded the rival families of Karageorgevitch and Obrenovitch. On the assassination of Alexander I, together with his consort, Queen Draga, the present King was invited to the throne. King Peter married in 1883 a daughter of the Prince of Montenegro, Princess Zorka, who died in 1890. He has two sons (Prince George, *b.* 1887, Prince Alexander, G.C.B., *b.* 1888), a daughter (Princess Hélène, *b.* 1884), and a brother, Prince Arsenius. In 1909 Prince George voluntarily renounced his rights to the succession, and his brother Prince Alexander was recognised as heir to the throne.

Minister in London, M. Yovan M. Yovanovitch, 195 Queen's Gate, S.W.
1st Secretary, V. Antonievitch.
2nd Secretary, Dr. Georges Todorovitch.
3rd Secretary, Dr. Pavlé Karovitch.

An inland kingdom of south-eastern Europe, situated in the north of the Balkan Peninsula, with an *area* of 33,891 sq. m. and a *pop.* before the war of 4,547,992.

The independence of Serbia, which was formerly an autonomous province of Turkey, was established by the Treaty of Berlin, 1878. The constitution, voted by the National Assembly of 1889, was abrogated by the King in May 1894, and an older constitution of 1869 temporarily revived; but in 1903 the 1889 constitution was restored. The executive is vested in the King and his ministers, and the legislative authority in the King in conjunction with the National Assembly or Narodna-Skuptchina and a State Council. The former consists of 166 deputies elected by universal suffrage for 4 years; the latter of 16 members, 8 nominated by the King and 8 elected by the Assembly.

For local purposes the country is divided into departments and these into communes.

State religion is Greek Orthodox, but others are tolerated. **Education** is backward, but progressing. It is compulsory and free. Agriculture is practically the only industry, and almost every peasant cultivates his own freehold, varying from 10 to 30 acres. The chief source of wealth for the peasants is live stock, and particularly swine. Pauperism is practically unknown. There are Government monopolies of tobacco, salt, and petroleum, which contribute largely to the revenue, together with the State railways. The expenditure is mainly on the service of the National Debt, the army and education. The **chief exports** are agricultural produce, animals and animal produce, and minerals. The **chief imports** are railway material, cotton, yarns and tissues, wool, metals, hides and leather, and machinery. There are 974 miles of railways. CAPITAL, Belgrade (pop. 90,890), but during the war the Government resided at Nish (pop. 24,949), until compelled to leave on the combined attacks of the Germans and Bulgarians. The final overrunning of the country by the enemy was completed in December 1915. The Serbian government is now established at Corfu. Other towns are Monastir (pop. 59,856), Uskub (pop. 47,384).

1st Secretary, Phra Sanpakitch.
Secretary Interpreter, Lewis O. Bateman.
Attachés, Nai Tiem, Nai Sirm Bunnäg.
Military Attaché, Maj. Prince Amoradhat.
Legation, 23 Ashburn Place, South Kensington, S.W.
Consul-General, Sir John Anderson, 5 Whittington Avenue, London, E.C.

Siam is a kingdom embracing part of the Indo-Chinese and part of the Malay peninsula. Its territories have dwindled very much in recent years. It has now an area of about 195,000 sq. m. and a *pop.* of 8,149,847, including about 500,000 Chinese.

The royal dignity is nominally hereditary, but each sovereign appoints his own successor. The **executive power** is exercised by the King in conjunction with a Council of Ministers, most of whom are relatives of the King. The **Legislative Council** consists of 40 members, including the Ministers, certain members appointed by the King, and 14 princes of the royal house. There are 16 provinces, each administered by a Commissioner appointed by the King, and some of the tributary districts are administered by their own chiefs. There is also the metropolitan province of Bangkok, which

The New HAZELL, 1917

is under the control of the Minister of Local Government.

Buddhism is the State **religion.** Western ideas of civilisation are spreading rapidly, and many Siamese youths are sent to Europe for their education. A limited number of "King's Scholars," selected by competitive examination, are sent to England each year at the King's expense.

Treaties with France and Britain

A **treaty with France,** signed at Paris Feb. 13, 1904, and ratified Dec. 7, 1904, defined the frontier between Siam and Cambodia, and provided for its delimitation, transferring to French government an area of about 8,000 sq. m., while, by clause 4 of the Treaty, the Siamese Government abandoned all sovereign rights over the Luang-Prabang territory, on the west side of the Mekong. France agreed to evacuate Chantaboon, but the harbour of Krat, on the Gulf of Siam, was ceded to France.

By the **treaty of March 23, 1907,** Siam ceded to France Battambang, Siem Reap, and Sisophon, provinces adjacent to Cambodia, with an area of about 7,800 sq. m. and a pop. of about 200,000. France restored to Siam the port of Krat and the region of Dansai in the Laos country. A number of territories on the right bank of the Mekong were leased to the Government of Indo-China for a period of 50 years on a nominal rent.

By the **Anglo-French Agreement** (April 18, 1904) the territories situated to the west of the basin of the River Menam and of the Gulf of Siam were recognised as being in the British sphere, and the territories situated to the east of the same region as being in the French sphere.

By the **Anglo-Siamese Treaty** (March 10, 1909) Siam ceded to Great Britain her rights over the States of **Kelantan, Kedah, Trengganu, Perlis,** and adjacent islands. She also granted to British subjects through Siam the rights and privileges enjoyed by the natives of the country, notably the right of property and the right of residence and travel. In return for these concessions Great Britain agreed to the extension, under certain conditions, of the jurisdiction of the **Siamese International Courts** to all British subjects in Siam registered at the British Consulates before March 10, 1909, and to the transfer of the jurisdiction of those courts to the ordinary Siamese Courts after the promulgation and the coming into force of the Siamese Codes.

The country is one rich in natural resources, the development of which has been retarded by the paucity of the population and the lack of capital. The increases in revenue, imports and exports show, however, how the economic development of the country is progressing, and this progress is being increased by the abolition of forced labour. Siam has still, however, the reputation of being the country in which the cost of labour is higher than anywhere else in the East. In the mines and the mills of southern Siam Chinese do the bulk of the work, while in the forests of the north, Burmese, Karens, and Khamus provide the labour force. Foreign trade centres in Bangkok, and is almost wholly in the hands of foreigners. A comprehensive scheme of **education** has now been adopted and is partly in operation; next year should see the establishment of the University of Bangkok. The question of irrigation on the rice-growing plains of central Siam has received the attention of the Government, who engaged experts to draw up a report thereon and prepare schemes therefor. An Irrigation Department has been formed and is preparing the way for the work which will be undertaken on a grand scale when the necessary funds become available. On Jan. 1, 1916, there were 1,145 miles of State and private railways open to traffic, made up as follows: (1) Northern Line, 545 miles; (2) Southern Line, 535 miles; (3) private lines, 65 miles.

The Northern Line is a normal gauge State Railway System, comprising the line from Bangkok to Korat (with a branch line running north which has now reached Nakawn Lampang) and a line from Bangkok to Patriew. The Southern Line is likewise a State railway, but of metre gauge, and runs from Bangkok via Petchaburi Koh Lak and Bandon to Tungsawng, where the line bifurcates, the western branch continuing on to the terminus at Trang and the Eastern to Ootapao in the direction of the Kelantan boundary. Connection between Bangkok and Patani river (70 miles from the Kelantan frontier) via Ootapao should be possible in January 1917, and between Bangkok and Penang via Ootapao and Kedah in December 1916. The line is open to traffic between Trang Nakon and Singora. Private lines include those (worked by companies) from Bangkok to Paknam at the mouth of the Menam, and from Bangkok to Tachin and Meklong on the coast to the west of the Menam, together with a tramway connecting the Northern Line (Northern branch) with Phrabat. Bangkok has a well-equipped system of street electric tramways, and is lit by electricity.

Chief exports, rice, teak-wood, and hides.

CAPITAL, Bangkok, pop. about 630,000, situated on the delta of the River Menam, the great natural and economic centre of the kingdom.

	1915–16	1916–17

Military Attaché, Lt.-Col. Don Julio Vicens.
Consul-Attaché, Don José Martinez de Pons.
Attachés, Count de Casa-Rojas, Don Fernando Valdés, Don José Aquinaga, Marquis de Mós, Don Pedro de Zuleta, Don Eduardo M. Peña.
Consul-General in London, Don José Congosto, 40 Trinity Square, London, E.C.
Vice-Consul, Don Theodoro Varela Gil.

A kingdom in the south-west of Europe, comprising about eleven-thirteenths of the Iberian Peninsula—in addition to the Balearic Islands, the Canary Islands, and Ceuta, in Morocco—the total *area* being 194,783 sq. m. with a *pop.* in 1913 of 20,355,983.

By the constitution of 1876, Spain is declared a constitutional monarchy, with the executive power vested in the King, and the legislative power in the Cortes with the King. The **Cortes** consist of Senate and Congress. The **Senate** is composed of **three classes**: those who sit by right of royal or noble birth or official position, 100 members nominated by the Crown (these two classes not numbering more than 180 together), and 180 elected by the communal and provincial states, the church, the universities, and the largest taxpayers of the kingdom. The elected Senators must be renewed by one-half every 5 years, and altogether whenever the Cortes are dissolved. The **Congress** contains 406 deputies, elected for 5 years by citizens of 25 years of age who have enjoyed full civil rights in any municipality for 2 years. Under the law of 1909 it is the compulsory duty of every elector to vote both in Parliamentary and Municipal elections. There is a provision for minority representation, and for the election of ten deputies who, though not returned in any single district, yet receive a cumulative vote of more than 10,000 in several districts. The Senate and Congress are equal in authority, and either of them, or the King, can introduce new laws.

Each of the 49 provinces has its own parliament, and each commune its own elected ayuntamiento, presided over by the alcalde, for **municipal and provincial administration**; and by the constitution neither the Executive nor the Cortes can (although they do) interfere in municipal or provincial administration, except for the protection of national and permanent interests. The State **religion** is the Roman Catholic, and the public worship of any other creed was formerly forbidden; but by a royal decree of June 1910 dissident congregations are permitted to distinguish their places of worship by emblem or lettering. There are 43,287 nuns in 3,007 convents, and 12,801 monks in 794 monasteries. The position of the orders is regulated by the Concordat of 1851. It is estimated that of the national expenditure, other than that upon the service of the debt, one-tenth goes to the support of the Church. The weight of this burden and the abuse by the Church of its privileges have provoked an Anti-Clerical movement which has grown greatly in strength in recent years, and by the Cadenas Act of 1910 the entry into Spain of any fresh religious orders was forbidden, pending the enactment of other regulations. **Education** is free, but inefficient, the cost being borne mainly by the municipalities. There are 24,915 public schools and 5,212 private schools.

Three-quarters of the total population are engaged in agriculture. The principal **products** are wine, cereals, minerals, and cotton textiles, and other products include esparto, flax, hemp, pulse, and various fruits. The acreage under vines in 1914 was 3,066,874, under wheat 9,232,560, under barley 3,784,813, under oats 1,402,300, under rye 1,817,955, and under maize 1,139,914. Iron, coal, and copper are the chief minerals worked, the output in 1914 being of iron 9,861,668 tons, of copper 2,268,691 tons, of anthracite 232,517 tons, and of coal 3,783,214 tons; zinc, lead, manganese, quicksilver, and salt are also mined in considerable quantities. There were 9,377 miles of railway in operation in 1915. Considerable extensions are in progress.

CAPITAL, Madrid (pop. 572,000); other large towns are Barcelona 560,000, Valencia 233,348, Seville 155,366, Malaga 133,045, Murcia 124,985.

The Canary Islands, off the N.W. African coast, are ruled as an integral province of the kingdom. They have an *area* of 2,808 sq. m. and a *pop.* of 453,000. Bananas, potatoes, and tomatoes are their most valuable products, but these industries have been very adversely affected by the war.

	1913	1914	1915
Exports to U.K.	£1,549,454	£1,692,285	£1,899,511

Port St. Mary—*Vice-Consul*, Robert J. Pitman.
San Lucar—*Consular Agent*, (vacant).

Mail transit: Madrid, 42 hours.

Colonies

By the war with the United States in 1898 Spain lost Cuba and all her West Indian possessions, besides the Philippine Islands. The Caroline, Pelew and Ladrone Islands (except Guam, which was ceded to the United States) were sold to Germany in 1899.

Fernando Po is a volcanic island in the Gulf of Guinea, forming, with Elobey, Annobon, Corisco, and other islands, a Spanish colony. *Area*, 814 sq. m.; *pop.* 23,844. Discovered in 1471 by a Portuguese sailor of same name, and ceded by Portugal to Spain in 1778. Capital, Santa Isabel, originally an English settlement, established in 1827. The natives, Aniyo or Bubis, stupid and repulsive in appearance. **Exports,** cocoa, for the cultivation of which the island is admirably suited, is the chief export, the yield per annum being about 1,700,000 lb. The yield could be increased nearly tenfold but for the absence of labour. Indiarubber and palm oil are also exported.

The Muni River Settlements consist of the country on the banks of the Muni and Campo rivers, on the west coast of Africa, in the Gulf of Guinea, and an agreement has settled the dispute about the boundary between French and Spanish territory in this region. *Area* estimated at about 9,000 sq. m.; *pop.* 200,000.

Rio de Oro and **Adrar**, on the west coast of the Sahara, bounded on the north by Morocco and on the south by a line running east from Cape Blanco, are placed under the Governorship of the Canary Islands, with a sub-governor at Rio de Oro. *Area* estimated at 70,000 sq. m.; *pop.* 12,000.

SWEDEN

King of Sweden, Gustaf V, *b.* June 16, 1858; *suc.* Dec. 8, 1907; *m.* Sept. 20, 1881, Victoria, d. of Grand Duke of Baden (*b.* Aug. 7, 1862). Civil List, £78,250. *Issue*:
(1) Gustaf Adolf, G.C.B., G.C.V.O., Duke of Skäne, Crown Prince and Heir-Apparent, *b.* Nov. 11, 1882; *m.* June 5, 1905, Princess Margaret Victoria of Connaught, and has issue: (i) Prince Gustaf Adolf, *b.* Apr. 22, 1906; (ii) Prince Sigvard, *b.* June 7, 1907; (iii) Princess Ingrid, *b.* Mar. 28, 1910; (iv) Prince Bertil, *b.* Feb. 28, 1912. (2) Prince Wilhelm, Duke of Södermanland, *b.* June 17, 1884, *m.* 1908, Grand Duchess Maria Pavlovna of Russia, *div.* 1914. *Issue:* Prince Lennart, *b.* 1909. (3) Prince Eric, Duke of Västmanland, *b.* April 20, 1889.

Prime Minister, H. K. L. Hammarskjöld.
Foreign Affairs, K. A. Wallenberg.
Interior, H. O. F. von Sydow.
Justice, B. F. E. Hasselroth.
Finance, A. F. Wennersten.
War, Col. B. B. E. Mörche.
Marine, D. Broström.
Public Worship and Instruction, K. G. Westman.
Agriculture, Baron J. G. Beck-Friis.
Ministers without Portfolios, S. J. Stenberg, S. N. Linner.

Envoy Ex. and Minister Plen. in London, Count H. Wrangel, G.C.V.O.
Legation, 73 Portland Place, W.
1*st Secretary*, W. Boström, M.V.O.
2*nd Secretary*, E. Liljewalch.
Naval Attaché, Lieut.-Commdr. Ch. de Champs, M.V.O.
Military Attaché, Commandant Mossberg.
Attaché, C. de Reuterskiöld.
Chancellor, J. Stille.
Consul-General, F. A. G. de Berencreutz.
Vice-Consul, G. A. H. A. de Platen.
Consulate, 63 Finsbury Pavement, E.C.

Sweden occupies the eastern portion of the Scandinavian Peninsula, extending from 69° 3′ to 55° 20′ N., and from 11° 6′ on the S.W. to 24° 9′ E. Its extreme length is about 990 m., and extreme breadth 250 m., with an *area* of 172,876 sq. m. The *pop.* at the last census (1910) was 5,522,403, and was estimated in 1915 at 5,679,607. The country slopes away from the Kolen mountains, which form a natural boundary between Norway and Sweden down to the lowlands of the central district and the plains of Skäne. The northern portion is covered with great forests of fir and pine, which are protected by legislation from excessive lumbering; the mining industry is situated in the extreme north of Norrland and in the midlands, the south being agricultural. In spite of the latitude of Sweden, the climate is not severe, owing to the warm Atlantic drift, which

affects the country even over the Kolen mountains; the average time during which snow lies in the year is about 47 days in Skåne, up to 140–190 days in the north.

Government

Under the Swedish Constitution of 1809, with subsequent amendments, the executive power is lodged in the king, who also possesses legislative power in matters of political administration; in all other respects such power is exercised jointly by **the Diet**, which alone may impose taxes. Every new law must have the assent of the king. The Diet consists of two Chambers, the First of 150 members (elected by provinces and municipalities for six years), the Second of 230 members (150 representing rural and 80 urban constituencies), elected for three years. An Act instituting universal suffrage and proportional representation was passed in 1909, and an Old Age Pension Act in 1913. Members of both Chambers are paid £66 per session.

The last General Elections, which were fought largely on the necessity for the increase of national defence, resulted in the return of 86 Conservatives, 71 Liberals, and 73 Socialists.

Local affairs are administered through prefects nominated by the King and representative bodies elected in the 24 governments, and the communes or municipalities, into which the country is divided and subdivided. The larger towns, Stockholm, Göteborg, Malmö, Norrkjöping, and Gefle, have separate municipal councils. The **State religion** is Lutheran; all others, except the Jesuits, are tolerated. Elementary **education** is compulsory, free, and well organised.

Industries

Sweden was formerly almost entirely an agricultural country, but mining and manufactures have increasingly drawn on the population, and the percentage of those engaged in agriculture is now about equal to the percentage of those engaged in mining and commerce. The principal agricultural products are the cereals—oats (1,958,900 acres in 1915), rye (980,350 acres), barley (435,700 acres), wheat (271,200 acres)—potatoes, and dairy produce. The live stock in 1914 included 596,136 horses, 2,720,748 cattle, 988,163 sheep, and 967,687 pigs.

The mining industry is of the greatest importance; there are vast deposits of iron ore, those of the Dannemora fields being renowned for the excellence of the steel produced; copper, lead, zinc, manganese, and sulphur are also mined, gold and silver are found in small quanities, and coal in small beds, the output being under 400,000 tons a year. 6,588,300 tons of iron ore were mined in 1914, the output of the other metals being: gold ore 639 tons; silver and lead ore 3,100 tons; copper ore 8,839 tons; zinc ore 42,279 tons. The forests provide large timber, wood-work, and wood-pulp industries; some 4,500,000 cubic metres of timber are cut in the year, and are dealt with by 1,053 saw and planing mills, 411 joinery and furniture factories, 119 wood-pulp factories, and 68 paper and paste-board mills. Marble and granite are largely worked. The **exports** represent the fruits of the above industries, and include butter, eggs, machinery and implements, iron and zinc ore, manufactured iron and steel, matches, paper, wood-pulp, timber, wood goods and stone. **Imports** include coal and coke, tobacco, wine, fruits and other colonial produce, feeding stuffs and fertilisers, wool, yarn, oils, salt, and machinery. There were in 1915 9,094 m. of railway, of which 2,971 m. were state-owned. The iron-mines of Gellivara are now joined to the main line system at Boden, and there is also a branch to Narvik on the Opoten Fjoid in Norway. In the south there is a train-ferry service between Trelleborg and Sasnitch in Prussia.

CAPITAL, Stockholm (350,995); other towns are Göteborg (173,875); Malmö (92,338); Norrkjöping (46,674), and Gefle (35,838).

SWITZERLAND

President for 1916, Camille Decoppet (*b.* 1863).
Vice-President for 1916, Edmond Schulthess (*b.* 1869).

Minister in London, M. Gaston Carlin, 3 Portland Place, W.

Switzerland, a confederation of nineteen entire and six half cantons, which have been united for federal purposes since 1848, extends between 45° 49′ and 47° 48′ N. lat. and 5° 58′ and 10° 30′ E. long. It comprises a total *area* of 15,976 sq. m., with a *pop.* in 1913 of 3,877,210, made up of 15 German-, 6 French-, 1 Rumansch-, and 2 Italian-speaking cantons. The constitution of 1874 vests supreme legislative and executive authority in two chambers—viz. (1) a **State Council** of 44 members, chosen two for each canton and one for each half-canton for three years; and (2) a **National Council** of 167 delegates of the Swiss people (of whom 29 are sent by Berne and 22 by Zurich), chosen also for three years, directly by manhood suffrage, one deputy for every 20,000 of the population. The united chambers form the Federal Assembly, to which is confided the supreme government. The executive authority is deputed to a **Federal Council** of seven members, elected for three years by the Assembly, the president and vice-president of which are elected annually, and are the first magistrates of the republic. The Council sits at Berne, which is the headquarters of the Federal administration.

The principles of the **Referendum** and of the **Initiative** are in force. By the former, if a petition is presented by 30,000 citizens for the alteration or revocation of a measure passed by the Legislature, or 8 cantons demand it, the law must be referred to the direct vote of the nation. The latter signifies the right of any 50,000 citizens to demand a direct popular vote on any constitutional question. **The Federal Government** can alone contract treaties or declare war. The army, postal system, finance and customs, are also under its control. Civil and criminal law, justice, police, public works, and schools are all left under the jurisdiction of the cantonal authorities, while labour legislation may be initiated either by the Confederation or by the cantons. The **neutrality** of the country is guaranteed by the Treaty of Vienna, 1815, as indispensable to the general interest of Europe. Complete liberty of conscience prevails, but Jesuits are interdicted. About 59% of the population are Protestants and 40% Roman Catholics.

Education is free and compulsory, and admirably organised from the primary schools to the seven universities.

Switzerland is the most mountainous country in Europe, the Alps and the Jura forming striking features. These, together with the numerous lakes, rivers, and glaciers, render 25·2% of the surface unproductive. The picturesque scenery, however, compensates for this by making the entertaining of visitors to the numerous summer and winter resorts the chief "industry" of the country. Agriculture is an important industry, carried on by nearly 300,000 peasant proprietors, cheese and condensed milk being the chief products. The best cheese is the Gruyère. At the last census there were in the country 144,128 horses, 1,443,483 cattle, 161,414 sheep, 570,226 pigs, and 341,296 goats. In the summer the cattle are fed on the numerous mountain pastures or "alps," but of their winter keep a considerable proportion has to be imported. Of the mineral products the most important is asphalt, which is worked by an English company at the Val de Travers, Neuchâtel. Much attention has been given of late years to various industries, and there are now large silk and cotton factories. The watch making industry established in Geneva since the end of the sixteenth century has long been famous. Other industries are embroidery, musical boxes, chocolate (Suchard, Cailler, etc), shoemaking, straw plaiting, woodcarving, aniline dyes, pottery, and aluminium. The principal imports are cereals, fruits, vegetables, colonial produce, animal food substances, iron and mineral substances, woollen and cotton goods. There are 3,530 miles of railways open, a third of which have been nationalised. The State railways, owing to the heavy capital charges (£80,000,000), do not show a working profit; in 1913 (the last normal year) they carried 91,546,639 passengers, with receipts of £3,661,826 from passenger traffic, and £4,743,032 from goods traffic. The expenditure in 1913 amounted to £5,345,918, exclusive of repayment of capital and interest.

	1913	1914	1915
Revenue	£3,998,284	£3,132,428	£3,059,600
Expenditure	4,212,426	4,033,752	3,999,600
Debt	—	—	8,992,400

	1913	1914	1915
Imports	£77,030,652	£56,503,555	—
Exports	55,037,272	47,311,000	—
Exports to U.K.	11,070,464	10,064,436	15,251,744
Imports from (and of) U.K.	4,212,401	2,998,141	3,601,939

The exports to the U.K. in 1915 comprised:

Cocoa	£1,732,528	Embroidery and needlework	£2,920,660
Milk, condensed	1,030,280	Silk, Broadstuffs	3,017,296
		,, Ribbons	1,868,549

CAPITAL, Berne (pop. 94,700). Other chief towns are Zürich (205,000), Basle (137,500), Geneva (136,700), and Lausanne (74,000).

BRITISH LEGATION, Berne

Envoy Ex. and Minister Plen. Sir Horace G. M. Rumbold, M.V.O. (*b.* 1869) . . £1,450
Councillor, Lord Acton, M.V.O.

St. Gall—Consul, H. Harlas Gaskell.
Vice-Consul, E. A. Steiger-Züst.
St. Moritz—Consul, Dr. F. Holland.
Mail transit: Berne, 1 day.

TIBET

Tibet is a country situated on the slopes of the Himalayas, between Kashmir and the Chinese province of Sze-Chuan, with Chinese Turkestan on the north. It has an *area* of 463,200 sq. m. and a *pop.* variously estimated at from 5,000,000 to 6,500,000. The CAPITAL is Lhasa (estimated pop. 15,000). The country, by reason of its physical characteristics, its great mountains, and its height above the level of the sea, is of extreme interest, apart from the fact that it is the home of Buddhism. Gold is said to exist in considerable quantities. The **Dalai Lama** is the head of the Government, assisted by a Council composed of a Prime Minister and 9 councillors, of whom 5 are priests and 4 laymen. The country is divided into 4 "lings," each governed by a lama. Previously to the revolution of 1911-12 there were two **Ambans,** or Chinese Residents, at Lhasa, who represented the Chinese Government, and Chinese troops were stationed at Lhasa, Shigatse, and Dingri. By the Anglo-Tibetan Conventions of 1890 and 1893, Yatung, in the Chumbi valley, on the Indian-Tibet frontier, was opened for trade. The chief imports are cotton and woollen goods, metals, chinaware, indigo, matches, silk, and tobacco. The exports are mostly wool, musk and ponies being the only other items of note. A British mission under Col. Younghusband was dispatched during 1903 by the Indian Government to secure the observance of these Conventions. After considerable fighting Lhasa was reached on Aug. 3, 1904, and a treaty was signed (Sept. 7). In February 1910 some sensation was caused by the sudden departure of the Dalai Lama from Tibet on the ground that his power and security were menaced by the Chinese. He crossed the frontier into India, where he was received with due respect by the Government. On learning of his flight the Chinese Government deposed him by Imperial Edict. In 1912 the Chinese revolutionary movement resulted in the mutiny of the garrison at Lhasa, the abdication of the Amban, and the establishment of a **Representative Council** more or less subordinate to the Provincial Government of Sze-Chuan. The Tibetans seized the occasion to rise against the Chinese, and met with such success that in June the Dalai Lama was encouraged to return to Lhasa. In October 1913 a conference of representatives of Great Britain, China, and Tibet met at Simla in order to discuss the boundaries of Inner and Outer Tibet. It was understood that China was willing to agree to the complete autonomy of Outer Tibet, with the right to maintain a Resident at Lhasa, with a suitable guard, as well to the establishment of a semi-autonomous zone in Inner Tibet. In July 1914 it was announced that inability to agree on the boundaries had rendered the conference abortive. At the present time Outer Tibet must be considered autonomous

TURKEY

Sultan, Mahomed V, *b.* in 1844, the third son of Sultan Abd-ul-Medjid. He was proclaimed Sultan on April 27, 1909, in succession to his elder brother Abd-ul-Hamid II, who was deposed by the unanimous vote of the National Assembly. The succession to the throne, according to Turkish custom, vests in the senior male descendant of the house of Othman, sprung from the Imperial Harem. The Sultan does not marry, but from the inmates of the Harem selects a certain number who are known as Ladies of the Palace, the others occupying positions subordinate to them. All children born in the Harem are held to be of legitimate and equal birth. The eldest son of the Sultan only succeeds when there are no uncles or cousins of greater age than himself. The Sultan's surviving brothers are the ex-Sultan Abd-ul-Hamid; Suleiman Effendi, *b.* 1860; and Wahid-Uddin Effendi, *b.* 1861. The *heir-apparent* is Prince Wahid-ed-Din, *b.* Jan. 12, 1861. The Sultan's Civil List is about £500,000.

Grand Vizier, H.H. Prince Said Halim Pasha.
Foreign Affairs and Justice (*ad. interim*), Halil Bey.
Finance, Djaved Bey.
War, Enver Pasha.
Marine, Mahmad Pasha.
Interior, Talaat Bey.
Public Works, Abbas Halim Pasha.
Commerce and Agriculture, Ahmed Nessimi Bey.
Sheik-ul-Islam and Pious Foundations, Mussa Kiazim Effendi.
Public Institution and Posts and Telegraphs, Shukri Bey.
President of the Council of State, Ibrahim Bey.

The greater portion of her European provinces were lost to Turkey as a result of the Balkan War, the area being reduced from 65,350 sq. m. to 10,882 sq. m., and the population from 6,130,200 to 1,891,000. The Asiatic possessions are Asia Minor, Armenia and Kurdistan, Mesopotamia and Syria, and Yemen and the Hedjaz in Arabia. Particulars are given below as to some of the more important of these provinces. In Asiatic Turkey there are large numbers of Turks, about 4,000,000 Arabs, and many Greeks, Kurds, Circassians, Armenians, etc. There are, it is estimated, about 12,000,000 Mahommedans and 4,000,000 Christians (of the Roman, Greek, and other Churches) within the empire, besides members of other faiths. The *area* of Turkey, without the states nominally subject to it, is estimated at 710,224 sq. m.; and the total *pop.* at about 30,000,000. The area of Turkey in Europe is 10,882 sq. m., pop. 1,891,000; in Asia Minor, 193,540 sq. m., pop. 9,090,000; Armenia and Kurdistan, 72,000 sq. m., pop. 2,500,000; Mesopotamia, 143,250 sq. m., pop. 1,400,000; Syria, 114,530 sq. m., pop. 2,890,400; in Arabia, 170,300 sq. m., pop. 1,050,000.

The two Turkish vilayets in Arabia are Hedjaz and Yemen. **Hedjaz** contains 96,500 sq. m., and a pop. of 300,000. The Hedjaz camels are bred here, and about 20,000 are sent annually to Syria. Mecca, besides being the goal of Mahommedan pilgrims, is the chief distributing centre for Central Arabia. But the Hedjaz is at present independent under the Sheriff of Mecca.

Yemen has an area of 73,800 sq. m. and a pop. of 750,000. The inhabitants are Zaidis—Arabs who do not acknowledge the Sultan of Turkey as commander of the faithful.

Armenia, together with **Kurdistan,** forms a part of the Turkish Empire in Asia. The total *area* is about 75,000 sq. m., and the *pop.* was recently estimated at from 2,500,000 to about 5,000,000, but a serious plan of extermination was steadily pursued by Turkey throughout 1915. Tradition assigns the cradle of the human race to Armenia. The country is divided into three vilayets or governments—Erzerum, Mamuret ul Aziz, and Diarbekir, with the districts of Bitlis and Van. The inhabitants are of the Christian faith, most of them belonging to the Gregorian Church, which greatly resembles the Greek Church in doctrine and ritual. There are many, however, who acknowledge the authority of Rome, though

retaining their own distinctive ritual. Sheep, cattle, and wool are largely exported, and there is a growing silk industry in Diarbekir.

Palestine includes the Sanjak (or Province) of Jerusalem—to which was added in 1906 the kaza of Nazareth—part of the vilayet of Beirout, and part of the vilayet of Syria. A number of Jewish Colonies, originally founded by Baron E. de Rothschild, but handed over in 1900 to the Jewish Colonisation Association, are now fairly flourishing in the rich plain of Sharon. There are also some German colonies. The cultivation of the orange is increasing largely, and soap-making and the manufacture of olive-wood articles are important industries. The population of Jerusalem is, approximately, 95,000, of Jaffa 55,000, of Gaza 30,000, and of Nazareth 20,000. The population of the province is increasing.

The rich country known as the **Shatt-ut-Arab**, at the head of the Persian Gulf, is one of the most fertile in the country, but its cultivation has been entirely hampered by Turkish methods. As a result of the war it is at present in English occupation (see p. 390), and will probably be permanently retained, as one of the outer gates to India.

The Restored Constitution

In 1876 the Sultan proclaimed a Constitution, the details of which were drawn up by Midhat Pasha. A Parliament was established and the Senators and Deputies met in March 1877. The war with Russia began the next month, Parliament was closed, and dissolved in February 1878, and the Constitution was suspended. It remained suspended till 1908, when the peaceful revolution brought about by the Young Turk movement led to its restoration. Under the Constitution the Sultan, who is the protector of the Moslem religion, appoints and dismisses his Ministers, concludes all treaties with foreign Powers, declares war, is the head of the military and naval forces, and can dissolve the Chamber of Deputies, but a new election must follow within 6 months. The liberty of the individual Ottoman is inviolable, and all Ottomans are equal before the law. The **State religion** is that of Islam, but the State protects the free exercise of all faiths known in the Empire and maintains the religious privileges given to the different communities. The press and education are free, all schools being under State control. **Parliament** consists of two Chambers, the Senate and the Chamber of Deputies, and meets annually on Nov. 1, sitting till the following March 1, though the Sultan can prolong the session if necessary. Members of **the Senate** are nominated by the Sultan, and the number must not exceed one-third that of the Chamber. They must be over 40, and have rendered service to the State. They receive 10,000 piastres a month. **The Chamber of Deputies** consists of members elected for 4 years, in the proportion of one Deputy to 50,000 male citizens, by ballot. Deputies must not be public servants, must be Ottomans, must be able to read and write Turkish, and must be over 30. Each Deputy receives 20,000 piastres per session and travelling expenses. The President and two Vice-Presidents of the Chamber are appointed by the Sultan from three lists, of three each, of candidates elected by the Chamber. The initiative in legislation rests with the Ministry, but either Chamber can demand the introduction of new or the amendment of existing legislation, with the approval of the Sultan, who in that case orders the Council of State to prepare a measure in compliance with the demand. All measures must be passed by both Chambers and sanctioned by the Sultan before becoming law. **The judges** are irremovable except according to law. **There is a Supreme Court** of 30 members, divided into two sections, one, of 9 members, being "la Chambre d'Accusation," and the other, of 21 members, "la Chambre de Jugement."

Until 1912 the only organised political party was the Committee of Union and Progress, which represents the Young Turk Party, and which engineered the revolution of 1909. The Committee, whose headquarters were at Salonika, is represented in the capital by a Parliamentary Committee. The Committee dictated the affairs of Turkey until the rise, in 1912, of the **Party of Union and Liberty**, which, with the aid of the Military League of "Soldier-Saviours," effected the *coup d'état* of July 1912. The Committee of Union and Progress, however, effected a counter *coup* in 1913, and again returned to power.

The Koran is a legal and theological code upon which the fundamental laws of the empire are based. The **Grand Vizier** and the **Sheik-ul-Islam** are appointed by the Sultan, the latter with the nominal concurrence of the Ulema or general body of lawyers and theologians, over which the Sheik-ul-Islam, as head of the Church, presides. The Grand Vizier is assisted by the Medjüss-i-Hass, or **Cabinet of Ministers.**

For administrative purposes the empire is divided into **vilayets** or governments, sub-divided further into provinces (sanjaks), districts (kazas), sub-districts (nahiés), and communities (kariés). These are governed by Valis, or Governors-General, with provincial councils, and by subordinate officials. Foreigners living in Turkey were, previous to the war, amenable only to their respective **Consular tribunals**, except in cases where Turkish subjects were concerned, which came before the Turkish courts, or when the case related to landed property owned by foreigners, when it came before a Turkish civil court. In the general ferment produced by the war, Turkey took occasion to disown the capitulation; the action of Turkey was not recognised by the United States. Mahommedanism is the **religion** of only about half the population in European Turkey, though it is professed by the great majority of the inhabitants of Turkey in Asia. Mahommedan priests number 11,600, and are subject to the Sheik-ul-Islam, but their offices are hereditary. The Government recognises the ecclesiastical heads of the Roman, Greek, Armenian, Bulgarian, and other Churches, however. Education is given in about 36,000 schools of different kinds, containing about 1,350,000 scholars, and is free.

Agriculture is largely carried on, but in very primitive fashion, and is greatly hampered by the tithes and taxes levied on agricultural produce, even when exported from one province to another. The land is largely held direct from the Crown. There is a Government Agricultural Bank, with a capital of £2,629,600, which advances money to farmers on the security of real property. Tobacco, cereals, cotton, coffee, wine, silk, and fruits are the chief productions. The provinces in Asia abound in minerals, coal, borax, manganese, chrome, silver-lead, etc., which, however, are little worked. Silk, cotton, and woollen fabrics are made at Damascus. All goods imported are taxed 11% *ad valorem*, except tobacco and salt. There are now 4,100 miles of railway open in European and Asiatic Turkey. The CAPITAL is Constantinople, with a pop. of about 1,125,000. Other chief towns are Damascus (250,000), Smyrna (201,000),

Baghdad (145,000), Aleppo (127,150), Beirout (119,000), and Adrianople (81,000).

	1914-15
Revenue	£T31,921,163
Expenditure	34,007,619
Public debt, 1913, £T128,834,486	

	1911	1912
Imports	£37,774,913	£39,591,852
Exports	22,474,818	21,746,662

Exports to U.K., 1913, £5,416,659 :

Barley	£893,853	Tobacco	£433,760
Figs	211,266	Mohair	641,069
Raisins	748,800	Wool	274,071
Oranges	268,953	Opium	308,736
Other fruits	335,340		

Imports from (and of) U.K. 1913, £7,704,823 :

Coal and Coke	£338,816	Machinery	£322,914
Cotton Yarn	440,227	Metals and Manuf.	432,839
Cotton Goods	4,598,461	Woollens	486,564

(The exports of Turkey to the U.K. in 1914 were valued at £4,223,279, and the imports from the U.K. at £5,893,660.)

Mail transit : Constantinople, 3 days 18 hours.

UNITED STATES OF AMERICA

President, Woodrow Wilson, Ph.D., Litt.D., LL.D., who was the victorious Democratic candidate for the Presidency in 1912 (and again in 1916), and assumed office on March 4, 1913, was born at Staunton, Virginia, Dec. 28, 1856, the son of Scottish-Irish parents. He was educated at Princeton University, the University of Virginia, and the Johns Hopkins University; was for twenty years Professor of Jurisprudence and Politics in Princeton University, and from 1902-10 was also President of the University. Governor of New Jersey, 1911-12. Author of many works on history and politics He married Miss Ellen Louise Axsen (1860-1914), and has three daughters. In 1915 President Wilson married, as his second wife, Mrs. Edith Galt. *Address;* White House, Washington.
Vice-President, T. R. Marshall (*b.* 1854).

The Cabinet

Secretary of State, Robert Lansing.
Secretary of the Treasury, William G. McAdoo.

Deputy Dispatch Agent, C. J. Petherick.

Constitution and Government

The United States were constituted by the Declaration of Independence adopted by Congress, July 4, 1776, and are now a confederation of forty-eight North American sovereign states united together by a federal bond for Imperial objects, the local administration being reserved to each state. By the constitution of 1787 and subsequent amendments the government is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial. The first is vested in a **President** elected on the Tuesday after the first Monday in November every leap year for four years by electors appointed by each separate state. The number of such electors is equal to the number of senators and representatives to which the State is entitled in Congress; but no senator or representative or office-holder under the Government can be an elector. The President, who has an annual salary of £15,000, and a travelling allowance of £5,000, is commander-in-chief of the national forces, and has a veto on all laws passed by Congress, although a bill may become law in spite of his veto, on being afterwards passed by a two-thirds majority of each House of Congress. The administration is conducted under the immediate authority of the President by a **Cabinet of ten Ministers** chosen by him, and holding office at his pleasure, though confirmed by the Senate. A Minister cannot sit in either House of the Legislature. The salary of each Minister is $12,000 per annum. A **Vice-President** is chosen in the same manner as the President; he is *ex-officio* President of the Senate, and in case of the death or resignation of the President he assumes his office for the remainder of the term, and the Senate elects a temporary vice-president.

Congress and Judicature

The **Legislative power** is vested in **Congress,** which consists of :—

(1) The **Senate,** at present consisting of 96 members—two chosen by each State Legislature for six years—who ratify or reject all treaties made by the President, confirm or reject all appointments made by the President, and who constitute a High Court of impeachment, with power only to remove or disqualify from office. One-third of the Senate retires every two years. (There is at present a movement for amending the Constitution, so as to procure the election of Senators directly by the population, instead of by the Legislatures, of the different States. The proposed amendment has been carried in the House of Representatives more than once, but has failed to obtain the necessary majority in the Senate.)

(2) The **House of Representatives,** at present consisting of 435 members, chosen every two years by all adult male citizens duly qualified according to the laws of their respective states, and apportioned among the states according to population, as determined by the census taken every 10 years. New York at present has 43 representatives, Pennsylvania 36, Illinois 27, Ohio 22, Missouri 16, and Massachusetts 16, the other states having smaller numbers.

In addition to the representatives, delegates from the organised "territories" (districts not admitted as states) are entitled to debate on matters pertinent to their interests, but must not vote. Congress may propose an amendment to the Constitution if two-thirds of both Houses deem it necessary ; and such amendment shall be deemed to be incorporated in the Constitution when ratified by the legislatures of three-fourths of the several States. All members of Congress are paid $7,500 per annum, with travelling, etc., allowances, but the Speaker of the House of Representatives receives $12,000.

The judicial power is confided to a **Supreme Court** (the members of which are nominated by the President for life) with power to interpret the Constitution, to decide all disputes between the Federal Government and the individual states, and to hear all causes arising under the federal laws, etc.

Justices of the Supreme Court

Edward D. White, *b.* '43, (*Chief Justice*, $15,000).	W. Van Devanter, *b.* '59
Joseph McKenna, *b.* '43.	Mahlon Pitney, *b.* '58.
Oliver W. Holmes, *b.* '41.	Jas. C. McReynolds, *b.* '62.
Wm. R. Day, *b.* '49.	Louis Brandeis.
	J. H. Clark (ea $14,500)

There are about 60 Federal Courts, each appointed for a district, and above these are Circuit Courts of Appeal, and the Supreme Court. Offences against the person and against property are dealt with by the State Courts, which also deal with matters of probate, divorce, and bankruptcy. There are Justices of the Peace and Police Judges in towns and cities, Courts of Record for the counties, and a Supreme Court for each State.

State and Local Government

The **constitutions** and modes of administration **of the 48 States** bear a close resemblance to each other—the executive being confided to a Governor and the legislative to two elective chambers, while each State has its own judicial system. Roughly speaking, each State has voluntarily surrendered to the central Government all federal matters (including taxation for federal purposes only, foreign affairs, the control of the army, navy, foreign and inter-state commerce, postal service, coinage, etc.), while reserving the right to administer all local affairs and to impose local taxes at its pleasure. The Governor and the State officials are chosen by direct vote of the people, and each party therefore appoints its own adherents when it wins the election. For **local government** within the States the unit is the rural township, under officials appointed by the local electors, and these are combined to form counties, though in the south and some other parts the county itself forms the unit. There are **Indian Reservations,** with an area of 52,084 sq. m., and an Indian population (1915) of 324,878, situated not only in Indian Territory, but in Arizona, South Dakota, Montana, Oklahoma, etc. The "District of Columbia," with the capital, **Washington** (area 70 sq. m., population 331,069), is the seat of Federal Government, and is under the direct government of the Confederacy through three Commissioners appointed by the President.

Education

Perfect equality is accorded to all **religions** in the United States. The Roman Catholics are the strongest religious body, Methodists, Baptists, Lutherans, and Presbyterians following in that order. **Education** is free and general, although backward in some of the former slave states, the cost being met from state or local funds, and the Federal Government contributing a portion.

PUBLIC SCHOOLS

Year.	Pupils (average attendance)	Male Teachers.	Female Teachers.
1911 . .	12,871,980	110,328	423,278
1912 . .	13,302,303	114,559	432,730
1913 . .	13,613,656	113,213	452,270
1914 . .	14,216,459	114,662	465,396

The amount expended on the public elementary and secondary schools in 1914 was $555,077,146. There were in 1915 563 universities, colleges, and technical schools, with 26,636 male professors, 5,931 female professors, 183,646 male students, and 101,205 female students. There were also professional schools : 164 in theology with 10,588 pupils ; 120 in law with 21,885 pupils ; 93 in medicine with 15,083 pupils ; 50 in dentistry with 9,647 pupils ; 76 in pharmacy with 6,191 pupils ; and 21 in veterinary medicine with 2,262 pupils. Schools for the blind numbered 62, for the deaf 151, and for the feeble-minded 117.

Agriculture

Uninhabited and uncultivated land is held to be national property, and titles to stated portions may be acquired under the homestead laws and the timber-culture Acts. According to the census of 1910 there were 6,361,502 **farms** in the country, with an acreage of 878,798,325 acres, giving an average of 138·1 acres per farm. The value of farms was put at $28,475,674,169 for the land, and of the improvements, buildings, implements, and live stock at $12,515,774,921. The fixed capital invested in **agriculture** is therefore put at $40,991,449,090, as compared with $18,428,270,000 invested in **manufactures.** About 10,500,000 of the population are engaged in agriculture, and over 7,000,000 in manufacturing and mechanical pursuits.

LIVE-STOCK

	1914	1915	1916
Horses	20,962,000	21,195,000	21,166,000
Mules	4,449,000	4,479,000	4,565,000
Milch cows	20,737,000	21,262,000	21,262,000
Cattle	35,855,000	37,067,000	39,453,000
Sheep	49,719,000	49,956,000	49,162,000
Swine	58,933,000	64,618,000	68,047,000

The total value of the live-stock in 1916 is put down at £1,200,556,800. Cereals, other farm and dairy produce, preserved vegetables and fruits, sugar, cotton, tobacco, live stock, timber, iron, silver, gold, coal, and other minerals are the **chief products.** The production of coal has increased rapidly, the output in 1915 being—of bituminous, 377,414,259 tons, of which 3·82% was exported; of anthracite, 81,099,268 tons, of which 4·54% was exported.

YIELD OF CROPS

		1914	1915
Maize	bush.	2,672,804,000	3,054,535,000
Wheat	,,	891,017,000	1,011,505,000
Oats	,,	1,141,060,000	1,540,362,000
Rye	,,	42,779,000	49,190,000
Barley	,,	194,953,000	237,009,000
Buckwheat	,,	16,881,000	15,769,000
Tobacco	lb.	1,034,679,000	1,062,079,000

Industries

There are many large and flourishing manufacturing industries—textiles, cotton, wool, silk, iron and steel, lumbering, etc., being the chief. The **chief imports** are food products, such as sugar, coffee, fruits, wines and spirits, tea, etc.; raw materials like silk, rubber, fibres, hides and skins, tin, wool, etc.; manufactured goods, etc. About three-fifths of the imports consist of food and raw material and two-fifths of manufactured goods. The **chief exports** are **agricultural products,** such as cotton, breadstuffs, meat, dairy produce, mineral produce, petroleum, timber, and other raw materials, and manufactures including iron and steel, tobacco, implements.

Communications

There were 263,547 miles of **railway** in operation in 1915, and 46,454 miles of street and elevated railways worked by electricity. The railways have 64,760 locomotives and 2,503,822 railway cars. The employees number 1,710,296. The number of passengers carried in 1915 was 1,053,138,718 and the freight weighed 1,949,707,999 tons. The capital stock of all railways amounted in 1914 to $8,680,759,704, upon which $418,540,270 were paid in dividends. In 1914 there were 56,380 **post offices** dealing with 18,567,445,160 "pieces" of mailed matter of all kinds. There were also 247,528 miles of **telegraph** line with 1,814,196 miles of wire. There were 7,326,748 **telephones** with 19,019,391 miles of wire.

Consult the "Statistical Abstract of the United States," prepared annually by the Department of Commerce, Washington.

The Monroe Doctrine

The Monroe Doctrine, which is a cardinal point of American policy, was formulated by President Monroe in 1823, in agreement with Great Britain and in opposition to the designs of the Holy Alliance, which contemplated the partition of South America among the European Powers. It has ever since been accepted as laying down the principles which guide the United States in respect to the relations of European Powers with the other countries upon the American continent. **President Monroe said:** "We owe it to candour, and to the amicable relations existing between the United States and those Powers [the Allied Powers of Europe], to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety With the existing colonies or dependencies of any European Power we have not interfered, and shall not interfere. But with the Governments who have declared their independence and maintained it, and whose independence we have on great consideration and on just principles acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any unfriendly disposition towards the United States. It is impossible that the Allied Powers should extend their political system to any portion of either continent without endangering our peace and happiness; nor can any one believe that our Southern brethren, if left to themselves, would adopt it of their own accord. It is equally impossible, therefore, that we should behold such interposition in any form with indifference." **President Roosevelt** pointed out in 1902 that the Doctrine was not a means of aggression, but defensive in purpose; and that it would be respected just so long as the United States possessed a first-class Navy. In an address on the subject delivered to the Yale Law School in 1903, **Mr. Whitelaw Reid** said neither of the two essential propositions in President Monroe's Message "objects to transfer of dominion to Europeans by cession, purchase, or the voluntary act of the inhabitants; and neither of them gives any pledge to any American State that we would interfere in its behalf against the use of force for the collection of debts or the redress of injuries, or indeed against any European attack."

Immigration Law and Statistics

The **United States Immigration Law, 1903,** raised the head-tax on immigrants from 1 to 2 dollars. The classes of aliens previously prohibited were Chinese labourers, persons under agreement to perform labour or service in the United States, idiots, insane persons, paupers, or persons likely to become a public charge, persons suffering from a loathsome or dangerous contagious disease, persons who had been convicted (except political offenders), polygamists, and persons whose ticket or passage is paid for by the money of another or who is assisted by others to come. To these the new Act added epileptics, persons who have been insane within five years previous or who have had two or more attacks of insanity, professional beggars, anarchists or persons who believe in or advocate the overthrow by force of the government of the United States, or of all government, or of all forms of law, or the assassination of public officials. There are also in force the **Chinese Exclusion Act** and the **Alien Contract Labour Law.** During 1914, 1,218,480 **immigrant settlers** arrived in the United States, including 283,738 from Italy, 278,152 from Austria-Hungary, 255,660 from Russia and Finland, 14,800 from Sweden, 8,329 from Norway, 35,864 from England, 2,183 from Wales, 24,688 from Ireland, 10,682 from Scotland, and 35,734 from Germany. In 1915 only 326,700 arrived. The **immigrants denied admission** numbered 33,041, while 4,610 were deported in 1914.

Pensions

The annual **report of the U.S. Commissioner of Pensions** showed that in the year 1915 there were

on the roll 748,147 military pensioners, of whom 437,448 were soldiers and 310,699 widows and dependants. The disbursements during the year amounted to $166,518,266.

Newspapers

In 1915 the total number of newspapers and periodicals published was 23,167.

The **wealth of the country** was estimated by the Census Office, in 1890, at $65,037,091,197, or £13,000,000,000; in 1900 at $88,517,306,775, or £17,700,000,000; in 1904 at $107,104,211,917, or £21,420,000,000; and in 1907 at £25,000,000,000.

Finance

The ordinary revenue and expenditure for the six years ending June 30, 1915, are as follows ($4·867 = £1 sterling):—

Year.	Receipts.	Disbursements
	Dollars.	Dollars.
1911	701,372,375	654,137,998
1912	691,778,465	654,553,963
1913	724,111,230	682,770,706
1914	734,673,167	700,254,490
1915	697,910,827	724,763,167
1916	777,480,487	716,367,674

Public Debt

The Public Debt of the U.S. for the three years ending July 1, 1915, was:—

Year.	Principal.	Interest.
	Dollars.	Dollars.
1913	965,706,610	22,835,330
1914	967,953,310	22,891,497
1915	969,759,090	22,936,642

Year ended June 30.	Imports.	Exports.
	Dollars.	Dollars.
1908	1,194,341,792	1,860,773,346
1912	1,653,264,934	2,204,322,409
1913	1,813,008,234	2,465,884,149
1914	1,893,925,657	2,364,579,148
1915	1,674,169,740	2,768,589,340

The figures exclude gold and silver and deal with merchandise only.

The **imports from and exports to the United Kingdom** have been in the last five years:—

Year.	Imports of U.K. produce.	Exports.
	£	£
1911	27,519,356	122,694,486
1912	30,065,806	134,579,304
1913	29,294,196	141,652,072
1914	34,035,430	138,575,284
1915	26,167,551	237,773,576

The Imports and Exports for 1915 were constituted as follows:—

Imports into U.S.

Spirits	£525,958	Jute manuf.	£854,001
Wool, raw	1,561,439	Linen manuf.	1,902,949
Chemicals	1,062,322	Silk	449,336
Cotton manuf.	3,093,390	Woollens	2,348,506
,, yarn	678,625		

The New HAZELL, 1917

Exports from U.S.

Wheat	£26,533,103	Lard	£5,499,029	Petroleum	£8,962,355
Barley	2,802,849	Bacon	12,752,834	Wood and timber	5,052,327
Oats	4,633,448	Beef, fresh	3,227,869	Motor cars	6,774,995
Wheat meal and flour	5,307,153	,, preserved	3,813,309	Chemicals	1,886,638
Fish	1,929,971	Oil: cotton seed	1,066,296	Cotton manuf.	8,602,322
Fruit, canned	1,093,216	Sugar	5,104,206	Instruments and apparatus	1,791,456
Apples, raw	1,323,215	Tobacco, unmanuf.	6,609,097	Leather	£9,227,368

Revenue, $3,345,577; *expenditure*, $3,365,931.

SOUTH CAROLINA (original State)

Area, 30,989 sq. m. STATE CAPITAL: Columbia (pop. 34,058); other towns are Charleston (60,427), Spartanburg (20,745), Greenville (17,788).

POPULATION

Year.	White.	Negro.	Total.
1890	462,008	688,934	1,151,149
1900	557,807	782,321	1,340,316
1910	679,161	835,843	1,515,400
1916	—	—	1,625,475

Governor, Richard I. Manning, Dem., 1915–17; salary $3,500
Secretary of State, R. M. McCown.
LEGISLATURE: Senate (44 members); House of Representatives (124 members); salary, $200 a term.
Revenue, $3,998,082; *expenditure*, $3,447,423.

SOUTH DAKOTA, 1889

Area, 77,615 sq. m. STATE CAPITAL: Pierre (pop. 3,010); other towns are Sioux Falls (20,929), Aberdeen (11,846).

POPULATION

Year.	White.	Negro.	Total.
1890	328,010	541	348,600
1900	380,714	465	401,570
1910	563,771	817	583,888
1916	—	—	698,509

Governor, Frank M. Byrne, Repub., 1915–17; salary $3,000
Secretary of State, Frank M. Rood.
LEGISLATURE: Senate (45 members); House of Representatives (135 members); salary, $5 per day.
Revenue, $4,714,176; *expenditure*, $3,933,869.

TENNESSEE, 1796

Area, 42,022 sq. m. STATE CAPITAL: Nashville (pop. 115,978); other towns are Memphis (146,113), Chattanooga (58,576), Knoxville (38,300).

POPULATION

Year.	White.	Negro.	Total.
1890	1,336,637	430,678	1,767,518
1900	1,540,186	480,243	2,020,616
1910	1,711,432	473,088	2,184,789
1916	—	—	2,288,004

Governor, Thomas C. Rye, Dem., 1915–17; salary $4,000
Secretary of State, R. R. Sneed.
LEGISLATURE: Senate (33 members); House of Representatives (99 members); salary, $4 per day.
Revenue, $5,418,682; *expenditure*, $5,246,271.

TEXAS, 1845

Area, 265,896 sq. m. STATE CAPITAL: Austin (pop. 33,861); other towns are San Antonio (118,260), Dallas (116,837), Fort Worth (96,624), Houston (95,884), El Paso (50,966), Galveston (40,929), Waco (29,294).

POPULATION

Year.	White.	Negro.	Total.
1890 . .	1,745,935	488,171	2,235,527
1900 . .	2,426,669	620,722	3,048,710
1910 . .	3,204,348	690,049	3,896,542
1916 . .	—	—	4,429,566

Governor, James E. Ferguson, Dem., 1915–17; salary $4,000
Secretary of State, John G. McKay.
LEGISLATURE: Senate (31 members); House of Representatives (142 members); salary, $5 per day.
Revenue, $14,608,344; *expenditure*, $12,886,735.

UTAH, 1894

Area, 84,990 sq. m. STATE CAPITAL: Salt Lake City (pop. 114,120); other towns are Ogden (30,466), Provo (10,091).

POPULATION

Year.	White.	Negro.	Total.
1890 . .	205,925	588	210,779
1900 . .	272,465	672	276,749
1910 . .	366,583	1,144	373,351
1916 . .	—	—	434,083

Governor, William Spry, Repub., 1913–17; salary $6,000
Secretary of State, David Mattson.
LEGISLATURE: Senate (18 members); House of Representatives (46 members); salary, $4 a day.
Revenue, $4,916,765; *expenditure*, $4,889,893.

VERMONT, 1791

Area, 9,564 sq. m. STATE CAPITAL: Montpelier (pop. 7,856); other towns are Burlington (21,432), Rutland (14,624), Barre (11,937).

POPULATION

Year.	White.	Negro.	Total.
1890 . .	331,418	937	332,422
1900 . .	342,771	826	343,641
1910 . .	354,298	1,621	355,956
1916 . .	—	—	363,699

Governor, Charles W. Gates, Repub., 1915–17; salary $2,500
Secretary of State, G. W. Bailey.
LEGISLATURE: Senate (30 members); House of Representatives (246 members); salary, $4 a day.
Revenue, $3,617,552; *expenditure*, $3,509,703.

VIRGINIA (original State)

Area, 42,627 sq. m. STATE CAPITAL: Richmond (pop. 154,674); other towns are Norfolk (88,076), Roanoke (41,929), Portsmouth (38,610), Lynchburg (32,385), Petersburg (25,347), Newport News (20,504).

POPULATION

Year.	White.	Negro.	Total.
1890 . .	1,020,122	635,438	1,655,980
1900 . .	1,192,855	660,722	1,854,184
1910 . .	1,389,809	671,096	2,061,612
1916 . .	—	—	2,192,019

Governor, H. C. Stuart, Dem., 1914–18; sal. $5,000
Secretary, B. O. James.
LEGISLATURE: Senate (40 members); House of Delegates (100 members); salary, $500 a session.
Revenue, $9,062,386; *expenditure*, $7,994,572.

WASHINGTON, 1889

Area, 69,127 sq. m. STATE CAPITAL: Olympia (pop. 10,000); other towns are Seattle (330,834), Tacoma (108,094), Spokane (142,990), Bellingham (31,609), Everett (33,767), Walla Walla (24,205).

POPULATION

1900 . .	2,057,911	2,542	2,069,042
1910 . .	2,320,555	2,900	2,333,860
1916 . .	—	—	2,500,350

Governor, E. L. Philipp, Repub., 1915–17; salary $5,000
Secretary of State, John S. Donald.
LEGISLATURE: Senate (33 members); Assembly (100 members); salary, $500 a year.
Revenue, $23,732,786; *expenditure*, $19,789,188.

WYOMING, 1890

Area, 97,914 sq. m. STATE CAPITAL: Cheyenne (pop. 9,661); Sheridan has a pop. of 8,906.

POPULATION

Year.	White.	Negro.	Total.
1890 . .	59,324	922	62,555
1900 . .	89,051	940	92,531
1910 . .	140,318	2,235	145,965
1915 . .	—	—	141,705

Governor, John B. Kendrick.
Secretary of State, Frank L. Houx.
LEGISLATURE: Senate (27 members); House of Representatives (57 members); salary, $8 a day.
Revenue, $2,320,063; *expenditure*, $1,468,032.

Territories and Dependencies

Alaska is a territory in the extreme N.W. of North America, purchased from Russia by the United States in 1868 for £1,440,000. The *area* is 590,884 sq. m., and the *pop.* in 1915 was 64,751. It is administered by a **Governor** (J. F. A. Strong) appointed by the President, and the CAPITAL is Juneau (pop. 1,864). Other towns are: Nome (pop. 3,500), on the west coast; Skagway (pop. 1,100), and Sitka (pop. 1,396). The chief centre in the gold region in the interior is Fairbanks, on the Tanana river; copper, lead, and coal are also worked. There are valuable seal, salmon, and other fisheries; the output of canned salmon in 1915 was 4,056,653 cases, and the total value of all fisheries $21,242,975. There are considerable timber resources, mostly of the spruce hemlock and red and yellow cedar.

	1913	1914	1915
Imports .	£4,161,906	£4,605,824	£4,380,185
Exports .	5,222,595	4,588,329	5,688,744

Guam, the largest of the Marianne or Ladrone Islands, was ceded to the United States by Spain in 1898, for use as a coaling station. It has a good roadstead. *Area* about 210 sq. m.; *pop.* 12,517. The CAPITAL is Agaña; pop. 6,000.

	1913	1914	1915
Imports .	£32,049	£33,050	£49,056
Exports .	7,474	10,218	4,491

The Hawaiian Islands, formerly known as the Sandwich Islands, are a group of eight inhabited and four uninhabited islands in the North Pacific. Their *area* is 6,405 sq. m. and the *pop.* in 1915 was 232,856, including over 21,000 Chinese, over 90,000 Japanese, and about 50,000 whites. They were annexed to the United States in 1898, attached to the department of California for military purposes (but are now a separate command), and made a Territory in 1900, with one delegate in the U.S. Congress. The administration is carried on by a **Governor** (Lucius E. Pinkham) with a legislature of two Houses, a Senate of 15 and a House of 30 members. The natives almost all profess the Christian faith, and education is free; number of pupils, 36,529. **Exports:** sugar and pine-apples principally, but rice, coffee, fruits and nuts, hides, and wool are also exported. Sugar exported in 1914-15 amounted to 571,838 tons, value £10,590,620; the value of pine-apples exported was £1,263,826. The bulk of the trade is with the United States. Steamers connect the islands with America, Australasia, China, and Japan. There is communication by wireless with the U.S. Railways, 296 m. In 1915 456 vessels of 1,605,952 tonnage entered and 436 vessels of 1,574,845 tonnage cleared the ports. CAPITAL, Honolulu, on the south-west coast of the Island of Oahu; pop. 52,180.

	1913	1914	1915
Imports .	£7,767,800	£7,329,950	£5,374,197
Exports .	9,056,650	8,576,097	12,859,455
Exports to U.K.	18,014	13,485	10,190
Imports from (and of) U.K. .	134,432	80,920	16,401

British Consul, *Honolulu*, E. L. Steuart Gordon.

The Philippine Islands form a large group of the Asiatic Archipelago. They have an *area* of 115,026 sq. m. The largest islands are Luzon (40,969 sq. m.) and Mindanao (36,292 sq. m.). The *pop.* in 1915 was 8,734,927. The inhabitants, apart from the Europeans and Americans, consist of the aborigines, called Negritos; the Igolotes, probably of Chinese descent, who are the agriculturists of the islands; and the Tagalos, who are Malay immigrants. Until 1898 the islands formed a Spanish colony, but after the **Americo-Spanish war** they were ceded to the United States, as territorial indemnity for the expenses of the war. The islands are administered by a **Civil Governor** (Francis B. Harrison, $18,000 salary), with a **Legislative Body** consisting of eight Commissioners, four Americans and four Filipinos; and a **Legislative Assembly.** The islands are divided into 38 provinces, each under an elected Governor, and all the towns have self-government through an elected President and Councillors. Education is free, and English is taught in all the schools, which number 4,235, attended by 428,552 pupils. Great mineral wealth exists, and coal, iron, and gold are now being mined in Cebu and Luzon with some success. The chief industries are in the hands of the Europeans and the Chinese, who number about 25,000 and 50,000 respectively. Hemp, copra, sugar, cigars, and tobacco are **exported.** The islands are specially rich in timber. Great harbour improvements have been made at Manila, and there are 614 m. of railway constructed. A new currency on a gold standard was instituted in 1903, the peso being equal to half the United States gold dollar. CAPITAL: Manila (pop. 234,409); Cebu has a pop. of 57,181.

	1912-13	1913-14	1914
Revenue. .	£4,912,398	£4,400,017	£3,518,469*
Expenditure .	4,779,230	2,960,808	3,518,469*

* For nine months only, the financial year being changed to coincide with the calendar year.

	1913	1914	1915
Imports .	£11,265,516	£11,202,314	£8,895,972
Exports .	10,736,665	10,247,609	10,183,012
Exports to U.K.	2,182,750	1,612,390	2,156,651
Imports from (and of) U.K. .	982,972	789,599	564,159

BRITISH CONSULAR OFFICERS

Manila—Consul-General, J. B. Rentiers.
Vice-Consul, W. M. Royds.
Cebu—Vice-Consul, J. T. Knowles.
Iloilo—Vice-Consul, T. H. W. Price.

Porto Rico, until 1898 a Spanish colony, but then ceded to the United States by the Spanish-American treaty of peace, lies to the east of Santo Domingo, in the West Indies. It has an *area* of 3,600 sq. m. and a *pop.*, in 1915 of 1,200,000, of whom 65·5% are whites, 30% mulattoes, and 45% blacks. It is administered by a **Governor** (Arthur Yager) with an **Executive Council**, consisting of 6 officials and 5 natives appointed by the President, and a **Legislative Assembly** of 35 members elected for 2 years on a franchise restricted by a small property qualification or a low educational test. The island of **Culebra**, between Porto Rico and St. Thomas, was formerly a U.S. naval base, but is so no longer. The island of Porto Rico is mountainous, and the **chief exports** are coffee, fruit, sugar, tobacco, and timber. Free trade between the island and the United States was inaugurated in July 1901 with very beneficial results on the sugar and tobacco trades. The United States send the great bulk of the imports and take most of the exports. There are 200 miles of railway. CAPITAL: San Juan (*pop.* 52,293), Ponce (68,100), Mayaguez (41,368).

	1913	1914	1915
Revenue .	£2,380,769	—	£2,773,061
Expenditure .	1,904,287	—	2,637,999
Debt . .	—	—	1,596,000
Imports . .	7,380,012	£7,281,357	7,059,228
Exports . .	9,820,713	8,620,552	10,282,689
Exports to U.K.	902	1,702	4,374
Imports from (and of) U.K.	66,439	75,740	83,880

British Consul, C. D. Elphick (*acting*).

Samoa Islands.—By an agreement between Great Britain and Germany concluded Nov. 9, 1899, and approved in Jan. 1900 by the United States, the Samoa Islands, which lie in the Western Pacific, were divided, Upolu and Savaii being assigned to Germany, and **Tutuila** and the other Samoan islands E. of 171° E. long. to the United States, Great Britain renouncing all her rights over the islands. **Tutuila** (area 77 sq. m., pop. 5,452) has the magnificent harbour of Pago Pago. The other islands have an area of about 25 sq. m. with about 2,000 inhabitants.

[*For* **Panama Canal Zone** *see* PANAMA.]

URUGUAY

President, Dr. Feliciano Viera (1915-19).
Minister in London, Señor Frederico R. Vidiella, 194 Queen's Gate, S.W., and Trafalgar Buildings, 1 Charing Cross, W.C.
First Secretary, Señor Dr. Juan Gadea.
Second Secretary, Señor Carlos de Santiago.
Consul-General in London, Señor Don José B. Terra, 188 Strand, W.C.
Vice-Consul, Don R. Piriz Coelho.
Chancellor, Don O. Pisciottano.

Uruguay is a republic on the east coast of South America, south of Brazil. It has an *area* of 72,210 sq. m. and a *pop.* in 1914 of 1,315,714. The Executive is vested in a **President** elected for four years by the two Chambers sitting together as a general assembly. The legislature is composed of a **Senate** of 19 chosen for six years by an electoral college, one-third retiring every two years, and a **Chamber** of 90 members elected for three years, one for each 3,000 of the male adults. In the intervals between the annual sessions a permanent committee of two senators and five deputies assumes legislative power and control of general administration. The revenue is mainly derived from the Customs dues, a property tax, licences, stamp duties, monopoly on insurance, etc. **State religion** Roman Catholic, but all others tolerated. Education obligatory and free, under a greatly improved system in recent years. The peace establishment of the army is about 10,400. The navy consists of two cruisers. A High Court of Justice was established in December 1907, and the judicial system was reorganised. Cattle and sheep form the chief wealth of the country, but there is a future for agriculture, and some mining is done. The vine, tobacco, and olives are cultivated. At Fray Bentos is established the great factory of the Liebig Extract of Meat Co. (Lemco). At this factory and its branches over 500,000 cattle are slaughtered yearly. **Exports**, chiefly wool, preserved beef, hides, ostrich feathers, etc. There are 1,639 miles of railway open, all in British hands. CAPITAL, Montevideo (*pop.* 377,994), at the mouth of the Rio de la Plata.

	1912-13	1913-14	1914-15
Revenue .	£8,019,387	£7,788,800	£7,769,527
Expenditure .	7,980,309	7,769,527	6,796,526
Debt . .	—	—	30,030,668

	1913	1914	1915
Imports .	£10,520,000	£7,446,975	£6,995,928
Exports .	13,520,000	10,483,761	14,658,134
Exports to U.K.	2,748,819	2,803,959	4,331,283
Imports from (and of) U.K.	2,916,422	1,663,643	1,496,789

Minister in London, Dr. Pedro Cesar Dominici, 51 Drayton Gardens, S.W.
Consul-General in London, Paul C. Heyden, 10 Eastcheap, E.C.
Vice-Consul, Carlos Heyden.

The New HAZELL, 1917

A republic in South America, consisting of 20 States, 2 Territories, and the Federal District. It is bounded on the north by the Caribbean Sea, on the south by Brazil and Colombia, on the west by Columbia, and on the east by the Atlantic Ocean and British Guiana. It has an *area* of 398,594 sq. m. and a *pop.* of 2,805,316 in 1915.

The **President** is elected (for a period of 7 years) by Congress within 15 days of its first meeting. Congress consists of a **Senate** of 20 members elected by the legislatures of each state, and a **Chamber of Deputies,** elected directly, one member to every 35,000 of population, and one more for an excess of 15,000. The term of office for both houses is 3 years. The constituent States have each its own legislature and executive. On a peace footing the forces are about 6,000 strong. Roman Catholicism is the State **religion,** but private exercise of all others is permitted. **Education** is in a backward state, but is compulsory and free. La Guayra, Puerto Cabello, and Maracaibo are the chief ports of the Republic. There are (1915) 533 miles of railway being worked. The chief exports are coffee (£2,038,128 in 1914-15), cacao (846,509 in 1914-15), hides, balata, egret feathers, gold, and rubber. The country suffers much from locusts.

CAPITAL, Carácas (pop. 75,000); Maracaibo 40,000.

	1912-13	1913-14	1914-15
Revenue and expenditure	—	£2,390,930	£2,003,900
Debt	—	—	6,690,808
Imports	£4,223,850	3,489,548	2,336,633
Exports	5,205,020	5,401,697	7,103,988

	1913	1914	1915
Exports to U.K.	£560,180	£219,968	£334,844
Imports from (and of) U.K.	825,674	572,213	506,827

BRITISH LEGATION, Carácas

Minister Resident, H. H. D. Beaumont (*b.* 1867), £2,000

FREEMASONRY

United Grand Lodge of England, Freemasons, Hall, Great Queen Street, London, W.C. *Principal officers* for the year 1916-17: *Grand Master*, H.R.H. the Duke of Connaught and Strathearn, K.G.; *Pro Grand Master*, Lord Ampthill, G.C.S.I., G.C.I.E.; *Deputy Grand Master*, Rt. Hon. T. F. Halsey, P.C.; *Grand Wardens*, Rt. Hon. Viscount Maitland, Rt. Hon. Sir C. C. Wakefield; *Grand Chaplains*, Rev. Canon Samuel G. Scott, M.A., Rev. E. C. Pearce, M.A.; *Assistant ditto*, Rev. Francis S. Paynter, M.A., Rev. Harry V. Pigot, M.A.; *Grand Treasurer*, Lewis Evans; *Grand Registrar*, W. F. Hamilton, K.C.; *Deputy ditto*, Albert H. Jessel, K.C.; *Assistant ditto*, W. S. Sherrington, R. Ringwood; *President Board Gen. Purposes*, Alfred F. Robbins; *Grand Secretary*, Sir Edward Letchworth, F.S.A.; *President Board of Benevolence*, James Stephens; *Senior Grand Deacons*, Surg.-Gen. Sir Chas. P. Lukis, K.C.S.I., Col. Sir William H. Bowater, Sir H. Woodburn Kirby, Col. Stanley T. Stephenson, J. Dundas Grant, M.D., Lt.-Col. E. R. Kerrison, C.M.G.; *Junior Grand Deacons*, C. O'Brien Harding, Ald. Edward C. Moore, J. Banks Fearnley, Samuel B. Murray, Chas. J. Sharp, G. J. Crawford Thomson, M.D.; *G. Director of Ceremonies*, J. S. Granville Grenfell, M.A.; *Deputy ditto*, G. Woods Wollaston, M.V.O., M.A.; *Assistant ditto*, T. H. Smethurst, E. T. Heron, Owen A. Clark, Hy. J. Jack, P. G. Mallory, W. P. Rowlands; *G. Sword Bearer*, Col. Charles D. Leyden; *Deputy ditto*, Col. A. J. V. Durell; *Assist. ditto*, Maj. Matthew H. Hale, Maj. Wm. F. Dick; *G. Standard Bearers*, F. A. Baldwin, H. Bladon; *Assist. ditto*, F. H. Adams, R. W. Nicole; *Grand Organist*, Allen Gill; *Deputy ditto*, T. W. Lardner, MUS.BAC.; *Assist. G. Secretary*, W. Resbury Few; *Grand Pursuivant*, O. Leo Thomson; *Assistant ditto*, J. W. Harvey, A. Calver, M. P. Relph.

The Grand Lodge of England meets on the first Wednesday in March, June, September, and December. The Annual Festival takes place on the last Wednesday in April. The Board of General Purposes meets on the third Tuesday in every month, and the Board of Benevolence on the last Wednesday but one of every month, except in December, when the meeting is on the third Wednesday. Both Boards meet at 5 p.m.

Supreme Grand Chapter of Royal Arch Masons, Freemason's Hall, Great Queen Street, London, W.C. *Grand Scribe E*, Sir Edward Letchworth. The Grand Chapter meets at Freemasons' Hall on the first Wednesday in February, May, August, and November.

Grand Lodge of Mark Master Masons, Mark Masons' Hall, Great Queen Street, London, W.C. *Grand Sec.* Arthur D. Hansell.

Grand Council of Allied Masonic Degrees, Mark Masons' Hall, Great Queen Street, London, W.C. *Grand Sec.* Arthur D. Hansell.

WORLD'S PRODUCTION OF SUGAR

The world's production of sugar in 1915–16 is estimated at 15,576,000 tons, as compared with 17,307,000 tons in 1914–15. The production of beet sugar was 6,320,000 tons; Germany producing 1,720,000, Austria 1,033,000, and Russia 1,615,000 tons. The production of cane sugar was 7,756,000 tons, of which 3,000,000 tons came from Cuba, and 1,275,000 tons from Java.

PRODUCE OF CROPS IN ENGLAND AND WALES, 1916

The yield of wheat per acre, 29·05 bush., is about two bush. below that of 1915. Barley, although about 1½ bush. per acre below average, is better than last year, and, with the acreage increased, has given a total nearly 700,000 qr. in excess of 1915. Oats are only very slightly below the average, and slightly better than last year: the total production, 10,461,164 qrs., is the largest since 1910. Beans are over average by [illegible] of a bushel per acre, and 2⅔ bush. per acre above last year, but as the area has been reduced the total production is rather below that of 1915. The yield of peas is practically identical with that of [illegible] and 1¾ bush. below average; in this case also, owing to a reduced acreage, the total production is less than in 1915.

The New HAZELL, 1917

THE INTERNATIONAL INSTITUTE OF AGRICULTURE

The International Institute of Agriculture owes its inception to the King of Italy, at whose suggestion the Italian Government invited all the countries of the world to send representatives to a congress, having for its object the creation of such an institution. The Congress took place in Rome, in May 1905, and resulted in the signing of the Convention of June 17 creating an International Institute of Agriculture.

No less than 55 countries, comprising almost the whole of the civilised world, have adhered to the Convention.

The Institute, which is housed in a beautiful building constructed in Rome at the personal expense of the King of Italy, consists of a General Assembly and a Permanent Committee. The General Assembly elects from amongst its members a Chairman and a Vice-Chairman for each session. The Permanent Committee, in which each country is represented by one delegate, elects for a period of three years a President and Vice-President from amongst the delegates.

The current expenses are provided by the contributions of the Governments sending representatives to the Institute, supplemented by an endowment of 300,000 francs a year granted by the King of Italy. The different countries are classified according to the number of "units of contribution" which they pay to the Institute, a "unit of contribution" being 2,500 francs. Thus the countries in Class I. pay 16 units, and their delegates in the Permanent Committee have each 5 votes; in Class II., 8 units and 4 votes; in Class III., 4 units and 3 votes; in Class IV., 2 units and 2 votes; in Class V., 1 unit and 1 vote. The United Kingdom belongs to Class I., paying an annual contribution of 40,000 francs (about £1,600).

The official language of the Institute is French, but the staff is International. The work is carried on by an administrative branch (secretariat) and three technical branches: Agricultural and Commercial Statistics; Agricultural Intelligence and Plant Diseases; Economic and Social Intelligence. There is also a library. The technical branches are intended to supply the world with reliable information—(*a*) on crops (areas cultivated, conditions and forecasts, estimated yield and ascertained production), and on imports, exports, and prices of agricultural produce, with a view to minimising the effect of disturbing influences on the markets; (*b*) on the progress of agricultural science and the improvement of agricultural practice; (*c*) on the diseases of plants and on insect pests, in order to facilitate the prevention of their diffusion, and the protection of such districts as are free from them; (*d*) on agricultural co-operation, insurance and credit, and on agricultural economy in general, so as to help in promoting the diffusion and increasing the efficiency of the systems best adapted to the requirements of agriculturists. Each of the technical branches publishes a monthly bulletin in five languages, besides occasional volumes of collected information. A weekly bibliographical bulletin is published by the library. There are also issued a year-book of agricultural statistics and a year-book of agricultural legislation; the latter is compiled by the Secretariat.

It is also a part of the functions of the Institute to submit to the approval of the Governments measures for the protection of the common interests of agriculturists and for the improvement of their condition, after having previously obtained all the necessary sources of information, such as resolutions passed by international or other congresses relating to agriculture or the sciences applied to agriculture, by agricultural societies, academies, scientific bodies, etc.

The following are the countries sending representatives to the Institute: Abyssinia, Argentine Republic, Austria-Hungary, Belgium, Brazil, Bulgaria, Chile, China, Colombia, Costa Rica, Cuba, Denmark, Ecuador, France, Algeria, Morocco (French Protectorate), Tunis, Germany, Great Britain and Ireland, Australia, Canada, India, Mauritius, New Zealand, Union of South Africa, Greece, Guatemala, Holland, Dutch East Indies, Italy, Eritrea, Tripoli and Cyrenaica, Japan, Luxemburg, Mexico, Montenegro, Nicaragua, Norway, Paraguay, Peru, Persia, Portugal, Rumania, Russia, Salvador, San Marino, Serbia, Spain, Sweden, Switzerland, Turkey, Egypt, United States, Uruguay. The delegate of Great Britain and Ireland is Sir James Wilson, K.C.S.I., who also acts as delegate for Australia, Canada, Mauritius, New Zealand, and the Union of South Africa.

President of the Institute, Marchese R. Cappelli; Vice-President of the Italian Chamber of Deputies, delegate of Italy; *Vice-President*, Louis-Dop, delegate of France; *General Secretary*, Prof. G. Lorenzoni; *Acting Chief of the Division of General Statistics*, Dr. Van Hissenhoven; *Acting Chief of the Division of Agricultural Intelligence and Plant Diseases*, Dr. Saulnier; *Chief of the Division of Economic and Social Intelligence*, Prof. G. Lorenzoni.

Chairmen of the Permanent Sub-Committees: *1st Sub-Committee*, E. de Miklós de Miklósvár, Secretary of State for Agriculture and Member of the House of Magnates of Hungary, delegate of Hungary; *2nd Sub-Committee*, Dr. T. Müller, Privy Councillor, delegate of Germany; *3rd Sub-Committee*, G. Zabiello, Consul-General of Russia at Rome, delegate of Russia; *4th Sub-Committee*, S. Aldunate, Minister Plenipotentiary of Chile at Rome, delegate of Chile.

AGRICULTURAL STATISTICS OF THE UNITED KINGDOM

According to the **Final Report** on the **Census of Production** [Cd. 6320, 1913] the agricultural output of Great Britain was valued at £150,800,000, about 1,840,000 persons being permanently or temporarily employed in its production; the agricultural output of Ireland was valued at £45,574,000, affording employment to about 984,000 persons.

The total area (excluding water) of the United Kingdom is as follows:

	England.	Wales.	Scotland.	Ireland.	U. Kingdom.
Acres	32,387,409	4,750,155	19,069,728	20,248,099	76,640,844

Of this area the total acreage under crops and grass in 1915 was as follows:

		England.	Wales.	Scotland.	Ireland.	U. Kingdom.
Arable land	Acres	10,272,673	693,034	3,289,902	4,998,903	19,346,593
Permanent grass	Acres	14,038,071	2,049,322	1,491,495	9,720,785	27,328,814

The New HAZELL, 1917

The crops grown on this acreage in 1915 were as follows:

	£	£	£	£
1911	2,917.410	2,208.696	26,586,839	15,308,572
1912	3,756,979	2,367,458	25,149,661	15.894,897
1913	3,208,733	2.517,302	23,066,621	17,118,092
1914	3,261,589	2,122,874	32,118,170	16.140.279

The last two cereal years (Sept. 1 to Aug. 31, 1914–15 and 1915–16) practically coincide with the first two years of war, so that a comparison with previous cereal years of the figures showing the extent to which imports of grain from the Colonies and from foreign countries supplement the home harvest of 1915 is unusually interesting. An important point is that, even with the large home crop of 1915, three-quarters of our wheat supplies in 1915–16 were imported. Ten years' figures are given in the following table:

Harvest Year.	Wheat Crop of the United Kingdom.	Imports of Wheat during the cereal Year Sept. 1— Aug. 31.	Imports of Wheat Flour in equivalent weight of Grain.	Total estimated Wheat Grain available for Home Consumption (including seed).
	Qr.	Qr.	Qr.	Qr.
1906–7 .	7,577,300	22,105,180	4,284,490	33,966,970
1907–8 .	7,066,400	21,362,720	4,339,090	32,768,210
1908–9 .	6,741,200	21,727,220	3,554,650	32,023,070
1909–10 .	7,899,600	24,099,060	3,501,520	35,500,180
1910–11 .	7,074,200	23,516,140	3,263,380	33,853,720
1911–12 .	8,039,200	24,109,260	3,324,140	33,472,600
1912–13 .	7,175,300	26,500,565	3,648,883	37,324,750
1913–14 .	7,087,100	23,267,175	3,654,048	34,008,320
1914–15 .	7,804,000	22,483,587	3,529,573	33,817,160
1915–16 .	9,239,400	23,311,055	3,245,958	35,796,410

With regard to the countries from which the supply of wheat was drawn, the outstanding feature is the doubling of the imports from the United States between 1913–14 and 1915–16, the extra thirty-four million cwt. sent from that country having more than compensated for the decreases in the supplies from India, Russia, Argentina, and Australia put together. Imports from Canada have remained steady, those in 1915–16 being the largest yet recorded from that country.

The **average value of foreign and colonial corn** imported into the United Kingdom for the years named was, per imperial quarter:

Year.	Wheat.	Barley.	Oats.
	s. d.	s. d.	s. d.
1905 .	31 0	20 1	15 4
1909 .	39 8	23 8	17 0
1911 .	34 0	24 1	16 5
1912 .	36 4	27 11	19 4
1913 .	35 6	25 9	17 5
1914 .	36 11	25 2	18 5

The **average value of British corn** was as follows in the years enumerated:

Year.	Wheat.	Barley.	Oats.
	s. d.	s. d.	s. d.
1851 .	38 6	24 9	18 7
1861 .	55 4	36 1	23 9
1871 .	56 8	36 2	25 2
1881 .	45 4	31 11	21 9
1891 .	37 0	28 2	20 0
1901 .	26 9	25 2	18 5
1905 .	29 8	24 4	17 4
1910 .	31 8	23 1	17 4
1911 .	31 8	27 3	18 10
1912 .	34 9	30 8	21 6
1913 .	31 8	27 3	19 1
1914 .	34 11	27 2	20 11
1915 .	52 10	37 4	30 2

Irish Cattle Trade

The following are the exports of animals from Ireland to Great Britain:

Year.	Cattle.	Horses.	Sheep.	Swine.
1911 .	694,828	31,578	654,197	342,340
1912 .	555,099	34,711	618.659	265,241
1913 .	1,109,621	36,643	659,255	200.296
1914 .	944,578	30,753	537,539	147,922
1915 .	840,735	17,811	489,391	179,056

The New HAZELL, 1917

Fish

The value of fish landed on the coasts of the United Kingdom in 1915 was: English and Welsh coasts, £7,680,581; Scottish coasts, £3,106,041; Irish coasts, £306,795. Total, United Kingdom, £10,093,417.

Numbers of Live-stock, 1876–1915

Number of horses,* cattle, sheep, and pigs in the United Kingdom in the years mentioned:

Year.	Horses.	Cattle.	Sheep.	Pigs.
1876	1,863,410	9,995,028	32,262,579	3,734,429
1880	1,929,680	9,871,153	30,239,620	2,863,488
1885	1,909,200	10,868,760	30,086,200	3,686,628
1890	1,964,911	10,789,858	31,667,195	4,362,040
1895	2,112,207	10,753,314	29,774,853	4,238,370
1900	2,000,415	11,455,009	31,054,726	3,663,716
1905	2,116,800	11,674,019	29,076,777	3,601,659
1910	2,094,587	11,765,453	31,164,587	3,561,481
1913	1,874,264	11,936,600	27,629,206	3,305,771
1914	1,851,042	12,184,505	27,963,977	3,952,615
1915	1,711,858	12,171,452	28,275,970	3,795,131

For the year 1915 these were distributed as follows:

Country.	Horses.	Cattle.	Sheep.	Pigs.
England	1,138,390	5,280,947	13,824,496	2,206,585
Wales	148,792	783,207	3,698,081	213,442
Scotland	198,704	1,223,933	7,075,798	159,057
Ireland	490,864	4,843,795	3,600,581	1,305,638

CO-OPERATION IN AGRICULTURE

The **Agricultural Organisation Society** (established 1901) is a non-trading society which exists for the purpose of advocating the principles of co-operation amongst agriculturists, and of giving assistance in the formation of agricultural co-operative societies in suitable districts throughout England and Wales. On Dec. 31, 1915, it had 561 affiliated societies. The Society receives certain Government grants, but a proportion of these grants is dependent upon the amount of voluntary contributions which it receives.

Pres. R. A. Yerburgh; *Sec.* J. Nugent Harris. *Offices*, Queen Anne's Chambers, Tothill Street, Westminster, London, S.W.

The reports of the **Irish Agricultural Organisation Society, Ltd.,** indicate that the agricultural co-operative movement in that country is growing steadily. There were, in Dec. 1915, 1,040 co-operative farmers' societies, comprising creameries, credit banks, agricultural societies, poultry keepers' societies, and others of a miscellaneous character, with an aggregate membership of over 100,000 and a total business turnover exceeding £4,000,000.

The Society is a voluntary association depending for its existence on subscriptions and on affiliation fees from the societies it organises. It receives a grant from the Development Fund *pro rata* to what it receives from the contributions of its affiliated societies. It has spent upwards of £100,000, privately contributed, in spreading co-operative organisation among Irish farmers. *Sec.* R. A. Anderson. *Office*, The Plunkett House, 84 Merrion Square, Dublin.

A **Joint Board for Co-operative Organisation**, representative of England, Scotland, and Ireland, was formed in 1908. *Chairman*, Sir Horace Plunkett; *Vice-Chairmen*, R. A. Yerburgh, M.P., and Dr. Douglas; *Sec.* R. A. Anderson, 84 Merrion Square, Dublin.

A Co-operative **Reference Library** has been established, and publishes a quarterly, *Better Business*. *Librarian*, Lionel Smith-Gordon, The Plunkett House, Dublin.

In 1914 there were 906 registered co-operative societies engaged in agricultural production and distribution in the United Kingdom. Of these 833 were societies engaged wholly in agricultural operations, 465 being engaged in the distribution of seeds, manures, implements, etc., and 368 mainly in the production of butter. The total capital amounted to £1,031,397. The aggregate sales of the 833 societies amounted to £6,070,260. They employed 3,295 persons. In addition to the 833 societies mentioned, there were 73 industrial co-operative societies having farming and dairying departments. The following table shows, for England and Wales, Scotland, and Ireland respectively, the sales of all the 906 distributing and productive societies and departments:

	Agricultural Distribution Societies.	Agricultural Productive Societies and Departments.	Total.	
			Amount.	Per Cent.
	£	£	£	
England & Wales	1,822,050	378,322	2,200,372	34·5
Scotland	417,742	285,988	703,730	11·0
Ireland	694,841	2,778,332	3,473,173	54·5
	2,934,633	3,442,642	6,377,275	100·0

SMALL HOLDINGS AND ALLOTMENTS

The Small Holdings and Allotments Act, 1907, came into force on Jan. 1, 1908. Its provisions were consolidated with those of previous measures dealing with the subject in the Small Holdings and Allotments Act, 1908, which came into force on Jan. 1, 1909. A supplementary Act, the Small Holdings Act, 1910, provided compensation to tenants on whom notice to quit is served with a view to the use of the land for the provision of small holdings. The Board of Agriculture have prepared leaflets on "The Administration of the Small Holdings Acts," "How to Obtain an Allotment or a Small Holding," and "Agricultural Credit Banks," and have also published reports on the working of a number of holdings.

The Commissioners, in their latest report (which was issued before the war—no further reports will be issued until after the war), state that up to Dec. 31, 1914, 195,499 acres had been actually acquired or agreed to be acquired for small holdings by **County Councils** in England and Wales, of which 138,405 acres had been purchased for £4,549,068 and 57,094 acres leased for rents amounting to £71,221. Of this land, 178,911 acres had been actually let to 12,581 individual small holders and 506 acres sold to 50 small holders. In addition 8,436 acres had been let to 63 Co-operative Small Holdings Associations, who had sublet the land to 1,451 of their members; and 3,580 applicants had been provided with over 47,500 acres by private landowners direct, mainly through the instrumentality of the Councils. The land so let has been acquired, but which is not yet let to small holdings, will probably provide for another 475 applicants, and the Councils of County

* Horses used for agricultural purposes (including mares kept for breeding) and unbroken horses.

Boroughs have about 310 acres not yet allotted, which will probably provide for about another 50 applicants. It appears, therefore, that the Act has resulted in the provision of land for 18,486 applicants in seven years.

During 1914 fresh applications were received by County Councils from 3,415 individuals and 7 associations. The total quantity applied for was 58,789 acres, showing a decrease on 1913 due to the war. During the seven years since the Act came into operation, applications have been received from 46,660 individuals and 96 associations, and the total quantity applied for amounts to 782,286 acres. A considerable number of the applicants, especially of those who applied in the first year, proved to be unsuitable for various reasons, mainly owing to lack of necessary capital; but 27,667 applicants have been provisionally approved as suitable, though it does not necessarily follow that it is possible to obtain holdings for them at rents which they are prepared to pay. A striking feature of the applications received is the demand in Norfolk, due largely to the efficient administration of the Act by the County Council.

The average price of the land purchased in 1914 was £36 an acre, and the average rent of the land leased £1.5.6 an acre.

The number of small holdings provided by County Councils of which the holders were in actual possession on Dec. 31, 1914, was 12,634. This does not include 1,451 holdings on land let by County Councils to Associations. The **average size of the holdings** provided in England and Wales was between 13 and 14 acres, but the average varies very considerably in different parts of the country.

Norfolk maintains the lead with 1,375 tenants, followed by Cambridge with 1,194, the Isle of Ely with 1,051, Bedfordshire with 644, Somerset with 625, and Worcester with 515. Every Council, except that of London, has provided some holdings, but the following have not succeeded in doing much in that direction, viz. Westmorland with 9, Middlesex with 18, and West Sussex with 15. It is very largely true to say that the demand increases in proportion to the activity shown in administering the Act.

Little has been done yet in the direction of **co-operation**, and a number of the tenants have not fully realised the fact that, if they are to make the most of their land, it is useless to attempt to grow the same crops as those produced by large farmers. A profit of 30*s.* to £2 an acre, which may provide a good living to the farmer of 300 or 400 acres, is not sufficient for a tenant of 20 acres, who, by the adoption of improved methods and the choice of special forms of cultivation, ought to aim at a profit of at least £10 to £15 an acre on many of the crops grown.

The total quantity of land let for the purpose of allotments by the various local authorities in England and Wales on Dec. 31, 1914, was 33,523 acres, of which 8,556 acres were the property of the Councils and 24,967 acres were leased. This land is let to 130,526 individual tenants and 52 Associations.

Applications were received for allotments during 1914 from 12,731 individuals and 2 Associations, and the total quantity applied for was 3,101 acres.

The returns show that 832 acres were acquired for allotments during the year, 194 acres being purchased and 644 acres leased.

The **Allotments and Small Holdings Association** of England, Ltd., was registered in 1912 to carry on in a more complete form the work done by the Allotment and Small Holdings Associations since 1883. By joining the Society, small cultivators and applicants for land are assisted to make the most of the opportunities given by recent legislation. *Pres.* Frederic Impey, J.P.; *Hon. Sec.*, Herbert New; *Sec.* George Streetly. *Offices*, 55 Temple Row, Birmingham.

AGRICULTURAL CREDIT SOCIETIES

The establishment of **Credit Banks** has occupied a place in the programmes of both the great political parties, who approach the question from somewhat different standpoints. The two views, as presented by Lord Carrington on the one hand and Mr. Balfour on the other, were set forth at some length in the 1911 ANNUAL (p. 318). Briefly it may be said that the Liberal policy seeks to encourage tenant occupation under a local authority, while the Unionist policy aims at the creation of a large class of owning occupiers. Bills embodying both policies have been introduced into Parliament, but so far without success.

The Board of Agriculture has successfully concluded negotiations with twenty-two of the leading joint-stock banks, who have agreed to allow the managers of their country branches to assist in the formation of **co-operative credit societies**, to audit the accounts, and, where satisfied as to the security offered by the joint liability of the members, to advance money at a favourable rate of interest to the societies. There were in existence at the end of 1914, 223 registered credit societies in the United Kingdom, with a membership of 22,671. Of the 223 associations, 49, with 4,147 members, were in England; 1, with 353 members, was in Scotland; and 173, with 18,171 members, were in Ireland. As one of the main reasons for the slow rate of progress in the establishment of co-operative credit societies in England appears to be the general reluctance to accept the principle of unlimited liability, on which these societies have been formed hitherto, the Board of Agriculture have drawn up and issued model rules for a society with share capital and limited liability, to be registered under the Industrial and Provident Societies Act. The Board has also issued model rules for co-operative cow and pig insurance societies.

THE DEVELOPMENT COMMISSION

Under the provisions of the Development and Road Improvement Funds Acts, 1909 and 1910, eight Commissioners, styled the Development Commissioners, are appointed to advise the Treasury in the administration of **a national fund for the development of agriculture** and other economic resources of the United Kingdom. The Commissioners are appointed by Royal Warrant, one of them (who, however, may be reappointed) retiring every year. Two only of the Commissioners receive salaries, which together must not exceed £3,000 a year. Every application for a grant or loan is referred to the Commissioners, who, after considering the application, draw up a recommendation to the Treasury. Before making any recommendation for an advance for the purpose of improving rural transport the Commissioners must consult the Road Board (see p. 230).

Grants and loans are made out of a fund, fed by: (1) any sums which may be voted by Parliament; (2) a sum of £2,500,000 charged on the Consolidated Fund; (3) sums received by way of interest and on repayment of loans, and the profits made as the result of a grant or loan in cases where the repayment of such profits is made a condition of the grant or loan.

Since the pressing need for national economy arose, the Commissioners have not as a rule been prepared to recommend advances for new Schemes unless they contribute to the increase of the home food supply. Preliminary steps have been taken for getting large labour-employing Schemes—such as land drainage and light railways—ready to start when the anticipated want of employment sets in after the war. In other directions recurrent expenditure on existing Schemes has as far as possible been curtailed. During 1915–16 the total advances recommended amounted to £225,000, as compared with £550,000 in 1914–15.

Agriculture and Rural Industries.—Nearly £150,000 was recommended for the development of agriculture and rural industries. Provision was made for the continuation of the schemes for the promotion of scientific research in agriculture in the United Kingdom, for agricultural education in connection with Farm Institutes in England and Wales, and for experiments in the cultivation and preparation of flax, hemp, and tobacco. The annual advances were renewed for the improvement of live stock in Great Britain, horse-breeding schemes in Ireland, and for the organisation of agricultural co-operation by the English, Scottish, and Irish Agricultural Organisation Societies. Advances were also made in aid of schemes for the increase of the production of food supplies and their preservation.

Forestry.—£20,000 was recommended for research and advisory work in England and Wales, provision of nursery stock for emergency afforestation operations, advisory forest officers in Scotland, expenses of the Forestry Staff of the Irish Dept. of Agriculture, and for other purposes.

Land Reclamation.—Loans of £4,000 were recommended for the drainage of flooded lands (Feltwell Fens).

Harbours.—For the improvement of fishery harbours, £47,510 was recommended by way of loan: England and Wales, £1,500 (Newlyn); Scotland, £46,010 (Buckie, £14,750; Wick, £31,260).

Fisheries.—For the development of Fisheries £5,000 was recommended. This sum included grants to various Institutions for fishery research, an advance for investigations into the life history of the salmon, and £1,200 to the recently formed Fisheries Organisation Society for the purpose of promoting co-operation amongst those engaged in fisheries and allied industries.

Commissioners in the order in which they are to retire: Sidney Webb, Right Hon. Lord Richard Fredk. Cavendish, C.M.G. (Chairman), Vaughan Nash, C.V.O., C.B. (Vice-Chairman), Henry Jones Davies, Walter W. Berry, Michael Andrew Ennis, Sir William Stowell Haldane, Alfred Daniel Hall, F.R.S.

Secretary, H. E. Dale (R. T. Warner, *actg.*) £1,000
Offices, 6A, Dean's Yard, Westminster, S.W.

AGRICULTURAL SOCIETIES, ETC.

Royal Agricultural Society of England

This, the premier agricultural society of the United Kingdom, was founded on May 9, 1838, as "The English Agricultural Society," and was incorporated on March 26, 1840. It has two sides to its work: (1) The practical, the chief feature of which is its annual shows; (2) The scientific, for which purpose it maintains a complete chemical laboratory for the analysis of feeding-stuffs, manures, soils, etc., and retains the services of Chemical, Botanical, Zoological, and Veterinary experts in order that its members may have at low rates the best scientific advice obtainable. It controls, moreover, an Experimental Farm and "Pot Culture" station at Woburn, where elaborate investigations into crops, soils, feeding-stuffs, and other matters connected with agriculture, are carried on. Its *Journal* contains articles by leading authorities on the most important agricultural questions of the day. The members number about 10,500. The *Consulting Chemist* is Dr. J. Augustus Voelcker, M.A., F.I.C.; the *Consulting Botanist* is Prof. R. H. Biffen, F.R.S.; and the *Zoologist* is Mr. Cecil Warburton, M.A., all of whom members may consult on payment of a small fee. *Pres.* Lord Powis; *Sec.* Thomas McRow. *Offices*, 16 Bedford Square, W.C.

The **Highland and Agricultural Society of Scotland.** *Sec.* John Stirton. *Office*, 3 George IV Bridge, Edinburgh.

The **Royal Dublin Society**, founded in 1731, incorporated 1750, for the advancement of agriculture and other branches of industry, and for the advancement of science and art. The Society's work in connection with **agriculture** includes the holding of four shows: show and sale of bulls in February; spring show of breeding cattle, agricultural horses, and agricultural machinery in April; horse and sheep show in August; winter show of fat cattle, farm produce, etc., in December. The agricultural premises at Ball's Bridge occupy 40 acres, and are connected by the Society's branch railway with the railway system of Ireland. The exhibition halls cover an area of nearly 8 acres. The Society has a library of 50,000 volumes, chemical laboratory, lecture theatre, and radium institute at its rooms. *Pres.* Rt. Hon. Lord Rathdonnell; *Hon. Secs.* Sir Joseph M'Grath, LL.D., and E. J. Beaumont-Nesbitt; *Registrar and Chemical Analyst*, Richard J. Moss, F.C.S.; *Librarian and Editor*, A. H. Forde, Ph.D., F.C.S.; *Agricultural Supt.* R. Bruce; *Consulting Botanist*, Sir Frederick W. Moore, M.A.; *Consulting Entomologist*, Prof. G. H. Carpenter, B.Sc. *Offices and Rooms*, Leinster House, Dublin.

The local Chambers of Agriculture (112 in number) in England and Wales are associated with the **Central and Associated Chamber of Agriculture** (*Sec.* Sir Herbert Matthews; *Offices*, 28 Westminster Palace Gardens, Artillery Row, London, S.W.), and concern themselves principally in influencing legislation in the interests of the farmers.

Scotland has its own Chamber, to which 69 local societies are affiliated. *Sec.* Isaac Connell, Solicitor, Supreme Courts, 18 Duke Street, Edinburgh.

The **Smithfield Club (Incorporated).** *Sec.* E. J. Powell. *Office*, 12 Hanover Square, London, W.

The **British Dairy Farmers' Association.** *Sec.* (vacant). *Office*, 28 Russell Square, London, W.C.

The **Bath and West and Southern Counties Society.** *Sec. and Ed.* T. F. Plowman. *Office*, 3 Pierrepont Street, Bath.

The **English Guernsey Cattle Society.** *Sec.* Robert F. Ling. *Office*, 12 Hanover Square, W.

The **Royal Counties Agricultural Society.** *Sec.* Franklin Simmons, Basingstoke.

The **Welsh National Agricultural Society.** *Sec.* T. Whitfield, Talbot Chambers, Shrewsbury.

British Bee-keepers' Association has 41 affiliated Associations, with a membership of 545. *Sec.* W. Herrod-Hempsall. *Office*, 23 Bedford Street, Strand, London, W.C.

British Sugar Beet Council. *Sec.* W. T. Chadwin. *Office*, 28 Westminster Palace Gardens, London, S.W.

Fisheries Organisation Society, Ltd. *Sec.* Henry B. Weston. *Office*, Queen Anne's Chambers, Tothill Street, London, S.W.

The **Royal Agricultural Benevolent Institution** grants pensions to farmers and their wives, widows, and unmarried orphan daughters who have become reduced in circumstances. Income, 1915, £22,423. *Sec.* C. B. Shaw. *Office*, 8 Waterloo Place, Pall Mall, London, S.W.

The **Royal Scottish Agricultural Benevolent Institution.** *Sec.* I. Connell, Solicitor, 18 Duke Street, Edinburgh.

FORESTRY AND AFFORESTATION

Forestry Branches have been constituted in the Board of Agriculture and Fisheries and the Office of Woods. The two departments are closely associated, and are engaged in developing forestry on lines which, in part at least, run in parallel directions. Until the passing of the Development and Road Improvement Funds Act, 1909, the funds available for the improvement of forestry, it may be noted, were very limited. The first **Joint Annual Report of the Branches**, issued in 1914 (further reports are suspended until after the war), introduces, therefore, a certain amount of material of historical interest bearing on the progress of British forestry and the development of the Crown woods. The work of the branches during the year was as follows:—**Education:** Total expenditure for the year, £1,700. Students receiving instruction at Oxford, Cambridge, Bangor, Newcastle, Cirencester, Dean Forest, and Chopwell Woods numbered 139—46 taking a full academic forestry course, and 60 taking forestry as a subsidiary course; 33 of the 139 were woodmen. **Research:** Under the terms of a grant of £1,200 from the Development Fund, work was distributed as follows: Oxford, insect and fungus pests; Cambridge, structure of home-grown timbers; Bangor, seed research; Newcastle, creosote and the preservation of timber. **Surveys:** A rapid survey and report to the Development Commission on some 6,000 acres of land in the catchment area at Lake Vyrnwy was made, as well as a flying survey of an area in Wales extending to 333,000 acres, and containing some 142,000 acres of uncultivated land. The result showed 73,800 acres, or 52%, to be afforestable. Considerable progress was also made in locating and marking down on ordnance sheets the uncultivated land in the country.

FACILITIES FOR INSTRUCTION

In January 1904 the Commissioners of Woods and Forests established a **School of Forestry in the Forest of Dean**, at Parkend. The school is for working youths and men only, between the ages of 20 and 25. The course of instruction extends over 2 years, beginning in October each year, and only 12 students can be admitted each year, preference being given to young men in the Crown employ. Students are paid 15*s.* a week. The **subjects taught** include sylviculture, the protection and management of woodlands, preparation of plans, measurement of timber, felled and standing, forest botany, surveying, and accounts. Applications for admission should be sent to The Deputy Surveyor, Forest of Dean, Whitemead Park, Parkend, near Lydney, Gloucestershire.

A complete course of instruction in scientific and practical forestry is given at **Oxford University**, which grants a diploma in forestry to successful students.

A Reader in Forestry has been appointed by the **University of Cambridge.** A diploma in forestry is now granted, after a course of instruction for two years in theoretical and practical forestry.

The University College of North Wales, Bangor, and Armstrong College, Newcastle-upon-Tyne, offer special advantages as centres of instruction in forestry. There is a school for woodmen at Newcastle. Forestry branches have been added to the Agricultural Colleges at Cirencester and Wye. Forestry instruction is also given at Edinburgh University, and there are lectureships at the three Scottish colleges of agriculture.

The **Royal English Arboricultural Society.** *Pres.* Lord Barnard. *Sec. and Treas.* Edward Davidson, Haydon Bridge, Northumberland.

Royal Scottish Arboricultural Society (instituted 1854). *Pres.* Sir Andrew N. Agnew, Bt.; *Sec. and Treas.* Robert Galloway, S.S.C. *Offices*, 19 Castle Street, Edinburgh.

Irish Forestry Society. *Pres.* Marquess of Headfort. *Hon. Secs.* J. Scott Kerr; Chas. Dawson. *Gen. Sec.* E. Knowldin, 5 Molesworth Street, Dublin.

The **Midland Reafforesting Association.** *Pres.* Sir Oliver Lodge; *Hon. Sec.* P. E. Martineau, The Woodrow, near Bromsgrove; *Organising Sec.* Roland Antrobus, 45 Newhall Street, Birmingham.

UNITED KINGDOM CONSUMPTION OF TIMBER

In 1915 the United Kingdom imported £32,788,324 worth of unmanufactured wood and timber. Of this total, £21,950,587 was sawn or split wood and £1,998,677 was furniture wood (mahogany and other sorts). In addition, there was imported £2,324,624 worth of wood and timber manufactured (including furniture), comprising £163,949 worth of furniture and cabinet ware, and £88,597 worth of joiners' work, including house frames and fittings, and £2,050,275 worth of woodware, turnery, etc.

MINES AND MINERALS OF THE WORLD

COAL

The main sources of the world's coal supply in 1913 were:

	Metric tons.
United States	484,864,901
United Kingdom	287,430,473
Germany	255,810,100
France	41,145,178
Russia	31,296,900
Belgium	22,972,140
Japan	19,639,755

The **total production of coal in the world** in 191 was estimated at about 1,249 million tons, t value of which is estimated at more than 4 million pounds sterling. The world's estimat actual **reserves of coal** are 299,842 million to and the probable and possible reserves 4,029,2 million tons. The estimated reserves for t United Kingdom are 139,225 million tons a 47,262 million tons respectively.

Minerals raised in the United Kingdom duri 1914 were valued at £145,863,032, a decrease

£14,249,635 over 1913. The total **output of coal** was 265,664,393 tons, and the value, £132,596,853. The **average price of coal was** 9*s.* 11·79*d.* per ton, as compared with 10*s.* 1·52*d.* in 1913. The **quantity of coal exported** was 59,039,880 tons. In addition, 3,418,394 tons of coke and manufactured fuel were exported, and 18,535,616 tons shipped for the use of British and foreign steamers engaged in foreign trade, making the total exported 80,993,890 tons, leaving for **home consumption** 184,670,503 tons. Since 1873 the total value of minerals raised amounts to £3,664,980,074, and of this sum coal accounts for £3,083,191,238, or 84·1%. Total coal production, 1873-1914, 8,206,243,000 tons, of which 2,012,796,000, or more than 24½%, has been exported.

In 1914 Ireland produced 8,286 tons of bauxite, 13,384 tons of barium compounds, and 42,005 tons of rock salt; Scotland produced 3,268,435 tons of oil shale. The output of coal in 1915 was 253,179,000 tons. The total amount of coal exported in 1915 was 43,534,560 tons.

GOLD AND SILVER

(See also p. 92)

The output of fine gold in the world in 1915 was of the value of £96,915,000, of which the British Empire supplied some 62%.

The **main sources of supply** were:

	£
Victoria	1,398,000
Western Australia	5,130,000
New Zealand	900,000
Queensland	1,079,000
New South Wales	559,000
Tasmania	100,000
South Australia	36,000
Total, Australasia	9,202,000
United States	20,300,000
Canada	3,900,000
India	2,366.000
West Africa	1,707,000
Transvaal	38,617,000
Rhodesia	3,823.000
Other Countries	17,000,000
Total	£96,915,000

COPPER, ETC.

The total quantity of copper raised in the world in 1915 amounted to 1,061,000 tons, the United States' production being 646,000 tons, Japan 75,000 tons, Mexico 31,000 tons, Canada 47,000 tons, Germany 35,000 tons (possibly), Peru 32,000 tons, and Chile 47,000 tons.

The world's production of other metals in 1915 was: lead, 1,168,000 tons; zinc, 1,017,749 tons; tin, 125,718 tons; nickel, 30,000 tons; quicksilver, 4,200 tons; spelter, 991,000 tons; and aluminium, 70,000 tons (about).

PETROLEUM

The total quantity of crude petroleum entering the world's markets in 1915, which amounted to 426,892,673 barrels of 42 gallons (the United States gallon = ·833 of an Imperial gallon, or 6 United States gallons = 5 Imperial gallons) exceeds the record output of 1914 by 28.194,307 barrels. The bulk of the increase came from the United States and Mexico, although the output in Russia, Japan, and Argentina increased considerably. The following table shows the volume of the output of petroleum in the countries named:

	1915.	
	Barrels of 42 Gallons.	% of Total.
United States	281.104,104*	65·85
Russia	68,548,062	16·06
Mexico	32,910,508	7·71
Dutch East Indies and British Borneo	12,386,808	2·90
Rumania	12.029.913	2·82
British India	7,400.000†	1·73
Galicia	4,158.899	0·98
Japan and Formosa	3,118.464	0·73
Peru	2,487,251	0·58
Germany	995.764	0·23
Trinidad	750,000†	0·18
Argentina	516.120	0·12
Egypt	221,768	0·05
Canada	215.464	0·05
Italy	39.548	0·01
Other countries	10,000	
Total	426,892,673	100·00

* Marketed production. † Estimated.

THE MINERS OF THE UNITED KINGDOM

In the United Kingdom in 1915 there were 953,642 persons employed at 2,871 **coal mines.**

Of this number, 754,673 were employed below ground. Of the 198,969 surface workers, 7,521 were females. The number of young persons under 16 below ground in these mines was 55,984; the total number of surface and underground workers under 16 was 81,671. At **mines other than coal mines** 11,869 worked below ground, and of the 7,962 surface workers 140 were females. There were 62,127 **employed at quarries,** of whom 40,029 worked inside the actual pits or excavations, and 22,098 outside. In coal mines there were 1,297 **deaths** by accidents, in other than coal mines 21 deaths, and in quarries 74 deaths.

In the United States 723,000 persons were employed in coal mines; 643,170 in Germany; 202,000 in France; and 146,000 in Belgium.

IRON AND STEEL

[Owing to the war, it is impossible to ascertain with any accuracy what has been the output of steel and iron of the principal producing countries during the last three years.]

In a report on the extent of the **iron ore resources of the world** which was presented at the eleventh International Geological Congress at Stockholm, it was estimated that the total weight of iron ore existing in deposits which have been more or less developed amounts to 22,408,000,000 tons, repre-

senting 10,192,000,000 tons of iron. This total, even were the present rate of output not exceeded on the average, would only be sufficient to supply the requirements of the world for considerably less than two centuries. The **actual resources** of the principal ore-producing countries are estimated to be, in the United States, 4,258,000,000 tons, the equivalent in metallic iron being 2,305,000,000 tons; in Germany, 3,877,000,000 tons, estimated to yield 1,360,000,000 tons of metallic iron; in the United Kingdom, 1,300,000,000 tons, equal to 455,000,000 tons of metal; in France, 3,300,000,000 tons, equal to 1,140,000,000 tons of metal; and in Spain, 711,000,000 tons, equal to 349,000,000 tons of metal.

In addition to these quantities which are estimated to exist in present workings, the **potential resources** of the world not yet developed are estimated to amount to 123,377,000,000 tons of ore representing 53,136,000,000 tons of iron, the principal deposits being in Russia, the United Kingdom, and the United States.

The **total quantity of pig iron produced in the world** amounted in 1905 to about 53,500,000 tons, and in 1912 to about 72,000,000 tons, the chief producers being the United States, Germany, and the United Kingdom, in the order stated. These countries between them are accountable for about 77% of the whole output.

It is noteworthy that whereas **the output of steel** in Germany has risen since 1908 from 11,006,000 tons to 17,024,000 tons, and in the United States from 14,023,000 tons to 31,251,000 tons, that of the United Kingdom has only risen from 5,389,000 tons to 6,903,000 tons. The steel production in France is stated to have been about 1,611,000 tons more in 1912 than in 1907; that of Austria-Hungary 965,000 tons more; and that of Belgium 978,000 tons more.

The quantity of steel produced by **the open-hearth process** in the United Kingdom (5,274,000 tons) is at present three and a half times that produced by the **Bessemer process** (1,522,000 tons). In Germany, on the other hand, the proportions are reversed, nearly three-fifths of the total production (9·8 million tons) consisting of Bessemer steel. In the United States the production of Bessemer steel is also exceeded by that of steel produced by the open-hearth process, and most of the new plant recently erected in that country is of the open-hearth variety.

Nearly the whole of the German steel is basic steel, the native ores being for the most part such as are suitable for the Gilchrist-Thomas process. Nine-tenths of the open-hearth steel produced in the United States is basic steel, whereas the entire output by the Bessemer process is acid steel. In the United Kingdom for various reasons acid steel is much in demand, and most of the steel produced, whether by the Bessemer or open-hearth process, is acid steel.

The large **importation of iron ores** (nearly one-third of the total quantity smelted) by this country is determined to a great extent by this demand, the greater part of the ores raised in the United Kingdom, with the exception of those obtained from Cumberland and Lancashire, containing too large a percentage of phosphorus to be available for the acid process.

PRODUCTION AND CONSUMPTION OF PIG IRON

The following figures are taken from the last available Parliamentary Return drawn up by the Board of Trade and published in 1914 (further figures will not be published until after the war).

Years.	Total Average Production. Tons Avoirdupois.	Per head. Cwts.	Total Average Consumption. Tons Avoirdupois.	Per head. Cwts.

TEXTILE INDUSTRIES

THE OUTPUT OF THE LOOMS AND SPINDLES OF THE WORLD

This article is devoted to the special treatment of the textile industries, with a view to affording some indication as to their general progress. No attempt is made to discuss in detail the ramifications of each section of these industries, but attention is mainly confined to two important aspects:

1. The sources of supply of raw material.

2. The production of trade in manufactured goods in this country, contrasted with that of our principal competitors.

It does not appear that any attempt to present such figures as this article does in a concise form, has been made before; and the compilation of these tables has involved a good deal of special investigation of official records, British and foreign. The particulars given below, it is hoped, will enable the reader to grasp the important and salient points connected with **this branch of industry, the most important** of any existing **in this country** from the point of view of its foreign trade; it must, however, be noted that the conditions prevailing through the war alter vitally the perspective of peace time.

COTTON

Out of an **annual crop** now ranging between 19,000,000 and 21,000,000 bales, the United States furnishes on the average about two-thirds. India is responsible for a further average amount of 3,500,000 bales (of which, however, nearly half is consumed in that country itself), and the remainder is not of sufficiently high quality to be available for most manufacturers. Egypt produces another 1,400,000 bales, and a further 1,000,000 is derived from various parts of the world.

The following table sets out the American and other crops at various dates during the past 20 years, and the takings of British, Continental, and American manufacturers respectively. It may be noted that prior to the past year, for over half a century, the statistics were compiled to cover the twelve months ending Aug. 31. It has now been decided to end the cotton year with July, so that the figures for 1914-15 are on a slightly different basis from those for previous years.

Production and Consumption of Cotton

	1884-5.	1894-5.	1904-5.	1914-15.
	1,000 Bales.	1,000 Bales.	1,000 Bales.	1,000 Bales.
Production—				
United States	5,136	9,640	13,420	14,766
Other countries	2,101	2,978	4,464	4,777
Total	7,237	12,618	17,884	19,543
Consumption—				
Great Britain	2,746	3,250	3,620	3,000
Continent	2,604	4,030	5,148	3,250
United States	1,527	2,743	4,310	5,806
Other countries	567	1,520	2,534	3,861
Total	7,444	11,543	15,612	16,917

It is important to note that owing to the existence of war in 1914-15, the world's consumption of cotton has so decidedly fallen off as to leave a large surplus of production. This is clear from the following comparison of consumption for 1913-14 with that of 1914-15, both years' figures being for the twelve months ending with July, so that in one case the war was practically without effect, while in the other it was continuously in progress:

	1913-14 1,000 Bales.	1914-15 1,000 Bales.
Great Britain	4,300	3,000
Continent	6,000	3,250
United States	5,680	5,806
Other countries	3,878	3,861
Total	19,858	15,917

Two additional tables will further elucidate the real position. The first shows the amount of the American cotton crop over a series of years:

AMERICAN COTTON CROP

	1,000 Bales.		1,000 Bales.
1883–4	5,714	1910–11	12,132
1893–4	7,527	1911–12	16,043
1899–1900	9,439	1912–13	14.128
1905–6	11,320	1913–14	14,494
1907–8	11,582	1914–15	14,766
1909–10	10,651	1915–16	15,917

American home requirements have on the whole very greatly increased, as will be obvious from the following figures of

AMERICAN COTTON TAKEN FOR CONSUMPTION

Year ended Aug. 31.	Northern Mills.	Southern Mills.	Total.
	Bales.	Bales.	Bales.
1896	1,660,271	904,701	2,504,972
1898	2,211,740	1,231,841	3,443,581
1900	2,068,300	1,597,112	3,665,412
1902	2,050,774	1,937,971	3,988,745
1904	2,137,369	2,007,509	4,144,878
1906	2,453,498	2,398,404	4,852,352
1908	2,007,422	2,234,395	4,241,817
1910	2,265,414	2,267,358	4,532,772
1911	2,214,180	2,369,827	4,584,007
1912	2.587,858	2,622,056	5,209,914
1913	2,681,804	2,849,524	5,531,328
1914*	2,701,479	2,978,533	5,680,012
1915*	2,768,415	3,037,280	5,805,695

* Year ended July 31.

The significance of the second table lies in the increasing superiority of the Southern mills, the output of which first exceeded those of the Northern in 1908. The margin has since steadily increased

Position of British and Foreign Cotton Manufacturers

In this connection it is interesting to form some idea of the **relative position of British and foreign cotton manufacturers at different dates.** The following estimate has been prepared by the *New*

York Chronicle, giving the number of spindles at various periods during the past 44 years.

THE WORLD'S COTTON SPINDLES

	U.K.	Continent.	U.S.	Other Countries.	Approximate Total.
	Million spindles.	Mil. spin.	Mil. spin.	Mil. spin.	Mil. spin.
1870 .	37¾	13	7	—	57¾
1880 .	44½	21	10½	2	78
1890 .	44½	26	14	4	88½
1900 .	46	32	19	7	104
1905 .	48½	35	24	8½	116
1910 .	56	39	29	10	134
1911 .	56	41	29	11	137
1912 .	57	42	30	11	140
1913 .	57	43	31	11	142
1914 .	57	43	32	12	144
1915 .	57	43	32	12	144

It is evident from these figures that the output power of the world was stationary in 1915. That of the United Kingdom, though it is still much larger than in any other part of the world, has not expanded for several years past, and that of the Continent very little. In normal times, however, this has not prevented a steadily increasing demand for the raw material, so that equilibrium between them will be difficult to maintain when the war has ceased, and the consumption of cotton automatically increases with the growth of the world's population. No effective remedy can be looked for apart from a considerable growth in production, and it is therefore important to consider what prospects there are of such a development.

United States Cotton Supplies Decreasing

Naturally attention must first be directed to the **probability of a larger output from the United States,** which is now and will probably remain the chief and most important source of supply, because the quality there is superior to that of any other part of the world. It cannot be said that the outlook in this connection is very hopeful. While a larger area is being planted in the United States, every year, the yield per acre has on the whole decreased. The causes of this seem to be in the main two: (1) There has been great industrial expansion, chiefly in the Southern States, during the past fifteen years, and this has rendered the supply of coloured labour smaller and more precarious; (2) it seems probable that the soil itself in the older plantations has become less productive, owing to exhaustion. Though it is true that some American authorities contend that there are vast fields in the Southern States, and especially in Texas, suitable for the production of cotton, which have not yet been brought under cultivation, and that America may still be relied upon to furnish the world's needs, this is a possibility rather than a probability.

Cotton Manufactures in various Countries

The table already given of the spindles of the world furnishes a rough guide as to the progress of the industry in various countries. A further test of the progress of the chief nations concerned is to be found in the export figures. Taking **cotton yarn** first, the following are the particulars of the exports of this country, Germany, and France during the past 14 years. Statistics for the two latter countries for 1914 and 1915 are not available.

VALUE OF EXPORTS OF COTTON YARN

	United Kingdom.	Germany.	France.
	(£1,000.)	(£1,000.)	(£1,000.)
1902 .	7,404	1,585	127
1903 .	7,407	1,625	182
1904 .	8,955	1,492	270
1905 .	10,318	1,705	759
1906 .	11,836	1,605	732
1907 .	15,417	1,895	754
1908 .	12,844	1,825	388
1909 .	11,822	2,450	400
1910 .	13,338	2,740	600
1911 .	15,663	2,960	645
1912 .	16,223	3,205	671
1913 .	15,007	3,055	904
1914 .	11,973	—	—
1915 .	10,314	—	—

British trade is very much larger than that of the other two countries put together, but it will be seen that it has shown a fluctuating tendency for some time past, while that of both Germany, statistics for which are of course not available for 1914 and 1915, and France has been improving on the whole. This, however, reflects no discredit upon British producers. Owing to a number of favourable circumstances they practically had a monopoly for many years; and that that monopoly has now disappeared, though a preponderating share still remains, merely indicates that their rivals have surmounted the difficulties which earlier they had to encounter.

As regards **cotton manufactures,** figures can be given relative to four countries, though it should be explained that with regard to the United States the statistics include cotton yarn. French and German statistics for 1914 and 1915 are not available.

VALUE OF EXPORTS OF COTTON PIECE GOODS

	United Kingdom.	Germany.	United States.	France.
	(£1,000.)	(£1,000.)	(£1,000.)	(£1,000.)
1901 .	65,708	10,990	4,054	7,054
1902 .	65,054	12,960	4,702	7,042
1903 .	55,267	13,181	5,543	7,238
1904 .	64,078	16,085	5,495	8,398
1905 .	70,821	19,010	9,333	10,181
1906 .	75,372	19,625	10,589	12,269
1907 .	81,048	21,600	6,461	14,088
1908 .	70,231	17,510	5,237	11,768
1909 .	68,280	16,085	6,376	13,279
1910 .	78,685	18,255	6,679	13,126
1911 .	90,513	19,495	8,172	13,354
1912 .	91,624	21,080	7,350	15,389
1913 .	97,820	22,325	9,611	14,697
1914 .	79,183	—	10,293	—
1915 .	64,691	—	9,283	—

WOOL

While cotton is only grown in semi-tropical countries, wool is mainly a product of temperate regions. The sheep is, however, an animal which can live under very varied climatic conditions, so that there are few countries of the world, except in the immediate regions of the Equator and the Arctic circles, where wool is not produced in fair quantities. The Australian merino, which is particularly fine and soft, now bulks largest in the imports, but South America is a good second to Australia as a wool-growing

The New HAZELL, 1917

country. The atmospheric and pasturage conditions of South Africa, however, promise for it a great future as a foremost wool-producing country. Its use as a material for producing wearing fabric is, however, almost confined to the temperate regions, and it is from them that the world's supplies are mostly obtained. In a great many countries using wool freely for manufacturing purposes, the home supply is an important element, and even in Great Britain nearly a seventh of the quantity used is obtained from the British farmer. Under present conditions of cheap transit, however, the breeding of sheep is most economically and efficiently carried on where good grazing land is to be had very cheaply, and hence **the world's sources of supply** are, apart from domestic production, mainly from new and only partially developed countries. The relative importance of the different sources of supplies may be seen from the following table. No figures are given for 1914 and 1915, as, owing to war conditions, they would be of little value.

Imports into Europe and North America of Extra European Wool

	Australasian.	Cape.	River Plate.	Other sorts.	Total.
	1,000 Bales.	1,000 Bales.	1,000 Bales.	1,000 Bales.	1,000 Bales.
1900 .	1,437	131	396	455	2,419
1901 .	1,719	214	533	395	2,861
1902 .	1,654	245	468	427	2,794
1903 .	1,442	229	538	480	2,689
1904 .	1,423	206	443	518	2,590
1905 .	1,693	219	448	520	2,880
1906 .	1,750	229	442	626	3,047
1907 .	2,190	306	474	581	3,551
1908 .	1,971	291	476	435	3,173
1909 .	2,328	400	482	626	3,836
1910 .	2,442	361	435	593	3,831
1911 .	2,500	382	467	587	3,936
1912 .	2,463	463	497	430	3,853
1913 .	2,296	484	437	503	3,720

It may be noted that, although European imports do not cover the whole of the demand, they do cover the great bulk of it. Not much wool is imported into the United States, and in other parts of the world in which woollen industries exist on a limited scale, the manufacturers are dependent upon the domestic supply.

The foregoing table shows the **immense predominance of Australasia as a wool producer.** In good years it is responsible for about two-thirds of the whole imports into Europe, and even in poor years the proportion exceeds one-half. This point needs to be insisted upon, for it is the key to the whole question of supply—an important one at the present moment, because, as in the case of cotton, there is liable to be **a dearth of wool,** the significance of which is that the industries dependent upon it are materially affected. A further examination of the table reveals **the cause of that dearth.** It was the prolonged drought in Australia which decimated the flocks of sheep and caused wool supplies to shrink very considerably. There is, however, this important difference between the scarcity of wool and that of cotton—that the animal product is scarce temporarily only. Australian supplies have now regained, and even exceeded, the level of the years before the drought. Irrigation on a large scale will probably minimise the danger of drought, and an average equality between imports and requirements may safely be calculated upon. Even in the improbable event of supplies from Australia being permanently diminished, a stimulus would be given to production elsewhere, so that in time the balance would be redressed, however inconvenient might be the consequences meanwhile. The problem thus presented by wool is therefore of a comparatively insignificant character, compared with that of cotton. It may be noted, however, that it is of special importance to the United Kingdom, inasmuch as it consumes about two-thirds of the total European imports of Australasian wool. River Plate wool is mainly used on the Continent, and supplies from thence do not show on the whole an increasing tendency.

Importation of Colonial Wool

A broad survey of the expansion in Colonial wool supplies during the last half-century, and of the variations which have taken place in prices, is shown in the following table, which gives the imports of Colonial wool into England and America :—

Year.	Australasian Bales.	Cape Bales.	Total Colonial Bales.	Average value per bale. £ s. d.	Total value. £
1860 . .	187,000	79,000	266,000	25 15 0	6,850,000
1870 . .	546,000	152,000	698,000	16 15 0	11,691,000
1880 . .	869,000	219,000	1,088,000	20 5 0	22,032,000
1885 . .	1,094,000	188,000	1,282,000	14 0 0	17,948,000
1890 . .	1,411,000	288,000	1,699,000	14 15 0	25,060,000
1895 . .	2,001,000	269,000	2,270,000	11 0 0	24,970,000
1900 . .	1,456,000	140,000	1,596,000	13 10 0	21,546,000
1904 . .	1,371,000	201,000	1,572,000	14 10 0	22,794,000
1905 . .	1,633,000	209,000	1,842,000	15 15 0	29,011,000
1906 . .	1,833,000	238,000	2,071,000	17 0 0	35,207,000
1907 . .	2,103,000	287,000	2,390,000	16 5 0	39,435,000
1908 . .	2,072,000	276,000	2,348,000	13 5 0	31,111,000
1909 . .	2,296,000	380,000	2,676,000	15 0 0	[illegible]
1910 . .	2,411,000	377,000	2,788,000	16 5 0	45,305 [illegible]
1911 . .	2,524,000	376,000	2,900,000	15 0 0	43,500 [illegible]
1912 . .	2,463,000	463,000	2,926,000	15 0 0	[illegible]
1913 . .	2,296,000	484,000	2,780,000	16 10 0	[illegible]
1914 . .	2,332,000	499,000	2,831,000	17 0 0	[illegible]

The New HAZELL. 1917

It will be seen that imports of Australasian wool were steadily progressive until they reached a maximum in the year 1895, at which time the cost was the lowest on record up to date. Since then, with fluctuations, due to market causes, into which it is not now necessary to enter, imports declined until 1904, since when there has again been, though with some fluctuations, an upward movement, and the total of 1895 has now for seven years been exceeded. Prices have risen considerably during recent years, as consumption is on the whole increasing with the growth of the world's population. In all industries connected with wool, high prices tend considerably to check the demand for manufactured goods. While woollen fabrics are necessarily used in most temperate climates, the consumer can economise by wearing garments longer and by buying them of cheaper material. This is important to bear in mind in connection with tables given later, relative to exports of woollen goods.

Consumption of Wool in the United Kingdom

As showing how production in the United Kingdom has been affected by the scarcity or abundance of supplies, the following table is of interest:—

Average.	Domestic Clip (Estimated).	Imports.	Exports.	Left for Home Cons'p'n.
	Mil. lb.	Mil. lb.	Mil. lb.	Mil. lb.
1861–70 .	150	220	87	283
1871–80 .	156	381	186	351
1881–90 .	134	578	322	390
1891–95 .	146	744	399	491
1896–1900	139	701	318	522
1901–5 .	134	656	313	477
1908 .	134	755	365	524
1909 .	142	848	454	536
1910 .	143	843	373	613
1911 .	136	832	353	633
1912 .	133	837	360	610
1913 .	125	826	353	573
1914 .	130	990	182	838

It will be seen that the quantity left for home consumption is, on the whole, gradually decreasing, owing to concentration of labour in urban districts, and to increasing supplies from abroad.

Exports of Woollen and Worsted Yarn

	United Kingdom.	Germany.	France.
	£1,000.	£1,000.	£1,000.
1902 .	3,531	3,125	1,371
1903 .	4,198	2,956	1,410
1904 .	4,209	3,286	1,235
1905 .	4,244	3,176	1,659
1906 .	5,340	2,955	2,134
1907 .	5,758	3,765	2,806
1908 .	4,609	3,305	1,905
1909 .	5,004	3,010	2,799
1910 .	4,967	3,875	3,048
1911 .	5,933	4,405	3,154
1912 .	5,314	4,210	3,541
1913 .	4,994	4,530	3,859
1914 .	3,420	—	—
1915 .	1,989	—	—

This being the broad position as regards supply and demand for the raw material, it is now of interest to see **how different countries are faring in the matter of exports.** The preceding table gives the exports of woollen and worsted yarn from the United Kingdom, Germany, and France respectively. For 1914 and 1915 figures for the two latter countries are not available.

The United Kingdom still remains the largest exporter of the three, but it is noticeable that its relative importance has seriously diminished during the period covered by the table; while both Germany and France, especially the former, have improved their position, and until recently it seemed not improbable that in a few years the United Kingdom would lose the leading place. The restrictions imposed by the necessities of the war on the export of wool and the purchase of the domestic clip by the Government would seriously modify the tables. The reason for the increase of foreign competition is that yarn being a comparatively simple form of manufacture, any superiority British manufactures originally possessed in its production has now practically ceased.

Exports of Woollen and Worsted Manufactures

Turning to the **exports of woollen and worsted manufactures,** the following table includes the same three countries as in the last table, with the addition of the United States. French and German figures for 1914 are not available. As regards the last named, however, the figures include yarn as well as piece goods.

	United Kingdom.	Germany.	France.	United States.
	£1,000.	£1,000.	£1,000.	£1,000.
1902 .	15,261	13,345	8,810	302
1903 .	15,864	12,075	8,735	344
1904 .	17,993	12,480	8,412	398
1905 .	19,597	14,685	7,736	419
1906 .	20,585	13,310	8,957	424
1907 .	22,154	14,275	9,820	444
1908 .	19,154	12,935	7,844	394
1909 .	20,646	12,775	8,483	473
1910 .	25,080	13,165	8,500	474
1911 .	25,338	13,120	7,680	459
1912 .	26,064	12,670	7,627	507
1913 .	25,987	13,545	8,450	740
1914 .	22,822	—	—	958
1915 .	27,862	—	—	1,079

Here again the **British have a superiority,** but here also of later years the Germans are running them more and more closely in the race—though a considerable portion of their gain so far has been at the expense of France. United States exports have improved largely in percentages, but are still on a small scale, as the high duties on wool and all classes of machinery until recently hampered the export trade very considerably. It will be noticed that in nearly all the countries considerable fluctuations occur from year to year, and this leads to an important point which deserves emphasis—that **this trade largely depends upon fashion** as well as on the cost of the raw material and on general trade conditions. With all allowances however, it would appear as if British manufacturers were not adequately holding their own against foreign competitors. The Germans have

shown great ability for a great many years past to produce cheap goods with a good appearance, and it is this fact, no doubt, which has largely enabled them to develop their export trade, though whether they will be able to retain it seems at present rather doubtful. The **speciality of France** in this branch of manufacture is the production of very high-class goods, the demand for which is, on the whole, of decreasing quantity. **British superiority** is in medium qualities, and this is fairly well maintained, though there is no reason why more should not be done in other directions.

JUTE

The supplies of jute are mainly derived from India, and the crop of course varies from year to year. Nearly the whole jute area in British India lies in Bengal. The estimated yield of jute in 1908-9 was, as will be seen from the table below, much under the average, but there has since been decided improvement. The total consumption of the whole world is estimated from 9,000,000 to 10,000,000 bales, of which nearly half are used in India itself. This is an increase of about 40 per cent. as compared with 1904. The jute industry is now a very important economic factor in British India. The following are particulars for the past ten years of the

Indian Jute Crop

1906–7	9,860,000 bales.
1907–8	6,187,500 ,,
1908–9	6,310,800 ,,
1909–10	8,818,000 ,,
1910–11	7,954,000 ,,
1911–12	9,426,000 ,,
1912–13	9,843,000 ,,
1913–14	9,775,000 ,,
1914–15	10,531,500 ,,
1915–16 (estimated)	7,095,000 ,,

As regards manufactures of jute, they form one of the smallest textile industries in the United Kingdom. As will be seen from the following table, Great Britain has an immense superiority over the only important European rival, France; but here again it is hardly satisfactory that while British shipments tend on the whole to decrease, those of France are growing in magnitude.

Exports of Jute Yarn and Manufactures

	United Kingdom.	France.
	£1,000.	£1,000.
1902	2,438	442
1903	2,579	460
1904	2,531	549
1905	2,680	617
1906	3,463	804
1907	3,980	786
1908	2,860	450
1909	2,250	481
1910	2,217	607
1911	2,261	657
1912	2,676	948
1913	3,332	1,004
1914	2,753	—
1915	2,542	—

LINEN

The United Kingdom does a satisfactory export trade in linen goods, the industry in the north of Ireland being particularly important, and the business tends on the whole to increase. The chief rival is France, whose trade is now much larger proportionately than it was a few years ago, though it is still insignificant as compared with British trade, and it has also to be borne in mind that the French figures include hemp exports.

Exports of Linen Yarn and Manufactures

	United Kingdom.	France.
	£1,000.	£1,000.
1902	5,430	1,477
1903	5,540	1,203
1904	5,732	1,681
1905	6,340	1,627
1906	7,001	2,033
1907	7,345	2,414
1909	7,545	2,189
1910	8,280	2,049
1911	7,842	2,090
1912	8,416	2,193
1913	8,247	2,973
1914	7,689	—
1915	7,133	—

THE RUBBER INDUSTRY

Though the rubber industry is not a new one, the advent of motors has so changed the trade as to make it practically a modern enterprise. Up to 1875, or thereabouts, about 5,000 tons of caoutchouc sufficed for the world's requirements, and this moderate quantity was manipulated and turned into the manufactured article by a hundred and fifty rubber factories in Europe and America. The **raw material** came chiefly from South America, where it was collected from the native forests, and the idea of supplementing the quantity by cultivated rubber existed in the minds of few people. The estimated **annual consumption of rubber,** owing to the development of the electrical industry and introduction of motor and cycle tires, is now about 120,000 **tons** and to meet such a demand the rubber tree is being cultivated in every part of the tropical world suitable for its culture, as rapidly as can be done. Public companies have acquired and developed rubber estates in Ceylon, Java, Samoa, the Malay States, the Straits Settlements, and Africa. Of late the price of rubber has risen somewhat, after a considerable fall, but as many of the plantation companies have been able to reduce working expenses, the present tendency of profits and dividends is in the direction of increase. The ultimate outlook is that the demand will expand at least as fast as the supply. No substitute, which can be applied equally well to all the purposes for which rubber is used, has yet appeared upon the market, but in any case the margin of profit on natural rubber ought to be large enough to allow of a diminution of price and yet attract capital. The **various forms of rubber made** are sheet, biscuit, crepe, worm, lace, flake, and scrap rubber. The importation of raw rubber into the United Kingdom averaged for the years 1898–1904 some 450,000 cwt., but the figures for 1915 show an importation of 1,802,256 centals of 100 lb., valued at £19,690,231.

MERCANTILE MARINE OF THE WORLD

THE WORLD'S STEAMSHIPS AND SAILING-VESSELS, 1916
THE WORLD'S SHIPBUILDING, 1915, AND (U.K.) 1915–16
BRITISH SHIPPING AND SHIPBUILDING

[Much of the following information has been obtained from the Register Book and the annual Shipbuilding and Wreck Returns published by the Committee of Lloyd's Register of Shipping. The extended information hitherto given in the ANNUAL is not, in the public interest, published for 1916.]

The total number of **steamships and sailing-vessels** of the world, of 100 tons and upwards in the Register Book issued July 1, 1916, was 30,167, of 48,683,136 tons.
The number of **steamships** was 24,132, having a gross tonnage of 45,247,724.
The number of **sailing-vessels** was 6,035, with a net tonnage of 3,435,412.

* Lloyd's Register Book does not include vessels trading on the Caspian Sea nor *wooden* vessels trading on the Great Lakes of North America.

† In the absence of satisfactory information, the records of numerous small sailing-vessels (belonging chiefly to Greece, Turkey, Southern Russia, and the Dutch East Indies) are omitted from the Register Book.

‡ Japanese sailing-vessels are not recorded in Lloyd's Register Book.

THE WORLD'S SHIPBUILDING, 1915

The following table shows the number of merchant and other vessels (not warships) of 100 tons and above launched in the United Kingdom and abroad during 1915, excluding enemy countries:

Country.	Merchant Vessels, etc.	
	No.	Gross Tons.
United Kingdom	327	650,919
British Colonies	31	22,014
British Total	358	672,933
*America, United States of	84	177,460
Denmark	23	45,198
France	6	25,402
Holland	120	113,075
Italy	30	22,132
Japan	26	49,408
Norway	59	62,070
Other Countries	37	33,960
Foreign Total	385	528,705
World's Total	743	1,201,638

* Of the mercantile tonnage of the U.S.A., a considerable portion (10 vessels of 37,825 tons) were built for service on the Great Lakes.

Of the total output in the United Kingdom, over 85%, or 554,803 tons, has been built for registration in the United Kingdom.

The amount of tonnage launched for other countries during 1915 was 96,116 tons, forming about 14¾% of the total output, as compared with an average percentage of 22½ for the previous five years.

Of the vessels launched during 1915, 378 of 874,775 tons (including 91 vessels of 299,743 tons launched outside the United Kingdom) have been built under the Society's inspection with a view to classification in Lloyd's Register Book.

SHIPBUILDING RETURNS, 1916

At the close of the quarter ended Sept. 30, 1916, there were 469 merchant vessels, of 1,789,054 tons gross, under construction in the United Kingdom, divided as follows:

Steam, 465 ships; tonnage, 1,788,162
Sail, 4 „ „ 892

MERCANTILE MARINE OF THE WORLD AT THE OUTBREAK OF THE WAR

The number and tonnage of steamers and sailing-vessels of 100 tons gross and upwards of the mercantile marine of the various countries at the outbreak of the war was as follows:

Country.	Number.	Total Tonnage (Gross for Steamers, Net for Sailing-vessels).
British Empire:		
United Kingdom	9,214	18,696,237
Colonies	2,073	1,735,306
France	1,552	2,201,164

Numbers of Seamen

The number of persons employed in vessels (registered under Part I. of the Merchant Shipping Act, 1894) belonging to the United Kingdom, which were returned as employed in the home and foreign shipping trade, exclusive of vessels employed on rivers and in inland navigation, was:

	1900.	1909.	1912.	1913.
British	174.532	198,474	208,635	212,570
Lascars and Asiatics	36,023	43,960	30,960	46.848
Foreigners	36,893	31,873	47,211	32,639
Total	247,448	274,307	286,806	292,057

The number employed in sailing vessels is 17,783 and in steamers 269,023; 205,960 are employed in vessels engaged in the foreign trade, 70,622 in the home trade, and 10,244 in vessels partly engaged in both.

The *number of British seamen in British ships* in '93 was 186,628. From '93 to 1901 the number steadily declined to 172,912; then it began to rise again, and reached the highest figure yet recorded, 212,570, in 1913.

The Year's Shipping, 1915

The tonnage of vessels entered at ports in the United Kingdom from foreign countries and British possessions, *with cargoes*, during 1915, amounted to 33,725,717 tons, and the tonnage cleared to 39,529,362 tons, as against 43,060,783 tons entered, and 55,968,569 tons cleared, during 1914, With regard to the coasting trade, the tonnage entered, *with cargoes*, during 1915, amounted to 27,464,917 tons, and the tonnage cleared to 27,277,569 tons, as against 36,001,235 tons entered and 35,782,797 tons cleared in 1914.

SAFETY OF LIFE AT SEA

The International Conference on Safety of Life at Sea, which was convened by the Government in the autumn of 1913, adopted in January 1914 a Convention for recommendation to the various Powers taking part in it. Signatures were affixed by the Plenipotentiaries of the following States:—The British Empire (including Canada, Australia, and New Zealand, which were separately represented), Germany, France, the United States of America, Austria-Hungary, Italy, Spain, Sweden, Norway, Holland, Belgium, and Denmark.

The recommendations of the Convention, which were summarised in the ANNUAL for 1915, were embodied in a Bill (Merchant Shipping (Convention) Bill), which received the Royal Assent on Aug. 10, 1914, and were to have taken effect on July 1, 1915, but by Orders in Council were postponed from coming into operation until Jan. 1, 1917.

STEAMSHIP COMPANIES *

(See also **Index Guide**, pp. 570-571.)

The following list gives the principal companies sailing from London and other ports, as well as the countries and ports to which they sail (from particulars supplied by the companies):

1. **Aberdeen Line** (Geo. Thompson & Co., Ltd., 7 Billiter Square, E.C.). Sailings: from *London* to Australia via Cape Town.

2. **African Steam Ship Co.**, 23 Billiter St., E.C. Sailings: weekly from *Liverpool* to Sierra Leone, Gold Coast, Southern and Northern Nigeria.

3. **Allan Line Steamship Co., Ltd.** (Royal Mail Service to Canada), 14 Cockspur St., S.W., and 103 Leadenhall St., E.C. Sailings: from *Liverpool* to Quebec, Montreal, St. John (7 days); from *Glasgow* to Quebec, Montreal, and Halifax (8 days); to Boston (9 days); from *London* to Quebec and Montreal (10 days); to St. John (10 days); and also from *Havre* to above Canadian ports (9 days).

4. **American Line**, 38 Leadenhall St., E.C.;

* The sailings must be taken as dependent upon the war; in several cases the sailings are temporarily suspended, but will be resumed when the war is over.

1 Cockspur St., S.W., London; Canute Road, Southampton; and 30 James St., Liverpool (Head Office). Sailings: United States Mail Service from *Liverpool* to New York every Saturday (from New York every Saturday); passenger and cargo service from *Liverpool* to Philadelphia.

5. **Anchor Line (Henderson Bros.), Ltd.,** 4 St. Mary Axe, E.C. Sailings: *Liverpool* to Bombay and Calcutta, calling at Gibraltar and Port Said (average passage, 22 and 28 days respectively); *Glasgow* to New York (average passage, 8 days); also from the Mediterranean to New York. See also **Brocklebank Line.**

6. **Anglo-American Oil Co.,** 36–38 Queen Anne's Gate, Westminster, S.W. Vessels engaged exclusively in the bulk oil business.

7. **Anglo-French Transit Co.** (Worms & Cie.) (Agents, Browne, Geveke & Co. Ltd., 3 Lloyds Avenue, E.C.). Sailings: regularly from *Bristol*, *Newport*, and *Swansea* to Havre and vice versa.

8 **Anglo-Saxon Petroleum Co., Ltd.,** 21 Bury St., St. Mary Axe, E.C. Vessels solely for the carriage of oil either in bulk or packed for their own business.

9. **Argo Steamship Co.,** 4 Lloyds Avenue, E.C. Sailings: suspended during the war.

10. **Atlantic Transport Co., Ltd.,** 38 Leadenhall St., E.C.; 1 Cockspur St., S.W. Sailings: from *London* to New York every Saturday (average passage, 9 days), first-class passenger steamers only; fortnightly to Philadelphia and Baltimore.

11. **Batavier Line,** Custom House and Wool Quays, Lower Thames St., E.C. Sailings: daily from *London* to Rotterdam.

12. **Ben Line** (agents, Killick, Martin & Co., 7 Fen Court, Fenchurch St., E.C.). Sailings: from *London* fortnightly to the Straits Settlements (35 days), Siam (40 days), Hong-Kong (40 days), and Japan (53 days).

13. **Bennett Line,** Chamberlain's Wharf, Tooley St., London Bridge, S.E. Sailings: frequent sailings, cargo only, *London* to Boulogne; also from *Goole* to Boulogne.

14. **Bibby Line** (Bibby Bros. & Co.), 10 and 11 Mincing Lane, E.C. Sailings: from *Liverpool* via Marseilles and Port Said to Colombo and Burma (Rangoon) (average passage, 30 days).

15. **Birt, Potter & Hughes, Ltd.,** 2 Fenchurch Avenue, E.C. (See **Federal Steam Navigation Co., Ltd.**).

16. **Booth Line,** 11 Adelphi Terrace, Strand, W.C. (Head Office: Tower Building, Water Street, Liverpool). Sailings: from *Liverpool* at regular intervals for the River Amazon, calling at Continental ports including Havre, Vigo, Oporto, Lisbon, and Madeira. A service of intermediate steamers from *Liverpool* to Maranham and other Brazil coast ports, also between *Liverpool* and *New York* to Iquitos. A regular service of steamers is run between New York, Barbados, and the Amazon.

17. **Bowring, C. T. & Co., Ltd.,** Winchester House, Old Broad St., E.C. Steamers trade in all directions, but with no regular sailings nor time-tables.

18. **The British and African Steam Navigation Co., Ltd.,** Colonial House, Liverpool. Sailings: from *Liverpool* with a regular express service to Sierra Leone, Gold Coast, Southern and Northern Nigeria.

19. **British India Steam Navigation Co., Ltd.,** 122 Leadenhall Street, E.C. Sailings: between *London* and ports in India, Australia, and East Africa, and between ports in India, Persian Gulf, Australia, China, Japan, and East and South-east Africa.

20. **Brocklebank Line,** in conjunction with the **Anchor Line** (*q.v.*). Sailings: from *Glasgow* and *Liverpool* to Calcutta direct every 10 days.

21. **Bucknall Steamship Lines, Ltd.** (See **Ellerman & Bucknall Steamship Co., Ltd.**)

22. **Cairns, Noble & Co., Ltd.,** 44–46, Leadenhall St., E.C. (Head Office, Akenside House, Newcastle). Sailings: from *Leith*, *Newcastle*, *Middlesbro'*, and *Hull* at fortnightly intervals to Montreal and Portland (Maine). Also monthly from *Calais* (Office, 6 Rue de Moscou, Calais).

23. **Canadian Northern Steamships, Ltd.** The vessels of this line have been transferred to the Cunard Line (*q.v.*).

24. **Canadian Pacific Railway Co.,** 62–65 Charing Cross, S.W. Sailings: from *Liverpool*, *London*, *Glasgow*, and *Bristol* to Quebec, Montreal, Halifax, and St. John (7 days); sailings also from *Vancouver*, *B.C.*, to Yokohama, Kobé, Nagasaki, Manila, Shanghai, Hong-Kong, and by Canadian-Australasian S.S. Line from Vancouver to Honolulu Suva, Auckland, and Sydney (*see* advt. p. 847).

25. **Chargeurs Réunis** (agents, Hackett, Ausender & Co., 19 St. Dunstan's Hill, E.C.).

26. **China Mutual Steam Navigation Co.,** in conjunction with the **Ocean Steamship Co., Ltd.** (*q.v.*).

LLOYD'S

(Royal Exchange, E.C.)

This world-famous institution takes its name and derives its origin from a coffee-house established in Tower Street by one Edward Lloyd towards the end of the 17th century, and removed in 1692 to the corner of Lombard Street and Abchurch Lane. In 1773 the brokers and underwriters frequenting the house, to the number of 79, took rooms on the north-west side of the Royal Exchange, where ever since this great institution has been established. In 1870 an Act of Incorporation was applied for, and obtained in 1871. This Act has been partly repealed and amended by a further Act obtained in 1911 under which the objects of the Society are defined as : "The carrying on by members of the Society of the business of insurance of every description, including guarantee business ; the advancement and protection of the interests of members of the Society in connection with the business carried on by them as members of the Society and in respect of shipping and cargoes and freight and other insurable property or insurable interests or otherwise ; the collection, publication, and diffusion of intelligence and information ; the doing of all things incidental or conducive to the fulfilment of the objects of the Society." To carry out the third object Lloyd's has a staff of about 1,500 agents in all parts of the world constantly reporting to headquarters, where clerks are employed both day and night.

Lloyd's also maintains **an extensive system of signal stations** for reporting vessels, etc., which is of great benefit to the shipping community. **An inquiry office** is also maintained, where the relatives of crew or passengers may obtain, without cost, information concerning the movements of the vessel in which they are interested. In addition to "**Lloyd's List**" (with which is incorporated the *Shipping and Mercantile Gazette*), published daily, the Corporation publish "**Lloyd's List Weekly Summary**" every Friday, "**Lloyd's Weekly Index**" every Thursday, "**Lloyd's Calendar**" annually in November for the ensuing year, *Lloyd's Book of House Flags and Funnels*, *Lloyd's Prize Cases*, etc. A "**Captains' Register**" is kept, consisting of a biographical dictionary of all the certificated commanders of the British mercantile marine, about 24,000 in all. The record of maritime casualty losses and serious casualties is kept in the "**Casualty Book**," originally known as the "Loss Book."

The **medal of the Society** is presented to those who have, by extraordinary exertions, contributed to the saving of life at sea ; and the **Medal for Meritorious Services** is granted to officers and others who, by extraordinary exertions, have contributed to the preservation of vessels or cargoes. In 1803 "**Lloyd's Patriotic Fund**" was established for the relief of sailors and soldiers, their relatives and dependants, who suffered in the great war. This fund is still administered by trustees, the majority of whom are members of Lloyd's, the chairman being Mr. Herbert de Rougemont.

Lloyd's is, of course, open only to members and subscribers. **Members of Lloyd's** may be either underwriting or non-underwriting members. There are also annual subscribers and associates. Underwriters are required to deposit with the Committee in respect of liabilities incurred on account of marine and transport risks at least £5,000 in approved securities, the dividends on which are received by the depositor. The Committee some years ago adopted a system under which separate security, applicable only to claims on fire policies and other policies not covering marine and transport risks, is required from members on their admission, and members who engage in such business, and who were elected before the adoption of this system, generally furnished similar security. A system was also instituted under which all underwriting moneys are held in trust for underwriting purposes only ; and underwriters' accounts are annually audited by approved accountants who certify as to the solvency of the underwriter. Non-marine insur-

ance business transacted at Lloyd's is subject to the Assurance Companies Act of 1909, and since July 1, 1910, when that Act came into force, every member of Lloyd's, without exception, undertaking such non-marine business, has complied with its requirements, which are as follows: "(*a*) All premiums received by or on behalf of the underwriter in respect of fire and accident insurance or reinsurance business carried on by him, either alone or in conjunction with any other insurance business for which special requirements are not laid down in this schedule, shall without any apportionment be placed in a trust fund in accordance with the provisions of a trust deed approved by the Board of Trade. (*b*) He shall also furnish security to the satisfaction of the Board of Trade (or, if the Board so direct, to the satisfaction of the committee of the association), which shall be available solely to meet claims under policies issued by him in connection with fire and accident business and any other non-marine business carried on by him for which special requirements are not laid down in this schedule. The security may be furnished in the form of either a deposit or a guarantee, or partly in the one form and partly in the other. The amount of the security to be furnished shall never be less than the aggregate of the premiums received or receivable by the underwriter in the last preceding year in connection with such fire and accident and other non-marine business. (*c*) The accounts of every underwriter shall be audited annually by an accountant approved by the committee of the association." The deposits and guarantees provided by underwriting members of Lloyd's as security for their underwriting liabilities exceed seven millions sterling. Underwriting members are also required to pay an entrance fee, and an annual subscription of £21, but those elected prior to Dec. 31, 1892, only pay an annual subscription of £16.16.0. Non-underwriting members are exempted from the deposit, but pay an entrance fee, and an annual subscription of £7.7.0. Subscribers pay annually £7.7.0 and associates £5.5.0.

Secretary, Rear-Admiral Edward Fitzmaurice Inglefield.

LLOYD'S REGISTER OF SHIPPING

This is a Society voluntarily maintained by the shipping community with the **primary object** of the **classification of vessels.** It is **the recognised authority** on such matters all over the world. The Society's affairs are managed by a General Committee of 73 members, composed of merchants, shipowners, and underwriters, shipbuilders and engineers, representing the principal shipping centres of the country. In technical matters affecting the Society's rules for the construction of vessels and machinery, the Committee has also the advantage of the co-operation of a body of experts, 15 in number, selected by the principal institutions of the United Kingdom associated with naval architecture and engineering, and the iron and steel and forgemaking industries. **Committees** of the Society are established **on the Mersey, on the Clyde,** and at **New York.** In the case of new vessels, after the plans have been submitted to and approved by the Committee, the building of the vessels proceeds under the supervision of the Society's surveyors, who, when the vessels are completed, send a detailed report to the Committee, by whom the class is assigned. The highest class for iron and steel vessels is represented by the character 100A1, and for wooden vessels by A1. It is from the latter character that the phrase "**A1 at Lloyd's**" is derived.

In addition to the classification of vessels other duties have from time to time been entrusted to the Society. Under the authority of Government it **controls the testing of anchors and chains** at all the public proving-houses in the country. During the year ended June 30, 1916, over 738 miles of chain cable and 12,686 anchors were tested. Lloyd's Register has, moreover, been entrusted by Parliament with the duty of **assigning freeboards to vessels** under the Merchant Shipping Act, 1894, and the **load lines** of 17,949 vessels have been dealt with by the Committee. The Society also **conducts the testing of steel** used in the construction of vessels and machinery. During the above-stated period 976,801 tons of steel were submitted to the tests required by the Rules.

On June 30, 1916, 10,032 vessels of 23,190,138 tons were **classed in the Society's Register Book.** At the end of September 1916, 406 vessels of 1,442,003 tons were building in the United Kingdom under the supervision of a surveying staff, comprising officers stationed at all the principal shipping centres of the world. During the 10 years ended June 30, 1916, 12,758,769 tons of new vessels were classed by the Society.

Lloyd's Register was founded in 1760 and reconstituted in 1834. It issues annually to its subscribers a very bulky **Register Book,** containing full particulars of not only vessels classed with the Society, but also of all seagoing vessels and steel and iron vessels trading on the Great Lakes of North America. The 1916-17 edition of the Register Book contains over 30,000 vessels of 100 tons and upwards. **A Register of Yachts** is also published annually, giving detailed particulars of yachts of all nationalities. Another Register is also issued yearly by the Society in New York, giving similar particulars of 3,555 yachts belonging to the United States and Canada. The Society publishes very complete **statistical returns** quarterly and annually regarding vessels building and vessels lost all over the world. See MERCANTILE MARINE.

Chairman, Sir Thomas L. Devitt, Bt.
Secretary, Andrew Scott.
Chief Ship Surveyor, Westcott S. Abell, M.Eng., M.Inst.C.E.
Chief Engineer Surveyor, J. T. Milton, M.Inst.C.E.
Offices, 71 Fenchurch Street, London, E.C.

SHIPPING SOCIETIES

The Baltic Mercantile and Shipping Exchange Ltd., is a general mercantile and shipping exchange. It was opened in April 1903, is an amalgamation of the old Baltic in Threadneedle Street and the Shipping Exchange in Billiter Street, and consists of nearly 2,500 members, merchants, shipowners, and brokers (grain, shipping, oil, oil-seed, etc.).

Chairman, F. N. Garrard.
Secretary, J. A. Findlay.
Offices, St. Mary Axe, London, E.C.

The Chamber of Shipping of the United Kingdom consists of 30 shipowners' associations of the United Kingdom. It communicates with the chief Government Departments on all matters affecting the interests of British merchant shipping. The affairs of the Chamber are managed by an executive council, to which each affiliated association elects one member.

President, W. H. Raeburn.
Vice-President, J. Herbert Scrutton.
Secretary, Hon. Noel M. Farrer.
Offices, 5 Whittington Avenue, Leadenhall Street, London, E.C.

LONDON CHAMBER OF COMMERCE

Incorporated under the Limited Liability Act, Oct. 1881. The L. C. of C. takes cognisance of, and action in regard to, all questions affecting the good of the community at large, which from time to time occupy the attention of the mercantile world. The affairs of the Chamber are governed by a Council. From its first formation the Chamber has adopted the principle of dividing itself into sections, each dealing with subjects of interest to particular classes of business men, and some 60 trades have already been organised in this way. The Chamber has on its premises a good commercial library, and through its **Statistical and Information Department** inquiries on an immense variety of matters connected with commerce, etc., are conducted. The Chamber issues **certificates of origin** for goods exported to France and French Possessions, Italy, Nicaragua, Russia, and Spain, both to members and non-members; special certificates on trade customs and usages as required; also commercial travellers' certificates for France, Russia, Spain, and other countries. The Commercial Education Department issues certificates for proficiency in commercial subjects, the number of candidates sitting for examination for senior and junior certificates and for teachers' diplomas in 1916 being 6,005, as against 6,733 in 1915. An **Employment Department** furnishes fully qualified mercantile assistants and procures employment free of charge for commercial education certificate holders.

President, The Rt. Hon. Lord Desborough, K.C.V.O.
Offices, Oxford Court, and 97 Cannon Street, E.C.
Secretary, Charles E. Musgrave.

UNITED KINGDOM

At the beginning of the war the Government took over the railways of the country, guaranteeing to the companies net receipts based on the aggregate net receipts for 1913, providing, however, that if the net receipts for the first half of 1914 were less than those for the first half of 1913, the sum payable should be reduced in proportion.

Owing to the war, the usual statistics of the railway companies of the United Kingdom are not now issued in the usual form. The mileage of lines open for traffic in 1915 was: running lines. 40,808 miles, made up of 23,701 miles single-track; 13,403 miles double-track; 1,648 miles three-track; 1,277 miles four-track; and 706 miles of more than four-track. There were also 14,928 miles of sidings. The train-miles run numbered 273,659,000 coaching, 156,007,000 goods, 666,000 mixed, and 135,079,000 shunting, making a total of 621,239,000 engine miles. The total receipts for the year were £139,098,000, and the expenditure £88,173,000, giving a net income of £50,925,000.

In 1913 passenger train traffic contributed £56,978,000, goods train traffic £66,640,000, and miscellaneous £1,242,000 to the total income of £124,860,000 for that year. Of the passenger train traffic, £3,772,000 came from ordinary first class tickets, £1,097,000 from second class tickets, and £35,730,000 from third class tickets; workmen's tickets contributed £1,675,000, first class season tickets £1,678,000, second class season tickets £629,000, and third class season tickets £2,561,000; carriage of mails contributed £1,284,000, and parcels, excess luggage, etc., £8,522,000. Of goods train traffic, the revenue from merchandise was £32,990,000; from live stock carriage £1,678,000; from coal and coke £22,909,000, and from other minerals £9,063,000. The total number of passengers carried was 1,591,146,000; the tonnage of goods carried was 568,201,000.

COMPANIES' CAPITAL

The **total paid-up capital** of the Companies at the end of 1914 was £1,334,011,000, of which about £198,721,000, or approximately 15%, represents nominal additions due to consolidation, conversion, or division of stocks.

Detailed figures for the year 1913 are given in Cd. 8038 of 1915, 1*s.* 8*d.*

ACCIDENTS

During the year 1915 1,364 **persons were killed** and 9,268 **were injured by accidents** due to the running of trains or the movement of railway vehicles. The average yearly figures for the previous ten years were 1,074 and 7,939 respectively. The number of **passengers killed** on the railway by accidents to trains was 269; by accidents from other causes, 162. The number of railway **servants killed** in 1915 by accidents to trains was 9; by accidents from other causes, 403. The total number of **passengers injured** during 1915 was 3,789—1,432 by accidents to trains, and 2,355 by accidents from other causes. The total number of railway **servants injured** was 5,145—183 from accidents to trains, and 4,962 by accidents from other causes. The **coupling** and **uncoupling** of vehicles caused 10 servants to be killed and 584 to be injured.

Railway Clearing House, opened 1842. *Chairman,* H. W. L. Harford. *Sec.* H. Cuff Smart. *Office,* Seymour Street, London, N.W.

The New HAZELL, 1917

THE KING'S HIGHWAY

The mileage of public roads maintained by local authorities in England and Wales according to the latest statistics was 151,920 of which 118,620 were "rural roads." The amount expended (otherwise than out of loans) upon their **maintenance and repair** was £9,761,340, the average cost per mile being £64. Loan charges amounted to £3,447,680. The mileage in Scotland was 24,859, and the cost (including loan charges) £1,347,491. The Irish mileage was 58,331, and the cost (including loan charges) £1,163,878.

Street Accidents in the U.K., 1915

Accidents in streets and roads in the U.K. in 1915 numbered 63,203 as compared with 61,670 in 1914. Of this number 3,014 were fatal and 60,189 non-fatal, as compared with 2,330 fatal and 59,340 non-fatal in 1914.

Cause.	Fatal.	Non-fatal.
Electric tramcars	260	8,372
Horse-drawn tramcars	1	6
Motor omnibuses	239	3,263
Horse omnibuses	*nil*	32
Other motor vehicles	1,644	26,034
Other horse-drawn vehicles	682	12,068
Pedal cycles	188	10,414
Totals	3,014	60,189

Division.	Fatal.	Non-fatal.
England	2,460	53,013
London	367	26,869
Liverpool	44	2,173
Manchester	53	1,132

The **Roads Improvement Association** was formed in 1886 and incorporated in 1898, to secure reform in the system of administering the highways of the United Kingdom, and to obtain better, wider, dustless, and more conveniently planned roads and footways. *Sec.* Wallace E. Riche. *Offices*, 15 Dartmouth St., Westminster.

London Traffic

The huge size of London renders the management of the immense traffic a problem of great difficulty. An account of the various Commissions appointed to inquire into it, and statistics of its volume, will be found on p. 352.

CABLES AND WIRELESS TELEGRAPHY

In 1897 there were 1,300 **submarine cables**, with a total length of 162,000 nautical miles; and in 1915 the numbers had increased to 2,987 cables, with a total length of 293,301 nautical miles. Of these 2,511 cables with a length of 53,888 nautical miles belonged to Governments; and 476 cables with a length of 239,413 nautical miles belonged to private companies. **Great Britain** initiated submarine telegraphy, and the globe is now almost encircled by British cables—the Eastern and the Western (private), and the Pacific (State). The following details have mostly been selected from the full account given in *The Electrician* Directory, and in the Year-Book of Wireless Telegraphy:—

Principal Government Cables

	No. of Cables.	Length in miles.
British India	10	2,001
France and Algeria	49*	3,161
France (Internat. and Colonial)	16	8,479
Germany	97*	2,946
Great Britain and Ireland	222*	3,037
Inter-Colonial System (Pacific Cable)	6	9,279
Japan	144	4,289
Spain	25	3,153
United States	15	2,582

Principal Companies' Cables

	No. of Cables.	Length in miles.
Central and South American	25	14,426
Commercial	15	17,274
Commercial Pacific	6	10,010
Compagnie Française	24	11,430
Deutsch Atlantische	5	9,660

* Including half of the cables owned jointly.

	No. of Cables.	Length in miles.
Eastern	140	46,615
Eastern Extension	33	26,475
Eastern and South African	18	10,517
Great Northern	30	8,405
Western (and associated lines)	40	23,835
Western Union	16	23,220

Great Britain is connected with Europe by Government cables, and also by the Eastern Co.'s route to Vigo and Gibraltar, and thence to Malta; while Scandinavia and Russia are reached by the cables of the Great Northern Co., except as regards Norway, which is now served by the two Government systems.

There are **17 cables across the North Atlantic**, most of them belonging to, or controlled by, the Commercial and Western Union companies (American). The **West Indies** are reached either *via* Halifax to Bermuda, or *via* New York or Florida to Havana. North Africa is connected to Europe by the Eastern Co.'s cables from Gibraltar to Tangier, Malta to Tripoli, and Malta to Alexandria.

The east coast of **South America** is reached at Pernambuco by the Eastern Co's. cables as far as Azores or Lisbon, and from there by the Western Co., *via* St. Vincent. The Western Co. has completed a new cable giving Buenos Aires direct communication with Europe, *via* Ascension.

The African Direct and West African Companies have cables from Lisbon—the former *via* St. Vincent, the latter *via* Madeira. These extend to Bonny (Nigeria), calling at Sierra Leone and other places on the West Coast.

The Eastern and South African Co's cables run from Aden to Durban, branching from Zanzibar to Mauritius, where they meet the Australian route.

The Eastern Co. affords **direct communication to Cape Town,** *via* Madeira, St. Vincent, Ascension, and St. Helena; and, in conjunction with the Eastern Extension cables, this is continued to Perth and Adelaide, *via* Mauritius and Keeling Islands. This forms an all-British route to Australia and New Zealand.

Between **Great Britain and India,** the Eastern Co.'s cables run *via* Malta to Alexandria, and thence through the Red Sea, *via* Aden, to Bombay. The **Eastern Extension cables** continue this route from Madras to the Straits Settlements and Singapore; and from there they run to Hong-Kong and Shanghai, and finally connect with the Australian land lines at Port Darwin.

The **British Pacific Cable** is "all-British," owned and worked by the Governments of Great Britain, Canada, Australia, and New Zealand, and runs from Vancouver, on the west coast of Canada, to Fanning Island, Fiji, and Norfolk Island in the Pacific, and thence to New Zealand and Queensland respectively. A new cable connects Auckland and Sydney.

At the Imperial Conference 1911 a State-owned Trans-Atlantic Cable, connecting with a State-owned Trans-Canadian land line, so as to make an **"All-Red" route,** was strongly advocated; and a Report of the **Dominions Royal Commission,** while recommending drastic reforms as regards cables to Australasia, gives more evidence from Australia and New Zealand in favour of this Imperial scheme; but so far the British Government has been satisfied with the Postmaster-General's alternatives: (1) Imperial Wireless Telegraphy, (2) reduced rates from the cable companies. Admittedly, the proposed Atlantic cable would probably not be a financial success; but Mr. Charles Bright has maintained in the *Quarterly Review* (April 1913) that "a cable is the only secure means of communication in a strategic sense." Soon after the outbreak of the war all the main German cables were cut, and their overseas long-distance wireless stations destroyed. But Germany can still communicate with the United States, for example, by wireless, while direct communication by cable is no longer possible. The Pacific cable having been cut by a German cruiser at Fanning Island was soon repaired, and all British cables are working as usual—likewise the wireless stations.

In pursuance of the resolution of the Imperial Conference of 1911 "that the great importance of **wireless telegraphy** for social, commercial, and defensive purposes renders it desirable that **a chain of British State-owned wireless stations** should be established within the Empire," the Imperial and Dominion Governments concerned entered into negotiations which resulted in July 1912 in a contract with the Marconi Company for the erection of wireless stations at London, Egypt (or Cyprus), Aden, Pretoria, Bangalore, and Singapore. The Australian and New Zealand Governments, having wireless schemes of their own in progress, were not signatories to the Imperial contract. The ratification of the contract by a Parliamentary resolution was delayed as the result of public criticism. Accordingly a **Select Committee** of inquiry was appointed (Oct. 1912), which, in their report (Jan. 1913) recommended that the Government should, as a matter of urgency, secure sites for the suggested Imperial Wireless Stations, but should first obtain the advice of a Committee of experts as to which was the best system of wireless telegraphy. This **Advisory Committee** reported that the Marconi system was at present the only system capable of fulfilling the requirements, though in some respects it might be better for the Government itself to undertake the business.

Negotiations were thereupon resumed by the Government with the Marconi Company—which had repudiated the contract on the ground of undue delay in ratification—and a new Contract was signed (July 1913) similar to the original one but with certain modifications. It was duly ratified by the House of Commons in August, 1913.

By the Merchant Shipping (Convention) Act, 1914, all British ships carrying fifty or more persons—and also foreign ships entering British ports—have to be provided with a wireless telegraphy installation.

The **Wireless Telegraph Acts, 1904–6,** make it illegal for any person to instal or work wireless telegraph apparatus in the United Kingdom or on board British ships in territorial waters except with the licence of the Postmaster-General, and so placed wireless telegraphy under Government control for strategic purposes. Almost immediately after the war began, the Government took control over the Wireless Telegraph Service. The censorship is very strict, and private installations are now forbidden. Most of the neutral States also took steps to prevent their wireless stations from being utilised for non-neutral communications.

The International Telegraph Union at Berne was established by the International Telegraphic Conference at Vienna in 1868. Its main object is to publish information relating to International telegraphy, and to circulate requests for modifications of tariffs and service regulations. Its branch, the "Berne Bureau," was appointed by the International Radio-telegraphic Convention (London 1912) for similar purposes in connection with wireless telegraphy. The last International Telegraphic Conference was held at Lisbon in 1908. One was to have been held at Paris in 1915, but had to be indefinitely postponed.

EMIGRATION SOCIETIES

The Emigrants' Information Office was established in 1886 to supply intending emigrants with information respecting emigration, chiefly to the British Dominions Oversea, and is under the direction of the Colonial Office. Owing to the war the Managing Committee has temporarily suspended the publication of the Handbooks and Circulars which are usually issued for the guidance of intending emigrants. Persons desiring information should apply to the *Chief Clerk*, Malcolm Jones.

Church Emigration and Commendation Society.—Founded 1886. The Society seeks to promote the spiritual and temporal welfare of members of the Church of England at home and overseas, and thus strengthen the Church throughout the British Empire; it collects information, arranges passages, occasionally makes loans and befriends members of the Church of England moving from place to place. Number emigrated, 1915, 50. *Hon. Sec.* Miss M. K. Grimes and Rev. Preb. E. de M. Rudolf, C.E.S., Church House, Dean's Yard, Westminster, London, S.W.

British Dominions Emigration Society (hitherto **The East End Emigration Fund).—Introductions** are furnished to the Society's correspondents, who are men of position resident in Canada, Australia, New Zealand, and South Africa, and work is usually provided for the emigrants on their arrival. A proportion of the cost of emigration is provided by the emigrants and their friends. Number emigrated, 1915, 85. *Sec.* R. Culver; *Office,* 5 Newark Street, Stepney, London, E.

The New HAZELL, 1917

STATISTICS OF BRITISH TRADE

Under the sections devoted to the British Dominions and to foreign countries figures are given which show both the sources of British Imports and the values of the respective countries as customers of British produce and manufactures. The following tables give the principal articles imported into and exported from the United Kingdom in 1914 and 1915:

Principal Articles Imported into the United Kingdom, 1914 and 1915

Classification.	1914.	1915.
	£	£
Food, Drink, and Tobacco	**296,969,207**	**380,874,561**

TRADE MOVEMENTS

During 1916 our imports, quite apart from Government purchases, increased considerably, owing to so large a portion of the energies of the country being devoted to the war, thus making it impossible to meet the demand for home consumption to the usual extent. This increase is of course not, as usual, a sign of greater prosperity, but of less.

For similar reasons to those just indicat exports showed a marked contraction, though is an encouraging sign that in the later mont there has been a marked improvement.

It is, however, to be remembered that many the articles which figured most largely in o exports in pre-war years are those which are bei used very largely in the war, both on land and se they are also being supplied to a great extent war material to our allies.

COAL

First ten months.	Exported.	Shipped for the use of steamers.
	Tons.	Tons.
1914	54,523,993	16,037,409
1915	38,830,606	11,745,472
1916	35,151,172	10,960,984

COTTON

Exports of cotton yarn and fabrics were inevitably restricted in 1916. As regards yarn the aggregate for the first ten months of the year was 148,585,100 lb., as compared with 158,847,900 lb. during the corresponding period of 1915, and 159,013,900 lb. for the same months in 1914. Germany, ordinarily our largest customer, of course took nothing, nor were there any shipments to Austria-Hungary, Belgium, or Turkey; but, on the other hand, deliveries to Holland increased, and the United States increased considerably. As regards piece goods the exports increased from 4,025,848,100 yards in the first ten months of 1915 to 4,415,643,400 yards for the corresponding period of 1916. Exports to India, by far our largest customer, were practically stationary: there were, of course, none to Germany, Belgium, or Turkey. Those to the Netherlands, Switzerland, West Africa, China, United States, Central and South America, showed considerable increases.

FLAX AND LINEN

At the outbreak of the war the flax industry was in a quite abnormal condition, even as compared with other sections of trade. Ordinarily about four-fifths of the flax imported into this country comes from Russia, and the bulk of the remainder from Belgium. In 1915 the imports from Belgium were quite nominal, while those from Russia were practically non-existent in the early months of the year, and on a restricted scale thereafter. In 1916, however, the imports from Russia again came in in quantities exceeding any of the last three years, consequently the export trade, which in the first ten months of 1915 had only amounted to 5,237,100 lb. as compared with 11,362,800 lb. for the same period in 1914, rose in 1916 to 7,971,000 lb., the shipments to France increasing from 364,800 lb. in 1915 to 2,890,890 lb. in 1916. Shipments of linen fabrics also increased, amounting to 124,901,100 yards for the first ten months of 1916, as compared with 107,195,500 yards for the corresponding period of 1915. By far our most important customer is the United States, and shipments thither increased satisfactorily.

JUTE

Exports of jute yarn, which were 30,713,400 lb. during the first ten months of 1915, declined to 25,566,100 lb. during the corresponding period of 1916. There was a marked decline in the demands from both Brazil and Spain. As regards jute piece goods, shipments during the first ten months of 1916 amounted to 96,228,400 yards, as against 96,198,300 yards for the corresponding period of 1915. The United States, our principal customer, took considerably more, as did Canada, but the Argentine lessened her demands by more than half.

IRON AND STEEL

Conditions in the iron and steel trade during the past year were so unusual that the ordinary trade statistics afford only a very imperfect guide to the real position of affairs. On the one hand, there has been an unusual demand for naval and military purposes, including munitions, and of these no record is published by the Board of Trade. Further portions of the export trade have been favoured by the absence of German competition. On the other hand the foreign trade has been restricted owing to the employment on military work, and that at home by the practical suspension of building operations.

The exports of pig and puddled iron in the first ten months of 1916 were 818,868 tons, as compared with 450,616 in the corresponding period of 1915. The demand from France and from Italy increased very considerably, the figures for France being 81,236 tons in 1915, and 486,418 tons in 1916.

SUGAR

Particulars of the sugar crop for the past eight years are as follows:

World's Production of Sugar

Year ending Sept. 1.	Beetroot.	Cane.	Total.
	Million tons.	Million tons.	Million tons.
1908	7·03	4·80	11·83
1909	6·93	7·65	14·58
1910	8·15	8·50	16·65
1911	8·56	8·22	16·78
1912	6·28	9·07	15·35
1913	8·34	9·22	17·56
1914	8·26	9·66	17·92
1915	6·32	7·76	15·58

Our imports of refined sugar showed a diminution as compared with 1915, though it must of course be borne in mind that Government purchases do not figure in the returns; imports of unrefined sugar, on the other hand, show some increase. Details of our import during the past eight years are as follows:

1st ten months.	Refined	Unrefined.	Total.
	Cwts.	Cwts.	Cwts.
1909	15,084,174	12,585,014	27,669,076
1910	12,963,446	14,846,921	27,952,858
1911	14,846,215	15,516,339	30,362,554
1912	12,488,936	14,176,360	26,665,296
1913	14,336,558	16,828,151	31,164,709
1914	13,624,955	14,911,392	28,536,347
1915	7,921,916	16,994,333	24,916,249
1916	6,996,639	18,971,856	25,968,495

Exports of jam, confectionery, etc., were also to a certain extent unfavourably affected by the exceptional events of 1915, and show reduced figures. Particulars for the past ten years are as follows:

Exports of Confectionery, Jam, etc.

Year.	Cwts.	£
1912	593,430	1,349,713
1913	637,490	1,417,408
1914	476,634	1,104,531
1915	382,708	991,577
1916 (10 months)	308,769	1,004,662

TEA

Tea retained for Home Consumption

	1912–13.	1913–14.	1914–15.
	lb.	lb.	lb.
Indian	166,144,251	176,737,241	204,333,836
Ceylon	92,027,655	93,153,488	91,368,799
China	9,357,143	11,235,481	13,667,383
Other countries	28,178,370	31,224,717	27,470,064
Total	295,707,419	312,350,927	336,840,082

WOOL

Imports into the United Kingdom

From	1913.	1914.	1915.
	lb.	lb.	lb.
Foreign Countries	158,970,308	115,307,404	87,924,931
British Possessions	641,610,507	597,310,712	838,455,105

WOOLLENS AND WORSTEDS

Our exports of woollen yarn declined in 1915, and showed a further considerable falling off in 1916. The figures for the last three years are:

	1913.	1914.	1915.
Export of woollen yarn	£8,040,415	£5,541,967	£3,189,966

The export of woollen and worsted manufactures, which declined considerably in 1914, recovered in 1915:

Exports of Woollen and Worsted Manufactures

1913	£25,978,907	1915	£27,862,462
1914	22,790,396	1916 (10 months)	30,821,372

INCREASED TRADE IN SPITE OF THE WAR

The following tables show clearly how the trade position of the United Kingdom has improved in spite of the war:—

INSURANCE GUIDE

[Insurance Companies are invited to send note of any alterations or particulars of any new schemes issued during the forthcoming year to the Editor by October 1917]

CLASSES OF BUSINESS TRANSACTED BY INSURANCE COMPANIES

With the assistance of the Directory given below the reader can see at a glance the classes of business transacted by each office.

1 Accident (Personal) and Disease.
2 „ (Monthly Premiums).
3 Annuities, Immediate.
4 „ Deferred.
5 Bad Debt.
6 Boiler, Engines, and Electric Plant.
7 Burglary.
8 Contract Guarantee.
9 Coupon Insurance.
The coupon system of insurance offered in certain newspapers, railway guides, etc., containing accident coupons.
10 Cycles.
11 Debenture and Mortgage.
12 Druggists' Indemnity.
13 Employers' Liability.
14 Fidelity Guarantee.
15 Fire (tariff).
16 Fire (non-tariff).
17 Hailstorm.
18 Horse.
19 House Purchase.
20 Indemnity or Contingency Policies.
Insurances are sometimes effected with life offices against such contingencies as a change of name, armorial bearings or religion, loss or recovery of reason, and against issue of marriages, and against a person dying with or without issue, when those events are improbable.
21 Leasehold Redemption and Sinking Fund.
22 Licenses (Non-renewal of).
23 Life Assurance (Ordinary).
24 Lifts and Hoists.
25 Live Stock.
26 Marine.
27 Mariners' Effects.
28 Motor Vehicles.
29 Plate Glass.
30 Profit, Loss of, through Fire.
31 Property Owners' Indemnity.
32 Sickness.
33 Title (Defects of).
34 Third Party.
35 Transit Risks.
36 Trusteeships and Executorships.

INSURANCE DIRECTORY

The following directory, together with the reference numbers to list of classes of business transacted, is produced with the kind permission of the proprietors of the *Post Magazine Almanack*, from which most of the information has been extracted. Companies whose advertisements appear in this issue are denoted by heavy type.

The scope and character of the Insurance article are designed to give general information relating to insurance in its various departments. Particulars are also given as to the cost of life insurance and annuities.

In the most part the publishers are indebted to the proprietors of Bourne's Institute, Ld.,* for the premium rates published, from whom would-be insurers may obtain specific details as to any particular form of insurance desired.

* 85, Fleet Street, E.C.

A new feature introduced this year is an alphabetical list of the various forms of Insurance with a key indicating the Insurance Company which accepts such risks and *vice versa*. The directory of Insurance Companies has been compiled from the *Post Magazine Almanack* (St. Andrew St., Holborn), with the kind permission of the proprietors.

FIRE INSURANCE

Insurance offices transacting this class of business are divided into two classes—tariff and

non-tariff. The former are associated by a tariff of fixed rates for specific risks, whilst the latter class assess each risk on its merits.

The gross amounts insured against fire during 1914, in respect of property in the County of London, upon which the Fire Brigade receives £35 per million as contributions from fire offices and Lloyd's underwriters, amounted to £1,152,838,453.

Loss of Profits or Consequential Loss

The ordinary fire insurance policy does not compensate the insured for the loss which generally follows the interruption or stoppage of a business consequent on a fire. This loss, however, which can be covered by a special policy, is often as serious as the actual material loss to buildings and their contents. For instance, in addition to loss of profits, an insured is usually faced with the necessity of continuing certain standing charges, such as rent, rates and taxes, interest on borrowed capital, salaries to permanent staff, etc.

AIRCRAFT INSURANCE

During the year insurance against damage to property by aircraft and/or bombardment continued to be a necessity, and the risks from aircraft and bombardment are covered through the War Risk Department, the various fire offices acting as agents of the Government for such policies.

Seeing that the Government disclaims responsibility for any loss or damage to property by aircraft or bombardment unless covered by insurance, and that where such insurance is effected with the Government there is a State guarantee, the War Risk Department is naturally controlling the bulk of the business, and it is thus enabled to quote a much lower rate, especially in the unhealthy districts, than that which was obtaining before the scheme was introduced. The premium for £100 insurance on building, rent, and contents of private dwelling-houses is 2*s.* for the aircraft insurance and 3*s.* where the risk of bombardment is included.

LIFE ASSURANCE

The progress of life assurance business in this country is remarkable, the total life and annuity funds of ordinary and industrial companies now exceeding the enormous figure of £440,000,000.

Interesting figures are supplied in the summary to the Blue Book relating to life offices, from which the following table is an abstract:

Board of Trade Returns

	Ordinary Companies.		Industrial Companies.	
	1915.	1916.	1915.	1916.
Received Premiums	£31,490,627	£32,283,820	£17,291,641	£17,982,777
,, Consideration for Annuities	2,373,315	1,998,261	—	—
Received Net Interest and Dividends	14,901,434	15,180,229	2,024,752	2,116,699
Paid Claims	23,591,110	26,646,109	7,236,404	7,828,831
,, Commission	1,714,624	1,638,345	4,504,839	4,618,209
,, Expenses of Management	2,623,501	2,546,832	3,448,816	3,401,016
Added to Funds	11,305,200	9,208,390	2,727,406	2,880,214
Total Life and Annuity Funds	381,491,584	390,053,841	55,762,235	58,700,590

The Returns show that ordinary British companies have in force 3,233,771 policies assuring £869,738,964, the corresponding figures for industrial offices being 38,004,956 policies assuring £433,900,645.

The above returns exclude the business of Colonial and American companies transacting life assurance within the United Kingdom. Figures relating to these offices are given below:

Summary of Business within U.K. transacted by Colonial and American Offices

Companies.	Year.	Premiums.	Net New Business. Sums Assured.	Net New Business. New Premiums
		£	£	£
Australian	1912	282,661	851,967	45,840
,,	1913	308,867	965,962	51,665
,,	1914	334,376	877,081	47,020

,,	1914	973,876	886,379	61,470
Totals	1912	1,547,569	2,837,380	157,908
,,	1913	1,588,858	2,972,679	174,105
,,	1914	1,579,929	2,446,359	152,335

It is impossible in a limited space to give such information as would enable the casual reader to select the best office of the several life assurance companies for any particular form of policy. As stated above, any inquiry can be made to Bourne's Insurance Institute, from whom the most reliable information can be obtained; but, in order to give readers general information as to the relative position of various life offices as shown by their annual accounts, Table A has been prepared. A reference to the rate of interest earned is also of considerable importance, as the difference between that earned and assumed in a valuation constitutes one of the chief sources of profit. Here, again, it would not be safe to rely solely on this criterion without due consideration being given to such other matters as proper provision for depreciation in investments, adequacy of valuation loading on premiums as compared with expenses, etc.

The Effect of the War on Life Offices

At the beginning of the war, British life offices took a very liberal view of the extra risk to be incurred by policy-holders undertaking active warfare, but the mortality has proved so severe that, with few exceptions, proposals on the lives of officers and men proceeding to the Front are not entertained.

The introduction of universal service has now practically limited the issue of full-benefit life policies to those exempt from service or above the military age.

In order to combat this difficulty several offices

have introduced special conditions of insurance, operative during the war, and limiting the death benefit under the policy whilst on active service to a return of the premiums received, or in some offices double this amount. Reinstatement to full benefit after the war is subject, in the case of most offices, to satisfactory evidence of good health.

The "Phœnix" War Policy is quite a good one. During the first year of service one-tenth of the maximum sum assured is payable in the event of death, during the second year two-tenths, and so on. This sliding scale continues after the war if the assured leaves the service, and until he can prove by a satisfactory medical examination he is entitled to full benefit.

One or two offices, however, are prepared to consider selected risks at extra premiums of £21%. The Prudential have a special fifteen-year. endowment policy, without medical examination, charging double the ordinary rate during the war, this being reduced to the ordinary rate when peace is declared. The Sun Life of Canada also considers policies on the lives of officers and others proceeding to the seat of hostilities at ordinary rates, with a proviso that in the event of death occurring from active warfare only one-quarter of the sum assured shall become payable.

It is somewhat early to discuss the effect which the present war will have on life office valuations, but it is practically certain that, owing to (1) the very heavy depreciation in investments, and (2) the severe mortality experience (many life offices having to carry the war risk on older policies without any extra premium whatever), at ensuing quinquennial valuations almost all offices will show a marked decline in the surplus divisible by way of bonus. Of those offices whose distribution of surplus was due at the end of 1915, some twenty in number, ten carried the surplus over owing to abnormal conditions, one passed the bonus altogether, with but one or two exceptions the others declared a reduced rate of bonus, and that at the sacrifice of modifications in the basis of their valuation.

Income Tax and Life Assurance

Under the Income Tax Acts every person is entitled to an abatement of income tax in respect of the annual premiums paid for any life assurance on his own life or the life of his wife to the extent of not more than one-sixth part of his income, provided that the rate of premium for the assurance does not exceed 7% of the sum assured payable at death, and that as regards any premium for any other benefits the total abatement should not exceed £100. This provision was added in the Finance Act, 1914, and in arriving at the one-sixth limitation pre-war income *may* be taken. By the 1916 Finance Act further restrictions have been made in the class of policy entitled to rebate and the conditions in regard to the same. The following is the exact wording of the sections of the 1916 Act in question:

"Sec. 36.—(1) The relief given under section 54 of the Income Tax Act, 1853, as amended by any subsequent enactment, shall not, as regards insurances or contracts for deferred annuities made after June 22, 1916, be given at a greater rate than that of 3*s.* in the pound; and shall not, as regards any insurance or contract for a deferred annuity, be given, notwithstanding anything in paragraph (*b*) of subsection (2) of section 66 of the Finance Act (1909-10), 1910, *for the purposes of super-tax.*

"(2) The said relief shall not, as regards insurances or contracts for deferred annuities made after June 22, 1916—

(*a*) be given *except* in respect of premiums or other payments payable on policies for securing a capital sum on death, whether in conjunction with any other benefit or not: or

(*b*) be given in respect of premiums or payments payable during the period of deferment in respect of a policy of deferred assurance:

Provided that nothing in this subsection shall affect premiums or payments payable on policies or contracts made in connection with any superannuation or *bona fide* pension scheme for the benefit of the employees of any employer or of persons engaged in any particular profession, vocation, trade, or business, or on any policy taken out by a teacher in a secondary school pending the establishment of a superannuation or pension scheme for those teachers.

"37.—(1) Section 54 of the Income Tax Act, 1853, as amended by any subsequent enactment, shall apply to all war insurance premiums whether payable annually or not.

"(2) War insurance premiums shall not be taken into account in calculating the limit of one-sixth of the profits and gains under the proviso to the said sec. 54 or the limits or 7% or £100 under subsection (1) of sec. 17 of the Finance Act, 1915.

"(3) In this section the expression "war insurance premiums" means any additional premium or other sum paid in order to extend an existing life insurance policy to risks arising from war or war service abroad, and any part of any premium or other sum paid in respect of a life insurance policy covering those risks or either of them, which appears to the Commissioners to whom the claim for relief is made to be attributable to those risks, or either of them."

In effect the relief of income tax for all *life* assurances (strictly interpreted) is limited to premiums (annual) not exceeding 7% on the capital sum *payable at death*, and then not to a greater maximum extent than 3*s.* in the pound. Pure endowments and deferred assurances and annuities are now ineligible for income tax relief except as stated in above clause in the case of *bona fide* pension schemes.

Life Assurance Guide

The following is a brief description of the **ordinary forms of Life Assurance.** These can be subdivided under two principal headings, **Participating** and **Non-Participating.** The former class, in consideration of an increased premium being paid, shares in the profits of the business (if any), called bonuses, and the latter does not. In the participating section the profits added will usually exceed the increase in the premium paid; but the non-participating policy-holders are not affected by the profits of the office.

The application of profits by way of bonus can be made in a variety of ways:

1. By additions to the policy in reversionary value, the bonus so added being payable when the policy becomes a claim.

2. By reduction of premiums over a term of years, or during the continuance of the assurance; or to cancel the payment of premiums in old age.

3. By payment in cash.

4. By making the assurance payable during the life of the person assured, by converting it into an endowment assurance.

5. Or, in the case of endowment policies, by making the date of maturity earlier.

6. Many offices have tables of assurance at very low rates in which the usual rate of premium is reduced to a minimum by the application of anticipated profits, but in some instances this class of policy has led to disappointment and is unsatisfactory.

Sometimes the profits are deferred and allotted only to policies which have been in force a specified number of years, or, in the case of endowment assurances, those who survive the term. These are called **Deferred Bonuses,** and should, under ordinary circumstances, be larger than those which vest immediately.

It may be mentioned here that the **Scottish Provident Institution** originated in 1837 what may be called the **Low Premium and Deferred Bonus** system. The premiums for whole-life policies are very low, and the whole surplus is reserved for division exclusively among those who survive to the period at which their premiums with compound interest at 4% amount to the sum assured.

If the profits of a particular class of policy are pooled and divided at the end of a given time amongst the survivors of that class, they are known as **Tontine Bonuses.**

The majority of the offices are at the present day known as Proprietary Offices, *i.e.* they are backed by capital originally put up by shareholders, who in return look for a proportion of the divisible profits. There are other offices, known as Mutual Offices, who, not having a proprietors' capital, divide the whole of the profits amongst the policy-holders.

Guaranteed Bonuses.—Many offices are attracting business by offering policies carrying guaranteed bonuses, but these are rather of the nature of policies with increasing sums assured, as the bonuses so called are not dependent upon the profits earned.

Usual Forms of Life Assurance

(For rates of premiums of various offices, see pp. 590 *et seq.*).

Ordinary Whole-Life Assurance, with or without profits, under which the assured, by paying a premium throughout life, secures the payment of a sum at his death.

When a policy is for a substantial amount and effected to provide for **Death Duties,** some offices quote lower than their ordinary non-profit rates.

Whole-Life Limited Payments, where the payment of premiums is limited to a specified number of years.

Endowment Assurance, where the sum assured is paid on the attainment of a given age, or at previous death.

Double or Half Endowment Assurance, where the amount payable on survival at a given age is Double or Half that payable at previous death. Double Endowment Policies are usually granted without medical examination.

Joint Life Assurance, the sum assured being payable on the death of the first.

Partnership Policies may be taken as the best example of the use of Joint Life Assurance.

A useful partnership policy issued by some offices is designed to meet the cases when after a few years a partnership may be dissolved, and the partnership policy is no longer required. In such a case, in exchange for the partnership policy, each partner can obtain a policy on his own life at the rate of premium for his original age at entry.

Insurance of Two or more Lives, the amount assured being payable on the death of the survivor of two or more persons.

Contingent Survivorship Assurance, the amount being paid on the death of one life, providing that another be living.

Short Period Assurance, under which the risk of death is covered only for a given term of years.

Convertible Term Assurances, which are Temporary Policies, expiring at the end of a certain term, unless a given option to change the policy into a Whole Life or Endowment Assurance Policy, at the advanced rates, is exercised by the assured.

Children's Deferred Assurances, under which Whole Life or Endowment Assurance Policies are issued on the lives of children at ages under 15, for annual premiums, the sum assured only being payable at death after the child attains its majority, that is after the age of 21, or 25 if preferred. These are now effected by many offices.

Children's Endowments.—The Policy of the **National Mutual Life Association of Australasia** is a good example of a Child's Endowment. The benefits of the policy are: (1) That the endowment shall be paid if the child survive the age of 21. (2) All premiums paid, with simple interest at 4% per annum, will be returned if the child die before attaining this age. (3) No further premiums shall be payable, and the policy shall be fully paid up, if the parent die before the child and during the currency of the policy. Policies are entitled to a full share in the profits, and no medical examination is required.

Almost all Life Offices will now issue Children's Endowments, and **Educational Annuities** to commence at a given age of the child and to run for four or five years.

Special Forms of Life Assurance

In addition to the above plans, many offices introduce variety into their schemes by modifying either (*a*) the **method of settlement when the policy becomes payable,** or (*b*) the method of payment of premiums.

Illustrations of variations from the usual method of settlement of a policy by payment at death or at a fixed date are the favourite instalment, or debenture and investment policies. Under an **Instalment Policy** the sum assured is payable by a certain number of fixed instalments, whilst a **Debenture or Investment Policy** carries interest on the sum assured for an agreed-upon number of years, after which period the amount becomes payable.

Policies at Reduced and Modified Premiums

Instead of a uniform annual premium throughout the term, several life offices accept a **reduced premium for the first few years of assurance,** and increase it thereafter. This is an improvement on the former "half-credit" plan, for no debt attaches to the policy. Policies are also issued giving exemption from payment of premiums during incapacity of over a month's duration from accident or illness, but universal military service would not allow of the issue of such contracts during war-time.

Annuity Schemes

The rates for immediate annuities on single lives are given on p. 594. In view of the increased yield of investments several offices have revised their annuity quotations. These are in most instances quoted for age *last* birthday of the annuitant.—The **Commercial Union Insurance Society** has devised **Special Deferred Annuity Policies** to facilitate provision for old age. Instead of the amounts

TABLE I.—STATISTICS OF LIFE ASSURANCE COMPANIES, IN MOST CASES FOR YEAR ENDING DECEMBER 1915

The column showing the ratio of expenses to premium income should be regarded with reference to the amount of new business transacted, which necessarily entails extra expenditure. Valuation expenses are also included, slightly increasing the ratio at bonus periods, in the case of offices marked *.

a Excluding Capital and Shareholders' undivided surplus.

of the periodical premiums and their due dates being fixed at the outset, the premiums may be paid in any multiples of £1, and at any intervals which may be most convenient. At any time the policy-holder is entitled to take a guaranteed cash value equivalent to a return of premiums with 3% per annum compound interest. Several offices grant annuities with a return of part of the purchase money in the event of early death. Attention may also be called to the favourable terms offered by the **Canada Life Assurance Co.** for life annuities.

Life Assurance without Medical Examination

In most cases where a life policy is effected, the life to be assured must submit to a personal medical examination. Some offices, however, are agreeable to waive this unduly exaggerated ordeal, on the condition that they do not cover the full amount to be insured by the policy until the elapse of a probationary period. The Sun Life Office, the Standard, the Yorkshire, and the Century grant policies on these lines.

Total Abstainers and Vegetarians

Several Life Offices offer special terms to total abstainers. The Abstainers and General, the Phœnix, the Scottish Temperance Life, the United Kingdom Temperance and General, the Sceptre, and the Yorkshire are of this number. The first-named company classifies **vegetarians** with a view to offering them the increased profits they may earn (if any).

Female Life Assurance

Until recently life offices were not favourably disposed to assure **women,** and would only do so at premiums very much in excess of those charged to males. Having regard to the large increase in the number of women employees there is a good field for life policies for women on certain lines which several offices are now cultivating.

ACCIDENT INSURANCE

The business of accident insurance consisted largely in earlier years in securing compensation to individuals in the case of accident, whether causing death, loss of sight or limbs, partial or total disablement. The next development was to extend the insurance to cover sickness or specific diseases, to insure medical expenses, and at the present time nearly all offices are prepared to issue policies covering illness of every description. In addition to personal insurance, the Employers' Liability and Workmen's Compensation Acts have immensely extended the operation of accident insurance companies, nearly all of which offices are prepared to insure against the risks, third party and otherwise, responsibility for which attaches to employers under these Acts.

The **Return Plans** of the **Century Insurance Co.** and the **Profits and Income** may be referred to, securing insurance against sickness or accident, with return of all premiums, on attaining 65, irrespective of claims. These policies are **permanent** contracts, of which class the Century was the pioneer. Once issued, they cannot be cancelled at the option of the Company. They can be combined with life assurance. Sickness alone may be insured against at lower premiums.

AIRCRAFT AND ZEPPELIN RISKS

The frequent visits of hostile aircraft and Zeppelins has encouraged the introduction of an

* Stamp duty to be paid by purchaser. † Payable Quarterly. ‡ No annuity less than £20 is sold.

accident policy covering those personal accident risks which under the ordinary accident policy are excluded. The London Guarantee and Accident, for a premium of 5*s.*, offer a policy insuring the sum of £500 in the event of death directly caused by aircraft, hostile or otherwise, including bombs, etc., fired thereat, with certain allowances in the event of total disablement. The premium referred to is for a period of six months, that for twelve months being 7*s.* 6*d.*, or 10*s.* for the duration of the war. The Century offer a policy on the same lines for an annual premium of £1, the sum assured being £1,000 at death, or a payment of £30 per annum for 10 years in the event of total disablement, and £5 a week for a year in the event of temporary total disablement.

FIDELITY GUARANTEE

The rates of premium vary from 5*s.* to 40*s.* %, and are classified under the different employments.

Length of service, position, and means are all matters taken into consideration when fixing the premium to be paid. Any number of officials of an employer may be guaranteed under one policy. Additions and alterations are made by endorsement from time to time. This is a great convenience when there is a large staff.

HOUSE PURCHASE INSURANCE

Of recent years a system similar to that of building societies has been practised by certain insurance offices, known as House Purchase companies. These companies are now under the Assurance Companies Act, as they come within the definition of Bond Investment companies. The Provident Association of London and the British Life Office offer to advance to tenant borrowers the full value of the property desired to be purchased, provided they have for 5 years held a house-purchase endowment certificate with the office. This certificate automatically repays the loan on maturity, interest being payable in the meantime. Both the offices named offer similar benefits with their life policies.

In several life offices it is now possible to obtain a loan for the purchase of approved house property, the assured being required to find a small proportion of the value of the house, and to effect either a whole-life policy (in which case the loan is cancelled in event of death) or an endowment assurance under which the loan is also cancelled after the endowment term. Special attention may be directed to the particular policy offered by the National Benefit Life and Property Assurance Co.

POST OFFICE STATISTICS OF THE UNITED KINGDOM

No return of letters posted has been taken since the outbreak of war, owing to the pressure upon the Post Office staff. The number of postal packets delivered in the United Kingdom during the year ended March 31, 1915, was estimated as follows :—

	Number.	Increase or Decrease % over 1913–14.	Average Number for each Person.
Letters	3,409,000,000	— 2·0	73·7
Postcards	880,000,000	— 5·0	19·0
Halfpenny packets	1,016,000,000	— 4·5	22·0
Newspapers	215,000,000	+ 3·8	4·6
Parcels*	137,000,000	+ 3·3	3·1
Total	5,657,000,000	— 4·4	122·4

* This figure includes parcels sent from this country abroad.

The weight of newspapers, magazines, and trade journals sent to Canada was 7,800,000 lb. Cash on delivery packets numbered 53,096 dispatched and 902 received. The number of reply coupons issued abroad and exchanged for stamps in the U.K. was 83,522. Insured letters dispatched abroad numbered 23,000 and insured boxes 2,627.

The numbers of **undelivered postal packets** in 1913–14 (statistics for 1914–15 not available) were : Letters, 15,698,000, and postcards, 3,533,000 ; halfpenny packets, 15,205,000 ; newspapers, 607,000 ; and parcels, 303,000. The number of packets of all descriptions posted without any address and of articles found loose in the post during the year is estimated at 444,000, as compared with 408,000 in the preceding year.

Inland money orders by post and telegraph in 1914–15 numbered 13,915,000, representing an amount of £47,777,000 ; and foreign and colonial orders numbered 3,761,000, representing a value of £11,096,000. **Postal orders** numbered 176,171,000, representing a value of £53,116,000. Owing to the use of currency notes for making remittances through the post, the percentage of postal orders at the higher denominations considerably decreased, while that at the lower denominations increased. The result was a loss of revenue from poundage without any corresponding decrease in working expenses. The number of **telegrams** sent was 91,179,000, as compared with 87,089,000 in 1913–14. The war was responsible for the increase. The war had a considerable effect on the **telephone** business : new orders for telephones fell off by 27%, whilst the number of subscribers who gave up their telephones increased by 29%. The number of telephones owned by the Post Office on Mar. 31, 1915 (exclusive of those provided specially for the temporary use of the naval and military authorities) was 796,347, made up of 749,565 exchange stations and 46,782 private wire stations. It is estimated that during the year 815,000,000 effective calls were originated, a decrease of 2·3% as compared with the previous year. The mileage of single wire in 1915 was—telegraphs 265,765, telephones 2,806,102, a total of 3,071,867 ; of this total 997,292 is aerial, and 2,060,918 underground.

Wireless Telegraphy.—At the outbreak of war there were in existence 2,158 licences for private land stations, all of which, with the exception of those required for Government work, had to be dismantled. The number of radiotelegrams dealt with at the Post Office coast stations between April 1 and July 31, 1914, was 26,145. There were 24,509 **post offices** open on March 31, 1915, of which 17,894 were in England and Wales, 2,463 in Scotland, and 3,051 in Ireland, with a staff of 253,750, of whom 62,718 were women ; 35,000 men were released, up to March 1, 1915, for naval or military duties. The number of **parcels sent to and received from places abroad** was : Dispatched, 3,497,600 ; received, 1,622,100, being decreases 21·71% and 30·70% respectively. The value of the **goods exported and imported by parcel post** was : exported, £7,612,290 ; imported, £1,748,982.

In the **Post Office Savings Bank** during 1914, £47,915,600 was deposited and £49,120,021 withdrawn. The interest-bearing accounts were as follows :—

	Active Accounts.	Amount Deposited.	Average Deposit.
		£	£ s. d.
England and Wales	8,359,412	168,987,383	20 4 4
Scotland	452,948	8,391,290	18 10 6
Ireland	469,010	12,725,668	27 2 8
U.K.	9,281,370	190,104,341	20 9 8

Since their introduction in 1911, nearly 110,000 home safes have been issued. In 1915 20,358 investments were made in Government stock, the amount being £1,553,473.

BANKING

THE BANK OF ENGLAND

Threadneedle Street, E.C.

The Bank was established in 1694 with a capital of £1,200,000, which has been increased from time to time until it reached £14,553,000 in 1816, at which amount it now stands. It has also a rest, or reserve, of about £3,000,000. Under the Bank Charter Act of 1844, the Bank is divided into the Issue and Banking Departments. From the former the Bank is permitted to issue £14,000,000 of notes of its own upon certain securities, of which the debt owing to it by the Government, amounting to £11,015,100, formed part. It is also provided that, if any of the note-issuing banks discontinue issuing their own notes, His Majesty in Council may authorise the Bank of England to increase its securities in the Issue Department by an amount not exceeding two-thirds of these lapsed issues. The fiduciary issue of the Bank has so risen at different periods from 1844 that it now stands at £18,450,000. Every note issued in excess of this amount must be represented by gold coin or bullion. The **annual sum payable by the Bank for its exclusive privileges** has been increased from £120,000, as settled in 1833, to £180,000 (of which £60,000 represents composition in lieu of stamp duty), and all profit from the increase of the issue of their notes against securities beyond £14,000,000 is directed to go to the public. As regards what are called **dead bank notes** it is enacted that, when Bank of England notes issued more than forty years have not been presented for payment, the Bank may write off the amount, or any portion of the amount, of these notes from the amount of such issued from the Issue Department, and the Bank Charter Act of 1844 is to apply as if the amount of notes thus written off had not been issued. The Bank will, however, be liable to pay any note so written off if it is presented for payment. The purchase and sale of foreign gold coin and gold bullion affords another source of profit to the Department. The Bank is required by the Act of 1844 to buy at £3.17.9. per oz. standard (being 1½*d.* per oz. under Mint price) all bar gold offered, subject to the fulfilment by the seller of certain conditions specified in the Act.

In the Banking Department the Bank of England, in addition to transacting business as other large English banks do, acts as the banker of the Government in the management and payment of dividends on the National Debt, the issue and withdrawal of Exchequer bills and bonds, the issue of Government loans, and the banking operations connected with the Government offices, the Indian Government, and much of the financial business of Colonial Governments. By the Bank Act of 1892 and the Revenue Act of 1906 the remuneration to be paid to the Bank of England for the **management of the National Debt** is to be a yearly sum at the rate of £325 per million pounds of such debt up to £500,000,000, and at the rate of £100 for every million above this amount up to and including the year ending March 31, 1912, and thereafter from year to year until Parliament otherwise directs. During such period this annual sum is not to be less than £160,000. For the management of Exchequer bonds and Exchequer bills the Bank is to receive £100 per million, and for the management of Treasury bills £200 for every million pounds of the maximum amount of bills outstanding at any one time during the financial year.

The **management of the Bank** is in the hands of a governor, deputy-governor, and 24 directors, elected by stockholders who have held £500 worth of stock for at least six months previous to the election. A director is required to hold £2,000, a deputy-governor £3,000, and a governor £4,000 of the stock. The Court, or Board of Directors, meet every Thursday, when the weekly account is presented. The two governors have the chief administration of the institution, and attend daily at the Bank.

Governor, Lord Cunliffe.
Deputy-Governor, Brien Cokayne.

THE LONDON STOCK EXCHANGE

The **London Stock Exchange** was established in Capel Court in 1801, and has since been enlarged and extended until it reaches as far as Broad Street, and occupies nearly the whole of one side of Throgmorton Street. The interior is not divided in any way, but the dealers in the different classes of stocks are found grouped in their own particular place on the floor of the House, **"House"** being the colloquial name for the Stock Exchange itself. The building **belongs to proprietors,** under a deed of settlement, and is **managed by 9 elected trustees and managers.** The **capital** is now **£260,000** in 20,000 shares of **£13** each, unlimited, but no call may exceed £2 in one

year. Holders must be members of the Stock Exchange, and no person can hold more than 200 shares. The **dividends** for the past three years have been for 1914 £10, 1915 £7, 1916 £2. There is also an issue of 3% **debentures** amounting to £356,000.

The **members of the Stock Exchange** are quite distinct from the proprietors, and are governed by the **"Committee for General Purposes,"** consisting of a chairman, deputy-chairman, and 28 members, who make rules guiding the conduct of business and of the members themselves, and decide what stocks and shares shall be recognised and officially quoted. **To become a member** the applicant must be of British birth, or, if a foreigner, he must have been naturalised for at least 2 years and have resided in this country for 7 years. He has to be recommended by three members of standing, who will become surety for him to the extent of £500 each for 4 years after his election, the **entrance fee** being 500 guineas. Gentlemen who have served as **"clerks in the House"** for 4 years are admitted on a reduced fee of 250 guineas, and require only two sureties for £300 each. Members elected since Nov. 23, 1904, have to become proprietors by acquiring one share if admitted with two sureties, or three shares if admitted with three sureties. A member employing a clerk in the House "authorised to deal" has to pay for him an entrance fee of 50 guineas, and for an "unauthorised" clerk 10 guineas. The **annual subscription** for members (except those admitted before 1899) is 40 guineas, for authorised clerks 30 guineas, and for unauthorised 12 guineas. Members have to go through the form of re-election every year, in March, without further fee beyond the annual subscription, which is due and payable on March 25. At the present time the **number of members** is about 4,085, and of clerks 1,753, the numbers always varying. The whole of the money paid for entrance fees and subscriptions goes to the proprietors, who maintain the building in proper condition. The **"Trustees and Managers"** and the **"Committee for General Purposes"** are two distinct and separate bodies, one being, in fact, the landlords of the building, and the others the tenants.

All bargains are settled according to the **Rules and Regulations**, which are very voluminous, and all **transactions must be closed bi-monthly**, either by the delivery of the stock bought or sold, or by **"carrying-over"**—that is, the postponement of the delivery until the next settling day. Bargains in Consols **"for money"** are settled the same day, but **"for the account"** monthly. All stock or shares bought must be paid for on the settling day, and in the case of no stock passing, any **"difference"** must be paid (on either side) on that day. In the case of a sale or purchase of registered stock 10 days are allowed for the preparation and execution of the necessary transfer deeds.

[Temporary Regulations and Emergency Rules have been passed for the conduct of business during the war and for twelve months afterwards. The Stock Exchange was closed from July 30, 1914, to Jan. 4, 1915.]

Secretary to Committee for General Purposes, Edward Satterthwaite, C.B.
Secretary to Trustees and Managers, R. M. Brydone.
Office, 23 Throgmorton St., London, E.C.

COMPANIES

It appears from the returns of the Registrar of Joint Stock Companies that the number of **new companies** registered in England and Wales during the year ending Dec. 31, 1914, was 5,701. The number of companies which went into liquidation was 2,017, and 1,323 companies were removed from the register on the ground that they were no longer carrying on business. The net increase in the number of companies during the year was therefore 2,361. The number of companies on the register in England and Wales on Dec. 31, 1914, excluding companies which were in course of liquidation or removal from the register, was about 66,000.

The **total number of companies** registered in the United Kingdom during 1914—viz. 6,214—showed a decrease on 1913, when 7,425 companies were registered, being the largest number registered during any one year since the Companies Act, 1862. In Scotland 384 companies were registered in 1914, and in Ireland 129. The **total nominal capital** of companies registered in the United Kingdom in 1914 was £113,251,583, being £43,935,070 less than in 1913, while the average amount of each company decreased from £21,169 in 1913 to £15,788 in 1914.

THE BANKERS' CLEARING HOUSE

The Bankers' Clearing House is an establishment in which the business of banks with other banks is adjusted. Each of the sixteen banks, together with the Bank of England—though they clear on one side only—composing the London Bankers' Clearing House (Post Office Court, Lombard St.) sends clerks daily, who take with them the various bills and cheques in possession of their bank drawn on other bankers. The Clearing House and the banks which compose it have accounts at the Bank of England, and the balances, which were formerly settled by cash or Bank of England notes, are now settled by transfers from one account to another. The **arrangements for clearing** are directed by a committee appointed by the banks. There are two paid managers or inspectors to carry out these arrangements. On all days except Saturdays in normal times the accounts are closed at four o'clock. Three-quarters of an hour is allowed for the banks to consider drafts upon them, and to determine whether they are to be honoured. In the meantime the bills and cheques have been classified at the Clearing House, and accounts are then adjusted, each paying or receiving the balance due to it. The notification of the total amount of bills, cheques, and drafts passing through the Clearing House, taken in conjunction with the Board of Trade returns, is some indication of the state of trade, and as the Metropolis is the main cosmopolitan centre of commerce, this record has a world-wide range. The sums passed through the London Bankers' Clearing House for 1915 amounted to £13,407,725,000, a decrease of £1,257,323,000 as compared with the year 1914. On Stock Exchange account days the payments were £1,025,775,000, a decrease of £456,005,000 on the year 1914, but on account of the war and conditions on the Stock Exchange these figures are not an index to the amount of business transacted. On Consols settling days the payments were £589,654,000, an increase of £74,088,000 as compared with 1914, and on the 4ths of the months the payments for 1915 amounted to £537,247,000, a decrease of £75,279,000 as compared with 1914. The Town Clearing for 1915 totalled £10,911,090,000, the Metropolitan Clearing for 1915, £929,064,000, and the Country Cheque Clearing for 1915, £1,567,571,000. The record day was Oct. 30,

1912, with a total of £131,042,000; the record week that ending July 1, 1914, with a total of £445,419,000; the record month, July 1914, with a total of £1,546,032,000, and the record year, 1913, with a total of £16,436,404,000. In the **provincial clearing houses** the cheques presented are drawn not only on the branches of the members' banks, but also on their branches within a specified distance of the centre. There are clearing houses at Bristol, Liverpool, Manchester, Birmingham, Leeds, Sheffield, Newcastle-on-Tyne, and Leicester; and in Scotland at Edinburgh, Glasgow, Aberdeen, Dundee, Greenock, Leith, Paisley, and Inverness. In Ireland the only clearing house is in Dublin.

Chairman, R. V. Vassar Smith (Lloyds).
Deputy do. Wm. Hy. Neville Goschen (London & Provincial).
Chief Inspector, Philip W. Matthews.
Deputy Inspector, A. E. Salt, Lombard Street.
Hon. Sec. R. Martin Holland, C.B.

[The clearings of the New York Clearing House for 1915 show a total of $90,842,707,724, and the Clearing Houses of all the U.S. cities show a total for 1915 of $162,777,508,000.]

BUILDING SOCIETIES

Building Societies are established primarily for the purpose of obtaining funds by subscription for enabling members to purchase their own houses by regular and convenient instalments. Generally, they are based on the **co-operative system,** all profits being at the disposal of the members. A properly constituted building society should never prove a loss to its supporters. The sums advanced for the purchase of property are always less than the value of their security, and by the repayment of principal and interest the moneys so lent become more covered still.

The **first building society** on record was the **Greenwich,** founded 1809. The **oldest existing building society** is the **Chelmsford and Essex,** which began in 1846. Its membership is 309, with a share capital of £13,668, and **deposits** totalling £13,269; the undivided **profit** is £2,836. The old Greenwich had many imitators, and in 1836 an Act of Parliament was passed to encourage and protect building societies. Much wider legislation was enacted in 1874 and 1894.

Present-day building societies can be divided into (*a*) **Permanent** and (*b*) **Terminating,** including **Bowkett** and **Starr-Bowkett,** Institutions. The **Permanent Building Societies** have two classes of members: (i) borrowers, (ii) investors. The former are lent money on the security of property repayable by fixed instalments. The latter take up shares or deposit money, receiving therefor a fixed rate of interest and sometimes bonus out of profits. Members may be both borrowers and investors. They can cease membership at any time after reasonable notice. The **Terminating Building Societies** consist of supporters making regular subscriptions throughout the existence of the society, the object being to continue the building societies until every member possess his or her house. When the accumulated subscriptions are large enough to buy one house, this sum is loaned to one member, chosen by ballot, in order that the property may be purchased. He continues his payments, plus an additional subscription varying to the amount borrowed. As funds increase, more houses are bought, the society coming to a natural end when every member has a fully paid-for residence. It is impossible to say definitely upon initiation the proposed existence of the society, and when once joined a member must so remain until the winding up. In the **Bowkett** and **Starr-Bowkett Building Societies** a weekly subscription is payable, houses being bought for members as the funds accrue. There is no additional subscription as the member takes up his house. It is understood that each member lends his weekly subscriptions without receiving interest on the condition that the building society lends him a large sum on the same terms when he requires it. At its termination, the funds are divisible amongst the supporters.

The last available statistics were issued by the **Chief Registrar of Friendly Societies** on Feb. 25, 1916, and refer to the year ended December 31, 1914. He gave the following details:

	England and Wales	Scotland	Ireland
Membership .	593,161	27,413	8,311
Mortgages granted during 1913 }	£8,625,139	£136,811	£112,668
Total mortgages }	59,245,577	1,804,465	930,384
Share capital .	45,055,114	1,434,240	675,626
Deposits . .	15,484,115	383,507	226,027
Profits . . .	3,715,072	119,082	106,616

In the report a classification is not made between the permanent and terminating building societies, as has been the case in previous years.

A steady and consistent decrease took place in the membership of building societies from 1896 to 1901, since when a continual increase is recorded, except in 1911, probably owing to the failure of the **Birkbeck Building Society.** Yorkshire has been the dominating feature in building society statistics. In 1902 the membership of Yorkshire Building Societies was 67,105; twelve years later the total was 110,730, a net increase of 79%. There has been a slight falling-off in Scotland. The Scot is not so anxious as he was to obtain his own house. He has a tendency to put his funds in savings banks and share investments.

The largest building societies with the amounts outstanding on mortgage are:

Halifax Permanent Benefit, £3,259,720; Bradford Third Equitable Benefit, £2,233,858; Temperance Permanent, £1,922,624; Leeds Permanent Benefit, £1,885,652; Burnley, £1,353,222; Woolwich Equitable, £1,381,427; National Freehold Land and Building Society, £1,146,734; Leicester Permanent, 1,032,596; Bradford Second Equitable Benefit, £1,015,772. There are no others with over £1,000,000.

Altogether twenty-four building societies (the same as in 1912) have loans outstanding of £500,000 or more. Of these amounts, 68% is loaned on sums under £1,000 each. The London Building Societies are the chief exponents of the small mortgage policy, seven out of the twenty-four leading ones having percentages from 75 to 97. The **Co-operative Permanent Building Society** has 90·6% of its mortgages (£590,610) in sums of £500 or less. At the other end of the scale, the **Burnley Building Society** has 16·2% of its total mortgages scheduled as over £5,000 each.

The effect of the war and the war loans upon building societies is not yet generally known. It can be assumed that depositors and shareholders made withdrawals in large numbers for reinvestment in Government loans.

POLITICAL AND SOCIAL MOVEMENTS

HOME RULE FOR IRELAND

I.—THE PRESENT POSITION

The Royal Assent was given on Sept. 18, 1914, under the Parliament Act, to the Government of Ireland Bill—more usually known as the Home Rule Bill—which had passed the House of Commons in three successive sessions, and had twice been rejected by the House of Lords.

The passing of the Act was not accepted by Ulster, where preparations were made to fulfil the terms of the Ulster Covenant to refuse to recognise the authority of any Home Rule Parliament that might be set up. To meet a threatening situation the Liberal Government, which had passed the Home Rule Bill, introduced on June 23 in the House of Lords *an amending Bill* to make provision for the exclusion for six years of such Ulster counties as so decided by ballot. This Bill was passed by the Lords on July 14, after considerable amendments had been introduced, including the removal of the definite time-limit. It had not, however, been introduced into the Commons when the European War broke out on August 4.

As part of the political truce, to which the Nationalist Party adhered, a *Suspensory Act* was introduced in the House of Commons on Sept. 17, and passed through all its stages in both Houses on the following day. It suspended the coming into operation of the Home Rule Act for twelve months, or "if the European War is not then terminated until such further date, not later than the date of the termination of the war, as may be fixed by Order in Council." The further pledge was given by Mr. Asquith that "the Government will never countenance or consider the coercion of Ulster."

Sir Edward Carson stated to the Ulster Unionist Council on Sept. 28, 1914, that at the conclusion of the war he proposed to summon the Ulster Provisional Government together. If necessary, it would be the duty of the Ulster Volunteers to see that no Home Rule Act should ever have effect in Ulster.

Mr. Redmond and other members of the Nationalist Party joined in a recruiting campaign in Ireland, and during 1915 and the early months of 1916 the Irish question remained in political abeyance. An offer was made to Mr. Redmond to join the Coalition Cabinet, when it was formed in May 1915, but was not accepted. Sir Edward Carson, on the other hand, became Attorney-General.

Early in 1916 it became apparent that the political truce and the gallantry of Irish troops at the Front did not represent the whole situation in Ireland itself. There was a large and open growth of the revolutionary party of Sinn Fein, whose "troops" carried out drills and other military operations without interference by the Irish executive. The Sinn Fein Volunteers grew in number at the expense of the Redmondite Nationalist Volunteers, and they were undisguisedly hostile to recruiting for the Imperial Forces.

THE SINN FEIN RISING

The first intimation of the seriousness of the rebel movement came on Good Friday, April 23 when an attempt was made to land arms and ammunition from a ship, which arrived, accompanied by two German submarines, off the west coast of Ireland. The vessel was sunk with its cargo, but the arrest was effected of *Sir Roger Casement*, an ex-British Consul and Commissioner, who since the war had been reported as in Germany plotting against the British Government and endeavouring to seduce Irish prisoners of war in Germany from their allegiance, on promise of release to take part in a rebellion in Ireland. With Casement at the time of his arrest was an Irish soldier named Bailey, who, it was alleged, was one of those who had been seduced in the manner suggested.

News of these arrests brought matters to a head suddenly. The Sinn Fein Volunteers had planned Easter manœuvres. It was announced on Saturday, April 24, that these had been abandoned "owing to the very critical position." On *Easter Monday the rebellion was suddenly proclaimed*, and in a few hours the insurgents had seized the Post Office, the Four Courts, Stephen's Green, a large biscuit factory, and a number of houses in Sackville St. When troops arrived hastily from the Curragh, they were fired upon and, together with the civil population, sustained serious casualties. Communication with England was to some considerable extent interrupted. The authorities had, it subsequently appeared, contemplated action against the leaders of the Sinn Fein movement, but postponed it too long and appeared to be taken by surprise. Mr. Birrell, the Chief Secretary, was in England at the time. A half-hearted attempt was made by the rebels to seize Dublin Castle and the Executive, but this was frustrated. On Tuesday the rebels were driven out of Stephen's Green, and one of their strongholds, Liberty Hall, was shelled by a gunboat patrolling the River Liffey. They remained, however, established in the centre of the city, and at other points seized. *A proclamation of the Irish Republic* was put out, signed by P. H. Pearse as Provisional President, James Connolly as Commandant-General in the Dublin area, and seven other leaders. The answer of the Government was to proclaim *martial law* in the city and county of Dublin, and appoint *General Sir John Maxwell* to administer it.

The rebellion lasted altogether a week. As gradually the troops gained the ascendancy in Dublin, the movement spread, though spasmodically, in the south and west. In consequence of these "serious features," martial law was extended on April 29 to the whole of Ireland, including Ulster. Street fighting was continuing in Dublin, and before the rebel leaders had been brought to surrender unconditionally on Monday, May 2, half of Sackville St., including the Post Office, was in ruins. Throughout Ireland there were some 3,000 arrests, and many of these prisoners were shipped to England, where they remained interned. The signatories of the Republican proclamation and a few others were *tried by court-martial and shot*, to the number of 14. Other prisoners were sentenced to death, but reprieved, and there were similar reductions in periods of penal servitude to which other leaders were sentenced. John McNeill, President of the Sinn Fein organisation, was one of those sentenced to penal servitude for life. After the collapse of the rising in Dublin, the outbreak in the provinces subsided. Casement was brought to trial

for treason in London, convicted, deprived of his titles and honours, and hanged on August 3.

The rising and its failure had remarkable political consequences. On May 3 *Mr. Birrell resigned office*, confessing the total breakdown of the principles on which for nine years he had endeavoured to govern Ireland. Sir Matthew Nathan, the Under-Secretary in Ireland, also resigned, and on May 10 the same step was taken by Lord Wimborne, the Lord Lieutenant. The Nationalists were becoming restive, especially after the shooting of Mr. Sheehy Skeffington and two other civilians, by the order of an officer who was subsequently declared insane by a court-martial. Strong charges were made in regard to the operation of martial law, on a motion by Mr. Dillon debated in the House of Commons on May 11, but no actual division was challenged at this time. Instead of filling the vacant posts in the Irish Executive immediately, Mr. Asquith decided himself to visit Ireland. He came back with the opinion, expressed in the House of Commons on May 25, that "*Castle Government had entirely broken down.*" He announced that "at the unanimous request of his colleagues" in the Cabinet, Mr. Lloyd George had undertaken to see whether some means of arriving at a settlement by consent could not be found for Unionists and Nationalists. The announcement received a sympathetic response from Mr. Redmond and Sir Edward Carson, and also from Mr. O'Brien for the Independent Nationalists. In the meantime the House had negatived without a division a proposal made by Sir John Lonsdale to extend the operations of the Military Service Act to Ireland.

Mr. Lloyd George's Negotiations

Parliament rose for the Easter recess on June 1, and *Mr. Lloyd George's negotiations* proceeded in the meantime. The first intimation of a possible breakdown came with the resignation of Lord Selborne from the Cabinet on June 27, five days after the House had resumed. Other Unionist members of the Cabinet were understood to be also on the point of resigning. On the other hand, the Nationalist Party, including a special convention of Ulster Nationalists, had agreed to a compromise by which on the setting-up of a temporary Home Rule Parliament in Dublin, six Ulster counties and the three cities of Belfast, Londonderry, and Newry were to be excluded.

A *Royal Commission*, consisting of Lord Hardinge of Penshurst, Mr. Justice Shearman, and Sir Mackenzie Chalmers, had been appointed to inquire into the causes of the rebellion, and its report was published on July 4. The "general conclusion" it drew was "that the main cause of the rebellion appears to be that lawlessness was allowed to grow unchecked, and that Ireland for several years past has been administered on the principle that it was safer and more expedient to leave the law in abeyance—if collision with any faction of the Irish people could thereby be avoided."

The Report absolved the Lord Lieutenant from responsibility. "We are, however," it said, "of opinion that the Chief Secretary, as the administrative head of your Majesty's Government in Ireland, was primarily responsible for the situation that was allowed to arise and the outbreak that occurred." Sir Matthew Nathan was blamed because "he did not sufficiently impress upon the Chief Secretary, during the latter's prolonged absence from Dublin, the necessity for more active measures to remedy the situation in Ireland, which in December last in a letter to the Chief Secretary he described as 'most serious and menacing.'"

On July 10 Mr. Asquith stated the proposals of the Government in the House. They involved certain additional changes in the existing Home Rule Act and provided:

> The Home Rule Act as amended to come into force as soon as possible after Parliament had agreed to the Ulster exclusions.
>
> The Irish House of Commons to consist for the present of the Nationalist members elected to sit at Westminster.
>
> The Appeal Court in Dublin to consist of Judges appointed by the Imperial Executive.
>
> Words to be inserted to make it abundantly clear that the Irish Executive could not encroach on the undivided power and responsibility of the Imperial authority in all pertaining to the successful prosecution of the war, especially with reference to the Defence of the Realm Act and other emergency legislation.
>
> The Bill to remain in force during the war and for 12 months thereafter. The period to be extended by Order in Council if Parliament had not by that time made further and permanent provisions for the Government of Ireland.
>
> Ulster (the six counties) was to be definitely struck out of the Bill, and it would require a new Bill to include it again.

No further information was given in the Commons, but in the Lords on the following night Lord Lansdowne amplified the Prime Minister's statement by summarising the measures to be taken for Irish Government during the period before the new Bill could be passed. He foreshadowed:

> The appointment of an Irish Minister responsible to the Imperial Parliament, acting in conjunction with a capable military officer in command of sufficient power to maintain order.
>
> No general amnesty for the Irish prisoners.
>
> The carrying of arms, without permission, to be prohibited by Order in Council.
>
> The appointment of a new Chief to the Royal Irish Constabulary in place of Sir Neville Chamberlain, who desired to retire.
>
> Trials before resident magistrates.

Lord Lansdowne impressed very definitely on the House of Lords that the military authorities and the Imperial Cabinet were retaining a very strong control.

This speech brought an immediate renewal of the crisis. Mr. Redmond, in a manifesto next day, described it as "an insult to Ireland." The climax was reached on July 24, when Mr. Redmond asked definitely when the Bill was to be introduced and as to the statement that changes were to be made in the draft term of the agreement. Mr. Asquith intimated that the new proposal was that the Irish members at Westminster should be reduced in number, as soon as the Home Rule Parliament was set up, but should be allowed to come back at full strength when the temporary settlement came up for review after the war. He also explained precisely that Ulster would be excluded permanently or so long as she refused to come in voluntarily. Mr. Redmond at once moved the adjournment of the House, and in the subsequent debate Mr. Asquith announced that *no Bill would be introduced at all*

unless the Irish parties (Nationalists and Unionists) were in agreement. No such agreement was reached and the proposals dropped. The Nationalists resumed, but only in a tentative way, the old methods of "obstruction." On July 27 Mr. Ginnell, an Independent Nationalist, refused to obey the ruling of the Chair and was suspended. On July 31 Mr. Dillon called for an immediate disclosure of the Government plan for the government of Ireland during the war. Mr. Asquith thereupon announced the *resetting-up of the Castle system.* Mr. Duke (a Unionist) became the new Chief Secretary, Mr. J. H. Campbell (also a Unionist) was already Attorney-General, and Lord Wimborne consented to return to the Viceroyalty with somewhat enlarged powers. Mr. Redmond at once protested against this latest "blunder" of setting up a Unionist administration. During a hot debate Mr. Bonar Law defended the Unionist members of the Government for their action during the crisis, and declared that Home Rule should never come into operation until there was an amending Bill which would "carry out fairly the settlement and views of the other section in Ireland."

During the summer recess, from Aug. 23 to Oct. 11, a new turn was given to the situation by the almost complete cessation of voluntary recruiting in Ireland, the weakening in consequence of the Irish Division, and the renewed demand in some British quarters that the Military Service Acts should be extended to Ireland. Mr. Redmond denounced this latter proposal as madness, and declared that the Government were themselves responsible through their mishandling of the Irish recruiting problem for its failure. On Oct. 18 he formally moved in the House of Commons a *vote of censure* which asserted: "That the system of Government at present maintained in Ireland is not consistent with the principles for which the Allies are fighting in Europe, and has been mainly responsible for the recent unhappy events and for the present state of feeling in that country." He demanded the abolition of martial law and the immediate release of 500 Sinn Fein prisoners who still remained interned, the treatment of the sentenced rebels as "political" offenders, and the trusting of the people by putting the Home Rule Act into force. The answer of the Government was that Ireland could have Home Rule if Irishmen themselves agreed to it, but Ulster blocked the way; that two-thirds of the arrested Sinn Feins had been released and that a considerable number of others could be released on giving an assurance not again to engage in rebellion. The vote of censure was defeated by 303 to 106 votes. The Government continued their conciliatory policy while maintaining martial law. On November Sir John Maxwell left Ireland to take the Northern Command in England and was succeeded in Ireland by Gen. Sir Bryan Mahon.

II.—HISTORY OF THE MOVEMENT

Although a demand for a repeal of the Act of Union has been continuous on the part of Irish Nationalists since 1801, when the two Parliaments were merged, the Irish question became an issue of first-class importance in English politics in 1885, when, after the General Elections, which left the Liberals in a small minority, if faced with a combination of Conservatives and Nationalists, Mr. Gladstone allowed it to become known that, if returned to office, he was prepared to "deal in a liberal spirit" with the demand for Home Rule. The chief subsequent events have been:

1886. Feb.—Mr. Gladstone, Prime Minister, with support of Mr. Parnell and 86 Nationalists. Lord Hartington (afterwards Duke of Devonshire) declined office, and, with other seceders, formed the Liberal Unionist Party. Mr. Joseph Chamberlain, President of the Local Government Board.

Mar.—Mr. Chamberlain joined the Liberal Unionists.

April.—First Home Rule Bill introduced.

June 8.—Bill defeated by 30 votes. Mr. Gladstone appealed to country.

Aug.—New Parliament assembled with 316 Conservatives, 77 Liberal Unionists, 192 Gladstonians, and 85 Nationalists. Mr. Gladstone resigned. Lord Salisbury, Prime Minister.

Round Table Conference between Liberal Unionists and Gladstonians failed.

1889.—Divorce proceedings against Mr. Parnell.

1890. Irish Party split into 30 Parnellites and 54 Anti-Parnellites.

1891. Oct. 6.—Death of Mr. Parnell. Mr. John Redmond succeeded as leader of his section.

1892.—General Election. Home Rule majority (Liberal, Labour, and Irish) of 40. Mr. Gladstone, Prime Minister.

1893. Feb.—Second Home Rule Bill introduced.

Sept.—Lords rejected the Bill on Second Reading. Bill dropped.

1894. Mar.—Mr. Gladstone retired from Parliament. Lord Rosebery, Premier.

1895. June.—Liberal Government defeated.

General Election gave Unionist majority of 152. Lord Salisbury, Premier.

1899.—Sir H. Campbell-Bannerman elected Leader of the Liberal Party in Commons.

1900. Jan. 30.—Irish Party reunited under Mr. Redmond.

1901. Dec.—Lord Rosebery declared at Chesterfield that the Liberal Party must "clean its slate" of Home Rule. Liberal Imperialist League formed.

1902. July.—Lord Salisbury retired. Mr. Balfour, Premier, with support of Mr. Chamberlain.

1903. Sept.—Mr. Chamberlain resigned from Ministry to devote himself to Tariff Reform campaign.

1905. Dec.—Mr. Balfour resigned. Sir H. Campbell-Bannerman formed Ministry, and appealed to country.

1906. Jan.—General Election. Home Rule not an issue. Liberal and Labour majority of 358.

1908.—Retirement and death of Sir H. Campbell-Bannerman. Mr. Asquith, Premier. Campaign against the House of Lords' Veto.

1910. Jan.—General Election. Liberal, Labour, and Irish majority of 124.

April.—Parliament Act introduced.

May.—Death of King Edward.

Dec.—Second General Election. Liberals, 272; Labour, 42; Nationalists, 84. Unionists, 272. Ministerial majority of 126, based on Irish and Labour support.

1911. Feb.—Parliament Act reintroduced.

Aug. 9.—Parliament Act passed by Lords under threat of creation of peers.

Nov.—Mr. Bonar Law elected Unionist Leader.

1912. April.—Mr. Asquith reintroduced Home Rule Bill.

Sept. 28.—Ulster Covenant signed as follows:

Being convinced in our consciences that Home Rule would be disastrous to the material well-

The New HAZELL, 1917

being of Ulster as well as of the whole of Ireland, subversive of our civil and religious freedom, destructive of our citizenship, and perilous to the unity of the Empire, we, whose names are underwritten, men of Ulster, loyal subjects of his Gracious Majesty King George V, humbly relying on the God Whom our fathers in days of stress and trial confidently trusted, hereby pledge ourselves in Solemn Covenant throughout this our time of threatened calamity to stand by one another in defending, for ourselves and our children, our cherished position of equal citizenship in the United Kingdom, and in using all means which may be found necessary to defeat the present conspiracy to set up a Home Rule Parliament in Ireland; and, in the event of such a Parliament being forced upon us, we further solemnly and mutually pledge ourselves to refuse to recognise its authority. In sure confidence that God will defend the right, we hereto subscribe our names, and, further, we individually declare that we have not already signed this Covenant.

1913. Jan.—Sir E. Carson's motion for the exclusion of Ulster rejected by Commons by 294 to 197.

Jan. 16.—Bill passed by Commons by 367 to 251 votes.

Jan. 30.—Lords rejected Bill on Second Reading by 326 to 69.

May 7.—Bill reintroduced into Commons.

May 16.—Sir E. Carson at Belfast said Ulster would in the last resort resist by force.

July 7.—Bill again passed Third Reading by Commons by 352 to 243.

July 12.—Formal inauguration of Ulster Volunteers, previously a "secret" force.

July 15.—Lords again rejected Bill by 302 to 64 votes, after passing a resolution declining to proceed with the Bill "until it has been submitted to the judgment of the country."

Sept.—Training camps formed in connection with the Ulster Volunteers. Sir E. Carson announced the establishment of a Provisional Government committee.

SESSION OF 1914

Feb. 13.—Mr. Walter Long moved a resolution calling for a General Election before any further step was taken with a Home Rule measure. This was defeated, as was an Amendment to the Address.

Mar. 9.—The Bill introduced for the third time into the House of Commons.

13.—Mr. Asquith, to meet the growing tension, made an offer to secure a settlement by consent of an **exclusion for a period of six years of Ulster,** after a poll by counties of those Ulster counties which so decided.

Mar. 19.—Mr. Bonar Law moved a vote of censure on the Government for refusing to give complete details of their exclusion proposals before proceeding with the general Bill. This was rejected by a majority of 93.

Mar. 20.—Announcement of **a grave crisis in connection with the troops** in Ireland; that in consequence of orders to move troops into Ulster, and the sending of a warship to Belfast, many officers of the Curragh garrison had tendered their resignations.

Mar. 24.—Announcement that Col. Seely (Minister for War), Sir John French (Inspector-General), and Sir J. S. Ewart (Quartermaster-General) had initialled a memorandum, given to Brig.-General H. P. Gough, commanding the cavalry on the Curragh, pointing out that it was the duty of all soldiers to obey lawful commands, but concluding: "But they (the Cabinet) have no intention whatever of taking advantage of this right to crush political opposition to the policy or principles of the Home Rule Bill."

Mar. 26.—Col. Seely, Sir John French, and Sir J. S. Ewart tendered their resignations in consequence of the Government disavowal of the final clause of the memorandum they had initialled. **Mr. Asquith** took temporary office as **War Minister.**

April 6.—Home Rule Bill came up for Second Reading and was carried by 356 to 278 votes.

April 24.—**Gun-running exploit** of the Ulster Volunteers. Between 35,000 and 40,000 rifles and 1,000,000 rounds of ammunition were landed at Larne, Bangor, and Donaghadee.

May 12.—Mr. Asquith announced that an Amending Bill would be introduced to provide for the exclusion of Ulster, and to come into force simultaneously with the Home Rule Bill.

May 20.—Financial resolutions of the Home Rule Bill were carried by a majority of 88.

May 25.—The **Home Rule Bill passed its Third Reading** by 351 to 274.

June 9.—Mr. Redmond extended his formal recognition to the **Nationalist Volunteer Force,** which had been growing rapidly as an offset to the Ulster Volunteers.

June 16.—Lord Lansdowne, in the Lords, called attention to the gravity of the situation in Ireland, and the delay of the Government in producing its Amending Bill; while Lord Robert Cecil in the Commons moved the adjournment to discuss the Volunteer Forces, and to move a vote of censure, which was rejected by 288 to 223.

June 23.—The Amending Bill was introduced into the House of Lords by Lord Crewe. In Committee a series of amendments were passed by large majorities. These **completely altered the character of the Bill,** chiefly by excluding the whole of Ulster—including the counties predominantly Nationalist—without a ballot and indefinitely; and by giving the Crown power to suspend the operation of the Home Rule Bill until a Commission had reported on the Constitutional relation of Ireland to the other parts of the United Kingdom.

July 20.—The King summoned **a conference at Buckingham Palace** of two leaders from each of the parties directly interested. The Speaker was to preside, and the leaders chosen were: Mr. Asquith and Mr. Lloyd George; Lord Lansdowne and Mr. Bonar Law; Mr. Redmond and Mr. Dillon; Sir E. Carson and Capt. Craig. In his speech at the opening, the King referred to the "cry of civil war on the lips of the most responsible and sober-minded of my people," a phrase which was seized upon by Home Rulers in the country as an expression of partisanship in favour of the Unionists. The Conference sat for four days, and being unable to agree either in principle or in detail upon the defining of an area to be excluded from the Home Rule Bill, brought its meetings to a close.

July 26.—Nationalist Volunteers landed some 3,000 rifles, when the police, who had intercepted the volunteers on their march back to Dublin, came into conflict with a mob of sympathisers with the volunteers. Stones were thrown. The King's Own Scottish Borderers in garrison were called out; a volley was fired, with the result that four persons were killed, and many injured. Mr. Harrel, the Assistant Commissioner of Police, who was held directly responsible for calling in the military, was immediately suspended; but

Mr. Redmond demanded in the Commons that his superior officer, Sir John Ross, should also be suspended and put on trial; that there should be an immediate inquiry into the whole circumstances, and that the King's Own Scottish Borderers should be moved from Ireland. An inquiry was ordered, two constables were suspended, and the Second Reading of the Amending Bill was again postponed.

July 30.—Mr. Asquith announced that, after consultation with Mr. Bonar Law, the Government had decided to **defer the Amending Bill indefinitely** without prejudice to the interests of any of the parties.

Aug. 3.—Mr. Redmond made a memorable declaration that the Government might withdraw all their troops from Ireland, and leave it to be defended by the Nationalist and Ulster Volunteers working loyally together.

Sept. 15.—Suspensory Bill passed.

Sept. 18.—Home Rule Bill received Royal Assent.

HOME RULE AND THE AMENDING BILLS

The following is a summary of the provisions of the Home Rule Bill as passed, and of the Amending Bill (1) as introduced by the Government in the House of Lords; (2) as altered by the amendments before it left the Lords.

The Lords also passed the amendment to the Home Rule Bill providing for the adoption of proportional representation in the Dublin Parliament; and added a clause to the Amending Bill, to suspend the operation of the Home Rule Act until a Commission shall have reported on the constitutional relations of Ireland to the other parts of the United Kingdom.

HOME RULE BILL

1. Irish Parliament, with Executive responsible to it, to be set up. Senate to consist of 40 members, nominated for the first term, and elected afterwards by proportional representation. House of Commons to consist of 164 members.

2. Irish representation in the Imperial Parliament to be reduced to 42.

3. Besides the sum to be determined by the Joint Exchequer Board to represent the net cost of Irish Services, a sum of £500,000, diminishing in each year after the third by £50,000 until it is reduced to £200,000, to be paid to the Irish Exchequer.

4. The Irish Parliament to have power to vary any Customs and Excise duties levied as Imperial taxes only by way of addition, but not to levy new duties.

5. Judges of the Supreme Court, County Courts, etc., to be appointed by the Lord Lieutenant. The appeal from Courts in Ireland to the House of Lords to cease, and to lie instead to the Judicial Committee of the Privy Council.

6. The Irish Parliament to have power to make laws as to postal communication between places in Ireland.

7. Management and control of the Royal Irish Constabulary to be transferred to the Irish Government six years from the appointed day.

8. Old Age Pensions, National Insurance, Labour Exchanges, and other reserved services to be transferred to the Irish Government if a resolution providing for such transfer is passed by both Houses of the Irish Parliament.

9. Civil Service Committee to be established to deal with existing officers.

10. The Bill to come into operation on the first Tuesday in the eighth month after the month in which it is passed, and the Irish Parliament to be summoned to meet not later than four months after the said Tuesday.

GOVERNMENT AMENDING BILL

1. Poll to be taken, within three months of the passing of the Home Rule Bill, of Ulster counties for or against exclusion for six years.

2. If a majority of the votes recorded in a county are in favour of exclusion, the Home Rule Bill not to apply to that county for six years after the first meeting of the Irish Parliament.

3. The excluded area to be administered by the Lord Lieutenant through such officers and departments as may be directed by Order in Council.

4. The number of nominated members of the Irish Senate not to be altered, and the term of office of the first Senators to be six years instead of five.

5. Members not to be elected to the Irish House of Commons for the excluded area, which shall continue to return members to the Imperial Parliament.

6. The Joint Exchequer Board to determine the cost of Irish Services, and divide the sum between the excluded area and the rest of Ireland in proportion to population, subject to adjustments in cases of the ascertainment of the actual cost of any Service in one area or the other.

7. The judicial provisions of the Home Rule Bill to apply to the excluded area, subject to a provision that, where a cause is tried in the excluded area or a party to a cause is resident in it, the Judge shall be either an existing Judge of the Supreme Court or one appointed by the King. Judges of the Supreme Court, County Courts, etc., to be appointed by the King.

8. The Civil Service Committee to allot to the excluded area such number of officers as they think proper.

AMENDING BILL AS ALTERED BY THE LORDS

1. The Home Rule Bill not to apply to the province of Ulster.

2. The excluded area to be administered by a Secretary of State through such officers and departments (not those exercising executive authority under the Home Rule Bill) as may be directed by Order in Council. Orders in Council to be disallowed if either House of the Imperial Parliament presents an address to the King against the draft within 21 days of its being laid.

3. The excluded area to continue to return members to the Imperial Parliament. Irish representation in the United Kingdom House of Commons to be 27 instead of 42.

4. All Judges of the Supreme Court, County Courts, etc., to be appointed in the same manner and to hold office by the same tenure as that by which the office is held at the date of the passing of the Home Rule Bill, and the existing appeal from Courts in Ireland to the House of Lords to continue.

5. The general subject-matter of the Acts relating to land purchase to be included among the reserved matters.

6. Control and management of the Royal

Irish Constabulary not to be transferred to the Irish Government. The Lord Lieutenant to be responsible for the control and management of the Dublin Metropolitan Police.

7. Nothing in the Bill or in the Home Rule Bill to affect prejudicially the powers, rights, privileges, or immunities of any person in the excluded area.

8. Provisions as to finance and as to the allotment of Civil servants to the excluded area to remain the same as in the Government Amending Bill.

WELSH CHURCH ACT, 1914

On Sept. 18, 1914, the Bill for the disestablishment of the Welsh Church became law. The Suspensory Act, which became law on the same day, postponed the date of disestablishment. On Sept. 24, 1914, Commissioners of Church Temporalities in Wales were appointed for giving effect to the Act.

The Act provides, *inter alia*, that on disestablishment the Welsh bishops, as such, will cease to be summoned to, or to be qualified to sit or vote in, the House of Lords, but they and all other Welsh ecclesiastical dignitaries at the date of the passing of the Act will retain for their lives their titles and precedence. The bishops and clergy of the disestablished Church will, however, be eligible to be elected as members of the House of Commons.

Under Section 3 of the Act it is provided that from the date of disestablishment ecclesiastical courts and persons in Wales will cease to exercise any jurisdiction, and ecclesiastical law will cease to exist as law. To provide for the period which must necessarily elapse between the date of disestablishment and the establishment of a new constitution for the disestablished Church, it is enacted that the ecclesiastical law, the articles, doctrines, rites, and ritual of the Established Church shall continue to exist as a sort of trust deed, in accordance with which the members of the Church had mutually agreed to be bound, but any synods of the disestablished Church when formed will at any time be able to make any alteration in Church law or doctrine as they think fit. They will have power to set up any voluntary Church Courts they may desire. There may also be appeals from these courts to the Provincial Court of the Metropolitan, if the Archbishop of Canterbury, with the consent of the Privy Council, assents to it, but the further right of appeal to the Judicial Committee of the Privy Council is finally abolished. After the date of disestablishment, the Act further provides that the bishops and clergy of the Church in Wales shall cease to be members of, or to be represented in the Convocation of the Province of Canterbury.

Lay patrons can, if application is made by them to the Welsh Commissioners within six months of the passing of the Act, be compensated for the extinction of their rights of patronage up to a maximum of one year's emoluments of the benefice.

Under the Act a part only of the property of the Church in Wales is to be alienated and applied to purposes other than ecclesiastical. The Welsh Church is to be left in possession of all Churches, all Parsonages, all Fabric Funds, all property representing, directly or indirectly, grants made by Queen Anne's Bounty out of moneys provided by Parliament, or out of the Royal Bounty Fund where derived from Welsh sources, and all "private benefactions"—a term which is defined to mean all property attributable to gifts by private persons or to voluntary subscriptions made since the year 1662 (the date of the Caroline Act of Uniformity), together with property representing the proceeds of sale of advowsons under the Lord Chancellor's Augmentation Act which have been applied to the augmentation of livings in Wales or Monmouthshire.

In addition the Governors of Queen Anne's Bounty retain such part of the property vested in them in pursuance of the Act as represents directly or indirectly grants made by them out of the Royal Bounty Fund derived from sources other than Welsh sources, and, similarly, the Ecclesiastical Commissioners retain all property representing grants made by them from sources other than Welsh sources—both bodies being given power to transfer the whole of such property to the Welsh Church.

The remainder of the Church property, consisting of endowments dating from before 1662 and including the ancient Welsh episcopal and capitular estates now in the hands of the Ecclesiastical Commissioners, is to be alienated and transferred either to County Councils or to the University of Wales. But even here the Church will not be immediately deprived of its interest in the property, because to every person who by freehold tenure at the passing of the Act was holding an ecclesiastical office, there is reserved a right to the emoluments of the office, so long as he continues to hold that or any other ecclesiastical office in Wales. The Act however further provides that, if the representative body in the Church in Wales so elect, there shall be paid to it a capital sum equal to the aggregate value of the interests of holders of ecclesiastical offices; and thereupon the Representative Body will become responsible for dealing with such interests—an arrangement known as the "Scheme of Commutation."

According to the principal Act, the date of disestablishment was to be not less than 6 months, nor more than 12 months, after the passing of the Act. But by the Suspensory Act 1914, passed in view of the war, the minimum period of 6 months was extended to 12 months, with the proviso that should the war be then still continuing, the date of disestablishment might be further postponed by Order in Council until some later date "not being later than the end of the present war." Subsequently objection was taken to this postponement as inadequate; and in January 1915 a Bill was introduced into the House of Lords by the Duke of Devonshire to amend the Suspensory Act in this and other respects. This Bill was eventually dropped in favour of a Bill introduced by the Government on March 9, 1915. This latter Bill, which was passed through all its stages in the House of Lords, proposed to defer disestablishment until 6 months after the expiration of the war; t the same time it provided for amendment of the principal Act in certain other respects. But it was not proceeded with in the House of Commons and was eventually withdrawn on July 26, 1915. Accordingly, as the law now stands, the date of disestablishment must fall "not later than the end of the present war"—a phrase which it is understood will in due course be given a statutory interpretation.

THE FISCAL QUESTION

Since the War the question of trade and its protection has taken on an entirely new aspect. Previous to August 1914 the subject of tariffs was a matter of acute difference between the two great political parties in the State, but it is improbable now that the subject will ever be approached in the old controversial spirit. The various steps taken up to date are detailed below, and at the end is a résumé of the position as it stood at the beginning of the War.

BRITISH TRADE AFTER THE WAR

Report of a Sub-Committee of the Advisory Committee to the Board of Trade on Commercial Intelligence with respect to Measures for securing the position, after the War, of certain branches of British Industry.

This Committee was appointed on July 15, 1915, to prepare and submit a Report showing what steps should be taken to secure the position, after the war, of firms who have undertaken industries in consequence of the Exchange Meeting leading up to the British Industries Fair. The branches of industry into which they inquired were:—(*i*) paper manufacture; (*ii*) the printing trade, including colour printing; (*iii*) the stationery trade; (*iv*) the jewellers' and silversmiths' trade; (*v*) cutlery; (*vi*) fancy leather goods; (*vii*) glass ware, including table glass, laboratory ware, and glass bottles; (*viii*) china and earthenware; (*ix*) toys; (*x*) electrical apparatus; (*xi*) brush, etc., trade; (*xii*) hardware.

The Committee found that the approximate value of the imports into the United Kingdom before the war of the various classes of goods detailed above was £15,975,000 a year, and of this total £7,669,000 were of German origin and £504,000 of Austro-Hungarian origin. Many witnesses were heard by the Committee and a summary of the evidence taken is published in Cd. 8275, 4*d*. The Committee's Report, Cd. 8181, 2½*d*., contained recommendations on (1) scientific research and training; (2) copyright; (3) patents; (4) trade marks; (5) transport facilities; (6) financial assistance by the joint-stock banks; (7) trade exhibitions; (8) protection of British trade marks abroad; (9) establishment of a Ministry of Commerce; (10) extension of the system of trade commissioners; (11) the consular service; (12) undervaluation of foreign imports; (13) commercial travellers in British Dominions; (14) trade catalogues, and (15) tariff protection. Their recommendations under this latter head were as follows:—

> We are of opinion that where the national supply of certain manufactured articles, which are of vital importance to the national safety, or are essential to other industries, has fallen into the hands of manufacturers and traders outside this country, British manufacturers ready to undertake the manufacture of such articles in this country should be afforded sufficient tariff protection to enable them to maintain such production after the war.
>
> With reference to the strongly expressed opinion of many of the witnesses that the enactment of protective duties on the industries other than those referred to in the preceding paragraph, which have formed the subject of our inquiry, is essential to their maintenance, we wish to report that in view of the following considerations:—
>
> (*a*) that there exists a strong desire to respond to the feeling in our Dominions in favour of an Imperial preference in trade, and that there is also a strong desire to arrange preferential trading with those who are our Allies in the present war, and
>
> (*b*) that the present high direct taxation tends to raise the rate of interest on money, and cheap and abundant capital for the employment of their labour is of the greatest importance to the working classes,
>
> it will be necessary to impose some widely spread import duties, and we are therefore prepared to recommend that a larger proportion of the Revenue should be raised by reasonable import duties. We are of opinion that such import duties would go a long way towards satisfying the requests for special protective treatment for the industries which we have had under consideration.
>
> We would only add that in view of the threatened dumping of stocks which may be accumulated in enemy countries, the Government should take such steps as would prevent the position of industries likely to be affected, being endangered after the war or during the period required for a wider consideration of the whole question.

ECONOMIC CONFERENCE OF THE ALLIES

held at Paris, June 14–17, 1916

At the great economic conference of the Allies held in Paris (the British Representatives being Mr. A. Bonar Law, the Marquess of Crewe, Mr. W. M. Hughes, Prime Minister of Australia, and Sir George Foster, of Canada) the following recommendations were made:—

I

The representatives of the Allied Governments have met at Paris under the presidency of M. Clémentel, Minister of Commerce, on June 14, 15, 16, and 17, 1916, for the purpose of fulfilling the mandate given to them by the Paris Conference of March 28, 1916, of giving practical expression to their solidarity of views and interests, and of proposing to their respective Governments the appropriate measures for realising this solidarity.

II

They declare that after forcing upon them the military contest in spite of all their efforts to avoid the conflict, the Empires of Central Europe are to-day preparing, in concert with their Allies, for a contest on the economic plane, which will not only survive the re-establishment of peace, but will at that moment attain its full scope and intensity.

III

They cannot therefore conceal from themselves that the agreements which are being prepared for this purpose between their enemies have the obvious object of establishing the domination of the latter over the production and the markets of the whole world and of imposing on other countries an intolerable yoke.

In face of so grave a peril the Representatives of

the Allied Governments consider that it has become their duty, on grounds of necessary and legitimate defence, to adopt and realise from now onward all the measures requisite on the one hand to secure for themselves and for the whole of the markets of neutral countries full economic independence and respect for sound commercial practice, and on the other hand to facilitate the organisation on a permanent basis of their economic alliance.

For this purpose the Representatives of the Allied Governments have decided to submit for the approval of those Governments the following resolutions:—

A

MEASURES FOR THE WAR PERIOD

I

The laws and regulations prohibiting trading with the enemy shall be brought into accord.

For this purpose:

A.—The Allies will prohibit their own subjects and citizens and all persons residing in their territories from carrying on any trade with:—

1. The inhabitants of enemy countries whatever their nationality.
2. Enemy subjects wherever resident.
3. Persons, firms, and companies whose business is controlled wholly or partially by enemy subjects or is subject to enemy influence and whose names are included in a special list.

B.—They will prohibit the importation into their territories of all goods originating in or coming from enemy countries.

C.—They will devise means of establishing a system enabling contracts entered into with enemy subjects and injurious to national interests to be cancelled unconditionally.

II

Business undertakings owned or operated by enemy subjects in the territories of the Allies will all be sequestrated or placed under control; measures will be taken for the purpose of winding up some of these undertakings and of realising their assets, the proceeds of such realisation remaining sequestrated or under control.

III

In addition to the export prohibitions which are necessitated by the internal situation of each of the Allied countries, the Allies will complete the measures already taken for the restriction of enemy supplies, both in the mother countries and in the Dominions, Colonies, and Protectorates:

1. By unifying the lists of contraband and of export prohibition, and particularly by prohibiting the export of all commodities declared absolute or conditional contraband;
2. By making the grant of licences for export to neutral countries from which export to enemy territories might take place conditional upon the existence in such countries of control organisations approved by the Allies; or, in the absence of such organisations, upon special guarantees such as the limitation of the quantities exported, supervision by Allied consular officers, etc.

B

TRANSITORY MEASURES FOR THE PERIOD OF COMMERCIAL, INDUSTRIAL, AGRICULTURAL, AND MARITIME RECONSTRUCTION OF THE ALLIED COUNTRIES.

I

The Allies declare their common determination to ensure the re-establishment of the countries suffering from acts of destruction, spoliation, and unjust requisition, and decide to join in devising means to secure the restoration to those countries as a prior claim, of their raw materials, industrial and agricultural plant, stock and mercantile fleet, or to assist them to re-equip themselves in these respects.

II

Whereas the war has put an end to all the treaties of commerce between the Allies and the Enemy Powers, and whereas it is of essential importance that, during the period of economic reconstruction which will follow the cessation of hostilities, the liberty of none of the Allies should be hampered by any claim put forward by the Enemy Powers to most-favoured-nation treatment, the Allies agree that the benefit of this treatment shall not be granted to those Powers during a number of years to be fixed by mutual agreement among themselves.

During this number of years the Allies undertake to assure to each other so far as possible compensatory outlets for trade in case consequences detrimental to their commerce result from the application of the undertaking referred to in the preceding paragraph.

III

The Allies declare themselves agreed to conserve for the Allied countries, before all others, their natural resources during the whole period of commercial, industrial, agricultural, and maritime reconstruction, and for this purpose they undertake to establish special arrangements to facilitate the interchange of these resources.

IV

In order to defend their commerce, their industry, their agriculture, and their navigation against economic aggression resulting from dumping or any other mode of unfair competition, the Allies decide to fix by agreement a period of time during which the commerce of the enemy powers shall be submitted to special treatment and the goods originating in their countries shall be subjected either to prohibitions or to a special régime of an effective character.

The Allies will determine by agreement through diplomatic channels the special conditions to be imposed during the above-mentioned period on the ships of the enemy powers.

V

The Allies will devise the measures to be taken jointly or severally for preventing enemy subjects from exercising, in their territories, certain industries or professions which concern national defence or economic independence.

C

PERMANENT MEASURES OF MUTUAL ASSISTANCE AND COLLABORATION AMONG THE ALLIES

I

The Allies decide to take the necessary steps without delay to render themselves independent

of the enemy countries in so far as regards the raw materials and manufactured articles essential to the normal development of their economic activities.

These steps should be directed to assuring the independence of the Allies not only so far as concerns their sources of supply, but also as regards their financial, commercial, and maritime organisation.

The Allies will adopt the methods which seem to them most suitable for the carrying out of this resolution, according to the nature of the commodities and having regard to the principles which govern their economic policy.

They may, for example, have recourse either to enterprises subsidised, directed, or controlled by the Governments themselves, or to the grant of financial assistance for the encouragement of scientific and technical research and the development of national industries and resources; to customs duties or prohibitions of a temporary or permanent character; or to a combination of these different methods.

Whatever may be the methods adopted, the object aimed at by the Allies is to increase production within their territories as a whole to a sufficient extent to enable them to maintain and develop their economic position and independence in relation to enemy countries.

II

In order to permit the interchange of their products, the Allies undertake to adopt measures for facilitating their mutual trade relations both by the establishment of direct and rapid land and sea transport services at low rates, and by the extension and improvement of postal, telegraphic, and other communications.

III

The Allies undertake to convene a meeting of technical delegates to draw up measures for the assimilation, so far as may be possible, of their laws governing patents, indications of origin, and trade marks.

In regard to patents, trade marks, and literary and artistic copyright which have come into existence during the war in enemy countries, the Allies will adopt, so far as possible, an identical procedure, to be applied as soon as hostilities cease.

This procedure will be elaborated by the technical delegates of the Allies.

D

Whereas for the purposes of their common defence against the enemy the Allied Powers have agreed to adopt a common economic policy, on the lines laid down in the Resolutions which have been passed, and whereas it is recognised that the effectiveness of this policy depends absolutely upon these Resolutions being put into operation forthwith, the Representatives of the Allied Governments undertake to recommend their respective Governments to take without delay all the measures, whether temporary or permanent, requisite for giving full and complete effect to this policy forthwith, and to communicate to each other the decisions arrived at to attain that object.

On July 19 the Government announced the appointment of a Committee to consider the commercial and industrial policy to be adopted after the war, with special reference to the conclusions reached at the Economic Conference of the Allies, and to the following questions:—

(*a*) What industries are essential to the future safety of the nation; and what steps should be taken to maintain or establish them.

(*b*) What steps should be taken to recover home and foreign trade lost during the war, and to secure new markets.

(*c*) To what extent and by what means the resources of the Empire should and can be developed.

(*d*) To what extent and by what means the sources of supply within the Empire can be prevented from falling under foreign control.

The Committee was composed as follows:—

The Right Hon. Lord Balfour of Burleigh, K.T., G.C.M.G. (chairman).
Mr. Arthur Balfour.
Mr. H. Gosling.
Mr. W. A. S. Hewins, M.P.
Mr. A. H. Illingworth, M.P.
Sir J. P. Maclay, Bt.
The Right Hon. Sir A. Mond, Bt., M.P.
Mr. Arthur Pease.
Mr. R. E. Prothero, M.P.
Sir Frederick H. Smith, Bt.
Mr. G. J. Wardle, M.P.
Sir A. A. Booth, Bt.

together with the following gentlemen, who are presiding over Board of Trade Committees on the position of important industries after the war:—

Sir H. Birchenough, K.C.M.G.
Lord Faringdon.
Sir C. G. Hyde.
The Hon. Sir C. A. Parsons, K.C.B., F.R.S.
Lord Rhondda.
Mr. G. Scoby-Smith.

Mr. Percy Ashley, of the Board of Trade, and Mr. G. C. Upcott, of the Treasury, being the secretaries to the Committee.

The Committee had not made any recommendations by the end of November 1916.

Mr. Asquith, in the House of Commons on Aug. 2, 1916, made an important statement on the resolutions of the Paris Conference. He warned the House that the Germans were already organising their industries for an attack upon Allied markets and for a vigorous competition in neutral markets after the war. He commended the Paris resolutions as representing the general lines on which the Allies were preparing to meet that threat, and announced that the following measures had already been taken:—

1. The Resolutions have been formally and publicly adopted by the British and French Governments.

2. The Government are under an obligation to see that the benefits redounding to industry from the adoption of this new policy are fairly apportioned among all sections of the community. The Government are anxiously considering in concert with representatives of labour, the outlines of a post-war policy, both social and industrial, intended to secure a fairer distribution among all classes of the products of our industry.

3. Some action to carry out the recommendations has already been taken. The Board of Trade are devising schemes to render us independent of enemy supplies of dyes, spelter, and other important articles.

4. A State scheme of assistance for scientific industrial research has been created.

5. Investigations are being made by expert committees into the conditions and needs of a number of important branches of industry and into problems of finance.

The New HAZELL, 1917

6. The question of commercial and industrial policy generally has been referred to a strong committee, of which Lord Balfour is chairman.

7. The Government are communicating with the Dominions and with India on the subject of the Resolutions. When Lord Balfour's committee reports it is proposed to hold a conference here with the representatives of the Dominions and India, at which the whole question of the Empire's trade policy will be considered.

FINANCIAL FACILITIES FOR TRADE

Finally, a very strong Committee, with Lord Faringdon as Chairman, was appointed by the Board of Trade to investigate the question of financial facilities for trade. The Report of the Committee (Cd. 8346) was issued on Sept. 22, 1916.

After expressing the view of the committee that there exists to a considerable extent at the present time in this country the machinery and facilities for the finance of home trade and large overseas contracts, and for carrying through much of the business which has been done by foreign banks, the report states that our arrangements are faulty in not co-ordinating many of the facilities mentioned. It says:—

"We recognise also that the British manufacturer may be frequently in want of finance of a kind which a British Joint Stock bank with liabilities could not prudently provide, whereas the German banks in particular seem to have been able to afford special assistance at the inception of undertakings of the most varied description, and to have laid themselves out for stimulating their promotion and for carrying them through to a successful completion. We conclude, therefore, that there is ample room for an Institution which, while not interfering unduly with the ordinary business done by the British Joint Stock Banks, by Colonial Banks, and by British-Foreign Banks and Banking Houses, would be able to assist British interests in a manner that is not possible under existing conditions.

The Committee, therefore, recommend the establishment of a BRITISH TRADE BANK, constituted under Royal Charter, to fill up the gap between the home banks and the Colonial and British-foreign banks and banking houses, and to develop facilities not provided by the present systems.

The main features of the Trade Bank should be as follows:—

I. It should have a capital of £10,000,000. The first issue should be from £2,500,000 to £5,000,000 upon which in the first instance only a small amount should be paid up, but which should all be called up within a reasonable time. A further issue should be made afterwards, if possible, at a premium.

II. It should not accept deposits at call or short notice.

III. It should only open current accounts for parties who are proposing to make use of the overseas facilities which it would afford.

IV. It should have a Foreign Exchange Department where special facilities might be afforded for dealing with bills in foreign currency.

V. It should open a Credit Department for the issue of credits to parties at home and abroad.

VI. It should enter into banking agency arrangements with existing Colonial or British-foreign banks, and where such arrangements were made it should undertake not to set up for a specified period its own branches or agencies. It should have power to set up branches or agencies where no British-foreign bank of importance exists.

VII. It should inaugurate an Information Bureau.

VIII. It should endeavour not to interfere in any business for which existing banks and banking houses now provide facilities, and it should try to promote working transactions on joint account with other banks, and should invite other banks to submit to it new transactions which, owing to length of time, magnitude, or other reasons, they are not prepared to undertake alone.

IX. Where desirable, it should co-operate with the merchant and manufacturer and possibly accept risks upon joint account.

X. It should become a centre for syndicate operations, availing itself of the special knowledge which it will possess through its information Bureau.

XI. It should receive Government assistance.

PRE-WAR TARIFF REFORM

In the 1904–5–6 editions of the ANNUAL a full historical account is given of the movement in favour of Fiscal Reform, which the late Mr. Chamberlain initiated by his speech at Birmingham on May 15, 1903, and by subsequent speeches in the House of Commons.

Mr. Chamberlain's Proposals

On Oct. 6, 1903, **Mr. Chamberlain,** freed from the responsibilities of office by his resignation from the Cabinet, **opened his campaign** at Glasgow. The **proposals made by him** at Glasgow and in subsequent speeches may be thus summarised:—

On foreign corn and flour	2*s.* per qr.
On foreign meat and dairy produce	5%
Foreign manufactured goods	10%*

Maize and bacon, however, should be excluded from taxation, as the latter forms the food of some of the poorest of the population: while maize is a raw material to the farmers, who feed their stock with it.

The **Colonies** should **have a preference** by exemption from the above duties; and a substantial preference should also be given to them upon **Colonial wines,** and also perhaps upon **Colonial fruits.**

These new duties should be accompanied by the following remissions of duty:—

Tea	¾ of duty†
Sugar	½ ,, ,,
Coffee and Cocoa	½ ,, ,,

The English Customs Tariff at present imposes duties on certain imported manufactured articles, particularly motor-cars, motor-cycles, cinema films, watches, and musical instruments. The Chancellor of the Exchequer, however, made it quite clear that the purpose of this tariff was the discouragement of imports in order to bring influences to bear on the foreign exchanges; "we have to tax now with objects beyond revenue, with objects which are purely temporary, and without regard to the permanent effect upon trade." The tariff was opposed by the very small group of "free traders under any circumstances," but was approved by an overwhelming majority of the House.

Speaking at the Albert Hall on Nov. 13, 1912, **Lord Lansdowne** said the leaders of the party were ready to undertake that they would specify precisely and exactly the amount, the limits

* To be applied to foreign nations enforcing high duties on British manufactures, and to average 10%, being arranged according to the amount of labour expended on the manufactured goods.

† Then at 6*d.*, in 1912 at 5*d.*, per lb.

within which they proposed to resort to protective taxation, and would undertake not to exceed those limits without further authorisation from the electorate. They would undertake also that any revenue raised from taxes of this kind should not be treated as ordinary revenue, but should be used "for the purpose of alleviating other burdens falling upon the shoulders of the working classes."

At Ashton-under-Lyne, on Dec. 16, 1912, Mr. Bonar Law said that the questions whether or not food duties would be imposed would not arise until after negotiations had been completed with the Colonies. If the Colonies did not wish food duties, no such duties would be imposed in any circumstances. This speech brought into light a divergence of view in the Unionist Party, and the resignations of Mr. Bonar Law and Lord Lansdowne were at one time threatened, but a letter addressed to them by their colleagues showed that they enjoyed the complete confidence of their party.

In a speech at Edinburgh on Jan. 24, 1913, Mr. Bonar Law said that the policy of tariff reform was now supported by the party with a unanimity which had never before existed, and that it included three things: the imposition of a moderate tariff, lower than exists now in any industrial country in the world, on foreign manufactured goods; the giving of a preference in the English market to the Dominions of the Crown, the largest preference which is possible without the imposition of new duties upon food; and the entering at once into communications with the Dominions, and if they found that an effective system of preference was not possible without a readjustment of food duties, the reference of that readjustment to the electorate.

The following is an outline of the pre-war arguments for and against Tariff Reform as presented by the pleaders on either side.

The Case for Tariff Reform

"The case for Tariff Reform, though complicated by intricate matters of fact, really turns upon a few simple, yet comprehensive principles. As Mr. Balfour has said, it is a policy to which all the tendencies of modern commerce, all the tendencies of domestic politics, have gradually been working up. In the days of the Corn Laws the home-grown supply of wheat was 88% of the whole; it is now 25% only. The foreign supply was then only 12%; it is 75% now. In 1846 out manufacturing supremacy placed us beyond all rivalry: we were the 'workshop of the world,' and therefore bound to dominate every market to which we might be admitted. In other words, trade was on a co-operative basis; foreign nations provided us with raw material and food, and purchased our finished goods in return. To-day, however, the dominating factor in trade is not co-operation, but foreign competition. This may be seen, first, in the extent to which other nations—notably Germany and the United States—are becoming independent of us so far as their own wants are concerned, and are, as manufacturers, competing with us in other markets; and secondly, in the extent to which they are competing with us in our own. These are facts which emerge like rocks above the mist and foam of partisan controversy. Tariff Reform, therefore, does not involve a revival of the old policy of Protection. It is imperative owing to entirely new conditions affecting our agricultural and manufacturing interests, and also to the economic needs of Empire. Tariff Reform, moreover, suggests the only rational and practicable method of raising the revenue required for Social Reform and the administration of the realm. It would secure this by removing a large part of our present oppressive taxation on food and tobacco, and put duties instead on imported foreign manufactured goods and products, which compete with things we manufacture and produce in this country. Such taxes would be paid partly or wholly by the foreigner, who would either have to reduce his prices or lose our market. Food prices would not be increased, because competition would be set up between a taxed and an untaxed supply, and such competition has a tendency to keep down prices. Tariff Reform in its Imperial aspect is concerned with the confederation and conservation of the Empire. In view of the relative growth of rival States, it becomes a primary duty to develop the wealth and productive power of every part of the Empire to the fullest possible extent, and to encourage the maximum of commercial intercourse, thus making the various parts mutually interdependent, and the whole, as far as possible, self-sufficient. Tariff Reform, therefore, means the scientific regulation of Trade and Finance in the interests of the Empire as a whole, in place of the present policy of *laissez faire*, which is the corollary of Free Trade."

The Case against Tariff Reform

"The main ground on which free traders resist the policy, or rather the intermixture of policies, which is popularly described by the term 'Tariff Reform,' is that that policy necessarily involves a return to Protection. They contend that the substitution of what is in effect State interference with and control of the departments of productive industry and commerce for individual initiative, enterprise, technical knowledge, and adaptability to varying economic conditions would prove both wasteful and pernicious. They deprecate the introduction of a fiscal system whereby taxation of commodities would be imposed not, as now, merely for the provision of necessary revenue, but largely for the benefit of particular interests in the State. They hold that the necessity of obtaining freely from external sources a very great portion of our necessary food and the raw materials of our industries is a factor which differentiates the position of the United Kingdom from that of all other countries; and that the natural channel through which those supplies reach us could not be either dammed or diverted by the interposition of customs barriers erected *ad hoc* without grave economic wastage.

"The proposed taxation of imported food, and of commodities, whether manufactured or not, which are in effect the raw materials of our industry, would raise the cost of our own requirements, thus limiting the purchasing power of our population; while it would interfere with our powers of competing with our foreign rivals in neutral markets. It would thus lead to the restriction both of our home and foreign trade, with consequent unemployment, diminished wages, and lowering of our standard of comfort. At the same time it would draw from our consumers in taxation an amount quite out of proportion to the revenue which it would provide for purposes of the State. The imposition of a Tariff Reform tariff would be immediately followed by the cancellation of the favourable tariff treatment which we now receive from practically every foreign country in the world, and the substitution of maximum tariffs against our goods.

"Free Traders deny, as contrary to the experience of all protected countries, that the

burden of import duties can be transferred to the foreigner, except perhaps in a very limited number of cases, which cannot be pre-determined, and then only to a very minute and temporary degree. They deny that the fiscal manipulations, which are necessarily involved in the proposed scheme of Imperial Reciprocity or Colonial Preference can produce any satisfactory result in strengthening the bonds of Empire, but contend that they will rather result in straining the bonds happily now existing; and finally they anticipate with dread the possibility of the growth in this country of political corruption and the fostering of selfish interests with which, in too many instances, the growth of Protection is irrevocably linked."

FISCAL ASSOCIATIONS AND ORGANISATIONS

The Tariff Commission was established by Mr. Chamberlain at the beginning of 1904, "to examine the fiscal proposals which he has submitted to the country; and to report as to (1) their probable effect on present conditions; (2) whether any modifications are desirable, and, if so, what should be the nature of such modifications, having due regard to the general interests of the community; (3) the best way in which, where there are conflicting interests, those interests can be harmonised; (4) what duties, if any, should be recommended.

Chairman, Sir V. Caillard.
Vice-Chairman, Sir Arthur Pearson.
Secretary, W. A. S. Hewins, M.P.
Assist. Sec. Percy A. Hurd.
Office, 7 Victoria St., London, S.W.

The **members of the Commission** are as follows:

Col. Sir Charles Allen.
Mr. F. Baynes.
Mr. J. H. Birchenough, C.M.G.
Rt. Hon. C. Booth, F.R.S.
Mr. H. Bostock.
Sir S. B. Boulton, Bt.
Sir Richard Burbidge.
Lord Chaplin.
Hon. Sir J. A. Cockburn, K.C.M.G.
Mr. J. G. Colmer, C.M.G.
Mr. J. Arthur Corah.
Mr. J. W. Dennis.
Lord Desborough.
Mr. Charles Eckersley.
Mr. Lewis Evans.
Lord Faringdon.
Sir Chas. Follett, C.B.
Mr. T. Gallaher.
The Hon. Vicary Gibbs.
Lt.-Col. Alfred Gilbey.
Sir William J. Goulding, Bt.
Rt. Hon. Sir F. L. Harris, M.P.
Mr. J. M. Harris.
Mr. W. Harrison.
Mr. Hugo Hirst.
Mr. John Hunter.
Mr. Robert Littlejohn.
Mr. Charles Lyle.
Mr. A. W. Maconochie.
Mr. W. H. Mitchell.
Mr. A. Mosely, C.M.G.
Hon. Sir Charles Parsons, K.C.B., F.R.S.
Sir Walter Peace, K.C.M.G.
Sir Westby Perceval, K.C.M.G
Mr. C. J. Phillips.
Mr. Joseph Rank.
Mr. R. Beaumont Thomas.
Sir John Turney.
Mr. Christopher Turnor.
Mr. S. J. Waring.

Imperial Tariff Committee, Birmingham.—*Pres.* Rt. Hon. Austen Chamberlain, M.P.; *Treas.* Neville Chamberlain; *Hon. Sec.* W. Byng Kenrick; *General Sec.* C. A. Vince, M.A.; *Organising Sec.* R. G. Hewins. *Office*, 39 Edmund Street, Birmingham.

Tariff Reform League, inaugurated July 21, 1903—*Pres.* (vacant); *Chairman of the League*, Viscount Duncannon, M.P.; *Chairman of Organisation Committee*, H. Page Croft, M.P.; *Sec.* G. E. Raine; *Assistant Sec.* J. Percy Askew; *Literary Sec.* G. Graham Anderson. *Office*, 7 Victoria Street, Westminster, London, S.W.

Junior Imperial League.—*Pres.* Marquess of Londonderry; *Hon. Sec.* H. I. P. Hallett; *Sec.* H. H. Cannell. *Office*, St. Stephen's Chambers, Westminster, London, S.W.

Women's Unionist and Tariff Reform Association.—*Organising Sec.* Miss Goring-Thomas. *Offices*, 110 Victoria Street, London, S.W.

Against Mr. Chamberlain's Proposals

Constitutional Free Trade Association.—*Pres.* Earl of Cromer; *Sec.* E. G. Brunker. *Office*, 65 Victoria Street, S.W.

Free Trade Union.—*Pres.* Earl Beauchamp; *Hon. Treas.* Earl Beauchamp and Sir Alfred Mond, Bt., M.P.; *Hon. Sec.* Col. the Hon. C. Bigham, C.M.G.; *Sec.* W. W. Champness. *Office*, 65 Victoria Street, Westminster, London, S.W.

Cobden Club.—*Chairman of Committee*, Lord Welby; *Treas.* T. Fisher Unwin; *Hon. Sec.* Rt. Hon. J. A. Murray Macdonald, M.P. *Office*, Broadway Court, Westminster, London, S.W.

PARTY ORGANISATIONS

CHIEF LIBERAL ORGANISATIONS

The chief Liberal organisations are:—

Eighty Club, 3 Hare Court, Temple, London, E.C. Formed in 1880 to promote Liberal Education and stimulate Liberal organisation. The members lecture on political subjects and address Liberal Associations and meetings throughout the country. No fees are charged. *Pres.* Rt. Hon. H. H. Asquith; *Hon. Sec.* H. Drysdale Woodcock.

Liberal Central Association. The recognised and official headquarters of the Party, the chairman of the association always being the Chief Liberal Whip for the time being. *Pres.* The Rt. Hon. H. H. Asquith, K.C., M.P.; *Chairman*, J. W. Gulland, M.P.; *Treas.* Sir Jesse Herbert; *Hon. Sec.* Sir Robert Hudson. *Offices*, 21 Abingdon Street, Westminster.

Liberal Colonial Club. Formed in 1906 as a centre for Liberals interested in Colonial affairs, and to study Colonial methods of dealing with social problems. *Pres.* Viscount Bryce; *Chairman of Committee*, Sir Ed. Cook; *Treas.* A. Cecil Beck, M.P.; *Sec.* Sir Alexander W. Lawrence, Bt., 3 King's Bench Walk, Temple, E.C.

Liberal Publication Department, The, has offices at 42 Parliament Street, S.W., and issues monthly the *Liberal Magazine*. The *Liberal Year Book* is published annually at the end of the year, and pamphlets and leaflets on current politics are issued at frequent intervals. *Chairman*, Rt. Hon. J. M. Robertson, M.P.; *Sec.* Charles Geake.

London Liberal Federation, *Chairman*, Rt. Hon. W. H. Dickinson, M.P.; *Treas.* Earl Beauchamp; *Hon. Secs.* Sydney W. Pascall and Walter Isaac, J.P.; *Assistant Sec.* W. G. Rattey; *Political Organiser*, F. C. Rivers. *Offices*, 41 Parliament Street, London, S.W.

National League of Young Liberals. Established 1903. Affiliated branches, 580. *Pres.* The Rt. Hon. Walter Runciman, M.P.; *Hon. Treas.* The Hon Herbert Beaumont; *Chairman*, F. C.

Thornborough, J.P.; *Secs.* C. W. B. Prescott and J. Aubrey Rees. *Offices*, 48 and 49, Queen Anne's Chambers, Tothill Street, London, S.W.

National Liberal Federation. A union for national purposes of all the Liberal Associations throughout England and Wales. The whole Federation represents and gives effect to the ascertained opinions of the rank and file of the party in the constituencies. *Pres.* The Right Hon. Sir John Brunner, Bt.; *Chairman of Committee*, Sir Edward Evans; *Sec.* Sir Robert Hudson; *Assist. Sec.* Frank Barter. *Head Offices*, 42 Parliament Street, London, S.W.

The National Reform Union was formed in 1864 by members of the Committee of the Anti-Corn-Law League, who took up the question of Parliamentary Reform after the defeat of Protection. It is a propagandist organisation and carries on active educational work all over the Kingdom. *Hon. Sec.* Samuel Gleave; *Hon. Treas.* R. H. Cawley, J.P.; *Chairman*, Joseph Bliss, J.P. *Pres.* A. G. C. Harvey, M.P.; *Central Office*, 50 Haworth's Buildings, 5 Cross Street, Manchester; *London Office*, Queen Anne's Chambers, Westminster, S.W.

Scottish Liberal Association. *Hon. Treas.* J. W. Gulland, M.P.; *General Sec.* W. Webster, J.P.; *Offices*, 95 Princes Street, Edinburgh, and 7 West George Street, Glasgow.

Scottish Women's Liberal Federation, 7 West George Street, Glasgow. *Sec.* (vacant).

Women's Liberal Federation, Affiliated branches, 746; approximate aggregate membership, 106,997. *Pres.* The Lady Aberconway; *Hon. Secs.* Mrs. Banister Fletcher and Mrs. Broadley Reid; *Hon. Treas.* Mrs. Walter Runciman; *Sec.* Mrs. McArthur. *Offices*, 72 Victoria Street, London, S.W.

Women's National Liberal Association. *Pres.* Mrs. Asquith; *Chairman of Executive*, Lady Byles; *Sec.* Mrs. Weston. *Offices*, 138 Palace Chambers, Westminster, London, S.W.

Young Scots Society. Founded 1900. Its objects are to promote advanced Liberalism in Scotland chiefly by educational propaganda among young men, and in particular to advance the cause of Scottish Home Rule. *Hon. Pres.* C. E. Price, M.P.; *Pres.* Kenneth McIver, Dunfermline; *Hon. Gen. Sec.* Thomas Lochhead, 26 Tassie Street, Shawlands, Glasgow; *Hon. Gen. Treas.* George Saunders, 41 South Methven Street, Perth.

United Irish League of Great Britain. *Gen Sec.* F. L. Crilly. *Office*, 2 and 4, Great Smith Street, S.W.

CHIEF UNIONIST ORGANISATIONS

The chief Unionist organisations are:

Association of Conservative Clubs, *Sec.* Frank Solbé. *Offices*, St. Stephen's House, Westminster, London, S.W.

The National Unionist Association of Conservative and Liberal-Unionist Organisations. *Pres.* Rt. Hon. Sir Ailwyn E. Fellowes, K.C.V.O.; *Chairman of Council*, Rt. Hon. Sir H. S. Samuel, M.P.; *Chairman of the Party Organisation and Executive Committee*, A. D. Steel-Maitland, M.P.; *Vice-Chairmen of the Executive Committee*, The Rt. Hon. Lord Somerleyton, K.C.V.O., Sir William Jenkins, J.P., and Sir H. S. Samuel, M.P.; *Joint Principal Agents*, Sir John Boraston, William Crump, J.P., and Sir H. S. Samuel, M.P.; *Joint Secs.* (*Hon. Secs.*); *Sec.* Thomas Cox. *Offices*, St. Stephen's Chambers, Westminster, S.W.

National Conservative League. *Grand Sec.* F. H. Relton, 8 Lansdowne Road, East Croydon.

Scottish Unionist Association 2 Frederick St., Edinburgh. *Pres.* Sir Matthew Arthur, Bt.; *Secs.* Eastern Div., G. Brown, S. F. Sutherland; Western Div., Lewis Shedden.

Irish Unionist Alliance, 109 Grafton Street, Dublin. *Hon. Sec.* Denis R. Pack Beresford.

Ulster Unionist Council, Old Town Hall, Belfast. *Sec.* R. Dawson Bates.

The **United Club,** which has been established for more than 20 years, sends out voluntary speakers on behalf of the Unionist cause to all parts of the country without charge. *Joint Pres.* the Rt. Hon. A. J. Balfour, M.P., and the Rt. Hon. A. Bonar Law, M.P.; *Chairman of Committee*, J. F. P. Rawlinson, K.C., M.P.; *Hon. Sec.* Park Goff; *Clerk of Committee*, S. E. Berry. *Office*, Mitre Court Chambers, Temple, E.C.

Primrose League. A league founded in 1883, which supports three principles—the maintenance of Religion, the Estates of the Realm, and the Imperial Ascendancy of the British Empire. Supplies a large number of workers at election times, and during the interval between elections carries on a campaign of educational work in the constituencies. *Grand Master*, Earl Curzon of Kedleston; *Chancellor and Chairman of Grand Council*, Earl of Crawford; *Actg. Chancellor*, Rt. Hon. Walter Long, M.P. *Pres. Ladies' Grand Council*, Miss Balfour; *Vice-Chancellor*, (vacant); *Registrar*, F. Willis; *Clerk of the Council*, R. Bennett; *Organising Sec.* H. Crowe. *Head Offices*, 64 Victoria Street, S.W.

National Union of Women's Suffrage Societies. *Pres.* Mrs. Henry Fawcett, LL.D.; *Hon. Sec.* Miss E. M. L. Atkinson. *Offices*, Parliament Chambers, 14 Great Smith Street, Westminster, S.W. *London Society*: *Hon. Sec.* Miss P. Strachey 58 Victoria Street.

The **Women's Social and Political Union** was formed in 1903. *Founder and Hon. Treas.* Mrs. Pankhurst; *Hon. Sec.* Miss Annie Kenney. Official Organ, *Britannia*; *Ed.*, Miss Christabel Pankhurst, 114 Great Portland Street, London, W.C.

Men's League for Women's Suffrage, founded 1907. A constitutional, non-party society. *Chairman*, Herbert Jacobs; *Hon. Sec.* F. N. Sargeant. *Offices*, 136 St. Stephen's House, S.W.

International Women's Franchise Club, founded 1909. A club for men and women. Entrance, 1 guinea; subscription, 1 guinea. *Pres.* Earl of Lytton. *Address*, 9 Grafton Street, W.

Conservative and Unionist Women's Franchise Association. *Hon. Sec.* Mrs. Gilbert Samuel. *Head Office*, 48 Dover Street, London, W.

Liberal Women's Suffrage Union. *Hon. Secs.* Mrs. Francis Acland, Mrs. Heron Maxwell. *Office*, 29 Denison House, Vauxhall Bridge Road, S.W.

Women's Local Government Society. *Hon. Sec.* Miss Leigh Browne; *Sec.* Miss Berry. *Office*, 19 Tothill Street, Westminster, S.W.

Women's Freedom League. *Pres.* Mrs. Despard. *Political Organiser*, Miss C. Nina Boyle; *Sec.* Miss F. A. Underwood. *Office*, 144 High Holborn, W.C.

National League for Opposing Woman Suffrage. *Hon. Sec.* Mrs. Jeyes; *Assist. Secs.* Miss Nora Garland. *Office*, Caxton House, Tothill Street, Westminster.

In addition to the societies enumerated above which advocate the adoption of women's suffrage, there is a great variety of other societies, all having the same object in view—in fact, no movement can boast of so many organisations in its favour. Since the war broke out, they have all given up active political propaganda, and turned their energies into some form or other of war-work.

SOCIALISM AT HOME AND ABROAD

IN GREAT BRITAIN

By agreement between the three chief Socialist organisations, the **Labour Party**—which must be distinguished from the smaller but more active Independent Labour Party—became in 1914 politically the central Socialist body for Great Britain. The Labour Party had been pledged to Socialism as its ultimate aim since the Hull conference of 1908, in which year it was admitted to affiliation with the International Socialist Bureau. In its general policy, however, the Labour Party was, and is, necessarily, dominated by the trade unions which make the bulk of its membership; and a large, though somewhat passive, section of its nominal strength has been rather Radical than Socialist in its aim. The party had in 1916 111 trade unions, with a membership of 2,053,735 affiliated to it, as well as 177 trades councils and local labour parties, and, including co-operative and Women's Labour League affiliations, has a total membership of 2,093,365. Its officers are:

Chairman, G. J. Wardle.
Secretary, Rt. Hon Arthur Henderson, M.P.
Assist. Sec. J. S. Middleton.
National Agent, A. Peters, J.P.
Offices, 1 Victoria Street, Westminster.

The *Daily Citizen*, the organ of the party, was compelled to cease publication on June 5, 1915.

In Parliament the Labour Party has 37 members, of whom seven are directly supported by the Independent Labour Party, and the remainder by trade unions, though more than half of the total number are professed Socialists. The party forms an independent group, which agreed, however, at the beginning of the war to co-operate with the Government. There were some dissentients from this course, and Mr. Ramsay MacDonald, the chairman, resigned that office. Mr. Arthur Henderson, who succeeded, entered the Coalition Cabinet in May 1915, and the present acting chairman of the party is Mr. G. J. Wardle. Mr. W. Brace, M.P., and Mr. G. H. Roberts, M.P., who had also been officials of the party, are now in the Ministry. The Acting Chief Whip is J. Parker, M.P.: Junior Whip, C. W. Bowerman, M.P.

The **British Socialist Party** has a membership approximately of 20,000. Its **headquarters** are at Chandos Hall, 21 Maiden Lane, Strand, W.C. *Secretary*, Albert Inkpin. The official organ of the party is *The Call*. 1d.

The **National Socialist Party** was founded as the result of a secession of members of the British Socialist Party at the Annual Conference at Easter 1916. Its leaders include Mr. H. M. Hyndman and Mr. Will Thorne, M.P. It supports the cause of Great Britain and her allies in the war. *Hon. Organiser*, Joseph Burgess. *Joint Hon. Secs.* J. C. Webster and W. A. Woodroffe.

The **Fabian Society** seeks to "permeate" with Socialist principles existing political and other organisations, and to influence local authorities to make use of their powers. A Research Department was established in 1912 for the systematic investigation of social and industrial problems. *Secretary*, R. Page Arnot. Offices as below. A Women's Group formed for discussing problems relating to women has an office on the same premises. The Society has a permanent Joint Committee with the Independent Labour Party, for carrying on propaganda on behalf of the two bodies. A **University Socialist Federation** was formed by the younger Fabians in 1912. *Secretaries*, Edward R. Pease and W. Stephen Sanders. *Offices*, 45 Tothill Street, Westminster. The *New Statesman*, a weekly organ, was founded in 1914 largely to promote Fabian principles.

The **Independent Labour Party** was established at Bradford in 1893, with the object of securing the collective ownership of the means of production and exchange by means of direct Labour representation in Parliament and on local authorities. The present strength of the party is about 30,000. *Chairman*, F. W. Jowett, M.P.; *Secretary*, Francis Johnson; *Offices*, St. Bride's House, Salisbury Square, E.C. The *National Labour Press* (30 Blackfriars Street, Manchester) is the printing and publication department of the party. It publishes the *Labour Leader* weekly, the *Socialist Review* quarterly, and many books and pamphlets, and prints several weekly Labour and Socialist organs. The offices of the party both in London and Manchester were raided by the police on Aug. 12, 1915, and certain pamphlets were ordered for destruction as injurious to recruiting.

The **Hermes Club** (founded 1913) exists for the purpose of assisting the Labour Party by social gatherings, investigations, and the placing of speakers and workers at the disposal of the party. *Acting Sec.* Henry H. Slesser, 11 King's Bench Walk, Temple, London, E.C.

The **Women's Labour League**, now eleven years old, is a vigorous society affiliated to the Labour Party. Its *General Secretary* is Miss Mary Longman. *Offices*, 1 Victoria Street, London, S.W. It has several organisers, and publishes a monthly paper, the *Labour Woman*.

Several manifestos in support of the war and recruiting have been issued during the year by the **Socialist National Defence Committee**, of which John Hodge, M.P., is *Chairman*; Victor Fisher, *Hon. Sec.*; and the *Offices*, 19 Buckingham Street, Adelphi, London, W.C. This organisation became merged in May 1916 in **The British Workers' National League**, founded to secure the more complete organisation of labour and to adopt a national policy.

Although **Socialism** is associated in the minds of many detractors with irreligion, it is exercising some **influence through all the Churches.** The Guild of St. Matthew and the Christian Social Union sowed the early seed, but it is since the founding, in 1906, of the **Church Socialist League** that the propaganda has prospered substantially. The joint *Secretaries* of the League are the Rev. Conrad Noel and the Rev. J. H. Hastings. *Organising Sec.* Rev. C. Stuart Smith, Red Row, Mellor, Stockport. Membership about 1,200. The Rev. F. Lewis Donaldson is *President*. There is a smaller Socialist organisation among English Roman Catholics. Many Nonconformist leaders have shown strong sympathy with the movement.

The Clarion Fellowship, with organisations in all the larger towns and abroad, exists to promulgate Socialism. It supports five travelling vans, with lecturers, who have done successful pioneering work, especially in the country districts and villages. It is a child of the *Clarion*.

Other Socialistic associations, independent of the above, are: **National Council of British Socialist Sunday School Unions,** *Sec.* Miss Clarice McNab, 43 Dudley Crescent, Leith; the **Young Socialist League,** *Sec.* J. Bloomfield, 280 Brick Lane, Bethnal Green, London, E.

Anti-Socialist Union

The **Anti-Socialist Union of Great Britain** was established in 1908 to combat the Socialist movement. *Chairman*, Claude Lowther; *Offices*, 58 and 60 Victoria Street, Westminster.

IN THE BRITISH COLONIES

On the continent of Australia the nominal Socialist Party is relatively insignificant; but the Labour Party is Socialist in all but name, and has applied for affiliation to the International Socialist Bureau. Mr. W. M. Hughes, Prime Minister of the Commonwealth, is an active Socialist.

Although there have been isolated Socialist groups in **Canada** for some years, their extreme doctrinaire opinions and refusal to ally themselves with the trade unions, or even with the Socialist International, have prevented the movement making headway. There is one Socialist and one Labour member in the Dominion Parliament.

In **South Africa** the Labour Party, which has grown rapidly since 1910, is the chief Socialistic body, though there are smaller organisations professing more rigid theories. The movement received a great impetus in 1914 as a sequel to the general strike.

EDUCATION IN THE UNITED KINGDOM

ENGLAND AND WALES

The elementary education of all children between the ages of 5 and 14 (with some exceptions) has been compulsory since 1880 and free since 1891. The local administrative authorities for these purposes have been (since the Education Act of 1902) committees of the County, Borough, and Urban Councils. These Committees include a minority of co-opted members, selected on grounds of their special knowledge of educational work. There are 289 such authorities in England and 29 in Wales. **Elementary schools** are of two kinds. "Council" schools are wholly provided and maintained by the Local Education Committees; undenominational Bible teaching only is given in these. In "Voluntary" schools, the premises for which have been erected and must be maintained by voluntary subscriptions, definite religious instruction is permitted, provision being made for the withdrawal of children whose parents object. In other respects the schools are equally controlled by the Education Committees, and share equally in the public funds. The difficulty in raising subscriptions to maintain the progressive standard of accommodation required by the Board of Education has brought about a continuous decline in the number of Voluntary schools, and a more than corresponding increase in the number of Council schools.

Higher Elementary schools were first established in 1900; in 1905 a "new type" of school was introduced, and in 1910 these were converted into "Central" schools, with either a commercial or an industrial bias, conducted under the ordinary conditions of the Code. The first intention of the higher elementary school was not to take the place of a secondary school, but to provide normally a three-years' "finishing" course for pupils remaining at school from the ages of 12 to 15 years. In practice, however, it has been found that the three-year course has been a reality for only a small proportion of those admitted; while as regards those who have attended for three and occasionally for four years, the course of study pursued has been more appropriate for a secondary school. **Special schools** of all kinds exist: for the blind, deaf, mentally defective, etc.; there are also country or seaside schools, open-air schools, and schools for cookery, laundry-work, light woodwork, gardening, dairying, housewifery, etc.

Secondary Education.—The Secondary Schools Branch of the Board of Education was formally constituted on April 1, 1903. It began in a very small way, but its growth has been continuous and rapid. A strong body of secondary school inspectors has been created, and inspects, besides the grant-aided schools, a large number of others which seek recognition for efficiency. The branch administers three-quarters of a million of public money, of which over half a million goes in direct grant to secondary schools as such.

Medical Inspection of Schools.—Most of the areas for elementary education have undertaken a more or less systematic inspection of scholars by their medical officers for several years past. School clinics provide medical treatment in 212 areas, and upwards of 450 have been established. The clinics vary greatly in equipment and in the diseases and defects treated; some are concerned only with dental work, others treat eyes, ears, nose, and minor skin diseases. London has an elaborate special scheme of its own. Care Committees, whose purpose is to follow up the work done in the schools, have been set up in several educational areas In an increasing number of centres the work of the medical department has been linked with that of the Juvenile Labour Exchange, or a Central Care Committee, schools for mothers have been established, and instruction in "mothercraft" is now included in the curriculum of many schools. The passing of the Education (Provision of Meals) Act, 1914, and the payment by the Board of Education of a permanent grant towards the cost of the provision of meals, marked a new epoch in the history of education. The necessity for feeding children has varied greatly in different parts of the country, and has in the main been confined to three centres of population, namely, Greater London, Lancashire, and Yorkshire.

Teachers and Training Colleges.—Before the war there was approximately one certificated teacher for every 49 scholars in average attendance in England, and in Wales one for every 60 scholars. Rather less than one-third of the certificated teachers were men, and of these nearly 74% were also trained; of the women certificated teachers 53% were trained. In 1913 extensive alterations were made in the regulations for the training of teachers for elementary schools, the object being to give the training colleges a large measure of freedom in adapting the curriculum to the needs of individual students, and, secondly, by lightening and simplifying the course in academic subjects to increase the time available for professional training. The supply of certificated and uncertificated teachers is derived in the main from those young persons who have been recognised either as pupil-teachers or as bursars under the Board's regulations. Training colleges for teachers were voluntary, denominational institutions, unaided by the State till 1890, when colleges of a non-residential character were first "recognised" at various universities. Since 1902 the Board of Education has offered large grants to Local Educational Committees for the provision of training colleges.

Technical, etc., Institutions.—Full-time courses, intended as a preparation for entering a definite employment at or about the ages of 15 or 16, have been issued by the Board of Education applicable to Junior Technical Schools, Schools of Nautical Training, and University Tutorial Classes. Other schools specialise in science, technology, or art in all its branches.

Effect of the War on Education.—The war has had its effect on all sides of education as sketched above. The call for men has depleted the male teaching staff, and drained the students of universities, training colleges, and other institutions. It is estimated that of the teachers employed by Local Education alone, some 20,000 have joined the Colours, of the full-time students in State-aided University Institutions some 5,000, and of training college students some 3,000. Many schools throughout the country were occupied for military purposes; for billeting in the early stages of the war, this occupation being for the most part temporary, and for hospitals, this occupation being usually prolonged, though in some areas schools have been requisitioned for long periods for the billeting of troops engaged on garrison duty, and in one or two areas for the accommodation of a large influx of munition workers, where the ordinary housing accommodation of the district proved quite insufficient for the growth of the population, pending the provision of hutments. During the first year of war 1,023 schools in all were occupied at some time or other for military purposes. Where possible, the difficulty was overcome by means of the "double-shift" expedient. A very large number of refugee children from Belgium were admitted into the elementary schools, there being approximately 30,000 refugee Belgian children in the United Kingdom; a considerable proportion was distributed among the large towns in the north of England, and many also in South Wales. Owing to the dearth of labour many children were excused from attendance at school, more particularly in agricultural districts. As mentioned above, the demand for men occasioned difficulties in the staffing of schools, the supply of intending teachers also being practically cut off.

Committees on Science and Modern Languages

In August 1916 the appointment was announced of two Committees on Education after the War: (1) a Science Committee to "inquire into the position occupied by National Science in the educational system of Great Britain, especially in secondary schools and universities; and to advise what measures are needed to promote its study, regard being had to the requirements of a liberal education, to the advancement of pure science, and to the interests of the trades, industries, and professions which particularly depend upon Applied Science."

Members, Sir J. J. Thomson, O.M., D.Sc. (*Chairman*), Rt. Hon. F. D. Acland, M.P., Prof. H. B. Baker, D.Sc., F.R.S., Graham Balfour, Sir William Beardmore, Bt., Sir G. H. Claughton, Bt., C. W. Crook, Miss E. R. Gwatkin, Sir Henry Hibbert, M.P., William Neagle, F. G. Ogilvie, C.B., Dr. Michael Sadler, C.B., Prof. E. H. Starling, M.D., F.R.S., W. W. Vaughan, H. G. Nagel, A. D. Hall, F.R.S.

Secretary, F. B. Stead, H.M. Inspector of Schools, Board of Education, Whitehall, S.W.

(2) A Modern Languages Committee to inquire, etc., "regard being had to the requirements of a liberal education, including an appreciation of the history, literature, and civilisation of other countries, and to the interests of commerce and public service."

Members, Stanley Leathes, C.B. (*Chairman*), C. A. Montague Barlow, M.P., E. Bullough, Rt. Hon. Sir Maurice de Bunsen, P.C., G.C.M.G., G.C.V.O., A. G. Coffin, Dr. H. A. L. Fisher, H. C. Gooch, J. W. Headlam, L. D. Holt, Dr. Walter Leaf, Dr. G. Macdonald, F.B.A., A. Mansbridge, Nowell Smith, Miss M. J. Tuke, Sir James Yoxall, M.P., Miss M. A. Gilliland.

Secretary, A. E. Twentyman, Board of Education, Whitehall, S.W.

SCOTLAND

The Local Education Authorities for Scotland are **School Boards,** popularly elected. The Education (Scotland) Act of 1908 provided for the assimilation of the franchise to that for the Parish Councils and also gave the Scotch Education Department power under certain conditions to combine school board districts. Several such combinations have already been effected. Co-operative action is taken through Burgh and County Committees on Secondary Education, and (for the training of teachers) through Provincial Committees instituted in connection with the four Scottish Universities. The Act of 1908 gave to School Boards further responsibilities and powers for securing the health and well-being of children of school age, and placed upon them new and far-reaching duties in relation to young people who have left school and entered upon employment. Schemes of medical inspection are in operation in all the large urban districts and in nearly all county districts. The Edinburgh School Board has made marked success in using powers to aid parents of children leaving school in the choice of their future employment.

Schools are now classed as Primary, Intermediate, and Secondary.

Primary Schools

	1914.	1915.
Number of schools	3,171	3,168
Total accommodation	1,058,809	1,064,881
Number on register	843,309	844,843

	£3,976,184		£4,005,306

The New HAZELL, 1917

IRELAND

In Ireland elementary education is under the charge of the Commissioners of National Education in Ireland.

Elementary or National Schools

	1915.	1916.
Schools open. . .	8,207	8,163
Number on register .	700,265	699,172
Average attendance .	508,424	500,002
Daily attendance . .	72·6%	71·5%
Over 15 years of age .	10,913	10,841

Other Elementary Schools, 1915

Description.	Number.	Average on Roll.	Daily Attendance.
Model Schools .	70	8,919	6,953
Convent and monastery schools .	408	117,321	88,577
Workhouse schools	103	2,269	2,029

Gross total of **teachers,** 15,877. Total expenditure for 1915–16, £1,631,796. Number of schools in which the bilingual (English and Irish) programme is in operation increased from 36 in 1906–7 to 225 in 1914–15.

Intermediate Education is under the charge of the Irish Intermediate Education Board, which is an examination and inspection Board, administering a large original endowment and an annual income derived from Local Taxation Duties. During 1916, 6,644 boys and 4,532 girls—total 10,480—presented themselves for examination held at 276 centres. There passed 3,839 boys and 2,604 girls—total 6,443 : a percentage of 57·8 boys, 57·5 girls, 57·6 boys and girls. The income of the Board was to a large extent formerly derived from a share of the Local Taxation (Customs and Excise) Duties. These declined so heavily that since 1909 the deficiency has been made up by the Treasury to the figure, £46,566, at which the revenue from that source stood in that year. This was the smallest income for the decade, and the Commissioners are pressing for larger grants. In 1913 an Act was passed giving the Board power to pay grants to schools as a result of inspection only, such grants being limited to students between the ages of 12 and 14 years ; and in 1914 another Act was passed by which a sum of £40 000 is voted annually by Parliament as a grant towards the salaries of teachers in secondary schools in Ireland.

EDUCATIONAL BODIES

National Union of Teachers

The National Union of Teachers was founded 1870. **Objects :** (1) to improve the condition of education ; (2) to bring practical knowledge to bear on educational legislation ; (3) to unite the school teachers in a strong professional organisation ; (4) to watch the interests and advance the welfare of schools and teachers. The Union provides legal advice, defence, and assistance for its members, professional advice and protection against unjust management or inspection of schools. Its organ is the *Schoolmaster*. **Conferences** are annually held at Easter. The Union now has 93,200 members ; its income for 1915 was £53,400. It has a Legal Assistance Fund of £6,200, and a Parliamentary Fund of £8,200. The N.U.T. Examinations Board conducts commercial examinations annually, and issues teachers' diplomas in various subjects. There are a Provident Society, Benevolent Fund, Orphan Fund, and Orphan Homes in connection with the Union. Over £30,000 is raised yearly for benevolent purposes. *Pres.* C. W. Crook, B.A., B.Sc. (Tottenham) ; *Sec.* Sir James Yoxall, M.A., M.P. *Offices,* Hamilton House, Mabledon Place, Euston Road, W.C.

Head Masters' Conference (1870), representing about 118 of the chief endowed schools of the country. The object of the Conference is the discussion of educational questions which affect such schools as are in close connection with the older universities. *Chairman,* Charles Lowry, M.A. (Tonbridge) ; *Sec.* W. A. Bulkeley-Evans, 12 King's Bench Walk, Temple, London, E.C.

Incorporated Association of Head Masters.—*Pres.* W. W. Vaughan, M.A. (Wellington College) ; *Assist. Sec.* H. Bendall, M.A., 37 Norfolk Street, Strand, London, W.C.

Incorporated Association of Assistant Masters in Secondary Schools.—*Chairman,* H. P. Lunn (Holloway County Sch.) ; *Sec.* J. G. Lamb, M.A. *Office,* 35 John Street, Bedford Row, London, W.C.

Association of Head Mistresses (Incorporated 1896).—*Pres.* Miss Escott (Sheffield High School) ; *Sec.* Miss Ruth Young. *Office,* 92 Victoria Street, London, S.W.

Incorporated Association of Assistant Mistresses in Public Secondary Schools, 23 Berners Street, W. —*Sec.* Miss K. Andrews, 30 Clanricarde Gardens, Notting Hill Gate, W.

Teachers' Guild and Club (1885).—*General Sec.* Frank Fairman, M.A., 9 Brunswick Square, W.C.

Association of University Women Teachers, Incorporated.—*Sec.* Mrs. B. Brough, 59 Cambridge Street, Hyde Park, W.

Froebel Society.—*Chairman of the Council,* Claude G. Montefiore ; *Sec.* Miss L. C. Courtenay, 4 Bloomsbury Square, W.C.

Association of Teachers in Technical Institutions. —*Hon. Sec.* J. Paley Yorke, 55 Filey Avenue, Upper Clapton, N.

Gymnastic Teachers' Institute, Incorporated.—*Hon. Sec.* T. Williams, 25 Chalcraft Road, Lee, S.E.

Joint Scholarships Board.—*Chairman,* J. L. Holland, B.A. ; *Sec.* H. Bendall, M.A., 37 Norfolk Street, Strand, W.C.

Federal Council of Secondary School Associations. —*Chairman,* J. E. King, M.A. ; *Sec.* H. Bendall, M.A., 37 Norfolk Street, Strand, W.C.

Société Nationale des Professeurs de Français en Angleterre, for promoting Study of the French Language and Literature.—*Sec.* S. Barlet, Sackville House, 7 Red Lion Square, W.C.

THE EDUCATION WORK OF THE LONDON COUNTY COUNCIL

By the **Education (London) Act, 1903,** the Education Act, 1902, was, with a few modifications, applied to London ; and the control of all education, primary and secondary, passed into the hands of the **London County Council** as the Education Authority on May 1, 1904. Before that date the administration of education in London was divided between different bodies. The School Board for London, which was established in 1870, was responsible for the provision of public elementary school to meet the needs of the population so far as they were not met by the existing voluntary schools. As regards the voluntary schools, the School Board exercised no control except to see

that children attended regularly. The various managers of the schools dealt directly with the central authority, the Board of Education, in all matters relating to the organisation of the schools, the inspection of the work of the schools, and the receipt of the Government grant. Meanwhile the London County Council, acting through its Technical Education Board, was responsible for the supervision of technical education, and was also brought into close relations with secondary and university education.

By the Education Acts of 1902 and 1903 the London County Council was made the local education authority responsible for all branches of education. In the field of elementary education it took over the whole of the work of the School Board for London, and also became responsible for maintaining the voluntary schools in a state of efficiency. The managers of the voluntary schools (now known as the non-provided schools) ceased to occupy the position which they had hitherto held towards the Board of Education. Government grants in respect of these schools became payable to the County Council, and the Council became responsible for the payment of the salaries of the teachers, using the rates, so far as necessary, to supplement the amount received from the Government. The whole of the elementary education of London was thus brought within the purview of one local authority, who were entrusted with the duty of supervising the curricula in all the schools and testing the efficiency of the work by its own inspectors. The County Council has emphasised this **unification of the work of the two sets of schools** by adopting a Standing Order that no difference shall be made in administration between the provided (or Council) schools and the non-provided (formerly Voluntary) schools, except so far as difference in method of treatment is required by statute.

As regards higher education, the County Council carries on all the powers which it formerly exercised under the Technical Instruction Acts, and in addition has received greatly increased powers which entrust it with the duty of providing out of the rates such secondary and technical education as is necessary to supplement any existing provision and of co-ordinating all forms of education from the elementary school to the University.

For the discharge of these important functions, the Council was required by the Education Acts to appoint an **Education Committee,** which should consist partly of members of the County Council and partly of other persons, including women. The Education Committee, thus appointed, consists of 50 members, of whom 38 are members of the Council and 12 are co-opted. (For members of the Committee, see under LONDON COUNTY COUNCIL, p. 350.)

In order to carry out the various branches of work, the Committee have appointed **9 Sub-Committees,** which are composed of from 7 to 17 members. The Sub-Committees meet, as a rule, once a week during the time when the Council is sitting. Their meetings are conducted in private, and they present their reports weekly to the Education Committee, which sits in public every Wednesday at the County Hall, Spring Gardens. Those matters which the Education Committee are unable to deal with themselves are reported to the weekly meeting of the London County Council for ratification. The question of **the amount of responsibility** which the Council should delegate to the Education Committee has received very careful consideration. In general, it may be said that the Education Committee are empowered to deal with matters of ordinary current administration which fall within the objects provided for in the annual estimates, while the Council reserves to itself the right to deal with all matters that are new in principle or involve expenditure which has not been specifically sanctioned in the estimates. On matters of this nature the Finance Committee have the duty of reporting concurrently to the Council.

The London County Council spends annually over six millions on education—£5,000,000 on elementary and £1,000,000 on higher education. The receipts from Government grant and other sources amount to about £1,750,000; the rest of the cost falls on the ratepayers. The rate for education purposes is given on p. 351.

Schools and Institutions controlled by the Council

The following table shows the number of schools under the control of the Council:

1. Elementary Education :			
(*a*) Elementary schools—			
L.C.C. or provided schools.	592		
Non-provided schools .	364		
		956	
(*b*) Central (39), higher grade (10), and open-air schools (2) .		51	
(*c*) Special schools for blind, deaf, physically and mentally defective children . .		151	
(*d*) Industrial schools . .		11	
Total for elementary education		1,169	
2. Higher Education :			**1,169**
(*a*) Secondary schools . .		20	
(*b*) Training colleges . .		6	
(*c*) Technical institutes and schools of art		17	
(*d*) Evening schools and centres		276	
Total for higher education .		319	
			319
Total for elementary and higher education			**1,488**

In addition to directly maintaining the schools referred to above, the Council, as the authority charged with the duty of supplying or aiding the supply of education other than elementary and of promoting the general co-ordination of all forms of education in the County of London, subsidises by means of grants in aid of building, equipment, or general maintenance a large number of educational institutions in London, viz. the University of London, the schools of the University, secondary schools, polytechnics, technical institutes, schools of art, and other institutions. Under the schemes of administration of these institutions and by virtue of its powers under Schedule I. (9) of the Education (London) Act, 1903, the Council is enabled to appoint representatives on the governing bodies. By these means the Council is brought into close relation with the institutions and is enabled to carry out the duty imposed upon it by the Education Acts of 1902 and 1903.

Instruction in Elementary Schools

The total **number of teachers** employed by the Council in its various institutions is **about 20,000.** The salaries bill for teachers in elementary schools alone amounts to about £2,700,000 per annum. In the Council's own elementary schools there is

one assistant teacher for every 40 children. The total **number of children** on the roll of the public elementary schools is **736,181,** of whom 568,784 are on the rolls of the London County Council schools and 149,893 on the rolls of non-provided schools. In addition there are 14,074 children on the rolls of central schools, 3,231 on the rolls of higher-grade schools, and 199 on those of open-air schools. **The instruction given** in the elementary schools comprises the following subjects, which are prescribed by the regulations of the Board of Education: the English language, handwriting, arithmetic, drawing, observation lessons and nature study, geography, history, singing, hygiene and physical training, domestic subjects. Considerable freedom is now allowed to head teachers in organising the curricula in the various subjects, but their methods and work are subject to the inspection both of the Board of Education and of the London County Council. Open-air schools, classes in playgrounds, school journeys and visits to places of educational interest are among the more recent developments. Arrangements are made to provide, as far as possible, that all boys during their last two years at school shall receive **instruction in manual training,** and all girls in their last two years instruction in domestic economy (cookery, dressmaking, and laundry-work). Sufficient accommodation, however, has not yet been provided to enable this policy to be fully carried out.

Physical Welfare of Children

In consequence of the adoption by the Council of sect. 3 of the Education (Provision of Meals) Act, 1906, the Council has appointed a **Children's Care Committee** for each public elementary school in London, and also local associations in various districts. The duties of the School Care Committees are generally to befriend the children, and to carry on the work of selection of necessitous children in connection with the **provision of school meals.** The local associations deal with the actual feeding arrangements and discuss general questions arising in connection with the care of the child. The School Care Committees are also assisting in the Council's work under sect. 12 (1) of the Children Act, 1908, relating to cruelty to children. The **number of necessitous children fed** during the maximum week of the school year 1913-14 was 46,736. The number is considerably less during the spring, summer, and autumn. 8,500,000 meals were supplied during the year. The average cost of each meal, including the charge for preparation and service, is 2*d.* The extended powers which are conferred on local authorities by the Children Act, 1908, have strengthened the hands of the Council in promoting the physical and moral welfare of the children who attend the elementary schools. As regards the physical welfare of the children, the powers conferred by the Education (Administrative Provisions) Act, 1907, have enabled the Council to organise more fully than before a system of medical inspection of children, and the Council now has a staff of 84 doctors and 69 nurses at work in the schools. Arrangements have been made with certain London hospitals to provide for the medical treatment of the children who are shown by the inspection to be in need of treatment.

The names of the principal officers of the Council engaged in educational administration are given on p. 351.

GAS UNDERTAKINGS

The latest returns issued by the Board of Trade relating to Authorised gas undertakings in the United Kingdom belonging to Local Authorities are for the year ended March 31, 1914, and the figures relating to all Authorised gas undertakings in the United Kingdom other than those of Local Authorities are for the year ended Dec. 31, 1913. These were printed in April, 1916.

The following table shows the total of the Local Authorities' and the Authorised Companies' returns:

	Local Authorities.	Companies.
Number of Undertakings	312	519
Capital Authorised	£48,612,203	£113,734,470
,, Paid up and Borrowed	£44,554,222	£95,173,055
Receipts	£12,206,595	£23,296,963
Expenditure	£9,661,310	£18,580,794
Tons of Coal Carbonised	6,853,325	10,118,399
Quantity of Gas made in thousand cubic feet, including water-gas and acetyline gas	82,265,530	142,251,637
Quantity of Gas sold in thousand cubic feet	76,299,274	130,175,199
Length of Mains, in miles	15,402	23,697
Number of Consumers	2,888,248	4,214,865
Number of Public Lamps supplied with gas	366,647	375,056

From the data supplied in "The Gas Works Directory and Statistics" published in 1916 (Hazell, Watson & Viney, Ld.), which contains the latest information available, supplied by the officials of 1,582 undertakings in the United Kingdom, we find that the population supplied with gas is practically the same as in 1915. In round figures it is as follows:

England and Wales (excluding London)	25,000,000
Scotland	4,000,000
Ireland	1,500,000

There is a general falling off in the quantity of gas made as compared with previous years, but this varies very much in different localities. For instance, while one large town of nearly a million inhabitants increases its make by 1,952 millions, another one, of even larger population, drops 165,000,000, while yet another remains practically stationary, with an increase of five millions only. The total quantity of gas made in England and Wales is over 200,000 millions. In Scotland it is about 20,000 millions, and in Ireland 6,000 millions.

The total number of consumers in England and Wales is 6,600,000. In Scotland it is 912,000, and in Ireland 218,000. The number of slot meters still increases. At the time of writing the figures for these are as follows:

England and Wales	3,700,000
Scotland	322,000
Ireland	107,000

while cookers (gas stoves and fires) number, in England and Wales, 3,600,000; Scotland, 400,000; and in Ireland, 100,000.

The total number of public lamps now lit cannot be given, as owing to the restricted lighting any general total would be very misleading, but before the regulations came into force there were close on 800,000 lamps in the United Kingdom.

The price of gas continues to increase generally. It is interesting to note, however, that during the year 1916 the increase has been slight compared with the previous year. In many cases the price remains the same as it was at the latter end of 1915, and in a few cases has actually been reduced.

Prices for residuals have increased, and at the time of writing are still on the up-grade.

In the whole of Great Britain there are 24 Associations of Gas Managers and Engineers—18 in England and Wales, 4 in Scotland, and 2 in Ireland. The date of meetings for these associations varies considerably, some meeting only once a year, whilst others meet every month. In "The Gas Works Directory and Statistics," to which reference has already been made, fuller particulars of the Associations, both British and Foreign, are given.

Of the many colonial and foreign gas undertakings, 77 have agents in this country, mostly in London.

London (including Southgate on the North, Croydon on the South, Richmond on the West, and Ilford on the East) is supplied by fifteen companies, of which the Gas Light and Coke Company is by far the most important.

The following table shows the enormous output of gas in the London area during the year 1916:

Coal carbonized	3,740,196 tons
Length of Mains	6,661 miles
Annual make of coal-gas and water-gas	61,982,473,000 cu. ft.
Gas sold	57,660,180,000 ,,
Total Number of Consumers	1,774,836
Number of Slot Meters	1,166,445
Number of Stoves	1,508,801
Number of Public Lamps (practically all incandescent)	105,452

A decade ago there were the same number of companies, but the length of mains at that time amounted to only 4,686 miles.

	Local Authorities.	Companies.	Private Owners.
London area	—	15	—
England and Wales	250	931	30
Scotland	62	180	10
Ireland	27	73	7
Total	339	1,199	47

ELECTRICAL PROGRESS IN 1916

No review of happenings in the electrical industry during 1916 can claim to be anything beyond a very partial statement of events, for much of that which is of the greatest interest cannot, in present circumstances, be published. It may be said, however, that practically every firm of electrical manufacturers throughout the country has been impressed into the service of the Ministry of Munitions, and is turning out munitions or electrical appliances for war purposes to the limit of its capacity.

When the complete history of the present struggle comes to be written, it will be appreciated to what an enormous extent electricity has been responsible for our industrial and military development. The demands for power to drive new machinery have taxed the resources of electric-supply undertakings in manufacturing centres, but the required current has been supplied, and the machines kept running continuously. Without electricity it would have been impossible to obtain the needed power, at least in anything like the same time, and certainly in so convenient, adaptable, and economical a form. Although no details may be published as to individual munition factories in which electricity is employed on a large scale for lighting and power, and moreover to an ever-increasing extent for preparing meals for employees, the reports of electric-supply undertakings afford striking evidence as to the aggregate demand.

Since early in the war, the Local Government Board was instructed to refuse loans to municipalities for the purpose of carrying out plant or mains extensions unless it was satisfied that such extensions were needed for war purposes. The normal growth in the demand for electricity has not been provided for in many cases, and when the existing plant could deal with no further load, prospective users could not be connected up. Their needs cannot be met until after the war. Even when sanction to loans has been forthcoming and the manufacture of generating plant accelerated, it has been impossible now and again to keep pace with the growing demands for light and power.

It may be of interest briefly to summarise the results of a few of the largest electric-supply undertakings owned by local authorities for the year 1915–16. The output at Bradford, for example, was 33,906,136 units, an increase of 5,161,418 over the figure for the preceding year. The gross receipts amounted to £167,022, leaving a net surplus of £16,000. Sheffield sold no fewer than 77,868,027 units, an increase of 32,994,685 over those supplied in 1914–15, yielding a surplus of £33,296. Manchester's output was 181,322,835 units, as compared with 117,928,802 in the previous twelve months. This afforded a gross profit of £248,486 and a net surplus of £54,872. For the year ended Dec. 1915, Liverpool sold 53,974,979 units, as compared with 48,122,198 in 1914. A gross profit of £209,558 was recorded, the net figure being £86,222. Birmingham's sales for 1914–15 and 1915–16 respectively were 73,767,178 and 117,016,321 units, the gross and net profit standing at £191,173 and £47,497. Glasgow generated 132,364,922 units and made a gross profit of £208,069 and a net profit of £63,423, the current sold in the previous year being 88,834,270 units. The figures for Leeds were 43,145,978 units in 1914–15, and 44,789,222 units in 1915–16.

Among company-owned undertakings, the record is held by the London Electric Supply Co., with an output of 50,757,584 units for the year ended Dec. 1915. The County of London Co. comes next with a sale for the same period of

30,562,045 units, while among provincial concerns, the Midland Electric Co., with an output of 22,248,605 units, and the Newcastle and District Co., which sold 18,757,270, are remarkable.

The growth in the power demand as compared with the load derived from lighting is a feature of recent progress. At Coventry, for example, no less than 97% of the entire output is supplied to power users, while at Keighley the power demand has increased within the last few years by 5,940,149 units, the current so used last year amounting to 6,046,366 units. Coventry has the distinction of producing its current for the lowest cost per unit of any supply undertaking in the Kingdom, this being only 0·33*d*.—a most creditable result for a concern having a load factor of only 21·84%. It is followed closely by Stalybridge, which sold 23,686,231 units in 1915–16, at a works cost per unit of only 0·37*d*., the load factor in this case being 22·78%. Among Metropolitan Borough concerns the record is held by Poplar, which sold 21,506,614 units at a total works cost of 0·58*d*. per unit, and a load factor of 26·61%. Poplar's output, by the way, exceeded the figure for the previous year by no less than 27¼%. This undertaking will, it is expected, be the only one among London local authorities that will be able to show a surplus in the present year.

The heavy cost of coal during the year has had a serious effect upon the records of most undertakings, and prices have had to be raised to consumers to compensate more or less for the extra cost of generation. In most cases the increase has been 10%, but in others it has reached 20% and sometimes a higher figure. Many concerns report a serious drop in the output for lighting purposes, due, of course, to the restrictions that have been imposed upon street and private lighting.

In view of the heavy cost of coal, attention is being directed seriously to the problem of increasing the efficiency of the boiler-house, and progress is being made in the use of waste gases from blast furnaces, coke ovens, and so forth, and in the employment of gas obtained from the low-temperature distillation of coal.

With a view also of effecting economies in operation and distribution, the Board of Trade has invited electric-supply undertakings throughout the country to link up, as far as is possible, their respective systems, so that one station may help another in the event of breakdown or may at times take over the entire load so as to permit of the other station being closed down during periods of small demand.

So far as new inventions are concerned, most of these relate more or less closely to war purposes and cannot therefore be referred to. Progress continues, however, in the evolution of generating plant, switch-gear, and lighting apparatus, although nothing of a sensational character has been devised during the year. An improved form of Diesel engine, however, has been introduced by Mirlees, Bickerton & Day that tends to lessen troubles with bearings and connecting-rod, and reduces the amount of lubricating oil and attention needed.

The Half-watt type lamp, which was placed on the market some few months before the outbreak of war, has been developed and is being adopted on a large scale to replace arc lamps and clusters of glow lamps for street lighting and for the illumination of large interiors. Its high efficiency, long life, intense white light, and freedom from moving parts are advantages that appeal to users. New types have been evolved of lower candle-power than was thought possible at first, and half-watts are now available for use on high-voltage circuits that consume no more than 100 watts for a candle-power of approximately 200. This does not represent the possible minimum, for in America still lower units are in use. For very low voltages, such as are met with on motor vehicles, launches, and railway trains, half-watt lamps are now to be obtained, the increase in efficiency being of great importance where the source of power is a battery carried on a car or boat.

A new form of lamp with carbon filament surrounded by mercury vapour, and an inner chamber filled with a neutral gas such as argon or nitrogen, has been devised by Siemens & Halske of Berlin, for which an efficiency of more than 2 candles per watt is claimed. The Edison & Swan Co. have introduced, also, a new lamp which is really a cross between an arc and an incandescent lamp, since an arc is struck between two small globular electrodes of tungsten which run, however, in a bulb filled with nitrogen. This lamp gives an intensely white light of great efficiency, and is suitable chiefly for projector and microscopic work. At present it is available only for direct-current circuits, and gives a candle-power of about 100.

ELECTRIC COOKING AND HEATING

Rapid development is taking place in the appliances of electricity for cooking and heating. Troubles met with in the early days with resistance elements have been overcome to a large extent by the use of a nickel-chromium alloy that will withstand a red-hot temperature almost indefinitely and is unaffected by moisture, by grease, or by any chemical vapours met with in cooking practice.

Large installations completed recently include Armstrong Whitworth's Walker Yard, where 250 kw. of electric cooking plant has been put down; L. & N.W. Ry. Euston Station restaurant (130 kw.); Bradford Kursaal (102 kw.); London City & Midland Bank head office (85 kw.); large works in the Midlands (104 kw.); Dujon Restaurant, Luton (36·7 kw.); The Refectory, Golders Green (43 kw.); King Edward VII Home and Minter Street Hospital, Sheffield (59·6 kw. each), and a large number of industrial canteens of which no details may be given. Among staff kitchens recently changed over to electrical operation should be mentioned those at Selfridge & Co., Oxford Street, and Swan & Edgar, Regent Street. At the latter 350 persons are provided for daily, the plant having a capacity of 76·3 kw. The low cost of cooking will be appreciated from the fact that 5,000 meals are served on the average every week, for a consumption that averages 1,100 units, costing 46*s*. only. The Selfridge equipment has a plant capacity of 90 kw., and at present an average of 1,363 meals is served daily for an expenditure of less than 200 units, costing 8*s*. 4*d*. At the Minter Street Hospital, Sheffield, 470 meals are served daily on the average for a power consumption of 140 units, costing 5*s*. 10*d*., current being supplied at ½*d*. per unit, a rate that is now available in about 25 districts (subject to a temporary war increase).

Efforts are being directed to improve the boiling plate, which has always been the weak spot in an electric cooker, and several designs of plate with exposed flowing elements have been evolved and promise to effect a material improvement in efficiency, rapidity, and durability.

The New HAZELL, 1917

Developments in electric heaters consist mainly in the improvement of elements that will glow at a bright red, and have a cheerful appearance such as that produced by a coal fire. Many successful designs of electric fires have been introduced recently, one of the most remarkable being the "Flaming" fire due to Mr. A. F. Berry of "Tricity" cooker fame, this heater having, as its name implies, a flaming effect when in use.

Electrically produced heat is being used also for many industrial purposes, such as for bakers' ovens, for producing distilled water, for heating type metal, for warming varnish sprays, for heating glue and solder, and for scores of other appliances.

ELECTRIC-VEHICLE PROGRESS

Restrictions as to the sale of petrol and shortage of skilled drivers, as well as demands for petrol vehicles by the military authorities, have caused users of motor transport to consider the possibilities of the electric vehicle for industrial purposes. The electric has, therefore, reached a stage to which it would scarcely have attained so quickly but for the conditions brought about by the war. There were in the autumn of 1916 no fewer than 778 electric vehicles in use or on order in the United Kingdom, as compared with only 150 two years previously. Electric omnibuses are in successful operation at Southend-on-Sea, York, South Shields, West Bromwich, Loughborough, and Brighton, their operating cost comparing favourably to those driven by petrol engines. Electric wagons for carting coal and ashes or collecting refuse are proving most satisfactory in the service of local authorities at Sheffield, Dover, Bury, Smethwick, Birmingham, Nottingham, Glasgow, and Chester among other places, their working costs showing a very material saving over the horsed vans previously employed. Most of the large railway companies are using electrics for goods delivery, the Midland Railway owning a fleet of no fewer than 76. Of business houses employing electric vans for parcels delivery, Messrs. Harrods are the best known, their fleet numbering 64 at present. Messrs. J. Lyons & Co. own 10, and many other firms have a smaller number in service.

There are only two or three firms in this country who manufacture electric vehicles at present, although several others are about to take up their construction. Most of the vehicles in service are of American origin, and are fitted with Edison batteries, which have maintained fully their reputation for reliability and low upkeep charges. When the importation of motor vehicles and parts was prohibited by the Board of Trade in the early summer of 1916, it was thought that users would be unable to obtain electric chassis from America; but when the Electric Vehicle Committee—whose efforts on behalf of the industry have been so successful—pointed out that electric vehicles are much needed for industrial purposes and cannot be supplied by British manufacturers in sufficient numbers, and that these machines use no petrol, and help, therefore, to conserve supplies, preferential treatment was obtained for electric chassis, and licences have been given for their importation.

Another form of electric vehicle that has been making substantial headway is the industrial truck. This is a low platform mounted on four small wheels, driven by a motor taking current from a battery beneath the platform or in a box in front. The driver stands at one end and controls the direction and speed of the machine, the act of stepping off applying the brakes automatically and cutting off the current. Such trucks are most useful for carrying goods on railway platforms, on wharves, or in large warehouses, and may be used to draw several ordinary trucks filled with packages. They have proved most successful, minimising labour and lowering cost of local transportation, and have been adopted by several of the more enterprising railway companies as well as by large business houses.

Electric taxicabs and pleasure vehicles have a certain field of usefulness, but their adoption on a large scale is a development that is unlikely to materialise until after the war. The immediate scope for the electric is for carrying heavy goods at comparatively slow speeds over short distances, particularly where many stops are necessitated. For long-distance rapid transit petrol vehicles are the more suited.

ELECTRIC TRACTION

There has been but little development during the year so far as electric trolleys are concerned, A certain amount of linking-up between adjacent systems is being carried out, and short extensions completed, but of entirely new construction there is nothing in hand. Edinburgh furnishes the only example of a cable trolley still in operation; and as the lease falls in in about three years, and the system is far from satisfactory, the Corporation has decided to electrify the lines in the near future. It has not yet announced its decision as to the system to be employed, but the overhead trolley will probably be adopted. The surface-contact systems at Lincoln and Wolverhampton, in spite of much adverse criticism, still continue in operation, and show running costs that are remarkably small. Trolley omnibus services are being extended, the original line at Bradford having proved the economy and reliability of the system. They are most useful as feeders to existing trolley routes, and after the war will be adopted in a number of districts, especially those in which the heavy cost of a permanent way for tramcars would not be justified by the probable revenue for passengers.

A most interesting hybrid has been put into service at Bradford. This is a motor vehicle that can be propelled either by current from the overhead trolley system or by a battery contained in the vehicle. Such a vehicle is very flexible and can be run over routes where no tramway exists. It is used for the conveyance of parcels in connection with the Corporation Trolleys and has justified its construction fully. A somewhat similar car intended for street watering has been evolved by the trolleys engineer at Rochdale.

Women are now employed with success as conductors on most trolley systems, and a few have been engaged as drivers also, although much opposition has been aroused by this development. Considerable interest was evolved by a paper read before the Municipal Trolleys Association by Mr. J. McElroy, general manager of the Manchester Corporation Trolleys, on "Passenger Transportation in Large Cities." The author does not believe in underground "tubes," but urges the importance of looking well ahead and providing for future increases in traffic by widening streets, laying down surface trolleys along parallel routes, and by adopting trolley terminals near the heart of the City.

During the year there has been a remarkable succession of serious tramway accidents, due partly to reduced street lighting, partly to inexperienced drivers, and partly to causes that

could not be foreseen. Among the more serious were those at Leeds, Handsworth, Harrow Road, Cricklewood, Redcliffe, Gateshead, Stalybridge, and Wigan.

Trolley systems serving industrial centres report excellent business. Thus at Manchester no fewer than 209,877,667 passengers were carried in 1915–16, an increase of 7,000,000 over the figure for the previous year. A net surplus of £121,181 resulted from these operations. The Sheffield trolleys in the same period carried 123,429,410 passengers, an increase of 23% over the preceding year, the surplus here being £95,780. Birmingham trolleys dealt with 163,258,584 passengers, and made a net profit of £107,429, in spite of heavily increased costs and payments to dependents of members of the staff who had enlisted. Trouble with the temporary plant at the Nechells station, however, in the autumn of 1916 led to the stoppage for some days of the entire system, and the figures for the present year will no doubt reflect this. The Glasgow trolleys carried 362,371,464 passengers and made a profit of £217,955, while the Liverpool system dealt with 150,755,680 passengers, and reported a surplus of £123,193. On the London County Council system, the passengers carried numbered 547,253,332, an increase of 2,339,291, but this resulted in a deficit of £73,795, due partly to the strike in the early part of the year, partly to shortage of staff, partly to motor-bus competition, and partly to the inadequate fares charged. For a penny single or 2*d.* return, a workman can travel from Beckenham Lane to Victoria, a distance of 9½ miles. This is, of course, much under the cost of supplying the service, and is quite unnecessary.

But for the war, much greater progress would have been made in connection with main-line railway electrification. For example, the Midland Railway would have proceeded to electrify its Tilbury and Southend line, but in the circumstances it has applied for an extension of time in which its powers may be exercised and has postponed the work for the present. There has been considerable activity, however, in suburban and short-distance electrification. The most interesting conversion was that of the Shildon-Newport section of the North-Eastern Railway. This is a mineral line, which is used to convey heavy minerals from the mines, and is 18½ miles in length. The line was opened originally in 1825, and formed part of the old Stockton to Darlington railway, which was the first over which steam locomotives were used. Power is supplied by steam-driven generators with boilers fed by waste gases from coke ovens and blast furnaces in the Durham and Cleveland districts. Another important electrification scheme to be carried out during the year was that of the suburban services of the L. & S.W. Railway. The sections include those from Waterloo to Wimbledon via East Putney, the "Roundabout" via Richmond and Kingston, and the Shepperton line. The section between Hounslow and Claygate has not yet been put into operation with electric trains. An important scheme is being carried out by the L. & N.W. Ry., and would have been completed but for the war. The sections recently opened include the lines between Broad Street and Kew Bridge, Broad Street and Richmond, and Broad Street to Earl's Court. The section between Willesden and Earl's Court has, of course, been in operation for some time. Part of the electrified lines belong to the North London Ry., over which the L. & N.W. Ry. has running powers. Physical connection with the Bakerloo tube is made at Queen's Park station.

AGGREGATE RECORDS OF ELECTRIC SUPPLY AND ELECTRIC TRACTION

The following figures have been compiled from information given in the current volume of "Garcke's Manual of Electrical Undertakings," and compare the financial and technical details relating to electric supply and traction undertakings in the United Kingdom for the two years 1914–15 and 1915–16.

ELECTRIC SUPPLY UNDERTAKINGS

		Year.			
		1914–15.		1915–16	
		No.	£	No.	£
Capital Expenditure	Companies	101	26,465,477	98	25,132,662

The New HAZELL, 1917

OLD AGE PENSIONS

Under the **Old Age Pension Acts,** 1908 and 1911, State pensions are payable to every man or woman over the age of 70 whose income does not exceed £31 10*s.* per annum, and who has for the last 20 years before receiving the pension been a British subject and for 12 of those 20 years (allowance being made for Crown service abroad and certain other instances) a resident in the United Kingdom. "British subject" means a person born in the United Kingdom, or of a British father, or who has taken out a Naturalisation certificate. It also applies for the purposes of the Acts to a woman who satisfies the pension authority that, but for marriage with an alien, she would have fulfilled that condition, and that such alien is dead, or her marriage with him dissolved or annulled, or that for not less than 5 years she has been legally separated from or deserted by the alien.

The **amount of pension** payable to a person is calculated on his means, and is on the following scale: 5*s.* **a week** where the pensioner's means do not exceed £21 per annum; 4*s.* **a week** where his means exceed £21 but do not exceed £23 12*s.* 6*d.*; 3*s.* where they exceed £23 12*s.* 6*d.* but do not exceed £26 5*s.*; 2*s.* where they exceed £26 5*s.* but do not exceed £28 17*s.* 6*d.*; 1*s.* where they exceed £28 17*s.* 6*d.* but do not exceed £31 10*s.*

In 1916 it was decided, in order to assist cases of distress, to make a grant to meet the cost of allowances, up to a maximum of an additional 2*s.* 6*d.* a week, to those suffering special hardship from the high price of food and other economic conditions arising from the war.

To arrive at the amount of a person's "means" account must be taken of the income he is likely to receive during the succeeding year and of the yearly value of any advantage, benefit, or privilege enjoyed by him; but no account is to be taken of the yearly value of any advantage accruing from the use or enjoyment of furniture and personal effects if the total value of such property does not exceed £30.

Where husband and wife are living together in the same house, the means of either is to be taken as one-half of the total means of the couple.

A form of claim for a pension may be obtained at any post office in the United Kingdom, and when filled up by the claimant is to be delivered to the postmaster of the post office where it is desired that the pension should be payable, or to the local pension officer.

The cost of old age pensions is paid out of Imperial funds through the Post Office. The same system applies to Scotland and Ireland, and the Local Government Board for each of these countries is the appellate authority.

The number of **pensioners in the United Kingdom on** Mar. 31, 1915, was 369,398 males and 617,840 females—a total of 987,238. Of this number, 934,416 were pensions of 5*s.*, 19,337 pensions of 4*s.*, 19,458 pensions of 3*s.*, 9,220 pensions of 2*s.*, and 4,807 pensions of 1*s.*

The pensioners were distributed among the several countries as follows:

England	648,868
Wales	42,537
Scotland	96,895
Ireland	198,938

	Population over 70 at Census 1911.	Old Age Pensioners, Mar. 1915.
England:		
Counties (excluding London)	610,069	397,261
Boroughs	272,477	180,849
London	124,852	70,758
Wales	64,308	42,537
Scotland	152,899	96,895
Ireland	295,027	198,938
Total U.K.	1,519,612	987,238

The estimated cost of the pensions in 1916–17 was £12,654,000, as compared with £13,089,000 in 1915–16 (exclusive of expenses of administration). With reference to the suggested reduction of the age-limit from 70 to 65, Mr. Lloyd George stated in June 1911 that the cost of this would not be less than £7,750,000.

The removal of the pauper disqualification on Jan. 1, 1911, relieved the Poor Law authorities of England and Wales of the charge of 122,415 (5,077 indoor and 117,338 outdoor) paupers in that month, effecting an estimated saving to the rates of about £21,951 a week. The number of persons over 70 years of age who were in receipt of parish relief fell from 195,924 on Jan. 1, 1910, to 55,653 on Jan. 4, 1915.

POVERTY AND UNEMPLOYMENT

The Report of the Poor Law Commission—The Labour Exchanges Act—Poor Law Statistics

In December 1905 a Royal Commission was appointed to inquire into: (1) The Poor Law; (2) Relief (outside the Poor Law) of Distress due to Unemployment. Voluminous reports (Majority and Minority) were issued in 1909. The Majority Report was signed by Lord George Hamilton, the Bishop of Ross, Sir H. Robinson, Sir S. Provis, Mr. F. H. Bentham, Dr. A. Downes, Rev. T. G. Gardiner, Mr. C. S. Loch, Mr. J. P. Macdougall, Mr. T. H. Nunn, Rev. L. R. Phelps, Prof. Smart, Mrs. Bosanquet, and Miss Octavia Hill; some signing with reservations. Summaries of both reports were given in the 1910 ANNUAL.

The **attitude of the two great political parties** towards the report was, before the war, one of suspended judgment. The **Unionist Party** was pledged by its leaders to Poor-law Reform, but not on any particular lines. The **Government view** appeared to be that old age pensions, labour exchanges, invalidity and unemployment insurance, and the other items of its social policy, rendered it unnecessary for them to proceed with an ambitious scheme for the alteration of the Poor Law. Speaking in the House of Commons in April 1911, Mr. Burns said that the Majority Report of the Royal Commission had become archaic, and the Minority Report obsolete. Meanwhile the Local Government Board has displayed much activity in effecting administrative reforms.

EMPLOYMENT EXCHANGES

The Labour Exchanges Act, 1909, enables the Board of Trade to collect and furnish information as to employers requiring workpeople,

The New HAZELL, 1917

and workpeople seeking engagement or employment, and to authorise loans towards meeting the expenses of workpeople travelling to places where employment has been found for them through a labour exchange. For the purposes of the Act, the whole country is divided into **eleven divisions**, each with a divisional clearing-house, presided over by a divisional chief, and all co-ordinated with **a national clearing-house in London.** Distributed among these eleven divisions are 30 or 40 first-class labour exchanges in towns of 100,000 inhabitants and upwards, 45 second-class exchanges in towns between 50,000 and 100,000, and a number of sub-offices in smaller towns. **A joint advisory committee** is established in every principal centre, on which representatives of workmen and employers meet in equal numbers, under the chairmanship of an impartial permanent official. It is enacted that no person shall suffer any disqualification or be otherwise prejudiced on account of refusing to accept employment found for him through a labour exchange where the ground of refusal is that a trade dispute which affects his trade exists, or that the wages offered are lower than those current in the trade in the district where the employment is found. A penalty of £10 may be enforced against persons knowingly making false statements for the purpose of obtaining employment or procuring workpeople through a labour exchange. The title of the Exchanges was changed in October 1916 from "Labour" to "Employment" Exchanges.

The number of Exchanges open in 1916 was 390. The total number of registrations in 1915 on the General Register of the Exchanges was 3,186,137, a decrease of 7·4% upon the total for 1914. The total number of individuals who at some time or another during 1915 applied to the Exchanges was 2,345,816. The number of applicants given work was 1,058,336, and the number of situations filled was 1,308,137. The number of vacancies notified by employers was 1,797,646 (men 1,004,970, women 493,515, boys 161,459, and girls 137,702). 124,405 women were registered on a Special Register of Women for War Service, but many of those registered were not suitable for war work, and the total number placed in employment was only 8,255, of whom 1,268 were placed in armament work, 880 in agriculture, 978 in transport, and 1,234 in commercial and clerical occupations. The operations of the Exchanges have been considerably affected by the coming into force on July 15, 1912, of the Scheme of Unemployment Insurance embodied in Part II of the National Insurance Act, which is administered directly through the Exchanges.

For Staff, see p. 233.

PAUPERISM

The total **expenditure on the relief of the poor** in England and Wales before the war (other than expenditure defrayed out of loans) was £14,935,605, an increase of £471,703 over the previous year. It represented an average charge of 8*s.* 2*d.* per head on the estimated population. In London the expenditure came to £3,929,427, and the average cost per pauper was £30.5.7¼, as compared with £16.16.6 outside London. The average cost per pauper in England and Wales as a whole for the year in question was £19.1.0½, the average cost of each indoor pauper being £32.12.10¾, and of each outdoor pauper £7.10.1¾.

Persons in receipt of Poor Relief

	1914–15	1915–16
Casual Paupers	5,279	4,056
Persons in receipt of outdoor medical relief only	18,970	15,997
Lunatics in pauper asylums	102,975	100,182
Other classes of paupers	627,903	561,048

The total number of persons in receipt of relief on Jan. 1, 1916, was 684,549. Excluding casual paupers and persons in receipt of outdoor medical relief only the numbers were as follows:—

	Number.	% of total.
Adults:		
Men	180,262	27·1
Women	270,239	40·6
Total adults	450,501	67·7
Children	214,472	32·3
Total	664,973	100·0

WORK AND WAGES

The Trade Unions—Wages and Strikes—Women—Conciliation and Arbitration—Labour Co-partnership

THE GROWTH OF TRADE UNIONISM

The total membership of trade unions in the United Kingdom during a series of years is given below:

Year.	Number.	Membership.
1905	1,218	1,932,942
1907	1,231	2,423,206
1908	1,206	2,386,316
1909	1,185	2,366,248
1910	1,174	2,441,143
1911	1,172	3,010,954
1913	1,135	3,928,191
1914	1,123	3,959,863

The membership in 1914 was divided as follows: Building trades, 236,524; mining and quarrying, 912,577; metal trades, 557,741; textile trades, 498,232; clothing trades, 102,318; transport trades, 705,687; printing and paper trades, 92,055; woodworking trades, 64,686; shop assistants, etc. 105,880; other trades, 167,329; general labour, 366,539; and employees of public authorities, 150,295. The **female membership** of trade unions in 1914 was 352,944, of which 249,022 were employed in the textile trades. Germany has 3,100,000 members of trade unions, France 1,100,000, and Austria 500,000. In the United States the aggregate membership of trade unions is about 2,389,723, the American Federation of Labour having a membership of 1,770,145.

TRADE UNIONS IN THE UNITED KINGDOM

It is believed that only about one-half of all the trade unions in existence are registered, but it has been estimated that the membership of registered unions represents about 80% of the total membership of trade unions in the United Kingdom. At the end of 1914 there were 1,123 **Trade Unions** registered and unregistered.

One hundred principal unions, which include over 60% of the total membership of all the societies, had in 1914 2,382,604 members with an **income** for the year of £3,619,804, or 30*s.* 4½*d.* per member, and an **expenditure** of £2,927,095, or 24*s.* 6¾*d.* per member. The **funds** at the end of the year were £5,741,110.

The New HAZELL, 1917

During the years 1905–14 £26,097,187 was spent by the 100 principal unions. Of this amount, £3,759,893, or 14·4% of the total, was spent in dispute pay; £6,324,603, or 24·2%, in unemployment benefit; and £10,517,376, or 40·3%, on sickness and accident, superannuation, and other benefits and grants; while the remaining £5,495,315, or 21·1%, was absorbed by working expenses and miscellaneous expenditure.

In 1914 there were 302 **Trade Councils**, representing 1,588,386 members, compared with 173 representing 714,185 members in 1898. They are local councils formed by delegates from neighbouring trade unions. Their main objects are to exert influence on local politics in parliamentary and municipal elections, and to afford mutual assistance in disputes.

The number of **workmen's clubs** on the register in 1913 was 1,558 registered under the Friendly Societies Acts and 535 under the Industrial and Provident Societies Acts. The Working Men's Club and Institute Union (Club Union Buildings, Clerkenwell Road, E.C.) had in 1913 1,558 affiliated clubs, with a membership of 463,856.

The General Federation of Trade Unions was founded in 1899. The declared objects of the Federation are to maintain the right of combination, to further conciliation, and to assist workers engaged in disputes when approved by the Executive Committee. It has a monthly organ, *The Federationist*. There were, on March 1, 1916, 146 trade unions affiliated to the General Federation, and these possessed a membership of 1,076,634. *Sec.* W. A. Appleton. *Office*, Hamilton House, Bidborough Street, London, W.C.

The number of **associations of employers** in the United Kingdom in 1913 was 1,528, comprising 506 in the building trades, 38 in mining and quarrying, 99 in the textile trades, 118 in the clothing trades, 119 in the printing trades, and various miscellaneous trades.

London Trades Council: *Sec.* John Stokes, *Office*, 41 Cowcross Street, E.C.

Trade Union Congress

The Congress is composed of representatives of trade unions, either working at their trade or paid union officials. Unions may send one delegate for every 2,000 members or fraction thereof. Voting on important questions is on the principle of one vote for every 1,000 members represented. A **Parliamentary Committee** of 16 belonging to different unions is elected to look after the interests of the working classes in parliamentary matters and elsewhere, and a paid secretary is also appointed annually.

The 1916 Congress was held at Birmingham, 673 delegates being present, representing 2,850,547 members.

Chairman, Parliamentary Committee, H. Gosling, J.P. *Secretary*, C. W. Bowerman, M.P. *Office*, General Buildings, Aldwych, W.C.

WAGES

Changes in Rates of Wages

The total number of workpeople affected by the changes in wages which have been reported as taking place during the nine months ended Sept. 30, 1916, is over 2,800,000, of whom practically all have received increases. The net effect of all these changes is an increase of over £410,000 per week.

The amounts stated above are exclusive of increased earnings, due to overtime, and also of changes affecting agricultural labourers, seamen, railway servants, police and Government employees. Important changes in wages were announced during September affecting railway servants and Post Office employees. As regards railwaymen, the war bonuses of 5*s.* and 2*s.* 6*d.* per week granted in 1915 to men and boys respectively were increased to 10*s.* and 5*s.* per week. The war bonuses of 2*s.* and 3*s.* per week previously paid to male Post Office servants over 18 years of age were increased to 3*s.* and 4*s.* per week, while 6*d.* per week was added to the bonuses of female workers, and war bonuses of 1*s.* 6*d.* and 2*s.* per week were granted to males under 18 years. These changes were dated to take effect in the week ended Sept. 16 in the case of railwaymen, and as from July 1 in the case of Post Office employees. A number of employees in other Government departments were also granted a war bonus.

The extent to which the different groups of trades have contributed to the totals shown above will be seen in the following table:

Group of Trades.	No. of Workpeople affected.	Amount of Net Increase per Week.
		£
Building	172,000	25,500
Coal Mining	852,000	170,600
Iron and other Mining	21,500	6,900
Quarrying	10,500	1,700
Pig Iron Manufacture	25,000	6,000
Iron and Steel Manufacture	83,000	25,000
Engineering and Shipbuilding	382,000	53,500
Other Metal	83,000	14,400
Textile	780,000	58,200
Clothing	83,000	7,900
Transport	130,000	21,400
Printing, Paper, etc.	36,000	3,500
Glass, Brick, Pottery, Chemical, etc.	60,000	3,900
Other Trades	53,000	7,000
Local Authority Services	50,000	4,900
Total	2,821,000	410,040

The following table shows the **general course of wages** between 1900 and the outbreak of war:

1900	100·00	1907	101·79
1901	98·56	1908	100·97
1902	96·96	1909	99·41
1903	96·21	1910	99·70
1904	95·56	1911	99·83
1905	95·94	1912	102·46
1906	97·60	1913	105·3

As against this may be contrasted the index number of **retail prices of food** in London in 1912–14 as compared with prices in 1900:

	Bread, Flour, Cereals, and Potatoes.	Beef, Mutton, Pork, and Bacon.	Dairy Produce.	Tea, Coffee, and Cocoa.	Sugar, Jams, etc.
1900	100	100	100	100	100
1912	115·1	115·1	111·1	103·4	129·2
1913	116·2	120·9	109·3	104·7	115·7
1914*	114·6	123·3	112·2	104·7	125·7

* Although there was a marked rise in food due to the war in the months Sept.—Dec., this rise is included in the

Strikes and Lock-outs

The following table summarises the figures for the years 1904-14:

Year.	No. of Disputes beginning in each Year.	No. of Workpeople affected by Disputes beginning in each Year.	Aggregate Duration in Working Days of all Disputes in each Year.
1904	355	87,208	1,484,220
1905	358	93,503	2,470,189
1906	486	217,773	3,028,816
1907	601	147,498	2,162,151
1908	399	295,507	10,834,189
1909	436	300,819	2,758,321
1910	531	515,165	9,894,831
1911	864	931,050	10,247,100
1912	857	1,463,281	40,914,675
1913	1,497	688,925	11,630,732
1914	973	446,205	10,104,700

The number of disputes recorded in 1914 was exceeded only once in the past 21 years, viz. in 1913. The high aggregate for the year was mainly due to the prolonged dispute in the London building trade which begun on Jan. 26, 1914, and only ended on Aug. 15. August settled many old disputes, and few new ones occurred after that month.

figures for 1914, which are the mean for the year. Taking the country as a whole, and making allowance for the relative importance of the various articles in working-class household expenditure, the average increase in the retail prices of food since the beginning of the war is 68%, which is reduced to 62% if the increase in the duties on tea and sugar is deducted.

These figures relate to food only, and in estimating the increased cost of living this percentage must not be applied to the total family expenditure, but only to that proportion which is expended on food. It should be remembered that rents of working-class dwellings are not appreciably higher than before the war, and that, although many other items of expenditure have increased substantially, they have not advanced, on the average, so much as food. It may be estimated that the average increase in the cost of living of the working classes between July 1914 and Nov. 1, 1916 taking food, rent, clothing, fuel and light, and miscellaneous expenditure into consideration, is between 45 and 50%, disregarding increased taxation and assuming that the standard of living has not been modified in view of war conditions.

EMPLOYMENT OF WOMEN DURING THE WAR

The increased employment of women, which is a noticeable feature of war labour conditions, has made steady progress since April of 1916. The subjoined table, based on periodical returns made by employers to the Employment Department of the Board of Trade, gives the most reliable estimate which can be formed of the whole extent of the movement since July 1914, and of the rate of progress between April and July 1916. The estimates relate to employed persons, excluding outworkers, and the women are classified according to the employers' position, *e.g.* a factory clerk appears under industrial occupations, and a municipal tram conductor under local government.

The decrease in agriculture in April 1916 is the result of the seasonal character of the occupation. The number employed shows an increase if compared with April 1915.

Since the war about 866,000 additional women and girls, or 27% of the numbers employed in July 1914, have been drawn into the various occupations included in the table above. The figures do not include domestic service, employment in small workshops and workrooms in the dressmaking trade, and in military, naval, and Red Cross and St. John's hospitals. In the case of the two former, there has been a big displacement of female labour since the war, and it is estimated that there has been a decrease of about 150,000 in the number of women and girls employed. On the other hand, the number of women employed in attending sick and wounded soldiers and sailors at any particular time is now about 27,000 greater than before the war. The net result of this is to show an increase of 738,000 in the total number of women engaged in occupations outside their own homes. It must be borne in mind, however, that a great part of the work previously done by the domestic servants who have gone into other occupations is now performed by unpaid labour.

	Estimated Number of Females employed in July 1914.	Estimated Increase in the Number of Females employed since July 1914.		Estimated Number of Females reported by Employers as directly replacing Males.	
		April 1916	July 1916	April 1916	July 1916
1. Industrial occupations	2,117,000	275,000	362,000	213,000	263,000
2. Commercial occupations	454,000	166,000	198,000	152,000	201,000
3. Professional occupations (mainly clerks)	67,500	13,000	15,000	12,000	15,000
4. Banking and Finance (mainly clerks)	9,500	23,000	30,000	21,000	26,000
5. Hotels, places of entertainment, etc.	175,000	12,000	19,000	27,000	31,000
6. Agriculture (*Great Britain only*)	130,000	*-14,000**	66,000	37,000	66,000
7. Transport (other than municipal)	15,000	23,000	31,000	24,000	31,000
8. Civil Service	66,000	39,000	48,000	30,000	38,000
9. Arsenals, Dockyards, etc.	2,000	25,000	69,000	13,000	69,000
10. Local Government (including teachers and municipal transport workers)	184,000	21,000	28,000	18,000	26,000
Totals	3,219,000	583,000	866,000	547,000	766,000

* Decrease.

The New HAZELL, 1917

CONCILIATION AND ARBITRATION

Under the powers given to it by the Conciliation Act, 1896, the Board of Trade established in 1908 a **Court of Arbitration.** For the purposes of the Court of Arbitration three panels were formed—the Chairman's Panel, the Employers' Panel, and the Labour Panel—and, on the application of the parties to an industrial dispute, a Court of Arbitration, consisting of three (or five) members, is nominated by the Board of Trade from these panels. Technical assessors can also be appointed, for the purpose of giving the Court information on technical matters, in cases where their assistance is considered expedient. During 1913 recourse was had to Courts of Arbitration in 6 cases. The total number of **Conciliation Boards** in existence now numbers some 300.

With a view to strengthening the existing official machinery for settling industrial disputes, the Government in October 1911 established an **Industrial Council,** composed of representatives of employers and employed, with Sir George Askwith as **Chief Industrial Commissioner,** "for the purpose of considering and of inquiring into matters referred to them affecting trade disputes; and especially of taking suitable action in regard to any dispute referred to them affecting the principal trades of the country, or likely to cause disagreements involving the ancillary trades, or which the parties before or after the breaking-out of a dispute are themselves unable to settle."

LABOUR CO-PARTNERSHIP

The Labour Co-partnership Association was founded in 1884, and seeks "to bring about an organisation of industry based on the principle of Labour Co-partnership: that is to say, a system in which all those engaged shall share in the profit, capital, control, and responsibility." With this view it seeks (1) in the Co-operative movement to aid by its propaganda and advice all forms of production based on the above principle; (2) in other businesses to induce employers and employed to adopt schemes of profit-sharing and investment tending in the same direction.

President, Rt. Hon. Earl Grey.
Hon. Secretary, Aneurin Williams, M.P.
Secretary, E. W. Mundy, B.A.
Office, 6 Bloomsbury Square, London, W.C.

The following figures show the progress of co-partnership businesses, established (with two or three exceptions) by working men:

	1883	1903	1915
Societies at work	15	114	71
Capital*	£103,436	£1,639,019	£1,423,928
Trade	160,751	3,175,814	3,085,680
Profits	9,031	175,404	223,841
Losses	114	2,207	4,225
Dividend on wages	Not known	23,283	32,642

These divide themselves roughly into **four classes:** 1. The societies which in the main consist of individual shareholders who are in most cases workers for the society, or hope to become so, as the capital and business connection grow. 2. Societies which consist something like equally of —(*a*) individuals as in Class 1; (*b*) co-operative store societies which provide part of the capital and a market for much, if not all, of the produce. 3. Societies which are, in the main, federations of other societies, chiefly co-operative stores, but which have Labour Co-partnership provisions in their rules, whereby their employees are entitled to share in the profit and acquire capital. 4. Special societies. This classification is of course imperfect, but is useful as giving a rough idea of how the movement is made up. **Grouped in trades,** the societies show that there are in Great Britain 16 clothing and textile, 15 boot and shoe, 5 metal, 9 building and woodworking, 15 printing, and 11 various trades—71 in all.

In addition to these there are a number of agricultural co-operative societies which use profit-sharing and co-partnership. These figures do not take into account the extension of the principle to private businesses or ordinary companies. Figures concerning these are extremely difficult to get and tabulate, because private firms often make secrecy a condition in their partnership schemes, and the absence of a uniform plan in the schemes makes generalisation difficult. The following figures show the **progress of the labour co-partnership principle in Gas Companies.** No. of employed, 25,705; amount of profit divided amongst employed for year ending December 1915, £117,048. Total profit to employed since schemes were adopted, £1,314,832. Market value of shares and deposits held by employed in these companies, £842,248.

* Shares, loans, and reserves.

THE CO-OPERATIVE MOVEMENT

Modern co-operation dates from the establishment of the **Rochdale Pioneers' Society** in 1844, on whose model all subsequent societies have based themselves. **The primary object of a co-operative society** is distribution, and it aims at saving for the members the shopkeeper's and, if possible, the wholesaler's profits. There is no limit to membership; any one may join. Each person joining must take up one or two £1 shares, paying generally 1*s.* on entrance, and the remainder, if he chooses, out of his accumulating dividends. The maximum share of capital which one person can hold by law is £200. Goods are sold at the ordinary retail prices, and each purchaser receives checks or vouchers corresponding to the amount of purchases. Half-yearly or quarterly these are paid into the store, and the surplus of receipts over cost is divided among the members at so much per pound of purchases. This is the **rebate, or dividend** as it is more familiarly called. Non-members may deal at the stores, and receive discount as a rule at half the members' rate. The rate of dividend is usually between 2*s.* and 3*s.*, but runs up to 3*s.* 6*d.* or 4*s.* Four or five per cent. interest is generally paid on capital. The store is managed by a committee elected by the members, each member having one vote. The first department of a store is usually grocery and provisions. Many stores, even the smaller ones, bake their own bread, and find it most successful. Hardware, drapery, boots and shoes, coal, tailoring, and furnishing generally constitute branches of every large store. In 1915 there were, according to the **Co-operative Union Report,** 1,497 distributive societies, with 3,310,524 members, a total capital (share, loan, and reserve) £69,419,573, £165,034,195 sales, and £17,003,956 profit. The distributive societies also carry on various **productive departments,** *e.g.* baking, corn-milling, cabinet-making, bootmaking, tailoring, dress-making, etc.; the total output in this direction being about £12,000,000 annually.

The **English Wholesale Society** was started in 1863. It is a federation of co-operative societies, none other being allowed to become shareholders or purchasers. Each society takes up one £5 share for every 5 members. The Society is managed by a General Committee of 32 members, 16 of whom represent the Societies in the Manchester division and 8 each the divisions of London and Newcastle.

The **Scottish Wholesale Society** was started in 1869 on lines similar to the English Society, but admitting its employees to collective membership on certain terms.

Apart from the production carried on by the distributive societies, there is great activity on the part of a large number of societies organised specially to carry on a variety of manufactures. See LABOUR CO-PARTNERSHIP.

The Co-operative Union (*General Secretary*, A. Whitehead; *offices*, "Holyoake House," Hanover Street, Manchester) is the organising and propagandist centre of the movement, and was formed 1869. The governing body is the **Central Board**, which meets at Congress time. Its members are appointed by the sectional boards of the seven districts into which the United Kingdom is divided. The work of the board is conducted by committees. It devotes special efforts to inducing societies to devote a part of their profits to educational purposes. It also organises the annual Congress. **The 1916 Congress** was held at Lancaster, and was attended by 1,410 delegates, representing Co-operative Societies in all parts of the United Kingdom. There were, in 1916, 1,285 societies members of the Union, the subscriptions from which amounted to £16,273. The annual income of the Union is augmented by the sale of literature.

The Women's Co-operative Guild (England and Wales) was started in 1883, to educate women in co-operative principles, and increase their power and activity in the movement. It has 31,600 members in nearly 609 branches. Its main lines of work have recently been in the spread of co-operation among the poor, the housing question, anti-credit, divorce law reform, and citizenship campaign; it, too, holds an annual congress.

There is also a Women's Co-operative Guild in Scotland, with 193 branches and a membership exceeding 13,640. A Women's Guild has also been formed in Ireland, with 9 branches and 474 members.

The **International Co-operative Alliance** for the promotion of co-operation throughout the world is a federation of co-operative organisations in Great Britain, Germany, France, Italy, Austria, Hungary, Switzerland, Belgium, Denmark, Holland, Canada, Russia, Norway, India, Sweden, Finland, United States, etc. The Alliance includes about 1,200 local societies and national federations, who contributed to its funds more than £1,058 in the year ending Dec. 1915. International Co-operative Congresses were held in 1895 (London), 1896 (Paris), 1897 (Delft), 1900 (Paris), 1902 (Manchester), 1904 (Budapest), 1907 (Cremona), 1910 (Hamburg), and 1913 (Glasgow). The Alliance publishes reports of these Congresses, also Annual Reports of its Executive Committee, and a Bulletin issued in English, French, and German. An Annual was published for the first time in 1910, showing the development of co-operation throughout the world, and containing also a detailed history of the International Alliance. *Sec.* H. J. May. *Office*, 146, St. Stephen's House, Westminster, London, S.W.

HOUSING AND TOWN PLANNING

The Housing and Town Planning Act, 1909, which came into force in 1910, provides (1) for the housing of the working classes, (2) for town planning, and (3) for the appointment of County medical officers. The Act was summarised in the 1910, 1911, and 1912 editions.

Shortly after the outbreak of the war two emergency measures—the Housing Act, 1914, and Housing (No. 2) Act, 1914—were passed, but circumstances have not arisen requiring the utilisation of the powers conferred by the Acts.

According to the Report of the Local Government Board on Housing and Town Planning for 1914-15, representations were made to the local authorities in respect of 54,695 houses. The local authorities decided to proceed under the Act in over 27,000 cases; 16,955 houses were made fit for habitation without closing orders; 2,079 dwelling-houses were closed or demolished voluntarily; 11,262 closing orders were made, and 2,477 demolition orders made. Since the passing of the Act, the number of dwelling-houses passed under review totals 182,905.

The war has, speaking generally, put a stop to activity on the part of local authorities in the direction of housing, but there are a few localities where it has had precisely the opposite effect and where an urgent need for additional housing accommodation has arisen and has had to be met owing to the extension of works engaged in the production of materials of war.

In Scotland, where action was taken in regard to the closing and demolition of 2,971 houses during the year 1914, and where 1,398 other houses were made fit for human habitation, the Scottish Local Government Board says that the provision of more houses is the key to the situation. There is a general scarcity of working-class houses throughout Scotland, due chiefly to the rising costs of building material, the withdrawal of private capital from this field of enterprise, and the reluctance of local authorities to exercise their powers to meet the demand, especially in the clearance of slum areas in the large towns.

HOUSING REFORM ASSOCIATIONS

Mansion House Council on Health and Housing. Amalgamated with the National League for Physical Education and Improvement. The oldest Society for the education of public opinion in regard to the need for Housing Reform. *Hon. Sec.* C. E. Allan. *Office*, 4 Tavistock Square, W.C.

The **Rural Housing and Sanitation Association.** Formed in 1902 to improve the condition of housing and sanitation in country working-class homes. It is strictly non-party. *Sec.* Miss Annette Churton. *Office*, Parliament Mansions, Victoria Street, S.W.

Housing Organisation Society, Ltd. *Sec.* E. Betham. *Office*, 4 Tavistock Square, W.C.

Workmen's National Housing Council. Supported by a number of Trade Unions, Trade Councils, and Labour Organisations. *Sec.* J. S. Whybrew. *Office*, 41 Cowcross Street, London, E.C.

The New HAZELL, 1917

The National Housing and Town Planning Council. Founded in 1900 to promote a national movement for Housing and Town Planning Action. *Sec.* H. R. Aldridge, 41 Russell Square, London, W.C.

Co-partnership Tenants' Housing Council. To aid in the solution of the housing problem by encouraging the establishment of Tenants' Co-partnership Housing Societies with approved rules and in suitable localities, etc. *Hon. Sec.* G. Morriss. *Office*, 6 Bloomsbury Square, W.C.

Co-partnership Tenants, Ltd., was formed to promote the formation and development of residential estates on the principles advocated by the Co-partnership Tenants' Housing Council. Its experts give advice on land, capital, estate development and house building, and in account keeping. *Sec.* George Morriss. *Offices*, 6 Bloomsbury Square, W.C.

The **"Garden City Association"** was founded in 1899, and in Sept. 1903 the Company, "First Garden City, Ltd." was formed, with a capital of £300,000, of which about £193,000 has been subscribed, and an estate of 3,818 acres (since increased to 4,556 acres) purchased at Letchworth, near Hitchin, at an average cost of about £40 per acre. Seventy factories and workshops are now at work; 90 shops have been erected, and over 2,000 houses and other buildings have been erected and occupied, the population being about 10,000. Post and telegraph offices, telephone exchange, churches, schools, recreation ground, libraries, swimming baths, golf links, banks, clubs, and hotels are established. The total rates are 5*s.* 7*d.* in the £. A parish council conducts local affairs. First Garden City, Ltd., Letchworth, Hertfordshire. *Secretary*, Harold Craske.

Housing Reform Company, Ltd., 4 Park Place, Cardiff.

Liverpool Housing Association. *Sec.* W. Knowles, The Beeches, Raby Drive, Bromborough, Cheshire.

Rochdale Housing Reform Council. *Hon. Sec.* Fred. Duckworth, 3 Sawyer Street, Rochdale.

York Health and Housing Reform Association. *Office*, 22 St. Saviourgate, York.

Welsh Garden Cities, Ltd. *Sec.* R. H. Allen. *Office*, 3 Dumfries Place, Cardiff.

HOUSING COMPANIES AND TRUSTS

Artisans, Labourers and General Dwellings Co. *Sec.* S. A. Blackwood. *Office*, 2 Wood Street, Westminster, S.W.

Bournville Village Trust. This was founded by Mr. George Cadbury in December 1900, for the purpose of holding and administering the Bournville Estate. The object of the scheme is the furtherance of Housing and Town Planning. The area of the estate is about 650 acres. There are now three villages upon it, viz. Bournville that known as Bournville Tenants, and one in course of erection at Weoley Hill, Bristol Road. There are altogether about 1,000 houses, with a population of 4,500. As the gift of the property is absolute, the scheme provides for the perpetual growth, the revenue being used for the purchase of more land, the erection of additional houses, and the general work of housing and town planning reform.

East End Dwellings Co., Ltd. *Sec.* T. Wilkinson, 27 Chancery Lane, W.C.

Four Per Cent. Industrial Dwellings, Co., Ltd. *Sec.* P. Ornstien, I, 2 and 3 St. James's Place, Aldgate, E.C.

Guinness Trust. *Sec.* E. W. Winch, 5 Victoria Street, London, S.W.

Metropolitan Association for Improving the Dwellings of the Industrious Classes. *Sec.* E. H. Marston, 1 Pancras Square, Pancras Road, London, N.W.

Metropolitan Industrial Dwellings Co., Ltd. *Sec.* Lindsay S. G. Young, 38 Broadway Court, Westminster, S.W.

Peabody Donation Fund. *Sec.* Viscount Dunluce, 15 Buckingham Street, Strand, W.C.

The Joseph Rowntree Village Trust, Garden Village, New Earswick, York. *Agent*, Miss Harlock, 7 Grove View, Clifton, York.

Rowton Houses, Ltd. *Sec.* F. R. Nash, 7 Little College Street, Westminster, S.W.

Estate of the late W. R. Sutton (Sutton Model Dwellings). *Sec.* W. Balmain, 183 Old Street, E.C.

Victoria Dwellings Association, Ltd. *Sec.* Sydney G. Henniker, 3E Victoria Dwellings, Battersea Park Road, London, S.W.

Wharncliffe Dwellings Co., Ltd. *Sec.* F. R. Nash, 7 Little College Street, Westminster, S.W.

ALCOHOL AND INEBRIETY

LICENSED PREMISES

On Jan. 1, 1916, there were 86,626 on-licence premises in England and Wales, and 23,202 off-licence premises, giving proportions, according to the estimated population of 23·22 on-licences and 6·22 off-licences (or together 29·44 licensed premises) per 10,000 persons.

On-Licences

Year.	Total number.	Proportion pr. 10,000 persons.	Decrease during previous 12 months.
1895 . .	103,341	33·94	—
1911 . .	91,247	25·29	1,237
1912 . .	89,849	24·59	1,398

1911 . .	24,115	6·69	323
1912 . .	23,815	6·52	300
1913 . .	23,632	6·40	183
1914 . .	23.408	6·27	224
1915 . .	23,202	6·22	206

In the ten years 1905–14 a total sum of £9,732,823 was received by the compensation authorities, and a total of £8,916,661 was paid out in compensation for 9,805 licences. There remained on Dec. 31, 1914, an aggregate balance in the several funds of £681,870.

The **total amount paid in compensation during 1915 was :—**

	£	s.	d.
On account of renewals refused in 1915	212,078	5	9
On account of renewals refused before 1915	424,881	6	6
Total	£636,959	12	3

Of this sum there was paid :—

	£	s.	d.
To the licencees	71,628	9	3
To other parties	565,331	3	0
Total	£636,959	12	3

War Restrictions

Two exceptional sets of restrictions were in force in 1914. On August 31 the Intoxicating Liquor (Temporary Restriction) Act was passed, and under it 623 orders suspending the sale or consumption of liquor in licensed premises and clubs was made before the end of the year. This policy was considerably extended in 1915 and 1916, and orders made curtailing hours, prohibiting "treating," etc. Numerous orders closing licensed premises were also made by the competent military and naval authorities under the provisions of the Defence of the Realm Regulations.

Clubs, etc.

The continuous growth of the number of clubs, which showed a check in 1914, was followed in 1915 by a substantial decrease, and it is estimated that the number of clubs in existence on Jan. 1, 1916, was 8,534 or 368 less than the number in existence on Jan. 1, 1915. The proportion of clubs per 10,000 of the population in 1915 was 2·39.

Proceedings against Licensed Persons

The total number of proceedings in 1915 against licensed persons for offences against the Intoxicating Liquor laws was 2,095, and the convictions numbered 1,256. For permitting drunkenness or selling to drunken persons there were 404 convictions, as against 353 in 1914 and 1,200 in 1903 (the record year). There were 75 convictions under the Children Act of 1908.

Drunkenness

The outbreak of war in August 1914 altered so completely the conditions out of which convictions for drunkenness normally arise that comparisons between the figures for 1914 and 1915 and those for previous years can hardly be made with any degree of safety. The removal of millions of men by enlistment into H.M. Forces is in itself —to mention only one point—sufficient to cause wide derangement of the figures.

Nevertheless, it is very noticeable that the marked decrease in convictions which took place in the latter months of the year 1914 was continued and accentuated throughout the year 1915.

The total convictions for drunkenness in England and Wales in 1915 were 135,811, as compared with 183,828 in 1914—a decrease of 48,017 or 26·1%. In every month of the year the figures were lower than in the previous year; and in the last five months of the year there is a progressive decrease. Of this total of 135,811, 51,836 convictions were in Greater London, 73,120 in Northern England, and 10,855 in Southern England.

The total of 135,811 is the lowest recorded for upwards of 40 years, and is 28% below the total for 1913.

The figures for convictions of male persons in 1913, 1914, and 1915 were 153,112, 146,517, and 102,600—the last two totals being respectively 4·3% and 33% lower than that for 1913. The corresponding figures for females were 35,765, 37,311, and 33,211—the last two totals being respectively 4·3% higher and 7·1% lower than that for 1913. The marked differences between the movements of these two sets of figures are no doubt attributable largely to the demands made on the male population by enlistment in H.M. Forces.

The Orders of the Board of Control have a very great effect in producing sobriety, as will be seen in the following figures.

For London and the whole of the English and Welsh boroughs included in Orders of the Board, the figures of convictions for drunkenness are :

Weekly average for 1914	2,034
Weekly average for first 6 months of 1915 (Naval, Military or Licensing Justices' Restrictive Orders operating in most Boroughs)	1,690
Weekly average for the 4 weeks following the Board's Orders (in 1915)	1,071
Weekly average for the 8 weeks ending Feb. 27, 1916	978
Weekly average for the 4 weeks ending March 26, 1916	940

For the Scottish areas included in Orders of the Board, the figures for all offences "involved in drunkenness or committed while under the influence of drink" are :

Weekly average for the 4 weeks preceding the Board's Orders (in 1915)	1,434
Weekly average for the 4 weeks following the Board's Orders	1,125
Weekly average for the 8 weeks ending Feb. 27, 1916	992
Weekly average for the 4 weeks ending March 26, 1916	794

STATE PURCHASE OF THE LICENSED LIQUOR TRADE

Advisory Committees have been appointed to consider the question of the State purchase of the licensed liquor trade. That on Scotland has made its Report [Cd. 8319 of 1916]. The Committee points out that the problem in Scotland is entirely different to that in England. In England the brewers, they say, are the owners of nearly all the public-houses, and therefore the purchase of the breweries by the Government would give them possession of most of the public-houses in the country. In Scotland there are some 6,700 persons who hold public-house licences and about 3,400 licensed grocers; it is calculated that it would cost £8,788,000 to buy out the publicans' interest and £1,470,000 to buy out the licensed grocers. The fact that local option will come into force in Scotland in 1920 also makes a difference between the two countries.

THE CONSUMPTION OF ALCOHOL AT HOME AND ABROAD

From time to time the Board of Trade presents to the House of Commons Statistical Tables showing the production and consumption of Alcoholic Beverages (Wine, Beer, and Spirits) in the British Empire, and in the principal Foreign Countries; and the Revenue derived therefrom. The last issue of these tables was published in 1911 (H.C. 319), and covered the fifteen years ending with and including 1909.

The following tables, compiled from the report and from the Statistical Abstract of the British Empire, show the **consumption per head** in the countries named of spirits and beer in the year 1909, and of wine in the average of the years 1905–9.

The quantity of spirits manufactured in the United Kingdom in the year ending Sept. 30. 1915 was 47,615,517 proof gall. by 142 distilleries. The distribution was: England, 8 distilleries, 12,038,395 proof gall.; Scotland, 113 distilleries, 25,966,491 proof gall.; Ireland, 21 distilleries, 9,610,631 proof gallons.

NATIONAL DRINK BILL, 1915

During a number of years the late Mr. William Hoyle contributed to the *Times* an annual letter setting forth the national consumption and cost of intoxicating liquors in the preceding year. After his death in 1885 these annual letters were continued by Dr. Dawson Burns. Dr. Burns died in 1909, and the task was then undertaken by Mr. George B. Wilson. Mr. Wilson estimates the total expenditure of the United Kingdom on alcoholic liquors during 1915 at £181,959,000, as compared with £164,463,000 in 1913. The extraordinarily high rate of wages, the large numbers of unsteady casual labourers who were earning double or treble their ordinary pay, the abnormal development of the practice of treating, and the unprecedented disturbance of normal family life caused by the enlistment of a vast Army and the existing conditions of labour, resulting in a deplorable and marked increase in drinking amongst women, were all factors making very strongly for an increased consumption of drink. But for the restrictions by the Liquor Traffic Central Control Board it may be safely asserted that the nation would have had to face an expenditure on and a consumption of drink in 1915 which would have been of unprecedented and startling magnitude. There was an enormous increase (929,000 proof gall.) in the domestic consumption of rum, which appeared to have received a new lease of life at home in consequence of its use by the military authorities abroad. Wine continued its steady decline. In 1915 the average expenditure per head was £3.18.11, and per family of five £19.14.7, as compared with £3.10.10 per head and £17.14.2 per family in 1914. According to the Census of Production [Cd. 6320 of 1912], the number of persons engaged in the manufacture of alcoholic liquor in the United Kingdom was 111,759, and there are probably another 450,000 engaged in the retail trade.

Statistics prepared by Dr. Charles W. Eliot show that in the U.S. the yearly drink bill amounts to £440,000,000, and the tobacco bill to £240,000,000.

THE TREATMENT OF INEBRIATES

An inebriate has been defined as a person who habitually takes or uses any intoxicating thing or things, and while under the influence of such thing or things, or in consequence of the effects thereof, is (*a*) dangerous to himself or others, or (*b*) a cause of harm or serious annoyance to his family or others, or (*c*) incapable of managing himself or his affairs, or of ordinary proper conduct.

The **Habitual Drunkards Act, 1879,** provided for the detention in retreats of those inebriates only who chose to surrender their liberty of their own free will. The **Inebriates Acts, 1898 and 1899,** made compulsion legal in the case of such drunkards as by repeated drunkenness in public or by crime brought themselves wthin reach of legal procedure. The Licensing Act, 1902, gave power to commit a wife who was an habitual drunkard to a retreat.

Roughly, there are about 48,000 inebriates, of all classes, in England and Wales at the present time (about 1·42 per 1,000 of the population), of which number about 16,000 are persons in private life—whose habits have not led to conviction in police courts—and 32,000 known to have criminal or disorderly tendency.

Institutions for Inebriates

There are three kinds of institutions to which inebriates may be sent: viz.—(1) **Certified Inebriate Reformatories,** which number 6. Of these 4 are for women only, and 2 admit both women and men. The average number of committals to Reformatories is about 310, (93 men and 217 women). (2) **State Inebriate Reformatories,** which are for the worst cases, and to which are sent those inebriates who prove too refractory for further control in certified institutions. The Aylesbury State Reformatory for Women has an average number of 65 under detention; and the Warwick Reformatory for Men, 20. (3) **Licensed Retreats,** in which there has been marked improvement in late years. These number 18, and 521 persons are received on an average—161 under the Acts and 360 as private patients. **In Scotland** there is a State Inebriate Reformatory at Perth, besides 3 Certified Reformatories and 2 Retreats, with average admissions of 1,247. **In Ireland** there is a Certified Reformatory at St. Brigid's, Wexford (32 female patients), and a Retreat at Belfast (15 patients).

THE PUBLIC-HOUSE REFORM MOVEMENT

For over fifteen years attempts have been made, in different parts of Great Britain, to get public-houses under public management by means of **Public-house Trust Companies.** Whilst recognising that public-houses are a public necessity, the object is to eliminate, as far as possible, the element of private profit from the retail trade of intoxicating liquors; to secure a strict enforcement of the regulative provisions of the existing licensing law; to maintain the public-houses acquired not as mere drinking saloons, but as refreshment houses so far as local conditions will permit; to limit the shareholders' dividends to 5%, and to pay all profits (over and above depreciation, reserve, and dividend) to trustees for public purposes. In order to remove all temptation to the manager to push the sale of intoxicants, he is paid a fixed salary, and is allowed no profit whatever on the sale of alcoholic drinks, but is allowed a profit on all trade in food and non-alcoholics. Tea, coffee, and other temperance drinks, and food, are made readily accessible at the bars, and are served

The New HAZELL, 1917

promptly. To Earl Grey and the Bishop of Chester is due the credit of having originated the movement. There are now 21 Trust Companies in the United Kingdom—16 in England and Wales, 1 in Ireland, and 5 in Scotland. There are over 300 houses now under trust management, and a large number will be offered for trust management on the expiration of the existing leases. *Secretary*, Hugh A. Paget. *Office*, 15 Dean's Yard, Westminster, S.W.

In this connection also should be mentioned the **People's Refreshment House Association, Ltd.**, founded by the Bishop of Chester in 1896. The Association controls 140 inns on reformed lines in various counties. *Secretary*, Reginald Cripps. *Offices*, Broadway Chambers, Westminster, S.W.

INTERNATIONAL CONGRESS AGAINST ALCOHOL

An International Anti-Alcohol Congress has been held biennially during the past twenty years in various European towns, and met in London July 1909, at The Hague in 1911, and in Milan in 1913. All arrangements were made for the 1915 Congress to be held in the United States, but owing to the war it was postponed until 1917, the U.S. Government's appropriation of £10,000 being confirmed for that year. British Correspondent's address, National Temperance League Office, Paternoster House, E.C.

SCOTTISH TEMPERANCE ACT

Temperance (Scotland) Act, 1913 (which, so far as regards the polling of electors, does not come into force before June 1, 1920), is designed to promote temperance in Scotland by (*a*) conferring on the electors in prescribed areas control over the grant and renewal of certificates. A poll must be taken by a local authority on a requisition signed by not less than one-tenth of the electors in the area; the questions to be submitted to the electors shall be (1) **No-change Resolution**, meaning that the powers and discretion of the licensing court shall remain unchanged; (2) **Limiting Resolution**, meaning that the number of certificates for the sale of exciseable liquors shall be reduced by one-quarter; and (3) **No-licence Resolution**, meaning that no certificate for the sale of exciseable liquors shall be granted except for inns and hotels or restaurants in special cases. If 55% of the votes recorded are in favour of a no-licence resolution, and not less than 35% of the electors have voted, the resolution will be carried; but a mere majority on a 35% poll will carry a limiting resolution; and a mere majority, independent of the size of the poll, a no-change resolution. Only one of the three resolutions can be voted for, but if a no-licence resolution is not carried, the votes recorded in favour of such a resolution can be added to those in favour of the limiting resolution. When a poll has been taken, no further poll can be taken before the month of November in the third year from the date of the last poll; (*b*) by substituting, on and after May 28, 1914, a later hour of opening (10 a.m. instead of 8 a.m.); (*c*) by amending the law relating to clubs, and by other incidental provisions.

TEMPERANCE SOCIETIES AND INSTITUTIONS

The Temperance movement had its origin in Scotland and Ireland in 1829, and in England in 1830, the British movement having been suggested by the earlier reform in the United States in 1826. At first societies were founded on the principle of abstinence from ardent spirits, but in less than ten years this abstinence was extended to all intoxicating beverages. Temperance organisations are now of great variety and extent; the chief societies and institutions are detailed below.

Army Temperance Association, Royal. *Gen. Sec.* Clare White. *Office*, 47 Victoria Street, Westminster, S.W.

British Temperance League (founded 1835). *Sec.* Charles Smith, F.S.S. *Office*, 29 Union Street, Sheffield.

Church of England Temperance Society (Incorporated) (£52,443). *Sec.* Rev. Gerald A. Thompson. *Office*, 50 Marsham St., Westminster, S.W.

Good Templars, International Order of (first formed in New York in 1851, and extended to England in 1868 by Joseph Malins). *Gen. Manager*, R. Cromblehoime. *Offices*, 168 Edmund Street, Birmingham.

Licensing Administration Bureau. *Hon. Sec.* C. Pinhorn, 27 Memorial Hall, Farringdon Street, E.C.

Medical Temperance Association, British. *Pres.* Prof. Sims Woodhead; *Hon. Sec.* W. McAdam Eccles, M.S., F.R.C.S., 124 Harley Street, W.

National Temperance Federation. *Hon. Sec.* Guy Hayler, "Courtfield," Avenue Road, South Norwood Park, S.E.

National Temperance League. *Sec.* J. T. Rae. *Office*, Paternoster House, London, E.C.

National United Temperance Council. *Hon. Sec.* C. Pinhorn, 27 Memorial Hall, Farringdon Street, E.C.

Naval Temperance Society, Royal. *President*, Admiral Sir G. F. King Hall, K.C.B., C.V.O.; *Hon. Superintendent*, Miss Weston. *Headquarters*, Royal Sailors' Rest, Portsmouth, and Devonport.

Scottish Temperance League. *Sec.* Jas. Gillies. *Office*, 108 Hope Street, Glasgow.

Sons of Temperance (National Division).—Estab. 1855 in England. Adult membership, 123,470, also 93,135 cadets and 132,760 State Insurance members. Funds, £618,708. *President*, Ald. W. J. Wightman (London); *Treasurer*, J. H. Steele, J.P. (Salford); *Chief Secretary*, W. Davies, J.P. *Offices*, 244 Oxford Road, Manchester.

Temperance Legislaton League, formed in November 1905, advocates a definite constructive policy of Temperance Reform by a scheme of state purchase of the liquor trade, the effective administration of the licensing laws, and the provision of counter-attractions or alternatives to the public-house. *Chairman of Committee*, Joseph Rowntree; *Hon. Secs.* Arthur Sherwell, M.P., and J. M. Hogge, M.P.; *Sec.* A. F. Harvey. *Office*, Parliament Mansions, Victoria Street, S.W.

United Kingdom Alliance, formed in 1853, aims at obtaining a law enabling the voters of each locality to exclude totally, or partially, the sale of intoxicating liquors; but it aids all legislation in favour of progressive temperance reform. *Secretary*, G. B. Wilson, Grosvenor Chambers, 16 Deansgate, Manchester; *Metropolitan Superintendent and Parliamentary Agent*, Alexander Thomson. *Offices*, 11 Tothill St., Westminster, S.W.

United Kingdom Band of Hope Union, with 434 unions and 33,440 societies. *Patron*, His Majesty the King; *President*, The Hon. Mrs. Eliot Yorke; *Treasurer*, Edward Wood; *Sec.* C. Wakely. *Offices*, 59 and 60 Old Bailey, E.C.

Women's Temperance Association, National, British. *President*, Rosalind Countess of Carlisle;

Sec. Miss Hunt. *Office*, 47 Victoria St., London, S.W.

Women's Total Abstinence Union. *Sec.* Miss Boyd. *Office*, 4 Ludgate Hill, E.C.

World's Women's Christian Temperance Union. *President*, Rosalind Countess of Carlisle; *Hon. Secs.* Miss Agnes E. Slack, Caxton Buildings, Ripley, Derbyshire, and Miss Anna A. Gordon, Evanston, Ill., U.S.A.

Young Abstainers' Union. *Sec.* Miss Edith Skelt. *Office*, 33 Henrietta Street, Strand, London, W.C.

Society for the Study of Inebriety. Established 1884. Quarterly organ, "The British Journal of Inebriety." *Pres.* Sir Wm. J. Collins, K.C.V.O.; *Hon. Sec.* T. N. Kelynack, M.D., 139 Harley Street, W.

CRIME AND ITS PREVENTION

ENGLAND AND WALES

The number of **indictable offences reported to the police,** or otherwise coming within their cognisance, in 1914 was 89,387.

The **different classes of crimes** were as follows:—

	Offences reported
Against the person	4,218
Against property with violence	10,850
Against property without violence	70,124
Malicious injuries to property	594
Forgery and Currency offences	570
Other offences	3,031
	89,387

In respect of the total number of 89,387 offences reported to the police, 63,665 persons were prosecuted, 10,237 were discharged, including 4,740 who were tried summarily and acquitted; orders were made without conviction in respect of 18,070 persons against whom the charges were proved; 24,949 were tried summarily and convicted; and 10,193 were sent for trial at Assizes and Quarter Sessions.

The **number of persons tried,** at Assizes and Quarter Sessions, in 1914 was 10,800, of whom 1,858 were acquitted, and 8,668 convicted, 28 being found "guilty, but insane." The number of persons tried by courts of summary jurisdiction was 674,524, of whom 47,759 were charged with indictable offences, and 626,765 with non-indictable offences. The number of persons who were discharged was 71,454, while 86,361 were dealt with without conviction after the charge was proved, and 516,709 were convicted. These 516,709 persons who were convicted were dealt with as follows: Imprisonment, 50,794; detention in place of detention, 54; detention in inebriate reformatory, 183; detention in reformatory school, 1,248; receive a whipping, 2,275; pay a fine, 455,933 (but about 75,000 went to prison in default of payment of fines); ordered to enter into recognisances, 4,417; otherwise disposed of, 1,988.

The Prevention of Crime Act, 1908, provides that persons who have been thrice convicted of crime and who are persistently leading a dishonest or criminal life, may, upon being sentenced to penal servitude for a fresh offence, be further sentenced to preventive detention for a period not exceeding ten years nor less than five years: the term of preventive detention to take effect after the determination of the sentence of penal servitude. Convicts undergoing preventive detention are confined in prisons set apart for the purpose with some amelioration of the usual prison treatment. Forty-three persons were sentenced to preventive detention in 1914.

The **Criminal Law Amendment Act, 1912,** for the suppression of the white slave traffic, gives power to the police to arrest on suspicion without a warrant any person suspected of procuration or attempted procuration. It also contains a provision empowering the Court to order flogging for a first offence. A special staff at Scotland Yard looks after the work under the Act.

Court of Criminal Appeal.—There were 497 applications in 1914 for leave to appeal: leave was granted in 106 cases. In addition there were 27 appeals on grounds involving questions of law, 5 with the certificate of the Judge at Trial, and 22 appeals against sentences of preventive detention, making a total of 160 appeals for hearing. In 99 cases the conviction or sentence was affirmed, in 36 cases the conviction or sentence was quashed or some other sentence substituted, and 63 applications were abandoned.

The police estimate that on the first Tuesday in April 1914 there were **3,564 habitual criminals at large,** including 2,805 thieves, 443 receivers of stolen property, and 171 other criminals. These figures include some, but not all, of the supervisees. The number of **houses of bad character** was estimated at 1,176, of which 374 were houses of receivers of stolen goods, and 802 were houses frequented by thieves.

During 1914 there were 2,757 persons under police supervision, nearly half of them living in London.

The **Coroners' Returns** are closely connected with the subject of crime. In 1914 there were 38,129 inquests held, and **3,974 deaths** were ascribed to **wilful or criminal acts.** Of these, 3,697 were **cases of suicide.** 1,098 inquests were held upon the bodies of children suffocated whilst in bed with their parents or others, a verdict of accidental death being returned in 1,018 cases. There were 1,226 deaths due to neglect, exposure or excess.

No fewer than 52,149 persons out of a total of 139,060 sent to prison in 1913 (the figures for 1914 are omitted in the Criminal Statistics in consequence of the war) were convicted of drunkenness, 15,364 of simple larceny, 8,505 of other indictable offences, 8,622 of assaults, 15,871 of begging and sleeping out, 8,627 of offences against police regulations, 8,063 of prostitution, and 2,082 of misbehaviour as paupers.

The total number of convicted persons received into prison in 1914 was 146,889, exclusive of 545 persons convicted by courts-martial. Of these, 135,076 were criminal prisoners, and 11,813 non-criminal prisoners.

The **number of persons tried for murder** was 55 (37 male and 18 female). Of these 23 were convicted and sentenced to death. Six of the persons charged with murder were found insane on arraignment, and 12 were found guilty but insane.

There were 1,285 children sent to **Reformatory Schools** and 2,913 to **Ordinary Industrial Schools.**

SCOTLAND

The **number of persons charged with offences** in 1914 was 143,585. The **different classes of crimes** were:

Against the person	4,423
,, property with violence	1,513
,, ,, without violence	10,320
Malicious injury to property	2,303
Forgery, etc.	34
Other crimes	786
Miscellaneous offences*	124,206
Total	143,585

No person suffered the penalty of **death** in 1914. The number of persons sentenced to **penal servitude** was 83, the lowest number recorded since 1906. In addition to sentences of penal servitude, **preventive detention** was imposed under powers conferred by the Prevention of Crime Act, 1908, on 4 of these persons, who were proved to be habitual criminals. The minimum term of detention authorised by the Act is 5 years, and this term was imposed in 2 cases. The total number of persons committed to prison during the year was 43,430. The number of persons dealt with under the Probation of Offenders' Act was 3,824. The number of **criminal lunatics** received into asylums was 15, and at the end of the year 1914 there were under detention 66, of whom 22 had been charged with murder.

There were 216 children sent to **Reformatory Schools** and 834 to ordinary **Industrial Schools.**

The number of persons dealt with in **Juvenile Courts** was 11,087.

IRELAND

Indictable offences, which numbered 9,931 in 1912 and 9,241 in 1913, decreased to 8,504 in 1914. The total is equal to an annual rate of 1·94 per 1,000 of the population of Ireland, estimated to the middle of the year 1914, as compared with a rate of 2·27 per 1,000 in 1912 and 2·11 per 1,000 in the year 1913. The number of persons tried for non-indictable offences fell from 178,140 in 1913 to 163,041 in 1914. A remarkable increase has been observable in recent years in the number of prosecutions against owners and drivers of carts under the Highway Acts. There was a decrease of 4,804 in the number of persons tried for drunkenness in 1914 as compared with the preceding year, and compared with the average for the 10 years, 1904–1913, there was a decrease of 16,201 persons tried for this offence.

Analysing the various classes of indictable offences the figures for 1914 are:

For offences against the person	587
Against property with violence	709
,, ,, without violence	6,067
Malicious injuries to property	596
Forgery, etc.	57
Other offences	488
	8,504

JUVENILE OFFENDERS

The Children Act, 1908, directs that a Court of Summary Jurisdiction, when hearing a charge against a child or young person (*i.e.* persons aged under 14 years and aged 14 to 16 years respectively) shall take the case in a "Juvenile Court," *i.e.* either in a different building or room from that in which the Court ordinarily sits, or on a different day or at a different time from the ordinary sittings of the Court. The general public are excluded from a Juvenile Court.

The number of persons brought before Juvenile Courts in England and Wales in 1914 was 20,180 children, 14,412 young persons, and 2,337 persons aged above 16. Deducting the latter persons and adding 734 children and 2,544 young persons who were dealt with by ordinary Courts of Summary Jurisdiction, either because they were charged jointly with adults or because they were supposed to be above 16, we get a total of 37,870 juvenile offenders (20,914 children and 16,956 young persons). This total is little more than 5% of the whole number of persons proceeded against for criminal offences. Of the 37,870 persons brought before juvenile courts, less than 6% were females, whereas among persons dealt with by ordinary courts of summary jurisdiction the proportion of females is more than 16%.

BORSTAL INSTITUTIONS

Part 1 of the Prevention of Crime Act, 1908, as amended by the Criminal Justice Administration Act, 1914, provides for the **reformation of young offenders.** It empowers the Secretary of State to establish Borstal Institutions in which offenders, **of either sex,** of not less than 16 nor more than 21 years of age, who may be convicted of an offence rendering them liable to a sentence of penal servitude or imprisonment, may receive such industrial and other instruction, and be subjected to such **disciplinary and moral influences,** as will conduce to their reformation and the prevention of crime. In such cases as the Acts specify, the Court, instead of passing a sentence of penal servitude or imprisonment, may order the detention of the offender under penal discipline, for a period of not less than two years nor more than three years, in a Borstal Institution. The system takes its name from Borstal Prison, Rochester, where it has been carried on for some years with very gratifying results. In August 1909 the name of Borstal Prison was officially altered to Borstal Institution. On a boy's discharge from the Institution he is handed over to the **Borstal Association** (*Offices*, 15 Buckingham Street, Strand), a society founded by Sir Evelyn Ruggles-Brise, Chairman of the Prison Commission. In 1914 514 persons (453 males and 61 females) were admitted into Borstal Institutions in England and Wales, and 100 (93 males and 7 females) in Scotland. On a boy's or girl's discharge from the Institution, the Borstal Association sees that he or she has the means to live decently until fairly established.

A division of the Home Office deals with all questions relating to children, particularly reformatory and industrial schools, children's courts, probation officers, cruelty to children, and street trading.

THREE LARGE CITIES COMPARED

According to a statement made by the chairman of a Special Council Committee in Chicago, the comparison of crime in London, New York, and Chicago in 1914 was: Murders—Chicago, 262; New York, 131; London, 36. Robberies and assaults to rob—Chicago, 1,022; New York, 926; London, 78. Burglaries—Chicago, 1,041; New York, 1,755; London, 1,129.

* Drunkenness, breaches of the peace, offences against Police Acts, vagrancy, etc.

THE BRITISH ASSOCIATION

Founded by a small body of scientific men led by Sir D. Brewster, the British Association for the Advancement of Science met for the first time in Cork in 1831. It had for one of its leading principles the idea of stimulating public interest in science, and for this purpose its constitution enjoined an annual meeting in some leading town of the United Kingdom. Consequently in the eighty-five years of its existence its meetings and the deliberations which are a part of them have taken place in nearly every town and city of importance in the British Isles, in some cases more than once; and the annual meeting has on five occasions been extended to the Dominions Overseas, having been held three times in Canada, once in South Africa, and, in 1914, when the opening of the meeting almost coincided with the outbreak of the European War, in Australia. The annual meeting is never held in London.

At these meetings a Presidential Address is delivered by an annually elected President, who is chosen alternately from the ranks of exponents of the "living" and "dead" sciences, and, as far as possible, so as to bring into prominence in rotation the claims of the Sections of Science with which the Association deals. These sections are respectively Mathematics and Physics (with which are associated Astronomy and Meteorology), Chemistry, Geology, Geography, Zoology, Physiology, Botany, Economics and Statistics, Education, Engineering, Anthropology, and Agriculture. Each of these sections has its President, who opens the session by an address dealing with his specific subject, and not uncommonly his own work in relation to it. Papers by other members are afterwards read and discussions held.

In addition to the transactions at the annual meeting, the British Association conducts through various Committees and independent workers, to whom it grants subsidies, a large amount of valuable research of mathematical, physical, seismological, anthropological, archæological, chemical, and biological importance. It publishes annually a volume of reports of the annual meeting, and the Presidential and Sectional Presidential Addresses, and the work of the more important papers read by the members and delegates. The annual meeting was held this year (1916) at Newcastle under the presidency of Sir Arthur Evans, F.R.S. The meeting in 1917 will be held at Bournemouth, under the presidency of the Hon. Sir Charles Parsons, F.R.S.

General Secretaries, Prof. H. H. Turner, F.R.S.; Prof. W. A. Herdman, F.R.S.
Treasurer, Prof. John Perry, F.R.S.
Assistant Secretary, O. J. R. Howarth, M.A.
Chief Clerk, H. C. Stewardson.
Offices, Burlington House, W. Hours, 10 to 4.

The meeting at Newcastle-on-Tyne opened on Tuesday, Sept. 5, and lasted only four days. As in the previous year, it was shortened owing to the war, and the pleasant excursions and modest festivities which usually form a part of the meeting were dropped. It was naturally a small meeting, but it obtained much more local support than was expected, and the standard of its addresses and discussions showed no decline.

The Presidential Address of Sir Arthur Evans was delivered in the Town Hall on Tuesday evening. Its title, "The Cradle of European Civilisation," faithfully reflected the substance of its survey of the earliest history of Europe as Palæolithic man glided into Neolithic man, and the period of Mesopotamian and Egyptian civilisation was ushered in. One feature after another, the President declared, that had been reckoned as the exclusive property of Neolithic or later ages could be shown to have been shared by Palæolithic man in the final stage of his evolution. On the Neolithic foundations our later civilisation stood, and the earliest extraneous sources on which it drew lay respectively in two directions—in the valley of the Nile on the one side, and in that of the Euphrates on the other. Crete, the "Mid-Sea" land, was, owing to its geographical position between three continents, the cradle of European civilisation, but the extraneous influences that were here operative encountered on the island itself an indigenous culture which had grown up there from immemorial time. Sir Arthur Evans reviewed the import of recent discoveries in Crete and affirmed his conclusion that cultural influences were reaching Crete from beyond the Libyan Sea before the beginning of the Greek dynasties; and he pointed to the possibility, through the examination of the Minoan periods in Crete, of tracing the path by which the glimmering torch lit by the Palæolithic cave-dwellers had been carried on through the succeeding ages of obscurity.

In the **Mathematical and Physical Section** Prof. A. N. Whitehead delivered an address on "The Organisation of Thought," which was a brief examination of the nature of scientific thought, especially in relation to mathematical thought. He contrasted the immediate experience of natural phenomena with the scientific conceptions of them and with the exact deductions of applied mathematics. The problem he considered was how these two sides of scientific knowledge fitted with one another.

Two discussions took place in the section, on "Osmosis" and on "Gravitation." The second of these was opened by Mr. E. Cunningham, and its main problem was the relation of the observed natural phenomena of gravitation to the mathematical theory of relativity. It was stated by Prof. A. S. Eddington that by the adoption of Einstein's theory, which dispenses with the idea of the ether, some of the observed discordances in the movements of the planet Mercury are accounted for. The discussion on "Osmotic Pressure" was opened by Prof. A. W. Porter. Sir E. Rutherford read a paper on the "X-ray Spectra of the Elements," and Prof. H. H. Turner one on "The Measurement of Time."

Prof. G. Henderson, in the Presidential Address to the **Chemical Section**, gave an account of the chief developments of chemical technology during the last quarter of a century; and dealt with the future prospects of the chemical industry in Great Britain. He protested against the conduct of teaching in our public schools on mediæval lines. Mr. F. H. Carr and Mr. C. M. Whittaker read papers on the Organic Chemical Industry and the Coal-tar Dye Industry; and Mr. Rintoul a paper in "Chemicals for Laboratory Use."

In the **Geological Section** Prof. W. S. Boulton reviewed the work of the National Geological Survey, especially considering its bearings on the discovery and development of concealed coalfields; and concluded with an examination of the services rendered by economic geology.

There was a joint meeting with the Chemical

Section on "Coal and Coal Seams, with special reference to their economic uses." Most of the papers read dealt with the local geology of Great Britain and Ireland.

Prof. MacBride's address to the **Zoological Section** examined the progress made during the last twenty years in elucidating the laws governing the growth of the germ into the adult animal. The address was illustrated with photographic lantern-slides of the information obtained by Prof. MacBride from the marine animals which are reared in the salt-water tanks of the Imperial College of Science. Prof. MacBride's essential conclusion was that the development in the cell was dependent on a form of evolution similar to that which, by exterior influences, moulded the growth of organs in Darwin's theory.

Among the papers read were "The Exploitation of British In-shore Fisheries," by Prof. W. A. Herdman; "Amœbæ in Relation to Disease," by Dr. Pixewell-Goodrich; the "Flagellate Protozoa associated with Diarrhœa and Dysentery," by Dr. Annie Porter; and "Some Points of Bionomic Interest in Australia," by Dr. F. A. Dixey.

In the **Geographical Section** the President, Mr. Edward A. Reeves, surveyed "The Mapping of the Earth—Past, Present, and Future." In a comparative estimate of the condition of the world's surveys in 1860 and in 1916, he found that whereas fifty-six years ago only one-thirtieth of the world's land-surface was accurately mapped and surveyed, the amount to-day is one-seventh. The proportion entirely unsurveyed and unmapped then was one-half; to-day it was a little less than one-seventh.

A discussion was opened by Sir Thomas Holdich on "Political Frontiers." Dr. R. W. Seton Watson read a paper on "The Adriatic Problem," Dr. W. S. Bruce one on "The Weddell Sea," and Mr. Trevor Battye one on "Nepal."

The general title of Prof. Kirkaldy's address to the **Economic and Statistics Section** was "Thoughts on Reconstruction after the War." He referred to the economic condition and industrial changes resulting from the war, and embarked on a forecast of the industrial future. He suggested as main outlines of reconstruction after the war that all members of any given industry should be members of its trade union; and that there should be a more complete and authoritative central body. Employers should be organised into: district associations of trades; national associations of one trade; local federations of trades and national federations of trades.

The section gave the greater part of its time to the consideration of the reports it is preparing on "Industrial Harmony," "Outlets for Labour," and the "Effect of the War on Credit Currency and Finance."

Mr. Gerald Stoney, in his address to the **Engineering Section,** dealt with some of the questions of industrial organisation and wages which had been surveyed from a different standpoint in the Economics Section. He dwelt also on the importance to industry of such work as is carried on at the National Physical Laboratory, and urged the prime necessity of equipping and subsidising that institution on a much more generous and businesslike scale.

The Section held a joint discussion with the Chemical Section on "Fuel Economy." Mr. C. Le Maistre read a paper on "Standardisation" and Prof. Howe on "The Capacity of Aerials."

Dr. H. Marett, in the **Anthropological Section,** urged the claims of the science of Anthropology in University education, and supplemented the plea made by Sir R. Temple three years ago for an Imperial bureau of applied anthropology.

Dr. F. B. Jevons read a paper on the boundary in primitive culture between what was magic and what was religion. Prof. Ridgeway explained the origin of the actor. Prof. Keith discussed the question whether the British facial type was changing.

Prof. A. R. Cushny's extremely original and interesting address to the **Physiological Section** dealt with the analysis of living matter in its relation to poisons; and he discussed how far the reaction to drugs might be utilised to test the presence of different kinds of living matter.

Prof. A. D. Waller dealt with his favourite topic of "Chloroform Apparatus." Prof. Halliburton's paper on "The Effect of Pituitary Extract on the Secretion of Cerebro-spinal Fluid," Dr. Bayliss's paper on "Solutions for Intravenous Injection," and Dr. Kojima's note on "Thyroid Feeding and the Pancreas" were of uncommon importance. Sir Edward Schäfer inaugurated a discussion on the action of poison gases.

Dr. A. B. Rendle, President of the **Botanical Section,** devoted his address to the application of botanical work to economic uses. Among subjects which he suggested for inquiry were intensive cultivation, new plants of economic value, medicinal plants, manures, plant ecology, plant diseases, and the anatomical and chemical study of timbers.

Dr. Marie Stopes read a paper on "Leaf Architecture," and Sir J. Stirling-Maxwell delivered a lecture on "Afforestation."

In the **Educational Science Section** the presidential address of the Rev. W. Temple dealt with the less material side of education, the spirit which should infuse it, its ideals and its aims.

Papers on Primary School Reform were read by Mr. J. G. Legge, Prof. T. P. Nunn, and Prof. J. A. Green. The Rev. H. B. Gray dealt with "The Relative Value of Literary and Scientific Subjects in General Education."

In the Section of **Agriculture** the presidential address given by Dr. E. J. Russell discussed the methods by which crop production could be increased—on light soils (by manurings); on heavy soils (by chalking and liming followed by drainage); on all soils by fertilisers; and by finding new varieties.

Prof. W. Somerville read a paper on "British Forestry, Past and Present," Mr. T. Goodey on "Soil Protozoa and Soil Bacteria," and Mr. E. H. Richards on "The Fixation of Nitrogen."

MEDICAL TRAINING OF WOMEN

Women are admitted to the **medical degrees** or diplomas **of the following bodies**: (1) all the Universities of Great Britain and Ireland, with the exception of Oxford and Cambridge; (2) the Royal College of Physicians, London, and the Royal College of Surgeons, England; (3) the Societies of Apothecaries of London; (4) the conjoint Colleges of Scotland and Ireland. There are medical schools for women only in London, Edinburgh, Glasgow, and Belfast. Most of the provincial medical schools admit women. The oldest and largest medical school for women is the **London (Royal Free Hospital) School of Medicine for Women** (see p. 284).

The New HAZELL, 1917

MEDICINE IN 1916

The war unfortunately overshadows everything. It will be profitable to answer two questions with regard to the medical profession. Firstly, What has the profession done? Secondly, What steps are being taken in order to render the experience gained by the members of the R.A.M.C. available for the profession as a whole, and so for the advantage of the community at large.

For the answer to the first question we cannot do better than refer to a valuable article contributed to the *British Journal of Surgery* by Sir Alfred Keogh, on "Surgical Organisation in War." Sir Alfred Keogh insists that the primary object of the R.A.M.C. is the maintenance of the strength of armies in the field, through prevention of disease.

The second great function is the collection, removal, distribution, and care of the sick and wounded.

Owing to the sudden increase of the Army, mobilisation and expansion had to proceed together, and Sir Alfred Keogh says "the services of the civil profession to the administration in this connection must never be forgotten."

Then came the appointment of consulting surgeons, by whom all subsequent surgical developments can be determined. They set the scope and the standard of practical work and scientific investigation.

The method by which the demands of the Army for doctors is met is briefly as follows. A Central War Committee, composed of medical men, was formed and recognised by the War Office. All medical men up to the age of 45 years were asked to enrol, and by so doing rendered themselves available for a commission in the R.A.M.C. A request is sent to each division of the British Medical Association for a certain number of medical men. The local War Committee meets and selects the names, which are submitted to the Central War Committee. Appeals are heard by either of the committees, and if allowed, other names are substituted. The practitioners remaining at home undertake the care of the absentee's practice, and safeguard his interests by refusing to attend any of his patients for twelve months after he has returned from the war.

A further appeal has been issued for medical men between the ages of 45 and 55 years to apply for commissions in the R.A.M.C. for home service only.

With regard to the second question, steps are being taken by the Medical Research Committee to collect all the data necessary for compiling a medical history of the war, in order that the vast clinical material available may be used for the benefit of the community at large.

The medical peculiarities of this war are:

1. The number of differently situated institutions through which any given patient is likely to pass before his treatment is complete.

2. The clinical branch of the R.A.M.C. is an immense conglomerate body, whose members as a whole have little experience in common, beyond their passage through medical schools.

3. The number of cases treated runs into hundreds of thousands.

So it comes to pass that very few practitioners are able to observe a patient from the beginning of his injury or illness to the end.

In all areas in France arrangements are in operation by which specimens illustrating the pathology of the injuries and diseases seen at the front are transmitted to the Museum of the Royal College of Surgeons of England, whence they are, if desired, redistributed to local museums and institutions. The same lines are being adopted in regard to questions connected with epidemology and general hygiene.

Capt. Waser and Capt. Bates have published in the *British Medical Journal* two valuable papers upon the treatment of *gas gangrene* by intravenous injections of eusol, with excellent results.

Trench-foot Tetanus.—Geo. Davis and Joseph Hilton, surgeons to the 23rd General Hospital, B.E.F., report (*Journal American Medical Association*, June 17, 1916) that in nine months they had only 8 cases of tetanus, and in only 2 had this complication occurred when prophylactic doses of serum had been given. They are therefore of opinion that all cases of trench-foot should be treated by prophylactic doses of antitetanic serum.

An important paper has been published by Col. C. J. Bond on the influence of antiseptics on the activities of leucocytes and the healing of wounds. In this paper he points out the absolute necessity for the efficient drainage of septic wounds, and cautions his colleagues against using antiseptics in too concentrated a form, or too continuously.

Sphagnum Moss as a Surgical Dressing.—The uses of moss as a dressing for wounds have been recognised for at least 900 years. The work of collecting sphagnum moss in Ireland was started in December 1915, through the help and encouragement of Col. Cathcart. Eighty different hospitals have been supplied in England, Ireland, France, Belgium, Egypt, and Greece. The Royal College of Science is now recognised by the War Office as the central depôt for sphagnum moss in Ireland, and it has requisitioned 5,000 sublimated dressings each month.

State Provision for the Treatment of Venereal Disease.—The Local Government Board, by an Order dated July 12, 1916, has put into operation the recommendations of the Royal Commission on venereal diseases, so far as the provision for diagnosis of treatment is concerned. The basis of the scheme is the free provision for the whole community of laboratory facilities for diagnosis and of adequate skilled free treatment for all persons affected with venereal diseases; 75% of the cost of carrying out the scheme will be met from Imperial funds, if such schemes have obtained the approval of the Local Government Board.

Effects of the War on the Population.—At a meeting of the Royal Statistical Society held on May 16, Mr. J. W. Nixon pointed out that, as in the Franco-Prussian War, England, France, and Germany are experiencing a serious fall in the birth-rate. The death-rate in England has not yet been seriously affected, the slight rise in 1915 being due to some extent to the bad winter and an epidemic of measles. On the marriage rate the effects have been the reverse of those of the Franco-Prussian War—a large rise having taken place in 1915. The "war-baby" theory was proved to be groundless. The serious effects which the war is having on the vital statistics of the nation was to be seen in the fact that the "natural increase" of population in 1913 was 377,000. In 1915 it fell to 252,000, exclusive of deaths of soldiers abroad.

The Eugenic Education Society is pursuing its task of enlightening public opinion upon problems

The New HAZELL, 1917

the solution of which is of paramount importance to the uprising generation. It has played an important rôle in certain legislative measures, such as the Mental Deficiency Act, the Inebriates Act, and in the campaign against venereal diseases.

Cocaine and Opium: Prohibition of Sales.—On July 28 last a Proclamation applying drastic restrictions to the trade in cocaine and opium was issued, accompanied by regulations made under an Order in Council.

The Proclamation prohibits, on and after July 28, the importation of all cocaine and all opium into the United Kingdom, except under a licence from the Secretary of State and in accordance with the provisions of such licences.

Cocaine includes all preparations, salts, derivatives or admixtures prepared therefrom or therewith, and containing 1 part in 1,000 or more of the drug.

Opium means raw opium, powdered opium or granulated opium, or opium prepared for smoking, and includes any solid or semi-solid mixture containing opium.

Plague at Bristol.—On Aug. 15 last the Local Government Board issued a statement to the effect that three suspicious cases of illness had recently occurred in three houses in the central part of Bristol, and which appeared from bacteriological examination to have been mild cases of bubonic plague. The ordinary incubation period of plague is 5 days.

At a meeting of the Bristol Health Committee, Dr. Davies, medical officer of health, stated that he thought it quite possible that the infected rat which had been found had been deliberately infected, and added that investigations were proceeding.

Elephantiasis in England.—A woman whose death was investigated at an inquest at Southwark on Aug. 15 last was stated to be suffering from elephantiasis, a disease rarely met with in England, but prevalent in India and the East. The disease might have been imported in skins which came into the district.

Epidemic Anterior Poliomyelitis.—In Aberdeen there were 29 cases in June and 26 in July last. All the cases in June, with the exception of 3 aged 4½, 6, and 11 years, were of the age of 3 or under; the majority being from 1 to 2½ years. In July all the cases except 5 were under the age of 5 years, and the majority were under 3 years; the oldest person attacked was a few months over the age of 7 years. In a few cases connection between one case and another has been traced. Dr. Matthew Hay reports that the onset has been marked in most cases by fretfulness for a few days with more or less fever, accompanied or followed by vomiting. Paralysis was not in some cases observed until after a week or more; in a few it was slight and began to disappear after a week. In most of the cases the leg has been affected; in a few, one side of the face, including the eyelids. One adult aged 24 years died during July from acute ascending myelitis—not from poliomyelitis. During August 6 additional cases of acute anterior poliomyelitis have been reported, all of them in children under 3 years of age.

The Salt-pack Treatment of Infected Gunshot Wounds.—Capts. J. H. Roberts, R. S. S. Statham, M. Donaldson, E. Alment, and A. J. Wright have published valuable papers upon the success of this treatment, which is briefly as follows. (Col. H. M. W. Gray, C.B., is the originator of this method of treatment.)

The preliminary steps in the preparation for the treatment are free incision, removal of foreign bodies and damaged tissues, then the wound is firmly packed with gauze and tablets of sodium chloride introduced. A moist dressing is then applied outside. The deeper dressings, *i.e.* those in immediate contact with the wound, are not changed for a week, after which period the dressings are more frequent.

GEOGRAPHICAL EXPLORATION

Under war conditions geographical exploration must necessarily be limited in scope, yet important expeditions have been at work both in the south and in the north polar regions.

SIR E. SHACKLETON IN THE ANTARCTIC

Sir Ernest Shackleton's expedition to Antarctica set out with the object of effecting the first crossing of that continent. News of its failure has been received during the past year, yet even what was accomplished ranks high in the story of Antarctic achievement. The main party, on board the *Endurance*, sailed from South Georgia Island on Dec. 6, 1914, and almost immediately afterwards the struggle with the ice began. Coats Land was sighted on Jan. 10, 1915. Two hundred miles of coastline, previously unknown, was seen. The name of the Caird Coast was given to it. The ice conditions were abnormally bad and the weather was unusually unfavourable, and in the following month the ship was finally beset. Drifting with the ice, she reached an extreme southerly point of 77° S., and then turned to the north-west. For a long while she proved worthy of her name, but at length, when the southern winter supervened, it became probable that her destruction was only a question of a short time, and on Oct. 27, 1915, the ice-pack screwed and squeezed her beyond hope. As all preparations had been made, she was safely abandoned, but it was found impossible to travel, dragging the boats (on which escape ultimately depended), over the terrible and unstable surface of the pack, and the party was compelled to camp and trust to the drift, which was very slow. Shackleton and his companions had to endure these conditions for no less than five months; provisions ran very short, seals were scarce, and the dogs had to be killed for food. On April 8, 1916, the party, having at last reached a latitude where the influence of the ocean was felt, were forced to take to their boats, as the ice was splitting in the swell, and in heavy weather, and under constant risk from floating ice, they fought their way on April 17 to Elephant Island, an uninhabited and extremely inhospitable refuge. Shelter was obtained in an ice-cave, but the party was much exhausted and short of food, and it was felt that if all were to be saved some must risk the voyage in search of help. Twenty-two men stayed behind, under the leadership of Mr. Frank Wild, while Shackleton with five volunteers undertook the voyage to South Georgia—a voyage of 750 miles, in winter, in a 22-ft. boat. After escaping many dangers they reached a whaling-station in South Georgia on May 20, and a Norwegian vessel of 80 tons was dispatched south as

The New HAZELL, 1917

promptly as possible. The ice, however, prevented her from reaching Elephant Island, and Shackleton therefore turned back, and making his way to the Falkland Islands took measures, in concert with the local authorities, to render more effectual aid. A Uruguayan vessel was obtained, and sailed from the Falklands on June 17, but his second attempt failed likewise, and Shackleton obtained a third vessel from Punta Arenas, only to fail for a third time. Meanwhile Scott's famous old ship, the *Discovery*, was being fitted out, but Shackleton persevered in South America, and this time obtained a steamer from the Chilean Government, in which he was at last rewarded with success. The party at Elephant Island was embarked on Aug. 30, all as well as could be expected, considering the privations and exposure to terrible weather conditions which they had undergone.

Curtailed as the expedition was, there is no doubt that important additions will prove to have been made to knowledge of the climate and ice conditions in the Weddell Sea (which has probably the worst reputation of its kind in the world), and incidentally a controversy has been settled by the disproof of the existence of "New South Greenland" in the position assigned to it by the American Benjamin Morrell in 1823.

An integral part of Shackleton's original scheme was the provision of a supporting expedition to establish supply depôts on which the party crossing the Antarctic continent might rely for the latter part of their journey. This expedition, starting from Tasmania in the *Aurora* towards the end of 1914, reached the Ross Sea in Jan. 1915. The party met with no little difficulty in landing the stores, but three parties got away in due course. The *Aurora* survived a difficult winter; in April 1915 she was blown off shore embedded in floe ice, and in July she was within an ace of being crushed. The ship was out of communication with the parties which had gone south to lay depôts, and there was no possibility of further assisting them. It was not until March 14, 1916, that she got clear of the ice, and she reached New Zealand on April 3. There are thus ten men left in the Antarctic, for whom there are ample provisions subject to the reasonable hope that they have all found access to them; as regards two of the parties, of three men each, it is not actually known that they did return to the base where provisions were left for them. The position of these men necessitates the dispatch of a relief expedition towards the close of 1916, as soon as a comparatively easy voyage to Cape Evans may be anticipated. The voyage of the *Aurora*, when fully described, promises not only a narrative of high interest but also important scientific results.

MR. STEFÁNSSON IN THE ARCTIC

Mr. Stefánsson has steadily carried on his researches in the Arctic, north of North America, and is still doing so, though some of his companions have returned. A party of six, under Dr. Rudolf Anderson, were reported in Sept. 1916 to have reached Nome in Alaska. They had mapped the Arctic coast-line of Canada eastward from the Cape Parry Peninsula for a long distance, and had made geological as well as topographical surveys of a large area midway between Alaska and the mouth of Hudson Bay, a process of correction being applied to Franklin's charts. Large copper-fields were discovered, and many ethnological and other scientific data collected. Mr. G. H. Wilkins, who reached England in October, had visited many Eskimo on the north coast of the mainland and in Victoria Land and Banks Land, spending a considerable time with the blonde Eskimo, whose discovery was a remarkable feature of Stefánsson's earlier work. Mr. Wilkins confirmed the reports of the extremely primitive character of these people, untouched by any external influence. They are polygamists. They have little or no regard for human life. They are not naturally long-lived, the normal span being apparently about fifty years. Mr. Wilkins reported a rich copper-field on Bathurst Inlet. Stefánsson himself was reported in May 1916 to be exploring the north-west coast of the new land discovered by him north of Prince Patrick Land in June 1915, and he did not intend to return until the spring of 1917.

SIR AUREL STEIN IN CENTRAL ASIA

In February 1916 Sir Aurel Stein completed an expedition in Central Asia which had occupied him for two years and seven months. The first part of this journey enabled him to prosecute the work, of which he had previously accomplished so much, of topographical and antiquarian research in Chinese Turkestan. This completed, he struck west in July 1915, across the Russian Pamirs to the east of the ancient territory of Iran, north of the river Oxus. He received every assistance from the Russian authorities—a pleasant fact to be able to record when political relations of a few years back in this part of Asia are recalled. He found evidence that the ancient silk trade from China passed along the Alai valley. He observed the effects of the great earthquake of 1910 in the Bartang basin, where an upland valley has been completely blocked and a new lake over fifteen miles long has been formed. The liability of this region to earthquakes is found to explain many details of its topography. The traveller then passed down the Oxus valley, an important early highway of communication, of which abundant evidence was found, between Bactria, India, and Central Asia. Sir Aurel Stein comments upon the fair complexion of some of the inhabitants of Roshan, one of the remoter side valleys of the Oxus. Making his way to Meshed, he entered Seistan, following a little-known route by Rui-Khaf to Bandan, of which a plane-table survey was made. Turning then to archæological work, he discovered remains of the first Buddhist sanctuary recorded in Iran, on the Kuh-i-Khwaja hill above the marshes in which the Helmund river loses itself. The ruins were found to contain early frescoes establishing a link in the chain between Greco-Buddhist art in North-western India and Buddhist art in Central and Eastern Asia. An area left dry by the diversion of a former arm of the Helmund was found to be rich in prehistoric remains, mainly of the Neolithic period. From the southernmost Helmund marsh towards the salt basin known as Gaud-i-Zirreh a line of ancient watch-stations was discovered, built upon a systematic plan to protect the rich lands of the Helmund against invasion from the south. The early part of 1916 was devoted to the investigation of the still inhabited part of Persian Seistan, where the remains are almost wholly mediæval—*i.e.* of a much later period than those above referred to. Sir A. Stein's journey is described in the *Geographical Journal* for May 1916.

ART IN 1916

The customary January Exhibition of Old Masters at the Royal Academy was again abandoned, partly on account of possible danger from air raids, but principally because several of the Burlington House galleries were occupied during the winter by the Red Cross Society. The Diploma Gallery was also closed, and the most valuable of the works contained in it, including the unfinished relief by Michael Angelo and the famous cartoon by Leonardo da Vinci, were removed to the cellars.

As was to be expected, the war affected the Summer Exhibition of modern work, and the number of pictures submitted to the Council again showed a decline. Nevertheless the attendance was good, considering the circumstances, and it is gratifying to know that the sales were considerably better than those of 1915. The Hanging Committee for oil paintings was composed of Mr. Arnesby Brown, Mr. George Clausen, Mr. Joseph Farquharson, Mr. Andrew C. Gow, and Mr. H. S. Tuke. Sir Frank Short arranged the engravings, drawings, and miniatures, Mr. Alfred Drury the sculpture, and Mr. Reginald Blomfield the architecture. For the first time at the Royal Academy soldiers and sailors were admitted to its summer exhibition free of charge.

Three works were purchased from the exhibition by the Chantrey Trustees:—"The Kiss-group," marble, by Mr. Hamo Thornycroft (£1,250); "The Poulterer's Shop," by Mr. Frank Brangwyn (£700); and "The Lady with the Amethyst," by Mr. Charles Shannon, A.R.A. (£300). Other pictures of importance sold included "Happy England" (£250), "Lovely Lodore" (£630), and "Ben Lomond's lullaby: Loch Ard" (£630), all by Mr. David Murray; "Silent Night—from the original sketch in the possession of H.M. the King" (£265) by Mr. Bernard F. Gribble; "A Path by the Wood" (£125), by Mr. B. W. Leader; "Neuve Chapelle, March 10, 1915" (£315), by Mr. James P. Beadle; "The Lady with a Coral Ring" (£300), by Mr. Charles Shannon; "Hazy Afternoon Sunlight" (£120), by Mr. Julius Olsson; "April" (£210), by Mr. D. Y. Cameron; "Woodland Pastures, South Devon" (£200), by Mr. Wycliffe Egginton; "The Valley of the Feugh" and "On a Clear Eve," by Mr. Joseph Farquharson; "Uninvited Guests," by Mr. C. Napier Hemy; "In Time of War" (£100), by Mr. Rowland Wheelwright; "The Forest Track" (£300), by Sir Ernest Waterlow; "The Blue Drawing Room," by Mr. A. Chevallier Tayler; "The Hooge Salient" (£250), by Mr. W. L. Wyllie; "Blue, White, and Gold" (£105), by Mr. Arthur Garratt; "Aphrodite, mother of Æneas" (£500), by Sir W. B. Richmond; "O Lord, how long?" (£100), by Mr. T. B. Kennington; "Defeat of the Prussian Guard, Ypres, 1914" (£400), by Mr. W. B. Wollen; and two watercolours, "Not Twenty Miles from London" and "Wall Flowers at Cherkley Court," by Sir Edward Poynter.

At the National Gallery, as at Burlington House, many of the rooms were in use for business connected with the war, and the vast majority of pictures of importance were removed from the walls to places of security. Their places were filled by pictures that although in the national collection are rarely shown, and by some representative works from the National Portrait Gallery, which was closed altogether. But the exhibition at the National Gallery was interesting in spite of the absence of the choicest of the canvases that are usually to be seen there, as the works that replaced them temporarily were new to most of the visitors. Several recently acquired pictures were also shown, including "La Collation," by Peter de Hoogh, purchased through the Temple West bequest, and several of the Old Masters from the collection bequeathed to the nation by Sir Henry Layard. With these were shown for the first time the pictures bequeathed by the late Mr. George Rae of Liverpool, including "The Beloved," the "Monna Vanna," and the "Fazio's Mistress," by Rossetti; and the "Lear and Cordelia," and a small version of "The Last of England," by Ford Madox Brown. A portrait of a little-known British artist, Daniel Stringer, painted by himself, was also shown for the first time; and the full length of Lord Ribblesdale by Mr. J. S. Sargent was hung on the centre of one of the walls of Room XXIV. The Director of the National Gallery, Sir Charles Holroyd, resigned his post in the summer owing to ill health, and Mr. Charles J. Holmes, Director of the National Portrait Gallery, was appointed in his stead. Mr. James D. Milner succeeded Mr. Holmes as Director of the National Portrait Gallery.

The British Museum was closed early in the year, for the first time in its history, and no visitors were admitted except students working in the Reading, Newspaper, and Manuscript Rooms. The Tate Gallery and the Wallace Collection were also closed, and the most important of the Dulwich pictures were removed temporarily to the cellars of the Royal Academy. On the other hand, the Dulwich Gallery was strengthened by the loan of several interesting canvases from private collections. The Victoria and Albert Museum was less affected by the war than any other institution of its class. Special precautions were taken with the Raphael cartoons, some of the rarer objects were removed to places of safety, and the unavoidable reduction of the staff caused some curtailment of the hours of opening. Otherwise there was no change, and additional attractions were offered to visitors in the shape of a Shakespeare exhibition and a remarkable collection of miniatures lent by the Duke of Buccleuch.

Most of the art societies in London held their exhibitions as usual, and those at the private galleries included collections of drawings or paintings of special war interest. At the Leicester Gallery exhibitions were held during the season of watercolours illustrating "The British Firing Line," by Quartermaster-Sergeant Instructor Handley Read; of paintings and drawings by Mr. C. R. W. Nevinson; and of a number of *Punch* war cartoons. The Fine Art Society held exhibitions of war cartoons by the Serbian artist, Radovani, and studies of Gallipoli by Mr. Charles Dixon; pictures of the Napoleonic campaigns were shown at the Dowdeswell Galleries; cartoons by Mr. Will Dyson at the Chenil Gallery; and at the Goupil Gallery Mr. Eric H. Kennington's picture of "The Kensingtons at Laventie" was shown in aid of the Star and Garter Building Fund. At the Exhibition of the Royal Society of Portrait Painters Mr. Sargent showed a collection of thirty portrait drawings, to which one of the galleries was devoted. They were exhibited for the benefit of the Arts Fund, to which were allotted all the proceeds of the exhibition of the Society of Portrait Painters. In the autumn the Arts and Crafts Society held one of their triennial exhibitions at Burlington House in galleries lent for the purpose by the Royal Academy. An exhibition of designs and models for war memorials was arranged by the Civil Arts Association at the galleries of the

The New HAZELL, 1917

Royal Institute of British Architects in Conduit Street.

At Christie's a second great sale of works of art and other valuables presented to the Red Cross Society was held in April. Excellent prices were realised for some of the items. A Louis XV marqueterie commode fetched £892 10*s.*; a flagon of the period of Charles the First, £590; a panel of tapestry, £525; a Sèvres biscuit group presented by the French Government, £241 10*s.*; a Toft ware dish, £682 10*s.*; "The Gregory Children," by Opie (presented by Lord Leith of Fyvie), £1,260; and a remarkable letter by Dr. Johnson concerning the formation of the British Museum library, £310. This letter was purchased by Lady Wernher for presentation to the British Museum. Several prominent artists offered to paint portraits on behalf of the Red Cross Society, and the rights of commissioning these portraits were included in the sale at Christie's. The highest bid was one of a thousand guineas for a half length by Mr. Philip Laszlo, the Hungarian artist; and the next of £892 10*s.* for a whole length by Mr. Lavery. For a portrait by Mr. Orpen, head size, £682 10*s.* was bid; and for a half length by Mr. Augustus John, £336.

In the other sales at Christie's the pre-war prices were well maintained and bids were never wanting when fine pictures, objects of art, or jewels came under the hammer. In June £24,000 was realised for a necklace of three rows of pearls, and on the same afternoon a single-row necklace of pearls fetched £4,800. A pair of Chinese mandarin jars and covers sold for £5,670 on July 6, when a painted tea service (four cups and saucers, teapot, sugar basin, and cream jug) of 1759 fetched £1,680 and some panels of Beauvais tapestry £1,701. A week or two later a single panel of English tapestry was sold for £2,047 10*s.*, and its companion for £1,995; and in May a pair of William III pilgrim bottles fetched £3,000, a Louis XVI commode £1,344, and a pair of Sèvres vases £1,050. Eighteenth-century English portraits maintained their vogue, and good prices were obtained even for the work of artists of inferior rank such as Highmore (£525), Benjamin Wilson (£388 10*s.*), and Hudson (£340). No portrait of importance by Reynolds or Gainsborough was offered during the season, but two small landscapes by the last-mentioned master were sold respectively for 2,500 guineas and 3,500 guineas at the dispersal of the Golding Palmer pictures in July. One of the most famous of Gainsborough's pictures was sold privately in the spring to the American collector Mr. H. C. Frick, for a price that if gossip could be believed approached £50,000. This was the beautiful study of the promenade in St. James's Park, known as "The Mall," painted by Gainsborough in 1783. He showed it at the first of his private exhibitions in 1784, but was unable to find a purchaser for the picture, which remained in his hands until his death. A pastel by Liotard sold at Christie's fetched £1,200 guineas; a portrait of two daughters of Colonel Hardy, by Lawrence, 5,200 guineas; a "Holy Family" by Murillo, £6,510; and a portrait of a lady by Goya, £3,465. At the Barratt sale in May, Gibson's once famous statue "The Tinted Venus" was sold for £630, Landseer's "Monarch of the Glen" for £5,250, and David Cox's "Vale of Clwyd" for £4,830.

MUSIC IN 1916

As in the previous year, the war inevitably cast its shadow over the musical world during 1916. Yet, taking all the circumstances into account, the record of activities in one sphere and another afforded ground for congratulations and for confidence in the future. Enterprise was by no means at a standstill, and if little was attempted upon venturesome lines—concert-givers, in particular, showing a disposition to rely upon proved attractions rather than tempt the public with the unfamiliar—it stands to the credit of the leading musical organisations that they one and all contrived in hazardous times to "keep the flag flying."

To Sir Thomas Beecham opera-lovers were placed under a considerable debt. For, with the doors of Covent Garden closed since the summer season of 1914, it was left to that enthusiastic musician to supply their needs. Wisely he turned his energies in the direction of opera in English, and with such admirable and encouraging results that there is good reason to hope that a permanent public has now been created in London for the support of similar enterprises. Starting in association with Robert Courtneidge, he carried through a season at the Shaftesbury of which the tale, begun in the autumn of 1915, was continued in the New Year. Apart from familiar works of the established repertory, such as the Puccini operas ("Manon Lescaut," among them, being staged for the first time in English), "Il Trovatore," "Tales of Hoffmann," etc., Sir Thomas Beecham devoted particular attention to the production of new native works. First of them (on Jan. 14) was an "operatised" version of "The Critic" by Sir Charles Stanford, who, with the assistance of Cairns James, had arranged Sheridan's text for the purpose. No small measure of success attended the experiment. The satiric spirit of the famous comedy was well preserved, and reflected at moments in the music, even if the score as a whole may have been found lacking in humour. But in tokens of ripe musicianship it was strong, and the opera proved welcome, moreover, for its typically British flavour. Among the artists who particularly distinguished themselves in a performance of uncommon excellence were Frank Mullings (Don Whiskerandos), Caroline Hatchard (Tilburina), Lena Maitland, and Herbert Langley, Frederick Ranalow, Percy Heming, and Albert Chapman.

Another notable production was that, on Jan. 28, of Ethel Smyth's "The Boatswain's Mate," founded upon W. W. Jacobs's well-known story. The composer, her own librettist, had turned the characteristic humours of that tale to capital account, although her score, in this respect, was less successful than might have been hoped. Apparently she was unable to resist the temptation to exploit the strength of her musical resources, and there were scenes, accordingly, of which the effect and appropriateness would have been greater had she seen fit to adopt simpler methods. Incidentally the composer drew very cleverly upon the sources of native folk-song, and, apart from the over-elaboration referred to, her work was a notable addition to the limited repertory of British operas. In the three leading characters Courtice Pounds, F. Ranalow, and Rosina Buckman achieved remarkable success. Another novelty staged, but of a wholly different order, was a little work entitled "A Voice in the Desert," the music of which, by Elgar, was designed to accompany and illustrate a poem by Emile Cammaerts, who drew his inspiration from the anguish caused by the war in his native Belgium. The music showed the composer to be in perfect sympathy with his theme.

At the Aldwych a further season of opera under the same auspices was opened on April 15 with

The New HAZELL, 1917

a performance in the vernacular of Mozart's "Magic Flute," the principal parts being sustained by Miriam Licette, Sylvia Nelis, Maurice D'Oisly, Alfred Heather, F. Ranalow, and Robert Radford. Other works given included "La Bohème," "Madame Butterfly," "Tales of Hoffmann," "Cavalleria," "Pagliacci," and "The Critic." Interrupted by a season carried out by Beecham in Manchester, the enterprise was resumed on June 13, with a remarkably fine revival of Verdi's "Otello," sung in Italian by, among other artists, Auguste Bouilliez (a singularly gifted Belgian baritone), Mignon Nevada, and Webster Millar. The season was notable also for performances of Moussorgsky's extraordinarily impressive music-drama, "Boris Godounov," given in French for the reason, no doubt, that the rôle of the protagonist was assigned to the Belgian singer mentioned above. All the other operas staged were performed in English. They included "Tristan and Isolde," of which, with Frank Mullings and Rosina Buckman in the title-parts, and Robert Radford as King Mark, performances of quite memorable excellence were witnessed; a delightful operatic version of Bach's "Phœbus and Pan," Mozart's "Il Seraglio," Gounod's "Faust" and "Romeo and Juliet," and "The Boatswain's Mate." All the works were mounted in first-class style, and rendered in a way that proved a revelation to those who had been sceptical of the adaptability of British singers to the needs of opera. In addition to those already mentioned, the artists who appeared during the Shaftesbury and Aldwych seasons comprised Jeanne Brola, Doris Woodall, Edith Evans, Edith Clegg, Juliette Autran, Olive Townend, Bessie Tyas, Ethel Toms, D. Erlinger, Frederick Blamey, William Samuell (a rarely-gifted young Welshman whose premature death was a real loss to native opera), Gerald O'Brien, Arthur Wynn, Powell Edwards, and Frederic Austin, by all of whom admirable work was accomplished. As conductors there appeared Thomas Beecham, Percy Pitt, Julius Harrison, and Eugene Goossens, junr. The season concluded on Aug. 5, and a further one was opened under the same auspices in October, with Saint-Saëns's "Samson and Delilah."

CONCERTS

At the head of the established musical organisations that "kept the flag flying" was the Royal Philharmonic Society, which carried through its 104th season, giving eight concerts at Queen's Hall under the conductorship of Sir Thomas Beecham. The programmes were admirably varied and refreshingly unhackneyed. Features of particular interest were the suites, etc., from the ballets of Stravinsky and other Russian composers. British music was represented in works by Balfour Gardiner, Arnold Bax, Frank Bridge, Mackenzie, F. Corder, Sterndale Bennett (the centenary of whose birth was observed), and Norman O'Neill; while the soloists who appeared during the season were: vocalists—Mignon Nevada, Elsa Stralia, Ben Davies; pianoforte: Fanny Davies, Myra Hess, Pachmann, Arthur Rubinstein, Rumschisky, Sapellnikov; violin: Renée Chemet, John Saunders, Ysaye; viola: Lionel Tertis; flute: A. Fransella, Daniel Wood.

The London Symphony Orchestra's twelfth series of concerts in Queen's Hall opened on Oct. 25, 1915, and concluded on May 29, twelve concerts in all being given. Five were conducted by Beecham, three by Mlynarski, two by Safonoff, one by Arbos, and one by Sir Henry Wood. In the programmes framed for the season there was a discreet blending of the classical, the quasi-modern, and the modern. Thus Bach, Handel, Mozart, Haydn, Gluck, Beethoven, Schubert, and Weber were found in company with Berlioz (whose "Romeo and Juliet" Symphony was revived), Schumann, Brahms, and Wagner, while Tchaikovsky (who had a programme to himself), Rimsky-Korsakov, Moussorgsky, Borodin, Dvorák, Grieg, Saint-Saëns, César Franck, Parry, Elgar, Delius, Bantock, and Ethel Smyth stood for modern art. The season's soloists included Madame Réjane (who recited the text of Elgar's fine "Carillon"), Carrie Tubb, Miriam Licette, Doris Woodall, Ethel Toms, Frank Mullings, Alfred Heather, A. Bouilliez, Fanny Davies, May and Beatrice Harrison, Pachmann, Arthur de Grief, Albert Sammons, and Arthur Catterall.

Under Sir Henry Wood an excellent season's work stood to the credit of the New Queen's Hall Orchestra. Some twelve Saturday afternoon symphony concerts were given, the programmes being designed to make a wide appeal to lovers of the familiar, as represented by the works of the classical masters and popular examples of the established modern repertory. A fine performance of Franck's Symphony in D minor was an outstanding feature of the season, as was Albert Sammons's splendid playing of Elgar's Violin Concerto. Among other soloists who came forward under these auspices were Clara Butterworth, Mark Hambourg, Irene Scharrer, Guilhermina Suggia (a highly accomplished 'cellist), Sapellnikov, Tita Brand Cammaerts, William Murdoch, Benno Moiseiwitsch, Solomon, and A. Rubinstein. Sir H. Wood's Orchestra also gave 26 Sunday-afternoon concerts in Queen's Hall. The usual season of Promenade Concerts began there on Aug. 26, and lasted eight weeks.

At the Albert Hall the popular Royal Choral Society gave some eight concerts, relying upon the performance of such long-enduring works as "Messiah," "The Creation," and "Elijah," and, on the modern side, Verdi's "Requiem," Elgar's "Gerontius," and Coleridge-Taylor's "Hiawatha." Sir Frederick Bridge was once again in control as conductor, and, notwithstanding the depletion of the ranks of his male singers owing to the war, the Society well maintained its reputation.

A memorable feature of the musical season was an Elgar Festival at Queen's Hall organised by Clara Butt on behalf of the British Red Cross Society. As the result of six performances of his "Dream of Gerontius," which the composer conducted, a large sum was handed over to that organisation. Among established institutions, the Chappell "Ballads" at Queen's Hall and the London Ballad Concerts at the Albert Hall received support, a welcome innovation at the former being the appearance of a small orchestra conducted by Alick Maclean. The Albert Hall Sunday concerts also continued to enjoy favour under the conductorship of Landon Ronald. Recitals were considerably fewer than in normal times, but hearings were claimed, among other pianists, by Pachmann, Mark Hambourg, Fanny Davies, Adela Verne, Moiseiwitsch, A. Rubinstein, York Bowen, and William Murdoch (whose recitals in association with Albert Sammons proved particularly interesting), and by a fair number of vocalists, etc.; while in the field of chamber-music excellent work was achieved, notably by the London String Quartet, the London Trio, the Philharmonic Quartet, J. Holbrooke, and T. F. Dunhill. The "All-British" concerts at Steinway Hall (in connection with the War Emergency scheme organised by Isidore de Lara) were the means of introducing some admirable examples of native chamber-music.

The New HAZELL, 1917

THE YEAR'S DRAMA

If the theatrical activities of 1916 were remarkable for their extent rather than for any high level shown of intrinsic interest, it will yet remain a fact worth recording by the historian of our stage doings that the London public were not so deeply engrossed in the events of the world's great drama as to withhold their patronage and support from the theatres. It will also be a fact worth noting that the majority of playgoers, during a long period of stress and storm, bestowed their attention chiefly on the lighter forms of entertainment. In all probability, indeed, they turned to such forms as more likely than any other to distract their thoughts from things of grave import. But, whatever the reason, it is certain that the more serious contributions made to the London stage failed, generally speaking, to arouse much interest, whereas the lighter "goods" prevailed. It was, indeed, the era of revues, real and so-called, which obtained a wider vogue even than that enjoyed by musical comedy.

Of the non-musical productions, as already indicated, those that secured the greatest favour conformed to a light order. Thus, in the regions of farce, considerable success fell to H. M. Harwood's "Please Help Emily," produced in January at the Playhouse with a cast including Charles Hawtrey, Gladys Cooper and Lottie Venne; while at the Criterion "A Little Bit of Fluff" continued merrily the triumphant career begun in Oct. 1915. Even for "Ye Gods!"—by no means a brilliant specimen of its unpretentious kind—there was the reward of sufficient success to warrant its transference from the Kingsway to the larger spaces of the Strand, and later to the Shaftesbury. On the other hand, something less than the run at first anticipated awaited W. Somerset Maugham's "Caroline," a wittily written and deftly handled comedy with which, at the New, Dion Boucicault inaugurated his managerial career (Feb. 8). In this play, of which the humours were perhaps a trifle too delicate for the average theatregoer, the two leading parts were taken by Leonard Boyne and Irene Vanbrugh. With another light comedy, "Her Husband's Wife," first staged on Sept. 25, the same management looked like scoring a prolonged success. Delightfully acted by Allan Aynesworth, Dion Boucicault, Marie Löhr, and Irene Vanbrugh, this thoroughly entertaining piece by an American author—A. E. Thomas—aroused great laughter on its production.

From our leading dramatists came little enough. But Sir James Barrie offered a notable and wholly characteristic contribution in "A Kiss for Cinderella," produced at Wyndham's on March 16 by Gerald du Maurier, to whom, and to Hilda Trevelyan, fell the principal characters therein. For its many touches of fancy and whimsical humour the play belonged to the category of pure Barrie, and proved very successful. The same popular author was represented later in the year by a revival, at the Savoy, of his twenty-year-old "Professor's Love Story." H. B. Irving, who assumed the rôle of the protagonist, had enhanced his reputation previously by his clever performance of a charlatan in psychic realms in a piece (by Walter Hackett) called "The Barton Mystery" (Savoy, March 22). Among the more serious plays mention should be made of Rudolf Besier and Sybil Spottiswoode's "Kultur at Home" (Court, March 11); Louis Parker's "Disraeli" (Royalty, April 4), remarkable for Dennis Eadie's vivid portrayal of the great statesman; and Dion Clayton Calthrop's "The Old Country," staged by Du Maurier at Wyndham's on Sept. 2. In the way of pure comedy, somewhat of the "Bunty" order, the season brought a remarkably clever piece in Harold Brighouse's "Hobson's Choice" (Apollo, June 22), in which the characters, all Lancashire types, were very skilfully observed. There was a certain freshness, too, though more theatricality, about Horace Vachell's "Fishpingle," in which Henry Ainley, Allan Aynesworth, and Marion Terry appeared at the Haymarket. For the first time since the war, Drury Lane produced an autumn melodrama, "The Best of Luck," by Henry Hamilton, Cecil Raleigh, and Arthur Collins. An event of historic interest was the performance given there in commemoration of Shakespeare's tercentenary, on May 2, which was attended by the King and Queen. A Shakespeare Pageant, in which all our leading players took part, was a striking feature of the occasion.

Musical Plays and Revues.—The latter appeared to grow in favour, and exceeded the number of musical plays produced, theatre managers competing in that field with the variety houses. Of the musical pieces a favourable specimen was the Shaftesbury's "My Lady Frayle" (March 1), by Arthur Wimperis and Max Pemberton, and music by Howard Talbot and Herman Finck, though it enjoyed a less prolonged career than "Mr. Manhattan" (Fred Thompson, C. H. Bovill, and Talbot), in which, at the Prince of Wales's, the gifts of an American comedian, Raymond Hitchcock, were exploited. On May 13 "A Happy Day" (Seymour Hicks, Sidney Jones, and Paul Rubens) was very sumptuously staged at Daly's; and at the Adelphi a success of laughter was scored with the production, on Aug. 24, of "High Jinks" (book adapted by F. Lonsdale, and music by various composers). W. H. Berry was the chief comedian. Very mirthful, too, was the Gaiety's "Theodore and Co." (adapted from the French by H. M. Harwood and Geo. Grossmith, with music by Ivor Novello and Jerome Kern). Of a wholly different order of musical production was "Chu Chin Chow," a highly spectacular production founded by Oscar Asche upon the story of "The Forty Thieves," with music by Frederic Norton, and very successfully produced at His Majesty's on Aug. 31.

Of the revues none achieved greater popularity than "The Bing Boys are Here," produced at the Alhambra on April 19, with George Robey, Alfred Lester, and Violet Loraine in the cast. George Grossmith and Fred Thompson were the authors and Nat D. Ayer supplied the music. The Empire's "Follow the Crowd" did not score anything like the success of its predecessor—also from America—"Watch Your Step"; but at the Palace "Bric-à-Brac" completed at the end of September a year's brilliant run. The Hippodrome staged two highly spectacular shows, "Joyland" and "Flying Colours"; and their producer, Albert de Courville, was also responsible for a "monster" revue, "Razzle Dazzle," mounted at Drury Lane on June 19 and subsequently transferred to the Empire. On July 7 Oswald Stoll, having acquired the London Opera House in Kingsway for £55,000, presented there a big revue entitled "Look Who's Here," by Fred Thompson and Nat D. Ayer. In the way of more "intimate" revues there was the little Ambassadors' "Pell Mell" (F. Thompson, Morris Harvey, and Ayer), "Half-past Eight" (C. H. Bovill and Paul Rubens) at the Comedy—where it was succeeded by Harry Grattan and J. W. Tate's "This and That"—and Grattan's "Some"—a particularly bright and well-inspired specimen—at the Vaudeville.

The New HAZELL, 1917

BOOKS PUBLISHED IN 1915

(By the courtesy of *The Publishers' Circular*)

The European War naturally had an effect on the publishing activity of the United Kingdom, and the number of books recorded as having been published during the year was 872 below the total for 1914. This decrease was not so formidable as might have been anticipated, and the figures are a tribute to the enterprise and vitality of British publishing, and are a hopeful sign for the future. It may be noted that the decrease was proportionately greater in the totals for New Editions than for New Books. The totals for the years following 1915 are bound to show considerable decreases, if for no other reason than the restrictions on the imports of paper and paper-making materials.

As was pointed out last year, the average quality of the books published at present is probably somewhat lower than during pre-war days, owing partly to a reluctance to place on a disturbed market works requiring a great outlay, and partly to the appearance of numerous ephemeral works dealing with the war.

The decrease was spread over most classes of literature, but it may be noted that the largest decrease, 419, was in fiction. Science with a decrease of 142, and technology with one of 167, were two other classes that were most greatly affected. On the other hand, the total for history increased by 309 and geography by 118, and several other classes also showed increases.

It should be noted that in the classification, "Education" includes only books about educational theory and practice, and not text-books on special subjects, which are classed elsewhere; and also that under "Music" only works about music are recorded.

The following totals of the last ten years are of considerable interest:

Year.	New Books.	New Editions.	Total.
1906	6,985	1,618	8,603
1907	7,701	2,213	9,914
1908	7,512	2,309	9,821
1909	8,446	2,279	10,725
1910	8,468	2,336	10,804
1911	8,530	2,384	10,914
1912	9,197	2,870	12,067
1913	9,541	2,838	12,379
1914	8,863	2,674	11,537
1915	**8,499**	**2,166**	**10,665**

In the accompanying table each book is counted as one, whether it is in one or more volumes. Serials that appear later as a collected volume are counted as an ordinary book on the appearance of that volume; so that, for example, the series of "Statutory Rules and Orders" issued by the Government, and amounting to several hundred in the year, are counted as one item on the appearance of the annual collected volume. The same rule applies to volumes of magazines, etc.

AVIATION IN 1916

Aircraft in the Great War—Routine in the Field—Kite-Balloons—Fighting in the Air—Aeroplane Offensive—Big Raids by the Allies—Raids on Great Britain by Aeroplanes and Zeppelins—Other German Raids—Zeppelin Losses—Anti-Aircraft Defence—The New Zeppelins—Airships of the Allies—Aeroplane Development—Night Flying—Aircraft at Sea, and Seaplanes—Aerial Coast Patrol—The Russian, Italian, the Balkans, Turkish, Egyptian, and East African Fronts—The Air Services in Parliament—The Official Inquiries—Aircraft in the U.S.A.—Principal Aircraft Records—Royal Naval Air Service—Royal Flying Corps—The Dominions and Flying—Insurance against Air Raids—Certificated Aviators—Aerial Law and Traffic Regulations—The Gordon-Bennett—Summary of Yearly Progress—Prizes and Competitions—Conditions for Aviators' Certificates—Aeroplane Fatalities—Ballooning—The Aircraft Industry—British and Foreign Aeronautical Societies—Bibliography.

Beyond the creation of a few new international records, and a revival in the United States, little that may yet be fully recorded has occurred in aeronautics in the past year outside the employment of aircraft in the war, the development of aircraft for war, and changes in the Flying Services. Occurrences of the war can at present only be discussed on the basis of official news, in which technical details are seldom vouchsafed. Many facts relating to the increasing capabilities of aeroplanes and airships may not yet be published. The capabilities steadily improve, but apparently in the year under review no very marked single forward step has been made, advance being the sum of numerous refinements in design and of the more particular specialisation of aircraft for different classes of work. In general design neither aeroplane nor airship has changed. Yet, like preceding years in the youthful career of successful aerial navigation, 1916 has seen interesting tendencies arise, and within certain limits imposed by the need for reticence during the war these may be indicated.

Aircraft in the Great War

From time to time the value of the aid given by aircraft has been acknowledged in the dispatches of Commanders-in-Chief covering periods of the operations, and these reveal certain noteworthy developments in aerial warfare. On May 19, General Sir Douglas Haig, G.C.B., referred to "the admirable work of the Royal Flying Corps, performed in spite of much unfavourable weather, in carrying out reconnaissance duties, in taking photographs—an important aid to reconnaissance which has been brought to a high pitch of perfection—and in assisting the work of our artillery by registering targets and locating hostile batteries.

"In the performance of this work they have flown in weather when no hostile aeroplane ventured out, and they have not hesitated to fly low, under fire of the enemy's guns, when their duties made it necessary to do so. They have also carried out a series of bombing raids on hostile aerodromes and points of military importance.

"A feature of the period under review has been the increased activity of the enemy's aircraft in suitable weather. But the enemy's activity has been mainly on his own side of the line, and has aimed chiefly at interrupting the work carried out by our machines. In order to carry on the work in spite of this opposition, which was for a time rendered more effective by the appearance in December of a new and more powerful type of enemy machine, it has been necessary to provide an escort to accompany our reconnaissance aeroplanes, and fighting in the air, which was formerly exceptional, has now become an everyday occurrence.

"Developments on the technical side of the Air Service have been no less remarkable and satisfactory than the progress made on the purely military side. Much inventive genius has been displayed; and our equipment for photography, wireless telegraphy, bomb-dropping, and offensive action generally has been immensely improved."

On July 14 the co-operation of aviators with French infantry in the Somme offensive was noted; and on Aug. 20 General Sir D. Haig reported "effective co-operation with infantry," adding "one of our aeroplanes brought effective machine-gun fire on troops in the trenches." The employment of aeroplane guns against troops on the ground has occurred in Egypt, and latterly on the Western Front, where it is occasion for remark and attention.

On Sept. 3 our aviators twice attacked troops on the ground; on Sept. 15 our aeroplanes co-operated with the infantry in the advance, from a low altitude firing at troops. Again on Sept. 30 and Oct. 11 troops and transport were attacked by our aeroplanes with machine-gun fire; and on Oct. 25 French aviators fired at an artillery column and scattered the drivers.

Since the early spring the Allies have established a more marked ascendency over the enemy's "Fifth Arm." This is revealed by very frequent reports indicating that the great majority of aerial duels have been over the enemy's lines. On Aug. 2 General Sir Douglas Haig remarked in his dispatches that the enemy "appear anxious to avoid aerial combats."

On Oct. 3 General Sir Douglas Haig stated, "For every enemy machine that succeeds in crossing our front it is safe to say that 200 British machines cross the enemy's front."

In the nature of their work airmen at the front are called upon to exercise courage of a high order, and it follows that they are numerously represented in the lists of awards for bravery. Some of the most thrilling episodes of the war have been enacted in the air, and the Air Board is to be commended for the decision to publish from time to time a résumé of the principal incidents.

Routine in the Field

Reconnaissance and artillery fire-direction have depended more and more upon aircraft, and the great length of battle lines as well as the vast number of men engaged require the attendance of a due proportion of airmen. Both the Allies and the enemy have greatly expanded their Flying Services, and have certainly increased the "Fifth Arm" in more than direct proportion to the other arms, just as they have been compelled to increase the proportion of machine guns and of heavy artillery. On the Western Front, where the combatants are most closely grappled, the use of aircraft has become more general and systematic than elsewhere. For obvious reasons

no indication can be given of the numbers of aircraft or of airmen engaged, but the increasing importance of the work done is shown in the official reports.

In artillery fire-control the kite-balloon has continued to be used, but in the later days of the Verdun struggle and from the beginning of the Somme offensive it became evident that the Allies possessed a successful method of attacking these craft. On one occasion no fewer than fifteen were destroyed in a day. A great advantage accrued to the Allies through the failure of the enemy to bring down more than an occasional single kite-balloon, one reason being that during the past few months German aeroplanes have been driven to a great extent to stay over their own lines, where they have been incessantly attacked by the airmen of the Allies.

On March 5 twenty French kite-balloons were carried away by storm over the German lines, many of their occupants, however, landing by parachute and escaping.

On May 22, near Verdun, the French destroyed six German kite-balloons, thus blinding the enemy's artillery; and on June 25 six German kite-balloons were burnt by the British.

On June 30 and July 1 the French destroyed fifteen German kite-balloons, and since that date the enemy have lost over a score of these craft by French and British attack.

Fighting in the Air

In addition to the routine of reconnaissance and fire-direction, fighting in the air has become far more general, the occasions being the need to harass enemy reconnaissance and observation craft, and defence against squadrons of bombarding aeroplanes. Naturally only a small proportion of such fights are fought to a finish; ammunition is soon exhausted, or one side seeks safety behind its anti-aircraft batteries.

The principal references in the dispatches are summarised here, occasions of particular interest being included as well as days on which a score or more duels took place. There are several duels almost every day, and the list given here is therefore very incomplete.

	No. of Fights.		Remarks.
1915			
Dec. 20	44	British	2 enemy driven down, 1 British lost.
29	12	British	
1916			
Jan. 17	19	British	5 enemy, 2 British, driven down.
25	27	British	
Feb. 5	28	British	6 enemy driven down, 1 British lost.
24	Big air-fight over Milan.		
Mar. 1	20	British	
7	32	French	
8	French claim that 15 enemy seaplanes were driven off, and that 10 dived vertically.		
April 4	10 Austrian *v.* 14 Italian aeroplanes. About this time several Fokkers were brought down by British and French airmen.		
24, 25	48	British	2 enemy smashed.
28	24	British	4 enemy driven down.
May 16	27	British	3 enemy, 2 British, lost.
17	33	French	3 enemy lost.
June 19	27	British	Enemy lost 4 or 5.
22	22	British	2 of ours brought down.
July 1	British squadron, after bombarding Lille, attacked by 20 Fokkers; 2 enemy brought down.		
Aug. 2	33	French	15 Germans brought down.
25	Several	French	12 Germans brought down (some by gun-fire).
Sept. 1	Many	British	5 Germans destroyed, 7 driven down, 5 British lost. (19 German planes destroyed on this day on Western Front.)
3	Much fighting	British	Our advantage.
6	7 British *v.* 16 Germans.		
9	40	French	
13	17	French	2 Germans brought down, others damaged.
15	Much fighting	British	13 enemy destroyed, 9 others damaged.
15	—	French	8 enemy brought down.
22	56	French	4 enemy destroyed, 4 badly damaged.
23	Many fights	British	3 enemy destroyed, 5 badly damaged, others hit. 5 British lost.
23	29	French	Many Germans destroyed and damaged.
24	Many	British	6 enemy destroyed, damaged. We lost 3.
24	Many	French	French advantage.
25	47	French	At least 8 enemy driven down.
30	Many	British	4 enemy brought down, 1 British lost.
Oct. 6	6	Russia	1 enemy destroyed.
10	73	French	10 enemy brought down.
16	65	French	5 enemy brought down.
17	Many	British	3 enemy destroyed, 1 driven down, 7 British lost.
18	Many	British	5 enemy driven down, 4 British lost.
20	Many	British	3 enemy destroyed, many damaged, 2 British lost.
22	Many	British	5 destroyed, 4 damaged, 3 British lost.
23	Many	French	3 enemy brought down.
Nov. 9	77	French	
9	Battle between 30 British and 38 enemy		7 British missing, about 12 enemy destroyed.
10	Many	British	4 enemy destroyed, others damaged. One British missing.

Big Raids by the Allies

On the Western Front aeroplane offensive has been continuous, and here only the bigger or in any other way remarkable raids can be recorded. In these raids it is now the practice to send bombarding machines escorted by fighting craft.

The New HAZELL, 1917

Date.	Place.	No. of Aeroplanes.	Remarks.
1915			
Nov. 13	Camp at Achiet le Grand	23 British	Bombed.
18	Audenarde	Allies	Destroyed railway-bridge.
30	Depot at Miraumont	20 British	Bombed.
Dec. 3	Don Station	19 British	
9	Miraumont depot and Hervilly aerodrome	16 British (in a full gale)	Bombed.
14	Railway at Mulheim and Hauriaucourt and works at Hampont	45 French	
1916			
Jan. 12	Lille . .	British .	Blew up ammunition.
21–22	Ghent .	25 French & British.	
23	Metz . .	24 French	130 bombs.
Feb. 19	Cambrai aerodrome	British (at night).	
20	Don . .	26 British	Much damage.
Mar. 8	Metz . .	16 French	Dropped 124 bombs.
9	Carbin .	31 British	
20	Zeebrugge, Houttaye aerodrome	65 Allies	4½ tons of bombs. Great damage.
26	Schleswig-Holstein. Airship sheds	British seaplanes	
April 3	Keyen, Essen, Terrest, and Houthulst	31 Allies	
23–24	Longuyon and Stenay stations, and Montfaucon and Don camps	French .	78 bombs.
25–26	Brieulles, Conflans and otherstations, and various depots	French.	
29	Apremont, Grandpré, Challerange, Vouziers stations, and various camps	French squadrons.	
May 10	Etain & Damvillers station	4 French squadrons	
June 3	Enemy positions	26 British	
7	Destroyer yds. at Hoboken	Allies .	
16	Longuyon, Montmedy, and Audun le Roman stations	French .	29 120-mm., 4 150-mm. bombs.
19	Vouziers barracks and station	French .	61 large bombs
22	Trèves .	18 French	
1916			
June 22	Karlsruhe .	9 French	Berlin says: "110 killed, 147 injured."
	Mulheim .	10 French	
29	Nesles and Roye stations and Noyon	French .	84 bombs.
30	Douai . .	British .	From 900 ft., set train alight
July 1	Works and railways N. of Somme	French .	105 bombs.
2	Amagne Lucquy station	French .	Destroyed a train.
9	Many raids on railways	British.	
10	Ham, Laffe, & Chauny stations	Allies .	220 bombs.
13	Mulheim .	French .	(Reprisals for German attacks on open towns.)
15	Railways .	British .	A train derailed.
19	Railways and aerodrome	British .	Many tons of highexplosives.
21	Metz station	French .	115 large shells.
25	Thionville and Rombach stations	French .	40 265-lb. and 2 440-lb. bombs.
30	Noyon and district	French .	40 260-lb. bombs.
	Mulheim station	Franco-British naval planes	
31	Enemy communications	British .	7 tons of bombs — 1 train blown up.
Aug. 2	Aerodromes in Belgium	British .	2 tons high explosives.
3–4	Noyon station	French .	80 big bombs.
	Somme dist.	French .	50 big bombs.
	Stenay station	French .	32 big bombs.
	Montmédy & Sedan stations	French .	83 big bombs.
5	Combles, Noyon, Stenay, Sedan, Conflans, Metz, etc.	French .	294 bombs(one squadron made 7 raids in one night).
6	Metz-Sablons, Thionville, and Etain	French .	62 bombs.
8–9	Rottweil powder factory (219 miles total dist'ce)	French .	150 kg. of high explosives.
9	Evère airship shed	British naval	Set on fire from height of 200 ft.
9–10	Stations and railways	French .	413 bombs.
11	Brussels airship sheds	68 British	
	Mons railway		
	Namur airship sheds and railways		

The New HAZELL, 1917

Date.	Place.	No. of Aeroplanes.	Remarks.
1916			
Aug. 12	Metz-Sablons station and barracks	French .	120 large bombs.
18	Lichtervede ammunition depot	British naval	48 bombs.
21–23	Tergnier, Noyon, and other stations	French .	79 bombs.
25	Railways .	British .	Several trains hit.
	Namur airship sheds	British naval	Two sheds hit.
	Ghent . .	Allies .	Ammunition depot blown up.
31	Ghent (Carelo works)	Allies .	21 killed, 40 injured.
Sept. 2	Metz-Sablons stations and other stat'ns and depots	French .	356 4¾-in. bombs.
	Hoboken shipyards	British naval	
3	Ghistelles aerodrome	British naval	
6	Railway junctions and aerodromes	British .	Great damage.
7	St. Denis Westrem aerodrome	British naval	Great damage.
	10 aerodromes	British	
9	Ghistelles and Handzaeme aerodromes	British naval	
	Railway and ammunition depot at Lichtervede	British naval	
	Rottweil powder factory	French .	Great success?
	Chauny stat'n	French .	480 bombs.
	Ham, & dist. S.of Peronne	18 French	
10	Somme Py, Sarrebourg, Bruges, depots, barracks, etc.	French .	184 heavy bombs.
13	Guiscard, Roisel, Montmedy, Thionville, stations and depots	French .	400 bombs.
14	Pont-Faverger, Bethenivile, Conflans	French .	280 bombs.
15	Bapaume station		A train derailed.
	Railways, etc.	British .	Great success.
	Ostend .	British naval	
15	Tergnier, Chauny, Guiscard, Rombach, &c.	French .	187 bombs.
16	Rlys. at Tergnier, Abbecourt, Roisel, Epehy, etc.	French .	302 bombs.
1916			
Sept. 17	St. Denis Westrem aerodrome	British naval	Much damage.
	Villiers, Carbonnel, Nantillois, etc.	French .	Serious damage.
22	St. Denis Westrem aerodrome	British naval	Great damage.
23	Ghistelles and Handzaeme aerodromes	British naval	
23	Fins, Epehy, & Rosel stations; Hervilly aerodrome; Mannheim	French .	Much damage. Zeppelin shed reported destroyed.
23	Enemy railways	50 British	Two ammunition trains blown up.
23	Rombach and Thionville	French .	
	Essen . .	2 French pilots	Total journey of 500 miles.
24	Guiscard, Rombach, Thionville, Audun-le-Roman	French .	148 bombs.
25	Sarrelouis, Metz, Sablons, Nantillois, etc., stations and depots	French .	500 bombs.
25	Appilly, Laon, Montfauçon stations	French .	132 bombs.
27	Airship sheds at Evère and Brussels	British naval	Ammunition destroyed.
30	Aerodromes	British .	
Oct. 2	Zeppelin sheds at Brussels	British naval	
4	Colmar aerodrome and Zeebrugge	French .	90 bombs.
9	Stuttgart, The Bosch Magneto works	French .	
10	Peronne, Tergnier, Colmar aerodrome, and Mulheim station.	French	
12	Mauser works at Oberndorf	40 French & Brit. naval	4½ tons of bombs.
18	Many raids, railways, etc.	British	
20	Many raids, railways, etc.	British .	Great success.
20	Nesle-Ham, Noyon and Charny aerodromes	French .	120 124-mm. bombs.
21-22	St. Quentin, Tergnier, Etain, Ham, Peronne, etc.	French .	186 bombs.

Date.	Place.	No. of Aeroplanes.	Remarks.
1916			
Oct. 22	Hogandange and Pussinges furnaces, stations, etc., at Thionville, Longwy, Metz, Rombach, and Mars-le-Tour	24 French	Over 4 tons of bombs.
24	Communications	British .	Moving train, etc.
26	Challerange, Grandpré stations, Avricourt, Conflans, Courcelles, etc.	French .	354 bombs.
Nov. 10	Ostend and Zeebrugge	British naval	Great weight of bombs dropped.
10	Rlwys., steel works, etc.	British	Great damage.
10	Railways, camps, and aerodromes	French .	970 bombs dropped.

Aeroplane Raids on England, 1916

The distinction between the raids given under this heading and those in the list which follows it is that they were made by heavier-than-air craft, either aeroplanes or seaplanes. They therefore have a distinct interest as illustrating the capabilities of this division of aircraft.

Date.	Raid.	Result. Kill'd.	Inj'red
Jan. 23	Aeroplane drops bombs on Kent by moonlight	1	6
	Two aeroplanes drop bombs in Kent	0	0
25	One aeroplane over Dover	No damage.	
Feb. 9	2 seaplanes, raid on Kent	0	3
20	Six seaplanes raid Suffolk and Kent	1	1 (a soldier)
Mar. 1	One seaplane over Kent .	1	0
19	Four seaplanes over East Kent	14	27
Apr. 24	One aeroplane over Dover	No damage.	
May 3	One aeroplane over Deal. Six bombs on station, and houses damaged.	0	3
20	Three seaplanes over Kent	1 (a soldier)	2
		Very slight damage.	
July 9	Two seaplane raids on Kent	Windows broken	
Aug. 12	Two seaplanes over Dover	0	7(soldiers)
Sept. 22	One seaplane near Dover	0	0
		No damage.	
Oct. 22	One seaplane over Sheerness (raider destroyed at sea)	Very slight damage to railway.	
23	One seaplane over Margate	Slight damage, 2 injured.	
Nov. 28	Seaplane over London		

"Zeppelin" * Raids on Great Britain, 1916

In the raid of Oct. 13, 1915, 62 civilians were killed (not 58 as first reported). Up to Jan. 30, 1916, states the official summary, the total casualties were 171 killed (including 17 soldiers, and 454 injured.

Date.	No. of Airships.	Place.	Casualties. Kill'd.	Inj'red.
Jan. 31	6 or 7	Eastern Counties, N.E. & Midlands	Little d'mage	
Mar. 5	3	N.E. and E., during snow-showers	18	52
19	6	Approached coast, but driven off		
31	5	Eastern and N.E. counties	43	66
Apr. 1		N.E.	16	100
2		Scotland and N.E.	11	11
5	3	N.E.	1	8
24	4	Norfolk and Suffolk. 70 bombs		1
25	2 with warships off Lowestoft.			
25		Essex, Kent and Eastern Counties	Trivial damage.	
26	3	Kentish coast .	Trivl. dmge.	
May 2	5	N.E. coast and S.E. Scotland		
3	6	(100 bombs) .	9	27 (including 1 soldier).
July 29	3	Yorkshire, Norfolk, Lincolnshire. 32 bombs	Little damage.	
31-Aug. 1	7	Kent, Essex, Suffolk, Norfolk, Cambridge, Hunts. 60 bombs.		
3	8	Eastern and S.E. counties	Trifling damage.	
9	7–10	East and N.E. .	8	36
			Slight damage	
23	1	East Coast. 30 bombs		
24–25	6	Eastern Counties, outskirts of London, 100 bombs	8	21
			Slight damage	
Sep. 2-3	13	Eastern Counties and Kent (1 destroyed near London)	3	12
			Little damage	
23-24	12	Eastern, South-Eastern, Lincs, & London. (1 destroyed in Essex, another brought down and crew captured.)	38	125
			Damage unimportant.	
25-27	7	South and East Coast and North	36	27
			Slight dmge.	
Oct. 1	10	E. Coast and Lincs. (one destroyed)	1	1
			Trivl. dmge.	
Nov. 27-28	—	Two destroyed .	1	16

On May 29 the Home Secretary stated that there had been 44 air raids, and that 409 persons had been killed and 1,005 injured.

* Germany's rigid airships are all generalised as "Zeppelins"; but as a matter of fact some are of the Schütte-Lanz type, having a wooden framework instead of aluminium.

The New HAZELL, 1917

The lists, official and other, will be found to vary in totals. Errors arise in some cases through taking only the casualties announced in the first reports, and not adding to the deaths the number of injured who subsequently died.

In the list given here an attempt at accuracy has been made, but as regards the numbers of injured, discrepancies are unavoidable.

Other Zeppelin Raids, 1916

Jan. 25	Zeppelins bombed positions in Champagne : only slight damage.
29	Paris : 25 killed, 30 injured.
30	Paris : no casualties.
31	Salonika : 21 killed, 28 injured.
Mar. 17	Salonika.
Apr. 2	Dunkirk.
May 1	Moonsund and Pernau, Gulf of Riga.
Aug. 29	Bucharest : no damage.
Sept. 22	Calais : no damage.
24	Bucharest : 5 killed.
Oct. 25	Cernavoda.

Other German Aeroplane Raids, 1916

In addition to the raids on this country the Germans have maintained an aeroplane offensive on the Western Front, but this has not been on so big a scale as that of the Allies. The principal raids were :

Date.	Place.	Casualties. Killed.	Injured.
May 20	Dunkirk . .	7	35
31	Bar-le-Duc . .	18	25
June 16	Bar-le-Duc . .	4	15
25	British camps .		
July 6	Lure . . .	11	3
Oct. 23	Lunéville . .	Slight damage.	
Nov. 10	Nancy, Amiens, and Luneville	9	27

Zeppelin Losses

In the following lists official reports of Zeppelins total y lost are ·iven, and also unofficial but apparently authentic other reports, the latter indicated by an asterisk. The second list gives instances of known damage inflicted on raiders. These lists, added to the known losses (9) of 1915, certainly justify the claim made by Major J. L. Baird (Air Board) in Parliament on Aug. 22 that 7 Zeppelins had been destroyed by the British and 5 so badly damaged that they could be considered as wrecked ; and that the Allies had accounted for 35 Zeppelins.

It is certain that on Sept. 3 the enemy possessed no more than thirteen airships available for raiding England. This is shown by the fact that airships of the Schütte-Lanz type took part in the raid by thirteen airships on that date : it is not likely that if the enemy had possessed superior vessels they would have put a crew into the less capable Schütte-Lanz. In the raid of Sept. 24 it is believed that twelve airships took part ; of these two were total losses. On Oct. 1 ten came and one was destroyed.

Raiding Airships Destroyed or Captured

1915	
Nov. 17	*Z18 or Z28 blown up at Tondern, Schleswig. All crew killed or injured.
29	*L22 destroyed at Bitterfeld.
1916	
Jan. 8	*Zeppelin destroyed at Namur. 2 killed.
30	*Zeppelin destroyed near Ath, in Belgium. Crew killed.
Feb. 2	L19 lost in North Sea.
15	*Zeppelin wrecked in shed at Friedrichshaven during storm.
21	LZ77 shot down by French at Revigny. Crew killed.
Mar. 31	L15 shot down in Thames. Crew of 17 prisoners.
April 29	*Zeppelin burned while over Belgium.
May 3	L20 wrecked off Norway. Crew interned.
4	L7 shot down by British warships off Schleswig-Holstein.
5	Z85 shot down by British warships at Salonika. 12 of crew captured.
July 19	*Report of Zeppelin wrecked near Tukkum Riga.
Aug. 29	*Report of big Zeppelin blown up in gale at Terdonck, Belgium. All killed.
Sept. 3	Big rigid airship (Schütte-Lanz type) destroyed at Cuffley, in England, by Lieut. W. Leefe Robinson, R.F.C. 16 crew killed.
6	*Report that 4 Zeppelins and 15 aeroplanes were destroyed by a fire at Frankfurt.
24	Two rigid airships of latest type—the L32 and L33—brought down in Essex, one in flames. The crew of the other—22 officers and men—were captured.
Oct. 1	Zeppelin destroyed at Potter's Bar. Crew of 20 killed.
Nov. 27	Zeppelin destroyed off N.E. coast. Crew killed.
28	Zeppelin destroyed off Norfolk coast. Crew killed.

Zeppelins Damaged, 1916

Mar. 31	Zeppelin hit with bombs by Lieut. Brandon, R.F.C.
April 10	Report of damaged Zeppelin at Namur.
July 31	Zeppelin hit by British airman over North Sea.
Aug. 3	Zeppelin hit while raiding in England.
6	Crippled Zeppelin reported landed in Hanover (probably one of the two foregoing).
25	Zeppelin damaged by Dutch near Maastricht, afterwards landed at Liège.
Sept. 3	Report of Zeppelin damaged in England forced to land at Mons and then dismantled.
24	Report of damaged Zeppelin off Danish coast.
Oct. 2	Zeppelin reported in the sea off Sylt.

Anti-Aircraft Defences

At the beginning of the war the Royal Naval Air Service created the Anti-Aircraft Corps, which was responsible for the defences of London and of the rest of the United Kingdom, and extended its activities over the sea to the Belgian coast. In January last the control of anti-aircraft defences was transferred to the War Office and is now in the command of Lord French. Admiral Sir Percy M. Scott, Bart., K.C.B., who had charge of

The New HAZELL, 1917

the anti-aircraft gun defences of London, relinquished that command on Feb. 12.

The New Zeppelins

The advantage to be secured by increasing the size of the rigid airship has for long been fully understood in Germany, and during the past summer the building of two—possibly three—craft having a length of about 680 ft. and a capacity of about 2,200,000 cubic ft. was begun. Such vessels may be expected to attain a speed of about 65 miles per hour, and a greater radius of action and altitude than any of the previous classes. Some of the details attributed to them by writers in France and England, however, are fictitious. For example, they do not, as is asserted, carry any machines for conserving under compression excess of gas due to expansion when climbing.

All the airships of the past two years have been built with blunt bows and tapered sterns, with the object of reducing head-resistance, but none of the Zeppelins are so definitely ichthyoid as the Schütte-Lanz type, which is also a rigid.

Although the newest airships are able to reach a greater height than their predecessors, there is reason to believe that their altitudes are often exaggerated owing to the inexperience of the observer. Frequently to evade gun-fire they have been compelled to discharge their load of ammunition indiscriminately in order to climb quickly and high. This accounts for certain incomprehensible bomb-dropping in the sea or over waste lands.

Other Airship Activity

In addition to the work of Zeppelins there has been but little evidence of offensive by other airships, but a certain amount of patrolling has been done by British semi-rigid and non-rigid dirigibles. Raids by French and Italian airships are occasionally reported, but the limited extent of their activities seems to constitute evidence of danger and difficulties under which the types concerned labour in war. Where anti-aircraft guns are in strength or defending aeroplanes available airships, it seems, must work by night.

FRENCH

Jan. 27	Freiburg . .	Dropped bombs.
Apr. 24	Conflans station .	10 6-in. shells dropped.
26	Etain and Bensdorf station	Bombs dropped.
May 21	Brieulles and Don station	2 airships dropped bombs.
Sept. 22	Marcoing railway .	1 airship dropped bombs.

On May 13 a French airship was wrecked at sea off Sardinia, the crew of 6 being drowned.

ITALIAN

Apr. 1	Opcina station .	Bombed.
Apr. 9	Works at Riva .	Bombed.
May 3	Camps at Rubbia and Merna	2 airships dropped 2tons of explosives.
26	Trieste . .	Bombed.
Aug. 7	Opcina station .	1 ton of explosives.
Sept. 23	Dottegliano and Scappo stations.	
26	Comignano .	Bombs on troops.
Oct. 31	San Pietro . .	17 bombs.

On May 3 one of the Italian airships was lost in the raid on Rubbia, and on Aug. 8 one was destroyed near the Isle of Lissa.

RUSSIA

On April 6 the Russians brought down a German airship at Dvinsk, and on April 8 a Russian airship bombed German troops.

AEROPLANE DEVELOPMENT

In all the belligerent countries there is feverish activity in the pursuit of improvements in aeroplane design, but discussion of these matters would be valueless in view of the necessity to avoid publication of details.

Night Flying

The need for night operations has caused greater attention to be given to illuminated landing-places. Although it is exceedingly difficult to locate a Zeppelin at night, aeroplanes go up in pursuit of these raiders, and the capabilities of aeroplanes have been so much improved that certain types are not out-classed in climbing speed by the Zeppelins. Several aeroplane raids have been made by both sides at night.

Aircraft at Sea, and Seaplanes

Apart from the use of seaplanes as craft specifically designed, although in the present conflict sometimes employed for attacking land positions, there have been a number of encounters between aircraft and marine craft. These are worth recording if only for the sake of showing how very limited this side of the war has been. It may reasonably be inferred that marine craft present too small and occasional a target to offer much inducement of attack by aircraft. As for the larger warships, they are able to defend themselves.

Nov. 15, 1915, the ss. *Avocet* was attacked by 3 German aeroplanes by means both of bombs and guns. No damage was caused.

Nov. 27, 1915, the ss. *Balgowrie* was attacked by 3 German aeroplanes with bombs and guns: no damage.

Nov. 28, 1915, aeroplane destroyed submarine off Middelkerke. Flown by Flight Sub-Lieut. Viney, R.N., and a French passenger.

Jan. 23, 1916, ss. *Carlo* attacked by a German aeroplane. No damage.

Feb. 1, British steamer *Franz Fischer* sunk by a Zeppelin; 13 lives lost.

Mar. 8, French claim that 15 enemy seaplanes were driven off, and that 10 dived vertically.

April 15, a French aeroplane dropped bombs on a German ship in the North Sea, coming down to 300 ft. to ensure accuracy.

April 25, in the warship attack on Lowestoft British aeroplanes dropped bombs on enemy.

May 3, a German seaplane bombed a Russian vessel in the Baltic.

June 1, Battle of Jutland. Admiral Jellicoe in his dispatches of July 6 remarked upon the useful work by a seaplane, with Flight Lieut. F. J. Rutland, R.N., and Assistant Paymaster G. S. Trewin, R.N. At altitude of 900 ft. and range of 3,000 yards, although under heavy fire from enemy light cruisers, the clarity of their report was not allowed to suffer.

June 26, three French aeroplanes dropped 65 shells on German boats off Belgium.

Aug. 19, two trawlers attacked by Zeppelins off Yorkshire coast. No damage.
Sept. 6, French aeroplanes repeatedly bombed enemy trawlers.
Sept. 9, report that British airman blew up a submarine in Zeebrugge Harbour.
Sept. 12, two Zeppelins bombed Swedish ss. *Nordland*. No damage.
Sept. 23, British naval aeroplanes bombed transports near Drama.
Sept. 24, British bomb with effect enemy torpedo-boat convoying a prize.

It will be observed that seaplanes have played an increasing part in the war, and a reference to the list of records will show an apparent improvement in their flying capabilities. The necessity of being provided with a floating undercarriage of some sort, and other exigencies of construction and power, keep the seaplane behind the ordinary aeroplane in speed and climbing. This perhaps would not be serious if the seaplane had materially improved as regards its specific work. There is, however, no evidence that it has; and in the official news of the war there is nothing to show that seaplanes of to-day are much superior to those of 1914 in ability to alight upon and get up from rough water, or to float for any length of time in a choppy sea. Progress in this direction is being made, but it is slow. Meanwhile the advantage of the seaplane is that it can descend to the water and remain afloat to an extent that under most circumstances ensures rescue. Overland machines driven to alight in the sea out of sight of help have comparatively small chance of being rescued. Even by this cold estimate the seaplane is indispensable, and deserves every possible effort towards improvement.

In addition to incidents already recorded, a number of raids on land objectives have been made. For example, on March 26 British seaplanes bombed Zeppelin sheds in Schleswig-Holstein; on April 17 French and Italian seaplanes attacked positions near Trieste. On various dates, as will be seen in the table, enemy seaplanes dropped bombs on England. On Aug. 25 Russian seaplanes bombed Varna with great effect.

Aerial Coast Patrol

Vice-Admiral Sir Reginald Bacon, commanding the Dover Patrol, in a dispatch dated May 29, testified to the value of the work of the aircraft under his control. He said:

"In addition to the daily reconnaissance and protective work performed by the Royal Naval Air Service on the coast, eleven organised attacks against the enemy's aerodromes and thirteen attacks on enemy vessels have been carried out. Nine enemy machines and one submarine have been destroyed by air attack, and appreciable damage has been inflicted on military adjuncts.

"... With only one exception, all the aeroplanes destroyed were fought over the enemy's territory, and all the seaplanes were brought down into waters off the enemy's coast."

AIRCRAFT ON ALL THE FRONTS

In all the important theatres of the war aircraft have been employed, but owing to the lack of information it is not yet possible to attempt a complete record or even an accurate summary.

Russia

Throughout the enormous area over which the Russian armies are fighting, aircraft are playing a part of which the official dispatches only afford an occasional glimpse.

One interesting but by no means reliable inference has been drawn from the fact that the Russian Sikorsky multiple-engine aeroplane, which was much in evidence in 1915, has in the past twelve months scarcely been mentioned; it has been inferred that the type has proved a failure. But so meagre are the references to aircraft in the official dispatches from the Russian front that judgment should be postponed. It is probable that, like the airship, it is a type of aircraft that must exercise discretion as to time and place of attack if in presence of fast and quick-climbing enemy aeroplanes.

On April 23 a Sikorsky biplane dropped thirteen 40-lb. bombs on Doudsevas station on the Dvina. On various occasions aeroplanes of types not specified bombed railways.

Russian seaplanes bombed Varna on Aug. 25 and effected damage of military importance.

On Sept. 13 four Sikorsky aeroplanes bombed enemy seaplane station at Lake Angern, and there was much fighting in the air.

On Sept. 26 Russian seaplanes bombed aerodrome on Lake Angera.

On Sept. 28 great activity of Russian "self-flyer" aeroplanes.

Italy

The Italian-Austrian theatre of war has called for continual aerial operations, often on a large scale. These have included a large number of Austrian raids on Italian towns, in the course of which much damage has been inflicted upon treasures of Italian art. The biggest raids are here recorded in tabular form.

Austrian Raids

Date.	Place.	Aircraft.	Effect.
1915			
Nov. 13	Verona	Aeroplanes	30 killed, 48 injured.
1916			
Feb. 12	Codigoro	Aeroplanes	15 killed, many injured. Damage to buildings.
May 26	Peri	Aeroplanes	Many casualties.
	Caltravo, etc.	Aeroplanes	Many casualties.
Aug. 9	Venice	Aeroplanes	Church of Santo Maria Formosa destroyed.
Sept. 4	Venice	Aeroplanes	

Italian Raids

Date.	Place.	Aircraft.	Effect.
Apr. 1	Opcina railway Riva works	Airship.	
17	Positions near Trieste	Aeroplanes.	
20	Trieste aerodrome	Aeroplanes	Great damage.
June 19	Pergine aerodrome	34 Caproni and Savoia aeroplanes	
26	Calliano stat'n	One squadron. 50 heavy bombs	

The New HAZELL, 1917

Italian Raids—*continued*

Date.	Place.	Aircraft.	Effect.
Aug. 1	Fiume torpedo and submarine works	19 Caproni and 1 squadron of Nieuport aeroplanes	Great damage.
9	Paravacina & Dorberg depots	18 Caproni and 1 squadron of Nieuports. 90 bombs.	
25	San Cristofero station	Squadron of aeroplanes.	
Sept. 13	Trieste arsenal, etc.	22 aeroplanes .	Great damage.
15	Railway at Comignamo	Aeroplanes .	5 tons of high explosives dropped.
Nov. 1	Camps in Fregedo Valley .	Aeroplanes .	2 tons of bombs dropped.
2	Railways at Nabresino	Aeroplanes .	Much damage.

Balkans

Early in January German aeroplanes bombed Salonika, and the Allies began to send their aircraft over Bulgarian camps. The bigger raids on this front are here given.

Date.	Place.	Aircraft. Aeroplanes.	Effect.
Jan. 23	Monastir .	45 French.	
29	Bazuli camps near Lake Doiran	14 French. 200 bombs	500 tents burned.
Feb. 2	Petritch camp	17 French	1,000 killed & wounded.
15	Strumnitza .	13 French.	
Mar. 27	Salonika .	6 German.	20 casualties.
Apr. 13	Bogoroditsa .	20 French	
May 16	Porto Lagos .	British squadron	
	Xanthi camp.	14 French	
24	Xanthi, Uskub, and Veles camps	French	
31	Xanthi . .	8 French	
Aug. 10	Strumnitza, Serbia	9 French	
	Doiran camps	French	
25	Kula Topola and Prosevik camps	British	
29	Drama station, troops at Porna	Allies	
	Aviation park at Maizenchi, Lake Doiran	French	
25–29	Enemy's communications, Buk, Drama, and on troops	British naval	
Sept. 14	Sofia . .	French .	Started from Salonika & landed at Bucharest.
19	Monastir .	French .	
Sept. 23	Drama .	British naval	Enemy transports bombed.
13-22	Bulgar coast and railways	British naval	Much damage.
25	Bucharest .	5 Germans	10 killed.
29	Sofia and Prilep	French .	
29	Angista station near Salonika	British naval	
Oct. 2	Prosenik .	British	Bombs on troops and railways.
2	Buk and Drama	British naval	Railways.
15	Salonika, Buk	British naval	Successful.
24	Island of Chios	German raid	3 killed, 1 wounded.

On April 20 a French aviator flew from Salonika to Sofia with bombs, a total distance of 375 miles.

Turkey

On April 14 and 17 the British sent aircraft over Constantinople. On the first occasion 3 naval aeroplanes did a 300-miles flight in bad weather. On April 25 two Russian seaplanes appeared over Constantinople.

Turkey in Asia

On Feb. 16 Sir John Maxwell, K.C.B., reported that a French hydro-aeroplane squadron and the Royal Flying Corps had made repeated reconnaissances in the operations by the River Tigris. On April 13, May 10 and 29, and June 13, aeroplanes of the Allies bombed Smyrna with effect, on the last two occasions causing many casualties in enemy camps. On Aug. 2 four aeroplanes from a British warship bombed Carmel. Between Aug. 25 and Sept. 30 the British made many raids in Palestine.

One of the most striking episodes in the aerial war was the work done by British aircraft in conveying supplies to the beleaguered garrison at Kut. On May 10 Mr. H. L. Tennant stated in Parliament that between April 11 and 29 18,800 lb. of food, as well as stores of all kinds, including millstones, were conveyed to Kut by aircraft.

On Sept. 11, 23, and 27 British aeroplanes bombed an enemy aerodrome. On Oct. 4 British aeroplanes bombed Kut. On Oct. 12 bombs were dropped on Gussabs Fort, Mesopotamia.

Egypt

Some long raids have been performed under great difficulties by the forces in Egypt. On March 26 the enemy camps at Bir-el Hassana, 100 miles east of the Suez Canal, were bombed; and on April 24 eight British aeroplanes did great execution on the enemy camps at Katin, during which troops on the ground were attacked by aeroplane machine guns.

On May 24 our aircraft damaged the water-tanks at El Hamma; and a few days before one R.F.C. officer bombed and scattered 2,000 troops at El Fasher. On June 3 and 18 British aeroplanes bombed El Arish, where the enemy have an aerodrome, and again attacked land troops by machine guns. On Oct. 4 El Arish was again bombed, and on Oct. 15 Moghara was bombed.

East Africa

The only aerial action officially reported has been the bombardment, on Jan. 7, of an enemy camp near Voi.

THE AIR SERVICES IN PARLIAMENT

Very great interest has been evinced in both Houses of Parliament in the work and administration of the Royal Naval Air Service and the Royal Flying Corps.

After a campaign in the Press, Mr. N. Pemberton Billing contested the by-election at Mile End as an "Air Service" candidate. He was defeated by Mr. Warwick Brookes, who polled 1,991 and gained a majority of 376. On March 9 Mr. Billing was returned at the by-election at East Herts with 4,590 votes, or 1,031 more than were polled by his opponent, Major Henderson. He soon afterwards, in speeches in the House, made charges against the administration of the Royal Flying Corps, including one to the effect that requiring pilots to fly on certain machines was tantamount to murder; and a Committee was appointed to inquire into these charges.

On Feb. 24 a Naval and Military Air Services Joint War Air Committee was appointed with the object of securing co-operation between the R.N.A.S. and the R.F.C. Lord Derby was appointed Chairman, and the members of the Committee were Rear-Admiral C. L. Vaughan-Lee, Commander Murray F. Sueter, C.B., Squadron Commander W. Briggs, Lieut.-Gen. Sir David Henderson, Lt.-Col. E. L. Ellington, and Lord Montague of Beaulieu. Lord Derby resigned from the Committee early in April, and Lord Montague also resigned.

A new Air Board was formed, and on May 24 Lord Curzon announced its constitution as follows: Lord Curzon (Chairman); Admiral Tudor, Third Sea Lord, and Admiral Vaughan-Lee, Director of the Air Services of the Admiralty (representing the Admiralty); Sir David Henderson and General Brancker (representing the War Office); Lord Sydenham and Major Baird, M.P. (Independent members); Permanent Secretary, Sir Paul Harvey; and Assistant Secretary, Commander Groves.

On May 8 the Committee to inquire into Mr. Pemberton Billing's charges, under the chairmanship of Mr. Justice Bailhache, began its sittings. A report was issued on Aug. 15, and it was to the effect that Mr. Billing had entirely failed to substantiate his charges. Fifteen specific cases of alleged negligence were reviewed, and in none of them did the Committee find that the charge was justified. The Committee, however, reserved for consideration in the first report the mass of evidence "given for the most part in a spirit of informed and genuine criticism, pointing out alleged shortcomings and suggesting means for their future avoidance."

A Committee on the Royal Aircraft Factory, presided over by Sir Richard Burbidge, reported on July 26, and on the same date was issued the report of the Air Board signed by Lord Curzon. The former made a number of suggestions for reform with a view to increasing the efficiency of the Royal Aircraft Factory as an experimental establishment, and proposing among other things its control by a Board of Management. The latter suggestion, however, was not approved by the Air Board, which in its turn made a number of recommendations. Mr. Henry Fowler, Chief Mechanical Engineer of the Midland Railway, was appointed Superintendent in September.

During the year Mr. E. H. Tennyson D'Eyncourt, C.B., was added to the Government Advisory Committee of Aeronautics.

AIRCRAFT IN THE U.S.A.

The war has had a great stimulating effect upon aeroplane manufacture in the United States, and the demonstration of the effective co-operation in warfare of aircraft has induced the Government to pay more attention to the development of the aeronautical services. Aviation as a whole has been stimulated; but ballooning in the States attracts less attention than ever.

An aeroplane squadron of six machines was sent to Mexico under Captain Benjamin D. Foulois.

Urgent representations were made in the Legislature for a great enlargement of the Fifth Arm. The sum voted for 1917 was 13,281,666 dollars, Army; 3,500,000 dollars, Navy; and 200,000 dollars for a flying-ground. Total, about £3,400,000 sterling. During the year a small airship was launched.

The U.S.A. Government's specifications for a military aeroplane calls, in brief, for a two-seater tractor biplane capable of 6 hours' flight fully loaded. The Government appointed an Advisory Committee on Aeronautics.

On Feb. 12 the Post Office Department advertised for tenders for carrying mails. Eight routes were specified, the shortest being 52 miles, the longest 380 miles. The loads to be carried were up to 3,000 lb.

During the floods in San Diego, Mr. Raymund V. Morris made observation flights in a flying boat, and was able to locate isolated parties who needed aid and rescue, and to indicate the nature and extent of the damage.

Preparation continues to be made for crossing the Atlantic by aeroplane. An attempt will probably be made on a 15-ton Curtiss triplane air-boat driven by four 250-h.p. Curtiss motors and capable of carrying a useful load of nearly 5 tons. The pilot at present indicated is Victor Carlstrom.

PRINCIPAL WORLD RECORDS—AVIATION

m. = Monoplane; b. = Biplane

The following are the principal world records selected from the list recognised by the Fédération Aéronautique Internationale. It is, for example, sufficient to give four out of the twenty-four distances over which speed records are officially taken. Some interesting records are not recognised, or have not yet been passed, by the F.A.I., and these are indicated by an asterisk. Records recognised by the Royal Aero Club, but not by the F.A.I., are indicated by a dagger.

So greatly have the motor-power and general capabilities of aeroplanes been increased during the war that it is highly probable that many of the following records have been surpassed.

A Great Flight

Probably the biggest flight on record was that of Second Lieutenant Marchal, of the French Flying Corps, over Germany, and nearly to the Russian lines, which he failed to reach owing to losing his way. En route he dropped proclamations in Berlin on July 25. The flight was from Nancy to Kavenczu, a distance of 1,242 miles. Doubtless the wind was a favouring one.

Speed.	Name.	Date.
40¼ miles per hour. (64·800 kiloms. per hr.)	P5 (Italy)	July 30, 1913.

* The L2 and later Zeppelins on speed trials attained more than 52 miles per hour; and it is claimed that the Italian airship V attained the speed of 58 miles per hour in official trials, Feb. 1915.

RECORDS—SPHERICAL BALLOONS

Altitude

Height.	Name.	Place.	Date.
34,433 feet (10,800 metres)	Süring and Berson	Berlin	July 31, 1901

Duration

Time.	Name.	Place.	Date.
87 hours	Hugo Kaulen	Bitterfeld to Perm	Dec. 13–17, 1913.

Distance

Distance.	Name.	Place.	Date.
1,895 miles	Berliner	Bitterfeld to Bissertsk (Perm, Russia)	Feb. 8–10, 1914.

British Record

1,117 miles	A. E. Gaudron, with E. M. Maitland and C. C. Turner	London to Mateki-Derevni, Russia.	Nov. 18–19, 1908.

(*Duration Record* also—31½ hrs. The time is incorrectly given, in certain books, as 36 hours.)

Prizes and Competitions

The outbreak of war caused the postponement of several important events, including the Gordon-Bennett race, attempts to fly across the Atlantic, the British Empire Michelin Cup II, and the seaplane race round Britain for a prize of £5,000 offered by the *Daily Mail*. The Jacques Schneider Seaplane Trophy is now held by Great Britain, and will be flown for in British waters.

Royal Naval Air Service

The Director of the Air Services at the Admiralty is Rear-Admiral C. L. Vaughan-Lee.

The Superintendent of Aircraft Construction is Commodore Murray F. Sueter, C.B.

The R.N.A.S. has control of all airships and seaplanes, but also possesses a number of over-land flying machines. Unlike the Royal Flying Corps, the organisation is not one of squadrons.

The Commandant of the central training establishment is Commodore Godfrey M. Paine, C.B., M.V.O., R.N.

Royal Flying Corps

(*Per Ardua ad Astra*)

The Director-General of military aeronautics is Lieut.-General Sir David Henderson, K.C.B., D.S.O., who has now been appointed to the Army Council.

An Army Order issued on Jan. 17, 1915, details the reorganisation of the Royal Flying Corps. The Corps is now formed into wings, each with its commanding officer, and the post of O.C.

The New HAZELL, 1917

Royal Flying Corps is abolished. A wing consists of two, three, or, in special cases, four squadrons. Provisional establishments for wing headquarters, for the headquarters of the administrative wing, and for the Royal Flying Corps depôt are as follows:

Wing Headquarters.—3 officers, 6 sergeants, 3 corporals, 18 air mechanics and privates: total, 30.
Administrative Wing.—4 officers, 3 sergeants, 11 rank and file: total, 18.
Records and Recruiting.—2 officers, 7 civilians: total, 9.
Depôts.—7 officers, 1 warrant officer, 10 sergeants, 228 rank and file: total, 246.

By an Army Order issued in October 1915, the Royal Flying Corps became organised in brigades, each brigade consisting of two or more wings. The Administrative Wing remains outside the brigade organisation and is administered as a separate unit.

Central Flying School

The Commandant is Colonel A. C. H. MacLean.

The Dominions and Flying

Australia early in the war formed an aeroplane squadron, which was accepted by the War Office. It consisted of 28 officers and 180 men. Last August the War Office accepted a second squadron from Australia. The State Aviation School was opened at Richmond, N.S.W., on Aug. 28.

The Government authorised recruiting in Canada for the Royal Flying Corps, and a very large number of aviators in the R.N.A.S. and the R.F.C. are Canadians, or Australians, or from other Oversea Dominions.

The Imperial Aircraft Flotilla organises voluntary contributions in the Dominions for the purpose of strengthening the Flying Services. A very large number of first-class aeroplanes, each bearing the name of the Dominion of its origin, have thus been acquired.

Insurance against Air Raids

Under Government guarantee the public can insure their property: through the War Risks Insurance Office (Aircraft Dept.), 33–36 King William Street, London, E.C.; through a fire insurance company; or through a recognised agent or broker.

Property can be insured against risks from aircraft only, or against risk from both aircraft and bombardment. The rates per annum for each £100 insured are as follows:

	Aircraft risks only.	Aircraft and Bombardment.
	s. d.	*s. d.*
Class 1.—Private Houses and Buildings, or Contents and Rents	2 0	3 0
Class 2.—All other Buildings (or Rent)	3 0	4 6
Class 3.—Farming Stocks (alive or dead)	3 0	4 6
Class 4.—Contents of all buildings other than those in Classes 1 and 5	5 0	7 0
Class 5.—Merchandise stored or in transit	7 6	10 0

All these rates are for 12 months or any shorter periods. In the case of Class 5, insurance may be effected for one, three, or six months at proportional premiums. Through the Post Office, insurance on property for 12 months against destruction or damage directly or indirectly caused by attacks of aircraft, or shells used against aircraft, or by bombardment from the sea, may be effected as follows: 6*d.* for £25; 1*s.* for £50; 1*s.* 6*d.* for £75.

Certificated Aviators

By Jan. 16, 1916, the number of aviators' certificates issued by the Royal Aero Club under the Rules of the Fédération Aéronautique Internationale was 2,291. Since that date the lists have not been published. In addition, a number of British aviators took their certificates in the United States and in France. There were also a number of certificated aeronauts (ballooning) and airship pilots.

The present figures for France, Russia, Germany Italy, etc., are not issued.

Aerial Law

Under the Aerial Navigation Acts of 1911 and 1913 the Government issued regulations for aircraft, by which the entry of foreign aircraft into this country is prohibited save by certain routes, and then only after due notice has been given. Prosecutions under this Act have already been conducted. Various regulations are in force in other countries. In Great Britain a number of localities have been declared entirely prohibited to aircraft flown by civilians. The Home Office has prohibited flying over London within a radius of four miles from Charing Cross. The Royal Aero Club penalises aviators who fly over large towns.

On Aug. 2, 1914, following the outbreak of war, the Home Office issued an order prohibiting the navigation of private aircraft over the whole area of the United Kingdom save in recognised aerodromes or within three miles of aerodromes.

Regulations for Aerial Traffic

Regulations for Aerial Traffic were adopted at the conference of the International Aeronautical Federation.

Aircraft must carry certificates of registration in charge of the person responsible, and must display in a prominent position both the country and the number of its registration. The following letters or combinations of letters will be the "country-marks." Great Britain, G.B.; France, F.; Germany, D.; Austria, O.E.; Holland, P.B.; Hungary, H.; Switzerland, SS.; Belgium, B. Dirigibles are to carry at night a brilliant white light at the head visible at a distance of 2½ miles, a green light on the right, and a red one on the left. Free balloons must carry a simple white light. The rules as to lights for dirigibles will apply to aeroplanes later on, but are not to be enforced for some time to come. At present they need only carry a single lamp capable of showing white, red, and green lights.

The "rules of the road" are simply that aircraft of all kinds, whether meeting or overtaking, are to pass on the right, and keep a "passing interval" of 100 metres. Should one aircraft require to pass on the left of another, that interval must be increased to 300 metres. A red flag of triangular shape suspended below the car of a dirigible by

The New HAZELL, 1917

day, or an intermittent white light in the same position by night, are signals of distress.

The Royal Aero Club has made rules for flying-grounds which will be found in the Year Book of the Club in full. Briefly, they provide that aeroplanes must pass each other at a distance of not less than 30 metres. An aeroplane overtaking another on the same level must pass outside it at a distance of at least 10 metres.

The Gordon-Bennett Aviation Trophy

1909. Glenn Curtiss (U.S.A.), Curtiss b., Rheims; 47 m. per hour, average speed (course 12½ m.).
1910. C. Grahame-White (Britain), Blériot m., Belmont Park, New York; 60½ m. per hour, average speed (course, 62½ m.).
1911. C. T. Weymann (U.S.A.), Nieuport m., Eastchurch; 78 m. per hour, average speed (course, 94 m.).
1912. Jules Védrines (France), Deperdussin m., 140 h.p. Gnome; 106⅛ m. per hour, average speed (course, 124·8 m.).
1913. Prévost (France), Deperdussin m., 160 h.p. Gnome; 124½ m. per hour, average speed (course, 124·8 m.).
1914. Prevented by the war.
1915. Prevented by the war.
1916. Prevented by the war.

Progress Year by Year

	Independent Speed.	Duration.	Height.	Distance. Non-stop.
	M. per Hr.	H. M. S.	Feet.	Miles.
1908	39	2 20 23½	400	95
1909	49·9	4 17 53	1,640	130
1910	67·5	8 12 0	10,745	365
1911	82·5	11 1 29	13,950	453
1912	108⅛	13 17 57	17,382	627¾
1913	126·5	13 17 57	19,600	634
1914	126·5	24 12 0	25,756	646
1916	All the above, except Duration and Altitude, have since been beaten.			

Conditions for Aviators' Certificates

Issued by the Fédération Aéronautique Internationale

Two flights must be made, each consisting of five figures of 8. At each end of each figure of 8 the pupil must fly round one of the two mark-posts, which must be situated not more than 500 metres (547 yards) apart. The method of alighting for each of the flights shall be with the motor stopped at or before the moment of touching the ground, and the aeroplane must come to rest within a distance of 50 metres (164 ft.) from a point indicated previously by the candidate. If an altitude of 100 metres is not once attained in either flight, a separate altitude flight is necessary, and a descent with engine stopped must be made from that altitude.

The civilian flying schools have accepted a series of regulations insisted upon by the War Office as a condition of recognition of the pilot's certificates. The regulations provide for supervision of machines, limitation of number of pupils, and that a pupil shall be in the air at least 5 hours, of which 2 hours must be solo, before flying for his certificate.

The Royal Aero Club special certificate (not recognised by the International Federation) is granted to aviators who pass the following test: An altitude flight of 1,000 ft.; a glide of at least 500 ft. with engine cut off, landing within 100 yards of starting-point; a cross-country flight out and back, 50 miles each way.

The following flights must be made before the French military superior brevet can be obtained: A flight lasting over one hour at an altitude of 1,000 metres; a vol-plané from 500 metres; three cross-country flights, one of 200 kilometres with two predetermined stops, the others of 150 kilometres non-stop.

Aeroplane Fatalities

It is impossible to compile a complete list of flying fatalities, or to publish the number of Flying Service casualties. The latter appear in the casualty lists as they occur, but the authorities discourage summaries or analyses of the figures save at appointed periods.

Among the losses sustained by British aviators during the year were:

Commander Neville F. Usborne, R.N. (Wing Commander), and Lt.-Com. de Courcy W. P. Ireland, R.N. (Squadron Commander), (by accident on Feb. 1),

On December 12, 1915, France lost a pioneer in Lieutenant Gaston Caudron, who with two passengers was killed whilst testing a new machine.

A well-known American flyer, W. C. Robinson, was killed at Grinnell, Iowa, on March 11.

Among the French aviators killed were Lieut. Marc Bonnier and Lieut. Brindejonc des Moulinais.

The casualties among the Flying Services are at a bigger rate than in the first twelve months of the war, the cause being the increased efficiency of anti-aircraft guns and the greater frequency of aerial duels. The average height at which work is done has greatly increased, and, speaking generally, it may be said that it has been sent up from 5,000 to 10,000 ft. Even at greater altitudes the airman is in danger.

The weather naturally affects the altitude at which work can be done. And, as with all other arms, risks must be taken. From the summary given elsewhere it will be seen that the airmen of the Allies often fly very low in order to ensure accuracy in bomb-dropping, to use machine guns, or to take observations.

Ballooning

Except for Service purposes ballooning has ceased in the belligerent countries, and continues to decline in the U.S.A. The only event of the year to record is the voyage made on June 22–24 across the Andes by Eduardo Bradley and Capt. Zuloaga from Santiago de Chili to Uspallata, when a height of 25,000 ft. was attained and a temperature of 32° below zero encountered.

The Aircraft Industry

In April was formed a Society of British Aircraft Constructors for the preservation of mutual trade interests.

MOTORING

On Jan. 1, 1913, new regulations came into force for assessing for purposes of taxation the horse-power of motor-cars:

1. For the purposes of these regulations the horse-power of any motor-car deriving its motive power wholly from an internal combustion engine worked by a cylinder or cylinders shall be taken to be:

(*a*) in the case of a single-cylinder engine, the horse-power attributable to the cylinder of the engine;

(*b*) in the case of an engine having two or more cylinders, the sum of the horse-powers attributable to the separate cylinders.

2. The horse-power attributable to any cylinder of an internal combustion engine shall be deemed to be equal to the square of the internal diameter of such cylinder measured in inches divided by a numeral:

(*a*) in the case of a cylinder having a single piston the numeral used as divisor shall be 2·5;

(*b*) in the case of a cylinder having two pistons, the numeral used as divisor shall be 1·6.

3. The horse-power of any motor-car deriving its power wholly from a steam engine shall be taken to be proportional to the effective heating surface of the boiler supplying steam to such engine, at the rate of 1 h.p. for every 3 sq. ft. in such effective heating surface, and the effective heating surface shall be taken to be:

(*a*) in the case of a boiler having horizonta or approximately horizontal tubes, the whole of that surface of the tubes which is exposed to the flame or hot gases;

(*b*) in the case of a boiler having vertical or approximately vertical tubes, half of that surface of the tubes which is exposed to the flame or hot gases.

4. Any motor-car deriving its motive power from an electric motor or motors shall be deemed to be of a horse-power exceeding 6½ but not exceeding 12.

5. In measuring cylinders and boilers, and in calculating horse-power, fractions of inches and feet and fractions of a unit of horse-power are to be taken into account.

6. Where it appears that in consequence of the exceptional design or construction of the engine

of any motor-car the horse-power as calculated under the preceding rules is substantially less than the average power which the engine would develop in continuous use on the road if there were no restrictions on speed other than those imposed by the car itself, then such average power shall be taken as the power of the car.

The Taxes on Cars

For the scale of taxation of motor-cars, see EXCISE LICENCES, p. 111.

The Motor-Car Industry

The import of motor-cars and chassis into the United Kingdom was free up to Sept. 28, 1915; after that date, motor-cars, chassis, etc., became dutiable. The imports from Jan. 1 to Sept. 28, 1915, included 12,476 complete cars valued at £2,423,732, and 2,936 chassis valued at £857,872; from Sept. 29 to Dec. 31, 1915, 3,700 complete cars valued at £532,390 were imported as well as 143 chassis valued at £19,838. In addition, rubber tyres and tubes were imported to the value of £1,984,563, and other parts to the value of £1,598,804, making the **total value of the imports** of the motor-car industry in 1915 £7,417,211. Of **complete cars** practically all came from the U.S. (to the value of £2,632,851), only £159,998 worth coming from France, and £45,437 worth from Italy. Of **chassis,** the U.S. sent £448,242 worth; France £278,944 worth, and Italy £121,616. Of **rubber tyres and parts,** Italy headed the list before the war, but in 1915 the U.S. easily headed the list with £1,225,422 worth, France sending £282,764, and Italy £280,081 worth. Of other **parts** the U.S. sent £1,358,251 worth, France £120,844, and Switzerland £205,441 worth.

The **export** of cars of British manufacture was naturally vitally affected by the war, as will be seen from the following table:

Export of British-made Motor-Cars and Chassis

Year.	Complete Cars.	Value.	Chassis.	Value.
	No.	£	No.	£
1911 .	4,536	1,804,419	735	296,689
1912 .	5,277	2,023,715	1,180	437,224
1913 .	7,595	2,396,369	1,234	465,283
1914 .	6,054	1,972,226	1,436	679,696
1915 .	3,279	1,129,469	483	187,181

Of foreign countries, £194,727 worth went to Russia, and £190,848 to France; to the Argentine, our best foreign customer in by-gone days, only £8,355 worth went. Complete cars to the value of £206,071 were sent to British India, of £154,489 to New Zealand, of £129,344 to Australia, of £51,692 to South Africa, and of £5,925 to Canada. In addition, 10,927 **motor-cycles,** of the value of £510,374 were exported.

Motor Licences in 1915

The total number of motor-car licences issued in 1915 was: England, 126,311; Scotland, 12,934; Ireland, 6,344, making a total for the United Kingdom of 145,589. The total number of motor-cycle licences issued in 1915 was: England, 126,495; Scotland, 12,001; Ireland, 4,150. The total number of motor-cars and motor-cycles was therefore 288,235. There were issued, in addition, licences for hackney motors: England, 38,951; Scotland, 5,529; a total for Great Britain of 44,480. The number of motors licensed in the U.S. in 1916 was 2,423,788, of which 71,026 were commercial vehicles. The largest number in any one state was 212,844 in New York, Illinois coming next with 182,290. The exports of motor vehicles of all kinds from the U.S. in 1915 amounted to a value of no less than £18,975,947, of which £11,966,849 was commercial cars; the greater portion of the exports went to the belligerents in Europe, although Asia and Oceania took over £2,000,000 worth.

The Brooklands Track

The main dimensions of the Brooklands track are: Length of circuit, inner edge, two miles; length of circuit, including diagonal kilometre stretch, inner edge, 3¼ miles; mean radius of long bend, 1,550 ft.; mean radius of short bend, 1,000 ft.; width, 100 ft.; test hill, total length, 117 yds. 1 ft. 3 in., consisting of 105 ft. 10 in. of 1 in 8, 91 ft. 9½ in. of 1 in 5, and 154 ft. 7¾ in. of 1 in 4.

Clubs and Societies

Auto-Cycle Union, 83 Pall Mall, London, S.W., is a branch of the Royal Automobile Club. The governing body of the sport of motor-cycling. Also offers many sterling inducements to membership, now upwards of 15,000. Subscriptions, 5*s.*, 10*s.* 6*d.*, and £1.1.0 annually. *Sec.* T. W. Loughborough.

Automobile Association and Motor Union, Fanum House, Whitcombe Street, London, W.C. Its main objects are the protection of careful motorists and the enforcement of the Highways Act. It organises road patrols over thousands of miles of main road. The Association also gives free legal defence to members charged with offences under the Motor Car Act, 1903, legal advice, touring facilities, engineering and technical advice. Membership of the Association, at outbreak of war, 94,000. The annual subscription for car owners is £2.2.0; light car owners, £1.1.0; motor-cyclists and cycle-car owners, 10*s.* 6*d.* *Sec.* Stenson Cooke.

Commercial Motor Users Association (Incorporated) is the organisation for users of and persons interested in commercial motor vehicles of every type. Subscription, £1.11.6; entrance fee, £1.1.0. *Chairman,* Colonel R. E. Compton, C.B.; *Sec.* Frederick G. Bristow, F.C.I.S. Offices, 83 Pall Mall, S.W.

Institution of Automobile Engineers. See under SOCIETIES.

Royal Automobile Club, Pall Mall, London. Provides for its members a social club, and is a centre of information and advice on matters pertaining to automobilism; gives its support in the protection and defence of their rights. See under CLUBS.

Society of Motor Manufacturers and Traders (Offices: 83 Pall Mall, S.W.). *Pres.* E. Powell; *Sec.* T. F. Woodfine. Formed in 1902 to protect the interests of all branches of the motor trade. The interests of the various sections of the trade are looked after by ten different Committees. The Society co-operates with the Institution of Automobile Engineers on technical matters, including research. The Society organised the Motor Exhibitions which in peace-time were held at Olympia, whilst those elsewhere in this country were organised by or in connection with it.

The New HAZELL, 1917

MOTOR INDEX MARKS

RACING RETROSPECT, 1916

The Racing season of 1916 opened under very unfavourable auspices. Quite early in the new year it became generally known that the drastic curtailment of meetings which had obtained during the greater part of the 1915 season would be continued. Pursuant to an understanding between the Government and the Jockey Club all the provincial fixtures were cancelled save two meetings each at Lingfield, Gatwick, and Windsor and three at Newbury. As a partial set-off four "extra" meetings were sanctioned for Newmarket which served, with one break of a month, to keep racing going, at least alternate weeks, from the first week in April to the first week in November. Notwithstanding these severe restrictions some very good sport was witnessed, and the attendance of the public quite large in view of the curtailment of the usual facilities of railway travel. Until nearly the close of the season considerable anxiety for the future arose in consequence of rumours that racing might be entirely prohibited during 1917, but arrangements were finally made that it should be allowed to continue on the same lines as in the past season, subject to such revision as circumstances might render necessary. The appended list of Fixtures is subject to such modifications as will be covered by that arrangement. As regards cross-country sport, a limited number of meetings have been sanctioned for Lingfield, Windsor, and Gatwick during January, February, and March.

For some of the most popular events which had to be abandoned, substitute races were provided. Consequently all the classic races were run at Newmarket, the "Two Thousand Guineas" being won by Lord Falmouth's Clarissimus; the "One Thousand" by Lord Derby's Canyon; the "New Derby" and "New Oaks" by Mr. Hulton's Fifinella; and the September Stakes (taking the place of the St. Leger) by Mr. Buchanan's Hurry On. The Jockey Club Stakes went to the Duke of Portland's Cannobie and the Princess of Wales's Stakes to Sir M. Sykes's Nassovian. Of the weight-for-age long-distance cup races only one was decided—the Jockey Club Cup, won by Mr. Buchanan's Hurry On.

The following is a list of the principal "handicap" winners including the substitute races: The Lincolnfield Handicap (Lingfield), Mr. Phillips's Clapgate; The "Suburban" Handicap, Lord Carnarvon's Julian; the Newbury Spring Cup, Mr. Hunt's Cerval; the Newbury Summer Cup, Captain Kidston's Aerschot; the Newbury Autumn Cup, Mr. Raphael's Aboukir; the Newmarket Summer Handicap, Mr. A. Sadler's The Ant; the Cambridgeshire Hunt Cup (Newmarket), Mr. Hulton's Silver Tag; the Warren Hill Handicap, Sir A. Bailey's Son-in-Law; the St. George's Stakes (Windsor), Lord Derby's Phalaris; the Cosmopolitan Cup (Lingfield), Mr. Singer's Prawle Point; the Newmarket Autumn Handicap, Mr. Singer's St. Eloi; the Cesarewitch Stakes (Newmarket), Mr. Raphael's Sanctum; and the Cambridgeshire Stakes (Newmarket), Lord D'Abernon's Eos.

Many of the races for two-year-olds provided interesting contests, the most valuable prize, the Middle Park Plate (Newmarket), being won by Mr. J. B. Joel's North Star. Of the other juveniles the most successful were Lord D'Abernon's Diadem, Mr. Hulton's Knutsford, Captain E. Loder's Molly Desmond, Sir W. Tatem's Grand Fleet, Sir H. Meux's Dansellon, and Lord Rosebery's Lammermuir and Sampier.

As a consequence of the great reduction in the number and value of the prizes the amounts credited to owners were much smaller than in normal times. At the head of the list was Mr. Hulton £13,764, followed by Lord Derby £9,126. the Duke of Portland £8,005, Lord Falmouth £6,300, Mr. Buchanan £5,085, Lord D'Abernon £4,652, Mr. J. B. Joel £3,685, Sir W. J. Tatem £3,608, and Captain Kidstone £3,231. As the trainers of Clarissimus and Cannobie, W. Waugh (Kingsclere); of Knutsford, Fifinella, Silver Tag, and Julian, R. C. Dawson (Whatcombe); of Canyon, Eos, and Diadem, the Hon. G. Lambton (Newmarket); and of Sanctum, Aboukir, and Dansellon, W. Persse (Stockbridge) figured the most prominently.

As regards the successful stallions, Polymelus for the third year in succession headed the list owing to the victories of Fifinella, Pommern, and Cannobie. Next came Chaucer, sire of Canyon; Radium, sire of Clarissimus; Orby, sire of Eos and Diadem; Santoi, sire of Sanctum; and Sunstar, sire of North Star and Margarethal.

Dspite the unfavourable circumstances the sales of bloodstock proved very successful, for if British buyers were less to the front than usual, competition from abroad, notably the Argentine and Brazil, was quite keen. A very satisfactory feature was the prices realised by the yearlings brought up from the National Stud (the nucleus of which was the munificent gift to the nation by Colonel Hall Walker of his very valuable stallions and mares), which brought an average of 568 guineas each.

The list of winning jockeys was again headed by S. Donoghue with 44 successful mounts. Next to him the most prominent were J. Childs, Bullock, W. Childs, and V. Smyth.

RACING FIXTURES, 1917

FLAT RACING

The following are the meetings officially announced by the Jockey Club to be held in 1917, with the dates where fixed:—

Ascot.
Bibury Club M.
Birmingham Summer M.
Charter M.
Curragh April M.
Curragh May M.
Curragh June M.
Curragh July M.
Curragh September M.
Curragh October M.
Derby Summer M.
Doncaster September M.
Epsom Summer M.
Gatwick Spring M.
Gatwick Summer M.
Goodwood
Hurst Park Summer M.
Hurst Park August M.
Kempton Park Spring M.
Leicester Summer M.
Leicester Autumn M.
Lewes June M.
Lewes Summer M.
Lingfield Park Second Spring M.
Liverpool Spring M.
Liverpool Summer M.
Liverpool Autumn M.
Manchester Whitsuntide
Newbury Spring M. [M.
Newbury Summer M.
Newbury Autumn M.
Newcastle and Gosforth Pa k Spring M.
Newmarket Craven M. Apr. 17-19
Newmarket First Spring M. May 1-4.
Newmarket Second Spring M.
Newmarket First July M. July 3-6.
Newmarket Second July M.
Newmarket First October M. Oct. 2-5.
Newmarket Second October M. Oct. 16-19.
Newmarket Houghton M. Oct. 30-Nov. 2.
Nottingham July M.
Nottingham Summer (Aug.) M.
Phœnix Park April M.
Phœnix Park May M.
Phœnix Park June M.
Phœnix Park July M.
Phœnix Park August M.
Phœnix Park September M.
Phœnix Park October M.
Redcar Second Summer M.
Sandown Park Eclipse M.
Stockton Summer M.
Wolverhampton Summer M.
York Spring M.
York August M.

NATIONAL HUNT FIXTURES, 1916–17

National Hunt fixtures for 1916–17 are:—

1916

Dec. 1 (Friday) . . Windsor (2).
,, 8 ,, . . Newbury (2).
,, 13 (Wednesday) . . Hawthorn Hill (2).
,, 20 ,, . . Colwall Park (2).
,, 27 ,, . . Lingfield Park (2).

1917

Jan. 3 (Wednesday) . . Gatwick (2).
,, 12 (Friday) . . Windsor (2).
Jan. 17 (Wednesday) . . Lingfield Park (2).
,, 24 ,, . . Newbury (2).
,, 31 ,, . . Gatwick (2).
Feb. 7 ,, . . Hawthorn Hill (2).
,, 14 ,, . . Colwall Park (2).
,, 21 ,, . . Lingfield Park (2).
Mar. 2 (Friday) . . Newbury (2).
,, 9 ,, . . Windsor (2).
,, 14 (Wednesday) . . Colwall Park (2).
,, 21 ,, . . Gatwick (2).
,, 28 ,, . . Hawthorn Hill (2).

OBSERVATORIES

Royal Observatory, Greenwich.—The great increase in British maritime trade in the seventeenth century rendered the determination of longitude at sea a pressing necessity. The subject was brought to the notice of King Charles II, who, on understanding that the first requisite was a more accurate knowledge of the position of the moon and principal stars, founded the Royal Observatory at Greenwich in 1675. The Observatory is under the official control of the Admiralty, and the Director is styled the Astronomer Royal. The meridian observations of sun, moon, planets and stars, which constitute the fundamental work, are made with a fine transit-circle of 8 inches aperture. An altazimuth on a new principle with telescope of 8 inches aperture has been constructed to supplement the observations with the transit-circle. The largest instrument is a 28-inch refractor. Another fine instrument is the astrographic equatorial designed for work in connection with the "Photographic Chart of the Heavens." It consists of two telescope tubes rigidly connected and parallel, one carrying a 10-inch telescope lens, the other a 13-inch photographic lens by which the star images are imprinted on the photographic plate. The Greenwich section of this important work was completed at the end of 1909. The Thompson equatorial, presented to the Observatory by the late Sir Henry Thompson, has on one side of the declination axis a telescope with a lens corrected for photographic rays of 26 inches aperture, and on the other side a telescope with a mirror of 30 inches diameter. A photographic spectroscope is mounted on the reflector. The refractor is being used to determine the distances of stars. Photographs of the sun are taken on every available day, and after being measured are carefully stored for reference, giving a daily record of sunspots for the last 35 years. The chronometers used in the Navy are purchased after "trial" at the Observatory. The average number being tested daily is about 600. Every hour during the day time-signals are sent out from the Observatory through the Post Office telegraphs, giving Greenwich time to all parts of the country. Persons desirous of visiting the Observatory must satisfy the Astronomer Royal that they have some definite useful purpose in view, or have some scientific or official claim to the privilege.

Astronomer Royal, Sir Frank Watson Dyson, D.Sc., F.R.S. £1,000
Chief Assistants, J. Jackson, B.A., B.Sc., F.R.A.S.; H. S. Jones, B.A., B.Sc., F.R.A.S. £500–600
Assistants, Thomas Lewis, F.R.A.S.; Wm. G. Thackeray, F.R.A.S.; H. P. Hollis, B.A., F.R.A.S.; Andrew C. D. Crommelin, D.Sc., F.R.A.S.; W. W. Bryant, B.A., F.R.A.S. (*Magnetic and Meteorological*) £320–450
Clerical Assistant, H. Outhwaite . £250–350
Office hours, 9 to 4.30

Royal Observatory, Edinburgh, was built by an association of scientists, who founded in 1811 the Astronomical Institution of Edinburgh, the first Astronomer Royal for Scotland being Thomas Henderson.

In 1889 Lord Crawford handed over the whole equipment of his Observatory at Dunecht to the Crown, and it was placed in the Edinburgh Observatory, which was removed to Blackford Hill. This was in 1896. The telescopes are a 15-inch refractor, a 24-inch reflector, an 8¼-inch Transit, a Foucault siderostat, and a number of smaller instruments. The Observatory is under the Secretary for Scotland, to whom an annual report has to be rendered.

Director, R. A. Sampson, F.R.S., Astronomer Royal for Scotland.
First Assist. J. Storey, F.R.A.S.
Senior Assist. R. W. Wrigley, B.A.
Junior Assist. E. A. Baker, B.Sc.

Solar Physics Observatory, South Kensington.—In 1879 the Solar Physics Committee was appointed by the Government "to advise on the methods of carrying on observations on Solar Physics," and the laboratories at the South Kensington Normal School of Science were made available for the extension of the work. In 1885 an important change was made in the organisation of the work. Up to that time the work done had been communicated to the Solar Physics Committee at specially convened meetings, the results then being forwarded to the Royal Society for publication. The new scheme left the initiation and direction of investigation in the hands of the director, an annual report of progress being presented to the committee. In 1902 the Observatory was separated from the Royal College of Science, and the main portion of the expenditure was from that time provided out of the Civil Service estimates. On March 31, 1913, the Observatory was handed over to the University of Cambridge, where it is under the direction of Prof. Newall. Sir Norman Lockyer and his son, Dr. Lockyer, on leaving Kensington, set up a private observatory—the **Hill Observatory,** Salcombe Regis, Sidmouth, Devon—where they are continuing the solar and spectroscopic work initiated by them.

Solar Physics Observatory, Cambridge.—*Director*, Prof. H. F. Newall, F.R.S.; *Assistant Director*, F. J. M. Stratton, M.A.; *Observers*, C. T. Wilson, F. E. Baxendall, C. P. Butler. *Instruments*, Newall telescope of 25-inch aperture, Huggins telescope consisting of 15-inch refractor and 18-inch reflector.

Armagh Observatory. Founded 1790. *Astronomer*, J. Alfred Hardcastle.

Liverpool. *Astronomer*, W. E. Plummer, M.A.

Cambridge (University). *Astronomer*, A. S. Eddington, F.R.S.; *Assistant*, Mr. Hartley.

Dunsink. H. C. Plummer, M.A.

Durham. Founded 1841. Experimental work is carried on with an almucantar. *Director*, Col. E. H. Hills. *Resident Astronomer*, F. C. H. Carpenter.

Oxford (University). Prof. H. H. Turner, F.R.S. Astrographic work.

Radcliffe (Oxford). Dr. A. A. Rambaut, F.R.S.

Cape of Good Hope Observatory is about three miles from Cape Town, and the grounds cover 27 acres. In addition to the meridian observatory, library, and committee rooms, there are ten detached observatories covering different instruments. The McClean telescope has a principal object-glass of 24 inches aperture, and is corrected for photographic work. The visual telescope is 18 inches aperture, and the guiding telescope 8 inches aperture. All these are mounted parallel to each other on the same powerful equatorial stand, and have all a focal length of 22 feet 6 inches. There are also two transit circles (one similar to that at Greenwich, the other a reversible), two equatorials, a heliometer, zenith telescope, and a photographic telescope of 13 inches aperture and 11 feet focal length.

Astronomer, S. S. Hough, M.A., F.R.S.	£867–967
Chief Assistant, J. K. E. Halm, Ph.D.	£667–767
Assistants, W. H. Cox; J. Lunt, D.Sc.; R. T. Pett; J. Power	£325–575
Clerical Assistant, Arnold Pilling, B.A.	£333–433

Khedivial Observatory, Helwan, Egypt. *Supt.* H. Knox Shaw.

Kodaikanal Observatory is situated on the Palani Hills in the Madura District of Madras, 7,700 feet above sea level. Opened 1899. Designed mainly for solar observations, and has a high-class spectro-heliograph, equatorials, and a number of powerful spectroscopes and spectrographs. *Astronomer*, J. Evershed; *Assistant*, Dr. T. Royds.

Madras Observatory is situated in the town of Madras. Founded 1792. Since the opening of the Kodaikánal Observatory the chief work carried on is the determination of time and the distribution of standard time signals over the whole of India. *Director*, J. Evershed; *Deputy*, Prof. R. Ll. Jones.

Adelaide (S.A.). *Astronomer*, G. F. Dodwell.

Hong-Kong. *Astronomer*, T. Claxton. *Chief Assist.* C. W. Jeffries; *First Assist.* B. D. Evans. Weather forecasts. Time service.

Johannesburg (Union Obs.). Founded 1904; reconstructed 1912. Principal instruments: refracting telescopes of 26 inches aperture, 10 inches (photographic), 9 inches visual, 7 inches, etc. It is one of the international stations for variation of latitude observations. *Director*, R. T. A. Innes.

Ottawa (Dominion Obs.). *Astronomer*, W. Plaskett (in Charge).

Perth (W. Australia). *Astronomer*, H. B. Curlewis.

Stonyhurst College Observatory (Lancs.). Rev. Father Sidgreaves, S.J.

Sydney (N.S.W.). *Astronomer*, W. E. Cooke.

MUSEUMS AND ART GALLERIES IN LONDON

Owing to the war the following have been closed:—British Museum (except the Reading Room); Natural History Museum, South Kensington; Science Museum, South Kensington (except to students); Geological Museum, Jermyn Street; Bethnal Green Museum; Tate Gallery; National Portrait Gallery; Wallace Collection; London Museum.

National Gallery, Trafalgar Square, S.W. (For earlier history see ed. 1888 and later editions.) The Gallery is **open to the public** at 10 a.m. on Mondays, Tuesdays, Wednesdays, and Saturdays, and on payment of a fee of 6*d.* on the students' days, Thursdays and Fridays, from 11 a.m. The Gallery is also open **free** on Sunday from 2 p.m. throughout the year. During 1915 the Gallery was visited on free days by 295,649 persons, giving a daily average attendance of 1,428. In addition 46,098 persons visited the Gallery on Sunday afternoons, giving a daily average of 886. On students' days 26,221 persons were admitted. Administrative expenses, 1916-17, £11,489.

Director, C. J. Holmes	£1,000
Keeper and Secretary, C. H. Collins Baker	600
Chief Clerk and Assist. Sec., George E. Ambrose	400

National Gallery of British Art, Grosvenor Road, S.W., was presented to the nation by Sir Henry Tate, Bt., and opened July 21, 1897. To this a Turner Wing has been added by the gift of the late Sir Joseph Duveen and his son, Mr. J. Duveen. The wing was opened in 1910. The Government has undertaken the maintenance through the Trustees of the National Gallery. The Gallery is closed for the duration of the war.

Keeper, Charles Aitken	£350–500

National Portrait Gallery, St. Martin's Place. Founded in 1856, "for the exhibition of portraits of eminent British historical characters." The collection now comprises nearly 1,800 portraits. The Gallery is closed to the public for the duration of the war. Administrative expenses, 1916–17, £3,485.

Director, *Keeper*, and *Secretary*, J. D. Milner	£500–700

London Museum, Lancaster House, St. James's, S.W. Lancaster House (formerly Stafford House) was puchased and presented to the Government by Sir William Lever. The Museum contains exhibits illustrative of the life of London from prehistoric times down to the present day. The Museum is closed to the public for the duration of the war. Administrative expenses, 1916-17, £2,570.

Director, Sir Guy Laking, Bt., C.B., M.V.O.
Assist. ditto, F. Harman Oates.
Assist. and Inspector of Excavations, G. F. Lawrence.
Technical Assist., H. W. Murray.

Victoria and Albert Museum, South Kensington. Administrative expenses, 1916–17, £63,375. A museum of ornamental and decorative art, under the control of the Board of Education. Entrances in Cromwell Road and Exhibition Road. **The Museum** contains nine Departments, viz.: Architecture and Sculpture; Ceramics; Engraving, Illustration, and Design; a Library; Metalwork;

Paintings; Textiles; Woodwork; and the Department of Circulation. Open daily, except Good Friday and Christmas Day, during the war from 10 a.m. till dusk or 6 p.m. in the summer months (Sundays, 2 to dusk). Admission free to all the Departments, but for admission to the Library a ticket is required, for which application must be made to the Director and Secretary.—The **Indian Section** is situated in the Imperial Institute Road; no charge is made for admission to the collections, which are open every day during the same times as the Victoria and Albert Museum. The collections now forming the Victoria and Albert Museum were formerly comprised in the South Kensington Museum, which included collections of scientific apparatus, etc. These latter collections now form the Science Museum, and are housed in the galleries to the west of Exhibition Road and in Imperial Institute Road, and are known officially as the **Science Museum, South Kensington.** Visitors, 1915, 496,069 on week-days, 78,508 on Sundays. **Bethnal Green Museum** is a museum of ornamental and decorative art, under the control of the Board of Education, but is closed to the public for the present.

Wallace Collection, Hertford House, Manchester Square, W. This collection of pictures, sculpture, arms and armour, furniture, and objects of art was originally formed by the third and fourth Marquises of Hertford. By the fourth Marquis it was bequeathed to Sir Richard Wallace, Bt., by whom it was largely increased. Sir Richard left it to his wife, Lady Wallace, who died in 1897, and bequeathed it to the nation. Hertford House (the original of Gaunt House in Thackeray's "Vanity Fair") was purchased by the Treasury for £80,000, extensively altered, and opened to the public in June 1900. The Collection is closed to the public for the period of the war, but Catalogues and Photographs can be obtained on written application to the Keeper. Administrative expenses, 1916–17, £4,596.

Keeper, D. S. MacColl £500–600

Science Museum, South Kensington (for staff, see p. 209). Entrances in Exhibition Road and Imperial Institute Road. Under the control of the Board of Education. The collections illustrate the principles of Science and also their application to industrial purposes. There are four divisions, containing respectively: (*a*) Scientific Instruments and Apparatus used in Instruction and Research: (*b*) Machinery, including models and examples illustrating the development of various branches of Engineering and certain other industries; (*c*) Naval Models and Marine Engines, together with objects illustrating methods of ship propulsion; (*d*) Science Library, containing books on pure and applied Science, and a set of British Patent Specifications. Open daily except Good Friday and Christmas Day to Students only; from 11 a.m. till 5 p.m. on Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays; on Saturdays from 11 a.m. till 8 p.m. **Visitors** 1915, 346,740.

The Radium Institute.—The Radium Institute, the foundation of which was due to the initiative of King Edward VII, was opened on Aug. 14, 1911. The two main objects of the institution are the treatment of patients with radium in direct relation with their ordinary medical attendants and the prosecution of researches into the effect of radium on the human organism in health and disease. *Patron*, H.M. the King. *Medical Supt.* A. E. Hayward Pinch; *Sec.* Thos. A. Garner, 16 Riding House Street, Portland Place, W.

Royal Botanic Gardens, Kew. These Gardens are under the control of the Board of Agriculture and Fisheries and in close connection with the Colonial Office, and serve as an advanced horticultural school, in which special attention is given to the training of gardeners for colonial and Indian service. **Open free** to the public every weekday from noon (May 15 to Oct. 15 from 10 a.m.), and on Sunday from 1 p.m. till dusk. For staff, see p. 202.

The Imperial Institute (South Kensington, S.W.) was founded in 1887 as a memorial of Queen Victoria's Jubilee (see eds. 1887 and 1888), and was transferred to the Government by Act of Parliament in 1902, and placed under the control of the Board of Trade. In April 1916 a further Act was passed transferring the property and management of the Institute to the Colonial Office and providing for the appointment of an Executive Council. Lord Islington is Chairman of the Executive Council. The **principal work** of the Institute is to promote by scientific and technical investigation the commercial utilisation of the raw materials of the Empire, and to supply full information concerning the British Dominions and Dependencies and their resources. The **Institute** includes a **Scientific and Technical Department,** with extensive **Research Laboratories, a Technical Information Bureau,** a **Publications Branch,** and a **Reference Library and Reading-rooms** containing works of reference and the principal newspapers and official publications and maps of India and the Colonies. The **Colonial and Indian Collections** in the Exhibition Galleries are **open free** to the public daily (Sundays excepted) from 10 a.m. to 5 p.m. in summer, and from 10 a.m. to 4 p.m. in winter.

Director, Prof. Wyndham R. Dunstan, C.M.G., M.A., LL.D., F.R.S.
Sec. to Director, G. A. I. Bosanquet, B.A.
Assist. Sec., A. J. Hedgeland, M.A.

Scientific and Technical Research Department

Supt. of Laboratories, T. A. Henry, D.Sc. (Lond.), F.C.S.
Assist. Supts. T. Crook, A.R.C.Sc.; R. G. Pelly, F.I.C.
Special Assists. A. E. Andrews, F.C.S., B. E. Long, B.A., H. L. Jeffery, A.R.C.Sc.; F. Ferraboschi, M.A., F.C.S.
Principal Assist. S. J. Johnstone, B.Sc.
Senior Assists. J. R. Furlong, Ph.D., W. S. Davey.

Technical Information Bureau

Supt. Harold Brown.

Publications Branch

Supt. E. Goulding, D.Sc., F.C.S.
Lib. and Spec. Assist. A. H. Girdlestone.

Public Exhibition Galleries

Colonial and Indian Collections, Senior Tech. Sup. S. E. Chandler, D.Sc., F.L.S.
Tech. Supts. H. Spooner, A. B. Jackson.
Assist. Tech. Supts. F. W. Rolfe, F. Boulton.

DIARY OF EVENTS, 1916

(For all events connected with the war see Special Articles)

1915. *December.*—**1.** Conference of Labour Delegates at Westminster on financial position and labour. **2.** Japanese Diet opened. **3.** Four officials of the Hamburg-Amerika Line found guilty of conspiracy: recall demanded of Capt. Boy-Ed and Capt. von Papen, German Naval and Military Attachés at Washington. **4.** Ammunition factory at Halle blown up. Vote of confidence in the Government passed by the Italian Chamber. Sentence of 18 months' imprisonment on three officials of the Hamburg-Amerika Line, and of one year on the fourth. San Francisco Exhibition closed: profit over £200,000. **5.** Mutiny on board Chinese cruiser *Chao-Ho*. **6.** Vessels anchored in Rumanian ports commandeered by military authorities. Resignation of the Spanish Cabinet. Opening of Smithfield Club Show. **7.** Opening of United States Congress. **9.** Scheme adopted for alliance of Miners' Federation, the Nat. Union of Railwaymen, and the Nat. Transport Workers Federation. Swedish journalists' visit to the Fleet. Opening of the Reichstag. New Spanish Cabinet—Count Romanones, Premier. Hopewell, Virginia, with new Dupont powder factories, practically destroyed by fire. **10.** Capt. Boy-Ed and Capt. von Papen recalled from the United States. Marriage of Prince George of Battenberg to Countess Narda Torby; King and Queen present. **16.** Announcement of decision to appoint Food Controller.

RHODES SCHOLARSHIPS

Under the will of Mr. Cecil Rhodes a number of Colonial, American, and German scholarships were established, in order to instil into the minds of young colonists the advantage to the Colonies as well as to the United Kingdom of the retention of the unity of the Empire; to encourage in the students from the United States of North America an attachment to the country from which they have sprung; and to further a good understanding between the British Empire, Germany, and the United States,

There are 78 Colonial Scholarships of £300 per annum, tenable at any college in the University of Oxford for three consecutive academical years. They are allotted as follows: 9 to Rhodesia, 12 to Cape Province, 3 to Natal, 18 to Australia, 3 to New Zealand, 24 to Canada, 3 to Newfoundland, 3 to Bermuda, and 3 to Jamaica; also 96 similar American Scholarships, 2 to each State and territory of the United States, tenable for 3 years; and before the war there were 15 German Scholarships, each of £250, tenable at Oxford for 3 years, the holders being nominated by the German Emperor, but an Act was passed in 1916 to cancel this clause in the will. *Office*, Seymour House, Waterloo Place, London, S.W.

UNIVERSITY EXTENSION

The object of this movement is to provide "the means of higher education for persons of all classes and of both sexes engaged in the regular occupations of life." Full particulars may be obtained from:

Oxford.—J. A. R. Marriott, M.A., University Extension Delegacy, Examination Schools, Oxford.

Yuan Shih-kai, President of the Chinese Republic (June 6), 56.

LEST WE FORGET

The Editor wishes he had space to enshrine the name of every Briton who has given his life for his country; this would require a volume larger than HAZELL: he can do no more than give the names of some members of well-known families who have fallen since the outbreak of war.

Acland-Hood, *Midshipman* C. A. J., *e.s.* of Hon. Arthur Acland-Hood.
Adamson, *2nd Lt.* M. L., *e.s.* of Sir Harvey Adamson, K.C.S.I.

Trotter, *Lt.* J. K., *o.s.* of Maj.-Gen. Sir J. K. Trotter.
Turton, E. S., *o.s.* of E. R. Turton, M.P.
Vaudrey, *Capt.* H. S., *s.* of Sir William Vaudrey.
Vaudrey, *Capt.* N., *o.surv.s.* of Sir William Vaudrey.
Wakeman, *2nd Lt.* E. O. R., *y.s.* of Sir Offley Wakeman, Bt.
Waleran, *Lt.* Hon. W. L. C., M.P., *o.s.* of Lord Waleran.
Waller, *Capt.* Sir Francis E., 4th Bt.
Walpole, *Capt.* J. R., *2nd s.* of Sir Charles Walpole.
Warner, *Lt.* C. J., *2nd s.* of Sir Courtenay Warner, Bt., M.P.
Weld-Forester, *Maj.* Hon. A. O. W. C., *5th s.* of Lord Forester.
Wellesley, *Capt.* Lord Richard, *2nd s.* of the Duke of Wellington.
Wendover, *Lt.* Viscount, *o.s.* of the Marquess of Lincolnshire.
Wernher, *2nd Lt.* A. P., *y.s.* of *late* Sir Julius Wernher, Bt.
Weymouth, *Lt.* Viscount, *e.s.* of the Marquess of Bath.
Williams, *Pte.* J. N., *e.s.* of Col. Sir Robert Williams, Bt., M.P.
Williams, *Capt.* O. T. D., *e.s.* of Sir Ormond Williams, Bt.
Willison, *Lt.* W. T., *s.* of Sir John Willison, Toronto.
Willoughby, *Commdr.* H. E. D. H., *e.s.* of Hon. Godfrey E. P. Willoughby.
Willoughby, *Lt.-Commdr.* Hon. P. R., *bro.* of the Earl of Ancaster.
Windsor-Clive, *Lt.* Hon. A., *y.s.* of the Earl of Plymouth.
Wing, *Maj.-Gen.* F. D. V., C.B.
Wingate, *2nd Lt.* A. D., *o.s.* of Sir A. Wingate, K.C.I.E.
Worsley, *Lt.* Lord, *e.s.* of the Earl of Yarborough.
Wrixon, *Lt.* A. H., *e.s.* of *late* Sir Hy. Wrixon, K.C.M.G.
Wyndham, *Capt.* P., *o.s.* of *late* Rt. Hon. Geo. Wyndham, M.P.
Wyndham, *Capt.* Hon. W. R., *bro. and heir-pres.* of Lord Leconfield.
Wynne, *Lt.* G. C., *2nd s.* of Gen. Sir A. S. Wynne, G.C.B.

Royal Colonial Institute. Founded in 1868, and incorporated by royal charter in 1882. The **objecte** are thus officially set forth :—"To provide **a place of meeting** for all gentlemen connected with the Colonies and British India and others taking en interest in Colonial and Indian affairs; to establish a **reading-room** and **library**, in which recent and authentic intelligence upon Colonial and Indian subjects may be constantly available, and a **museum** for the collection and exhibition of Colonial and Indian productions; to facilitate interchange of experiences amongst persons representing all the Dependencies of Great Britain to afford opportunities for the **reading of papers** and for holding **discussions** upon Colonial and Indian subjects generally; and to undertake **scientific, literary, and statistical investigations** in connection with the British Empire." Evening meetings are, as a rule, held on the second Tuesday in each month, from November to June, and afternoon meetings are also held. There is a monthly journal, *United Empire*. On Oct. 6, 1916, there were 11,800 Fellows and Associates. The **Library** contains over 108,000 volumes and pamphlets relating to the Colonies and India, and nearly 1,000 newspapers from all parts of the Empire are filed in the Newspaper Room.

Office, Northumberland Avenue.
Pres. Earl Grey, G.C.B., G.C.M.G., G.C.V.O.
Chairman of Council, Sir Charles Lucas, K.C.B., K.C.M.G.
Sec. Sir Harry F. Wilson, K.C.M.G.
Assist. do. William Chamberlain.
Travelling Commissioner, James R. Boosé, C.M.G.
Librarian, P. Evans Lewin.
Chief Clerk, Joseph Farrow.

THE NAVY AND THE ARMY

IMPERIAL DEFENCE

General : The War Committee ; The Committee of Imperial Defence ; The Dominions and Imperial Defence. The Navy. The Army. The Defence Forces of the Dominions.

The steps which were taken in 1909 to lay the foundations of a practical organisation for Imperial Defence, in which the self-governing States of the Empire should share the duties with the Mother-Country, have proved their value during the war. **The Conference on Imperial Defence** of that year was convened with the **specific object** of discussing general questions concerning the naval and military defence of the Empire with reference to proposals from New Zealand and Australia, and to resolutions passed by the House of Commons of the Dominion of Canada. A system of co-operation in defence was then inaugurated.

The arrangements were carried further at the Imperial Conference, 1911, when there was a conference between the Admiralty and representatives of the Dominion of Canada and the Commonwealth of Australia.

THE WAR COMMITTEE

The political conduct of the war has been entrusted since November 1915 to the War Committee, which meets almost daily under the presidency of the Prime Minister. Lord Lansdowne stated in the House of Lords on Nov. 8, 1915, that "we shall none of us dispute that a body of 22 public men is not a body well suited for the purpose of directing the course of a great war." Hence the decision to form a small committee of the Cabinet for the purpose. Its composition, announced by the Premier on Nov. 11, was: Messrs. Asquith, Lloyd George, Balfour, Bonar Law, and McKenna. Other ministers, besides officers and officials, attend the meetings whenever business concerning their departments is under consideration. Colonel Hankey, of the Imperial Defence Committee, acts as Secretary. On Feb. 4, 1916, Colonel Hankey was decorated with the K.C.B. "for distinguished service during the war."

THE COMMITTEE OF IMPERIAL DEFENCE

This body was, at its inception, purely advisory. Upon its recommendations naval and military policy were theoretically, and in its main lines practically, based. The **purpose of the Committee** was to consider questions of Imperial Defence from the point of view of the Navy, the Army, India, and the States of the Empire; to obtain and collate information from the various departments of the State; to prepare any documents required by the Prime Minister; to furnish such advice as might be required; and to keep adequate records for the permanent information of the Cabinet. The machinery provided for the work was the Secretariat or "permanent nucleus" of the Committee. The **Secretary**, who was appointed for a period of five years, is Lieut.-Col. Sir M. P. A. Hankey, R.M.A., K.C.B., who has as his colleagues two assistant secretaries, nominated respectively by the Admiralty and the War Office, and appointed for three years. Whether any change was made in the functions of the committee when war began, or since, was not announced, but it has met on many occasions.

The Committee of Imperial Defence conducted its work through sub-committees, and plenary sittings took place only six or seven times in the year. There were four permanent sub-committees: (1) the Home Ports Committee; (2) the Oversea Defence Committee; (3) the Committee for the Co-ordination of Departmental Action on the Outbreak of War, which prepared definite instructions in a "War Book"; and (4) the Air Committee, which dealt with matters concerning aerial navigation.

THE DOMINIONS AND IMPERIAL DEFENCE

Naval

The arrangement arrived at between the British Admiralty and representatives of the Dominion of Canada and the Commonwealth of Australia at the Imperial Conference in 1911 was published in the form of a Memorandum, which is quoted in the ANNUAL for 1912. The Commonwealth Government adhered to the policy agreed upon in 1909 and 1911, and during 1913 the principal ships of the first fleet unit of the Royal Australian Navy were completed. The responsibility for the defence of Australasian waters, and for the maintenance of the naval establishments at Sydney and elsewhere in the Commonwealth, was entirely assumed by the Federal Government on July 1, 1913. New Zealand, South Africa, India, and Newfoundland continued to make direct contributions to the Imperial Navy. The Federated Malay States also provided the cost of a battleship.

Military

Previous to the outbreak of the war, Canada, Australia, New Zealand, and South Africa were organising their forces in armies, based generally on the system of the Imperial Army at home.

The scheme provided that the **organisation and training** of the troops of the Overseas Dominions should follow generally the same lines as in the Regular Army and Territorial Force. Under the scheme for the organisation of **an Imperial General Staff** there was to be an interchange of officers, and headquarters for training were already established or to be established in the various Dominions under the control of the Imperial Staff. A Dominions Section of the Staff was formed at the War Office, April 1, 1912, to which officers from the Oversea Dominions were attached, whose duty was to study systems of education, training, staff duties, tactics, etc., and to keep the Chief of the Imperial General Staff abreast of changes and progress in their own parts of the Empire. The local forces of the various Dominions thus were to form part of one great homogeneous Imperial Army in a much larger sense than that term had hitherto been used. It was intended that **Staff Colleges** should be established in each of the States of the Empire on the lines of the Staff Colleges at Camberley and Quetta.

THE NAVY

Administration : The Admiralty Board; Distribution of Business; Admiralty Departments; The Naval War Staff; The Royal Marines; Ordnance and Torpedo Depots.
Organisation : Personnel; Finance; Material.
Miscellaneous : The Flag List; Dockyard and Port Commands.
The Navies of the Combatants (pp. 739-43).

ADMINISTRATION

The Admiralty Board

First Lord, See Special List of National Ministry . . £5,000 and house allowance
First Sea Lord, Admiral Sir John Rushworth Jellicoe, G.C.B., O.M. . £1,500* and house
Second Sea Lord, Admiral Sir Cecil Burney, G.C.M.G., K.C.B. £1,500*
Third Sea Lord, Rear-Admiral Frederick C. T. Tudor, C.B. £1,500*
Fourth Sea Lord, Capeain Lionel Halsey, C.B., C.M.G. £1,500*
Civil Lord, See Special List of National Ministry £1,000
Additional Civil Lord, Right Hon. Sir Francis J. S. Hopwood, G.C.B., G.C.M.G. £3,000
Parliamentary and Financial Secretary, See Special List of National Ministry . £2,000
Permanent Secretary, Sir W. Graham Greene, K.C.B. £2,000

Unlike the other great departments of the Government, the Navy is not presided over by a Secretary of State. This is due to the circumstance that **the constitutional ruler of the Navy** is a Lord High Admiral, but the office has been continuously in commission since 1708, except during the period when it was filled by the Duke of Clarence, afterwards William IV. The Commissioners are generally styled "**the Lords of the Admiralty**" or "the Board."

Private Secretaries and Naval Assistants

Private Secretaries to First Lord, J. E. Masterton Smith, C.B., G. A. Steel . £200†
Assist. do. E. H. Packe . . . £100†
Private Sec. to First Sea Lord, J. S. Barnes £100†
Private Sec. to Second Sea Lord, H. Leveson (*temp.*) . . . . . £100†
Private Sec. to Third Sea Lord, J. A. C. Champion . . . . . £100†
Private Sec. to Fourth Sea Lord, C. B. Coxwell (*actg.*) . . . . . £100†
Private Sec. to Civil Lord, N. MacLeod . £100†
Private Secs. to Additional Civil Lord, Hon. Brian Buckley (*temp.*), Sub-Lieut. F. J. Hopwood, R.N.V.R. (*temp.*) . . .
Private Sec. to Financial Secretary, F. W. Hadden (*actg.*) . . . . .
Private Sec. to Permanent Secretary, R. M. Y. Gleadowe (*actg.*) . . . . .
Naval Secretary to First Lord, Commodore C. M. de Bartolomé, C.B. . . £2,000
Naval Assistant to First Sea Lord, Captain Allan F. Everett, C.B., R.N. . . . £950
Additional do. Captain A. H. Alington, R.N.
Naval Assistant to Second Sea Lord, Captain Henry T. Buller, M.V.O., R.N. . . £950
Naval Assistants to Third Sea Lord, Captain Clement Greatorex, C.B., M.V.O., R.N. (is also Director of Naval Equipment); Captain Ernest K. Loring, R.N. . £950
Naval Assistant to Fourth Sea Lord, Commander Halton S. Lecky, R.N. . .

* In addition to naval half-pay.
† Allowance, in addition to salary as clerk, principal clerk, etc.

The Admiralty issued a statement dated Sept. 7, 1912, with memoranda by the First Lord, in which it was announced that the following distributions of Admiralty business had been approved, and would come into force forthwith:—

First Lord, General Direction of all business.
First Sea Lord, Organisation for War and Distribution of the Fleet.
Second Sea Lord, Personnel.
Third Sea Lord, Matériel.
Fourth Sea Lord, Stores and Transport.
Civil Lord, Works, Buildings, and Greenwich Hospital.
Additional Civil Lord, Contracts and Dockyard business.
Parliamentary Secretary, Finance.
Permanent Secretary, Admiralty business.

DISTRIBUTION OF BUSINESS

First Lord

1. General direction and supervision of all business relating to the Navy. Political and Board questions. 2. Promotions and removals from the Service of Naval and Marine officers. Honours and rewards. 3. Royal Yachts and Admiralty Yacht, including appointment of all officers. 4. Appointment of admirals and officers in command, including engineer rear-admirals, surgeons-general and deputy surgeons-general, and staff appointments of Royal Marines. 5. Chaplain of the Fleet, appointment of, and entry of naval chaplains and instructors. 6. Civil appointments and promotions (higher posts). 7. Naval cadetships and nominations to assistant clerkships, R.N.

First Sea Lord

1. Preparation for war: All large questions of naval policy and maritime warfare—to advise. 2. Fighting and sea-going efficiency of the Fleet, its organisation and mobilisation, including complements of ships as affecting total numbers; system of gunnery and torpedo exercises of the Fleet, and tactical employment of aircraft, and all military questions connected with the foregoing; distribution and movements of all ships in commission and in reserve. 3. Superintendence of the War Staff and the Hydrographic Department.

Second Sea Lord

1. Manning and training of the Fleet; details of complements of ships and establishments; barracks, training, and educational establishments, with their complements; also all mobilisation regulations for the *personnel*. 2. Service and appointments of officers of all branches (except as reserved to First Lord). 3. Royal Marines. 4.

Coastguard and Reserve Forces. 5. Hospitals. 6. Discipline (see Note). 7. Signals.

NOTE.—The following papers are invariably to be marked also to the First Sea Lord: (1) Questions of importance relating to discipline. (2) Questions affecting total Fleet numbers.

Third Sea Lord

1. Design of *matériel* for the Fleet, including ships and their machinery, armour, naval ordnance and gun mountings, aeroplanes and airships, and docking facilities; also alterations and additions to ships which affect design or fighting efficiency. Preparation of estimates of costs of all new construction falling due in any year under current and prospective programmes. Superintendence of the Departments of the Director of Naval Construction, Engineer-in-Chief, Director of Naval Ordnance, Director of Naval Equipment, Director of Air Department, and Superintendent of Compasses. 2. Design questions affecting vessels proposed to be purchased for the Fleet or to be employed in auxiliary services. 3. Inventions relating to ships, machinery, etc. 4. Salvage of vessels, so far as technical and professional considerations are involved.

Fourth Sea Lord

1. Transport service, including hired auxiliary vessels other than armed merchant cruisers. Passages. 2. Superintendence of naval store, Fleet coaling, and victualling services; ordnance and medical stores, etc., and all questions relating thereto. 3. Full and half pay; allowances and compensations, including table money, prize questions, pilotage and surveying pay, and freight of treasure and all extra payments. Debts of officers and men. Naval and Marine pensions and widows' pensions. Character, conduct, and badge questions. Naval savings banks. 4. Medals. Uniform regulations. 5. Naval detention quarters and Bodmin Naval Prison. Deserters — rewards for apprehension; removals of "R." 6. General salvage money questions, and money demands for salvage of naval stores. 7. Collisions.

Civil Lord

1. Works and buildings, including purchases of land; Coastguard buildings, sites, and leases. 2. Staff of civil establishments (except as reserved to First Lord), including classification, appointment, promotion, pay, allowances, and pension; dockyard police. 3. Greenwich Hospital business, including appointments (except of Naval chaplains to livings, Superintendent of the Royal Hospital School, Curator of the Painted Hall, and appointments to Greenwich Hospital Pensions). 4. Charitable fund, compassionate allowances, subscriptions, etc., and allowances to ministers of religion, and grants in aid of churches and schools. 5. Marine and dockyard schools. 6. Special questions affecting retirement and pay of Naval and Marine officers and men, when discretionary power is specifically provided for by Order in Council.

NOTE.—Works questions of an important character, or if likely to affect questions dealt with by the Financial Secretary, will be marked to him also.

Additional Civil Lord

1. Contracts for *matériel* for the Fleet (including ships and their machinery, armour, naval ordnance and gun mountings, aeroplanes and airships), works, yard machinery, and stores of all descriptions. Contract arrangements in connection with the disposal, salvage, or loan of vessels or stores. Superintendence of the Contract and Purchase Department. 2. General organisation of dockyards, including provision of labour and plant, and any business questions in connection with the building and repair of ships and their machinery, whether in the dockyards or in private yards.

NOTE.—Tenders for ships' hulls and propelling machinery, armour, and important gun and aircraft orders, will also be marked to the Third Sea Lord.

Parliamentary and Financial Secretary

1. Finance, estimates, and expenditure generally, and all proposals for new and unusual expenditure. 2. Accounts—cash, store, and dockyard expense. 3. Purchase and sale of ships, and of stores generally. 4. Payment of hire of ships as armed merchant cruisers, troop ships, colliers, freight ships, etc. 5. Questions involving reference to the Treasury financially, except the less important works questions dealt with finally by the Civil Lord. 6. Exchequer and Audit Department—Questions connected with. 7. General labour questions, including annual petitions.

Permanent Secretary

1. General office organisation. 2. Discipline of the clerical staff of the various Admiralty Departments. 3. Admiralty procedure. 4. Recommendations for appointments and promotions in the Admiralty Office. 5. Correspondence. 6. Communications with Foreign Naval Attachés. 7. Communications with ministers of religion (other than Church of England).

NOTE.—Routine papers, as defined below, will be disposed of by the Permanent Secretary. (*a*) Such as require intermediate action or reference to render them sufficiently complete for decision by the Board. (*b*) Such as do not involve some new principle, establish a precedent, or occasion expense not provided for under existing regulations. (*c*) Such as do not involve any point of discipline, or affect the movements of or orders to a ship.

In the absence of the Permanent Secretary the Assistant Secretary will act in his place.

Notes

1. It is to be understood that in any matter of great importance the First Sea Lord is always to be consulted by the other Sea Lords, the Civil Lord, the Additional Civil Lord, and the Parliamentary and Permanent Secretaries; but each Member of the Board and the Parliamentary and Permanent Secretaries will communicate direct with the First Lord. 2. The proceedings of courts martial will be marked to the Fourth and Second Sea Lords, but will specially pass under review of the Fourth Sea Lord, who will call the attention of the Second Sea Lord to any special point requiring consideration. The latter will consult the First Sea Lord in cases of importance.

Secretary's Department

Assist. Sec. O. A. R. Murray, C.B. . . £1,400

**Principal Clerks*, J. W. S. Anderson, M.V.O., C. R. Brigstocke (*actg.*), H. W. Brown, W. J. Evans, A. Flint (*actg.*), W. F. Nicholson, C.B., S. H. Plummer (*actg.*), R. R. Scott, C.S.I., R. Skinner (*actg.*), C. Walker, C.B. . . £850–1,000

* The Clerical Staff is arranged alphabetically in each class, and the arrangement does not indicate precedence. Promotion to higher appointments will be by selection and not by seniority.

Assist. Sec. for Finance Duties, V. W. Baddeley, C.B. . . . £1,000–1,200
**Assist. Principals*, J. B. Abraham (*actg.*), C. J. Adams, J. S. Barnes (*actg.*), E. C. Cleary (*actg.*), H. Eastwood, T. Fry (*actg.*), R. G. Hayes, E. Lee, C. G. Madin (*actg.*), P. E. Marrack (*actg.*), J. E. Masterton Smith, C.B., C. Perham (*actg.*), S. H. Phillips (*actg.*), A. H. M. Robertson (*actg.*), R. Walton (*actg.*) £600–800
**Clerks*, J. A. C. Champion, C. B. Coxwell, G. Dunn, R. M. Y. Gleadowe, N. Macleod, E. Sawers, G. A. Steel £200–500
**Staff Clerks*, H. Akhurst, G. F. Cotton, H. Crombie (*actg.*), F. W. Danter, A. P. Hegarty (*actg.*), A. Main, G. J. Main, E. J. Miller (*actg.*), J. Northam, W. A. T. Shorto, H. O. Simmons (*actg.*), V. T. Simpson, E. J. Tozer, W. E. Varnals (*actg.*), G. C. Young £350–450
Librarian, W. G. Perrin (£400–600) (acting as Civil Assistant, Air Dept.).
Deputy Librarian, J. F. Phillips (£300–400) (acting as Asst. Sec., Board of Invention and Research).

The **Admiralty Library**, consisting of some 50,000 volumes, was removed in Aug. and Sept. 1910 to more convenient apartments in the new buildings over the entrance to the Mall; and at the same time steps were taken to provide a reading-room for officers of the Royal Navy and Marines, and for naval students obtaining permission to use the library. The reading-room was officially opened by the First Lord on Sept. 20, 1911. Part I. of a subject catalogue of printed books in the Library, dealing with the Historical Section, was issued in July 1912.

ADMIRALTY WAR STAFF

Chief of the War Staff, Vice-Admiral (*actg.*) Sir Henry F. Oliver, K.C.B., M.V.O. . £1,800
Assist. to ditto, Captain Arthur de K. L. May, R.N. £700

Operations Division

Director of the Operations Division, Rear-Admiral Thomas Jackson, C.B., M.V.O., R.N. £1,500
Assist. ditto, Captain Henry W. Grant, R.N.; Lieut.-Col. Walter T. C. Jones, D.S.O., R.M.L.I. £800
Naval and Marine Staff, Captains A. G. Allgood (*ret.*), A. F. Beal, R. P. Clutton (*ret.*), C. G. S. Eeles (*ret.*), W. M. Kerr, C. D. Roper, C. Seymour, H. J. L. W. K. Willcox; Commanders R. Fitzmaurice, D.S.O., F. G. S. Peile, C. C. Dix, D.S.O., F. Bowden-Smith (*ret.*), E. V. Brooke-Webb (*ret.*), S. V. S. C. Messum (*ret.*), T. W. Stirling (*emerg.*), L. Robinson; Lieut.-Com. J. P. Gibbs . . . £530
Civil Staff, Staff Clerk, G. J. Rickman £350–500

Intelligence Division

Director of the Intelligence Division, Captain William R. Hall, C.B., R.N. £1,500
Assist. ditto, Captains Raymond A. Nugent, M.V.O., R.N., Thomas E. Wardle, R.N. £800
Naval and Marine Staff, Captain H. W. W. Hope, R.N.; Commanders Colpoys C. Walcott (*ret.*), V. R. Brandon, F. G. G. Chilton, L. D. Penfold (*ret.*), E. F. Gregory, R. Howard (*temp.*), G. C. Dickens, H. F. C. Cavendish (*emerg.*); Lord Herschell (Commdr. R.N.V.R.); Hon. W. Cozens-Hardy, K.C., Lieut.-Coms. Walter T. Bagot, J. F. Houstoun, A. W. Wood (*ret.*); Lieut. R. V. de Halpert (*ret. temp.*) (£530); Eng.-Commander Percy Wheater (£730); Major Frank V. Temple, R.M.L.I., Walter Sinclair, R.M.L.I., Captains Percy R. Heycock, R.M.A., Cecil E. S. Wright, R.M.L.I., Bernard F. Trench, R.M.L.I., J. C. Farmer, R.M.L.I., C. B. Mullins, R.M.L.I., Cuthbert E. Binns, R.M.L.I.; Lieut.-Com. H. Paget, R.N.V.R.; Lieuts. A. P. Hadow, R.N.R., A. E. Watts, R.N.V.R., F. Romer, R.N.V.R., C. P. Serocold, R.N.V.R., H. Howard, R.N.V.R.; Naval Instrs. G. V. Rayment, B.A.; Fleet Paymasters Charles J. E. Rotter, Ernest W. C. Thring, C. Betton Roberts (£530); Asst. Paymasters L. Hirst, R.N., W. H. Osman, R.N.V.R.
Civil Staff, Staff Clerks, Hugh Broadbent, W. H. Hancock £350–550

Mobilisation Division

Director of the Mobilisation Division, Rear-Admiral M. Culme-Seymour, C.B., M.V.O. £1,500
Naval Staff, Commdrs. G. Hopwood, Basil G. Washington £530
Civil Staff, Staff Clerk for Manning Duties, Robert Gordon £350–550

Trade Division

Director of the Trade Division (*acting*), Captain Richard Webb, C.B., R.N.
Assist. Director of the Trade Division (*acting*), Captain Horace W. Longden, R.N.
Naval and Marine Staff, Captains S. R. Drury-Lowe, C.M.G., W. H. D. Margesson (*ret.*), B. H. Smith (*ret.*), T. H. Foster (*ret.*), P. Walter (*ret.*); Commanders T. Fisher, A. H. Tarleton, M.V.O. (*emerg.*), Sir C. L. Cust, Bt., K.C.V.O., C.B., C.M.G., C.I.E., Maxwell H. Anderson (*act., ret.*), O. V. de Satge (*ret.*), J. Kiddle, H. W. Kenrick, R.N.R.; Lieut.-Coms. J. O. Wyatt (*ret.*), W. P. Koe (*ret.*), J. W. Pugh (*ret.*), W. Ginman, R.N.V.R., W. E. Arnold-Forster, R.N.V.R.; Lieuts H. C. Arnold-Forster (*emerg.*), W. H. Stewart, R.N.R., F. H. McCormick-Goodhart, R.N.V.R., L. McCormick-Goodhart, R.N.V.R.; Lieut.-Col. T. H. Hawkins, R.M.L.I.; Fleet-Paymasters H. W. Eldon-Manisty, C.M.G., A. R. Parker; Asst. Paymasters H. B. Tuffill, R.N.R., W. A. J. Boxford, R.N.R.
Civil Staff, Staff Clerk, J. T. Cotton (*actg.*).
Appointed for Temporary Service during the War H. S. Moss Blundell (*unp.*), Sir F. Bolton (*unp.*), E. Burns-Pye (*unp.*), Mrs. C. H. Campbell (*unp.*), H. C. Cumberbatch (*unp.*), A. H. Charteris, G. D. Hardinge-Tyler, W. E. Hargreaves (*unp.*), G. Montagu (*unp.*), Lieut. E. Maclay (Cameronians), C. Lawrence, Earl of Sandwich (*unp.*).

Signal Section

Head of Signal Section, Captain Christopher R. Payne, R.N.
Naval Staff, Commanders B. E. Reinold, E. J. Hardman-Jones; Staff-Paymaster J. E. A. Brown; Asst.-Paym. E. W. H. Travis; Warrant Writer H. Ratcliffe.

Naval Attachés, Rear-Admiral Richard P. F. Purefoy, M.V.O. (The Hague); Captains Guy R. A. Gaunt, C.M.G. (Washington), June 1, 1914; Edward H. Rymer (Tokio), Dec. 1, 1914; Montagu W. W.

* See note on preceding page.

The New HAZELL, 1917

P. Consett (Stockholm), July 27, 1912; Fitzmaurice Acton (Paris), Sept 9, 1915; D. A. H. Larking, C.M.G. (Rome), Nov. 8, 1915; E. L. D. Boyle (*emerg.*) (Rio de Janeiro), Dec. 4, 1914; A. H. Quick (Santiago), Sept. 28, 1916; Commander Harold G. Grenfell (Petrograd), April 1, 1912; Commander William F. Sells (Athens), June 26, 1915; I. A. S. Hutton (Peking), Oct. 6, 1916 . . . £982–1,165

The Naval War Staff was established by an Admiralty Memorandum dated Jan. 1, 1912, which Memorandum was reprinted as an appendix to the First Lord's Statement Explanatory of the Navy Estimates, 1912–13 [Cd. 6106]. In this document the Staff was stated to be the means of preparing and training those officers who arrive, or are likely to arrive, by the excellence of their sea service, at stations of high responsibility, for dealing with the more extended problems awaiting them there; it was to be a means of sifting, developing, and applying the results of history and experience, and of preserving them as a general stock of reasoned opinion available as an aid and guide for all who are called upon to determine, in peace or war, the naval policy of the country; and it was to be a brain, far more comprehensive than that of any single man, applied continuously to the scientific and speculative study of naval strategy and preparation.

The Chief of the Staff is a flag officer, primarily responsible to the First Sea Lord, and working under him as his principal assistant and agent. As occasion requires, he accompanies the First Lord and First Sea Lord to the Committee of Imperial Defence. He guides and co-ordinates the work of the Staff in all its branches, and under his direction frequent "Staff meetings" are held with the Directors of Divisions and other members. The Staff has three main branches, dealing respectively with war information, war plans, and war arrangements. The first named, known as the Intelligence Division, acquires the information on which action may be taken; the second, known as the Operations Division, deliberates on the facts so obtained in relation to the policy of the State, and reports thereupon, and the third, known as the Mobilisation Division, enables the final decision of the superior authority to be put into actual effect. Each of these Divisions, which are equal in status, is in charge of a Director, who is either a rear-admiral or senior captain. Each Director is ready at any moment to act for the Chief of the Staff in the latter's absence from whatever cause, and for this purpose is fully acquainted with the work of his two colleagues.

The functions of the War Staff are advisory. It has no executive authority, discharges no administrative duties, and its responsibilities end with the tendering of advice and with the accuracy of the facts on which that advice is based. Decision as to accepting or rejecting the advice of the Staff wholly or in part rests with the First Sea Lord, whose place it is, as a Commander-in-Chief of the Navy, to decide on the grand issues of naval policy and warfare. The existence of the Staff enables him to do this without being burdened with undue detail, and with every assurance that no detail has been neglected.

The original members of the War Staff were selected by the Admiralty from among officers whose qualifications were considered suitable, but in course of time membership will be limited to those officers who pass through a special "War Staff Course" at the Royal Naval War College, Portsmouth. Officers graduating in this manner constitute a specialist branch of "Staff Officers," and are eligible to receive appointments either at the Admiralty or on the staff of flag officers afloat as they become vacant. The first War Staff Course, to which twelve lieutenants of over six years' seniority and three officers of the Royal Marines were appointed, began in April 1912, and on qualifying as Staff Officers its members received appointments afloat in February 1913. Future courses are to begin about the end of February in each year.

The **Navy War Council** was established in October 1909 for the purpose of co-ordinating the arrangements made in former years for the study of naval strategy and the working out of war plans. Its functions have now to a large extent been transferred to the Naval War Staff and its Chief.

The **Intelligence Division of the War Staff** was previously known as the **Naval Intelligence Department**, and was established in February 1887 on the basis of an existing Foreign Intelligence Committee, its first director being Capt. W. H. Hall, with a total staff of 15 naval officers and civilians, which number was increased from time to time.

Similarly, the **Mobilisation Division** was known as the **Naval Mobilisation Department**. It was formed in 1909 on the nucleus of the section of the Naval Intelligence Department concerned with mobilisation duties and the preparation of war plans.

No department comparable with the **Operations Division of the War Staff** existed before the constitution of the latter in January 1912, but many of its functions were carried out by the Intelligence and Mobilisation Departments.

A separate **Trade Division** and **Signal Section** were constituted on the outbreak of war.

Hydrographic Department

Hydrographer, R.-Adm. John F. Parry, C.B. £1,500
Assist. ditto, Captain Ernest C. Hardy, R.N. £950
Director of Navigation, Capt. John A. Webster, M.V.O., R.N. . . . .
Chief Civil Assist. W. D. Barber, I.S.O. . £700
Naval Assists. Capts. Hy. P. Douglas, C. F. Oldham, C. H. C. Langdon; Coms. Bishop O. M. Davy, William T. P. Wilson (*ret.*), Harold D. Warburg (*actg.*), A. Havergal (*ret.*), R. L. Hancock, Lewis L. T. Jones; Lieut.-Coms. Charles M. Gibson, John S. Harris, Alan F. S. Grant, Archibald C. Bell, Kenneth D. W. Macpherson (*temp.*), H. L. Haslewood (*ret.*), Francis May . . . £530–600
Supt. of Charts, Comdr. John D. Nares £700–800
Supt. of Sailing Directions, Captain (*actg.*) Charles V. Smith (*ret.*). . . . .
Chief Cartographers, A. W. Codd, B.A., Alexander Gibson, B.Sc. (*temp. addl.*), F. H. Sharbau, and Hugh H. Underhill £415–500
Cartographers, J. Henry Aitken, J. W. Atherton, J. A. B. Buck, B.Sc., L. De Ville, A. Foxcroft Gibson, M.D., David Hardie (*temp. Lieut.*, R.N.V.R.), G. R. Hayes, J. M. Lee, J. E. McGegan, C. M. Meade, Harry Moody, H. H. Oakley, B.Sc., E. C. Pratt, T. J. Richmond, B.Sc., G. B. Stigant £100–400
Staff Clerks, E. H. Chapman (*actg.*), W. Lindegreen, W. E. Llewellyn . £350–450

Appointed or lent for temporary service during the War, R. W. Ashborn (*Geological Survey*), J. O. Borley, M.A. (*Bd. of Agriculture and Fisheries*), D. J. R. Edney (*Royal Observatory, Greenwich*), G. H. Fowler, B.A., Ph.D., F.L.S., and Capt. (*ret.*) C. E. Monro, R.N. (*Bd. of Trade*).

Naval Equipment Department

Director of Naval Equipment, Captain Clement Greatorex, C.B., M.V.O. . . £1,500
Assist. ditto, Capts. Henry L. Cochrane, Christopher P. Metcalfe, D.S.O. (*ret.*) (*for Salvage Work*) £950
Eng. Captain, Henry R. Teed.
Carpenter Lieut. Thomas L. Soper.
Supts. of Contract-built Ships, Captain Brian H. F. Barttelot, M.V.O., for contract work (not including Destroyers) on the Clyde; address: 3 Clyde View, Partick, Glasgow. Captain Laurence E. Power, C.B., M.V.O., for contract work (not including Destroyers) on the Tyne, Thames, Mersey, at Barrow-in-Furness, and at Sunderland; address: 4 Eslington Terrace, Jesmond, Newcastle-on-Tyne . . . . . each £1,00
Supt. of Torpedo-boat Destroyers building by Contract, Captain Cyril Asser, R.N.; address: 47 Victoria Street, S.W.
Commanders G. H. H. Holden (*ret.*), Vernon S. Rashleigh, S. B. Boyd-Richardson, F. F. Rose, D.S.O., J. H. Dathan (*ret.*), L. G. E. Crabbe, J. W. Gracey, R.N.R. (*act.*).
Lieut.-Comdr. G. M. Skinner.

The Department of the Director of Naval Equipment was created by an Official Admiralty Memorandum dated Sept. 7, 1912. It was formerly a part of the Department of the Controller (Third Sea Lord). The duties and functions of the Director were set forth in an appendix to the Memorandum as being "to advise the Third Sea Lord on all naval professional questions relating to the construction of ships whose designs have been approved by the Board, and to repairs and alterations and additions to completed ships, and to keep him informed of the progress of construction generally. He will be associated with the Director of Dockyards and with the Superintendent of Contract Work in advising on questions involving naval considerations arising out of the building, alteration, or repair of ships. He will be responsible for the supervision of the equipment and fittings of H.M. ships building by contract or in the Dockyards, visiting the vessels, and going fully into their equipment and fittings at an early stage of design. He will constantly take stock of the condition of ships, and will put forward annually a programme for additions, alterations, and repairs."

Naval Construction Department

Director of Naval Construction, E. H. Tennyson d'Eyncourt, C.B. . . . £3,000
Superintendent of Construction Accounts and Contract Work, W. H. Whiting, C.B. £1,200–1,500
Assistant Directors of Naval Construction, W. J. Berry, W. H. Gard, C.B., M.V.O., H. Pledge (*actg.*), A. E. Richards . £1,000–1,200
Superintendent of Admiralty Experimental Works, R. E. Froude, C.B., LL.D., F.R.S. £1,000
Senior Constructive Officer (re-entered for temporary service during war), J. A. Yates.
Chief Constructors, E. L. Attwood (*actg.*), S. E. Boyland (*actg.*), W. H. Carter (*actg.*), T. Dally, A. W. Johns (*actg.*), C. F. Munday (*actg.*), J. H. Narbeth, M.V.O., E. A. J. Pearce (*actg.*), P. L. Pethick . £700–850
Constructors, G. H. Ball, G. Bulkeley (*actg.*), C. I. R. Campbell (*actg.*), C. E. Goodyear, S. V. Goodall (*actg.*), C. Hannaford (*actg.*), J. C. Joughin (*actg.*), C. W. Kerridge (*actg.*), E. B. Harries (*actg.*), A. J. Hobson, W. J. Martin, T. L. Mathias (*actg.*), F. L. Mayer (*actg.*), O. A. Payne, J. Rogers, W. G. Sanders (*actg.*), C. Scott (*actg.*), A. W. Watson (*actg.*), L. Woollard (*actg.*) £450–600
Assistant Constructors, First Class, A. Adams, T. H. Bentley, C. M. Carter (Sec. to Director of Naval Const.), E. B. Charig, G. H. Child, F. Hickey, C. J. W. Hopkins, J. Innes, C. S. Lillicrap, J. McQueen, S. Payne, E. F. Spanner, A. G. W. Stantan, L. C. Williamson . . £250–450
Assistant Constructors, Second Class, F. T. Blackman, A. P. Cole, W. A. D. Forbes, R. W. L. Gawn, D. E. J. Offord, H. S. Pengelly, F. Sutcliffe, F. C. C. Rogers.
Temporary Constructor, T. B. Abell.
Temporary Assistant Constructors, A. Akester, B.Sc., J. Angus, B.Sc., C. W. Bion, B.Sc., E. L. Champness, B.Sc., F. C. Cocks, D. A. Coskery, B.Sc., W. J. Craig, J. L. Davies, D. L. Evans, B.Sc., R. Fairley, T. Graham, B.Sc., W. R. Hockaday, R. K. McMillan, M. M. Parker, G. McL. Paterson, B.A., A. P. Patterson, B.Sc., P. G. Rouse, B.A., J. H. Sowden, B.Sc., T. E. Sowden, B.Sc., F. W. Thorne, J. C. M. Wilson.
Temporary Acting Assistant Constructors, G. Chase, W. H. Eastcott, H. E. Hodge, G. Hunnisett, W. J. Laughton, P. J. Parmiter, G. Penney, A. F. Perkins, H. Philpot, F. Skeens, A. Taylor, S. F. Thorn, A. Warren, S. R. Wells, G. H. Whiteway.
Inspecting Officer of Smiths' Work, E. T. Pearson.
Surveyor (lent from Board of Trade), C. E. Rawbone.
Curator of Drawings, W. J. Moore.
Examiner of Construction Accounts, George H. Taylor.
Confidential Clerks to D.N.C., J. Luffman, S. W. R. Pippett (*actg.*).
Technical Clerk, W. H. Malpas.
Clerical Assistant to S.C.W. R. J. Wright (*actg.*).
Superintending Electrical Engineer, C. H. Wordingham . . . £1,000–1,100
Electrical Engineers, Higher Grade, A. D. Constable, William McClelland, E. T. Williams, M.I.E.E. (*actg.*) . . £500–650
Electrical Engineers, H. Melville Ackery, J. S. Beddoe (*actg.*), F. P. Fletcher (*actg.*), F. C. Forster, M.I.E.E., A. G. Newington, W. P. Scott (*actg.*) . . . £300–500
First Assistant Electrical Engineers, W. H. Chatten (*actg.*), H. H. R. Green, W. P. Scott.
Examiner of Accounts, E. E. Rogers (*actg.*).
Clerk in Charge, J. Hall.

Engineering Department

Engineer-in-Chief of the Fleet, Eng.-Vice-Admiral Sir Henry J. Oram, K.C.B., F.R.S. £1,500
Deputy Engineers-in-Chief, Eng.-Rear-Admiral G. G. Goodwin, C.B. (£850–1,000 and £200 allowance); Eng.-Rear-Admiral William J. Anstey.

Assist. dittos, Eng.-Rear-Admiral Edouard Gaudin; Eng.-Captains Francis H. Lister (lent Priority Section), C. W. J. Bearblock, E. A. Short (*ret.*, *temp.*) £850–1,000
Engineer-Inspectors, Eng.-Capts. John H. Jenkin, Arthur S. Crisp; Eng.-Commdrs. John McLaurin, David J. Carruthers, C. G. Ware, J. J. Kirwin, E. Nibbs (*actg.*), Frederick Barter, Arthur E. Hyne, L. M. Hobbs, Wm. H. Ham, Francis A. Gordon (*temp.*), J. Hamilton, James H. Sargent (*actg.*) . . *full pay and allowance of* £150
Engineer-Lieut.-Commanders, Leonard W. Curgenven, Harold A. Brown, B. W. Knott, F. J. Pedrick, G. Preece (*temp.*), J. H. Harrison, Alfred Turner, Wm. S. Mann, Stanley C. Church, E. A. Archard, W. W. Lock *full pay and allowance*
Engineer-Lieut. F. R. G. Turner.
Civilian Engineer-Observers, W. G. Gibbons, C. Grey, W. G. Mathews, W. Letty, M. Ord.
Examiners of Engineering Accounts, Edwin Gedye, W. J. Stallion . . . £350–450

Dockyards Department

Director of Dockyards and Dockyard Work, Sir James B. Marshall, K.C.B. . . £1,500
Supt. of Dockyard Branch, H. J. Webb £1,000–1,200
Manager, Constructive Dept. F. B. Ollis (*tempy., for special service*).
Chief Constructors, G. M. Apsey (*temp.*), E. R. Bate (*addl.*), C. H. Croxford (*actg. temp.*) £600–800
Constructors, F. G. Bryant, G. F. Ludford, H. B. Wood, W. T. Davis (*temp.*) £450–600 *and allowance*
For Special Service, Eng.-Rear-Admirals R. Mayston, C.B., (*ret.*, *temp.*); C. Rudd (*ret.*, *temp.*) . . . . .
Engineer Assist. to Director of Dockyards, Eng.-Captain John W. Ham . £850–1,000
Engineer Assists. Eng.-Commander Samuel P. Ferguson (*full pay and allowance*); E. R. Langmaid . . . £400–600
Examiners of Dockyard Work, T. H. Harries E. A. Lakey, J. D. Gibby (*actg.*), J. Ellis, W. L. Coles, O. Henwood, F. J. Fletcher, J. A. Fage, F. Sanders . £350–500
Clerical Assists. C. W. Loveridge, G. C. Stanbury (*actg.*) . . . £350–450
Visiting Inspectors of Timber, W. H. Hooper, Alfred James . . £350–450

Dockyard Expense Accounts Department

Inspector of Dockyard Expense Accounts, W. G. Roff, I.S.O. £850–1,000
Assist. to ditto, J. Ryan . . . £600–800
Expense Accounts Officer, F. W. W. Burrell £350–500
Deputy ditto, G. T. Jones.
Assist. ditto, T. Platt, Thomas Jennings, J. A. Jeffery, F. Hall.

Naval Store Department

Director of Stores, M. M. Waller £1,000–1,200
Assist. dittos, G. H. Ashdown, I.S.O., G. M. Discombe (*actg.*), R. J. Hall, H. Simmins (*actg.*) £800–900
Superintending Clerks, J. H. Aitken, A. E. Cocks, O. S. Griffiths (*actg.*), A. C. Hearn (*actg.*), F. Weston (*actg.*), B. J. Wilson £600–800
Deputy Store Officers, G. Carter (*actg.*), J. T. Hayton (*actg.*), J. H. Hearn (*actg.*), J. C. Kell, M. Kissane (*actg.*), W. F. Mitchell (*actg.*), F. Montgomery (*actg.*), F. M. Palmer, W. H. L. Roberts (*actg.*), W. B. Stantan (*addl.*), A. H. J. Watson (*actg.*), H. S. Webb (*actg.*) . . . £350–500
Assist. dittos, S. G. Beare, M. G. Gill, C. B. Hains, E. Lander, A. Paterson, G. A. Phillips, J. F. R. V. Russell, A. R. Straw (*actg.*), J. F. Swindells, W. B. Taylor, E. J. Tunnicliffe . . £100–350
Technical Assist. R. Murray, M.V.O. £350–600
Chief Examiners, W. H. Hayden, W. Riggs, C. H. G. Wilkinson £350–500
Examiners, R. H. Bennett, G. Day, W. J. S. Newbury, Lieut.-Com. W. H. Blake (*ret.*), Lieut. Anthony H. Goatley, R.N., Lieut. H. Tyner, R.N.V.R. . . £250–350
Assist. dittos, F. J. Dalrymple, G. W. Matthews, T. W. Thompson (*actg.*), J. Wilkins (*actg.*), F. W. Pearn, H. Puddey, E. T. Williams £200–250

Compass Branch

(47 Victoria Street, S.W.)

Supt. of Compasses, Captain Frank O. Creagh-Osborne, R.N. (*ret.*) . . . £700
Assist. ditto, Commdr. Stanley B. Norfolk £550
Assist. to ditto, Lieut-Commanders Geoffrey B. Harrison, Archibald C. Cole (*ret.*), G. R. C. Campbell £430
Compass Examiners, (at Deptford) Chief Boatswain George H. Alexander, Warrant Electrician J. Berry; (at Glasgow) R. W. Wrigley, B.A. (*temp.*).

Naval Ordnance Department

Director of Naval Ordnance and Torpedoes, Rear-Admiral Morgan Singer, C.B. . £1,500
Assist. Director of Torpedoes, Captain Philip W. Dumas, C.V.O., C.B., R.N. . £950
Assist. Director of Naval Ordnance, Captain Herbert R. Norbury, R.N. . . . £800
Assists. to Director of Naval Ordnance and Torpedoes, Commdrs. Chas. A. Scott, F. E. E. G. Schreiber, E. O. Cochrane, J. S. C. Salmond, M. K. Grant (*ret.*), I. W. Gibson, M.V.O., B. W. M. Fairbairn, A. Gilbert (*actg.*, *tempy.*), G. B. Riley (*actg.*, *temp.*, *ret.*), C. C. Sherman (*actg.*, *temp.*, *ret.*), J. G. Henderson, R.N.V.R., Lt.-Commdr. K. B. M. Churchill (*full pay and allowance*), Lieuts. (R.N.V.R.) W. D. Kilroy, H. O. Mock (*temp.*), Walter R. Gilbert, Sub-Lieut. W. H. J. Elridge, R.N.V.R.
Engineer-Inspectors, Eng.-Rear-Admiral Ernest F. Ellis, C.B., Eng.-Captain Thomas Thorne (*temp.*), Eng.-Commanders Henry Wall, Edward O. Hefford, Wm. Hart, A. R. Kempt, Eng.-Lieut.-Commander Frederick L. Robertson (*full pay and allowance*).
Chief Inspector of Naval Ordnance, Commdr. (*actg.*) John A. Duncan, C.B. . . £950
Assists. to ditto, Commanders Digby St. A. P. Weston (*ret.*), Henry G. R. Bevan (*ret.*); Leslie J. L. Hammond (*ret.*), Captain F. C. N. Bishop, R.M.A. . £550–700
Inspector of Steel, Commander Harold G. Jackson (*ret.*).
Assistant Inspectors of Steel, Admiral (*ret.*) Sir Edmund S. Poe, G.C.V.O., K.C.B.; Maj.-Gen. R. Wace, C.B. (*temp.*); Captains W. V. Anson, R.N. (*ret.*), H. R. Evans, R.N. (*ret.*), William H. M. Daniell, R.N. (*ret.*), Claude W. M. Plenderbeath, R.N. (*ret.*); Commanders Henry Thompson (*ret.*), Charles K. McCallum (*ret.*), John E. Bray (*ret.*),

T. S. Gooch (*emerg.*), A. H. Tremayne (*ret.*), R. C. Brenton (*temp.*), W. F. Caborne, C.B., R.N.R. (*ret.*); Lieut.-Coms. Arthur W. Tomlinson, Frank R. Willis, Hugh J. Orr (*ret.*), Llewellyn E. H. Llewellyn (*ret.*), John G. M. McHardy (*ret.*), Albert D. Grant (*ret.*), Robert F. Veasey (*ret.*), Alister W. McDonald (*ret.*), Ralph B. Bodilly (*ret.*), William H. Callwell (*ret.*), Henry L. Cheston (*emerg., act.*), Frederick J. Davis, R.D., R.N.R. (*ret.*), W. E. Compton (*ret.*), W. G. H. Cree (*ret.*), H. J. G. Lawrence (*ret.*), J. H. C. Ogilvy (*ret.*); Lieuts. Henry S. H. Ellis (*ret.*), Robert J. Sweet, R.N.R. (*ret.*), Beauchamp H. Venner (*ret.*); Colonel J. R. J. Jocelyn, R.A. (*ret., temp.*); Lieut.-Cols. T. English, R.E. (*ret., temp.*), G. Mackinlay, R.A. (*ret. temp.*); R. L. Haines (*ret. temp.*); Majors William S. Poë, R.M.A., Charles A. Bishop, R.M.A., Captain G. B. Macpherson Grant (*temp.*).

For temporary service during the War, H. B. Halls, C. J. Hill, A. E. Lee, L. T. Jarvis, J. W. Capstick, C. E. Moss, W. R. C. Hockin, R. Carey-Brenton, T. W. Sheppard, J. L. Capes, H. Jackson, A. McPherson, and P. R. Coursey.

Lent from Home Office, H. Topham, S. R. Bennett, A. C. Lowe, G. C. Sumner, E. L. Mecklin, C. F. Hunter, W. H. Mead, W. Turner, F. Bowen, A. A. Hepburn, C. H. Taylor, C. E. Plumbe, F. W. Cockshott, A. Fotheringham, L. D. Hooper, H. T. Ringdove, and W. C. Evans.

Under War Office, Lieut.-Com. John A. L. Hay, Lieut.-Com. Archibald C. Goolden (*ret.*), Captain Nathaniel F. Trotman, R.M.A.

Superintending Clerk, T. G. Anderson £550–700

Deputy ditto, W. P. Daniels (*actg.*)

Assist ditos, F. Morrison, S. W. Smith (*actg.*), G. Stevens (*actg.*).

Supt. of Ordnance Stores, Capt. Barrington H. Chevallier, R.N. (*ret.*) . £1,000–1,200

Assist. ditto, H. Fathers, F. Ward (*actg.*), G. E. Woodward (*actg.*) . . £800–900

Superintending Clerk, A. McFarlane (*actg.*) £550–700

Naval Ordnance Store Officer, W. A. Mortimer (*actg.*) £550–700

Deputy Ordnance Store Officers, T. W. Midmer, N. Thomas, W. H. Rowe, W. Vaughan £350–500

Assist. Ordnance Store Officers, J. A. W. Ballard (*actg.*), G. C. Cusens (*actg.*), W. E. Eyles (*actg.*), C. H. Murray (*actg.*), A. T. Reed (*actg.*), G. Swift (Sheffield).

Chief Analyst, Sheffield, John C. W. Humfrey.

Ordnance Committee

(Ministry of Munitions)

President, Major-General J. P. Du Cane, K.C.B.

Chairman, Brigadier-General W. St. C. Bland.

Members, Captains Cuthbert E. Hunter, R.N., Ronald A. Hopwood, R.N.; Col. N. B. Heffernan; Lt.-Cols. M. S. Campbell, O.B.E., R.A. (Ordnance Consulting Officer for India) (*ex-officio*), Cecil A. F. Osmaston, C.B., R.M.A. M. A. C. Crowe, R.A., C. H. Liveing, D.S.O., R.A., C. W. Scott, D.S.O., R.A., R. A. Craig, R.A. (Superintendent of Research) (*ex-officio*), C. C. Nott, D.S.O., R.A.; Majors J. T. Dreyer, D.S.O., R.A., R. A. Thomas, R.A.

Associate Members, Brigadier-Generals W. C. Savile, D.S.O., F. F. Minchin; Cols. H. E. F. Goold-Adams, C.M.G., H. C. L. Holden (*ret.*), K.C.B., F.R.S., Sir F. L. Nathan; Lt.-Col. A. W. Crossley, F.R.S.; Sir A. B. W. Kennedy, Kt., F.R.S., LL.D., Prof. F. W. Harbord, F.I.C., Assoc.R.S.M., Sir A. G. Greenhill, Kt., M.A., F.R.S., Horace Darwin, F.R.S., G. H. West, Dr. R. Robertson, M.A., F.I.C., Dr. T. M. Lowry, F.R.S., Prof. J. Thorpe, F.R.S., Dr. R. T. Glazebrook, C.B., F.R.S.

Secretary, Major E. Tinker, *ret. pay* (*Res. of Off.*)

Naval Sec. Lt.-Comdr. Ivor F. Chichester (*ret.*).

3rd Secretary, Captain W. E. Manley, R.A.

Air Department

Director of Air Services, Rear-Adm. Charles L. Vaughan-Lee.

Civil Assistant, William G. Perrin.

Private Sec. Paymaster (*actg.*) G. H. Thomson.

Supt. of Aircraft Constructions, Commodore Murray F. Sueter, C.B.

Naval Assistant, Capt. A. V. Vyvyan, D.S.O.

Asst. Supts. of Aircraft Construction, Captains D. T. Norris; A. J. Davies; Wing-Commander R. M. Clark-Hall.

Asst. Supt. of Engines, Wing-Commander (E.) W. Briggs.

Personnel Captain, Captain H. Edwards, D.S.O.

Inspecting Captain of Air Training, Wing-Commander H. D. Briggs.

Captain, Lord Dunboyne.

Military Liaison Officer, Lieut. J. B. Pike.

Wing Commanders, J. L. Forbes, J. W. Seddon, R. C. S. Hunt, C. R. J. Randall, H. L. Woodcock.

Squadron Commanders, P. F. M. Fellowes, J. N. Fletcher, J. D. Mackworth, C. H. K. Edmonds, D.S.O., D. H. Hyde-Thomson, H. A. Williamson.

Flight Commanders, H. A. Michell, J. W. K. Allsop, R. C. M. Pink, J. Bird (*actg.*), S. V. Sippe, D.S.O.

Eng.-Commdr. F. Ranken.

Engineer Lieutenant, R. Stansmore, W. A. C. Sandford-Thompson.

Flight Lieutenants, F. A. Brock, W. A. Burns, E. V. Sassoon, L. H. Hardstaff, G. W. Cranfield, L. J. Killmayer, W. C. Michie, A. O. French-Brewster, E. J. C. Roberts, F. H. Williams, C. F. Rasmusen, M. E. A. Wright.

Flight Sub.-Lieut. D. W. Gray.

Warrant Officer (*1st grade*), F. W. Scarff.

Warrant Officers (*2nd grade*), J. V. Collins, H. G. Cooper, J. Ormsby, W. G. J. Wardle, L. C. Abbott, W. N. Formby, J. S. Matthias, W. T. Curtiss, C. Layzell-Apps, C. Y. Mitchell, J. H. Hobbs, C. F. Hammond.

Lieut.-Commanders, R.N.V.R. Lord Erskine, F. C. H. Sinclair, G. Holmes.

Lieutenants, R.N.V.R. C. R. Abbott, M. H. P. Allen, C. R. Andrews, J. Arthur, T. M. Barlow, T. B. Barrington, W. O. Bentley, R. B. Berkley, A. L. Bligh, T. S. R. Blunt, W. A. Bristow, J. S. Buchanan, F. A. Bumpus, A. C. Burgoine, G. Caird, J. D. Carmichael, E. Childers, E. H. Cockshott, J. Craig, J. G. T. Crawford, J. G. Currie, J. K. Curwen, C. R. D'Arcy, S. C. H. Davis, H. Dodd, A. T. Evans, J. P. Elsden, A. W. Farrer, S. Flower, J. M. Fraser, A. S. Gendle, R. S. Goddard, W. N. Goldsmith, W. C. Grant, J. E. A. Greatorex, B. T. Hamilton, H. A. Hetherington, R. W. Hogarth, E. Hogg, T. C. B. Hooke, W. H. Horden, E. C. Horsley, A. J. Hurst, D. C. M. Hume, A. G. Ionides, C. F. Jenkin, C. Kent, A. Landells, H. B. Leach, W. A. Lawrence, A. R. Low, W. O. Manning, W. L. Marsh, G. McAlpine, G. H. Millar, T. A. Monckton, S. R. Mullard, C. J. Murfitt, T. F. Norbury, T. L. Oliver, T. A. Parker, F. E. Pollard, W. J. Polybank, O. H. Powell, L. S. M. Pyke, G. M. T. Rees, A. Robertson, F. E. Rogers, E. S. Saunders, K. Secretan, R. G. Shire

A. F. H. Smallpiece, C. E. Stent, C. A. W. Taylor, S. M. Udale, J. B. Vernon, A. K. Toulmin-Smith, H. N. Warburton, F. Webb, A. H. White, W. S. Whitelaw, F. C. Williams, H. E. Wimperis.

Sub-lieutenants, R.N.V.R., J. G. M. Bevan, E. C. Blake, J. B. Bourke, E. Butt, C. A. Crow, H. I. Dear, H. Eves, R. D. N. Gillmore, J. D. Greenwood, A. R. Griggs, E. H. Haworth, G. Hazelton, H. J. M. Molyneux, R. M. N. Perks, A. P. Reed, N. Sladden, B. Thomson, T. M. Wilson, N. H. Wood.

Civil Staff: Deputy Superintending Clerk, E. W. Griffin.

Inspector of Aircraft Armament, R. D. Dow.

2 Minor Staff Clerks (*act.*), 4 Second Division Clerks (2 *serving with Army*), 3 Assistant Clerks (1 *serving with Army*), 1 Extra Clerk, 1st Class, 1 Tempy. Accountant Clerk, 1st Class, 2 Asst. Inspectors of Aircraft Armament, 31 Temporary Clerks, Improvers; 3 Temporary Women Clerks, Higher Grade, 73 Temporary Women Clerks, 7 Boy Clerks.

Civilian Technical Assistant, Harris Booth.

Asst. Technical Advisers, H. Bolas (*temp.*), A. J. S. Pippard, F. E. Cowlin; 9 Draughtsmen.

THE ROYAL MARINES

This corps is a military body especially organised and trained for service in the fleet as well as on shore. It constitutes an important part of the naval forces of the country, and is supported by funds taken in Naval Votes. Its motto, "Per mare, per terram," aptly describes the nature of its duties. The Royal Marines are **divided into two corps**—the **Royal Marine Artillery** (Blue Marines) and the **Royal Marine Light Infantry** (Red Marines). The former have their headquarters at Eastney, near Portsmouth; the latter at Chatham, Forton (near Gosport), and Plymouth. There is also at Walmer, near Deal, a **recruit depot**, where all newly raised men for both branches are sent to receive preliminary instruction. The Royal Marines are recruited under the long-service system, and there is never any lack of applicants to this *corps d'élite*. The **recruiting office for London** is at 22, Spring Gardens; but men are also entered at Bristol, Birmingham, Cambridge, Derby, Edinburgh, Exeter, Gloucester, Hull, Greenock, Liverpool, Reading, Salisbury, Taunton, and Wakefield. As a rule, one-half of the force is embarked for duty in his Majesty's ships, the remainder being at headquarters, revising drills, recruits, etc.

Royal Marine Headquarters

35 Spring Gardens, S.W.

Adjutant-General, General Sir William C. Nicholls, K.C.B. £1,500

Asst. ditto, Lieut-Col. Herbert E. Blumberg £800

Assist. dittos, E. S. Croft (*actg.*), T. D. James, Wm. Sanger (*actg.*), W. S. Sarel, Frank Storr £850–1,000

Superintending Clerks, H. Bilcliffe (*actg.*), W. H. Boar, C. M. Bruce, A. H. Bryning (*actg.*), A. C. Comyns (*actg.*), Alexander Cunnison, A. Douglas, J. E. Drake (*actg.*), J. H. Fry (*actg.*), F. G. Gordon, C. Richards Lee, L. V. Meadowcroft, Wilfrid Medd, Ernest Nicks, Arthur Northwood, F. G. Nutt, H. Francome Painter, F. W. Papworth (*actg.*), Frank Porter, J. A. Smith (*actg.*), C. J. Southgate (*actg.*), A. E. Tippen (*actg.*), Geo. Warren (*actg.*), A. E. Watling (*actg.*), S. R. Young (*actg.*) £550–700

Paymaster of Contingencies, Fleet-Paymaster Hugh S. Hall, R.N. . . £350–500

Deputy Accounts Officers, H. B. Bain (*actg.*), J. E. Barber, E. A. O. Barnes (*actg.*), S. T. Blackwell, W. R. V. Brade, W. E. G. Bloxham, J. R. Cole (*actg.*), A. H. Coombe, L. A. Costello (*actg.*), G. H. Court (*actg.*), George Davis, C. M. Dodwell (*actg.*), William Doig, H. Eborall (*actg.*), C. J. Edwards, F. J. Fisher (*actg.*), G. E. Foot (*serving in R.N.D. Hon. Fleet Paym., R.N.V.R.*), A. H. M. Fox, W. R. P. Gant, W. Greenwood, F. Gudridge (*actg.*), E. F. Hall (*actg.*), W. O. Hawes (*actg.*), W. J. Hean (*actg.*), C. E. Horsey (*actg.*), R. M. Houston, Arthur Kerry (*actg.*), L. E. Lawson (*actg.*), W. A. Mackay (*actg.*), R. McGregor, R. P. Michell (*actg.*), W. H. Nichols, S. J. Partridge (*actg.*), H. G. Pearce (*actg.*), R. G. Peirce (*actg.*), A. Phillips, G. R. Pocock (*actg.*), G. J. Prentice (*actg.*), C. E. Ries (*actg.*), W. H. Robertson (*actg.*), T. C. Rollin (*actg.*), Fredk. Roome (*actg.*), E. R. Rowland (*actg.*), W. H. Saunders (*actg.*), A. G. Smith, Charles Taylor, F. T. Thomas (*actg.*), L. F. Thorne (*actg.*) . . £350–500

Assist. dittos, H. G. Andrews, D. J. Barton (*actg.*), E. T. McO. Beamish (*actg.*), C. Birch, J. E. Bishop, V. T. T. Brennan, W. T. Browne, W. L. Cadman, C. G. Caines, N. Cairn-Duff, W. B. Callow, James Carter, H. B. Chappell, Arthur Culley, D. H. Davies, J. E. Davies, N. C. Dawson, A. N. Deane, G. J. Dear, H. T. Eastoe, D. F. Evans, W. P. Evans, D. F. Fahy, J. N. Furnell, W. J. S. Greenland, Philip Grose, J. Hancock, S. A. Hart, T. H. Hart, Gerald Haworth, H. Heath, R. M. Hickey (*actg.*), F. R. Hooker, G. F. C. Hopewell, B. W. Horswell, J. James, T. C. John, S. F. Lane, Thos. A. Lane, W. F. Langford, E. W. Lanham, W. C. H. Mann, J. D. Morris, J. E. Mullan, F. W. Osborne, H. Osborne (*actg.*), S. A. H. Patterson, F. W. Pearson, E. H. Pelling, F. H. J. Podger, A. D. Pole, C. J. Price, Leonard Pughe, H. W. Pugsley, A. C. Ridlington, Max Robinovitch, James Roffway, R. C. Rootes, E. A. Rudd, G. H. Schafer, Frank Severs, W. H. F. Shipley, George Sibley, S. G. Smith, Arthur Sowry, W. G. Spear, E. C. F. Stannard, C. R. Stenner, J. P. Sykes, N. L. S. Walkley, G. W. Wall, H. T. West, R. H. Westlake, M. W. White, R. C. F. Woods, H. J. Wright, G. C. Young.

Private Sec. to Sir Alfred Eyles, W. G. Spear.

Clerks to Commissioners of Income Tax, W. R. V. Brade and A. G. Smith.

Re-entered for temp. service during the War, R. U. Falkus, I.S.O. (*Keeper of Stationery and Printing, ret.*).

Appointed or lent for temp. service during War, 72, including 12 from National Insurance Audit Department and 44 Railway Clearing House Clerks.

The Finance Committee

The secretariat of the Admiralty is divided into two sections, the executive and the financial.

The first-named section is under the direction of the **Permanent Secretary** of the Admiralty, who acts as mouthpiece of the Board. The **Financial Secretary,** being a Minister of the Crown, vacates office with the Administration of which he is a member. The **Accountant-General** of the Navy, who is a permanent financial officer of the Admiralty, fills the position of Assistant Financial Secretary. By a Memorandum of the First Lord of the Admiralty, dated Sept. 7, 1912, it was decided to establish on a more formal and responsible basis the Finance Committee which had been temporarily set up by Lord Selborne in 1904, this being considered the most efficient method of maintaining proper financial control over the expanding business of the Admiralty. The officials appointed members of the Committee were the Financial Secretary (as President), the Additional Civil Lord, the Secretary or Assistant Secretary of the Admiralty, the Accountant-General, and the Assistant Secretary for Finance Duties, who acts as Secretary of the Committee. The functions of the Committee are to assist and advise the Financial Secretary as may be required, to review the expenditure of each department or branch, to examine any proposals for new expenditure referred to it by the First Lord or any other member of the Board and report thereon, and to consider the monthly statement prepared by the Accountant-General, and report upon the progress of all Admiralty expenditure. The heads of spending departments attend the Committee's meetings as may be necessary in connection with the particular business of their respective departments.

Victualling Department

Director of Victualling, J. H. Brooks, C.B. £1,000–1,200
Assist. ditto, J. W. H. Culling . . £800–900
Superintending Clerks, A. G. Adams, F. J. A. Arch, W. E. Turner . . . £550–700
Victualling Store Officers, J. M. Bailey (*actg.*), J. R. Tapp (*actg.*) . . .
Deputy Store Officers, F. I. Gelsthorpe (*detached for special duties*,) J. Jolly (*actg.*), F. C. Smith . . . £350–500
Assist. dittos, E. A. Ash (*actg.*), Herbert A. Broom, E. J. Gill, T. Hewson, Herbert F. Proctor £100–350
Examiner of Store Accounts, H. M. Culpin (*actg.*), W. R. Mulhern . . £250–350
Assist. dittos, J. C. Chittenden, H. J. Cock, S. H. Newman (*actg.*), W. Weeden £200–250

Transport Department

Director of Transports, Graeme Thomson (*actg.*) £1,200
Naval Assist. ditto, Capt. Hubert Stansbury, R.N. (*ret.*) £900
Technical Adviser (*actg.*), H. E. Parlett .
Transport Officers, Commanders J. T. Blake, M. H. Clarke, R.N.R.; Fleet-Paym. Wm. M. C. Beresford Whyte, C.M.G. . .
Chief Inspector of Shipping, K. P. Burgess (*actg.*) . . . . . .
Inspectors of Shipping, Carpenter-Lieut. Commanders George Hickey, R.N. (*ret.*), R. G. Withell, Charles R. Vincent, R.N.; Carpenter-Lieuts. J. E. Elstone, G. Reeves, F. H. Bevan, W. E. Darroch (*actg.*), J. W. Jack (*actg.*) . . £200–313
Assist. ditto, H. L. J. Willson, L. W. Gubbey (*actg.*) . . . . .
Civil Assist. Directors of Transports, E. J. Foley (*actg.*), R. Gear, B. A. Kemball-Cook (*actg.*), J. A. Salter (*temp.*) . £800–900
Head of Commercial Dept. Sir Percy Bates, Bt. . . . . .
Superintending Clerks, G. C. Duggan (*actg., temp.*), A. E. Faulkner (*actg.*), L. F. Goldsmid, H. W. Griffin (*actg.*), W. G. Hynard (*actg.*), D. T. Monteath (*actg., temp.*) £600–800
Deputy Transport Clerks, A. Alcorn (*actg.*), E. Bradden (*actg.*), C. G. Copus (*actg.*), D. Drysdale (*actg.*), E. P. Fielden (*actg.*), P. G. Glennie (*actg.*), J. J. Hayes, F. Mallinson (*actg.*), F. E. Parker, John Spear, Walter Youngman . . £350–500
Assist. dittos, A. J. W. Ashby, D. H. Edwards, H. C. Emmerson, Leslie C. Hills, R. I. Metcalfe, C. J. Ovey, T. G. Parsons, B. F. Picknett, F. J. Waller, C. H. Williams £100–350
Appointed or lent for temp. service during War, 52, also 10 Railway Clearing House Clerks.
Transport Advisory Committee, F. C. Gardiner, E. W. Glover, J. Groves, Sir E. Hain, R. D. Holt, M.P., T. Royden.

The **Director of Transports** is an Admiralty officer, although the responsibility for any expenditure by his department on Army Transport Service rests with the War Office, or on Indian Troop Service with the India Office. That on account of Navy Transport Service rests with the Admiralty.

Medical Department

Director-General, Surg.-Gen. Sir Arthur W. May, K.C.B., F.R.C.S., K.H.P. (with the relative rank of Vice-Admiral, May 11, 1913) £1,800
Deputy ditto, Dep.-Surg.-Gen. Daniel J. P. McNabb.
Assists. to the Director-General, Fleet-Surgeons William L. Martin, F.R.C.S.I., David W. Hewitt, M.B., F.R.C.S., John F. Hall, M.B. . . . . .
Fleet Surgeons, Morris C. Langford (*ret.*), Robert Hardie, M.D. (*ret.*), Alfred E. Weightman (*ret.*), Richard C. Munday, Robert W. G. Stewart, M.B. .
Staff Clerk in Charge, T. E. Kennedy £400–500
Staff Clerks, W. Innes, G. A. Neilson £350–450

Medical Consultative Board

President, The Medical Director-Gen. of the Navy.
Civilian Members, Sir W. Watson Cheyne, Bt., C.B., LL.D., M.B., D.Sc., F.R.C.S., F.R.S., Sir Dyce Duckworth, Bt., LL.D., M.D., F.R.C.P., Prof. W. J. R. Simpson, C.M.G., M.D., F.R.C.P., Sir John Tweedy, F.R.C.S.
Naval Member, Surg.-Gen. John J. Dennis, M.D.
Sec. Dep.-Surg.-Gen. Daniel J. P. McNabb.

Medical Examining Board

President, The Medical Director-Gen. of the Navy.
Members, James Galloway, M.D., F.R.C.P., F.R.C.S., and Sir W. P. Herringham, M.D., F.R.C.P. (Medicine); L. A. Dunn, M.S., M.B., F.R.C.S., J. Ernest Lane, F.R.C.S. (Surgery).
Sec. Dep.-Surg.-Gen. Daniel J. P. McNabb.

Department of Works

Director of Engineering and Architectural Works, T. Sims, C.B., M.I.C.E. . . £1,500
Assist. Directors of Works, W. J. Clarke, M.I.C.E., F. W. Kite, M.I.C.E. £1,000–1,200

Superintending Civil Engineers, T. C. Agutter, A.R.I.B.A. (*actg.*) (Chatham); E. A. W. Barnard, M.I.C.E. (London); T. C. Hunter, M.I.C.E. (London); E. M. Barton (Perth); C. H. Colson, M.I.C.E. (lent for duty under Greek Government); G. P. Hayes, B.A., B.E., M.I.C.E. (Devonport); J. B. Hunt, M.I.C.E. (Portsmouth); H. E. Oakley, M.I.C.E. (London); H. C. Reid, M.I.C.E. (Rosyth); A. D. Shortridge (Dover); J. R. Sivess, M.I.C.E. (*actg.*) (Malta); E. Wakeford, M.I.C.E. (Gibraltar) £750–950

Civil Engineers, A. L. Anderson, M.I.C.E., A.M.I. Mech.E. (Hong-Kong); H. W. Basden-Smith (Chatham); C. H. Cole, A.M.I.C.E. (Blandford); W. H. Moorby, M.Sc., A.M.I.C.E. (Chatham); A. L. Bell, B.A., B.E., M.I.C.E. (Rosyth); F. Clark, A.M.I.C.E. (London); T. B. Hunter, M.I.C.E. (Rosyth); G. S. Jacob (Rosyth); R. J. Mules (Rosyth); A. L. Perfect (Greenwich); H. M. Setchell (Perth); G. H. M. Trew, A.M.I.C.E., A.R.I.B.A. (Perth); H. A. Brain, A.M.I.C.E. (Howden); F. G. Brighton, A.M.I.C.E. (Dover); S. D. Carothers, A.M.I.C.E. (Portsmouth); R. E. Clarke, A.M.I.C.E. (Portsmouth); A. J. Luke (Portsmouth); O. A. G. St. John-Kneller, A.M.I.C.E. (Portsmouth); R. B. Simmers, A.M.I.C.E. (London); W. T. Coldicott (Cape of Good Hope); H. D. Dormor, A.M.I.C.E. (London); F. H. Grose (Sheerness); G. P. Heney, A.M.I.C.E. (Devonport); D. G. Taylor, B.Sc., A.M.I.C.E. (Rosyth); J. C. Malim, A.M.I.C.E. (*actg.*) (Humber); A. E. Marrian, A.M.I.C.E., A.M.I.Mech.E. (London); E. M. Moon, A.M.I.C.E. (Rosyth); F. R. Oglesby (London); H. J. Young, A.M.I.C.E. (Perth); D. J. Morgan (London); R. F. M. Pearson, A.M.I.C.E. (lent for duty under Greek Government); W. O. Pellowe (*ret.*) (Devonport); A. A. Williamson, A.M.I.C.E. (Malta); W. Young (Haulbowline); H. F. Bowen, A.M.I.C.E. (*actg.*) (Pembroke).

Assist. dittos, J. F. Ardron (Gibraltar), R. C. Bristow, O. B. Rattenbury, B.Sc., A.M.I.C.E., T. M. Salmond, A.M.I.C.E., F. Shirley, A.M.I.C.E., A.M.I.Mech.E., F. E. Whittle, A.M.I.C.E. (Rosyth); H. Sinclair, A.M.I.C.E. (Cranwell).

Temporary Civil Engineers, 2.

Temp. Asst. Civil Engineers, 20.

Chief Surveyor, P. P. Caldecott Smith, F.S.I. (London) £800–1,000

Surveyors, M. J. James, F.S.I. (London); J. A. Jones, F.S.I. (Dover); H. H. Skipper, F.S.I., J. L. Westland (London); E. J. Baker, F.S.I. (Rosyth); F. C. Leest, F.S.I. (Rosyth); F. H. Goadby, F.S.I., A.M.I.C.E. (Chatham); A. B. Holmes (Portsmouth); H. T. Matthews (Devonport); T. Parker, F.S.I. (London) £400–600

Assist. dittos, A. J. Allnutt (London); G. D. Callow (Howden); F. J. Cole, F.S.I. (London); E. W. Huson, F.S.I. (Cranwell); Leland Long, F.S.I. (Hong Kong); E. Thomas (Portsmouth); H. K. Blyth, F.A.S.I. (Gibraltar); B. F. Dyke (Rosyth); P. J. Lucas (Perth); G. Hughes, F.S.I. (Devonport); J. Power, B.A. (Cape); H. E. Stevens (London); H. Young (Malta).

Temporary ditto, A. W. Thomas, F.A.S.I. (London).

Established Accountant Clerk (at present in lieu of Asst.-Surveyor), R. D. Davis (Portland).

Clerk in charge of Registry, J. M. Mallett.

Surveyor of Lands, J. W. Stone (London).

First Assist. to ditto, C. L. Fielder.

Second Assist. to ditto, H. F. Graham.

The Works Department of the Admiralty is presided over by civil engineers, its supervision resting with the Civil Lord. The Department is concerned with the architectural and engineering works of the Navy ashore, such as docks, fortifications, and other Admiralty establishments, including coastguard buildings, both at home and abroad. There are three branches, the Engineering, Surveyors', and Lands and Coastguard Branch, the first-named being the most important.

Contract and Purchase Department

Director of Navy Contracts, Sir Frederick W. Black, Kt., C.B. £1,400

Assist. Directors of Contracts, J. R. Brotherton (*actg.*), G. B. Cobb (*actg.*), W. St. D. Jenkins, P. Minter, H. Morris (*actg.*), C. A. Oliver, A. W. Smallwood . £800–1,000

Superintending Clerks, J. C. Clarke, P. Dale Bussell (*actg.*), F. F. Fisher (*actg.*), G. W. Hall (*actg.*), E. C. Jubb (*actg.*), W. H. Judson (*actg.*), R. W. Wilson (*actg.*) £600–800

Contract Officers, H. J. Allen, E. S. Bayliss (*actg.*), C. A. Beard (*actg.*), W. Ferriman, W. G. Kynvin (*actg.*), H. G. Law (*actg.*), W. Mackay (*actg.*), H. W. Pillow, R. F. Roberston (*actg.*), P. D. Sykes (*actg.*), F. H. Taylor (*actg.*), F. G. Young (*actg.*) £350–500

Staff Clerk, A. H. Purchase . . . .

Assist. Contract Officers, E. L. Bragg, H. F. Fitch, G. W. Lowe, C. R. Marriott, E. G. Neate, C. R. Ogle (*actg.*), B. F. Poole, S. Stanes £100–350

Examiners, H. Ford (*actg.*), J. E. Isaac (*actg.*), R. T. Jacoby, E. L. Micklewright (*actg.*), W. C. Ramage (*actg.*), A. H. Rose (*actg.*), R. W. Sheppard, F. H. Storey, W. R. Torkington (*actg.*) £250–350

Assistant Examiners, F. S. Back (*actg.*), C. W. Bailey, E. G. Baker (*actg.*), G. Biggs (*actg.*), W. H. Brand (*actg.*), G. E. Brooks (*actg.*), J. H. Cave (*actg.*), A. Daston (*actg.*), A. V. Friche (*actg.*), Jas. Hall (*actg.*), G. Haly (*actg.*), A. H. Harris (*actg.*), H. D. James, C. W. Kirk (*actg.*), H. L. Lindsay (*actg.*), T. G. May (*actg.*), P. Nunan (*actg.*), H. Olford, S. F. Pillow (*actg.*), J. A. Stansfield (*actg.*), W. H. Taylor (*actg.*), E. E. van den Broek (*actg.*).

Chief Inspector of Coal, Eng.-Capt. John Jones (*ret.*), South Wales.

Inspector of Coal, Eng.-Capt. George A. Haggarty (*ret.*), Newcastle.

Senior Visiting Inspector, W. H. Strickland £300–650

Visiting Inspectors, E. Ludford and J. A. Stockwell, M.I.N.A., Lieut-Com. W. J. Thompson (*ret.*, *temp.*), A. Lawrence, B.Sc. (*temp.*) £300–550

Railway Transport Officer, Lieut. H. F. Whitworth, R.N.V.R.

The Admiralty Pattern Rooms in London are at Queen Anne's Chambers, Broadway, Westminster, S.W., and those at Birmingham are at Great Western Chambers, Livery Street.

Priority Section

Director, Vice-Admiral Arthur Y. Moggridge.
Assistant Director (Naval), Eng.-Captain F. H. Lister, R.N.
Assistant Director (Civil), M. F. Gauntlett, Esq., C.I.E., I.C.S. (*temp. lent from India Office*), Lieut.-Com. Sir Edward G. Chichester, Bt. (*ret.*).
Assistant Examiner, 1st *Grade* (*act.*), C. W. Bailey (*lent from Contract Department*).
Lent for temporary service during the War, J. T. Gwynn, I.C.S.; C. H. B. Kendall, I.C.S. (*India Office*); G. B. Sansom (*Foreign Office*); James Scott, C.I.E.

Greenwich Hospital Department

23 Carlton House Terrace, S.W.

Director of Greenwich Hospital, C. H. R. Stansfield, C.B. £1,000–1,200
Clerk in Charge, A. A. Rutter . . . £550–700
Assist. to ditto, L. Stacey. . . . £250–400
Accountant, A. W. J. Davies . . . £250–350
Solicitor for business of Greenwich Hospital, James Gray.
Receiver and Agent for the Greenwich Estate, Hon. Capt. W. Warburton, R.E.
Receiver and Agent for the Northern Estates, James J. Stokes.

Chaplain of the Fleet

Office: Royal Naval College, Greenwich

The Ven. Archdeacon Hugh Singleton Wood, D.D. (Chaplain in Ordinary to the King) £1,000
Staff Clerk, John Hooper . . . £350–450

Naval Education Office

Royal Naval College, Greenwich

Director of Naval Education, Sir J. Alfred Ewing, K.C.B., LL.D., F.R.S., D.Sc. (*act. temp.*) £2,500
Deputy Superintendent of Naval Examinations, Naval Instructor Arthur J. Parish, C.B., M.A.
Deputy Inspector of Naval Schools, Naval Instructor Ivor Curtis, M.A., A.M.I.Mech.E.
Clerical Assist. W. M. Bussell.
Chief Schoolmasters, Richard Mountstephens, Frederick Bush

Board of Invention and Research

Victory House, Cockspur Street, S.W.

Central Committee, Admiral of the Fleet Lord Fisher of Kilverstone, Prof. Sir Joseph J. Thomson, O.M., Hon. Sir Chas. A. Parsons, K.C.B., Sir George T. Beilby, F.R.S., V.-Adm. Sir Richard H. Peirse, K.C.A
Secretariat, Commdr. (*actg.*) Cyprian D. C. Bridge, Eng.-Com. C. J. Hawkes, T. H. Hoste, Lieut. the Hon. W. J. James, R.N.V.R., Sir Richard A. S. Paget, Bt., J. F. Phillips.
Experimental Station, Prof. W. H. Bragg, F.R.S. (*Resident Director of Research*); H. Gerrard, M.Sc., F. L. Hopwood, M.Sc., J. Carlton Sutton, B.Sc., A. B. Wood, M.Sc., F. B. Young, M.Sc. (*Assistant Physicists*).

Greenwich Observatory. (See p. 685.)

Nautical Almanack Office. (See p. 224.)

Cape of Good Hope Observatory. (See p. 686.)

NAVAL ORDNANCE DEPOTS

Woolwich.—*Off -in-charge*, Lieut.-Col. C. H. Ozanne.
Portsmouth.—*Off.-in-Charge*, Lieut.-Col. W. B. Brabazon.
Plymouth.—*Off.-in-charge*, Lieut.-Col. H. M. Aplin.
Chatham.—*Off.-in-charge*, Lieut.-Col. F. G. Edyvean.
Grombie.—*Off.-in-charge*, J. Gledhill.
Gibraltar.—*Off.-in-charge*, J. J. Reeves.
Malta.—*Off.-in-charge*, G. F. Story.
Hong-Kong.—*Off.-in-charge*, S. Evans (*actg.*).

TORPEDO FACTORY AND DEPOTS

R.N. Cordite Factory.—*Supt.* Capt. A. P. H. Desborough, R.A.
Greenock Torpedo Factory.—*Supt.* Com. C. R. Acklom, C.B.; *Assist. Supt.* Lieut.-Com. T. J. Croker.
Portsmouth.—*Off.-in-charge*, Eng.-Capt. P. D. Maltby; *Store Off.* F. J. Ibbertson.
Portland.—*Off.-in-charge*, Eng.-Com. J. F. A. Hastings.
Devonport.—*Off.-in-charge*, Eng.-Com. W. W. Pearce; *Store Off.* I. J. Brooking.
Chatham.—*Off.-in-charge*, Eng.-Com. E. W. Liversidge; *Store Off.* J. P. F. Macintosh.
Gibraltar.—*Off.-in-charge*, Eng.-Lieut. Com. R. D. Cox.
Malta.—*Off.-in-charge*, Eng.-Com. Charlie Broadbent.
Hong-Kong.—*Off.-in-charge*, Eng.-Com. W. W. Reed.

ROYAL NAVAL HOSPITALS AND SICK-QUARTERS

Haslar.—*Surg.-Gen.* John J. Dennis, C.B.; *Sec.* Lieut. Wm. R. P. Hobbs, R.N.; *Chaplain*, Rev. H. Backwell, M.A.; *Head Sister*, Miss K. M. Hickley.
Plymouth.—*Surg.-Gen.* W. H. Norman, C.B.; *Sec.* Major W. S. Blackman, R.M.L.I.; *Chaplain*, Rev. James J. Smith, M.A.; *Head Sister*, Miss E. E. Harte.
Chatham.—*Surg.-Gen.* A. J. J. Johnston; *Sec* Major C. W. Slaney, R.M.L.I.; *Chaplain*, Rev. R. S. Hartley; *Head Sister*, Miss M. H. Keenan.
Portland.—*Fleet-Surg.* J. Shand; *Chaplain*, Rev. R. G. Sadleir, B.A.; *Supg. Sister*, Miss E. M. Keays.
Haulbowline.—*Fleet-Surg.* John C. Durston; *Chaplain*, Rev. Thos. Kane, B.A.
Yarmouth.—*Fleet-Surg.* Edward T. Meagher; *Chaplain*, Rev. C. Moore, M.A.
Deal (Royal Marines).—*Fleet-Surg.* Montagu L. B. Rodd, C.V.O.; *Supg. Sister*, Miss N. Courtice.
Portsmouth (Royal Marines).—*Fleet-Surg.* W. J. Colborne.
Plymouth (Royal Marines).—*Fleet-Surg.* Thos. C. Meikle.
Chatham (Royal Marines).—*Fleet-Surg.* John D. Hughes.
Osborne (Naval Cadets' S.Q.).—*Fleet-Surg.* Cecil H. Rock; *Resident Sister*, Miss R. Falconer.
Dartmouth (Naval Cadets' S.Q.).—*Fleet-Surg.* Harold Huskinson; *Chief Sister*, Miss M. Basden-Smith.
Shotley (Boys' S.Q.).—*Fleet-Surg.* Thos. D. Halahen; *Chief Sister*, Miss E. E. M. Partridge.
Queensferry S.Q.—*Fleet-Surg.* Paul H. M. Star.
Malta.—*Dep. Surg.-Gen.* J. L. Smith, M.V.O.; *Chaplain*, Rev. M. Longridge, M.A.; *Supg. Sister*, Miss Mary C. Clark.

Gibraltar.—*Dep.-Surg.-Gen.* Alexander G. Wildey ; *Chaplain*, Rev. Henry Dalzell, M.A. ; *Supp. Sister*, Miss C. C. Renwick.
Hong-Kong.—*Dep.-Surg.-Gen.* Geo. A. Dreaper ; *Chaplain*, Rev. G. M. Tichborne, B.A.
Bermuda.—*Fleet-Surg.* J. A. Keogh.
Cape of Good Hope.—*Fleet-Surg.* Arthur Gaskell.
Ascension.—*Fleet-Surg.* A. C. Rusack.
Wei-hai-Wei S.Q.—*Fleet-Surg.* R. F. Clark.

ORGANISATION

Personnel

The full total of officers and men voted for the Navy for the financial year 1915–16 was 350,000. An increase of 50,000 upon the previous maximum was provided for by a Supplementary Estimate issued on Jan. 19, 1916. Speaking in the House of Commons on Jan. 18, 1916, Dr. Macnamara, Secretary of the Admiralty, said that over 20,000 of this addition had already joined, although Parliament had not then given authority to the Admiralty ; with regard to the remainder, 30,000 or thereabouts, though they would take the power that Parliament gave them, he did not imagine they would enter them by March 31. They hoped to get them, he added, by further direct recruiting. "They joined a considerable number of boys, and there would be a steady flow of youths who reached the age of 18 who would still be able to enlist voluntarily in the Navy. They would also continue the enlistment of men under the group system for the Navy and the Royal Naval Air Service." This group system was instituted on Nov. 26, 1915, simultaneous with the canvass under the National Registration Scheme. Men were enrolled in four groups, two for single men, one up to 30 years of age, the other above 30 ; and two for married men, of the same ages. For men so enrolled, a blue armlet, with an anchor in red, was issued. On Feb. 20, 1916, in reply to a question in Parliament, Dr. Macnamara made the following statement in regard to the number of men engaged in the maintenance of the Navy :

"As regards the Navy proper, when war broke out there were about 146,000 officers, men, and boys on the active service list. To this number must be added about 67,000 reserves. By subsequent Votes of Parliament the numbers have steadily increased, and we are now authorised to work up to a maximum of 350,000 officers, men, and boys by March 31 this year, if necessary. Of that number we already bear something like 320,000." Dr. Macnamara, after saying that there were 85,000 men in the Royal Dockyards and other Naval establishments, spoke of the difficulty of giving the exact numbers working under contract or sub-contract and in all auxiliary work, and concluded : "I should say that for every man in the Navy, of whom there are, as you see, something like 300,000, there are certainly 2 persons and possibly even 3, at work on ship construction and repairing and contributing to the general maintenance and fighting efficiency of the Fleet."

Finance

In his speech on the Vote of Credit in the House of Commons on Sept. 15, 1915, Mr. Asquith, after showing that the total Army expenditure for September was estimated at £60,000,000, or £200,000 a day, said that "in the case of the Navy, the expenditure rose steadily to the end of June. Since then it has shown a decline, and on the whole we are not disposed to think the expenditure for the last six months of the year on the Navy will exceed that upon the first six months. The daily rate for the expenditure on the Navy in September is £600,000." In later ministerial statements upon the Votes of Credit, the cost of the Navy was not given separately, but there was no important difference in the rate of expenditure, it was affirmed. On Oct. 11, 1916, Mr. Asquith, introducing the fourth Vote of Credit for the financial year 1916–17, said that in the period under review Navy expenditure had been stationary.

Material

In a speech in Parliament on Nov. 27, 1914, Mr. Churchill, then First Lord of the Admiralty, said that when the war broke out the British Navy mobilised 31 Dreadnoughts and Lord Nelsons, and Germany could have had, and presumably did have, if her latest ships were ready, 21 Dreadnought battleships and battle-cruisers. "So we were," said Mr. Churchill, "a little under the 60% which we had always set before ourselves." After stating that he could not say how many ships had joined the Fleet since, he declared "that the relative strength of the Fleet is substantially greater now than it was at the outbreak of the war." In October 1915 it was revealed by correspondents who had been permitted to visit the Fleet that a new force of monitors had been built, and that a large number of small fast vessels to attack submarines were also under construction.

In introducing the Navy Estimates of 1916–17, Mr. Balfour said in the House of Commons on March 7, 1916, that "the policy of the Admiralty in its present form is directly continuous with that of our predecessors." The whole process of making ships of war had been speeded up, he said, and the shipbuilding resources of the country were being used to an absolutely unexampled extent in making ships and executing repairs for the Fleet. The First Lord referred to labour limitations, and said that "up to the limits which labour offers us we are doing all that can be done in the way of shipbuilding." Mr. Winston Churchill, in a speech on the same day, said : "The utmost energy must be employed to complete ships at the earliest possible moment. . . . If the programme entered into in the autumn of 1914 has been allowed to fall into arrears, the Navy and the Grand Fleet may find themselves deprived of securities and advantages which we deemed it indispensable they should receive. . . . The First Lord spoke of the limit of labour. There is no limit of labour where the British Navy is concerned." Referring to possible surprises from the enemy, Mr. Churchill said : "You must be ready with your new devices before the enemy is ready with his, and your resourcefulness and developments must continually proceed upon a scale which exceeds the maximum you expect from him. I find it necessary to utter this word of warning." Replying to this speech next day, Mr. Balfour said that the Admiralty had not sat down contentedly under the labour difficulty, but were doing all they could to alleviate it, if not to remedy it completely. "If the fleets," he said, "at the command of this country at this moment are not sufficient to secure national safety, then in the whole history of this country they never have been sufficient to secure national safety. . . . I will make no boast about the British Admiralty. I will not guarantee it against misfortune or accidents. But I say in perfect confidence that it is stronger in the face of any overt attack which it is likely to meet, that it is far stronger than it was at the beginning of the war, and is, I believe stronger than it has ever been in its history."

The New HAZELL, 1917

THE FLAG LIST (December 1916)

Admirals of the Fleet

Sir Arthur D. Fanshawe, G.C.B., G.C.V.O.
Sir William H. May, G.C.B., G.C.V.O.
The Hon. Sir Hedworth Meux, G.C.B., K.C.V.O., M.P.

Admirals

Sir Richard Poore, Bt., K.C.B., C.V.O.
Sir Archibald B. Milne, Bt., G.C.V.O., K.C.B.
H.S.H. Prince Louis A. of Battenberg, G.C.B., G.C.V.O., K.C.M.G.
Sir George A. Callaghan, G.C.B., G.C.V.O.
Sir Robert Lowry, K.C.B.
Sir Henry B. Jackson, K.C.B., K.C.V.O., F.R.S.
Sir John R. Jellicoe, G.C.B., O.M., G.C.V.O.
The Hon. Sir Stanley C. J. Colville, G.C.V.O., K.C.B.
Sir Charles J. Briggs, K.C.B.
Sir Frederick T. Hamilton, K.C.B., C.V.O.
Sir Cecil Burney, G.C.M.G., K.C.B.
The Hon. Sir Alexander E. Bethell, K.C.B., K.C.M.G.

Vice-Admirals

Sir Frederick E. E. Brock, K.C.M.G., C.B.
Sir Charles H. Coke, K.C.V.O.
Sir Thomas H. M. Jerram, K.C.B., K.C.M.G.
Sir Douglas A. Gamble, K.C.V.O.
Sir Frederick C. D. Sturdee, Bt., K.C.B., K.C.M.G., C.V.O.
Sir Edward E. Bradford, K.C.B., C.V.O.
Sir Edmond J. W. Slade, K.C.I.E., K.C.V.O.
Sir David Beatty, G.C.B., K.C.V.O., D.S.O.
Sir Sackville H. Carden, K.C.M.G.
Richard B. Farquhar.
Sir Lewis Bayly, K.C.B., C.V.O.
Sir George E. Patey, K.C.M.G., K.C.V.O.
Sir Arthur H. Limpus, K.C.M.G., C.B.
Sir Richard H. Peirse, K.C.B., M.V.O.
Sir Herbert G. King-Hall, K.C.B., C.V.O., D.S.O.
William L. Grant, C.B.
Henry L. Tottenham C.B.
Reginald G. O. Tupper, C.V.O., C.B.
Bernard Currey.
Ernest C. T. Troubridge, C.B., C.M.G., M.V.O.
Sir Archibald G. H. W. Moore, K.C.B., C.V.O.
Sir Charles E. Madden, K.C.B., K.C.M.G., C.V.O.
Sir Rosslyn E. Wemyss, K.C.B., C.M.G., M.V.O.

Rear-Admirals

Charles E. Anson, M.V.O.
Sir Cecil F. Thursby, K.C.M.G. (acting Vice-Admiral).
Arthur H. Christian, C.B., M.V.O.
The Hon. Sir Somerset A. Gough-Calthorpe, K.C.B., C.V.O. (acting Vice-Admiral).
Herbert L. Heath, C.B., M.V.O.
Montague E. Browning, C.B., M.V.O.
Sir John M. de Robeck, K.C.B. (acting Vice-Admiral).
Arthur W. Waymouth, C.B.
Godfrey H. B. Mundy, M.V.O.
Archibald P. Stoddart.
Sir Hugh Evan Thomas, K.C.B., M.V.O.
Stuart Nicholson, C.B., M.V.O.
Sir Dudley R. S. de Chair, K.C.B., M.V.O.
Henry H. Campbell, C.V.O.
Frederick C. T. Tudor, C.B.
Charles L. Napier, C.B.
Alexander L. Duff, C.B.
Edward F. B. Charlton, C.B.
Robert S. P. Hornby, C.M.G.
Mark E. F. Kerr, C.B., M.V.O.
John B. Eustace.
Sir William C. Pakenham, K.C.B., M.V.O.
Francis S. Miller.
Francis G. Eyre.
Trevylyan D. W. Napier, C.B., M.V.O.
Arthur C. Leveson, C.B.
Sydney R. Fremantle, M.V.O.
Sir Henry F. Oliver, K.C.B., M.V.O. (acting Vice-Admiral).
Edmund R. Pears.
Arthur D. Ricardo.
The Hon. R. F. Boyle, M.V.O.
George A. Ballard, C.B.
Morgan Singer, C.B.
Ernest F. A. Gaunt, C.B., C.M.G.
Robert J. Prendergast.
Norman Craig-Palmer, C.V.O.
Cecil F. Dampier.
Osmond De B. Brock, C.B., C.M.G.
Alfred E. A. Grant.
Edmund H. Smith.
A. Hayes-Sadler, C.S.I.
Richard F. Phillimore, C.B., M.V.O.
Charles L. Vaughan-Lee.
The Hon. Edward S. Fitzherbert.
Douglas R. L. Nicholson.
Cecil S. Hickley, M.V.O.
Sir A. J. Henniker-Hughan, Bt.
Thomas D. L. Sheppard, M.V.O.
Francis W. Kennedy, C.B.
Heathcoat S. Grant, C.B.
Thomas Jackson, C.B., M.V.O.
William E. Goodenough, C.B., M.V.O.
Michael Culme-Seymour, C.B., M.V.O.
Wm. C. M. Nicholson, C.B.
John F. Parry, C.B.
Laurence E. Power, C.B., M.V.O.

HIS MAJESTY'S DOCKYARDS

The Principal Officers

Portsmouth.—*Adm.-Supt.* Rear-Adm. A. W. Waymouth, C.B.; *Capt. of Yard and King's Harb. Mast.* Capt. E. H. Moubray; *Assist. ditto*, Com. H. C. R. Boucher; *Const. Mangr.* John Apsey; *Eng. Mangr.* Eng.-Capt. R. B. Dixon; *Supg. Civil Eng.* J. B. Hunt; *Elec. Eng.* Louis J. Steele; *Naval Store Off.* W. Bonny; *Expense Accounts*, W. G. Allen; *Cashier*, G. Egan; *Chaplain*, Rev. H. S. Wansbrough, B.A.; *Fleet-Surgs.* G. Hewlett, J. Bradley.

Devonport.—*Adm.-Supt.* Rear-Adm. G. H. B. Mundy; *Capt. of Yard and King's Harb. Mast.* Capt. John Nicholas; *Assist. ditto*, Capt. G. P. E. Hunt; *Const. Mangr.* W. T. Hockaday; *Eng. Mangr.* Eng.-Capt. W. H. James; *Supg. Civil Eng.* G. P. Hayes; *Elec. Eng.* Z. H. Kingdon; *Naval Store Off.* J. W. L. Oliver; *Expense Accounts*, T. E. Dexter; *Cashier*, A. Rollin; *Chaplain*, Rev. E. F. Harrison-Smith, M.A.; *Fleet-Surgs.* Wm. Hackett, H. E. South.

Chatham.—*Adm.-Supt.* Rear-Adm. A. D. Ricardo; *Capt. of Yard and King's Harb. Mast.* Capt. Mortimer L'E. Silver; *Assist. ditto*, Capt. W. P. Lodder; *Const. Mangr.* E. J. Maginness; *Eng. The Selection Board

The duty of the Board (which consists of the Military Members of the Army Council, the Inspector-General, and several of the General Officers Commanding-in-Chief at home) is to select officers for higher appointments, and for extra-regimental and accelerated promotion, and generally to regulate and advise upon matters relating to promotion. Selection for the highest appointments is made by the Cabinet. The Secretary of the Selection Board, who is also Military Secretary to the Secretary of State for War, is Maj.-Gen. Sir F. J. Davies, K.C.B., K.C.M.G.

THE DEFENCE FORCES OF THE DOMINIONS

Colonial Military Systems are all framed primarily for home defence, no man being liable for service outside his country. Under the scheme outlined above (**Dominions and Imperial Defence—Military**) the organisation and training of the forces is to be assimilated to the system at Home, under the direction of the Imperial General Staff by sections of that staff constituted in the Dominions.

Canada

The Royal Canadian Navy was placed under the orders of the Imperial Government at the outbreak of war. **The Director of the Naval Service** is Vice-Admiral C. E. Kingsmill, who retired from the British Navy on Sept. 12, 1908. He accepted the appointment on his promotion to Rear-Admiral in May of that year. Captain E. H. Martin, R.N. (retired), took up the post of Captain of Halifax Dockyard and in command of the Naval Cadets College in Oct. 1910. Rear-Admiral W. O. Story, a retired officer of the British Navy, offered his services to the Canadian Government when war broke out, and since Oct. 12, 1914, has been in charge of Esquimalt Dockyard and Senior Naval Officer on the West Coast of the Dominion. The Minister of the Naval Service is the Hon. John D.

Hazen, K.C., and the Deputy Minister Mr. George J. Desbarats, C.M.G. A naval recruiting campaign, under the direction of Captain the Hon. Rupert Guinness, R.N.V.R., was begun in September 1916.

A Canadian section of the Imperial General Staff has been organised in accordance with proposals of the Department of Militia and Defence (Canada), 1909. The Chief of the General Staff and First Military Member of the Militia Council is Major-Gen. C. J. Mackenzie, C.B. The Kingston Military College is likely to be developed into a staff college, associated with colleges in other parts of the Dominion.

Under the provisions of the Canadian Militia Act, 1904, every Canadian between the ages of 18 and 60 is liable to military service, but there is no compulsion. The cadet system was flourishing. The existing forces are the Permanent Force (approximating to Regulars) and the Active Militia. The Permanent Force is to be the means of instruction. **Establishment:** 3,000 men. **Active militia:** authorised establishment, 4,611 officers and 51,430 men, of whom in 1910 3,358 officers and 39,232 men trained in distinct camps or at local headquarters. The permanent force is inadequate, and owing to the great demand for labour there is difficulty in many districts in securing a sufficient number of men and getting the men to train. The proposed war strength is: officers, 5,000; rank and file, 100,000; second line, 100,000. Rifle clubs (total of nominal membership): 47,628. Cadet corps: about 18,000. These figures are subject to qualification.

Australian Commonwealth

The Royal Australian Navy is administered, under the Governor-General as Commander-in-Chief, by a Board composed as follows:

President, the Minister of State for the Navy (*ex-officio*), Senator the Hon. Jens. A. Jensen, M.P.

First Naval Member, Rear-Admiral Sir William R. Creswell, K.C.M.G. (retired lieutenant R.N.) £1,200

Second Naval Member, Captain A. Gordon Smith, R.N. £1,000

Third Naval Member, Engineer-Captain William Clarkson, C.M.G., R.A.N. . . £900

Naval Secretary, Hon. Paymaster George L. Macandie £550

Naval Representative on the Staff of the High Commissioner in London, Captain F. F. Haworth Booth, C.M.G., R.N. (retired) . £950

Assistant to Naval Representative, Capt. J. H. Trye, R.N. (retired).

Inspecting Engineer Overseer, W. H. Woolnough.

Orders are issued by the Board at Melbourne through the Naval Secretary. The Board was constituted under Sect. VII. of the Naval Defence Act of 1910, and the functions of its individual members are not unlike those of the Admiralty in England.

Vice-Admiral Sir George Edwin Patey, K.C.V.O., was nominated on March 4, 1913, to be "Rear-Admiral in command of His Majesty's Australian Fleet."

The vessels of the Commonwealth, which since the war began have been serving in the Royal Navy, are: the *Australia*, battle-cruiser; *Melbourne*, *Sydney*, *Encounter*, and *Pioneer*, light cruisers; *Cerberus*, turret-ship; *Parramatta*, *Warrego*, and *Yarra*, torpedo-boat destroyers; *Gayundah* and *Protector*, gunboats; *Tingira*, training-ship; and *Penguin*, sloop.

There were, when war was declared, under construction for the Royal Australian Navy the light cruiser *Brisbane* and the destroyers *Swan*, *Derwent*, and *Torrens*, all at the dockyard at Sydney, where their keels were laid on Feb. 1, 1913; the oil-supply ship *Kurumba*, by Messrs. Swan, Hunter & Co., at Wallsend-on-Tyne; and the *Platypus*, submarine depôt ship, by Messrs. John Brown & Co., at Clydebank. The *Brisbane* was launched on Sept. 30, 1915, and the *Derwent* and *Torrens* on Dec. 19, 1914, and Aug. 28, 1915, respectively.

With regard to the personnel, commissioned officers were at first lent by the British Admiralty, preference being given to Australians in the Royal Navy who volunteered. Ultimately, the officers will be supplied from the naval cadets who have been trained at the Naval College of Australia—a permanent building for which was opened at Jervis Bay, New South Wales, in 1915. With regard to the warrant officers, men, and boys, these have been mainly lent by the British Admiralty, but later on they will be chosen from Australians who join and are trained in the Commonwealth naval forces and its training-schools. A system of naval reserves has been organised, with Captain F. Tickell, C.M.G., as its first Director. The administration and instruction of two classes of reserves will be carried out under a special staff, with the *Protector* and *Gayundah* as seagoing training-ships. Under the compulsory training clauses of the Defence Acts, Australians are liable to training and service in the citizen defence forces (Naval or Militia) as junior cadets, aged 12 to 13, senior cadets, 14 to 17, and adults, 18 to 25.

The **Australian Defence Acts, 1909 and 1910**, amended the Acts of 1903 and 1904 and were measures having for their object to enforce **compulsory service** on all able-bodied males—cadet training from 12 to 14 (junior) and 14 to 18 (senior), and thence onward to 25 service in the Citizen Defence Force. There are to be 94 infantry battalions, 31 light horse regiments, 50 field batteries and 13 garrison artillery companies, 42 engineer units, 15 signal troops and companies, and departmental troops. The force will be provided from trained men of from 19 to 25 years of age who have passed through the previous cadet training. Trained men of 18 and 19 years old and of 25 to 26 years old will be called up in war time and will ultimately raise the strength of the force to a total of 155,000. In addition to the Cadet training, there will be 8 days' camp and the equivalent of 8 days' work in drills every year for the men between 19 and 25 years of age. For the purposes of organisation and training the country is being divided into areas, each providing a definite proportion of the fighting unit, in charge of a permanent instruction officer. Ten areas will make a group under a superior officer, who will be a brigade-major in war-time. The less populous parts of the country are for the present exempted. The operation of the new law on compulsory service began in June 1911.

The total strength in 1914 was as follows:

	Number.		Number
Permanently employed	2,989	Area Officers	215
Citizen soldiers	42,261	Rifle Clubs	48,231
Engineer and Railway Staff Corps	48	Senior Cadets	86,698
Army Nursing Service	101	Unattached List of Officers	266
Automobile Corps	31	Reserve of Officers	734
		Chaplains	187

The New HAZELL, 1917

The **Commonwealth section of the Imperial General Staff** was created in August 1909.

The Royal Military College of Australia has been opened at Duntroon, N.S.W.

Board of Military Administration
Chief of the Commonwealth Section, Imperial General Staff (1st *Military Member*), Col. J. G. Legge, C.M.G. (£1,500); Col. G. G. H. Irving (*actg.*).
Adjutant-General (2nd *Military Member*), Col. V. C. M. Sellheim (£750); Col. T. H. Dodds (*actg.*).
Quartermaster-General (*actg.*) (3rd *Military Member*), Lt.-Col. H. W. Dangar . £600
Finance Member, Lt.-Col. T. J. Thomas.
Secretary, Capt. T. Griffiths (£480); Maj. W. H. Osborne (*actg.*).
Inspector-General, (vacant).

New Zealand

The Dominion has no naval forces of her own except training-vessels. The battle-cruiser *New Zealand*, presented to the British Government, is attached to the Grand Fleet, and took part in the actions of the Heligoland Bight, the Dogger Bank, and Jutland Bank.

Department of Defence
General Officer Commanding N.Z. Forces, Maj.-Gen. A. W. Robin, C.B., C.M.G. . £1,100
Chief of General Staff and Director of Military Training, Lt.-Col. C. M. Gibbon £650
Adjutant-General, Lt.-Col. H. E. Pilkington £525

The principle of compulsory military training was adopted by the Defence Act of 1909. The principal proposals received effect in the Defence Act of 1910, which amended its predecessor. The leading idea is to bring about better training and the adoption of a system homogeneous with that of Australia. The junior cadets (12 to 14) and senior cadets (15 to 18) will be trained for the equivalent of 16 days. The Territorial soldier (19 to 25) does 30 drills, 12 half-day parades, and 12 days in camp. The present strength is: Territorial Force, 30,000; senior cadets, 40,000; and 35,000 members of rifle clubs.

South Africa

A sum of £85,000 annually is contributed by the Union of South Africa towards the general maintenance of the British Navy.

By the Defence Act, 1912, liability to military service in any part of South Africa is imposed upon the whole white male population up to the age of 60. But there is no attempt to make service universal, and it will be only compulsory in so far as voluntary enrolment fails to give the quota demanded of each area. In principle, not less than 45 and not more than 55% of the young men annually attaining the age of 21 must be trained in the Active Citizen Force, which is to consist of 20,000 to 25,000 men, with its reserve of men up to the age of 45. In populous districts every youth becomes a cadet except upon conscientious objection, and in rural districts they become cadet members of rifle associations. Service in the Active Citizen Force is between the ages of 21 and 25, and those men not trained in it will join rifle clubs. The permanent force will consist of 2,500 Mounted Riflemen (5 regiments), many of them on police duty, with five field batteries, and a reserve will be formed for it. The Active Citizen Force is divided into the Coast Garrison Force and the Active Citizen Force proper, *i.e.* the field army, the former being a voluntary partially-paid force of garrison artillery and engineer specialists. A South African military college is proposed.

Federated Malay States

On Nov. 12, 1912, the Council of the Federated Malay States passed by acclamation a resolution moved by the Sultan of Perak in favour of offering a first-class armoured ship to the Imperial Government. This patriotic gift took the form of a battleship, to be called the *Malaya*, and was ordered from Messrs. Armstrong, Whitworth & Co. in Feb. 1913. The vessel has been completed since the war began, and was present in action at the battle of Jutland Bank on May 31, 1916.

Newfoundland

Towards the maintenance of a branch of the Royal Naval Reserve, Newfoundland contributes £3,000. The strength of this force in 1913 was 600 men, 350 of whom were qualified and the remainder ordinary seamen. Opportunities for drill, etc., were given in the Imperial vessels on the West Indies station. The force mobilised very efficiently and promptly when war was declared, and has rendered good service. Several of its members lost their lives when the auxiliary cruiser *Bayano* was torpedoed and sunk off the Firth of Clyde on March 11, 1915.

WARSHIP TYPES—I

GREAT BRITAIN

As at the outbreak of war, with subsequent additions which have been officially announced.

o.	Name.	Date.	Displacement.	Crew.	Speed.	Horse-power.	Armament.

NAVIES OF FOREIGN COUNTRIES

In the following article particulars are given of the naval armaments of foreign countries in alphabetical order.

AUSTRIA-HUNGARY

War was declared between France and Austria on Aug. 10, 1914, and between Great Britain and Austria on Aug. 12. The interval of a week or more between the outbreak of hostilities with Germany and the time when Austria came into the war enabled the French Navy in the Mediterranean to convoy the French colonial troops from Africa to France in greater security. A blockade of the Austrian Fleet in the Adriatic was maintained by the Franco-British Fleet until Italy declared war on Austria on May 23, 1915, when her naval forces shared in the task. During August 1914 Admiral Sir A. Berkeley Milne, in the *Inflexible*, commanded the British Fleet in the Mediterranean; but after that month the chief command was assumed by Admiral Boué de Lapeyrère, of the French Navy. Admiral de Lapeyrère was succeeded as Commander-in-Chief in October 1915 by Admiral D'Artige du Fournet, formerly commanding the French Fleet off the Syrian coast.

The Austrian Navy did not take the offensive until Italy came into the war, when it attempted coast raids with some success. It avoided action with hostile ships, however, and up to the end of October 1916 its only losses had been of light cruisers and torpedo craft, such as the *Zenta*. This light cruiser was caught and destroyed by the Allied Fleet in a sweep of the Adriatic on Aug. 16, 1914. A torpedo boat, No. 19, was destroyed by a mine off Pola on Aug. 18, 1914. Other losses are given in the table elsewhere. On Oct. 8, 1916, it was reported that an Austrian Dreadnought had blown up at Pola with her crew on board, but the statement was not confirmed officially. More serious than any loss of ships to

Austria during the first fourteen months of her war with the Allies was the capture by the Italians of the naval port and dockyard of Monfalcone on June 10, 1915, as this place had been a ship-building centre for light cruisers and torpedo craft of the Austro-Hungarian Navy. The offensive movement of the Italian troops in the direction of isolating the Istrian peninsula, in which the capture of Gorizia on Aug. 9, 1916, was important, has a significance in the same connection, as on or adjoining this peninsula are the three main bases of the Austro-Hungarian Navy, Trieste, Pola, and Fiume.

The number of all ranks in the Navy, including reserves, totalled 35,942. The non-commissioned ranks were to be brought up to a total of 20,000 by 1922. The number of **executive officers** was 795.

The strength of the Navy on July 31, 1914, was: battleships, 15 (including 3 coast-defence vessels); armoured cruisers, 3; small cruisers, 10; torpedo vessels, 6; torpedo-boat destroyers, 18; torpedo boats, 55; submarines, 6. The ships building when war broke out were the Dreadnought battleship *Szent Istvan*, launched at Fiume on Jan. 17, 1914, and of the same type as the 3 completed Dreadnoughts, *Viribus Unitis*, *Tegetthoff*, and *Prinz Eugen*; 2 light cruisers, the *Helgoland* and *Novara*, launched in 1912 and 1913 respectively; 6 destroyers; 27 torpedo boats; and 8 submarines, 2 of which were building at Fiume and 6 at Kiel.

Admiral Anton Haus was serving as Marine Commandant when war was declared. He was appointed in Feb. 1913. The battle-squadron of the Navy was commanded by Vice-Admiral Franz Loefler. The cruiser division of the Fleet was commanded by Rear-Admiral Karl Seidensacher, and the reserve division by Rear-Admiral Ricard Ritter von Barry.

The principal **Government dockyard** of Austria-Hungary is situated at Pola. At Trieste there are two **building slips** at the yard of the Stabilimento Tecnico, which have been made capable of receiving Dreadnoughts; and it is understood that two more slips have been similarly lengthened at the establishment of the Danubius Shipbuilding Co., or Fiume.

BULGARIA

Bulgaria came into the European War on Oct. 15, 1915. Her naval forces are negligible, although it was reported that the ports of Varna, in the Black Sea, and Dedeagatch, in the Ægean, had been fortified and mined under German supervision, and that about six German submarines had been conveyed in sections for their defence.

There is one dispatch vessel owned by Bulgaria, the *Nadiezda*, of 715 tons, built at Bordeaux in 1898. There are some torpedo boats of 100 tons displacement, completed in 1908. There are two armoured gunboats for service on the Danube.

FRANCE

The French Navy has for its head the Minister of Marine, who is assisted in regard to matters of routine and administrative work by an Under-Secretary of State. By a new scheme of administration adopted on Sept. 7, 1913, a Council of Admiralty was established, with executive powers, similar to the British Board of Admiralty.

A new organic law for the constitution of the French Navy, introduced in 1910, was passed by the Chamber of Deputies on Feb. 13, 1912. The law provides that the battle-fleet in home waters shall consist of 28 battleships, which are to be formed into 4 squadrons of 6 ships each, with the remaining 4 in reserve. To each squadron will be attached 2 scout cruisers and 12 destroyers; 2 cruisers and 4 destroyers are to be held in reserve, making a total of 10 cruisers and 52 destroyers. The foreign service fleet is to consist of 10 ships, with such smaller craft as may be required. The submarine flotilla will consist of 94 vessels, with 4 mine-laying ships, and such mine-raising vessels as may be required. The prescribed establishment is to be reached by Jan. 1, 1919, and the new construction necessary to attain this establishment was 16 battleships, to be built at the rate of two each year from 1910 to 1917.

The French Navy is manned partly by conscription and partly by voluntary enlistment. The Inscription Maritime, dating back to 1683, and owing its origin to J. B. Colbert, the Minister of Marine in Louis XIV's time, contains the names of all male individuals devoted to a seafaring life from the 18th to the 50th year of age. Young men liable to service in the Army may, however, volunteer for service in the Navy. For administrative purposes France is divided into five divisions maritimes, and subdivided into twelve arrondissement maritimes.

The number of officers and men voted in the 1914 Estimates was 69,585, as compared with 63,596 in 1913 and 60,621 in 1912. The number in Reserve was about 50,000.

Since the war begun, it has been officially announced that the ships launched for the French Navy include three new battleships, the *Normandie* and *Flandre*, on Oct. 19 and 20, 1914, respectively, and the *Languedoc* on May 1, 1915.

On Aug. 26, 1916, the *Petit Parisien* was permitted to state that the French Fleet had been augmented by several fresh units during the war. The journal pointed out that the French had only lost the old battleship *Bouvet*, which was of no real military value; and the *Jean Bart*, which was torpedoed off Cattaro, was speedily and carefully repaired. Five new Dreadnoughts had been added to the Fleet, the *France*, *Paris*, *Bretagne*, *Lorraine*, and *Provence*, ships of 23,540 tons, with ten 13·5-in. guns. With the Dreadnought battleships *Jean Bart* and *Courbet*, the six Dantons, and five battleships of the Patrie class, this made a very powerful striking force.

On Aug. 4, 1915, in an anniversary message to the Press, M. Augagneur, Minister of Marine, said: "For a year past the Navies of France and England have struggled in close and fraternal emulation in order to gain the final victory. No one doubts that victory on land. On the sea it is realised. Germany has abandoned the seas to our domination. She dare not risk a fair fight. She skulkingly attacks merchant ships and trawlers. After a year of war the Allied Navies have cause to be proud of the results attained. They will render those results all the more striking if our enemies consent to risk battle."

GERMANY

The Navy of the German Empire is under the supreme command of the Emperor. Its present system of administration was introduced by a Cabinet Order of March 14, 1899. At Berlin there are three main departments, whose chiefs have the privilege of approaching the Emperor directly. These are (1) the Naval Cabinet ("Marinekabinett"), originally created in 1889, which is concerned only with matters relating to the appoint-

ment and promotion of officers, and with advising the Emperor thereupon; (2) the Imperial Navy Office ("Reichsmarineamt"), which is the centre of administration for everything connected with the *matériel* and *personnel* of the Navy, and controls all expenditure upon the Service, its head, known as the Naval Secretary of State ("Staatssekretar des Reichsmarineamts"), representing the Navy in the Reichstag when naval affairs are under consideration; and (3) the Admiral Staff of the Navy ("Admiralstab der Marine"), an advisory organisation, charged with the study of the larger questions arising out of the distribution and employment of the Fleet, with the provision of plans of operations, and the collection and dissemination of naval intelligence. There are five other "Immediatstellen," the holders of which offices have direct access to the Emperor with respect to matters under their charge. These are (4) the Commander-in-Chief of the High Sea Fleet ("Kommando der Hochseeflotte"); and (5) the Commander of the Cruiser Squadron ("Kreuzergeschwader"), both afloat, who are responsible for the training of the *personnel* and the efficiency of the ships under their command; (6) and (7) the Commanders-in-Chief of the Baltic and North Sea Stations ("Marinestation der Ostsee" and "Marinestation der Nordsee"); and (8) the Inspector-General of the Navy ("Generalinspecteur der Marine"), whose functions are described by his title.

The non-commissioned ranks in the German Navy are obtained from (*a*) conscripts, (*b*) one-year volunteers, (*c*) volunteers for three years or longer, and (*d*) boys. The first-named have to report themselves for conscription on Jan. 1 of the year in which they will become 20 years of age, and must continue to do so each year until they are taken or rejected. One-year volunteers are entered after the age of 18, and three-year volunteers before 20 years of age, after completing their 17th year. Boys are entered between the ages of 15 and 18 and engaged for a nine-years' term of service. The petty officers of the Navy are, as a rule, drawn from those who enter as boys.

The **strength** in ships built and building in 1914 was understood to be as follows:

Situation 1914.	Built.	Building.
Battleships	36	7
Battle-cruisers	5	3
Armoured cruisers	9	—
Light cruisers	45	6
Unprotected cruisers	4	—
Torpedo-boat destroyers	144	12
Torpedo-boats	80	—
Submarines	36	*

* Doubtful.

When war broke out, there were 36 German battleships completed, including 13 of the Dreadnought type, two of which were completed in 1909, two in 1910, three in 1911, three in 1912, and three in 1913. During the war, it must be assumed that all the battleships under construction at its commencement, seven in number, have been completed, increasing the total to 43, of which 20 are Dreadnoughts. In addition, there is the ex-*Salamis*, a fast battleship building for Greece, which was taken over. The first 4 of the German Dreadnoughts carry twelve 11-in. guns, but the second squadron of 4 ships, composed of the 3 completed in 1911 and the *Oldenburg*, completed in 1912, carry twelve 12-in. guns. Each of these 8 vessels, however, is only able to fire 8 of her 12 big guns on either broadside. The 2 other 1912 ships, the *Kaiser* and *Friedrich der Grosse*, and the 3 1913 ships, *Kaiserin*, *König Albert*, and *Prinzregent Luitpold*, carry an armament of ten 12-in. guns, but the distribution of the guns is similar to that of the British Neptune class, which permits all to fire on either broadside. The four other German Dreadnought battleships completed are understood to be similarly armed with ten 12-in. guns. No German vessel completed or completing when war broke out carried a heavier gun than 12 in.

What progress in warship construction has been made since war began is not known. Later programmes, which may very likely have been anticipated or accelerated, comprise one battleship in 1915, the *Ersatz-Kaiser Wilhelm II*; two in 1916, the *Ersatz-Wilhelm der Grosse* and an additional ship authorised under the 1912 amendment of the Navy Law; and one in 1917, the *Ersatz-Kaiser Barbarossa*; while one more vessel, whose year of construction was "reserved," also appeared in the Navy Law. All these ships were to be ready in 1920. If it has been found possible to put them all in hand since the war began, the number of German battleships built and building at the present time should be forty-eight, apart from the ex-*Salamis*. Out of this total, the admitted losses are shown in the table on p. 790.

As regards battle-cruisers, definite information is similarly lacking. By the presence of 12-in. shells discovered at Scarborough during the raid in December 1914, the *Derfflinger*, the first German battle-cruiser to carry this calibre of gun, was known to have been completed for service in that year, and with the *Von der Tann*, *Moltke*, *Goeben*, and *Seydlitz*, which joined the Fleet in 1910, 1911, 1912, and 1913 respectively, there were 5 ships of this Dreadnought cruiser type in the German Navy. The next ship of the type for completion was the *Lützow*, of the 1912 programme, which was launched at Danzig on Nov. 29, 1913. She was sunk in the Jutland battle; and the 1913 vessel was the *Ersatz-Hertha*, begun twelve months later. A battle-cruiser was launched at Wilhelmshaven on Aug. 1, 1915, and named the *Hindenburg*, which was understood to be the ship of the 1913 programme. The German Navy Law provides for the laying down of one battle-cruiser each year until 1917. If all the programmes up to this year were advanced, the total would be eleven ships. From this number, the *Goeben* should be deducted from any calculation affecting the North Sea, as she is in Turkish waters.

Small cruisers have been constructed at the rate of two each year. Torpedo-boat destroyers were built in classes of twelve each year, and constructed within from twelve to eighteen months. The numbers of submarines built each year varied according to the progress of types and the amount of money devoted to the purpose, and secrecy was observed regarding the exact figures.

The losses sustained by the German Fleet in the war are shown elsewhere.

The submarines lost are not definitely known, for reasons stated by Mr. Balfour in Parliament on Sept. 30, 1915. American reports, said to be authoritative, placed the full total up to that date as between 60 and 70, and a Copenhagen estimate at the same time gave the number as 54. Writing at the beginning of Oct. 1916, M. Stephen Pichon, in the *Petit Journal*, was allowed to state that over 100 enemy submarines had during the

preceding twenty months been accounted for. It was revealed by the journalists who were permitted to visit the Grand Fleet that German submarines had been caught and sunk or captured by gun-fire, by nets, by ramming, by explosive bombs, and in other ways.

GREECE

A staff of British naval officers has been lent to the Greek Government since April 1911, and in September 1913 Rear-Admiral Mark E. F. Kerr was lent by the British Government to take charge of it. In the spring of 1916 he was succeeded by Rear-Admiral Norman Palmer. In connection with the precautionary measures which the Allied Powers found it necessary to take in Greece, Admiral du Fournet, the Commander-in-Chief in the Mediterranean, arrived with a fleet off the Piræus on Oct. 1, 1916, and on Oct. 10 sent an ultimatum to the Athens Government demanding, as a measure of security for the Allied forces on land and sea, the surrender by the afternoon of the next day of the whole of the Greek Fleet, except the *Averoff*, *Kilkis*, and *Lemnos*, which were to be dismantled and their crews reduced to one-third strength. This and other demands were conceded under protest, and the ships were taken over by the Allies on Oct. 11. The Navy consists of the battleships *Kilkis* and *Lemnos*, of 13,000 tons, launched in 1905, and purchased from the United States Government in 1914; the armoured cruiser *Georgios Averoff*, of 9,680 tons, launched in 1908; 3 small battleships, of about 4,800 tons displacement, launched in 1889-90; 18 modern destroyers and torpedo-boats; 2 submarines; and a few gunboats and torpedo craft of no large fighting value. The torpedo craft include six modern destroyers purchased just before the outbreak of the Balkan War in 1912. There is a naval *personnel* of about 4,000, conscripts for two years or voluntary enlistment. A small arsenal is situated at the Piræus. In January 1913 the keel was laid at the Vulcan yard, Stettin, of the battleship *Salamis* of 19,500 tons, but the Germans have now acquired this vessel, and some torpedo boats which were also building at Stettin.

ITALY

Italy declared war on Austria on May 23, 1915. In the first five months of hostilities she lost two armoured vessels by submarine attack, the *Amalfi* on July 7 and *Giuseppe Garibaldi* on July 18. The battleship *Benedetto Bim* was sunk by fire and explosion on Sept. 28, 1915; and the Dreadnought battleship *Leonardo da Vinci* by a similar misfortune on Aug. 2, 1916. Other losses are shown in the general table.

There are **three Naval Districts**, each administered by a flag officer. Seamen for the Italian Fleet are recruited by **conscription**; all men following a seafaring life of 20 years of age must serve at sea for 18 months or more. Actually the whole draft is not required, and the part which is taken for service remains afloat for 4 years. There are also training-schools for boys.

Minister of Marine, Admiral Corsi.
Chief Constructor, Giuseppe Valsecchi.
President of the Superior Council, Vice-Admiral Luigi Faravelli.
Chief of the Naval War Staff, Vice-Admiral Rocca.

The **personnel** voted for 1914-15 was 40,063 officers and men, of which number about one-third are volunteers and the remainder conscript. The **executive officers** are divided thus: 1 admiral, 7 vice-admirals, 15 rear-admirals, 56 captains, 75 commanders, 85 lieut.-commanders, 420 lieutenants, and 340 sub-lieutenants.

JAPAN

The only losses reported to have been sustained by the Japanese Fleet since it came into the war on the side of the Allies on Aug. 23, 1914, are those caused by German mines at Kiaochau. Their chief victim was the light cruiser *Takachiko*, which was sunk on Oct. 17, 1914. The destroyer *Shirataye* was lost by grounding near Kiaochau on Sept. 4, 1914.

The Japanese Naval Training Squadron visited Melbourne in June 1915, when the Commonwealth Premier, Mr. Fisher, and Defence Minister, Mr. Pearce, said that Japan had rendered valuable aid to the Allied cause. A Japanese warship assisted in convoying Australian troops, and Japan took an important part in the sweeping movement which cleared the German warships from the Pacific.

The following tables of the Japanese Fleet and its personnel are official, and were supplied by the Japanese Admiralty for publication in the Japanese Section of *The Times* on Sept. 2, 1916:

TOTAL NUMBER OF WARSHIPS IN APRIL 1916

Name.	Place of Construction.	Date of Launching.	Displacement.	Horse-power.
		Battleships		
Fusoh	Kuré	Mar. 1914	30,600	40,000

RUMANIA

The Rumanian Navy includes 1 protected cruiser; 4 monitors; 8 torpedo-boats; and 12 gunboats and launches for service on the Danube.

RUSSIA

The only losses sustained by the Russian Fleet in the war are those of the *Pallada*, armoured cruiser, torpedoed by submarine in the Baltic on Oct. 11, 1914; the *Jemchug*, light cruiser, sunk by the *Emden* at Penang on Oct. 29, 1914; the *Sivoutch*, gunboat, lost in the fighting in Moon Sound, Gulf of Riga, on Aug. 20, 1915; and a very few torpedo and auxiliary craft.

The number of men annually needed for the Navy is fixed by law. The men are recruited by conscription, and while on the active list are not allowed to marry.

The Admiralty is thus constituted:

Minister of Marine, Vice-Admiral Grigorovitch (appointed April 1, 1911).
Assistant Minister of Marine, Vice-Admiral Bubnoff.
Chief of the Staff, Rear-Admiral Kriasieff.
Chief of the Naval General Staff, Vice-Admiral Prince Lieven.
Members of the Admiralty Council.—Vice-Admirals Jakowlev, Litvinoff, Reizenstein, and Sazarenny.

Changes were made in the command of both the principal fleets in 1916. Early in October it was announced that Vice-Admiral Nepinin had been appointed Commander-in-Chief in the Baltic, in succession to Admiral Kanin; and two months earlier the appointment had been announced of Vice-Admiral A. V. Kolchak to be Commander-in-Chief in the Black Sea, in succession to Admiral Eberhard.

The **number of men** voted for 1914 was 59,425. The chief officers in active service, not including flag officers attached to the Naval Artillery or occupying administrative positions in some other branch, were 2 admirals, 13 vice-admirals, and 27 rear-admirals.

TURKEY

A German officer, Admiral Suchon, has been reported to be in command of the Turkish Fleet.

There were about **13,000 officers and men** in the Navy in October 1914.

The **strength in ships** in October 1914 was: battleships, 4; protected cruisers, 2; torpedo vessels, 2; gunboats, 15; torpedo-boat destroyers, 8; torpedo boats, 16.

Of the above list there have been several losses, as shown in the table elsewhere.

UNITED STATES

The U.S. Navy is manned by voluntary enlistment.

The *Secretary of the Navy* is Josephus Daniels; and the *Assistant-Secretary*, Franklin D. Roosevelt (both app. March 1913).

Admiral George Dewey is President of the General Board of the Navy, and Rear-Admiral Charles J. Badger, a former Commander-in-Chief of the Atlantic Fleet, is Chairman of the Executive Committee. The Commanders-in-Chief afloat are Admiral Henry T. Mayo (Atlantic), Admiral William B. Caperton (Pacific), and Admiral Albert G. Winterhalter (Asiatic Fleet). Major-General George Barnett commands the Marine Corps.

The total number of **enlisted men** in the Navy and Marines is 67,644.

The submarine E 2 sank after an explosion on Jan. 15, 1916, in the Brooklyn Navy Yard, four persons being killed and twelve injured. On Aug. 29, 1916, the cruiser *Memphis*, formerly the *Tennessee*, was driven ashore at San Domingo in a tidal wave and became a total wreck. Twenty men were drowned.

On Oct. 15, 1915, President Wilson approved the scheme of Mr. Daniels for a five years' naval building programme, to include ten battleships and six battle-cruisers, with a proportionate number of sea-going submarines, coast submarines, scout cruisers, destroyers, and auxiliaries, the whole to cost 500,000,000 dollars (£100,000,000). The first year's programme includes four Dreadnoughts and four battle-cruisers. The bill was considered by the House of Representatives in April and May 1916, and on July 22 passed the Senate, which augmented its provisions, the increases being approved by the House on Aug. 15. A fortnight later President Wilson affixed his signature to the measure. As modified by the two Houses, the programme provides for a total of 157 ships, and the time allowed for building them is reduced from five to three years. Over half the total, viz. 81 ships, are to be built or begun in the first year, at a cost of £22,000,000. These include four battleships, four battle-cruisers, four scout-cruisers, twenty destroyers, nine fleet submarines, 27 coast submarines, three fuel ships, two destroyer tenders, two ammunition ships, two gunboats, and a repair ship, transport, hospital ship, and fleet submarine tender. The totals for the three years are 10 battleships, 6 battle-cruisers, 10 scout-cruisers, 50 destroyers, 9 fleet submarines, 1 submarine on Neff system, 58 coast submarines, 3 fuel ships, 2 destroyer tenders, 2 ammunition ships, and 2 gunboats, with a repair ship, transport, hospital ship, and fleet submarine tender. The aim of this great programme is to place the United States in the position of second place among the maritime Powers of the world. Speaking after the passage of the measure, Secretary Daniels said on Aug. 15, 1916: "Naval authorities abroad state that this authorisation will make our navy the second largest in the world in every unit that goes to make a powerful fighting force. The first recommendation ever made by a Chief Executive for a continuing programme for naval construction was made by President Wilson in his message to Congress last December, and it was gratifying to all who believe in a strong navy when both political parties in their platforms last June affirmed that wide departure from former policies. Instead of what has been characterised as a 'haphazard' policy, Congress has now adopted a continuing, constructive, well-balanced programme that ensures the building of a navy worthy of our country. The eight capital ships, four Dreadnoughts and four battle-cruisers, to be constructed at once, will carry the heaviest guns and will surpass any capital ships yet constructed by any nation." The chief characteristics of the battleships are that they will have a displacement of 32,600 tons; a speed of 21 knots; an armament of eight 16-in. guns, eighteen 5-in. guns, four 3-in. anti-aircraft guns; and a complement of 1,022 officers and men; with a very large cruising radius. The battle-cruisers—the first of this class of warship to be built for the American Navy—will be 900 ft. long, and have engines, of the electric drive type, of about 200,000 horse-power, the speed being 35 knots. Engineer-in-Chief Robert S. Griffin stated in Sept. 1916 that his department found it impossible at the outset to control and apply this enormous power without adopting oil fuel and the electric drive. One hundred tons of oil, he declared, give the same power that can be got from about 150 tons of coal, in addition to other advantages. The scout-cruisers will be of 7,100 tons, 35 knots' speed, and 550 ft. in length, armed with eight 6-in. guns, and manned by a complement of 330.

The **strength in ships built, building, and projected** (October 1916) is as follows:

	Built.	Building.	Programme.
Battleships	37	5	4
Battle-cruisers	—	—	6
Coast-defence vessels	9	—	—
Armoured cruisers	14	—	—
Protected cruisers—			
1st class	3	—	—
2nd class	15	—	10
Unprotected cruisers	3	—	—
Scouts (protected)	3	—	—
Torpedo vessels	2	—	—
Torpedo-boat destroyers	68	10	50
Torpedo boats	21	—	—
Submarines	50	24	68
Gunboats	34	—	2

The thirty-seven completed battleships include fourteen of the Dreadnought type, of which four were completed in 1909, two in 1911, two in 1912, two in 1914, two in 1916, the *Pennsylvania* and *Arizona*. The battleships *New Mexico*, *Idaho*, *Mississippi*, *Tenessee*, and *California* were building or about to be laid down.

The **Government dockyards** are situated as follows: **Brooklyn**: one large dock, two smaller. **Norfolk**, Va.: one large dock, one smaller. **Mare Island**, Cal.: two large docks. **Boston, Mass.**: one small dock. **League Island, Pa.**: one large wooden dock. **Portsmouth, N.H.**: one small dock; Charleston, S.C., one dry dock: Bremerton, Washington, ordnance yard. New docks able to take any warship are in course of construction at the Navy Yards at Brooklyn, Mare Island, League Island, and Portsmouth.

ARMIES OF FOREIGN NATIONS

Particulars of the armies of the principal foreign countries are given below, the countries being arranged in alphabetical order.

AUSTRIA-HUNGARY

The active army of the Dual Monarchy is an organisation common to both kingdoms. In addition to this, there are two second-line armies, fully organised in peace, and distinct both from the "common army" and from each other—the Austrian **Landwehr** and the Hungarian **Honved**; while behind all these are the various "Landsturms" of older men.

The peace strengths before the war were as follows:

Common Army	339,366
Austrian Landwehr	50,544
Hungarian Honved	38,529
Bosnia-Herzegovina troops	6,618
	435,057

(These are the normal budgetary effectives.)

The war strengths before the war were estimated to be:

Common Army	1,360,000
Landwehr	240,000
Honved	220,000
	1,820,000

It was believed that by embodying all classes of the Landsturm, over 3,500,000 men could ultimately be put in the field, trained and untrained.

BELGIUM

The **Army was reorganised** on the basis of personal service under laws of Dec. 14, 1909, and June 19, 1913. Service in peace time was for 15 to 24 months (according to arm) with the colours, followed by the remainder of 8 years on, unlimited furlough, with occasional short repetition courses; after which 5 years were passed in the reserve. All able-bodied men not otherwise accounted for were enrolled in the **Garde Civique,** which was chiefly for the maintenance of public order and was under the Minister of the Interior in peace time. Total war strength, 220,000.

BULGARIA

Service compulsory and universal, at 20, with the colours, 2 years in the infantry and 3 in other arms (in practice less); in the army reserve 18 years, and in the militia 6 to 7 years. Peace strength, about 68,500; war strength, about 320,000.

DENMARK

Service compulsory, and liability is for 16 years, half in the line and half in the reserve. Training with the colours is 5 to 12 months. Only a portion of the annual contingent is taken for training. Estimated mobilisation strength 83,000 men, of whom 75,000 would be field troops. The rifle is the Krag-Jörgensen and the gun a Krupp quick-firer.

FRANCE

Before the European War, the French Army was **organised in 21 army corps,** exclusive of the Paris garrison and Tunis.

The **Active Army** was constituted as follows: about 525 battalions of line **Infantry,** 31 battalions of Chasseurs (including Alpine Chasseurs and cyclists), 12 Foreign Legion, 24 Zouaves, 24 Algerian Tirailleurs (natives), 1 Saharan Tirailleurs (natives), and 5 African Light Infantry (of men under sentence for military or civil offences). The **Cavalry,** under a law of 1912, was increased to 91 regiments of 52 squadrons each—including 4 white (Chasseurs d'Afrique) and 6 native (Spahis) regiments in Algeria; also 2 squadrons for the Sahara, and squadrons in Senegal, Indo-China, etc. The **Artillery,** reorganised under the law of 1909, was constituted as follows: 30 coast and 59 fortress batteries, 618 field batteries, 21 Rimailho 6-in. field howitzer batteries, 15 mountain batteries, and 16 horse batteries. In addition, outside France and Corsica, 8 coast, 16 field, and 3 mountain batteries. The **Engineers** were organised into 8 regiments, and the **Military Train** had 21 squadrons.

The Colonial Army was a wholly distinct force, recruited by volunteering exclusively, and consisted of the garrisons overseas (except in Algiers and Tunis) and an expeditionary corps of 3 divisions stationed in France, chiefly in the seaports.

The establishment in 1913 was:

	Officers	Men
Home Army (including Algiers and Tunis, and troops of these in Morocco)	28,932	563,506
Gendarmerie, etc.	675	24,315
	29,607	587,821
Colonial Army in France		27,000
Overseas, white	4,130	24,000
„ native		36,000
	4,130	87,000
Total approximately	33,700	675,000

Men served 3 years in the Active Army, 10 years in its reserve, 6 years in the Territorial Army, and 6 in its reserve. Reservists and Territorial soldiers were called out for periodical training.

GERMANY

The army of the German Empire, though uniformly modelled on the Prussian, retains its federal character. The Prussian Ministry of War and General Staff, however, administer the contingents of Baden, Württemberg, and the smaller States, and the Saxon and Bavarian Governments, while administering their own forces, practically conform to the Prussian lead. The military relations of these States to Prussia are laid down in a series of treaties, of which the main point is that the King of Prussia, and therefore the Prussian General Staff, are in supreme control of operations.

Before the European War the German Army consisted of 651 battalions, 555 squadrons, 633 batteries, 226 batteries of heavy and fortress artillery, 44 pioneer battalions, with certain technical troops in addition, 21 of communication troops, and 26 of train, all these units at a high peace effective.

The **service** in the Standing Army was in theory as follows: Every German fit to bear arms belonged for 7 years to the Regular Army, during the 5 following years to the 1st Levy of the Landwehr, and then, up to March 31 of the year in which he completed his 39th year, to the 2nd Levy of the Landwehr. During their period of service in the Regular Army, men belonging to the cavalry and horse artillery spent 3 years with the colours; men of all other branches of the service remained 2 years with the colours.

The total **war strength** was considered to be approximately 4,350,000 men, including the field army and its reserve formations, the Landwehr (1,800,000), and trained men of the Landsturm (800,000). But the highly trained and vigorous first line would not greatly exceed 1,500,000; total men, trained and untrained, supposed to be available, number 9,898,000.

The armament of the German infantry is a modern Mauser, that of the field artillery a converted gun of admittedly inferior power.

GREECE

Before the Balkan Wars the Greek Army was in principle recruited on the universal service basis, 2 years in the active army, 10 in the reserve, 9 in the 2nd reserve, and 14 in the National Guard, the last being of course an unorganised Landsturm. The peace strength for 1915 was

60,000, but the war-field strength may be put at 300,000. The infantry weapon is a Mannlicher, the gun a quick-firer of Creusot make.

ITALY

The able-bodied men annually becoming liable for service are divided partly by exemptions and partly by lot into three portions, only the first of which (one-third of the whole) is fully trained, the second undergoing a recruit course and a few repetition courses in later years, and the third performing no service at all. The full period of service is 2 years with the colours, 6 on furlough, and 4 in the Mobile Militia. Men of the second portion, though taken only for slight training, have the same periods of liability for service. The third portion is untrained. Of recent years large numbers of Mobile Militia (which still consists of fully trained reservists only) have been embodied for brief refresher trainings. There are 12 **army corps**, each having 2 infantry divisions, except that in the district of Rome there are 3. **The organisation** of the permanent army comprises 96 regiments of line **infantry**, 12 regiments of bersaglieri, and 8 Alpine regiments (in all 389 battalions). There are 29 regiments of **cavalry** (150 squadrons), and 36 regiments of **field artillery**, with 192 gun batteries. The army also comprises 1 regiment of **horse artillery** (8 batteries), 2 of **mountain artillery** (36 batteries), 10 regiments of **coast artillery** and a brigade in Sardinia, 2 regiments of **fortress artillery** and 6 of **engineers.** A battalion of aviators has also been created.

The mean **peace effective** was about 15,000 officers and 290,000 men.

The **total war strength of the forces** is roughly as follows, but it must be remarked that the men of the territorial militia are untrained :—

With the colours, officers and men .	300,000
On unlimited furlough ,, ,, .	450,000
Mobile Militia ,, ,, .	320,000
Territorial Militia ,, ,, .	2,200,000
Total on a war footing ,, ,, .	3,270,000

Of whom 1,070,000 are more or less trained.

JAPAN

The military forces are the **Active Army**, with the first and second reserves, the **National Army** and its reserve, some special forces, and the Militia of certain of the islands. A Japanese is liable for military service between the ages of 17 and 40, but the age of enlistment is ordinarily 20. Under the law of 1905 the period is 2 years for the infantry and 3 years for other arms, with the colours (Geneki), a total period of 7⅓ years being completed in the first reserve (Yobi). The 7⅓ years is followed by 10 years with the second reserve (Kobi), making 17⅓ years in all. The remaining years of liability are passed in the National Army (Kokumin). The peace strength is about 280,000, and the mobilisable war strength about 1,400,000.

MONTENEGRO

The army is on a militia basis, and the forces, in proportion to the size of the territory and the population, are larger than in any other European country. Every Montenegrin subject is liable from 19 to 62 years of age—*i.e.* for a total period of 45 years—2 years in the recruits class (with a **maximum** of six months' training each year), 33 years in the active army (with a maximum of fifteen days' training each year), and 10 years in the reserve. These training periods are not realised in practice. Total war strength estimated (perhaps over-estimated) at from 30,000 to 50,000 men. There are no cavalry, except a few men for escort duty and dispatch riding.

NETHERLANDS

Every citizen serves 7 years in the Militia, followed by five years in the Landweer, and up to the age of 40 in the Landsturm. The peace strength (cadres and trainees only) is 22,000, and the war strength is estimated at 200,000 men.

The **Army of the Dutch East Indies** is a distinct force with an effective strength of 36,821 officers and men, including 12,841 Europeans. Recruiting is voluntary. The feudatory chiefs are under obligations to supply auxiliary troops.

NORWAY

Service in the Ligne 12 years, the Landvaern 8 years, and the Landstorm until the age of 50. The military force available for service beyond the frontier is estimated at 30,000, and the **total armed strength** at 70,000 on mobilisation. Armament : Krag-Jörgensen rifle and Ehrhardt (1901) quick-firing gun (older models are still in the service).

PORTUGAL

Service obligatory between the ages of 20 and 45 ; during the twenty-first year recruits are called up for 15 weeks (infantry, 20 for artillery, and 30 for cavalry), and thereafter until the end of the thirtieth year they perform an annual training of 2 weeks. Subsequent service (without training) is for 10 years in the reserve and 5 in the national army. Financial considerations, here as elsewhere, prevent the training of the whole annual contingent. The active army exists as a small permanent force during the non-training season, in virtue of voluntary enlistments for one year's continuous service. Men not taken for training pay a military tax. The **peace footing**, not including colonial garrisons, is about 30,000. The **war footing** is about 120,000, and there will ultimately be above 140,000 more trained men available.

RUMANIA

Liability to service is compulsory and universal from 21 to 42 years of age, with a certain amount of preliminary training between the ages of 19 and 21. The peace strength is 101,348, and the war strength is over 500,000 probably. The infantry rifle is the Mannlicher, the field gun a Krupp quick-firer.

RUSSIA

The **peace strength** has been given as follows :

	Europe and the Caucasus	Asiatic Russia
Infantry . .	627,000 men.	83,000 men.
Cavalry . .	116,000 ,,	14,000 ,,
Artillery . .	138,000 ,,	15,000 ,,
Engineers .	34,000 ,,	8,000 ,,
Army Services .	34,000 ,,	5,000 ,,
Total . .	949,000 ,,	124,000 ,,

Including Cossacks and Frontier Guards, some authorities give the total peace strength as 1,400,000, including 60,000 in Turkestan and Semirietshenk and 280,000 in Siberia.

In the Russian Empire about 1,100,000 men (not including Cossacks) annually attain the age for joining the army; exemptions are numerous, as only a little more than one-third of the contingent is required for service. **Liability to service** lasts from the 21st to the 43rd year. Those who join the Standing Army spend 3 years with the colours (4 in the cavalry and horse artillery), 16 to 15 in the Reserve, and the remainder in the Opolchenié, or Militia. The Opolchenié embraces: (1) The surplus of the annual contingent (untrained); (2) men who have completed service with the colours and in the reserve under a law of March 1911.

The Cossack forces have a special constitution. Every Cossack becomes liable to serve as soon as he has completed his eighteenth year, and finds his own horse and equipment, as in the Indian Silladar cavalry. For the first year his service is purely local; but for the next twelve years he belongs to the "front" category, which consists of three bans, the first of which is formed of men actually serving, and the two others of men who have been granted unlimited leave. The last five years are spent in the Reserve. These are the rules for Don Cossacks, the terms of service being slightly different for other contingents. The **peace effective of the Cossacks** is stated to be 66,000, with 52,400 horses, but it is probable that not more than 58,000 are permanently with the colours. The **war strength** is given as about 150,000.

The **war strength** of the Russian forces before war broke out was considered to consist of about 56,500 **officers and** 2,855,000 **men.** These form the Active Army, but are not all available in any one part of the Empire. To these figures must be added the available Reserve, estimated at 1,064,000; Frontier battalions, 41,000; Cossacks, 150,000, inclusive of the Opolchenié. The war strength in trained men is estimated at between 6,000,000 and 7,000,000.

SERBIA

Service is universally compulsory; liability begins at 17 and training at 21. The average peace effective was about 24,000, but the war strength was computed at 270,000, without including the Third Ban.

SPAIN

A new army law of June 29, 1911, established personal obligatory service for Spaniards with few special exceptions. There are two categories, one for service with the colours, nominally 3 but in practice 2 years, and the other receiving less than 1 year's training. This is followed by 5 years in the Second Portion of the army, 6 years in the Reserve, and the remainder of the total liability of 18 years in the Territorial Reserve.

The effective of the permanent army in 1913 was 123,000. The Second Portion of the army now numbers about 260,000, the Reserve 290,000, and the Territorial Reserve 500,000.

The infantry armament is a Mauser, and the field-gun a Creusot quick-firer.

SWEDEN

The Swedish Army was reorganised in 1914. **General personal service** has been adopted, the total liability being for 19 years. The periods of training with the colours, which are spread over four years, aggregate 8–12 months, according to the man's branch. These four and another four years constitute the period of a man's service in the first line of the Beväring, after which he remains for 4 in the second, and 8 in the Landstorm. The approximate war strength is 230,000 men of the first line, 90,000 of the second line, and 165,000 of the Landstorm, and under the new scheme is expected to rise to a total of 600,000.

SWITZERLAND

The Federal forces do not constitute a standing army, the principle being that of a militia, and the liability to serve thirteen years in the **Auszug** or **Elite,** eight in the **Landwehr,** and the remaining years up to the age of 48 in the **Landsturm.** Recruit course in the first year is 92 days for the Cavalry, 77 days for the Artillery, and 67 days for the Infantry, with repetition courses of 13 days in each of the second to eighth years.

The field army is over 200,000 strong, about 140,000 men being in the Auszug and the rest in the Landwehr. The Landsturm consists of about 300,000 men, and like all third-line forces is intended for defence of communications, railways, etc. The armament is the 1896 rifle and a Krupp quick-firer field-gun, model 1903.

TURKEY

Liability to service 3 years in the **Nizam** (active army) preceded by 4 years and followed by 6 years in the army reserve (**Ikhtiyat**), after which 8 years in the **First Redif.**

Peace strength supposed to be 281,658, with perhaps 250,000 Reserves and 200,000 First Redifs. This, with the younger Mustahfiz and the whole of the Second Redifs, would constitute well over 1,000,000 men, 750,000 of them fully trained. But only a portion of the total effort in arms could be delivered at one time or in one place, though in a prolonged campaign the reserve strength of the Empire was bound to tell.

UNITED STATES

The legal maximum enlisted strength of the Regular Army is 100,000, but the actual administrative maximum is lower. In 1915 the strength was 94,765 enlisted men, 5,430 officers and 5,430 Philippine scouts. Stringent selection is enforced in recruiting, and only about one applicant in six is accepted. The question of increasing the peace effective is being considered, owing to the demands of the Hawaii and Canal Zone garrisons.

The **regular forces** consist of 15 regiments of **Cavalry,** 36 batteries of **Artillery,** 70 coast batteries, and 30 regiments of **Infantry,** besides engineers and technical and departmental troops. The infantry regiment is divided into three battalions of four companies. The irregular forces are the native Porto Rico regiment, 8 battalions, and 18 companies of Philippine scouts, and some Indian mounted scouts.

Under the Militia Law 1908, the **organised militia** (the State Forces referred to above) have been reconstituted, and the total strength in 1915 was 8,705 officers and 120,693 enlisted men. Most of the States have prepared plans for rapid mobilisation, and within a few years the force is expected to have assumed an efficient military character; but at present there is great variation in condition, training, and distribution as compared with population-grouping (New York, for example, supplying nearly 12 % of the whole force).

THE EUROPEAN WAR

SUMMARY OF EARLY EVENTS

June 1914

28. Assassination at Sarajevo of Archduke Francis Ferdinand of Austria and the Duchess of Hohenberg.

July

23. Austrian Note to Serbia. Forty-eight hours allowed for reply.

25. Serbian reply rejected. Austro-Hungarian Minister left Belgrade.

27. Sir E. Grey's proposals for conference of Germany, France, Italy, and Great Britain in London accepted by France and Italy and rejected by Germany.

28. Austria declared war on Serbia.

30. Partial mobilisation of Russian Army. War Council in Berlin.

August

1. Germany declared war on Russia and France. Luxemburg seized.

4. British ultimatum to Germany, requiring respect for Belgian neutrality. German attack on Liége. British Army mobilised. War declared by Great Britain on Germany at 11 p.m. Admiral Sir John Jellicoe appointed to command the Grand Fleet.

5. Lord Kitchener appointed Secretary for War.

6. Commons voted £100,000,000 and 500,000 men.

8. French captured Altkirch, Alsace.

9. *U* 15 sunk by H.M.S. *Birmingham*.

10. France declared war on Austria. Germans in Liége.

12. Great Britain declared war on Austria. Sale of *Goeben* and *Breslau* to Turkey.

13. Fall of last Liége forts.

15. Japanese ultimatum to Germany. Russian proclamation promising autonomy to a new united Poland under Russian suzerainty.

16. British Expeditionary Force landed in France.

17. Belgian Government transferred to Antwerp. Serbian victory at Shabatz.

20. Brussels occupied by the Germans.

23. Fall of Namur. Japan declared war on Germany. Bombardment of Tsingtau. British engaged at Mons.

24. French driven back in Lorraine.

25. Destruction of Louvain.

26. Conquest of Togoland by British and French. British retirement to line Cambrai—Le Cateau in northern France.

28. Naval engagement in Heligoland Bight.

29. German Samoa occupied by New Zealanders.

31. Russian defeat at Osterove.

September

2. Austrians heavily defeated after seven days' battle; Lemberg occupied by Russians.

3. French Government removed to Bordeaux.

4–6. Great Britain, France, and Russia signed agreement not to make peace individually. Rheims in German hands. Sir John French's first dispatch issued.

6–10. Battle of the Marne.

7. German advance in France reached its most southerly point, east of Paris. Fall of Maubeuge.

9. Indian offers of 70,000 troops and equipment announced.

10. Russians captured Tomaszow.

11. Turkey announced abolition of the Capitulations. German New Guinea and Bismarck Archipelago occupied by the Australians.

13. German rally from retreat, at the Aisne.

16. Russian retirement from East Prussia.

17. Austrian Army routed in Galicia.

20. Bombardment of Rheims Cathedral.

22. British cruisers *Aboukir*, *Hogue*, and *Cressy* sunk by submarine in North Sea. General Botha assumed command in S. Africa. Madras bombarded by the *Emden*.

23. Naval air raid on Zeppelin sheds at Düsseldorf.

27. Germans occupied Malines.

October

6. Belgian Government removed from Antwerp.

7. Antwerp evacuated by the Allies. All but a small portion of the fighting forces successfully withdrawn.

9. Germans under General von Baseler entered Antwerp.

10. Naval air raid on Düsseldorf. Death of King Carol of Rumania.

13. Rebellion of Col. Maritz in S. Africa. Martial law proclaimed. Ghent occupied by Germans. Germans within 16 miles of Warsaw.

14. Allies occupied Ypres.

16. H.M.S. *Hawke* sunk by submarine.

16. Arrival of Canadian troops in England.

17. Four German destroyers sunk off the Dutch coasts by English destroyers and H.M.S. *Undaunted*.

18. British naval bombardment of Germans on Belgian coast with monitors.

21. State sale of alcohol prohibited in Russia.

22. German attack on Warsaw beaten off.

27. Maritz defeated. Flight into German territory. 2,500 refugees rescued from French liner *Amiral Gauteaume*.

28. De Wet and Beyers joined the S. African rebels.

30. Prince Louis of Battenberg resigned office as First Sea Lord. Lord Fisher succeeded.

31. Russian cruiser *Jemtchug* and French destroyer sunk in Penang Harbour by the *Emden*. H.M.S. *Hermes* sunk by submarine off Dover.

November

1. H.M.S. *Monmouth* and *Good Hope* sunk in action off Chilean coast.

2. Admiralty declared all North Sea a military area.

3. British and French squadron bombarded Dardanelles forts. German cruiser *Yorck* sunk by mine on returning from raid on Yarmouth.

4. British reverse in German East Africa.

5. Great Britain declared war on Turkey and annexed Cyprus.

6. Russians regained line of the San. Spy Lody shot at the Tower.

7. Capture of Tsingtau by the Japanese.

9. German cruiser *Geier* interned at Honolulu. New scale of Army and Navy pensions and allowances announced.

10. *Emden* destroyed by H.M.A.S. *Sydney* at Cocos-Keeling Island. *Königsberg* blocked in creek in East Africa.

11. Germans captured Dixmude.

12. Violent attack on British at Ypres.

14. Death of Lord Roberts in France.

17. New British War Loan of £350,000,000 announced. New Budget duties on tea and beer and income tax imposed.

20. German five weeks' struggle for the road to Calais exhausted.

21. British occupied Basra at head of Persian Gulf. Air raid on Zeppelin factory at Friedrichshaven.

23. Ypres in flames. Zeebrugge bombarded by British squadron.

26. H.M.S. *Bulwark* blown up in the Medway.

December

1. The King visited the front. Surrender of De Wet.

2. *Austrians captured Belgrade.*

4. General Botha captured seven hundred rebels near Reitz.

7. Rebel General Beyers shot while trying to swim across the river Vaal.

8. *Naval victory off Falkland Islands.* Collapse of South African Rebellion.

9. Serbians retook Valievo.

13. Submarine *B* 11 (Lieutenant Holbrook) entered Dardanelles and torpedoed Turkish battleship *Messudiyeh*. Gen. von Falkenhayn appointed Chief of German General Staff, superseding Count von Moltke.

14. *Serbians recovered Belgrade.*

16. Bombardment of West Hartlepool, Scarborough, and Whitby.

17. *Egypt declared a British protectorate.*

18. Prince Hussein Kamel Pasha nominated Sultan of Egypt in place of Khedive Abbas Hilmi, deposed.

25. Seven British naval airmen assisted by cruisers and submarines raided enemy warships off Cuxhaven.

26. Austrians in flight in Galicia and in the Carpathians.

31. Australians captured Bougainville (largest of the Solomon Islands).

January 1915

1. H.M.S. *Formidable* torpedoed in the Channel; 200 survivors. Institution of the Military Cross.

2. Turkish transport mined in the Bosphorus.

3. Russians destroyed two Turkish army corps at Ardahan in the Caucasus.

4. London Stock Exchange (closed since July 30) re-opened.

13. Baron Stephan Burian succeeded Count Berchtold as Austro-Hungarian Minister of Foreign Affairs. Tabriz (Persia) taken by the Turks.

January 1915—*continued*

14. Swakopmund (German South-west Africa) occupied by the Union Forces.
19. German airships attack Yarmouth, King's Lynn, Snettisham, and other Norfolk villages.
24. *British patrolling squadron under Vice-Admiral Sir David Beatty intercepted German battle-cruiser squadron and sank the Blücher in the North Sea.*
27. British £5,000,000 loan to Rumania arranged.
29. Russian advance in East Prussia towards Tilsit.
30. Germans checked by British near La Bassée.

February

2. British Parliament reassembled.
3. Turkish attempt on Suez Canal repulsed. German £3,000,000 loan to Bulgaria.
5. New British Army estimates providing for 3,000,000 men presented.
6. Financial conference at Paris arranged pool of resources by Great Britain, France, and Russia.
8. Turks in full retreat from Suez Canal.
12. Raid by 34 naval aeroplanes on Ostend, Bruges, and Zeebrugge.
13. Germans retook offensive in Alsace.
15. German advance in East Prussia and in Poland north of the Vistula.
16. Raid by 40 aeroplanes on Belgian coast towns.
17. Two Zeppelins wrecked off Danish coast.
18. *German official submarine "blockade" of Great Britain began.* Vessels liable to be sunk without warning.
19. Franco-British Fleet bombarded Dardanelles forts.
26. Dardanelles swept up to four miles from entrance.
27. Capture of the transferred (ex-German) steamer *Dacia* by French warship.

March

1. *British reply to German "blockade": Allied fleets will prevent commodities of any kind reaching or leaving the German Empire.* British battleships proceeded 10 miles up Dardanelles Straits.
4. German submarine *U* 8 sunk off Dover: crew captured; not to be treated as honourable prisoners of war.
5. Zeppelin *L* 8 wrecked near Tirlemont and 17 crew killed. H.M.S. *Queen Elizabeth* bombarding defences of the Narrows in the Dardanelles by firing over the Peninsula. Resignation of M. Venizelos, Greek Prime Minister.
9. M. Gounaris formed new Greek Ministry.
10. *Battle of Neuve Chapelle.*
18. Loss of H.M.SS. *Irresistible* and *Ocean* and the French cruiser *Bouvet* at the Dardanelles. Russians occupied Memel.
19. Labour representatives agreed in conference with the Government that during the war there shall be no stoppage of work on munitions.
21. Zeppelin raid on Paris.
22. *Russians captured Przemysl with 126,000 prisoners and 700 big guns.* Russians evacuated Memel.
26. Lupkow pass in the Carpathians captured by Russians.

April

6. By the King's command "no wines, spirits, or beer will be consumed in any of his Majesty's houses after to-day."
9. Russians in the Carpathians held the summits on a front of 70 miles.
13. Russian offensive in Carpathians arrested. Austro-Germans under General von Mackensen began great counter-movement.
14. British rout 15,000 Turks on the Euphrates.
17. *British capture Hill 60 S.E. of Ypres.*
20. Keetmanshoop (German S.W. Africa) occupied by Union Forces.
22. French and British driven back north of Ypres by German gas attack.
24. *The Canadian Division recaptured four 4·7 guns at Ypres.*
25. Allied forces landed on both shores of the Dardanelles. *Australians and New Zealanders landed at Anzac Cove.*
27. French armoured cruiser *Léon Gambetta* torpedoed in the Otranto Straits; 600 officers and men drowned.
28. German offensive at Ypres definitely stopped.

May

2. Russian Southern Armies heavily defeated in Western Galicia.
3. Italy formally denounces Italo-Austrian Alliances.
7. *Lusitania torpedoed.*
8. Capture of Libau (on the Baltic) by German raiding force.
10. German airship raid on Southend, Leigh-on-Sea, and Westcliff.
12. H.M.S. *Goliath* torpedoed in the Dardanelles; 20 officers, 160 men saved. *Union forces occupied Windhuk* (capital of German South-West Africa).
16. Russian 3rd Army in West Galicia forced to retire to the line of the San. Simultaneous retirement from Carpathian passes necessary, but a hold maintained in East Galicia.
19. Mr. Asquith, on the adjournment of the House of Commons, announced the coming reconstruction of the Government.
23. *Italy declared war on Austria.*
26. H.M.S. *Triumph* torpedoed off the Gallipoli Peninsula.
27. H.M.S. *Majestic* torpedoed off Gallipoli Peninsula. H.M.S. auxiliary ship *Princess Irene* accidentally destroyed by explosion off Sheerness.
27. Important French successes towards Souchez.
31. *Zeppelin raid on London*; six people killed.

June

1. French captured the sugar refinery at Souchez.
2. *Crossing of the Isonzo by the Italian Army.*
3. *Przemysl retaken by German and Austrian forces* after a bombardment by 36-in. guns. Surrender of Amara on the Tigris to the British.
6. Part of General von Linsingen's army crossed the Dniester at Zurarwno, 40 miles from Lemberg.
7. *Zeppelin destroyed between Ghent and Brussels by Flight Sub-Lieutenant R. A. J. Warneford, R.N., at a height of 6,000 ft.*
9. Monfalcone captured by the Italians.
13. General election in Greece. M. Venizelos gained 193 seats out of a total of 316.
16. Mr. Lloyd George took the oath as Minister of Munitions.
22. *Recapture of Lemberg* by the second Austrian Army under General Boehm-Ermolli.
26. General Sukhomlinoff, Russian Minister for War, resigned; General Polivanoff succeeded him.
27. Germans captured Halicz. Russians retreated from the line of the Dniester to the Gnila Lipa.

July

2. German cruiser *Pommern* torpedoed and sunk by British submarine under Commander Max K. Horton.
9. *Conquest of German South-West Africa.*
8. *National Registration Bill* passed the House of Commons.
14. German offensive on the Narew front. Przasnysz captured. New German offensive at Riga.
17. Von Hindenburg forced the Russians back to the fortresses on the Narew. Von Mackensen breaks the Russian line at Krasnostaw. Italian success on the Cadore frontier.
21. Austro-German army driven across the Bug in Sokal district. British success at Hooge.
22. Convention signed ceding to Bulgaria the Turkish portion of the Dedeagatch railway with the territory between the River Maritza and the frontier.
23. Germans crossed the Narew between the forts of Obryte Pultusk and Rozhan.
31. Russians evacuate Lublin.

August

1. Mitau, in the Baltic provinces, occupied by Germans.
4. *Fall of Warsaw.*
5. Fall of Ivangorod.
6. *Landing at Suvla Bay.*
8. German naval repulse in the Gulf of Riga. Nine battleships and 12 cruisers driven off.
9. Important British success north and west of Hooge.
11. Rapid German advance east of Warsaw.
12. Belgrade bombarded again.
17. Fall of Kovno.
18. *Russian naval victory in the Gulf of Riga.*
19. Fall of Novo Georgievsk. White Star liner *Arabic* torpedoed by German submarine.
20. *Italy declared war on Turkey.*
21. M. Venizelos accepted the Greek Premiership. *Cotton declared absolute contraband* by the British Government.
23. Osowiec occupied by the Germans. Russians retired from the Niemen and Bobr line.
25. Fall of Brest Litowsk.
26. British aeroplane, Squadron Commander Arthur W. Bizsworth, R.N., destroyed a German submarine off Ostend.
27. Austro-Germans broke through the Zlota Lipa position north and south of Brzezany.
29. Germans stormed Lipsk. Germans progressed east of Kovno towards Vilna.

September 1915

1. Russian Staff changes announced. General Alexieff appointed Chief of Staff.
2. Fall of Grodno. Rumanian Government stopped further export of cereals and transit of gold through the country.
5. *Tsar assumed supreme command of the Russian Armies.* Grand Duke Nicholas transferred to the command in the Caucasus.
7. Russian victory near Tarnopol in Galicia.
11. German concentration on the Dvinsk-Vilna line.
13. Admiral Sir Percy Scott placed in command of aerial defence of London.
15. Germans occupied Pinsk.
18. *Fall of Vilna.*
22. French air raid on Stuttgart.
23. Russians reoccupied Lutsk in Volhynia.
24. German assault on Dvinsk.
25. *Battle of Loos.*
26. French captured Souchez.
28. Defeat of the Turks at Kut-el-Amara.

October

1. Foreign Office announced German officers in Bulgaria
2. Bulgarian forces on Serbian frontier.
4. Russian ultimatum to Bulgaria.
5. *Allied forces land at Salonika.* Lord Derby appointed Official Director of Recruiting.
6. Austro-German invasion of Serbia.
7. M. Zaimis became Premier in Greece.
9. *Belgrade occupied by Austro-Germans.*
11. Bulgarians crossed the Serbian frontier east and south-east of Nish.
12. Greek Government declined to assist Serbia. *Nurse Cavell shot by order of German court-martial in Brussels.*
13. M. Delcassé, French Foreign Minister, resigned. *Zeppelin raid on London.*
14. Bulgaria at war with Serbia. Great Britain declared war on Bulgaria.
15. French gained possession of summit of Hartmannsweilerkopf, Alsace.
16. British Government declared a blockade of the Bulgarian coast.
17. Bulgarians cut the Nish-Uskub railway at Vrania. Allied Note to Greece. Cyprus offered to Greece by Great Britain.
18. Italy declared war on Bulgaria. General Sir C. C. Monro appointed to command the Mediterranean Expeditionary Force in succession to General Sir Ian Hamilton. Sir Edward Carson resigned from the Cabinet.
21. Russian fleet bombarded Varna.
22. Bulgarians occupied Uskub.
23. German cruiser *Prince Adalbert* sunk by British submarine in Baltic.
26. British transport *Marquette* torpedoed in the Ægean Sea.
27. Uskub retaken by the Serbians.
28. *French Ministry resigned*; new Cabinet—M. Briand Premier and Minister for Foreign Affairs, General Gallieni Minister for War. Lieut.-Gen. Sir Bryan Mahon in command of British forces in the Balkans.
29. *General Joffre in London.*

November

1. Fall of Kraguievatz.
2. German disturbances in Persia.
5. *Fall of Nish to Bulgarians.*
7. Italian liner *Ancona* sunk by submarine flying Austrian flag.
11. Greek Chamber dissolved. Mr. Churchill left the Government, in order to join his regiment.
12. Shah of Persia received Allied Ministers. Declared himself friendly.
16. Fall of Prilep.
20. Fall of Novi Bazar. *Lord Kitchener in Athens:* had audience of King Constantine.
22. *Great battle at Ctesiphon,* 18 miles from Bagdad. M. Venizelos decided to abstain from forthcoming elections.
23. Fall of Mitrovitza and Prishtina. British operating in Cameroon.
24. Entente Note to Greece as to security of Allied troops in Macedonia.
25. Greek reply guaranteed security of Allied troops. 250,000 Russians on Rumanian frontier.
26. New Allied Note to Greece.
29. Bulgarians cut Monastir-Salonika railway at Kenali. *British withdrew from Ctesiphon.*
30. Prizrend taken by the Bulgarians.

December

1. Reopening of Italian Parliament. Baron Sonnino announced adhesion to the Pact of London.
2. Fall of Monastir.
3. *General Joffre appointed Commander-in-Chief of French Armies.* General Townshend's forces reached Kut-el-Amara. Count Bernstorff informed by Mr. Lansing that Captain Boy-Ed and von Papen, German Naval and Military Attachés at Washington, are no longer acceptable to the Administration.
4. *Anglo-French Conference at Calais.* Fresh British forces landed at Salonika.
6. *Allied War Council in Paris.*
7. President Wilson's Message to Congress.
11. Greek Government agreed to withdraw all troops save one division from Salonika. General de Castelnau appointed Chief of Staff to General Joffre.
12. Greek ships detained at Malta released. Close of Derby Recruiting Campaign.
13. British under Colonel Gordon defeated Arabs west of Matruh.
14. *German seaplane destroyed off Belgian coast* by Flight-Sub-Lieutenant Graham, R.N.A.S.
15. *Sir John French retired from command of the British Army* in France and Flanders and succeeded by Sir Douglas Haig. Sir John French appointed to command of troops at home.
17. Russian success in Persia. Hamadan occupied.
19. *Withdrawal from Anzac and Suvla Bay.* Greek elections resulted in big anti-Venizelist majority, in consequence of abstentions.
20. General Ruszky retired. *Groups* 2, 3, 4, 5, *Derby Scheme, called up.*
21. Russians captured Kum (Persia). Sir William Robertson appointed Chief of Imperial General Staff in succession to Sir Archibald Murray. Sir Archibald Murray succeeded Sir Charles Monro in the Dardanelles. Sir Charles Monro succeeded Sir Douglas Haig in command of the First Army.
26. Russians occupied Kashan.
28. Cabinet crisis as result of Lord Derby's report.
29. Allied warships off Durazzo. French occupied island of Castellorizo.
30. P. & O. liner *Persia* sunk by German submarine. H.M. cruiser *Natal* sunk in harbour by internal explosion. *German, Austrian, Turkish, and Bulgarian Consuls arrested by General Sarrail.*
31. Sir John Simon resigned from the Government.

THE YEAR OF THE TURN OF THE TIDE

During 1916 the tide of success in the Great War definitely ebbed from the Germanic Powers and flowed in favour of the Entente nations and their allies. Many circumstances contributed to this end, but the most important was undoubtedly the great co-ordination of effort by the Allies as the result of a series of War Councils in Paris, London, and Rome. Lord Kitchener (the British War Minister) was on his way to visit the Russian Ministers and Front when, on June 5, he perished in the loss of H.M.S. *Hampshire* by a mine off the Orkneys coast. Russian co-operation has, however, been complete at all the War Councils, whether military or financial, or concerned with munitions.

The year saw the addition of Rumania as a fresh and active adherent of the Allies, and the formal declaration of war by Germany on Portugal (who later sent troops to co-operate on the European Fronts) and by Italy on Germany.

The number of Entente Powers was thus raised to nine: Great Britain, France, Russia, Italy, Serbia, Montenegro, Rumania, Portugal, and Japan, against the four enemy powers: Germany, Austria-Hungary, Bulgaria, and Turkey. The Declarations of war have been as follows:

1914

July 28.—Austria against Serbia.
Aug. 1.—Germany ,, Russia.
,, 3.—Germany ,, France.
,, 4.—Britain ,, Germany.
,, 7.—Montenegro ,, Austria.

1914—*continued*

Aug.	10.—France	against	Austria.
,,	12. Britain	,,	Austria.
,,	23.—Japan	,,	Germany.
Nov.	4.—Russia	,,	Turkey.
,,	4.—France	,,	Turkey.
,,	5.—Britain	,,	Turkey.

1915

May	23.—Italy	against	Austria.
,,	20.—Italy	,,	Turkey.
Oct.	14.—Bulgaria	,,	Serbia.
,,	14.—Russia	,,	Bulgaria.
,,	15.—Britain	,,	Bulgaria.
,,	16.—France	,,	Bulgaria.
,,	18.—Italy	,,	Bulgaria.

1916

Mar.	10.—Germany	against	Portugal.
Aug.	27.—Rumania	,,	Austria.
,,	27.—Italy	,,	Germany.
,,	28.—Germany	,,	Rumania.
,,	30.—Turkey	,,	Rumania.

The effect of the combined and simultaneous pressure on all the enemy fronts was not felt till half-way through the year. In the earlier months the Germans were still holding the initiative both on east and west, though their victorious progress into Russia had been brought to a stand round Dvinsk and before Riga, and the Russian revival was already beginning in the south. On the western side the enemy were able to launch on Feb. 21 their great and costly offensive against Verdun, and on May 14 the Austrians pushed aggressively down into the Trentino, wresting cities from Italy. In the Balkans the Bulgarian and Austrian advance had not only forced the remnant of the Serbian army through Albania to the coast and brought the fall of Cettigne (the Montenegrin capital) on Jan. 13, and the occupation of Scutari on Jan. 23, but had driven the British and French relief forces, based on Salonika, back over the Greek frontier and obliged them to take up there purely a defensive attitude for many months.

The complete withdrawal from the Gallipoli Peninsula on Jan. 8, and the series of disasters befalling the hitherto successful Mesopotamian expedition, culminating in the surrender of General Townshend and 2,970 British and 6,000 Indians at Kut-el-Amara on April 29, were further events encouraging to the enemy, who had the satisfaction also on April 20 of seeing the outbreak of the serious, but happily very short-lived, rebellion in Ireland.

The great naval victory of Jutland Bank, when the German Fleet made its showy but vain attempt to win the mastery of the seas, marked the turn in affairs. The concerted offensives of the Allies followed thus:

June 4. Russian offensive opened in Bukovina and resulted in fall of Czernowitz on June 17.

June 25. Italian advance in the Trentino, and swift regaining of the ground and cities lost.

July 1. Franco-British offensive opened on both sides of the Somme.

July 2. New Russian offensive in centre of eastern line at Smorgon.

Aug. 8. Portugal (against whom Germany had declared war on March 10) extended her co-operation to Europe.

Aug. 27. Rumania declared war on Austria and swiftly captured all the passes through the Carpathians, penetrating to the Hungarian plain and linking up with the end of the Russian line. She was subsequently forced back under the fullest weight of pressure the enemy could concentrate against her.

Sept. 21. Franco-British advance from Salonika supporting Serbian offensive against Bulgaria in Macedonia, while a Russian force passed into the Dobruja to join the Rumanians against a Bulgarian counter-inroad under German direction.

FIGHTING IN THE WEST

The British Front

The expansion in size and equipment of the British armies on the Western Front continued during 1914 with ever-accelerating speed. Military service became compulsory for single men on Jan. 24 and for married men on April 7.

By July, the length of additional front taken over from the French was nearly equal to the full extent of line as it existed at the beginning of the year from north of Ypres to Souchez. On March 23 it was officially notified that the sector Souchez to Arras had become a British responsibility, and by June 27 British reconnaissance attacks were noted as occurring from the La Bassée canal as far south almost as the line of the Somme. When the great push was launched on July 1, the junction-point between French and British was just north of the Somme, along both banks of which the French were operating.

On Dec. 15, 1915, Field-Marshal Sir John French relinquished the command-in-chief of the British Forces in the field and returned to England to take supreme command of the Home Defence and Reserve Forces, which, like those on active service, were developing with enormous speed. The command-in-chief in France devolved on General Sir Douglas Haig, previously commanding the First Army, which now passed under General Sir Charles Monro.

Almost simultaneously, on Dec. 21, General Sir William Robertson became Chief of the Imperial General Staff in succession to Sir Archibald Monro. The burden on the Minister for War had been growing daily, and Sir William Robertson, on his appointment, relieved Lord Kitchener by assuming the supreme direction of all operations.

Throughout the early months of the year the British armies continued to stand for the most part on the defensive, though there were frequent periods of intense bombardment at many parts of the line. The enemy made a series of more or less violent attacks on British position.

On Dec. 19 they tried—with gas—at Ypres, and failed. Five weeks later, on Jan. 27, the attempt was made N.W. of Loos, and was beaten back. Next day there was an unsuccessful assault at Carnoy.

The British retorted on Feb. 7 with a fierce artillery attack in the Arras sector and a long-range bombardment of Lille.

There followed a period during which short ranges of trench were captured and recaptured at various points thus:

Feb. 12.—Trenches won in Vimy sector.

Feb. 14.—600 yards of the International trench S.E. of Ypres lost.

March 27.—International trench regained.

March 27.—First and second line trenches on 600 yard front captured at St. Eloi.

March 30.—German bombers succeeded in again reaching the lost trenches at St. Eloi and capturing a mine crater. The mine crater was retaken, lost and retaken again, before it eventually remained firmly in British hands on April 10.

Another exchange of trenches was on the Ypres-Pilkem road between April 12 and 21.

Chief Fortresses

On April 27, by furious rushes, the enemy succeeded in entering the British trenches at a few points, but they were heavily repulsed on the Arras sector on April 28 and a gas attempt near Loos broke down next day. The British artillery smashed an attack from the Messines ridge (between Ypres and Armentières) on April 30; a renewed attack east of Ypres was driven back next day, and the Germans were simultaneously repulsed in an attempt towards Albert at the southern end of the line. On May 11 the enemy succeeded in taking about 500 yards of British trench north-east of Vermelles (near Béthune), and on May 13 entered the trenches at Ploegsteert. They lost most of this ground again at once, but followed up with a rush against the Loos salient. On May 15 it was the British turn to occupy 250 yards of German trenches on the ridge north of Arras, but after recapturing a mine-crater the Germans stormed the trench on the ridge over a length of 1,500 yards on May 21.

Of all the severe but preparatory fighting, the most sustained and extensive effort occurred in what has been described as the *Third Battle of Ypres*. It began on June 2, with a strong surprise attack on the salient east of Ypres, held by Canadian troops, between Hooge and Hill 60 (Zwartelen). The front was driven in to a depth of about 700 yards, and Major-General Mercer and Brig.-General Williams, who were inspecting the front trenches at the time, were lost in the attack. General Mercer was reported killed and General Williams a prisoner. The Canadians counter-attacked next day, and fighting continued with slight lulls till, on June 13, the position formerly held had been completely recovered.

The Germans had one more brief success in seizing British trenches over a narrow front at Givenchy on June 22. Just afterwards the British artillery burst in unexampled intensity along the whole line from Ypres to the Somme. The bombardment continued till the end of the month and was accompanied by a series of reconnaissance raids at many points. At this time the Russian offensive on the East had already cleared the Bukovina and General von Hindenburg was demanding fresh troops for his countermove to check the Austrian débâcle. The western artillery bombardment was an announcement that the British 'push" on the west was about to begin, but gave no indication of the part of the line in which it would occur. On July 1 French and British together went over their parapets for the great Somme advance. Before describing this, however, reference must be made to earlier events on the French portion of the Allies' west front.

The French Front

At Verdun, where in six months of terrific fighting they withstood the fiercest and most sustained effort of the enemy to break their line, and on both banks of the Somme in front of Péronne, where, in close co-operation with the English, they themselves succeeded in the biggest "push" backward of the enemy since the battle of the Marne, the French had their two main centres of effort during the year. There were subsidiary engagements all along the line, and the artillery practice, as on the British portion of the front, increased enormously in intensity as the Allied efforts multiplied the output of munitions. The immediate effect of these tremendous and prolonged battles shows on the map as causing only a slight bending of the line. The conclusion has not, in fact, been reached at either of the two main points named, but whereas on the Somme the Allies are pressing more steadily and successfully day by day, at Verdun the German attack has slackened off, and the end of the year finds the chain of original fortresses all in French hands again.

As in the British Army, there were important rearrangements in command at the beginning of the year, to meet the requirements of the expanding army. General Joffre, previously commanding at the Front, had become (on Dec. 3, 1915) Commander-in-Chief of all the French Armies in whatever part of Europe or the world. Supporting him as Chief of Staff was General de Castelnau.

During December and January there were minor operations, chiefly in the Champagne area, where the Germans appeared to be pressing with the object of regaining the ground lost in the September advance by the French at the time the British captured Loos. At St. Souplet the French lost and regained a trench on Dec. 7; next day they counter-attacked five miles to the south-east at the Butte de Souain; on Jan. 9 the Germans made a strong attack on the Champagne front only to be again repulsed. However, on Feb. 13 the enemy were able to gain trenches on the Tahure to Somme-py road and only some of the trenches then seized were recaptured in the counter-attack.

A bigger, though temporary, French success was in the Vosges, where, after another struggle on Dec. 21, for the hotly-disputed summit of Hartmannsweilerkopf, they captured 1,300 prisoners and won a foothold, only to lose the ground again next day. There was another German success on Jan. 28, when they seized the trenches on a two-mile front at Frise on the Somme; these were not retaken till Feb. 11.

The German armies in the Meuse district, commanded by the Crown Prince, were suddenly flung against the fortress of Verdun on Feb. 21. While this great struggle was in progress, and at the moment when the first onrush was succeeding, the Germans on Feb. 27 made a renewed attack in Champagne and carried the first French line near Navarin Farm. On Mar. 2 they penetrated a small work near Maisons de Champagne, but on the following day the French regained these trenches. On Mar. 11 the enemy tried again with a surprise attack near Reims between Troyon and Berry-au-Bac and penetrated some positions, but it was not until June 23 that any further serious attempt was made in this region, and this, too, faded away with the loss by the Germans of the initiative on all fronts.

The Defence of Verdun

The fortress of Verdun on the Meuse, 40 miles due west of Metz and 170 miles east of Paris, holds the north-west gateway into France from Luxemburg and Lorraine. The city stands on an eminence on the left bank of the river, which zigzags away in a north-westerly direction, flanked on the right by a series of hill ridges (the heights of the Meuse). On the left bank below the city the valley broadens from one to two miles towards another ridge of wooded hills and forest.

Verdun is the centre of the one considerable salient thrust into the German line as it settled down after the retreat from the Marne. During the first year's war, attempts were more than once made against it by the enemy armies under the Crown Prince, operating from Luxemburg and the Woevre. It was at this—the strongest point probably in the entire French line—that, forestalling the expected Franco-British offensive in the west, the enemy launched on Feb. 21 an attack which raged in a succession of mighty battles

through the spring and summer, and diminished in intensity only as the Germans were worn down and placed on the defensive on all the western front.

To beat down the French defences at Verdun and make a new drive at Paris was, for the Germans, the next stage in a series of huge advances through strong defences. They were still on the flood of success. Serbia had been overwhelmed, the Russians driven beyond Poland and to the limits of Galicia. Big guns, and superiority of man-power in their armies which they were able to transfer on their railways, and the advantage of operating on their closely organised interior lines, had so far carried all before them. The same success might have been achieved at Verdun as at Antwerp, Namur, and other fortresses. Elaborate preparations for vanquishing France were made through the winter. The heavy artillery used with such deadly effect in Serbia and Russia was collected on the western front. Thirteen new divisions were brought into the line.

The French and British were aware of these preparations, while they themselves were training men and collecting munitions for their counter-stroke. They could not tell where the enemy might choose to strike, or when. For their part they remained meantime on the defensive, though their bursts of heavy bombardment, as that of Lille and along the Arras sector in February, may have hurried the German onslaught. Before it actually came the enemy were busy in the air, but their raids on the French lines of communications and stores met with swift counter-action. A Zeppelin was brought down in flames at Brabant-le-Roi, another was driven off by gunfire, and an aeroplane squadron was also put to flight.

The first rush, which was preceded by a bombardment so intense and concentrated that the front French lines completely disappeared, carried a good deal of ground in a week. The assault was flung against a wide area north-west of the city from Brabant-sur-Meuse, about 15 miles distant along the winding road to Herbébois, on the eastern ridge of the Meuse heights. It resulted in the immediate gaining of a considerable salient in the centre of this line from Haumont Wood to Beaumont. Brabant itself was evacuated on Feb. 23; next day the French on the hilly east bank were nearly three miles back on the line Champneuville-Ornes, and the Germans were claiming to have made 10,000 prisoners. The situation looked grave and became more so when, on Feb. 26, the enemy, after desperate fighting, closed further in and took possession of *Fort Douaumont*, the north-easterly of the ring of works in the originally fortified area of Verdun, before the defences had been thrown far out in advance. It was explained by the French that this fort had been practically dismantled some time previously, but they made strong attempts to regain a footing in the position without permanent success. The village of Douaumont held out longer and changed hands several times, but by Feb. 28 the French had withdrawn on the east side of Verdun to the heights immediately above the Meuse, and the Germans were entrenching on the Poivre ridge (one of those heights north of the city). The opening of the offensive had brought the German line forward from an average distance of 14 miles from Verdun to an average distance of four miles only. On the south-east they were still from 12 to 15 miles away, but here also they were beginning to press.

It was at the four-mile radius that the real resistance was encountered, and although by flinging in division after division of the best Prussian and Bavarian troops new positions were slowly gained by the enemy in the ensuing months, the progress was by yards only; it was frequently retarded altogether; often a front reached at enormous cost was lost again by immediate counter-attack. General Pétain, who took over the defence early in the struggle, was never besieged in the sense that the fortress was surrounded. The Germans half-circled his front, but to the rear his communication with headquarters and Paris were always open.

After a lull, what may be described as the *second battle for the fortress* began on March 2, when the enemy gained their first footing in Douaumont village, but were heavily repulsed from the neighbouring fort of Vaux. Swinging round to the north-west, the Germans rushed the village of Forges and Hill 265, west of the Meuse, on March 6, while on March 7 they had pushed in also on the south-east side to seize Fresnes, 10 miles out. The chief pressure, however, continued at two points, one on the west of the river and the other in the north-east corner of the defences, between the adjacent forts of Douaumont and Vaux. Other points were tested from time to time, but at these the struggle was almost ceaseless.

On the north-west side there began a furious fight for Corbeaux (the Rooks') Wood just south of Forges. The Germans won it, and the French regained it, foot by foot. Then the Germans captured it afresh. By March 14 they were through it and striving for a footing in Cumières, a village immediately to its south. Now also they first appeared on the slopes of *Mort Homme*, or *Dead Man's Hill*, on the western edge of the wood. This hill became a scene of some of the deadliest carnage in the whole of this fated area.

Seeking a fresh point of vantage, the enemy suddenly attacked far out on the left of the French defences, seized the Avocourt Wood on March 19, and from there, northward to Malancourt village, directed a renewed assault, aided by liquid fire, on Mort Homme, this time from its western side. The French by counter-attack drove them again from one end of Avocourt Wood on March 29 and recaptured an adjacent redoubt; but on March 31 they were compelled to evacuate Malancourt, and after another week of stubborn resistance they yielded up also their salient projecting into Béthincourt, just north of Mort Homme. The Germans were now close up to the terrible hill on three sides. They launched a new and tremendous attack on April 9 and 10, but although they won trenches on the hill itself, the cost in slain was appalling and they recoiled. By April 23 the French were making progress again in the Caurettes Wood east of Mort Homme, to the north of which and of Cumières they regained some trenches. Continuing the "push" they forced German positions to the north-west of the hill, capturing 100 prisoners.

Douaumont and Vaux

Simultaneously with this sustained and desperate fighting west of the Meuse, an equally hot conflict was waging on the other side for the positions at *Douaumont* and *Vaux*. Between the two forts lay the Caillette Wood, and west of the villages, lower down the slopes towards the Meuse, was the stronger fortified post of *Thiaumont Farm*, the possession of which was bitterly contested for many weeks. At the beginning of April the Germans won a footing in the Caillette Wood and were in possession of Vaux village, but not the fort. They were partly driven out again, and on

COPYRIGHT "GEOGRAPHIA" LTD 55 FLEET STREET LONDON E C

April 15 the French not only drove back a strong attack between the two villages, but themselves seized some of the German trenches and made 200 prisoners. On May 1, coincidently with their counter-push on the Mort Homme side, the French attacked south-east of Douaumont Fort and captured 500 yards of front-line trenches. Subsequently, while the Germans were expending themselves in a great fresh effort to get round Mort Homme from the Avocourt region, the French continued their progress from Thiaumont.

The enemy attack on Mort Homme reached a new intensity on May 20 when five divisions were flung against it, but on the same day the French took two trenches between Avocourt Wood and the Meuse, and drove off attacks on the west side of Mort Homme. Next day they seized the German trenches on a mile and quarter front from Thiaumont and gained a footing in the ruins of Douaumont Fort. Their considerable success drove the enemy to fresh effort on a still larger scale than previously attempted. The battle raged at its height of fury and both armies were engaged, on May 24, along the entire front around Verdun. While the Germans regained the ruins of Douaumont, the French established themselves in part of Cumières. The Germans, after terrific fighting, took a trench near Thiaumont on May 25, the French won it back next day and followed up this success by entering the enemy trenches south-west of Mort Homme. Again piling on men and heavy guns, the Germans drove the defenders out of Caurettes Wood and away from Cumières back to Chattancourt; but again an immediate counter-attack thrust the enemy back to Cumières.

More tangible, but still incomplete, success was attained by the Germans on the other side of the river. On June 1 they opened a daily renewed assault on Vaux Fort, and it fell to them on June 6, after an heroic defence by a small garrison under Major Raynal. Still pressing on, they penetrated, on June 12, the French position on Hill 321, near Thiaumont, their nearest point to Verdun itself. They were resisted stoutly at each new attempt forward, but on June 23 gained not only Hills 320 and 321 together with the Thiaumont work, but also *the village of Fleury*, just to the south-east. The defence, however, was not broken. On June 26 the French were making gains near Thiaumont, and for several days running the work changed hands. It then remained for a time with the Germans.

Although on July 1 the Franco-British offensive diverted attention to the Somme, the Germans were unwilling to acknowledge their failure to break the defences at Verdun and from time to time indulged in sporadic attacks of great intensity. The French, on their part, were not too occupied to neglect attempts to secure some of the positions. Fighting for a time moved out to the eastern side of the Meuse heights. The enemy gained a footing in Damloup, a small fort and battery in the valley road from Ornes to Fresnes. As a set-off there was a minor French success in the Fleury sector on July 22, and on July 25 they retook *the Thiaumont redoubt*. After beating off a fresh attack, they began a really considerable offensive which resulted on August 3 in the *retaking of Fleury* and the capture during the fighting of 1,750 prisoners. Next day the Germans were back in the village, but only to be driven out again. A similar experience befell them at the Thiaumont work, which they re-entered on August 8 and lost again the same day.

Once again the Germans failed in an attempt to regain Fleury on Aug. 19. An effort on a larger scale was made on Sept. 3 to break the French line between Le Chapitre and Le Chenois, south-east of Fleury. This failed, and thereafter the ascendancy passed directly to the defenders, who during September gained several minor successes. These prepared the way for a brilliant victory on Oct. 24, when at one blow *the French regained Douaumont fort and village, Thiaumont farm and work*, and took besides over 6,000 prisoners, 15 guns, 51 trench guns, and 144 machine guns. Nor did their progress end there. On Nov. 2 the Germans themselves announced the *evacuation of Fort Vaux*, a forced acknowledgment of the irresistible bombardment to which it had been subjected. Thus in one week the French regained all the ground lost in the stubborn fighting since April, and were once more in possession of the complete circle of Verdun's forts.

Principal Dates

Feb. 21.—Verdun battle began.
Feb. 26.—Fall of Fort Douaumont.
May 24.—Battle at its height.
June 6.—Fall of Fort Vaux.
June 16.—Germans reach nearest point to Verdun (not quite 4 miles).
June 23.—Fall of Thiaumont work and Fleury; also Hills 320 and 321.
Aug. 3.—French recapture Fleury.
Oct. 24.—Recapture of Douaumont fort and village and Thiaumont work and farm.
Nov. 2.—Germans evacuate Fort Vaux.

THE BATTLE OF THE SOMME

The great Franco-British offensive on both banks of the River Somme began at 7.30 in the morning of July 1. For five days previously the entire German front had been subjected to an intense artillery bombardment. The front chosen as the definite point for pressure was about 25 miles in length, from about 10 miles south of Arras, where the line was bent backward in a rough semicircle to come forward again on the Somme banks about 5 miles west of Péronne. Thence the line continued more directly south-ward again to the west of Chaulnes. The main British push was north-eastward from the town of Albert across the valley of the Ancre, a tributary of the Somme, in the direction of Bapaume, an important road-centre on the farther side of a strongly held ridge of hills. The French objective was Péronne itself. The Franco-British lines joined at the extremity of the German salient about two miles north of the river.

Immediate success attended the assault in the middle and at the southern end of the line. By the second day British troops had captured a labyrinth of German trenches on a front of 7 miles to a depth of 1,000 yards, and the strongly fortified villages of Montauban, Mametz, Fricourt, and La Boisselle, together with more than 4,000 prisoners and vast quantities of material. At the northern end the immensely strong post of Thiépval with a most elaborate system of trench defences held up the advance, and round it the fight raged fiercely for many days. On July 7, when further substantial progress was made, a portion of the Leipzig Redoubt south of Thiépval was captured, the German line was broken at Ovillers, a new advance was made of 500 yards over a maze of trenches on a front of 2,000 yards at La Boisselle, two woods were taken near Fricourt, and the Prussian Guard, who had been thrown into the enemy line, was heavily defeated.

On July 8 a footing was firmly established in the Trônes wood, which the enemy made six unsuccessful counter-attacks to recover. On the 10th the capture of Contalmaison brought the first phase of the battle to a close. General Sir Douglas Haig reported the complete capture of the first system of German defences over a front of 14,000 yards, and a total of prisoners of 7,500 with 26 field guns.

Meantime the French, under General Foch, operating in the actual Somme valley, were making still larger conquests of territory. Nearly 10,000 prisoners fell to them on the first day's fighting, and by July 9 they were within one mile of Péronne along the main road from Bray.

The *second phase of the battle* opened on July 14. So successful was the British attack that the three important villages of Bazentin-le-Pétit, Bazentin-le-Grand, and Longueval were captured in one bound. A squadron of British cavalry was able to press through and account for some of the fugitives in the open, the *first employment of cavalry* on the western front since the great retreat.

On July 15 the Australian troops with great gallantry rushed the outskirts of the village of Pozières on the top of the ridge and took 2,000 prisoners: the village itself, however, was held with great desperation by the enemy for another week, and was only firmly established in British hands on July 25. Meantime on July 18 the enemy launched a heavy counter-attack on Longueval and Delville wood with 13 battalions, and succeeded in regaining a slight footing at each point. The ground was, however, won back again next day.

Encircling Combles

Steady and persistent pressure resulted on August 5 in the capture of the *second main German line* over a 2,000 yards length north and west of Pozières. Two German strongholds, however, obstinately resisted attack: Thiépval, at the north-western corner of the battle-area, and Combles, a big village, whence five roads radiated. While the British continued to press unremittingly at the first-named fortress, they joined with the French in an encircling movement of Combles. The French struck at the road which, linking Péronne with Bapaume, runs westward of Combles. This they cut on August 7 near the village of Maurépas. The British, on their part, attacked Guillemont, a village between Longueval and Combles, and Ginchy, to its north-west. The fighting at both points was long and fierce. Maurépas, however, was wholly captured on August 24, by which time the French were extending their hold along the road on which it stands. On Sept. 3 came another important joint attack. The British established themselves firmly in Guillemont and in part of Ginchy, which fell wholly to them on Sept. 9. The French advanced to the very outskirts of Combles and captured on the same day the village of Cléry on the Péronne road. South of the Somme also they renewed the offensive on the full 12-mile front and with brilliant results. In three days they had carried Soyécourt, Chilly, Vermandovillers, and reached the railway from Chaulnes to Roye.

The main attack, however, continued on the north bank of the Somme. On Sept. 12 the French encircling movement to the south had pushed well east of Combles and crossed and cut the high road from Péronne to Bapaume at a point just south of Rancourt. This road was held to the south past the junction with a supply road to Combles, which was thus deprived of its direct route of access from Péronne. The fall of Le Priez farm at the junction of the road followed on Sept. 14.

On the 15th the British resumed their attack on the north side of the circle and swept forward on a six-mile front to a depth of from 2,000 to 3,000 yards. The advance gave possession of Courcelette, Martinpuich, and Flers, the last-named commanding a main road southward from Bapaume. Four thousand prisoners were taken on this day, which was notable as the occasion of the first use of the armoured motor-forts, which have become known as "*Tanks*." The next stage —the capture of the two big villages of *Lesbœuf and Morval* directly north of Combles—followed on Sept. 25, when the line was advanced more than a mile. *Combles* was now virtually isolated. On Sept. 26 it fell. *Thiépval* yielded to similar pressure on the same day, and, in the middle of the British line, Guédecourt, an important village north of Lesbœufs, added a third success.

The enemy fought stubbornly to check the onslaught, and after Sept. 15 seven new divisions were brought up against the British and five against the French. At the end of the month Sir Douglas Haig summarised the position as follows:—

1. Since the opening of the battle on July 1 we have taken 26,735 prisoners.

2. We have engaged 38 German divisions, of which 29 have been withdrawn in an exhausted or broken state.

3. We hold the half-moon of upland south of the Ancre, occupying every height of importance, and so have direct observation of the ground to the east and north-east.

4. The enemy has fallen back upon a fourth line, the low ridge just west of the Bapaume-Transloy road.

He added the significant fact that for every enemy air-machine that succeeded in crossing the British front, "it is safe to say that 200 British machines cross the enemy's front."

The British line was now advanced well beyond the crest of the main ridge running from Thiépval to Sailly-Saillisel, another large village on the Péronne-Bapaume high road and next north of Rancourt. From this line the land slopes gently away to the north to within 2,000 yards of Bapaume itself. Across these slopes run a series of well-developed spurs the most important of which ends at the Butt de Warlencourt, three miles from Bapaume and near the main road from Albert. A little to the east another spur ends at Thilloy, and in front of both on the road itself lies Le Sars, with the smaller hamlet of Eaucourt l'Abbaye on a subsidiary road to the south-east. The *fourth German line* was just beyond these points. On Oct. 1 Eaucourt l'Abbaye was occupied. On Oct. 7, in conjunction with the French, there was another attack on a wide front between the Albert-Bapaume road and Lesbœuf. As a result the enemy was driven out of Le Sars and positions to the east and west of it. Further advance on any considerable scale was hampered for some weeks by incessant rain which turned the battle-area into a "wilderness of mud." Advantage was, however, taken of the brief interval of bright weather between Oct. 20 and 23 to deliver a successful local attack against two trenches known respectively as the Stuff and Regina, which had been tenaciously held by the enemy since the capture of the Schwaben Redoubt (on the highest point of the ridge beyond Thiépval), with which they were joined up on the morning of Oct. 21.

The enemy made a last violent attempt to regain the Schwaben Redoubt, but was not only repulsed (for the eleventh time), but was driven as well from the Stuff and Regina trenches.

During this period the French on their part made also one notable advance. On Oct. 18, after a three-days' struggle, they established themselves in *Sailly-Saillisel*. The attack thus rapidly converged on Bapaume, along the two main roads, the British on that from Albert and the French on that from Péronne, with Le Transloy, a very considerable village, as the next objective. South of the Somme the French were gradually creeping nearer to Péronne. On Oct. 18 they captured the German front over a mile-distance between Biaches and La Maisonette château, and were steadily approaching the railway line, which follows the course of the Somme at this point. Away to the south also they were pressing hard, and on Oct 21 had gained a footing in the Chaulnes wood.

Principal Dates

The following diary shows the dates on which the various French villages, farms, woods, and positions were captured by the Allies since the great push began on July 1. Those captured by the British forces are in black type, the others were taken by the French :—

A fresh and unexpected push was made by the British on both sides of the Ancre on Nov. 13. Its main strength was delivered on the north bank at a part of the line where the original attack in July failed. This time the enemy were driven out of the strongly fortified villages of St. Pierre-Divion, Beaumont-Hamel, and Beaucourt, and upwards of 8,000 prisoners were taken.

July 1.—Serre, **Montauban, Mametz,** Dompierre, Becquincourt, Bussu Fay.
July 2.—**Fricourt,** Frise, Curlu, Mereaucourt Wood.
July 3.—Herbecourt, Chapitre Wood, Feuillere, Buscourt, Flaucourt.
July 4.—**La Boiselle,** Barleux Wood, Belloy-en-Santerre, Asseviller.
July 5 and 6.—Sormont Farm, Hem, Monacu Farm, Estrées.
July 7.—**Leipzig Redoubt (Thiepval).**
July 8 and 10.—Hardecourt, Hill 97.
July 11, 12, and 14.—Contalmaison, **Mametz Wood, Brazentin-le-Grand, Trones Wood, Bazentin-le-Petit.**
July 15.—La Maisonette.
July 17, 21, 26, and 28.—**Waterlot Farm, Ovillers, Foureaux Wood, Pozières, Delville Wood, Longueval.**
August 20.—**Pozières Ridge.**
August 24.—**Hill 121.**
Sept. 3.—**Guillemont,** Forest, Clery.
Sept. 4 and 5.—Boycourt, Chilly, Hill 86, Hôpital Farm, Ramette Wood, Omiecourt.
Sept. 6.—**Leuze Wood,** Berny-en-Santerre.
Sept. 10.—**Falfemont Farm, Ginchy.**
Sept. 12 and 13.—Hill 145, Marrières Wood, Crest 76, Bouchavesnes, Abbe Wood Farm.
Sept. 14.—**Wunder Werk** (Thiépval), La Priez Farm.
Sept. 15 and 16.—**Bouleaux Wood, Flers, High Wood, Martinpuich, Courcelette, Danube Trench** (Thiépval).
Sept. 18.—Deniecourt.
Sept. 25.—**Morval and Les Bœufs,** Rancourt.
Oct. 1.—**Eaucourt l'Abbaye.**
Oct. 7.—**Le Sars.**
Oct. 10.—Bovent, Chaulnes Wood.
Oct. 14.—Genérmount.
Oct. 18.—Sailly-Saillisel.
Oct. 21.—**Stuff and Regina Redoubts.**
Oct. 22.—Ridge 128.
Nov. 7.—Ablaincourt and Pressoire.
Nov. 10.—**Regina Trench.**
Nov. 12.—Saillisel.
Nov. 13.—**St. Pierre-Divion, Beaumont-Hamel, Beaucourt.**

THE RUSSIAN FRONT

The end of the great Austro-German drive through Galicia and Poland in the autumn of 1915 had left the line of battle in the east roughly one that ran due north and south from Dvinsk (the railway centre and fortress on the Dvina) to the meeting-points of Rumania, Galicia, and Bessarabia on the rivers Dniester and Pruth. From Dvinsk, the line followed the Dvina north-west to the Baltic at Riga, which remained in Russian hands. The enemy offensive had accomplished much in the winning of territory, but had not, as was hoped and claimed by the enemy, put Russia out of the war as a serious fighter. It was necessary, however, that the Russians should maintain their attitude on the defensive while reorganising their great resources in man-power, and equipping their armies in a manner somewhat more approximately equivalent to the enemy in munitions.

Two apparent counter-moves were made early in 1916. One was in January in the Bukovina (the Hungarian Duchy adjoining Rumania), which the Russians had never wholly ceased to menace. After a month's fighting the Russian armies crossed the Dniester, but the effort appeared to fade away. The second offensive in April was against Vilna, the centre of the enemy line in the north. The later effort was more in the nature of a demonstration than an attempt to break through; it concluded with a reverse on April 29 at Lake Narotch, but it accomplished a slight rectification of the line and kept von Hindenburg engaged.

The great German offensive against Verdun had been launched two months before, and there were incessant demands from the commanders in the West for more troops to hurl against the French. Many were, in fact, withdrawn, especially from those which had leavened the Austrian armies in Galicia and Volhynia. Later in the year some of these were returned at the insistent call of Marshal von Hindenburg, whose view, even after he became Chief of the General Staff, and responsible therefore for the campaign on all fronts, was that the East was the decisive theatre of war. For the same reason the control of the armies in the south were eventually taken over from Austria by von Hindenburg, who regrouped them under General von Linsingen and other German generals.

The main campaign of the summer will, however, be better understood by reference to the following table, showing approximately *the positions of the opposing armies and their commanders, before the Russians began to strike their heavy blows in June.* The figures are based for the most part on German estimates. At the supreme head of the Russian armies in Europe was General Alexieff, acting for and with the Tsar. General Polivanoff ceased to be War Minister at Petrograd on March 29, and was succeeded by General Shuvaieff.

North of the Pripet Marshes

GERMAN

Northern Army

Commanded by *Field-Marshal von Hindenburg*, comprising:

Army.	Under.	Operating from.
		Baltic to Friedrichstadt.
8th	Gen. von Scholz .	Friedrichstadt to Vidzy.
10th	Gen. von Eichhorn	Vidzy to Upper Vilia (including Vilna).
12th	Gen. von Fabeck .	Smorgon to the Niemen.

Centre Army

From the Niemen to the Marshes nominally commanded by *Prince Leopold of Bavaria*, and consisting of:

Army.	Under.	Operating from.
9th	Gen. von Woyrsch .	The Niemen to the Marshes.

RUSSIAN

Northern Army

Commanded by *Gen. Kuropatkin* (succeeded Gen. Plehve on Feb. 19), comprising:

Army.	Under.	Operating from.
12th	Gen. Gorbatowski .	Venden.
5th	Gen. ——	Rzezytsa.
1st	Gen. Litvinoff .	Disna.

Centre Army

Facing Vilna, under *Gen. Evert*, comprising:

Army.	Under.	Operating from.
2nd	Gen. Smirnoff .	Dokshytse.
10th	Gen. Radkievitch .	Minsk.
4th	Gen. Rogoza .	Upper Niemen.
3rd	Gen. Lesh . .	N. of Pripet Marshes.

South of the Pripet Marshes

AUSTRO-HUNGARIAN

Southern Army

Under the *Archduke Frederick*, com prising:

Army.	Under.	Operating from.
3rd	Gen. Puhallo von Brlog	Between the Marshes and Tchartoryisk.
4th	Archduke Joseph Ferdinand	From Lutsk and Dubno toward Rovno.
2 Ger. Divns.	Gen. von Linsingen	
2nd	Gen. von Boehm-Ermolli . .	South from Dubno.
	Count Bothmer . } Gen. von Pflanzer-Baltin . . }	In Galicia.

RUSSIAN

Southern Army

Under *Gen. Brussiloff* (who succeeded in April *Gen. Ivanoff*, appointed Military Adviser to the Tsar), comprising:

Army.	Under.	Operating from.
8th	Gen. Kaledin .	Round Rovno.
11th	Gen. Sakharoff .	In Volhynia and Podolia.
7th	Gen. Shcherbatieff	In E. Galicia.
9th	Gen. Lechitsky .	Along the Dniester and between Bukovina and Bessarabia.

It was in June that the Russians were ready for their first real blow. They were earliest of the Allies to resume the offensive, and their sweeping successes were achieved at the time when Verdun was being severely pressed, when the Austrians, in an unexpected rush, were driving the Italians backward through the Trentino and when the first impressions of the naval battle off Jutland Bank were that, if not a German victory, it was, at all events, a drawn issue.

The Russian advance was on the southern half of their long front. After a preliminary bombardment the *four armies under General Brussiloff struck forward at once along the whole line* from the Pripet Marshes to the Rumanian frontier. On June 4, the first day of the push, they secured 13,000 prisoners from the shaken Austrians. Another 12,000 prisoners were taken next day. On June 6 the advancing Russians had pushed their northern wing into Lutsk, were across the Ikva and the Styr, and had another 15,000 prisoners. In two days more General Brussiloff had crossed the Strypa, still gathering prisoners by the 10,000 at a time; on June 10 he was in Dubno. Meantime at the southern end General Lechitsky was progressing toward Czernowitz, capital city of the Bukovina. Only in the centre did the Archduke Frederick's forces stand firm against the onslaught opposite Tarnopol covering Lemberg as their rally-point.

Temporarily checked here, General Brussiloff pressed north-west from Lutsk along the road to Kovel, the railway centre in front of Brest Litovsk. At the same time his southern army forced the line of the Dniester at Zaleszezyki. The advance at that end was so rapid that *on June 17, Czernowitz had fallen* (for the third time during the war) into Russian hands. From the Lutsk salient a cavalry force driving to the south-east entered Radzivioff (only 12 miles north-east of Brody on the Lemberg road) on the same day. The Austrian centre on the Strypa continued, however, to hold firm.

General Lechitsky did not stop at Czernowitz. On June 21 he had taken Radautz, 30 miles to the south, and three days later his troops were in Kimpolung, almost on the Rumanian frontier, and simultaneously had won Kuty in the north-west of the Duchy on the road to Kolomea. Count Bothmer, the Austrian commander, found himself in danger of being pressed over, or against, the Rumanian frontier, and to save the remnant of

his army withdrew it. *By June 24 the Bukovina was entirely Russian.* In the heavy defeats of the preceding three weeks the Austro-Hungarian armies of Archduke Joseph Ferdinand in Volhynia and of General von Pflanger-Balten in the Bukovina had lost more than half their effectives, and the other enemy armies south of the Pripet Marshes had suffered severely. The captures by General Brussiloff's forces between June 4 and June 23 were enumerated officially as follows: 4,031

officers, 194,041 men, 219 guns, 644 machine guns, 196 bomb mortars, 146 artillery ammunition wagons, and 38 searchlights.

The task immediately ahead was *the straightening of the line between the two big salients won in Volhynia and in the Bukovina*. In the centre Count Bothmer was strongly posted on a 40-mile front, flanked on the south by the Dniester, on the north by a series of hills, marshy rivers, ponds, and forests, and communicating with its rear by four lines of railway. His hold enabled the enemy indeed to attempt during June a counter-offensive on the northern sector. A further diversion was attempted on a small scale by von Hindenburg's own forces north of the Pripet; the Russian trenches were entered at Smorgon on June 20, but the Germans were speedily driven out again. North of the great marshes there was no immediate further development, though severe fighting continued round Baranovitche. During June, indeed, the Russian Third Army under General Lesh was transferred from the north to the south side of the marshes, and, on July 4, it pushed a rapid advance along the railway from Sarny towards Kovel, and by straightening the Russian line here completely covered the flank of General Kaledin. By July 8 General Lesh had reached the Stokhod river, 25 miles west of the Styr.

Still more brilliant progress was made on the south side of the Lutsk salient by General Sakharoff, who, on July 15, broke the enemy line on a 12-mile front opposite Vladimir Volnsk and Brody and took 13,000 prisoners. The enemy were driven completely over the Styr on July 21, and a series of big battles, in which the enemy under General von Linsingen stubbornly contested each stage, but were forced to retire with heavy losses, ended in the *fall of Brody* on July 28. In the three days' fighting before Brody the Russians had taken 20,000 prisoners.

Some further progress was made by General Lesh and General Sakharoff, but the next big advance was by General Lechitsky, who had been pressing north-eastward towards Lemberg, the common objective of the Russian armies in the south. On June 28 he opened a general offensive against the new positions taken up by the Austrians after their withdrawal from the Bukovina. It was a swift blow which again crumpled the enemy, who lost upwards of 10,000 men. *Kolomea fell at once*. Progress immediately west was difficult, but successes were speedily gained on the right (or east) of General Lechitsky's army. On July 9 he had worked westward as well to Delatyn. Exceptional rains and floods in the Dniester region again delayed the advance, and it was on August 7 that the offensive was resumed. Thenceforward progress was swift. On August 9 Khryplin, the railway junction just outside the important Galician town Stanislau was seized, and the next day *Stanislau itself was entered* (for the third time in the war) by Russian troops.

Pressed thus in front and in both flanks, *Count Bothmer had no alternative but to withdraw*. The last point on the line held by the Austrians throughout the winter fell on August 12. The entire army of the centre fell back from the Strypa to the line of the Zlota Lipa. In the ten weeks' fighting south of the marshes the enemy had lost in prisoners 300,000 men, and their total casualties were computed as almost equal to the original strength of the Austrian armies between the Pripet and the Carpathians. As the consequence of these defeats, the Archduke Frederick and the Chief of the Austrian General Staff (Baron Conrad von Hotzendorf) had to relinquish their posts.

Lemberg was still covered from the south-east by the important bridgehead and town of Halicz on the Dniester, and severe fighting now ensued for the possession of this post. In the meantime pressure was continued at other points on the line. Thus an advance was pushed at the end of August and beginning of September both north and south of the Jablonica Pass in the Carpathians, while progress occurred also along the Zlota Lepa near Brzezany. On Sept. 6 the Halicz bridgehead fell to assault by Gen. Shcherbatcheff, who forced an advance of 6 to 9 miles depth over a 12-mile front between the Zlota Lipa and the Gnila Lipa. On Sept. 30 the attack on Lemberg was opened afresh from the north-eastern or Brody approach, and on Oct. 5 Gen. Sakharoff attacked Boehm-Ermolli's army along the full 25-mile front between Brody and Tarnopol.

By this time, however, affairs in Rumania were demanding attention, and early in November Gen. Sakharoff was transferred to command the Russo-Rumanian forces then engaged in stemming the onrush of Field-Marshal von Mackensen with his German-Bulgarian army in the Dobruja. Under von Hindenburg's plan, the main enemy pressure was now exerted in the eastern area (permitting the Franco-British-Italian successes in the west). The consequence was that the Russian progress was again arrested, and a reverse was suffered in the Dorna Watra region on the Rumanian-Bukovina frontier—where the Russians had joined up forces with their new Balkan ally.

As part of their eastern pressure the Central Empires proclaimed on Nov. 5 the setting-up of a new Kingdom of Poland, its boundaries to be confined to the area seized from Russia, and its autonomy to be exercised in association with the Central Powers.

Principal Dates

Dec. 20, 1915.—Temporary retirement of General Ruszky owing to ill-health.
Dec. 31.—New Russian demonstrations against Galicia opened.
March 21, 1916.—Renewed offensive towards Vilna.
April 29.—Russians defeated at Lake Narotch and offensive checked.
June 3.—Great offensive opened under General Brussiloff along entire front south of Pripet Marshes.
June 6.—Capture of Lutsk.
June 10.—Capture of Dubno.
June 17.—Capture of Czernowitz.
June 24.—All Bukovina cleared of the enemy.
June 29.—Capture of Kolomea.
July 8.—Capture of Delatyn.
July 28.—Capture of Brody.
Aug. 10.—Capture of Stanislaw.
Sept. 6.—Capture of Halicz bridgehead.
Nov. 5.—Germany and Austria proclaim new Kingdom of Poland.

THE ITALIAN FRONT

Italy's position among the Allies and the part she was playing in the war were the subject of much speculation and disappointment in the opening months of 1916. There was a complete end to these misunderstandings with the brilliant recovery from early disasters in the Trentino, the sudden coup which brought the long-delayed success at Gorizia, the setting-up of a National Ministry, and the belated declaration of war on Germany.

The political entanglements and military unpreparedness which retarded the entry of Italy

into the war hampered the ministry of Signor Salandra from the moment the decisive declaration was made against Austria. It was only step by step that the difficulties were overcome, and, in the meantime, the military operations were held up for long months on the Isonzo front, while on the northern mountain frontier they went for an anxious period seriously against Italy. The Ministry survived till the tide of war changed, but fell immediately afterwards.

Two important pronouncements were made directly the Italian Parliament reassembled on Dec. 1, 1915: *the formal adhesion to the Pact of London*, by which the Allies undertook each and severally to make no separate peace; and the promise of direct aid to Serbia, then suffering under the full weight of the Austro-German-Bulgarian inrush. It was too late for any effective aid to be given at the time, except by way of relief to the fleeing Serbians, but Italian troops subsequently joined the Allied army under General Sarrail at Salonika. The landing of Italian troops at Avlona and other points in Albania on Dec. 15 had a bearing less on events in Serbia than on possibilities of action by Greece.

During January Montenegro was beaten out of the field, and the Austrians became established in Northern Albania. The Dual Monarchy, which a year before had seemed already tottering, had made indeed in the last months of 1915 an astonishing recovery, and part of its weight was now to fall on Italy.

The first assault was on the battle-line of the river Isonzo, up to which the Italians had pushed their north-eastern frontier immediately after entering the war. They had been held up, however, by the fortifications, based on a position of immense natural strength, at Gorizia, the sentinel city of the main route over the high plateau of the Carso to the objective Trieste, 32 miles away. On March 27 the Austrians attacked in force the heights north-west of Gorizia, and with such effect that the Italian centre was driven in. The position was, however, restored by counter-attack next day and the enemy effort was not renewed here.

Instead, *on May 14, a much more serious offensive was opened by the enemy from the snow-clad peaks in the section of the northern mountain front* immediately south and east of Trent, between the Val Sugano (through which flows the Brenta river) and the Val Lagarina (through which the Adige runs southward from Trent to Rovereto and beyond). Within this comparatively small area, with a total frontage of less than 30 miles, the Austrians had collected some 2,400 heavy guns, including 40 12-inch Skoda howitzers, three or four German 420's and two 15-inch naval guns. Some 18 divisions of troops (approximately 350,000 men) were also concerned in a determined attempt to break the Italian line at this point and drive a way through the Alpine peaks to the Venetian plain.

To meet the shock of this invading force the Italians were ill-prepared. They were still short of big artillery, and the disposition of the available troops was faulty. This was manifest before the attack actually came, and resulted in *the retirement of General Brusati*, the Italian commander of the First Army, and the appointment instead of General Pecori-Giraldi. There was no time, however, to rearrange the front before, after a brief preliminary bombardment along the entire winding line of front in the Trentino, the attack was flung violently, on May 17, in the sector named. The Italian mountain troops put up a series of magnificent fights, but they were outnumbered and outgunned. Their centre was broken between Monte Toraro and Monte Campomolon on May 18, and they had to give valuable ground, while losing many prisoners. At the southern end of the sector, however, at the Passo de Buole, the splendid resistance made saved the important strategical position at Monte Pasubio and prevented the crumpling up of the defences and the probable emergence of the Austrians in a great sweep through to the plains. It was claimed that 7,000 Austrians were killed in one day's attack on this vital position, and that in six days they lost 40% of their effectives. In spite of this heroic stand the Italians were driven back to the last line of their mountain defences. On May 28 they *evacuated the mountain town of Asiago*, and two days later the Austrians had driven a wedge between Pasubio and Arsiero along the river Posina still further to the south. Eastward of Arsiero, too, a terrific onslaught was made on Monte Cengio which fell at length to the enemy.

By this time, however, General Cadorna, the Italian generalissimo, was ready with his counter-stroke. While the First Army had been staying the advance by its superb fighting, General Cadorna had assembled a new (Fifth) army in the plain. By extraordinary exertions it was equipped and gunned and, on June 7, General Cadorna was able to make the confident statement that *the enemy offensive had been checked*. On June 12 a counter-offensive began in the Val Lagarina and on the Posina-Astico front, and by June 25 the Austrians were in full retreat. *Asiago and Monte Priafora were retaken* on that day as well as Monte Cengio. On June 26 Arsiero and the Posina line were reoccupied. In just over six weeks the Austrians had lost some 150,000 men, and their ambitious plan for the crushing of Italian operations in the Trentino had come to nought when apparently on the verge of success.

The crisis was just passing when, on June 10, the Salandra Ministry, which had been growing more and more markedly out of touch with the nation, was defeated in the newly reassembled Parliament. It was succeeded by a Ministry formed on national lines by the veteran Signor Boselli, who was able to retain the services and support of Baron Sonnino as Foreign Minister. Probably the strongest man in the new Cabinet, however, was *Signor Bissolati*, the Socialist Reformist leader, who had headed a new combination of the advanced sections desirous of a more vigorous prosecution of the war and especially for the ending of the anomalous political position which kept Italy and Germany still nominally disengaged, though all normal relations between the two countries had been severed. Signor Bissolati was one of five Ministers without portfolio.

The next move in the field came from the Italian side and with dramatic swiftness and effect. While the Austrians calculated on General Cadorna's pressing on in the Trentino, or possibly renewing the attempt to force a way from Monfalcone round the coast towards Trieste, the Italian Commander-in-Chief was in reality preparing for a final assault on the much stronger, but correspondingly more important, entrance by way of Gorizia. The actual task was entrusted to the Third Army under the Duke of Aosta. It involved not only the capture of an immensely difficult bridgehead under Monte Sabotino, just north of the city, and the crossing of the river itself, but the overcoming of defences literally hewn in the rocks. Gorizia was, indeed, held as almost

impregnable. A heavy bombardment was directed on August 7 against the Monte Sabotino heights. Immediately afterwards the Italians surged up through secretly-driven saps in the rock and in one exulting, irresistible rush carried the hill. The heights of San Michele, just below and nearer the town, were gained at the same time, and, with these key positions won, the Italians had gained the necessary bridgehead. The *fall of Gorizia* was then inevitable. The Austrians evacuated it in haste, and the victorious Italians entered on August 9. Already they had 12,000 prisoners as the result of the three days' fighting. They followed the fleeing enemy across the high lands of the Carso, crossed the tributary river Vallone, and occupied Doberdo, Oppacchiasella, and smaller places in the hinterland.

With brief pauses between the efforts, Gen. Cadorna pressed his advance in successive great blows. In the northern half of the Carso front the successes were substantial and more rapid than in the more difficult southern end, where the Austrians held a specially strong position at Hermada from which their artillery dominated the country far to the west. The next important capture was that of San Grado, on the River Vippacco, an affluent of the Isonzo, to which it flows almost at right angles. This town was taken in a big rush forward on Sept. 14. On Oct. 10 came a twofold thrust. Just south-east of Gorizia itself, the Austrian line was broken between Sober and Vertoiba; while south of the Vippacco a further bend was forced in the enemy front. Then on Nov. 1 came a fresh double blow: the heights east of Gorizia, from which the enemy had been shelling their lost city, were completely cleared, while in the middle of the front, from the Vippacco to the main road which runs east and west through Oppacchiasella and Kostanjevica, there was an advance of from 1½ to 2 m. In two days' fighting upward of 8,000 prisoners were taken.

Principal Dates

Dec. 1, 1915.—Italy adhered to the Pact of London.

May 14, 1916.—Austrian offensive in Trentino began.

May 29.—Italians evacuated Asiago and Arsiero.

June 10.—Salandra Ministry defeated.

June 25.—Italian recovery in Trentino. Asiago reoccupied.

Aug. 6.—Italian offensive on Isonzo river opened.

Aug. 9.—Capture of Gorizia.

Sept. 14.—Capture of San Grado.

Oct. 10. Italians advanced on Carso in centre.

Nov. 2.—Italians took 8,000 prisoners in new Carso advance.

OPERATIONS AGAINST TURKEY

When the Turks were persuaded into the War by Germany, their hope unquestionably was to share in the Teutonic Powers' offensive which then appeared to be progressing in all the fields of war. The first direction of such a Turkish offensive would inevitably be across the desert towards Egypt against British dominance there, and to bid for the control of the Suez Canal; and secondly in Persia, where British and Russian interests also prevail. The entry of Turkey added new strength to the Central Powers in several ways: it provided them (with Bulgaria's aid) with the "corridor" to the East which they hoped to make permanent, and by closing the Dardanelles it greatly hampered co-operation between Great Britain and Russia, and the passage of cereals on the one hand and of munitions on the other. There were also Turkish troops available for service on some of the Eastern, European, and Balkan fronts. But Turkey herself has failed from the beginning to make good any offensive on her own account; her rôle has been instead to withstand the secondary, but important, counter-offensives of the two greatest world Powers. In Gallipoli she succeeded in beating off the attack, which provided one of the most "glorious" failures in all war history, and on the success of which such splendid hopes were hung. In Mesopotamia also, a British expedition, which up to the end of 1915 was apparently progressing brilliantly, was suddenly checked, when the troops were actually in sight of Bagdad. On the other hand, in Armenia and the Caucasus Russia achieved during the early months of the year a very formidable series of successes; in Arabia the Sherif of Mecca proclaimed and established his independence; and am ambitious assault by the Turks on the Suez Canal was easily defeated.

Mesopotamia

Chief of the campaigns in the interest which it excited was that in Mesopotamia. On Nov. 22, 1915, had been fought the *battle of Ctesiphon*, 18 miles from Bagdad. The advanced British and Indian force under Major-General C. V. F. Townshend, which had been rapidly pushed up to this point from Kut-el-Amara, defeated the Turks, penetrating their second line. The troops were, however, insufficient, in face of heavy reinforcements arriving for the enemy, to push the victory home. On Nov. 26 General Townshend, who was nine miles from his supply base at Laij, withdrew to that point and immediately afterwards fell back still further down the river to Azizie. The Turks following and threatening to cut the force off, *General Townshend retired yet again to Kut*, where, in a U-shaped angle of the river, he took up on Dec. 3 the position which he fortified and held until April 29, 1916. During the retreat the river gunboats *Shaitan*, *Comet*, and *Firefly* were grounded and had to be abandoned. By Dec. 7 the Turks, under Nur-ed-Din Pasha, had completely invested Kut, which was forthwith subjected to heavy bombardment and siege.

A relief force was organised under Lieut.-General Aylmer, who on Jan. 9 forced the Turks from positions below Kut astride the Tigris at Shaikh Said. The enemy retired up stream about 10 miles to another fortified line at the junction of the Tigris with the Wadi river, 25 miles from Kut. From this line they were also driven by General Aylmer, and they fell back five miles farther, on Jan. 13. Owing to ill-health General Sir John Nixon, Commander-in-Chief of the British Expeditionary Force, resigned on Jan. 10 and was succeeded by Lieut.-General *Sir Percy Lake*.

General Aylmer's successes had been hampered by weather already becoming bad, and the ensuing operations were undertaken in face of enormous difficulties caused by floods, mud, and rain. The Turks had established across the river a series of very strong positions. Nearest to Kut, from which it was distant about 8 miles, was the *Es-Sinn* position. Farther down came successively those of Sanna-i-Yat, Felahieh, and Umm-el-Hannah. Flanking these last-named positions on both sides of the river were marshes, and the entire country was roadless.

Three further important attempts were made to relieve General Townshend and his beleaguered army at Kut. Between Jan. 19 and 23 General

TURKEY IN EUROPE

Aylmer, operating from the left (or northern) bank of the Tigris, endeavoured to force a defile held by the Umm-el-Hannah lines. The Turkish front trenches were actually rushed, but supporting troops lost direction and under heavy fire failed to reach the objective and a counter-attack caused the abandonment of what had been won. A period for rest and reorganisation followed. On March 7 General Aylmer decided, in view of the possibility of his troops being flooded out by the cutting of the bunds, to leave the three lower lines of Turkish defence and to push on their flank against the stronger and larger, but final line at Es-Sinn. At the southern end of this position, five miles from the Tigris, was the Dujailar redoubt. This out-flanking movement involved a difficult forced march in the night right across the enemy's front by two columns under General Kemball and General Keary. The dispatch of Sir Percy Lake describing this attempt stated: "Thanks to excellent staff work and good march discipline, the troops reached their allotted positions apparently undiscovered by the enemy, but while Keary's column was in position at daybreak ready to support Kemball's attack, the latter's command did not reach the point selected for its deployment, in the Dujailar depression, until more than an hour later. This delay was highly prejudicial to the success of the operation." All through the day unavailing attempts were made to carry the redoubt, and these failing, shortage of water made necessary at night a withdrawal again to the Wadi lines.

On March 12 Major-General Sir G. F. Gorringe succeeded General Aylmer in command of the corps. Fresh troops also began to arrive up river, and a renewed attack was planned on the left bank of the Tigris. The Hannah position was brilliantly rushed by the 13th Division under General Maude on April 4. Three miles back the Felahieh position was also carried. During

the night of April 8–9 an assault was made on the Sanna-i-Yat lines, and this was unsuccessful.

Time was now pressing severely against the garrison at Kut, and it was resolved to make a further attempt to beat through the resistance at Es-Sinn. A success was achieved on April 17 in the capture of the enemy position at Beit Aïessa (behind Sanna-i-Yat), on the southern bank. But Sanna-i-Yat itself and Es-Sinn remained to bar the way. Supplies were now so short in Kut that a desperate attempt to break the blockade was made by the *Julnar*, one of the fastest steamers on the river, which left Felahieh on April 24 with 270 tons of supplies. Under Lieut. Firman, R.N., it reached Magasis (behind Es-Sinn), where it was captured after both its officers had been killed. Finally, about eight tons of supplies were dropped into Kut by aeroplane, but on *April 29 General Townshend capitulated.* An exchange of the more severely wounded prisoners was arranged with the Turkish commander-in-chief, Major-General Khalil Pasha.

The operations in Mesopotamia were the cause of much anxiety and persistent inquiry in Parliament during the year. It was known that there had been a breakdown in transport and medical services. In February Sir William Vincent and Major-General Bingley were appointed to inquire in Mesopotamia into the alleged deficiencies. Mr. E. A. Ridsdale, of the Red Cross Society, was subsequently added. On July 21 a demand was raised in Parliament for a full inquiry into the campaigns in Mesopotamia and Gallipoli. Commissions were set up by Bill and constituted as follows :—

Mesopotamia : Lord George Hamilton (chairman), the Earl of Donoughmore, Lord Hugh Cecil, M.P., Sir Archibald Williamson, M.P., Mr. John Hodge, M.P., Commander Wedgwood, M.P.

Dardanelles : Earl Cromer (Chairman), Lord Justice Pickford, Mr. Andrew Fisher (High Commissioner for Australia), Sir Thos. Mackenzie (High Commissioner for New Zealand), Sir F. Cawley, M.P., Mr. J. A. Clyde, M.P., Mr. Stephen Gwynn, M.P., Mr. Walter Roch, M.P.

Principal Dates

Nov. 22, 1915.—Battle of Ctesiphon.
Dec. 3.—Siege of Kut began.
April 29, 1916.—Fall of Kut.

Armenia and Persia

While the British Expeditionary Force was fighting in adverse circumstances in Mesopotamia, the Russian Army in the Caucasus, after a long period of apparent inactivity, was striking hard blows at the Turks in the mountainous region of Armenia, where during the winter of 1915-16 the Turks had carried out a series of wholesale massacres and deportations. Gen. Yudenitch, a year before, had destroyed two army corps of Turks on the Caucasian frontier. When the Grand Duke Nicholas was appointed Commander-in-Chief in the Caucasus, there was no immediate renewal of the attack. On Jan. 17, 1916, however, Gen. Yudenitch suddenly flung himself against the Turkish centre at Kopri-Keui and broke it over a front of 66 miles. The Turks retired precipitately on their stronghold at Erzrum, 60 miles away, but so energetically were they pursued that on Jan. 21 the Russians were already shelling the fortress. Very severe weather set in, and there was a lull in the attack. On Feb. 16, however, after a fierce assault extending over five days, *Erzrum capitulated*, and with it the Turks lost 235 officers, 12,753 men, and 313 guns. Pressing on victoriously, Gen. Yudenitch entered Mush and Akhlay on Feb. 18. He pressed southward to Bitlis, south of Lake Van, which was entered on March 2. On March 4 a Russian force was landed at the Black Sea port of Atina, and pushed with great rapidity along the coast route of 60 miles to the great port and trading-centre of *Trebizond, which fell on April* 17. After the fall of Kut, the Turks made a desperate rally in Armenia. They regained temporarily some of their lost ground, but by July 12 the Russians were progressing again. They occupied Baiburt, between Erzrum and Trebizond, on July 15, and Erzingan, 100 miles west of Erzrum, on July 25. During August they consolidated their position south of Lake Van.

Disturbances in Persia under German instigation called for Russian, and later for British, interference there also. Two Russian columns passed into the country : one, under Gen. Baratoff, pushed south-westward through Hamadan, to Kermanshah, on the way to Bagdad. A small cavalry force succeeded, in fact, in establishing communication with the British Mesopotamia force. The possession of Kermanshah was strongly disputed, and the Russian column was checked before reaching the southern plains. The second Russian column advanced through Kum and Kashan to Ispahan, the ancient capital of Persia, on March 20. British intervention in southern Persia was undertaken by a column under Sir Percy Sykes, which reached Kerman on June 13.

Principal Dates

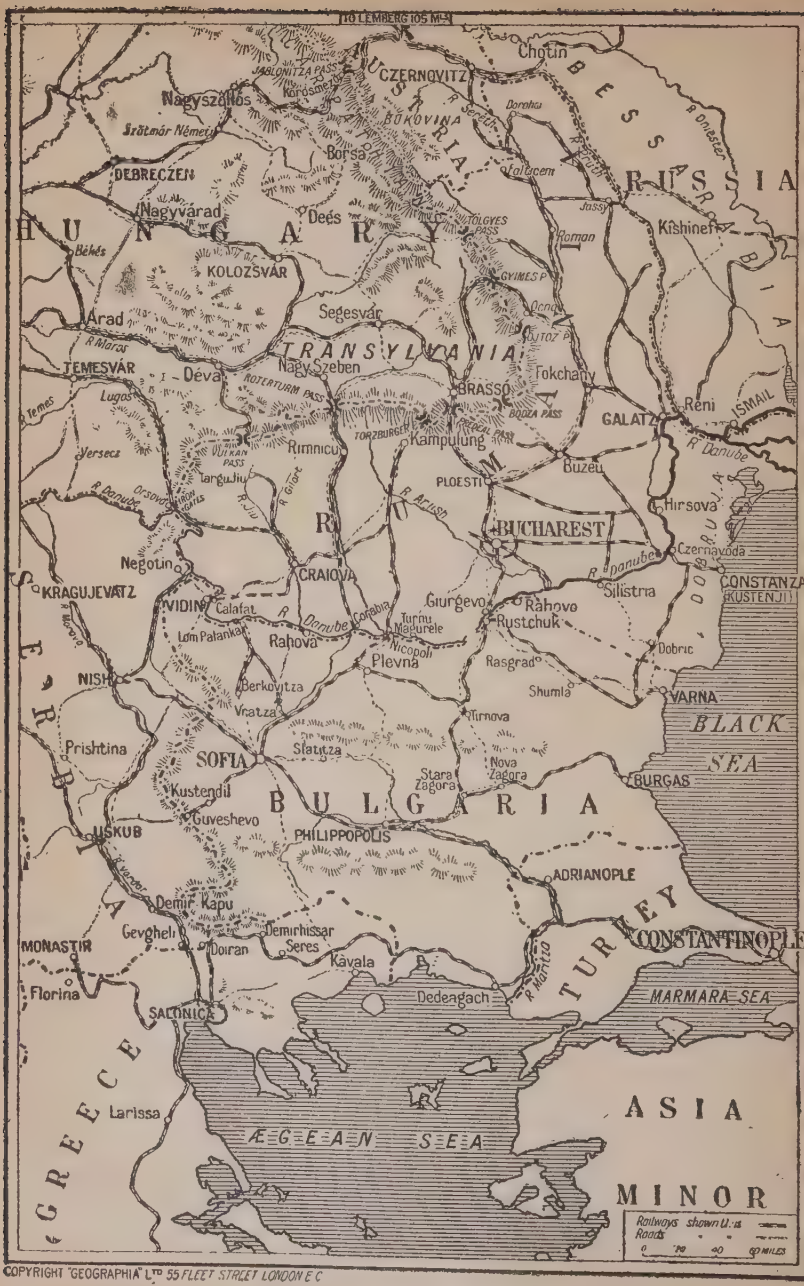
Jan. 17.—Turkish centre broken at Kopri-Keui.
Feb. 16.—Fall of Erzrum.
March 19.—Russians entered Ispahan.
April 17.—Fall of Trebizond.

IN THE BALKANS

Germany, Turkey, and Bulgaria in active fighting alliance supporting Austria-Hungary were certain at any time to present an imposing appearance to the remaining Balkan States. Serbia never had any option about the war, but Greece and Rumania, each with a monarch allied by family ties with Germany, were able to claim some justification for their hesitation before taking definite sides in the struggle which waged all round, and in the case of Greece actually within, their own borders. It was therefore a matter of more than ordinary significance when, on August 27, Rumania ranged herself with the Allies and declared war on Austro-Hungary, alleging as a main reason her belief that by her so doing the war would probably be shortened. The Greek King continued, in face of an ever-increasing discontent among his people, to accept humiliation after humiliation from both sides in the struggle rather than depart from the letter of neutrality.

The Conquest of Serbia

The story of the overwhelming of Serbia and its little neighbour, Montenegro, by the Austro-German-Bulgarian forces, was almost completely told in last year's ANNUAL. The great drive was so swiftly pressed, and the Allies had their own needs so strongly felt elsewhere, that succour in the military sense was practically impossible. At the beginning of December the enemy were in possession of all save the corner of Macedonia nearest the Greek frontier. When Monastir fell on Dec. 2, the last point for resistance on Serbian soil had gone. The remnant of the Army, hampered by large portions of the civil population, fled over the



COPYRIGHT "GEOGRAPHIA" LTD 55 FLEET STREET LONDON E C

mountains, enduring terrible hardships by the way, to the Montenegrin and Albanian coasts. They were closely pressed by the pursuing Austro-Bulgarians. With the *capture of Mount Lovtchen, on Jan.* 10, the enemy won command of the coast. *Cetinje*, the village capital of Montenegro, *fell on Jan.* 13, and four days later the Austrians, with desire outrunning the facts, proclaimed the complete capitulation of the tiny mountain state. There were possibly negotiations, but in any case they were broken off. King Nicholas and his family retired to Rome and the resistance was continued, unavailingly for the time. On Jan. 23 the *Austrians occupied Scutari*, the hill-fortress which Montenegro had obtained from Turkey after the Balkan wars. Two days later they were in possession of San Giovanni di Medua, the small port in northern Albania which had been the outlet for the Serbs in their flight. The withdrawal was completed from the Albanian capital, Durazzo. Most of the Serbian soldiers found refuge in the Greek island of Corfu, which had been taken over by the French under General Mondesir. There they were recuperated and equipped afresh during the spring and summer, to begin, late in the year, the reconquest of their country from the south-eastern corner, in conjunction with the Allied forces based on Salonika.

While the Serbs were thus being driven out to the Adriatic, the quite inadequate Franco-British force, which had pushed up from Salonika in a demonstration to the valley of the Vardar river, was simultaneously pushed back over the Greek frontier. Forced to stand on the defensive, *the Allies consolidated their position at Salonika.* The Greek Government agreed on Dec. 11 to withdraw all its own troops from the port except one division. On Jan. 28 the Allies occupied the cape and fort of Kara Burun commanding Salonika harbour. These necessary steps, taken in answer to Greek yielding to Bulgarian pressure in the north, were the subject of formal protests from the Government at Athens.

The Wavering of Greece

The great opportunity lost by Greece when King Constantine declined to allow the Cabinet of M. Venizelos to fulfil its treaty obligation to Serbia, at the moment that Bulgaria declared war on her neighbour, resulted in a second year of successive political crises and of balancing concessions of territory and military interference to Bulgaria on the one hand and to the Allies on the other. The situation was complicated by *the complete evacuation by the Allies of the Gallipoli Peninsula on Jan.* 8. Skilfully as this was accomplished, the failure of the Dardanelles enterprise weakened for a time the prestige of the Allies in the Near East, and, just as the great retreat of the Russians through Poland hindered the intervention of Rumania, so the fate of Serbia and the withdrawal from Gallipoli strengthened the pro-German influence surrounding the King at Athens. At the *Greek elections on Dec.* 19, 1915—the consequence of the defeat of M. Zaimis's neutral Cabinet—the Venizelists declined to poll. The result was to give an overwhelming, but unreal, majority to the Gounaris pro-German party, and the formation of a fresh Government, this time with M. Skouloudis at its head.

Salonika was then being fortified as an Allied base, and on Dec. 30 it was raided by the enemy from the air. The reply of General Sarrail (the Allied commander) was to order the arrest of the German, Austrian, Turkish, and Bulgarian consuls, who had remained in the port, emphasising its peculiar sitation in the war. The consuls were placed on a war vessel and dispatched to Athens. There were again formal Greek protests at this action, and they were renewed when the French landed at Corfu on Jan. 11, to prepare for the reception of the Serbian Army, as already recorded. Immediately after the Allied occupation of Kara Burun, also recorded above, Salonika was again raided by air on Feb. 1, and this time three Greek soldiers were among the killed. There was excitement in Greece, but no definite action. Matters drifted for nearly four months, but on May 26, the Bulgarians, with German troops in support, demanded the right to occupy the frontier fortress of Rupel, threatening the Greek position at Kavala, the port the possession of which had been so hotly disputed in the second Balkan war. Acting on instructions from Athens, the *Greek garrisons withdrew from Rupel.*

The next move was with the Allies, who, on June 3, proclaimed a state of siege in Salonika and occupied the Government bureaux. Further to check the hostile attitude of the Government and as a measure of precaution, they announced, on June 6, a *pacific blockade of the Greek coast.* Demonstrations, in regard to which there was evidence that they were officially prompted, were made in Athens against the Allies, who, on June 21, presented a firm Note to the Government. The demands were for the demobilisation of the Greek Army (which was originally mobilised as an answer to Bulgaria's mobilisation), the setting up a new Government, fresh elections freely conducted, and the dismissal of police and other officials who had shown themselves to be anti-Ally. All these demands were accepted on the same day, the Skouloudis Ministry resigned, and M. Zaimis formed yet another Cabinet.

The Bulgarian advance in the north progressed, however, unhindered. On June 22 they crossed the Mesta, which cuts across the north-east corner of Greece well within the frontier, and the Greek garrison evacuated Nea Petra without offering resistance. Just a month later, on August 28, and similarly unopposed, *the Bulgarians entered first the forts and then the port of Kavala itself*, after Drama and Seres had been occupied on the way.

During this month, however, there had been considerable development all along the Allied front in the Balkans. On August 11 the growing solidarity of interest was marked by the arrival of the first Italian contingent at Salonika. Yet more important was the arrival, by sea, of the *newly equipped Serbian army*, which immediately advanced for the reconquest of its native land. The French had already made demonstrations against Florina (on the west of the line, on the road to Monastir) and at Doiran (in the centre, on the Salonika-Belgrade railway). The British contingents were in contact with the Bulgarians in the north along the Struma river. The Serbians were aligned between the two French wings in the district at Lake Ostrovo and the Moglena mountains. They made good progress from the first and were quickly in possession of Ostrovo.

The Venizelos Movement

It was at this point that interest was suddenly transferred to the other frontier of Bulgaria and of Hungary by the declaration of war made by Rumania on Aug. 27. Again there was an opportunity for Greece to make her decision, and again the Government hesitated. The people, however, were less compliant, and they had with them the sympathy of a growing party both in the army and the navy. On Aug. 30 the national move-

ment for the deliverance of Macedonia from Bulgaria took definite shape at Salonika, where the Venizelists, under Colonels Zimbrakakis and Mazazakis, proclaimed *a Provisional Government*, and raised the nucleus of a volunteer army to serve with the Allies. To prevent bloodshed, General Sarrail disarmed the Greek garrison guard remaining in Salonika. The King once more showed opened support to the pro-German minority by conspicuously receiving deputations from their party while postponing, on grounds of ill-health, the reception of a deputation from much larger Venizelist demonstrations. Again the Allies found it necessary to make a *naval demonstration off the Piræus*. Their Note, presented on Sept. 2, demanded control of the posts and telegraphs, the expulsion of enemy agents and of Greek subjects guilty of espionage. Four German ships in the Piræus were seized at the same time. The Government at Athens yielded; but although Baron von Schenk, the head of the German propaganda movement, was removed with others, the Government continued to vacillate in policy. Meanwhile the *Nationalist revolutionary movement* spread rapidly throughout the Greek islands, and notably in Crete, of which M. Venizelos is a native. M. Zaimis again resigned the premiership on Sept. 11. His successor, next day, was M. Dimitrakopoulos, whose sympathies were anti-Ally. An extraordinary incident followed immediately, *the surrender (on Sept. 12) of the fourth Greek Army Corps, stationed at Kavala, to the enemy*. The excuse given was that they sought protection from the Allies. They were disarmed and sent into Germany. Their release was subsequently demanded by the Greek Government.

For a time interest was again brought back from politics to the military operations on the frontier. The Serbians with the French, now reinforced by a Russian contingent, on their southern wing struck hard towards Monastir. On Sept. 14 they stormed Gornichevo and most of the Malka Nidje ridge. Next day the Allies advanced in force and seized the heights overlooking *Florina*, and the town itself fell to the Franco-Russians on Sept. 15. By the beginning of October the advance had been pressed to within a few miles of Monastir itself, but the Bulgarians had strongly fortified lines on its front. One of these, 4 miles from Monastir, was reached on Nov. 16. At the other end of the line the British forced the passage of the Struma river and occupied a number of villages, held by the Bulgarians on the northern side. Operations here were assisted by a blockade by the Allied fleets of the coast between the mouths of Struma and Mesta rivers.

The political situation also developed rapidly. M. Venizelos made a fresh appeal to the King to place himself at the head of the people in action, to fulfil their national aspirations. This failing, he left Athens on Sept. 25 for Crete and Salonika, himself to head the national movement. He was accompanied by Admiral Condouriotis and other leaders of the army and navy. In a parting manifesto M. Venizelos declared that the movement was not anti-monarchical, but purely nationalist. On Sept. 29 his *Provisional Government* was formally announced. It soon included General Danglis, a former Minister of War, who undertook the organisation of the National Defence Army. M. Venizelos with Admiral Condouriotis and Gen. Danglis proceeded to act as an Executive Triumvirate, forming a complete Cabinet responsible to them.

Meantime M. Dimitrakopoulos had speedily abandoned the hope of forming a Cabinet at Athens, and the task was taken over by M. Kalogeropolous, but with no more permanent success. His short-lived Ministry resigned on Oct. 4, after each member at the King's instructions had submitted a memorandum declaring whether he was for or against Greek participation in the war. The majority were in favour of intervention. After unsuccessful attempts to induce any other politician to accept the Premiership, King Constantine sent for Prof. Lambros, of Athens University, who consented on Oct. 7 to form a "service" Cabinet. Two days later *M. Venizelos arrived at Salonika*, where he was enthusiastically received. He issued thence a final warning to the King and his pro-German advisers in a statement, in which he declared that the Provisional Government would exercise the powers of the State, collecting taxes and raising troops by virtue of the will of the people. He and his colleagues would continue for the present to regard Greece as a democratic State with a King at the head of it, but with two Governments, of which his own represented the people.

Events now followed swiftly. On Oct. 11, at the moment M. Venizelos was issuing his proclamation, the French Admiral commanding the Allied Fleet at Athens called on the Greek Government, as a measure of security, to *surrender the whole of the Greek Fleet*. The three larger units were to be disarmed and the smaller vessels handed over as they were. Certain coast batteries were also to be disarmed, and the Piræus-Larissa railway placed under control of the Allies. M. Lambros protested but complied. In a supplementary note Admiral D'Artige du Fournet (commanding the Allied Fleet) demanded and secured control by the Allies of the police, the prohibition of the carrying of arms by civilians, the prohibition of the dispatch of war material to Thessaly, and the lifting of the embargo on the exportation of wheat from Thessaly. There were indications that King Constantine had been planning a *coup d'état* from Thessaly. The seizure of an ammunition train moving in that direction was the Allies' answer. Formally the Entente Ministers in Athens continued relations with Prof. Lambros and his Ministers, but relations were also established with the Venizelist Government, whose *de facto* authority was recognised in northern Greece and the islands. A subsidy of £400,000 was made by the Allied Governments to M. Venizelos towards the equipping of his divisions which were to fight with the Allies.

The Entry of Rumania

Throughout the year the possibility of Rumanian intervention had seemed to grow, but the actual decision on Aug. 27 was dramatically sudden. It was immediately followed by an *invasion of Transylvania*—the Rumanian Irredenta—through the Carpathian passes. The direction of the military blow was as unexpected as the declaration of war. The Austro-Hungarians retired precipitately, leaving the Rumanians in possession of a wide area of territory, including the towns of Petroseny, Kronstadt (or Brasso), Kezdi Vasarhely, Hermannstadt, and Sepsi Szt Gyorgy. At the same time it was reported that Russian troops were passing across *the Dobruja*, the narrow strip of low-lying land between the sea and the Danube, which runs north for about 70 miles before debouching into the Black Sea. Passage across the Dobruja would afford an opportunity for Russia to strike at Bulgaria from the north, and an attempt in this way to sever the railway com-

munication between the Central Powers and Turkey was a commonly expected possibility.

Evidence of the concern with which the action of Rumania was regarded was forthcoming in the extraordinary endeavours immediately made by Germany to crush the new enemy out of the field. *Field-Marshal von Mackensen*, the conqueror of Serbia and of Poland, was placed at the head of an answering offensive by Bulgarian and German troops striking northward through the Dobruja. Whether in expectation that the Greeks would seize the opportunity to attack Bulgaria from the south or that even without such intervention the Allies acting from the Greek frontier would keep the enemy fully engaged, or because they considered their own offensive in Transylvania their best defence, the Rumanians were in fact holding the Dobruja frontier with comparatively light forces. Von Mackensen was enabled, on Sept. 6, to take the important Danube fortress of *Tutrakan*, to press on to *Silistria*, which fell three days later, and to threaten seriously the railway line crossing the north of this coast territory from Bucharest to Constanza, the Rumanian port on the Black Sea. The Rumanians, who had certain Russian regiments with them, had fallen back by Sept. 20 to the line Rasova-Tuzla, a few miles only south of the railway. Here they took up a strong defensive position from which they were presently *able to push von Mackensen backward*. The situation, however, was not without its dangers and two attempts were made at diversions: one by the Russians, whose fleet bombarded Varna, the Bulgarian Black Sea port, in a threat to land a force in von Mackensen's rear; and the other by the Rumanians themselves, who, on Oct. 4, forced a passage of the Danube at Riahovo, between Rustchuk and Tutrakan. Neither of these efforts was on a large scale and they ended as demonstrations without further consequences. Von Mackensen renewed his offensive on Oct. 19 and made swift progress. On Oct. 22, *Constanza*, the Black Sea port and railhead town, was evacuated by the Rumanians, who withdrew north of the railway. Rasova fell to the enemy on Oct. 23, and with the capture of Czernavoda on Oct. 25 the entire railway line in the Dobrudja was in enemy hands. The great bridge across the Danube and its adjacent marshes had been destroyed by the Rumanians. Mackensen, continuing on the Dodrudja side of the river, pushed rapidly to the north. On Nov. 3 it was announced that the Russian General Sakharoff had arrived to take command in the Dobruja. The enemy advance was, however, checked by a sudden Russian threat from the Rumanian side of the Danube. With the possibility that he might be cut off by a force crossing the restored great bridge, von Mackensen again fell back.

During the first three weeks of the war the Rumanians had continued to press their success on the Hungarian side of the Carpathians. They had established contact with the Russians' main front at Dorna Watra in the Bukovina, and their line reached thence, southward, to *Orsova*, just above the Iron Gate on the Danube, but it was not continuous and the depth of the penetrated area varied considerably. By Sept. 20 the Austro-Hungarians were putting up a vigorous resistance which shortly became a strong counter-offensive. *General von Falkenhayn*, relieved of his position as chief of the German General Staff by von Hindenburg, was dispatched to command the Austro-German armies in Transylvania. His appointment was a measure of German anxiety, but with the new troops he also brought he was able to push the invading Rumanians back to several of the passes. At the Roten Turm (or Red Tower) Pass, south of *Hermannstadt*, he nearly succeeded in cutting off the main army on Sept. 30. The Rumanians, falling back before superior forces after a *three days' battle*, found at the pass that they must cut their way through Bavarian troops who had arrived there before them. They succeeded, but lost a good many prisoners. Hermannstadt and most of the Hungarian towns occupied reverted to enemy control. By the end of October the enemy had forced their way through several of the chief passes and were from 15 to 20 miles within the frontier. The Rumanians fought stubbornly, and from time to time recovered lost ground, or made hauls of prisoners; but they were being slowly pushed back in November.

Principal Dates

1914

Oct. 19.—Death of King Carol of Rumania.

1915

March 6.—Fall of M. Venizelos, Premier of Greece.

June 13.—Sweeping Venizelist victory in Greek General Election.

Oct. 4.—Greek Chamber passed vote of confidence in M. Venizelos, at whose invitation Franco-British troops had landed at Salonika.

Oct. 14.—Bulgaria declared war on Serbia.

Oct. 6.—Venizelos dismissed by King Constantine. M. Zaimis formed his first ministry.

Nov. 4.—Zaimis Ministry defeated. M. Skouloudis Premier.

Nov. 5.—Fall of Nish.

Nov. 6.—Direct communication established between Berlin and Constantinople.

Nov. 11.—Greek Parliament dissolved.

Dec. 2.—Fall of Monastir.

Dec. 13.—Allies forced to withdraw completely over frontier from Serbia into Greece.

Dec. 19.—Greek elections. Venizelists abstain; Gounaris majority.

1916

Jan. 8.—Gallipoli completely evacuated.

Jan. 13.—Fall of Cetinje.

Jan. 28.—Allies occupied Kara Burun (commanding Salonika).

May 26.—Bulgarians occupied Rupel (Greek frontier fort).

May 3.—Allies proclaimed state of siege in Salonika.

June 21.—Allied Note to Greece demanded mobilisation of army and new elections. Skouloudis Ministry resigned; Zaimis Premier again.

Aug. 17.—Serbians recommenced hostilities near Florina.

Aug. 25.—Bulgarians entered Kavala.

Aug. 27.—Rumania declared war and advanced into Transylvania.

Sept. 2.—Allied Note to Greece obtained control of posts and telegraphs and expulsion of enemy agents.

Sept. 6.—Fall of Tutrakan (Dobruja) to Bulgaria.

Sept. 7.—Orsova occupied by Rumanians.

Sept. 16.—Rumania-Russian force on new defensive line in Dobruja.

Sept. 18.—Franco-Russians captured Florina.

Sept. 25.—M. Venizelos left Athens to head National Movement.

Sept. 29.—M. Venizelos's Provisional Ministry proclaimed.

Oct. 4.—Rumanians defeated near Hermannstadt after three days' battle and withdrew to the passes.
Oct. 11.—Greek fleet surrendered to Allies.
Oct. 22.—Fall of Constanza.
Nov. 9.—Rumanians recaptured Harsova.

CONQUEST OF EAST AFRICA

Nearly all German East Africa, the last colony of the enemy, was conquered during 1916 by an Expeditionary Force, largely composed of South African mounted and infantry brigade under the command of Lieut.-General Smuts. (The command was to have been held by General Sir Horace Smith-Dorrien, who was appointed on Dec. 14, 1916, but was compelled by ill-health to retire shortly after landing in Africa, and General Smuts succeeded on Feb. 9.) At the commencement of 1916 the German forces in German East Africa were estimated at some 16,000 men, of whom 2,000 were white, with 60 guns and 80 machine guns. They were organised in companies varying from 150 to 200 strong, with 10% of white and an average of two machine guns per company. The enemy occupied a considerable tract of British territory. At Taveta, well over the border, they had established a large entrenched camp, and their posts were extended 17 miles farther west along the railway.

On reaching East Africa, General Smuts directed attention to the recapture of this territory and the immediate conquest before the rainy season of the *Kilimanjaro mountain area*, the richest portion of the German protectorate, to the north-west of it. The attack was directed along two main lines: the 2nd Division, under Brig.-Gen. Malleson (and later under Gen. Tighe), advanced from east to west along the railway from Mombasa; while the 1st Division, under Maj.-Gen. Stewart, conducted a flanking operation from Longido (north-east of Kilimanjaro). Their common objective was to be Kahe, an important post on the northern (German) railway to Tanga. The 1st South African Mounted Brigade (commanded by Brig.-Gen. Van Deventer) was detached by General Smuts from the 1st Division and used in a turning movement to the north for the benefit of the 2nd Division to facilitate the advance on Taveta. The attack had to be made through difficult bush country and across waterless plains, but it was pushed with rapidity. On March 9 *General Van Deventer occupied Taveta*, which was evacuated by the enemy when the possibility appeared of their being cut off. The 2nd Division was again pushed forward, and Moshi (15 miles over the frontier) was occupied on March 13. Here on the 14th the 1st Division, which had pressed down from the north-east, joined forces with the 2nd Division. On March 21 the key position of Kahe hill was occupied by General Van Deventer and the enemy retired across the Ruhu river, leaving the Kilimanjaro region in General Smuts's possession.

Swinging southward, General Van Deventer seized Umbugwe on April 12, and the important post of Kondoa Irangi (on the main cross-country road) on April 19. The Germans rallied and counter-attacked, but unsuccessfully. By May 25 General Smuts's main force was established at Same on the railway from Usambara to Tanga; on June 13 *Wilhelmstal*, on the railway, had been occupied, and Bukoba and Karagwe followed on July 2. *Tanga*, the terminus post, and the scene of the unsuccessful British raid from the sea on Nov. 14, fell on July 7.

Still pressing southward, General Smuts reached the line of the *central German railway* (running west from their principal port of Dar-es-Salaam) on July 31. On August 11 he won an important success at Matamondo, while Van Deventer's column occupied Mpapua (on the railway). Kidete and Kilossa (nearer the sea) fell to Van Deventer on July 20 and 22 respectively, and the Germans were now driven well south of the railway line. British warships joined in a coast bombardment, and on Sept. 4 *Dar-es-Salaam surrendered*. German resistance was now completely broken, and on Sept. 15 Van Deventer's column was approaching the Great Ruaha river on the road to Mahinge. Smaller fighting occurred at many frontier points, chiefly on the shores of Lake Victoria Nyanza, and a brilliant exploit was the raid on and destruction of the fort, stores, and a wireless installation at Bukoba on June 25.

While General Smuts and the South Africans were sweeping the German protectorate from the north, assistance was rendered by the Portuguese operating from their own territory to the south and by the Belgians from the Congo. On April 10 the Portuguese reoccupied the Kionga district at the mouth of the Rovuma river, a portion of the former Zanzibar Sultanate which the Germans had seized in 1894 in spite of Portuguese protests. The chief Belgian success was the capture on Aug. 3 of Ujiji on the east coast of Lake Tanganyika, the western terminus of the central railway.

THE CAMEROONS

German resistance in the Cameroons was nearly exhausted in 1915, and the end came early in 1916. *Yaunde*, the capital, was occupied on New Year's Day. On Jan. 18 the enemy evacuated the two posts of Ebolowa and Akonolinga, to which they had retired, and on Feb. 18 their last garrison surrendered to General Dobell at *Mora*.

WESTERN EGYPT AND THE SUDAN

In the early months of 1916 the British force in Egypt had to meet an enemy considerably more dangerous than the Turks directly threatening the Suez Canal. Although the Senussi (a powerful Mahommedan tribe of the desert region between the western frontier of Egypt and the Italian sphere of influence in Tripoli and Cyrenaica) had a fighting force totalling some 30,000 only, they were well supplied in German arms, and had experienced Turkish leaders, of whom the chief was Gaafar Pasha, to direct the campaign. The chief danger from their operations was that a "holy war" might have spread disaffection and rebellion throughout Western Egypt. The trouble was in the making throughout 1915, but it was not until November that the Senussi made a swift raid over the frontier. They were joined by the Bedouins of the Walid Ali tribe, and quickly overran some 200 miles of Egyptian territory. General Sir John Maxwell, then commanding in Egypt, withdrew the garrisons from Sollum (an important coast town), Sidi, Barrini, and other outposts. It was just west of Mersa Matruti (about 150 miles east of Sollum and 200 from Alexandria) that the defence was made.

On Dec. 13 (1915) Col. Gordon defeated a small advance force of 1,200 of the Arabs here, and on Christmas Day an onslaught by 3,000 was checked. A much heavier blow was inflicted by Major-Gen. A. Wallace on Jan. 23, 1916, when in a pitched engagement the main body of Senussi were dispersed and driven backward. Brigadier-General H. T. Lukin, commanding South African troops,

The New HAZELL, 1917

pursued the fleeing enemy and defeated them again when they stood at Barrini. Gaafar Pasha was among the prisoners. On March 14 Major-General Peyton reoccupied Sollum, and the frontier posts were evacuated by the Senussi. Although it was not practicable to follow the enemy into their own territory, a daring raid by a light armoured-car battery, under the Duke of Westminster, rescued from Bir Hakim, 75 miles away, the survivors of the British auxiliary cruiser *Tara*, who had been taken prisoners when the boat was torpedoed off the coast in November.

An outcome of the Senussi raid was the conclusion, in July, of an Anglo-Italian agreement for common action against the Senussi.

Subsidiary to the outbreak in the coastal area was another organised in the western Sudan by Ali Dinar, Sultan of Darfur, since 1899 under British-Egyptian suzerainty. When Turkey entered the war, Ali Dinar assumed a defiant attitude and made preparations to attack Kordofan. In May a force of the Egyptian Army, under Col. Kelly, defeated the Darfur troops and occupied El Fasher, the capital. Ali Dinar fled westward. He was pursued, overtaken on Nov. 6, at Sugai, near the frontier of Wadai, in French Central Africa, and killed. With his death the rebellion was crushed.

POSITION OF THE NEUTRALS

The United States, as the one great Power outside the war, was again concerned directly in a series of incidents arising chiefly out of the blockades proclaimed by both sets of belligerents, and the supply of war-material. The Presidential election campaign and the importance attaching to the German-American vote were influencing causes in the attitude adopted from time to time. Neutrality was maintained, but at frequent strain. On Dec. 3 Count Bernstoff (the German Ambassador at Washington) was informed by Mr. Lansing (the Secretary of State) that Captains Boy-Ed and von Papen (the German naval and military attachés respectively) were no longer acceptable to the Government. They had been associated with attempts to destroy munition factories in America. Safe-conducts were applied for on their behalf by the American Government and granted. In his annual Message to Congress on Dec. 7 President Wilson denounced all pro-belligerents in America, this answering at once the pro-Ally aspiration of Mr. Roosevelt and the large and active German community.

On Feb. 1 the Elder Dempster liner *Appam*, which had been reported overdue, arrived at Norfolk, Virginia, in charge of a prize crew. She had been captured at sea by the *Mowe*, a disguised raider. Germany claimed the *Appam* as a prize, but the claim was disallowed; the prize crew were interned and the passengers on the liner released. The question of the status of armed merchantmen was raised by Germany on Feb. 10, when it was urged in a note to the U.S. Government that all such should be treated as belligerents and torpedoed. To this view Washington refused to agree. Germany next put forward the claim that Americans should be *warned not to embark in British passenger boats*, but to this President Wilson also strongly dissented and his stand was endorsed by the House of Representatives by a large majority. On April 19, as a consequence of the torpedoing without warning of the trans-Channel steamer *Sussex* with Americans on board, a fresh United States Note was sent to Germany, in which it was declared that the German Government had failed to appreciate the gravity of the situation and "the whole method and character of submarine warfare is disclosed by the unrestrained practice of German commanders." In their reply, published on May 6, the Germans sought again to make a renunciation of the submarine activity contingent on American interference with the British blockade. President Wilson answered on May 9. He accepted the abandonment of submarine war, but refused any guarantee as to negotiation with other Powers. On May 26, however, he addressed a Note to the Allies complaining of their search of the mails on neutral vessels. Similar demands were made by the Swedish Government, but after correspondence a satisfactory solution was found. In October a Swedish Commission visited England to discuss a scheme under the British blockade.

Another temporary excitement was caused by the arrival at Baltimore on July 9 of the submarine *Deutschland*, which it was maintained was a merchant vessel only and not liable to destruction at sight. The British view was that, owing to the nature of submarines, it would be impossible to distinguish between innocent merchants and hostile warships; all submarines must be treated therefore as hostile. The *Deutschland* reached Bremen on the return journey safely, and subsequently made a second voyage, reaching New London on Oct. 31. Another submarine-liner, the *Bremen*, never reached America.

The submarine issue became acute again later in the year with a renewal of activity by the Germans. The British Foreign Office issued a circular to the neutral Powers urging that submarines should not be permitted to visit their ports, as conditions suitable to cruisers could not be applied to underwater-craft. The U.S. Government would not accept this view; and following a visit paid by her to Newport, Rhode Island, the U 35 interrupted and torpedoed eight vessels outside. The crews were rescued by American destroyers which were in the vicinity at the time. Fresh communications accordingly passed between the British Government and Washington. On Oct. 28 the British liner *Marina* was torpedoed by a submarine and American sailors were reported among the drowned.

Norway, which had agreed to the British contention as to the refusal of the use of her ports to submarines, was met by a violent attack by German submarines on her merchant vessels, many of which were sunk within a few days. All goods destined for England were declared by the Germans to be contraband. Norway protested strongly, but finally decided that her vessels could not carry cargoes for the ports of the Allies.

HOME POLITICAL ASPECTS

The life of Parliament, which would have expired on Oct. 30, 1915, was again extended by a special Act passed on Aug. 23, 1916, and will require to be renewed before May 31, 1917, unless by then a further extension of its existence is considered unnecessary. The war conditions prevailing throughout 1915 were continued during 1916, the House of Commons sitting during many months of the year for only three days a week and never more than four days, but remaining continuously in session with two very brief recesses, namely from June 1 to June 20, and again

from Aug. 23 to Oct. 11. The House of Lords also remained in active session and many of the chief debates of the year were initiated there. The 1915 session did not end till Jan. 27, 1916, and the new session opened on Feb. 15. The question of a new *register* was debated, in conjunction with a proposal for the extension of the franchise to all soldiers and sailors, in August. The problem was eventually referred to a committee of all parties with the Speaker as chairman.

MILITARY SERVICE ACTS

The last months of the session of 1915 were memorable for the passage of the first Military Service Act, applying compulsion to all single men between the ages of 18 and 41. This adoption of the principle of conscription was only achieved after a severe political crisis which reached its height at Christmas and necessitated a two-days' Cabinet Council during the holiday itself. As a result of that crisis, *Sir John Simon, the Home Secretary, resigned office*, and was succeeded by Mr. Herbert Samuel. Resignations were also handed in by the *three Labour Ministers*—Mr. Henderson (President of the Board of Education), Mr. Brace (Under Home Secretary), and Mr. G. H. Roberts (Whip); their action was taken in consequence of resolutions passed by a specially convened Labour Conference in London and also by a meeting of the Executive of the Labour Party and of the Parliamentary Labour Party on Jan. 6 (the date of the Second Reading of the Bill). It was arranged, however, that these resignations should be held in abeyance for decision by the Labour Party's Annual Conference at Bristol, and although that body reasserted its emphatic dislike to conscription, it agreed on Jan. 28 by a large majority of votes that the *Labour partnership in the Coalition Government should be maintained*.

The first Military Service Bill followed immediately on the conclusion of *Lord Derby's voluntary recruiting campaign*, which was undertaken as the last effort to maintain voluntary service in the country. (It provided for the attestation of men to be placed in 46 groups, according to age and whether married or single.) In the last days of this campaign there was a remarkable rush to attest at all the recruiting-stations in the country. Altogether, between Oct. 23 and Dec. 15, there offered themselves 1,150,000 single men and 1,679,263 married men. Of these there were:

	Single.	Married.
Directly enlisted . .	103,000	112,431
Attested . . .	840,000	1,344,979
Rejected . . .	207,000	221,853

Among the attested men were 312,067 single and 449,808 married who were "*starred*" *as in reserve occupations*. Lord Derby calculated that when all deductions were made *the net number available of single men attested was* 343,386, *and that there remained* 651,160 *unstarred single men in the country unaccounted for*. Throughout the campaign stress was laid on a pledge by the Prime Minister to married men that if they attested they should not be called up, unless only a negligible number of single men were unaccounted for. Lord Derby in his report wrote, in view of this pledge: "I am very distinctly of opinion that it will not be possible to hold married men to their attestation unless and until the service of single men have been obtained by other means, the present system having failed to bring them to the colours."

The first Military Service Bill was accordingly introduced into the House of Commons on Jan. 5, in order to redeem the Prime Minister's pledge, and so make available also the 487,676 unstarred married men, whom Lord Derby estimated would be available under his scheme. The debate on the First Reading extended over two nights, and the Bill passed this stage by 403 votes to 105. The minority included 58 Nationalists and 2 Independent Nationalists, 34 Liberals, and 11 Labour members. On the subsequent stages the Irish members withdrew their organised opposition. The Second Reading was carried on June 12 by 431 to 39 votes after Mr. Asquith had stated: "Unless you pass this Bill we cannot do our part in the prosecution of the war." In committee an amendment by Sir Edward Carson to include Ireland in the Bill was negatived without a division; a clause was also inserted making provision for the exemption by local tribunals of men found to be *conscientious objectors* to military service. The Bill passed through Committee on Jan. 20, and the Third Reading was carried on Jan. 24 by 383 to 36. Through the Lords the progress of the Bill was swift, and it received the Royal Assent on Jan. 27, the last day of the session. A Royal Proclamation brought the Act into operation on Feb. 10.

The growing needs of the Army soon called for further action. In the House of Lords on March 2 Lord Derby drew attention to the number of eligible men escaping service, and recommended that no single men under 31 should be "starred," and no others unless they were in their present or similar occupations before Aug. 15, 1915 (National Registration Day). On March 15 the Commons sanctioned the Army Vote for 4,000,000 men, but two questions arose immediately afterwards. A section of the community—represented in Parliament by a group which had Sir John Simon at its head and included together with the convinced pacifists others who asserted that the trade interests of the country must not be too severely pressed, since they were essential for the financing of the war—demanded a definite limitation to be put to the expansion of the Army. The House refused on March 16 to bind itself in this way. As to the means, however, by which the demand for men was to be met there were serious differences of opinion, and these extended to the Cabinet itself. The miners and railwaymen, in conferences and through their local organisations, were protesting strongly against any extension of compulsory service to married men. On the other hand, the rapid summoning of the single groups, the first of which were called up on Jan. 20, had taken by surprise the attested married men, to whom the first summons originally went out on March 7. On their part an agitation ran through the country against compelling them to redeem their attestation while many younger men, who had not attested or were in reserved occupations, were still escaping service. The Labour Party was restive and unconvinced as to the need for the heavy drafts which were being made on the manhood of the country. On the other side, Sir Edward Carson and a large following in the Commons put forward a definite demand on March 29 for *compulsion for all*. So acute became the strain that the Easter adjournment of Parliament, expected on April 18, was postponed. On that day Lord Milner made a motion similar to Sir E. Carson's in the House of Lords, but Ministers refused to enter into a discussion of it. On April 19 it was announced in both Houses that "*material points of disagreement exist in the Cabinet, and if these points are not settled by agreement, the result must be a break-up of the Govern-*

ment." Again the Prime Minister and the Secretary for War entered into direct negotiations with the Labour leaders, and largely at their request the unusual course was taken of holding on April 25 a *secret session of both Houses*, to discuss the national situation and in order that the actual necessities in respect of men for the Army might be more explicitly disclosed. In the Commons this secret session was continued over a second day. (The political situation was further complicated at this period of crisis by the rebellion in Ireland, described in the article on Home Rule.)

Labour Opposition

The hesitation of the Government to apply all-round compulsion led to an abortive attempt on April 27 to extend the original Act by a further Bill which would have required time-expired men to serve till the end of the war, brought in youths of 18, but would not immediately enforce service on other married men unless a further voluntary effort failed. Leave was asked to introduce it as a compromise, but it was denounced all round and the Government decided not even to bring it in for first reading. Instead, on May 2, Mr. Asquith personally introduced the *Military Service (No. 2) Bill*, which rendered liable to serve all men, whether married or single, between 18 and 41. On the Second Reading on May 4, Mr. R. D. Holt, representing those who feared the result on the commerce and finance of the country and eventually on the Allies, moved to reject the Bill, but the voting was 328 to 36 in its favour, after Mr. Henderson (the Labour Minister) had wound up the debate and replied to the critics from the Labour benches. Again the attempt was made in Committee to include Ireland in the Bill, but the motion was negatived, as were others to reduce the age-limit to 17 and to increase it, at the other end, to 45. On May 10 the House agreed in Committee to compel time-expired men to continue to serve till the end of the war by 232 to 33 votes; and by 179 to 49 they required men who had been previously rejected on medical grounds to submit themselves afresh. The Committee stage was completed (after a week's debate and one all-night sitting) on May 15, and the Third Reading was carried on May 16 by 250 to 35. The Lords passed the Bill on May 23, on which occasion Lord Kitchener expressed the thanks of the Army Council and his approval of what had been done. They amended the Bill by curtailing the period of grace allowed to men who fall out of reserved employment from 2 months to 2 weeks, and in spite of Labour opposition this was accepted by the Commons on May 24. The Bill received the *Royal Assent on May* 25. In a message to the people on the same day the King said: "I desire to take the opportunity of expressing to my people my recognition and appreciation of the splendid patriotism and self-sacrifice which they have displayed in raising by voluntary enlistment since the commencement of the war no less than 5,041,000 men, an effort far surpassing that of any other nation in similar circumstances recorded in history, and one which will be a lasting sense of pride to future generations."

The two Service Acts were accepted in the country as in Parliament by an overwhelming majority, but the dissentients occupied a good deal of time and public attention by reason of their persistence in resistance. From time to time attempts were made to meet the case of men whose claims were refused by the *local tribunals*, set up to determine the liability of men who applied for exemption or postponement of service on any ground. A *non-combatant* corps was organised, while for men who refused service in this the alternative of *work of national importance*, usually farm-labouring or road-making, was offered. Certain objectors declining to obey orders were arrested and court-martialled. Some who were sent to France to work behind the lines were sentenced (nominally) to death, but the penalty was commuted to penal servitude. On June 29 Mr. Asquith stated in debate the scheme under which those who established their claim to be conscientious objectors would be released from civil prisons, to which they had already been transferred, and announced the appointment of a Home Office Committee, consisting of Mr. W. Brace, M.P., Sir Thomas Elliott, K.C.B., and Sir Matthew Nathan, G.C.M.G., to determine the kind of work on which they should be employed. A Committee, of which Mr. T. H. W. Pelham was chairman, had already been appointed on March 28 to work in close touch with the Board of Trade in deciding what businesses were and what were not of national importance.

A larger problem for the local tribunals was that of meeting the very large number of claims for exemption or postponement on grounds of business or domestic responsibility. To meet the hardships incurred by men whose incomes would be materially reduced by enrolment in the Army a scheme for the relief of *civil liabilities* (rent, taxes, insurance, etc.) was set up, under which advances up to a limit of £2 per week were payable to assist those able to make good a claim of special hardship. An advisory committee of 23 members, with Mr. C. Stuart-Wortley, M.P., as chairman, was appointed on June 1 to work in conjunction with the official committee. A chief difficulty in connection with the provision of men for the Army was in adjusting the relative claims of the fighting line and the provision of munitions and the maintenance of essential trades. Several attempts were made to "comb out" the young men in Government departments and in reserved trades. On Sept. 21 a *Man-Power Distribution Board* was appointed, consisting of Mr. Chamberlain (chairman), Lord Midleton (vice-chairman), Mr. Arthur Balfour (of Sheffield), Mr. G. N. Barnes, M.P., and Mr. Stephen Walsh, M.P. Its purpose was not to deal with individual cases, which were left to the tribunals, but to initiate policies in dealing with whole classes. The effects of its work was soon apparent in the stiffening of the tribunals and in the recasting of the lists of men eligible for exemption as "indispensable."

Other methods for strengthening the fighting ranks were found in revising the standards and providing for the employment of men not physically fit for active service, but available for garrison duty at home or abroad, clerical and other sedentary army occupations, and trench-digging or road-making. A large scheme for substituting older and less physically useful men in munitions factories and industries and releasing young men was carried into effect in October. It had already been decided on March 1 to *revive the Volunteer Act of* 1863, and to constitute and recognise as a military power, solely for home defence, the Volunteer Forces. This force grew very rapidly thereafter, and by June 20, 49 volunteer corps had been accepted under the Act.

PENSIONS AND ALLOWANCES

Allied with the question of the provision of men was that of pensions and allowances for the

dependants of the men serving or fallen. Owing to the necessity of improvising arrangements on a scale which had never been anticipated, the granting of these allowances were controlled by a number of departments and organisations. To remedy this overlapping and delay, Mr. Asquith announced on Oct. 25 the setting-up of a single *Pensions Department* with a Cabinet Minister at its head. Mr. Arthur Henderson had already accepted the post of Chairman of the Chelsea Commissioners (the most important pensions authority), retiring from the Presidency of the Board of Education for that purpose. A new scale of higher naval war pensions was announced on March 1. On Aug. 4 Mr. Hayes Fisher (as the Parliamentary Representative of the Statutory Committee on War Pensions) announced, in response to the expression of the feeling of the House in several preceding debates and through questions, that the Chancellor of the Exchequer would increase the sum of £1,000,000 already advanced to the Statutory Committee to £6,000,000, so as to provide the full estimated cost of supplementary pensions to widows and dependants of soldiers and to totally disabled soldiers, and a provisional sum for partially disabled soldiers. The sum was based on an estimated number of deaths not exceeding 250,000; if the number were found to be larger the grant would be increased proportionately.

Mr. Henderson introduced the Bill for the setting up of the proposed Board of Pensions on Nov. 14. It provided for the taking over by the new authority of the following powers: (1) those of the Chelsea Commissioners with regard to the grant and administration of disability pensions, other than in-pensions; (2) those of the Army Council with respect to pensions and grants to ex-soldiers, widows, and dependents, other than service pensions; (3) those of the Statutory Committee so far as they relate to the supplementing of pensions and grants otherwise than out of voluntary funds. The administration of naval pentions, other than those of a supplementary nature previously controlled by the Statutory Committee, were left to the Admiralty Department as before.

THE BLOCKADE AND ENEMY TRADE

One of the most insistent matters of Parliamentary debate in the early months of the year was the efficiency of the blockade of Germany. On Dec. 1 (1915) the Earl of Portsmouth had elicited from the Marquess of Lansdowne the statement that the Declaration of London was not an international code and had no international validity. At the same time attention was drawn in the Commons to the largely increased imports of oil and linseed into Holland and the apparent failure of the Netherlands Overseas Trust to prevent the passage of contraband into Germany by way of Holland. An arrangement was made at this time between the British Government and the Merchants Guild of Copenhagen and the Industrial Association of Denmark, for similar purposes to that of the Netherlands Overseas Trust, and strong pressure was brought to bear on the Foreign Office in both Houses to publish the terms. Lord Robert Cecil refused to produce these documents, but on Dec. 8 introduced a new *Trading with the Enemy Bill*, extending the restrictions of the principal Act to people of enemy nationality or association though not resident in enemy countries. Simultaneously with the progress of this Bill through Parliament ran another—the Companies of Enemy Character Bill, introduced by Lord Halsbury and aimed at companies with alien shareholders and under alien control, though remaining on the British register. The Government Bill passed through the two Houses and received the Royal Assent on Dec. 23, but Lord Halsbury's, though it received a Third Reading in the Upper House, was not brought before the Commons. Instead the Government introduced a stronger Bill of their own, the Trading with the Enemy (Amendment) (No. 2) Bill, which gave the Board of Trade discretionary power to prohibit the carrying on of any business now conducted in the United Kingdom by persons of enemy nationality or association, or for the benefit of subjects of enemy states. This went rapidly through all stages and became law on Jan. 26.

On the same day the Commons discussed the blockade at length on a motion by Mr. Shirley Benn urging the Government "to enforce as effective a blockade as possible, without interfering with the normal requirements of neutral countries for internal consumption." The motion was "talked out" after explanation had been drawn both from Sir Edward Grey and Lord Robert Cecil. Parliament was prorogued on the following day till Feb. 15. On Feb. 22 in the House of Lords, Lord Sydenham renewed the pressure with a motion "that in conformity with the principle of international law and with the legitimate rights of neutrals, more effective use could be made of the Allied Fleet in preventing supplies directly conducive to the prolongation of the war from reaching enemy countries." The Government's answer, announced by Lord Lansdowne, was the raising of Lord Robert Cecil to Cabinet rank as *Blockade Minister*, and after a second day's debate Lord Sydenham withdrew his motion. On Feb. 24 a Contraband Committee was appointed; its chairman was Mr. E. M. Pollock, K.C., M.P., and its members represented the Admiralty, the Foreign Office, the Board of Trade, and the Procurator-General's Department. The Board of Trade had already appointed on Feb. 9 an advisory committee on matters arising under the new Trading with the Enemy Amendment Act, with Mr. Ernest R. Moon as Chairman. Later, a larger War Trade Advisory Committee, with Sir F. J. S. Hopwood as chairman, was appointed to co-ordinate the administration of the War Trade Department, the Contraband Committee, and the Enemy Export Committee, and to advise the Cabinet on questions of policy arising from the work of these bodies. On June 28 Lord Robert Cecil announced the *complete abandonment of the Declaration of London*. On Nov. 8 a protest against the acceptance of offers from neutrals for the purchase of enemy properties in Nigeria, order for sale under the Enemy Trading Act, was carried to a division against the Government, whose policy was defended by Mr. Bonar Law. The motion of censure was defeated by 231 to 117 votes.

TRADE AFTER THE WAR

As a complement to the enemy trading and blockade legislation, Parliament discussed the problem of trade changes after the war. The majority of members on both sides of the House were desirous of approaching the commercial problem free from previous prejudice for or against either Free Trade or Tariff Reform. The new outlook was made evident when on Jan. 10, Mr. Runciman (the Free Trade President of the Board of Trade) supported, and the House of Commons carried without a division, a motion by

Prof. W. S. Hewins, urging the "consultation of the Government with the Governments of the Dominions in order to bring the whole economic strength of the Empire into co-operation with the Allies in a policy directed against the enemy." The question was revived in more definite form when proposals were made for an *Economic Conference of the Allies* to be held at Paris, to answer the Central European trading policy under discussion by the enemy States. On Mar. 21 it was announced that Mr. Runciman would be the British delegate to the Conference, but following a frank debate in the Commons it was arranged on Mar. 28 that Mr. Bonar Law should also attend. Before the Conference was actually convened on June 14 it had also been arranged that the British Dominions should be represented by the Prime Minister of Australia (*Mr. W. M. Hughes*), who had arrived in London on March 7 and aroused extraordinary enthusiasm by a series of speeches aimed at German trade. Mr. Hughes remained in Europe specially to attend the Conference, and was accompanied thither by Sir George Foster (Canadian Minister of Commerce). Owing to illness Mr. Runciman was unable to attend, and his place was taken by Lord Crewe. Both before and after the Conference there was criticism of any After-war Trade-war by rigid Free Traders in both Houses, but they received very little support. Lord Courtney raised the subject on April 11, but the Commons deferred any effective discussion till Aug. 2, when Mr. Asquith commended the restrictions reached at Paris, as representing the general lines on which the Allies were preparing to meet the threatened attack on their trade in neutral countries after the war. He stated that the restrictions had been formally adopted by the British and French Governments, and enumerated several steps that had already been taken in the direction desired:

(1) Schemes devised by the Board of Trade to render us independent of enemy dyes, spelter, and other important articles.

(2) The creation of a State scheme of assistance for scientific industrial research.

(3) Investigations by expert committees into the conditions and needs of important branches of industry and finance.

(4) Reference of commercial and industrial policy generally to a strong committee with Lord Balfour as chairman.

(5) Communications with the Dominions and arrangements for a conference with them and India on the entire subject of imperial trade policy.

An actual instance of change in practice was recorded during the debate on the Colonial Office Vote on Aug. 3 in reference to a bounty on palm kernels from British African possessions.

A *Munitions of War Amendment Bill*, to remove certain grievances under the original Act, was introduced in December and carried. In the course of the discussions Mr. Lloyd George made a memorable speech on Dec. 20, when he declared that from the beginning Great Britain and the Allies had been "*too late*." In the turning out of explosive shells, for example, the Germans had been producing 250,000 while the British produced 2,500. Point was given to the debates by the outbreak during its progress of a considerable strike on the Clyde, and the arrest and deportation from the area of certain of the leaders. The Bill was further amended under pressure of the Labour members, but was carried through the Commons on Jan. 4. On Jan. 21 Mr. Asquith announced yet further measures for the "dilution of labour." The Munitions Bill received the Royal Assent in January. A very different state of affairs in respect of munitions was disclosed when the vote for the Ministry came up for debate on Aug. 15. By that time Mr. Lloyd George had been appointed Minister for War and the Minister of Munitions was Mr. E. S. Montagu. In a remarkable speech Mr. Montagu gave as instances of the extraordinary growth of the munitions output the following periods in which could now be obtained an equivalent of what 15 months previously it had taken 12 months to produce:

18-pounder ammunition	3 weeks.
Field-howitzer ammunition	2 weeks.
Medium-sized shell	11 days.
Heavy shell	4 days.

There had been correspondingly enormous increases in the output of big guns, machine guns, rifles, and in other weapons and ammunition, while as much gun and howitzer ammunition was being issued weekly to France as constituted the whole pre-war stock of land-service ammunition in this country. One-third of the whole British production of shell steel was going to France; and 20% of present machine-tool production of the country was destined for the Allies. Mr. Montagu warned the House, however, that German production was also still formidable.

AERIAL DEFENCE

For a few weeks in February and March Parliament was considerably exercised over the matter of the defence of London and the kingdom generally against Zeppelins and other air attacks. As early as Dec. 13 (1915), Mr. Tennant (at that time Under-Secretary for War) announced that the air defence of London had been transferred to the War Office and placed under the control of Lord French, Commander-in-Chief of the Home Forces. With the opening of the spring Zeppelin season an agitation was pressed for reprisals, and charges of inefficiency were freely levelled against those in charge. An amendment to the Address by Mr. Joynson-Hicks on Feb. 16 threatened to lead to a dangerous division for the Government; it was averted by the promise of a day for a full discussion of the Air Service. Lord Kitchener was provoked on the following day to make a defence of the service in the House of Lords; but on March 9 Lord Montagu of Beaulieu returned to the attack on a motion which had for object the acceptance of the principle: "One element, one service."

On the 14th *Mr. Pemberton-Billing*, who after an unsuccessful attempt in Mile End had won an astonishing victory against the Coalition candidate in East Herts, took his seat and made a maiden speech which excited unwonted interest and encouragement. On March 22, Mr. Billing, in a second and more impetuous speech, made sensational charges to the effect that by sending airmen up in defective machines the War Office was "murdering" them. Mr. Tennant promptly offered a Commission of Inquiry. By his subsequent erratic and irresponsible methods of criticism Mr. Billing lost the "ear" and sympathies of the House. In the actual Air Service debate on May 17 he was deliberately "counted out." Lord Montagu pursued his campaign for a single Air Service in the Lords, and in a two-days' debate on his motion in that sense, on May 23, he secured the support of Lord Northcliffe in a maiden speech. The effect of the cricitism had been the setting-up of an *Air Board*, represented in the

Cabinet and in the Lords by Lord Curzon and in the Commons by Major J. L. Baird.

FOOD CONTROL

During the year the close control the Government already exercised over sugar, meat, and the sale and distribution of liquor was extended to petrol and later to wheat. The controlling authorities were subjected to some criticism, but, except in the case of petrol, in regard to which considerable modification took place, the action taken had Parliamentary support in full measure. The announcement by Mr. Runciman of his *Wheat Commission* on Oct. 10 was accompanied by a statement that the Government had made a very large purchase of Australian wheat, and that steps had been taken to provide all the tonnage required for the conveyance of the wheat purchased to Great Britain. The immediate effect of the announcement was, however, to cause a further rise of a halfpenny on the quartern loaf. This, in turn, brought a formal debate on Oct. 17 on food prices and on the report of a Departmental Committee (presided over by Mr. J. M. Robertson) as to the methods by which to prevent the exploitation of the public. Mr. Runciman asserted that heroic remedies would achieve more harm than good and that prices were high because of the world-shortage both in production and in transport facilities. He suggested possible action in regard to fixing prices for milk, and in regard to freights maintained that shipping was already controlled almost to the limit.

FINANCE

In consequence, however, of continuous public pressure, a complete change of policy was reached by Nov. 15, when Mr. Runciman announced the immediate appointment of a *Food Controller*, to be invested with very wide powers of action by means of Orders in Council issued under the Defence of the Realm Acts. Mr. Runciman again drew attention to the shortage of tonnage, partly due to enemy submarine activity, but more directly to the withdrawal of a very large proportion of the mercantile marine for naval and military services and the delay in new construction owing to the depletion of the shipyards of skilled labour. He explained the measures being taken to reinforce the shipyards and the farms by labour brought back when necessary from the Army. Pending the actual appointment of a Controller, the powers sought were conferred by an Order in Council, signed on Nov. 17, on the Board of Trade. They gave authority—

To provide for the maintenance of supplies.

To prohibit waste, the improper use of foodstuffs, and improper methods of manufacture.

To control the sale and distribution of all food, by tickets, if so deemed necessary.

To prevent the creation of "corners" and to fix maximum prices.

To commandeer any foodstuff as might be necessary.

To order traders to disclose all their business secrets.

Immediate and definite regulations were issued respecting potatoes, milk, and flour. Pure white flour was not to be milled in future.

The Budget statement (full details of which are set out on pages 325–9) was followed by a Finance Bill divided into two parts. The new duties proposed, more especially that on matches, were considerably modified during the debate, and a proposition to tax railway tickets was abandoned altogether. The Chancellor definitely refused on May 18 to adopt the method of raising money by *premium bonds*. He extended, however, the control over *American and other foreign securities* by the War Obligation (No. 2) Bill, which was passed on Dec. 13 (1915), and by a resolution in Ways and Means on June 22 imposed an additional 2*s.* in the £ income tax on all American and Foreign securities the owners of which refused, on request, to deposit them with or sell them to the Government. On Aug. 10 a motion to reduce the Chancellor's salary was made to call attention to the large issue of Treasury Bills, £850,000,000 of which were then said to be outstanding. Mr. McKenna defended his policy of declining to issue another long-term loan at this time on public grounds. He mentioned that between £1,000,000 and £2,000,000 had to be found daily for payment abroad; but he calculated that, allowing for a continuance of expenditure on the same scale till March next, the national indebtedness would then be less than one-sixth of the national wealth and that it would be possible, without increasing existing taxation, to pay interest on the debt and a considerable sinking fund. The vote of censure was withdrawn. A similar discussion was, however, again raised on Oct. 19, when Mr. McKenna, while declaring that a long loan would be issued at the appropriate time, said, "We have had no difficulties in financing ourselves so far, and I see no reason why we should have any hereafter."

Four Votes of Credit were proposed and granted during the year, viz.:

Feb. 21	£300,000,000
May 23	£300,000,000
July 24	£450,000,000
Oct. 11	£300,000,000

In proposing the last Mr. Asquith reviewed the course of the war and reiterated the purposes and aims of the Allies in what was the most memorable speech of the year. In a crowded House and speaking under the strain of the loss of his eldest son at the Front, the Prime Minister declared:

NO PATCHED-UP PEACE

"The strain which the war imposes on ourselves and our Allies, the hardships which we freely admit it involves to some of those who are not directly concerned in the struggle, the upheaval of trade, the devastation of territory, the loss of irreplaceable lives; this long and sombre procession of cruelty and suffering, lighted up as it is by deathless examples of heroism and chivalry, cannot be allowed to end in some patched-up, precarious, dishonouring compromise, masquerading under the name of peace. The ends of the Allies are well-known; they have been frequently and precisely stated. They are not selfish ends, they are not vindictive ends; but they require that there should be adequate reparation for the past and adequate security for the future. On their achievement we in this country honestly believe depends the best hopes of humanity."

Renewed criticism during the year of the receipt of salaries by members of Parliament led the Government to introduce a motion on April 6 that members of Parliament who were also entitled to military pay should be given the option of taking one or other of the stipends, but not both. To this an amendment was proposed to abolish payment of members altogether till the end of the war; but after Mr. Bonar Law had opposed this attempt to break the party truce, the amendment was defeated by 247 to 32 votes, and the Government's own motion was also withdrawn. Earlier

in the year Sir Frederick Smith (Attorney-General) announced that the Solicitor-General and himself had voluntarily agreed to a reduction in fees amounting approximately to £5,000 annually each.

Another economy measure was the *Summer Time* or *Daylight Saving Bill*, which was introduced by the Home Secretary as a Government measure, and passed its Second Reading in the Commons on May 8 by 170 votes to 2. It became law on May 17. By a later Act Irish time was synchronised with English time.

There were again many changes in personnel in both Houses of Parliament. The death of Lord Kitchener, who was drowned in the sinking of H.M.S. *Hampshire* on its way to Russia on June 5, removed the most conspicuous figure in the country. In the necessary readjustment of the Cabinet, Mr. Lloyd George passed from the Ministry of Munitions, which he had created, to become Secretary of State for War. The Earl of Derby became Under-Secretary for War, succeeding Mr. Tennant, who was promoted to the Cabinet as Secretary for Scotland. Sir Edward Grey was raised to the Peerage as Viscount Grey of Falloden, remaining Foreign Secretary. Mr. J. A. Pease had become Postmaster-General in succession to Mr. Herbert Samuel on Jan. 18. Mr. Chaplin was created a Viscount, and Lord Charles Beresford was also raised to the peerage as Lord Beresford of Metemmah. Among the new arrivals in the House of Commons during the year were Mr. C. B. Stanton (who succeeded Mr. Keir Hardie and defeated an official Labour candidate on the conscription issue at Merthyr Tydvil), Sir George Reid (an ex-Prime Minister of Australia, and more lately High Commissioner in London), Admiral Sir Hedworth Meux, and Sir Charles Seely (who returned to the House after an absence of some years to take the seat vacant by the death of Sir Arthur Markham).

The War Committee of the Cabinet was enlarged during the year, and now consists of Mr. Asquith, Mr. Balfour, Mr. Lloyd George, Mr. Bonar Law, Mr. McKenna, Lord Curzon, and Mr. Montagu.

THE NAVAL WAR

BY A NAVAL OFFICER

The principal event of the second year of naval war took place on May 31–June 1, 1916, when the German High Sea Fleet was brought to an engagement off the Jutland Bank, off the coast of Denmark. The dispatches of Admiral Sir John Jellicoe, Commander-in-Chief of the British Grand Fleet, with the report to him of Vice-Admiral Sir David Beatty, commanding the Battle-cruiser Fleet, were published on July 7. The German official report appeared in the German Press of July 1 to 5. From these sources, the following narrative has been compiled. The Grand Fleet left its base on May 30 in pursuance of a general policy of periodical sweeps through the North Sea. In the early afternoon of Wednesday, May 31, the First and Second Battle-cruiser Squadrons, First, Second, and Third Light Cruiser Squadrons, and destroyers from the First, Ninth, Tenth, and Thirteenth Flotillas, under the immediate command of Vice-Admiral Sir David Beatty, supported by the Fifth Battle Squadron under Rear-Admiral Hugh Evan-Thomas, were, in accordance with the Commander-in-Chief's directions, scouting to the southward of the Battle Fleet, which was accompanied by the Third Battle-cruiser Squadron, First and Second Cruiser Squadrons, Fourth Light Cruiser Squadron, and the Fourth, Eleventh, and Twelfth Flotillas. The German High Sea Fleet, consisting of five battle-cruisers and a proportion of light cruisers and destroyers, acting as a reconnoitring force, under the immediate command of Vice-Admiral Hipper, with the Battle Fleet and a large number of small cruisers and several divisions of destroyers—the whole under the command of Admiral Scheer—had left its anchorage on the morning of May 31, and had advanced towards the Skager Rak, upon an "enterprise directed northward." At 2.37 p.m. on that day, the British Battle-cruiser Fleet, when steering to the northward to join the Battle Fleet, received reports indicating the presence of enemy vessels. Sir David Beatty changed course to S.S.E., the course for Horn Reef, to place his force between the enemy and the latter's base. The German report states that the light cruisers under Hipper "unexpectedly" met eight small English cruisers, with a number of destroyers. The cruisers on both sides engaged at long range. At 3.31 p.m. the Battle-cruiser Fleet sighted the enemy battle-cruisers under Hipper. Sir David Beatty formed line of bearing on an E.S.E. course at a speed of 25 knots, slightly converging on the enemy, then 23,000 yards distant. The German battle-cruisers took the same course in line ahead. The weather was clear, the visibility good, and the sea calm. At 3.48 p.m. both forces opened fire simultaneously at 18,500 yards range. This range gradually decreased during the run to the southward to 14,500 yards. After the action became general, the battle-cruiser *Indefatigable* was sunk. At eight minutes past four the Fifth Battle Squadron's four fast battleships came into action astern of the British battle-cruisers, opening fire on the enemy at a range of 20,000 yards. The *Queen Mary* was sunk. About this time twelve British destroyers attacked the enemy, and were met by fifteen destroyers and a light cruiser. Two German destroyers and the light cruiser were sunk, and two of the British destroyers were disabled and afterwards sunk. At 4.42 the enemy's Battle Fleet was sighted, bearing S.E., and steering to join Hipper's division. Sir David Beatty then altered course sixteen points in succession to starboard. The German battle-cruisers turned about the same time, and the action continued on a northern course. The Fifth Battle Squadron turned also, forming astern of Sir David Beatty's force, with some interval between the cruisers and battleships. Rear-Admiral Evan-Thomas engaged the leading ships of the German battle squadrons. On this course the Germans were obscured by the mist, only showing up clearly at times, and the action was intermittent. From 5 to 6 p.m. Sir David Beatty drew ahead and gradually turned to the north-east, keeping the enemy at a range of about 14,000 yards. The Germans also hauled to the north-eastward, their leading ships being severely punished, and one of the battle-cruisers being set on fire. At 5.35, when the course of the British battle-cruisers was N.N.E., the relative position of the Battle Fleet was estimated to be N. 16 W., distant about five miles. At 5.56 Sir David Beatty altered course to east, and proceeded at his utmost speed, bringing the range down to 12,000 yards. Another British destroyer attack at this time resulted in

a hit on one of the enemy's ships. At 6.50 p.m. the battle-cruisers were clear of the leading British battle squadron, then bearing three miles N.N.W. from the *Lion*, Admiral Beatty's flagship. Just before this time the Third Battle-cruiser Squadron, consisting of the *Invincible*, *Inflexible*, and *Indomitable*, under Rear-Admiral the Hon. H. L. A. Hood, appeared ahead, steaming south towards the enemy's van. This squadron was ordered to take station ahead, and Sir David Beatty reports that the movement "was carried out magnificently, Rear-Admiral Hood bringing his squadron into action in a most inspiring manner, worthy of his great naval ancestors." A few minutes later the *Invincible*, Hood's flagship, was sunk. Sir David Beatty altered course to the E.S.E. in support of the Third Battle-cruiser Squadron, which at 6.25 p.m. was only 8,000 yards from the enemy's leading ship. The Battle-cruiser Fleet continued its course to the eastward, and at this stage the head of the German battle line was "crumpled up." The First Battle Squadron, under Vice-Admiral Sir Cecil Burney, came into action at 6.17 p.m., with the enemy's Third Battle Squadron at a range of about 11,000 yards, and administered severe punishment both to the battleships and to the battle-cruisers and light cruisers which were also engaged. The squadrons of the Battle Fleet had been formed into line of battle on receipt of Sir David Beatty's report, and it was during deployment that they became engaged. At this time the *Defence* and *Warrior*, of the First Cruiser Squadron, were observed passing down between the British and German Fleets under a very heavy fire. "It is probable," said Sir John Jellicoe, that Rear-Admiral Sir Robert Arbuthnot, commanding this squadron, "during his engagement with enemy light cruisers, and in his desire to complete their destruction, was not aware of the approach of the enemy's heavy ships, owing to the mist, until he found himself in close proximity to the main fleet. Before he could withdraw his ships they were caught under a heavy fire and disabled." The *Defence* disappeared, and the *Warrior* passed to the rear disabled, sinking the following morning. It is not known when the *Black Prince*, of the same squadron, was sunk, but a wireless signal was received from her between 8 and 9 p.m. The action between the Battle Fleets lasted intermittently from 6.17 p.m. to 8.20 p.m., at ranges between 9,000 and 12,000 yards. During this two hours the British Fleet made alterations of course from S.E. by E., to W., in the endeavour to close. The enemy, however, constantly turned away, and opened the range, under cover of destroyer attacks and smoke screens, and the alterations of course had the effect of bringing the British ships from a position on the bow of the enemy to a quarterly bearing, or into the position of a following or chasing fleet. A large number of torpedoes were fired by the Germans, but only one took effect, on the battleship *Marlborough*, flying Sir Cecil Burney's flag, and even in this case the ship was able to remain in the line, and to continue the action. The enemy's efforts to keep out of effective gun range were aided by the weather conditions: After the arrival of the British Battle Fleet the enemy's tactics were of a nature to avoid further action. By 9 p.m. the enemy was entirely out of sight, and Sir John Jellicoe then manœuvred to remain between the Germans and their bases, preparatory to renewing the action in the morning. During the night many gallant deeds were performed by the British destroyer flotillas, causing heavy losses to their opponents. Sir John Jellicoe said of the destroyers that "they surpassed the very highest expectations I had formed of them." At daylight the British Fleet cruised to the northward, to meet the German Fleet, but it could not be found. About 4 a.m. a Zeppelin was engaged for about five minutes, and it is presumed that by this agency the enemy was acquainted with the position of the Grand Fleet and was enabled to evade it. At 1.15 p.m. on June 1 the British Fleet shaped course for its bases.

The losses claimed on either side were as follows:—German ships put out of action: Two battleships, Dreadnought type; one battleship, Deutschland type; all three seen to sink, of which one, the *Pommern* (Deutschland type) was admitted by the Germans. One battle-cruiser was sunk, the Lutzow, admitted by the Germans. One battleship of the Dreadnought type and one battle-cruiser were also seen to be so severely damaged as to render it extremely doubtful if they could reach port. Five light cruisers were sunk, of which four, the *Wiesbaden*, *Elbing*, *Rostock*, and *Frauenlob*, were admitted. Seven destroyers were also claimed to have been sunk, of which five were admitted; and one submarine. The British ships put out of action were three battle-cruisers, the *Queen Mary*, *Indefatigable*, and *Invincible*; three armoured cruisers, the *Defence*, *Black Prince*, and *Warrior*; and eight destroyers, the *Tipperary*, *Ardent*, *Fortune*, *Shark*, *Sparrowhawk*, *Nestor*, *Nomad*, and *Turbulent*. No battleships or light cruisers were sunk on the British side. An honours list for the Battle of Jutland was published in the *London Gazette* on Sept. 15, 1916, when three V.C.'s were awarded. In a memorandum published with the dispatches, the Admiralty Board congratulated "the officers, seamen, and marines of the Grand Fleet on this, the first Fleet action which has occurred since the outbreak of the war, as a result of which the enemy, severely punished, withdrew to his own ports. The events of May 31 and June 1," added the Board, "gave ample proof of the gallantry and devotion which characterised all who took part in the battle; the ships of every class were handled with skill and determination; their steaming under battle conditions afforded a splendid testimony to the zeal and efficiency of the engineering staff; while individual initiative and tactical subordination were equally conspicuous."

Outside the great battle of May 31, the events in the North Sea have not been of large account. The policy pursued by the British Fleet was one of containment and constriction—of keeping watch upon the enemy's ports for any sign of movement on the part of his fleet, and of stopping, so far as diplomatic exigencies would allow, all commodities from entering or leaving Germany. In addition, what was called the Dover Patrol, under the command of Vice-Admiral Sir Reginald Bacon, played an important part by protecting the flank of the vast transport of troops, wounded, and supplies to and from the Army in France. Sir Reginald was able to report on May 29, 1916, that this vast transport had been so thoroughly safeguarded that not one single life had been lost during the sea passage. He also stated that in the six months previous to his report, over 21,000 merchant ships, apart from men-of-war and auxiliaries, had passed through the Patrol, of which only 21, or less than 1 per thousand, had been lost, or seriously damaged by the enemy. The Patrol also utilised opportunities when expedient of bombarding the enemy's positions

along the Belgian coast, with the co-operation of the Royal Naval Air Service, which made numerous bomb attacks upon Ostend, Zeebrugge, and other objects of military importance. These sea and air bombardments produced a few naval encounters. On Mar. 20, 1916, after a combined force of approximately fifty British, French, and Belgian aeroplanes and seaplanes, accompanied by fifteen fighting machines, had attacked the German seaplane station at Zeebrugge and the aerodrome at Houttave, near Zeebrugge, three German destroyers which had been obliged to put to sea were engaged by four British destroyers. Two of the German boats were observed to be hit, but made good their escape. At other times during the year there were skirmishes between torpedo craft and patrol vessels in the southern section of the North Sea. Farther north, the airship sheds at Tondern, in Schleswig-Holstein, were attacked on Mar. 25 by British seaplanes, supported by light cruisers and destroyers. In connection with this raid the British destroyer *Medusa* was lost in collision, and a German destroyer was rammed and sunk by the British cruiser *Cleopatra*, while the German patrol boats *Otto Rudolf* and *Braunschweig* were sunk by gun-fire. In common with the aircraft, our submarines continued their offensive operations whenever possible. On Aug. 19 Lieutenant-Commander R. Turner, in "E 23," torpedoed the battleship *Westfalen*; and on Oct. 19 the light cruiser *München* was likewise torpedoed, but in both cases the Germans claimed that the ships reached port.

Advances into the North Sea, especially by night, on the part of the German torpedo craft occurred several times during the year. On Feb. 2 the Dutch tank steamer *Artemis* was held up by four torpedo boats, and subsequently torpedoed, about midway between Holland and England, but managed to return to Rotterdam. On Feb. 10 a division of four new British minesweeping sloops was engaged in a night attack near the Dogger Bank by a German torpedo flotilla of new and well-armed destroyers, and one of the former, the *Arabis*, was sunk, 24 of her crew being made prisoners. On June 24 the Great Eastern Railway steamer *Brussels* was captured in this way and taken to Zeebrugge. A month later, her master, Captain Charles Fryatt, was tried by court-martial at Bruges and sentenced to be shot for having, as was alleged, made an attempt on Mar. 28, 1915, to ram a German submarine. The sentence was carried out on July 27, and aroused great horror and indignation. Mr. Balfour referred to the incident as "the judicial murder of Captain Fryatt," for "doing his duty as a man of courage and of honour," and Mr. Asquith stated on July 31 that the Government had "heard with the utmost indignation of this atrocious crime against the law of nations and the usages of war." The Prime Minister declared that when the time arrived the Government were determined to bring to justice the criminals, "whoever they may be and whatever their position." The steamer *Lestris* was captured in a similar manner on July 5; and the *Colchester* on Sept. 21. Several Dutch vessels were also seized and conveyed to Zeebrugge, and released after examination and the capture of contraband or Allied passengers.

Only on two occasions did the larger vessels of the German Navy appear in the North Sea, in addition to that of May 31. The first was in connection with the outbreak in Ireland at Easter. The German battle-cruiser squadron, accompanied by light cruisers and destroyers, appeared off Lowestoft and Great Yarmouth on the morning of April 25, and bombarded the two places for twenty minutes, doing only insignificant damage and killing four people. Two Zeppelins which also appeared were pursued by naval aeroplanes. The squadron returned to Germany at full speed, pursued by the local forces and light cruisers and destroyers. It was at this time that a German auxiliary ship, under the guise of a Dutch trader, was captured while attempting to land arms and ammunition on the west coast of Ireland. The auxiliary blew herself up, and a number of prisoners were made. From a submarine which also came to the west coast Sir Roger Casement landed in a collapsible boat and was arrested soon afterwards. The second appearance of the enemy's Fleet outside the German protected anchorages was on Aug. 19, when the British look-out squadrons and other units reported considerable activity on the part of the enemy. The High Sea Fleet came out, but learning from its scouts that the British forces were in considerable strength, the enemy avoided an engagement and returned to port. In searching for the Germans, two British light cruisers were lost by submarine attack, the *Nottingham*, Captain C. B. Miller, and *Falmouth*, Captain J. D. Edwards. By the continuance of the war of attrition by mine and submarine, a few more warships were lost during the year. The chief of these were the battleship *King Edward VII*, sunk by a mine on Jan. 8, 1916; the armoured cruiser *Hampshire*, in which Lord Kitchener and his Staff were travelling to Russia, and which was also sunk by a mine off the Orkneys on June 5; the light cruiser *Arethusa*, mined and sunk on Feb. 12; the destroyers *Lassoo* and *Coquette*, torpedo boat No. 11, and some auxiliaries, which will all be found in the table on the following pages.

THE WAR ON COMMERCE

Mercantile shipping, not only of the Allied Powers, but of neutrals as well, has been the object of persistent attack during the year both by submarine and by other means. Early in January a German armed merchant cruiser was found to be at work in the Atlantic, the *Möwe*, which had run the blockade out of the North Sea, a feat often attempted, but never accomplished, on previous occasions during the war. The *Möwe* destroyed over 50,000 tons of shipping, sinking fourteen vessels, twelve of which were British. She also captured the liner *Appam*, and sent her into Norfolk, U.S.A., in charge of a prize crew. Legal proceedings instituted by the *Appam's* owners to recover their ship were still in hand at the end of October 1916. On Mar. 4 the *Möwe* reached Germany safely, with some 200 prisoners and £50,000 in gold bars taken from her captives. Four days earlier, on Feb. 29, another raider, the *Greif*, had been caught and sunk by the *Alcantara*, Captain T. E. Wardle, assisted by the *Andes*, while attempting to break out of the North Sea.

On Mar. 1, 1916, Germany initiated a new campaign against merchant ships, the reason assigned being that owing to the arming of such vessels by the Allied Powers, she proposed to treat every ship as a vessel of war, and thereby liable to be sunk at sight. As an appendix to the German declaration, a list of cases was published in which merchant steamers had "treacherously" fired upon the "U"-boats. The cases numbered eighteen, and in all but three of them the submarine was unable to sink the ship. In January the United States Government had raised doubts

as to the legality of the practice of arming merchant vessels, but the right was upheld by the Allies. In connection with the discussion, the British Admiralty issued a list of 54 vessels, all unarmed, which were torpedoed by enemy submarines during 1915 without any warning, 40 being British and 14 neutral ships. These lists showed that the proclaimed new campaign was meaningless, as the Germans had previously treated all ships as if they had carried guns. The only apparent difference after Mar. 1 was that the methods of the submarines became somewhat more ruthless, and were directed more against neutrals. In the House of Commons on Oct. 17, 1916, Mr. Runciman stated that "we have actually lost by enemy action and by marine risks no less than 2,000,000 gross tons of shipping since the war began." This was in the proportion of nearly 10 % of the whole British mercantile tonnage. Towards the end of 1915 the under-water campaign had been carried farther from the German bases, and ships had been sunk in the Mediterranean. It was in this sea that a large number of the losses during 1916 were sustained. One boat, "U 35," visited Cartagena on June 21 with a letter from the Kaiser to King Alfonso. The submarine afterwards sank several ships. On Oct. 7 "U 53" appeared at Newport, Rhode Island, having crossed the Atlantic, and next day this boat sank six vessels off the Nantucket lightship. Two months earlier, on July 9, a commercial submarine, the *Deutschland*, had arrived at Norfolk, Virginia, after a sixteen-day voyage from Germany; and leaving again on Aug. 1, she arrived off the mouth of the Weser on the 23rd. During August the Allied Powers circulated a memorandum among neutral States asking them to debar submarines from the privileges accorded to belligerent surface craft in their ports, the grounds for this request being, first, that submarines could navigate and remain at sea submerged, and could thus escape all control and observation; and, secondly, that it was impossible to identify them and establish their national character, whether neutral or belligerent, combatant or non-combatant, and to remove the capacity for harm inherent in the nature of such vessels. It was reported that the United States was unable to comply with this request, but that Norway had forbidden submarines of belligerent navies using Norwegian waters, at the risk of being attacked without warning. On Oct. 17, however, Lord Grey indicated in the House of Lords that the whole of this matter, and the kindred one of the United States attitude towards British cruisers patrolling off their coast, was in a state of suspense for the moment. Many protests from Spanish, Norwegian, and Dutch shipowners were made in September and October against the continued attacks of German submarines.

Among other acts of the German submarines should be mentioned the shelling of Seaham Harbour, Durham, on the night of July 11. Thirty rounds of shrapnel were fired from a 3-in. gun, a dozen of which fell about Seaham Colliery, but only one woman was killed and one house was struck by a shell. Eleven months before, a German submarine had similarly shelled the Cumberland towns of Whitehaven, Parton, and Harrington, without any serious effect.

THE MEDITERRANEAN

A great change in the work of the Navy in the Mediterranean was brought about by the abandonment of the Dardanelles Expedition at the end of 1915. In the splendid success achieved in the withdrawal from Suvla and Anzac, announced on Dec. 20, 1915, in which there was not a single casualty; and also in the withdrawal from Cape Helles, announced on January 9, 1916, in which only one casualty occurred, the "invaluable assistance rendered in an operation of the highest difficulty by Admiral de Robeck and the Royal Navy" was recognised by the military Commander-in-Chief. The cruiser *Edgar* was specially mentioned for her accurate fire during these concluding operations. For his services, Admiral de Robeck received the K.C.B. He remained in command of the principal British forces in the Mediterranean until the summer of 1916. The expedition to Salonika necessarily imposed many responsible duties upon the Fleet. An Allied squadron bombarded Dedeagatch and the Bulgarian coast as far as Porto Lagos on Oct. 21, 1915, and also on subsequent occasions. On Jan. 11, 1916, Allied troops landed and occupied Corfu to prepare for the reception of the remnant of the Serbian Army from Albania, the Entente Powers deeming this an obligation of humanity. The Kaiser's villa, the Achilleion, in Corfu, was taken over for use by wounded Serbian soldiers. In connection with the submarine menace in the Mediterranean, which became very insistent about the end of 1915—the P. and O. liner *Persia*, among other important vessels, being sunk on Dec. 30, off Crete, with a loss of 209 lives—the Allied naval forces seized the Greek island of Castellorizo, and subsequently other islands, to prevent their use by hostile submarines. On April 8, 1916, forces were landed in Cephalonia, especially at the harbour of Argostoli. At one time the submarine activities were such that certain shipping lines notably the Nederland Company, transferred their steamers from the Suez Canal to the Cape Route; at a later date a reversion to the Canal took place, the Nederland Company resuming this customary route in the middle of June. Effective support to the Army was rendered by the Fleet in connection with the Turkish attacks on Egypt and the Suez Canal. On May 18, 1916, naval vessels and aircraft carried out a heavy bombardment of El Arish, an important post on the enemy line of communications from Syria to Egypt. The work of the Royal Naval Air Service in the Eastern Mediterranean was important. On the evening of April 14, 1916, three of its aeroplanes flew to Constantinople, also bombing the Zeitunlik powder factory and the aeroplane hangars; while another machine dropped bombs on Adrianople railway station. The flight to Constantinople, over 300 miles there and back, was made partly in a strong wind, rain, and thunderstorms. Wing-Commander E. L. Gerrard, in charge of the Eastern Mediterranean aircraft, was awarded the D.S.O. The Navy was also connected with the operations in the neighbourhood of Sollum. It was off this Egyptian frontier post, which was evacuated in December 1915, that the armed merchant vessel *Tara* had been sunk by submarine in the previous month, and Captain Gwatkin Williams and his crew made prisoners. Major-General Peyton's column reoccupied Sollum on Mar. 14, 1916, and three days later an armed motor force under the Duke of Westminster rescued the crew of the *Tara* from the hands of the Senussi.

In the Adriatic the Italian Fleet maintained its mastery over the Austro-Hungarian forces, and in addition to containing the latter in their ports, it covered the transport of a military force to Valona. Replying to a question on Feb. 23, 1916,

The New HAZELL, 1917

as to the organisation of the Allied naval commands in the Mediterranean, Mr. Balfour stated in Parliament that the general command was in the hands of the French Commander-in-Chief, Admiral d'Artige du Fournet; the command of the Adriatic and its approaches was in the hands of the Italian Commander-in-Chief, H.R.H. the Duke of the Abruzzi, with local commands assigned to British officers. "The best general indication," Mr. Balfour added, "of the work performed by the Allied fleets in the Mediterranean is the successful transport of large military forces to Salonika, Valona, and Egypt; the successful evacuation of the Allied Expedition from the Dardanelles; and last, but not least, the transportation of the Serbian Army from Albania—a result chiefly due to the ability and energy displayed by the Italian Fleet." Among the local commands may be mentioned that held by Rear-Admiral E. C. T. Troubridge in Serbia, of a contingent of British bluejackets and marines. This little force remained with its heavy guns at Belgrade until the last moment before retreating with the rest of the Serbian forces, and then made good its escape. One section had mined the Danube, and another had constructed river monitors which had attacked with success the Austrian gunboats. In the Adriatic the only naval operations included coast raids on either side, in which aircraft usually co-operated, and also submarine attacks, the losses from which are indicated in the table elsewhere. On July 9, 1916, two British drifters on patrol were sunk by the Austrian cruiser *Novara*. The Allied Fleet assisted, along the coast region, in the advance of the Italian Army in the Trentino. The fall of Gorizia on Aug. 9 constituted an important threat to Trieste, and also to the other Austrian naval dockyards, Pola and Fiume. The isolation by the Italians of the Istrian Peninsula would certainly produce naval consequences. In October the possibility was even discussed of the Austrian Fleet making a dash for the Dardanelles and passing through into the Black Sea. On Aug. 2 the Italian Navy suffered a misfortune in the sinking of their Dreadnought battleship *Leonardo da Vinci* by fire and explosion in Taranto Harbour. Some ten months before, they had lost the old battleship *Benedetto Brin* in a similar manner. There was a report on Oct. 8 that an Austrian Dreadnought had also blown up in Pola Harbour, with all her crew on board, but this was not confirmed.

The Allied Fleet necessarily figured prominently in the precautionary measures which it became necessary to take in Greece in September and October 1916. At the beginning of the year an Allied force, including naval detachments had occupied the forts of Kara Burnu and Kum Kale, on either side of the entrance to the Bay of Salonika, this action being necessitated by the operations of hostile submarines in Salonika roadstead. Early in the morning of Feb. 1 the enemy, by way of a counter-stroke, sent a Zeppelin to raid Salonika, killing ten people, including two British soldiers, but inflicting no military damage. When next a Zeppelin visited the town and harbour, on May 5, Vice-Admiral de Robeck was able to report that she was heavily fired on and hit by the Fleet, and came down in a blaze near the mouth of the Vardar River, where one of her propellers was recovered among the remains and conveyed on board the *Agememnon*, the Fleet flagship, as a souvenir. It was on Sept. 1 that an Allied Fleet under Admiral du Fournet arrived off the Piræus. Control of the Greek wireless installation was obtained, and similar precautions taken. The nationalist movement was just coming to a head at this time, and on Sept. 22 it was reported that the Greek cruiser *Georgius Averoff* was preparing to join in the movement and go to Salonika, but it was officially denied that any outbreak occurred on board. Other vessels, however, placed themselves under the protection of the Allied Fleet. On Oct. 11 Admiral du Fournet demanded the handing over of the Greek Fleet, except the *Georgius Averoff*, *Lemnos*, and *Kilkis*, which were to be reduced to one-third complement. The Greeks complied, and the vessels were towed away from their former anchorages the same day. French marines also seized the islands of Leros and Kyra, in the Gulf of Salamis, which had munition depots for the Greek Navy. Thus the work of the Allied navies in the Mediterranean, although no sea battles were fought, was of a fundamental character, and most varied.

OVERSEA EXPEDITIONS

In the outer seas the Navy continued to co-operate in the various expeditions for the conquest of the German possessions, and also in the operations in Mesopotamia, on the rivers at the head of the Persian Gulf. Advancing from Kut-el-Amara, the Anglo-Indian force on the Tigris, accompanied by a naval flotilla, made good progress until a fierce battle was fought against large forces of the enemy at Ctesiphon on Nov. 22–25, 1915, about eighteen miles from Bagdad. Enemy reinforcements, however, and the want of water, compelled a retirement to the fortified position at Kut, 80 miles below Ctesiphon. Here the British arrived on Dec. 3, 1915. During the retreat the gunboat flotilla, under Captain W. Nunn, R.N., was obliged to abandon two vessels, the *Comet* and *Firefly*, which Vice-Admiral Sir Richard Peirse reported "was unavoidable, and was accomplished in a highly seamanlike manner under heavy fire." Much credit was given to Captain Nunn for effecting this retreat in the face of a much superior force with so little loss. After a resistance protracted for 143 days, the garrison at Kut, under General Townshend, was compelled to surrender on April 29, 1916. A relief ship with food supplies, the *Julnar*, which tried to break through to the city on the night of April 24 failed in the attempt, her commander, Lieutenant H. O. B. Firman, R.N., being killed, as was Lieutenant-Commander Cowley, R.N.V.R. The object of sending a force, which originally consisted of only one division, in the autumn of 1914 to Mesopotamia was described by Mr. Asquith as being "to secure the neutrality of the Arabs, to safeguard our interests in the Persian Gulf, to protect the oil-fields, and generally to maintain the authority of our flag in the East."

The conquest of the German territory in the Cameroons (West Africa) was completed on Feb. 18, 1916, with the capitulation of the German garrison at Mora, in the north of the colony. The dispatches of Major-General Sir Charles Dobell, commanding the Allied Forces in the Cameroons, and of Brigadier-General Cunliffe, commanding the Nigerian contingents, were published in the *London Gazette* on May 31, 1916; and on July 28 Captain Cyril T. M. Fuller, R.N., was awarded the D.S.O. "in recognition of the ability and success with which he organised the naval operations in Cameroon, where he was

(Continued on p. 796).

The New HAZELL, 1917

WARSHIP LOSSES

Tables of Vessels officially announced as destroyed during the War, corrected to Nov. 1, 1916

GREAT BRITAIN

Name.	Date.	Tons.	Remarks.
Battleships			
Bulwark	1899	15,000	Destroyed by internal explosion, Nov. 26, 1914.
Formidable	1898	15,000	Torpedoed by submarine, Jan. 1, 1915.
Irresistible	1898	15,000	Mined in Dardanelles, March 18, 1915.
Ocean	1898	12,950	Mined in Dardanelles, March 18, 1915.
Goliath	1898	12,950	Torpedoed by destroyer, May 12, 1915.
Triumph	1903	11,800	Torpedoed by submarine, May 25, 1915.
Majestic	1895	14,900	Torpedoed by submarine, May 27, 1915.
King Edward VII	1903	16,350	Mined in North Sea, Jan. 8, 1916.
Russell	1901	14,000	Mined in Mediterranean, April 26, 1916.
Battle-Cruisers			
Queen Mary	1912	27,000	Sunk in Jutland Battle, May 31, 1916.
Indefatigable	1909	18,750	Sunk in Jutland Battle, May 31, 1916.
Invincible	1907	17,250	Sunk in Jutland Battle, May 31, 1916.
Armoured Cruisers			
Aboukir	1900	12,000	Torpedoed by submarine, Sept. 22, 1914.
Hogue	1900	12,000	Torpedoed by submarine, Sept. 22, 1914.
Cressy	1899	12,000	Torpedoed by submarine, Sept. 22, 1914.
Hawke	1891	7,350	Torpedoed by submarine, Oct. 15, 1914.
Good Hope	1901	14,100	Sunk in Coronel Battle, Nov. 1, 1914.
Monmouth	1901	9,800	Sunk in Coronel Battle, Nov. 1, 1914.
Argyll	1904	10,850	Wrecked off Scottish coast, Oct. 27, 1915.
Natal	1905	13,550	Destroyed by internal explosion, Dec. 30, 1915.
Defence	1907	14,600	Sunk in Jutland Battle, May 31, 1916.
Black Prince	1904	13,550	Sunk in Jutland Battle, May 31, 1916.
Warrior	1905	13,550	Foundered after Jutland Battle, May 31, 1916.
Hampshire	1903	10,850	Mined off the Orkneys, June 5, 1916.
Light Cruisers			
Amphion	1911	3,440	Mined in North Sea, Aug. 5, 1914.
Pathfinder	1904	2,940	Torpedoed by submarine, Sept. 5, 1914.
Pegasus	1897	2,200	Sunk by *Königsberg*, Sept. 20, 1914.
Hermes	1898	5,600	Torpedoed by submarine, Oct. 31, 1914.
Arethusa	1913	3,750	Mined in North Sea, Feb. 14, 1916.
Nottingham	1912	5,440	Torpedoed by submarine, Aug. 19, 1916.
Falmouth	1910	5,250	Torpedoed by submarine, Aug. 19, 1916.
Destroyers			
Recruit	1896	385	Torpedoed by submarine, May 1, 1915.
Maori	1909	1,035	Mined off Belgian coast, May 7, 1915.
Lynx	1913	935	Mined in North Sea, Aug. 9, 1915.
Louis	1913	965	Wrecked at Suvla Bay, Nov. 9, 1915.
Coquette	1897	355	Mined in North Sea, March 9, 1916.
Medusa	1915	1,000	Sunk by collision, March 25, 1916.
Tipperary	1914	1,850	Sunk in Jutland Battle, May 31, 1916.
Turbulent	1915	1,850	Sunk in Jutland Battle, May 31, 1916.
Fortune	1913	952	Sunk in Jutland Battle, May 31, 1916.
Sparrowhawk	1912	935	Sunk in Jutland Battle, May 31, 1916.
Ardent	1913	931	Sunk in Jutland Battle, May 31, 1916.
Nomad	1915	1,000	Sunk in Jutland Battle, May 31, 1916.
Nestor	1915	1,000	Sunk in Jutland Battle, May 31, 1916.
Shark	1912	935	Sunk in Jutland Battle, May 31, 1916.
Eden	1903	555	Sunk by collision, June 16, 1916.
Lassoo	1915	1,000	Torpedoed or mined, Aug. 13, 1916.
Flirt	1897	380	Lost in Channel raid, Oct. 26, 1916.

GREAT BRITAIN—*continued*

The New HAZELL, 1917

Senior Naval Officer throughout the campaign." The blockade of the Cameroon coast which was established by the Navy at midnight on April 23, 1915, was raised again at midnight on Feb. 29, 1916. Among the incidents connected with the Navy's work was the capture of a number of German steamers in the Cameroon River in September 1914; the sinking of the German armed steamer *Nachtigall* by the gunboat *Dwarf* on Sept. 16, 1914, in the Bimbia River; the driving of the Germans out of Dehane by a river flotilla under Lieutenant L. H. K. Hamilton, R.N., at the end of December 1914; and the transport of a heavy naval gun to the siege of Garua. The last-named exploit was also in charge of Lieutenant Hamilton, whose detachment transported the gun 160 miles up the lower reaches of the Niger River, thence 480 miles up the Benue River, and 60 miles by land, contributing in large measure to the success of the operations which culminated in the surrender of Garua on June 10, 1915. Lieutenant Hamilton received the D.S.O. for his services.

The German colony in East Africa practically ceased to exist when its capital, Dar-es-Salaam, fell to the combined naval and military assaults on the morning of Sept. 4, 1916. On the previous day the naval forces present began a close attack in whalers, in conjunction with a heavy bombardment of the enemy positions and the advance of the Allied troops from the direction of Bagamoyo. Landings were effected at two places, and the enemy evacuated the town, which was virtually undamaged. On Sept. 7 the naval forces and marines, with military landing parties, occupied the ports of Kilwa Kivinje and Kilwa Kissiwani, south of Dar-es-Salaam, which were surrendered under threat of a naval bombardment. The enemy forces were aided by 4-in guns from the cruiser *Konigsberg*, which had sought refuge in the Rufigi River in October 1914 and had been destroyed there by a monitor force. The naval operations in this theatre were under the direction of the Commander-in-Chief on the Cape Station, but the local senior naval officer's identity was not revealed. In July 1916 Commander the Hon. R. O. B. Bridgeman, R.N., received the D.S.O. for his courage and coolness in command of two whalers which proceeded into Tanga Harbour on Aug. 19, 1915; and Commander H. D. Bridges was awarded the same honour for proceeding into Sudi Harbour on April 11, 1916, to spot the fall of shot from the cruiser *Hyacinth* when she destroyed a storeship there.

THE FINANCIAL ASPECT OF THE WAR

In December 1915 the National City Bank of New York announced that it had opened six branch banks under the authority of the Federal Reserve Act. Also, a Foreign Trade Department had been organised to disseminate information in the U.S.A. about trade conditions and opportunities in the countries where those branches were located and *vice versa*. The war had stopped the passage of capital from Europe to South America, and thus the U.S.A. had potential possibilities of stepping in with the very manufactures and support that Europe could not afford to supply. The end of 1915 witnessed the formation of the American International Corporation with a capital of £10,000,000 to carry on *any* business. Securities domiciled in the U.S.A. have poured in from the combatants in order that the exchange rates might be kept less unfavourable. And this in turn has helped to free the U.S.A. from being a debtor nation. If any country is profiting from the war, it is the U.S.A., but it must be always borne in mind that wealth obtained through the manufacture of munitions of war is not wealth from the point of view of mankind as a whole. It is simply a transfer from one nation to another of wealth already existing, whilst the well-directed production that leads to the accumulation of wealth is put on one side. And inhabitants of the combatant countries who are apparently growing richer through the manufacture of war material will have to realise this fact. And likewise the other *soi-disant* neutrals have profited. Japan, a combatant to a certain degree, has been supplying the Allies with huge quantities of munitions and increasing her wealth accordingly. Meanwhile the Allies have been spending money to their mutual impoverishment. Here are the chief incidents, as affecting the combatants, in the financial side of the war, and it will be observed that fortune has favoured the Allies continuously.

November (1915) displayed a curiously confused state in foreign exchanges. London was remitting gold to the U.S.A. to improve the exchange (which was $4.64 to £1) whilst New York was forwarding gold to Amsterdam. During 1915 to date, quite £50,000,000 in actual gold has passed from the U.K. to the U.S.A. This was and is far from satisfactory. The Premier, in a speech to the House of Commons on Nov. 2, dwelt on the need for economy—a subject that found a place subsequently in many official appeals and addresses to the nation. There were signs that the Treasury had determined to reduce the loss occasioned by the low exchange: an informal census of U.S.A. stocks held in the U.K. was taken, and after a loan to British bankers by New York contemporaries of £10,000,000 secured on gilt-edged investments, the rate on New York rose to $4.70 to the £. But even then gold was leaving the U.K.; on the 27th the s.s. *Baltic* arrived at New York with ten million dollars in gold bullion.

At the opening of the month the Chancellor was issuing Treasury Bills at 4¾, 4⅞, 5, and 5% for 3, 6, 9, and 12 months. On the 12th the rate was raised to 5% for all periods. Eight days later, Mr. McKenna announced that the French Government 5% Loan would be issued in London, and on the 30th the prospectus made its appearance, four days after its advent in Paris. The French terms of subscription were 5% @ 88 per 100 frs. bond, irredeemable before 1931; the London terms were £3.4.0. per 100 frs. bond—equivalent to 5¾% on the existing exchange rate or 6¼% par. Other matters of interest during the month were New Zealand internal £2,000,000 loan; House of Commons vote of credit £400,000,000 (10th); Bank of England did not encourage discounting of bills under 5½% (12th); rubber boom on Stock Exchange (15th); £10,000,000 5% 10 years Canadian Loan (22nd); removal of certain minimum prices; Consols fell from 65 (pre-war figure) to 58 (23rd); Russian loan of £12,000,000 @ 5%. A Committee was appointed by the Chancellor on 22nd to consider the issue of Government bonds to workpeople.

December (1915) saw an attempt to deal firmly with the low U.S.A. exchange rate. On the 13th the Chancellor introduced to the House of Commons his scheme for the mobilisation of U.S.A. securities. Briefly, the holders in the U.K. were

invited to sell their U.S.A. bonds to the British Government and to take as purchase price their value in 5-years Exchequer Bonds @ 5%, or to lend the American securities to the Government and receive an additional ¼% to what interest was payable on the securities. On the 31st a Committee was appointed to control the mobilisation scheme. The bankers of the U.K. addressed a manifesto to the nation on war finance on the eve of the Christmas holidays and asked the people to be thrifty.

The year showed a decline of 6·6% in the aggregate value of 387 representative Stock Exchange securities, whilst the bankers' cheque clearing had a fall of £1,257,323 on the turnover as compared with 1914. On the other hand, the deposits of the Joint Stock Banks were maintained. The total (in 1,000's) lodged with the eleven chief institutions were as follows:

June 1914	£608,421	June 1915	£772,820
Dec. 1914	£686,322	Dec. 1915	£753,344

Other items of December were the opening of a Russian internal loan; an Australian £10,000,000 loan @ 4½% (1st); a Turkish £6,500,000 treasury note issue against security lodged by Austria and Germany (19th); the French 5% went to a premium of 1⅜ on London Stock Exchange. The totals of the French loan were £560,000,000 from France and £24,000,000 England. In the U.S.A. the mark had depreciated 17½%, whilst the pound was only 3% below par. The difficulty with which U.K. exchange rates were maintained is seen in the fact that the excess of imports over exports during 1915 amounted to £370,311,820.

The year 1916 brought the thrift campaign. The industrial worker was to be induced to save a portion of his income and invest it in the Government war bonds. The recommendation made at end of 1915 for the issue of bonds of small denomination was put into operation on the 10th, and the working man was given the same terms for his £5 as the financier with his £50,000. He could look to the rich man for an example. The thirteen opening days ended Jan. 4 for the 5% Exchequer Bonds of 5 years' currency furnished applications for £23,202,400. The mobilisation scheme was becoming supported, and the New York rate rose to 4.78½ dollars to the £, or about six cents below par. U.K. rates with European neutral countries were below normal, but in view of the British purchases that was only to be expected. Germany was in straits with all the neutral Exchanges. To maintain the appearance of stability an attempt was made to fix rates at the Reichsbank. But how the Germans could hope to settle what value a neutral country should put on a mark was never made plain.

To the Chairmen of the British Joint Stock Banks the public have begun to look for practical views on international finance. The speeches at the Bank meetings at the beginning of the year were optimistic. Sir Edward Holden, at the London City & Midland, challenged the head of the Reichsbank as to the solidity of German bank returns, and, although he was answered (Feb. 9) by Dr. Helfferich publicly, neutral views left no doubt as in whose favour the exchange of words lay. Sir Edward laid down this dictum as to the future: "I venture to say that in my opinion we shall not only not lose our position as the financial centre of the whole world, but we shall greatly improve it, and our banking institutions will stand much higher in the estimation of the world than ever before." Other points of the month were the issue 4th) of a New South Wales 5% loan @ 99; the Italian 5% loan @ 97½; the issuing of lists of securities taken under the mobilisation scheme (19th); and the active interest taken by the Joint Stock Banks in the small Exchequer Bonds; whilst on the 29th a further reduction in the list of minimum prices for Stock Exchange securities was authorised.

Additions were being made continually to the list of securities that the Government was prepared to accept under its mobilisation scheme. But gold was still leaving the country. Sweden had accepted more gold than was wanted, and permission was given (Feb. 13) to refuse to purchase gold. Russia was busily engaged in raising funds. On the 9th, 12 months 5% bills to the extent of £5,000,000 were issued in Tokio, on the 22nd £10,000,000 more in London, and, internally, it was engaged in a £200,000,000 loan @ 93. Russian revenue fell considerably, that from drink alone dropping £70,000,000. Supreme courage was required when the Russian Government decided to sacrifice the enormous asset of the State drink monopoly, and the loss to the exchequer was almost overwhelming. Nevertheless, Russia has gained economically from its action.

In the House of Commons Mr. McKenna made on the 29th an agreeable statement on the business of the future. *Inter alia*, he added, "We have already shown in a way which I am not yet able to state to you that we are prepared to give the assistance of the Government to the development of the foreign trade." Mr. Asquith mentioned also that since the beginning of the war our total loans to the Allies and Dominions was £168,900,000. Japan was profiting considerably from the war. She was enabled to buy back in the open market before maturity certain of the loans issued by her in London. In three months she cancelled in this way £2,000,000 of her loans.

A public meeting at the Guildhall with Earl Kitchener, Mr. Balfour, and the Chancellor as speakers opened up a thrift campaign on March 1. But it is questionable whether the public practises or even appreciates the essentials of economy. The Government does not seem to have given direction explicitly or often enough for the practice of economy. The need for thrift is reflected in the figures of the British expenditure on the war. The figures are as follows:

1914–15	
Expenditure	£597,000,000
Revenue	103,000,000
Raised by loans	580,000,000
1915–16	
Expenditure	1,550,000,000
Revenue	336,760,000
Raised by loans	1,340,860,000
Estimated 1916–17	
Expenditure	2,000,000,000
Revenue	500,000,000
Loans	1,600,000,000

Approximately, the war is costing each individual in the U.K. 3*s.* per day, of which 2*s.* 3*d.* is being borrowed. Subsequently Mr. McKenna gave the following statistics to the House of Commons on the assumption that the war lasts until Mar. 31 (1917):

Total Indebtedness	£3,440,000,000
Advances to Allies and Dominions	800,000,000
Net Indebtedness	2,640,000,000
National Income, about or perhaps	2,500,000,000 to 2,600,000,000
Capital Wealth	15,000,000,000

All manner of suggestions were being made to popularise war savings. There was a distinct leaning towards Premium Bonds, but on 15th the Chancellor definitely refused to pursue the idea. Trade with Italy received a decided fillip in the establishment of the British Italian Corporation (£1,000,000 capital) and the Compagnia Itala Britannica (10,000,000 lire capital). The French Government had in hand the mobilisation of securities with the intention of improving the rate in London as well as in neutral countries.

Germany's fourth War Loan closed on March 22. Her loans to date were:

Sept. 1914 @ 97½	£173,000,000
Mar. 1915 @ 98½	414,250,000
Sept. 1915 @ 99	608,000,000
Mar. 1916 @ 98½	530,000,000

She had issued to date two sets of 5% Treasury Bills totalling £88,000,000, and a third set was at that time in progress. Internally, on paper, Germany was doing well. The exchange rates in New York on March 25 told a different story. The following are the discounts at which the belligerent exchange rates stood:

London	2·11%	Rome	29·21%
Paris	15·32%	Petrograd	38·04%
Berlin	24·69%	Vienna	38·91%

On the same day the interest rates paid on British Treasury Bills were reduced to 4½% (3 months), 4¾% (6 and 9 months), and 5% (12 months). Evidently, funds were coming in from taxation and the Treasury Bills. During April, the fourth Hungarian Loan made its appearance. The total of the four loans was 267 milliards of kroners. To realise this sum, it was necessary to make constant and strong appeals.

Mr. McKenna's budget of April 4 showed that an honest attempt was being made to meet the U.K. war expenses out of revenue. In two years the amount received from taxation grew from £200,000,000, to £500,000,000. Germany's net increase of taxation for war purposes was only £75,000,000. The National War Savings Committee was formed on the 3rd and by the 8th the total of the smaller Exchequer Bonds issued through the Post Office and similar channels reached £16,600,000, the actual bonds numbering 496,000. The Allies' exchanges on London have not been too satisfactory. The Italian rate was 31·75: 20% above normal. France was attempting to reduce her adverse rate by the selling of securities in London and the export of £9,000,000 in gold during a month. Happily, the U.K. officials had done their work at New York well: the exchange remained stationary at 4·77, an excellent rate in view of war conditions. Canada raised a 75 million dollar loan in New York and at the same time gave the U.K. an equivalent credit. Japan continued to buy back her loans issued in London: her purchases for six months reached £3,250,000.

In May, Austria raised her fourth loan, Altogether, in milliards of kroners, she issued @ 5½%—

Nov. '14 @ 97½	2.201	Nov. '15 @ 93¾	4,442
May '14 @ 95½	2,688	May '16 @ 96	4,442

The figures are inflated owing to the means adopted to get subscriptions; the banks were open to accept 3 kroners (2*s.* 6*d.*) as quarterly instalments. And for practical purposes the last loan at least can be divided by four to get its true value, owing to the loan system adopted. It is believed that the gold in the Austria-Hungarian banks was employed by Germany in maintaining the exchange rate with neighbouring neutrals whilst not drawing upon her own gold holdings.

The British mobilisation scheme continued to be pressed on to the public, and the Chancellor, in order to hasten the decision of holders, announced a super-tax of 2*s.* in the £ on interest paid securities not surrendered to the Government. The scheme was essential to the loans being raised in the U.S.A. by the U.K. Austria failed to raise a loan of 25,000,000 dollars in New York, whilst Germany had to pay 6½% for a yearling accommodation of £2,000,000. The great drawback was the adverse trade balance. The U.K. imports were £30,000,000 more than the exports per month, and the difference had to be paid in some way. It was satisfactory to know the value of U.S.A. and South American stock held in the U.K. was £1,273,000,000. Prof. Foxwell estimated that even with two-thirds of the new gold supplies of the world belonging to the Allies, they could show an aggregate bank holding of £460,000,000 bullion. It was found convenient to remove further minimum prices from the Stock Exchange list (5th). The Federated Malay States raised £1,750,000 loan @ 5¼% in the London market. A new series of 5% Exchequer Bonds repayable in Oct. 1919 or 1921 made a successful appearance at end of May. A definition of thrift was given by Mr. McKenna in June. He said: "The object of saving from the national point of view is to divert the labour and capital which would be otherwise employed in satisfying private demands for goods and services to the purpose of carrying on the war." A new form of investment was introduced in the War Expenditure certificate, the price of a bond of £100 payable 2 years hence being fixed at £90. Gold seemed to be passing to Spain in large quanitities. Her actual increase in gold for 17 months reached £17,000,000, of which £12,000,000 came from London.

The U.S.A. were now financing the Allies: Russia raised £10,000,000; France £20,000,000; U.K. renewed bankers' £10,000,000 loan for a year. Nigeria got £4,500,000 from the London market and Australia followed with £4,000,000. India issued an internal loan of 600–1,200 lakhs of rupees. And steps were taken to establish a credit in Scandinavia. The figures were £4,300,000 for U.K. and £1,500,000 for France.

July witnessed the removal (3rd) of the minimum prices. There seemed to be good supplies of money available for investment: the French war loan was at a premium both in Paris and London. But it was found necessary to raise (13th) the bank rate to 6%; it had been 5% since August 8, 1914.

Germany opened the list for her fifth War Loan on Sept. 4. Officialdom worked hard to make it a success. The subscriptions were estimated to total £530,000,000. But it was not sufficient to pay off all the paper debits entered into since the previous loan, and Germany was forced to issue more paper immediately following the close of the lists. On Sept. 15 Germany sequestered the gold of the Bank of Belgium to the extent of 250,000,000 frs.—a proceeding difficult to justify. The Allies continued their borrowing. Russia's £7,000,000 yearly loan @ 94 in Japan was twice oversubscribed on the opening day. Canada issued a local 15-year 5% loan of £20,000,000 @ 97½. And at end of the month the City of Paris had an oversubscribed issue in New York. Japan had sufficient funds at disposal to be able to buy back still more of her bonds in open market.

In London, the Treasury Bill rates were reduced to 5½% for bills of 3, 6, and 12 months duration

The New HAZELL, 1917

on 27th. Up to that time the total of Treasury Bills reached £1,040,488,000, and this was considered a little too much to have as short-date securities. The 5% Exchequer Bonds were withdrawn and replaced by 6% three-year Exchequer Bonds. As a consequence the 4½% War Loan fell to 93¼; it rose subsequently to 95¼. Birmingham opened the first Municipal Savings Bank on 29th. There were now 1,000 War Savings Associations in London. The Currency Note issue reached the record of £133,350,741 on 13th. The half-yearly revenue statement at the end of September showed:

War expenditure	£904,801,729
With a deficit of	704,000,000

Made up of:

Treasury Bills	£474,382,000
Exchequer Bonds	179,903,000
War Expenditure Certificates	23,353,000
War Savings Certificates	20,450,000
Other Indebtedness	16,000,000

The New French 5% War Loan opened in Paris @ 88¾ on Oct. 5. A London and Dublin issue @ £3.4.6 per 100 frs. bond followed. There was every sign at the time of writing of a triumphant response. France also renewed yearly Treasury Bills @ 6½% of £2,000,000. Mr. Asquith moved a fourth Vote of Credit of £300,000,000 in the House of Commons on Oct. 11. This made a total of £3,132,000,000 since the beginning of the war. The numbers of War Savings Certificates (15*s* 6*d*. to £1) issued to the same date were:

England and Wales	37,606,000
Scotland	2,243,000
Ireland	766,000

Yet Mr. McKenna admitted that "the War Savings Movement has reached a critical stage." Neutral opinion of German finance was expressed on Oct. 14 by the exchange rate at Amsterdam of 42·32½ guilders to the 100 marks as compared with the normal 59·29 guilders.

The gold in the Imperial Bank of Germany on Oct. 14 was returned as £125,061,100, as compared with £121,317,950 held on the corresponding date of 1915. The holding of gold on the Bank of England on Oct. 18 was £56,455,151, or £2,430,419 less than the same day of 1916. But comparison would be odious. London is a free market for gold; it has exported £10,000,000 monthly since the beginning of the war. Berlin is not. The Bank of France's gold holding of Oct. 19 was £195,431,400. Thus the joint holding of France and Great Britain was approximately twice that of Germany. With the addition of the British currency note gold reserve, it was more than double. The question of the next British war loan was dealt with by the Chancellor in the House of Commons on Oct. 19. In answering criticism, he pointed out that £30,000,000 of the new 6% Exchequer Bonds had been sold in a fortnight, and added: "We have not had difficulty in financing ourselves so far, and I see no reason why we should have difficulty hereafter. When the time comes, I have no doubt that the loan which I shall think it my duty to recommend to the House will be of sufficient magnitude to dispel all fears." With that, this survey must close.

SCIENCE AND THE WAR

Many of the applications of science to the war must remain in obscurity till after it; and even hints of them escape only by accident, or by the revelation of a new weapon, such as a 42-cm. gun, a "tank," or a new kind of asphyxiating gas. The two inventions in chief which made the war on land different from wars which preceded it were the development of the petrol motor and its application to land transport and aviation work; and the use of smokeless powders and high explosives.

The use of motor transport has enabled much larger armies to be maintained in the field. The conduit down which men, munitions, and supplies of all kinds have to pass from the base to the front is no longer limited to lines of railway, but is made up of the network of roads behind the troops, along which hundreds of motor transport wagons, vans, omnibuses, lorries, cars, and ambulances move backwards and forwards night and day. The French, and no doubt the Germans as well as the Austrians, supplemented their motor roads by light Decauville railways. The defence of Verdun was sustained by General Petain by—next to the resistance of the incomparable French infantry—the perfection of the motor transport of supplies and munitions.

In aviation, the chief advance was due to the increasing power of the petrol-motors, which developed 200 to 250 h.p. Four motors each of 250 h.p. were fitted to the latest type of Zeppelin. Aeroplane design underwent rapid transformation and development under the pressure of war requirements. These war requirements included: (1) reconnaissance; (2) acting as spotters for artillery; (3) maintenance of communications and conveyance of dispatches; (4) bomb dropping; (5) in naval work the detection of submarines and submarine mines. These duties called for many types of machine, capable of speed, of endurance, of stability, or of ability to rise quickly. During the spring campaign of 1916, for example, a machine named the Fokker monoplane, after its inventor, a Dutch engineer, made its appearance above the German lines. It had a period of success, due chiefly to its ascensive power and in part to its stability; but it proved to be better for defensive work than for the sustained flights which the Allied airmen made over the German lines in search of information. Another aeroplane of unusual capacity was the Sikorsky giant biplane used on the Russian front, and fitted with four 100 h.p. Argus motors. Among the many types of planes called into requisition by the war were the Albatross and Aviatik, Wright, Euler, Etrich, Taube, Harlan, Rumpler (German), the Blériot, Borel, Breguet, Caudron, Clement Bayard, Morane-Saulnier, Martynsyde, Flanders, Deperdussin, Bristol, Dunne biplane, Farman, Zodiac, Graham White, Handley Page, Nieuport, Short biplane (French and British). It is not possible to speak explicitly of the work which was done by scientific men in France and in England in giving a greater stability to aeroplanes, but in this work is reckoned one of the great achievements during the war. Great Britain owes a great deal to the late Captain (and former Professor) Keith Lucas, who also devised a compass for aeroplanes. He was, unfortunately, killed during a trial flight, and his country lost not only

an inventor of unexpected ingenuity, but a biologist who left no successor in the branch of research which he had undertaken.

The possibilities of the group of high explosives, obtained respectively from the tri-nitro-cellulose group, the picric acid explosives (including lyddite and melinite), and the "Toluol" or T.N.T. (tri-nitro-toluol) group were known before the war; and the only unanticipated developments were the "Skoda" mortars (Austrian) and the German 42-cm. howitzer, which were capable of throwing half a ton of high explosives in a single shell. The extreme range of some of these guns extended to 25,000 yards, and on one occasion Dunkirk was shelled from a point within the German lines twenty miles away. The chief difficulty was that of feeding these monsters, which were only to be transported on rails, and needed an adjoining railway to bring up their ammunition. The 42-cm. howitzer had a crew of fifty men and was fired by electricity from a distance of a quarter of a mile. These heaviest pieces were brought up only for the demolition of fortresses; but at Verdun and on the Somme both the Germans and the Franco-British Allies used heavy pieces of 8-inch, 9-inch, and 12-inch with the facility and in the number formerly deemed appropriate only to field guns.

The use of asphyxiating gas, poison shells, tear-shells, and liquid flame was the German contribution to the advance of civilisation in warfare. The first poison gases used by the Germans were a mixture of chlorine and sulphurous acid. The sulphurous acid could be generated in the trenches; the chlorine was obtained by bringing on to the ground cylinders of liquid chlorine which volatilised on escaping into the air. Germany possesses many chemical factories where the manufacture of chlorine gas is carried on by the decomposition of sodium or potassium chloride. In response to this innovation French and British chemists produced gases and combinations of smoke and gas which were effective. The secret of their composition has been well kept, and it is only from a French semi-official communiqué that we learn that some of the gases employed are heavier than air. The German tear-shells, which produce excessive running at the eyes and extreme dryness of the mucous membrane of the throat, contained probably some compound of formic acid; but it has been suggested that at a later date they contained only some essence of paprika, a red pepper grown in the Central Empires. The liquid flame which the Germans eject by means of *flammenwerfer* is produced by a mixture of petrol, paraffin, and tar contained in a kind of portable cistern and ejected by compressed air. The mixture catches fire automatically on passing the nozzle of the apparatus; and the soldier who carries the cistern can regulate the pressure and consequently the length to which the flame carries. The extreme range is about 150 feet in a horizontal direction. None of these devices proved of great military value when they had lost the advantage of surprise. It became possible by the use of gas-masks to reduce the dangers of poison gas, and the *flammenwerfers* never effected any military aim beyond that of exasperating opponents and of adding fresh proof of the ineradicable taste of the Germans for unclean fighting.

Among the legitimate inventions in the land warfare were the "tanks" of which the Censor does not allow anyone to say much, but of which an intelligible description appeared in the *Field*. In order, however, to give no cause for official admonitions it must suffice to say that in general idea the "tank" resembled the caterpillar motor which made its appearance at the last Military Tournament before the war. It was balanced on pairs of wheels, the chief pair of which were large, and which rotated the others by means of a kind of belt bicycle-chain attachment on a large scale. The tanks were very long, they were heavily armoured, and they were filled with machinery and guns. They progressed, not very slowly, but with a caterpillar's ability for climbing obstacles; added to a capacity for straddling trenches and a weight which would cause the collapse of obstacles such as walls or trees. They were a real triumph of engineering science and ingenuity. But the mere fact that there exists an obligation to refrain from describing them in any less vague fashion than the foregoing will explain why it is impossible that anything definite should be said about the many devices which the war introduced for the improvement of submarines, for the discharge of land and sea mines, for fire control on sea and land, for incendiary bombs, for the direction of aeroplane squadrons, and for the detection of the direction of enemy fire. From wireless telegraphy to the investigation of the probable changes of weather, invention and organisation were put to the severest tests by the war, and the Allies had no reason to complain of the resource of their men of science in solving the problems set to them. German science had a long start of ours in organisation, and in applied equipment had already in stock what Great Britain had to improvise or construct; but Germany had no monopoly of brains. By the time that, in General Sir W. Robertson's words, Great Britain had made a beginning in waging war on a Continental scale, the larger part of the mental resources of science in this country were organised in doing some work useful to the State in the hour of need. There was, and is, a great deal of waste effort and disorganised effort, but the chemists, the physicists, the geologists, the biologists, and the physiologists are all employed; and beyond their specific investigations there is the individual or combined work of the engineers and of the medical profession.

The isolation of Great Britain from many of her sources of supply of articles, the manufacture of which had been developed in Germany, resulted in the necessary expansion of her own resources. The industries affected by the new conditions were the iron and steel, which had depended on Germany for the cheap production of some of the alloys, such as magnesium; the non-ferrous metal industry; the optical glass industry; the dye industry; electrical apparatus; drugs, chemicals, and photographic materials; glass and china. So far as the iron and steel industry is concerned, Great Britain suffered only from the absence of the alloy metals which Germany had produced more cheaply, and for the production of which iron and steel masters had now to set up establishments of their own. The Germans had hit the iron and steel industry less by novel scientific methods than by combination among their manufacturers. In the non-ferrous metals, also, organisation, financial enterprise, and combination had been the chief German sources of superiority. But the Institute of Mining and Metallurgy was quick to point out to the Advisory Committee of the Board of Trade, steps that might be taken by Great Britain to develop scientifically her resources in metals such as tungsten and zinc, as well as the need of co-operation in the industry. The case of zinc was associated, like that of other

The New HAZELL, 1917

metals, with the commercial hold which the Germans had on supplies; and the solution of that problem was economical and political rather than scientific, but it is quite clear to those who know the state of mining and metallurgy in Great Britain that a scientific improvement of method is a first necessity of permanent prosperity. This was more evidently true in the dye industry, and in the other key industry of optical glass, as well as in the manufacture of special glass, such as that used in laboratories or for boiler gauges. In the dye industry the extreme inconvenience and positive loss inflicted by the withdrawal of the dyes from the Rhine factories led at last to the institution with a Government subsidy, and under the scientific direction of Dr. W. H. Perkin, of a British dye manufactory on a large scale. There is no reason why it should not succeed. There are a large number of competent industrial chemists in Great Britain, and sufficient inventiveness and resource among them. The difficulties that face the new manufacture are those of finding enough chemical assistants at comparatively low wages, and of combining chemical insight with commercial shrewdness. The manufacture of synthetic drugs is bound up with the manufacture of dyes. In Germany the drug industry has developed out of that of dyes, and, like the manufacture of photographic materials, is a by-product of chemical industry. The shortage of drugs has been felt so much that drug farms, such as that of Messrs. Burroughs & Wellcome at Dartford, have greatly increased their activity; and local associations for medical herb growing and gathering have been formed, and in some cases have thrived.

The optical glass and special glass industries are in a more halting case. There is in this country no institute on a worthy scale for the elucidation of problems connected with optical glass, or for the training of workmen and students. The Northampton Institute, Clerkenwell, has tried for years in vain to get such an institution founded and subsidised. But though the war caught the country short of field-glasses for its soldiers, few steps have been taken, and though there are firms which manufacture good optical glass and make fine instruments, the industry as a whole is still living from hand to mouth. Some scientific improvement has taken place in the manufacture of toughened glass, glass for naval instruments, and laboratory glass of various kinds. Under the spur of Government encouragement several glass firms have taken up such work with good results, but the industry, the investigation, and the training of skilled workmen all need organisation.

It is in medicine that the most evident results of effort, organisation, and investigation have been apparent since the outbreak of the war. The Medical Research Committee, which had been a branch of the National Health Insurance, set about the task of organising research work in connection with the war. It stated specific subjects for research, or adopted suggestions for them, and it either systematised or collated the results of these inquiries or encouraged the investigators to do so. In the domain of its general inquiries was pathological work at military hospitals (such as wound sepsis), and its special inquiries embraced antiseptics, typhoid and paratyphoid infections, a Cholera expedition to Galicia, a Bilharzia expedition to Cairo, cerebro-spinal fever, neurological inquiries, testing of salvarsan preparations, acute nephritis (a kidney disease very common in the trenches), dysentery, industrial fatigue and the health of munition workers, disorders of the soldier's heart, gunshot wounds in the chest, anaerobic organisms, skin-grafting and X-ray work at military hospitals. Each of these investigations has a history of its own. The discovery of a convenient and universal antiseptic was the work of many physicians and the source of at least one controversy. An elaborate investigation was conducted by Sir Almroth Wright; and his method of keeping the wound exposed to a flow of saline solution was widely adopted but did not escape criticism. Special mention must be made of the antiseptic solutions of Dr. Carrel.

The whole question of sepsis of wounds was a very difficult one. An inquiry undertaken by Mr. K. W. Goadby on behalf of the Medical Research Committee at the Herbert Military Hospital, Woolwich, led him to the conclusion that in all septic wounds were two or three kinds of specific anaerobic bacilli, which lived in symbiosis on the aerobic bacilli; and he was of opinion that inoculations with autogenous and polyvalent vaccines benefited the patient. On the other hand, Prof. Guermonprez, of the Military Hospital at Calais, is of opinion that the bacilli of gaseous gangrene, bacilli which are anaerobic and which are the source of the greatest scourge of the war, are recalcitrant to vaccines or sera. An anaerobe of almost equal virulence is the bacillus of tetanus, which has inflicted the gravest injury to the wounded of the war. In the early part of the war the numerous cases of tetanus were attributed to the fact that the soil of Flanders, intensively cultivated, was specially rich in tetanus germs. But the truth is rather that the nature of gunshot wounds or shell wounds, which carry the tetanus microbe deep into tissues, where its anaerobic requirements of warmth and food and no fresh air are well satisfied, is the true cause of the large incidence of tetanus. It can be treated only by an injection of anti-tetanus serum, if this is administered in time; and it became customary to give a precautionary injection to most wounded patients. The demand for anti-tetanus serum, which is derived from immunised horses, became very great, and two therapeutic farms at Elstree (Lister Institute) and Herne Hill (Burroughs & Wellcome) were wholly devoted to its manufacture.

In one respect the campaign owed a great deal to bacteriological science, and this was in the virtual stamping out of typhoid in Flanders. Thanks to the energy and exertions of some fourteen motor bacteriological laboratories which were established behind the British lines, every typhoid epidemic was nipped in the bud, and the typhoid carriers removed from the district. Some valuable work was done in the investigation of the similar infections of Paratyphoid A and Paratyphoid B. Dysentery proved a great scourge in Gallipoli; and there are reasons for believing that it was imported into Mudros, where the base hospital was, from Egypt. It was got under, thanks in large measure to Major C. J. Martin, the pathologist of the Australian hospital; and in time the epidemic was reduced to moderate proportions among the troops both in Gallipoli and in Egypt. Dysentery is largely a hot-weather disease. Typhus, which invaded Serbia, and was at length got under by the R.A.M.C., is a cold-weather disease, carried by lice. There was an excellent opportunity of investigating the disease as well as of getting it under, but the problem of finding a serum or vaccine for typhus is yet unsolved. There remains to mention the remarkable work in classifying and examining the nervous

conditions (popularly grouped under "shell shock") arising from the war, and this was organised in London by Dr. W. M. Fletcher, who enlisted all the best known neurologists, including Dr. Henry Head and Dr. F. W. Mott, in making evidential inquiries on a common plan. A word must also be said for the remarkable development of X-ray examination of wounds and injuries, which became a routine practice applied to every surgical patient in the hospitals.

INTERNATIONAL TREATIES

The Congress of Vienna (followed by the second Treaty of Paris), 1814–15, reconstructed Prussia, giving her the northern Rhine Provinces that France had seized; definitely established the Germanic Confederation; ensured to Austria Trent, Trieste, Istria, and Dalmatia, as well as Lombardy and Venetia; repartitioned Poland between Russia, Austria, and Prussia; restored the Kingdom of Sardinia; recognised Switzerland as an independent and neutral State; and created the United Kingdom of the Netherlands by combining Holland and Belgium. In 1830, however, Belgium declared her independence. Consequently, the Treaties of London, 1831 and 1839 (made between Great Britain, Austria, France, Prussia, and Russia) provided as follows: **"Belgium shall form an independent and perpetually neutral State.** It shall be bound to observe such neutrality towards all other States." In 1867 these five Powers, with the addition of Italy and the Netherlands, collectively guaranteed the neutrality of Luxembourg. France and the Italian States having combined against Austria, the latter country (in 1860) had to restore Lombardy to Italy, who gave Savoy and Nice to France. And Italy, joining with Prussia against Austria, recovered Venetia in 1866. At the same time Prussia took from Austria the provinces of Schleswig and Holstein, which those two Powers had taken from Denmark in 1864. On the outbreak of the Franco-German war, Great Britain made separate treaties (1870) with Prussia and France by which Belgium's neutrality was specially guaranteed during that war, Great Britain undertaking to co-operate against either of the two Powers if it violated such neutrality. Besides this, **the general Treaty of 1839 was reaffirmed.** At the end of the war, by the Treaty of Frankfort, 1871, Germany took from France Alsace and a large part of Lorraine.

The position of Russia as **chief protector of the Slavs** and other Christian subjects of the Sultan of Turkey has been marked in modern times by the Convention of Akerman, 1826, and the Treaty of Adrianople, 1829—early stages in gradually undermining Turkish rule over the Balkan peoples. Greece became independent in 1827–9, helped by Britain, France, and Russia. By the Treaty of Paris, 1856, after the Crimean war, Russia's sole protection of the Slavs was checked by the intervention of the other Great Powers. After the Russo-Turkish war, 1877–8, Russia tried to revive her prerogative by the Treaty of San Stefano, when she demanded **autonomy for Bosnia and Herzegovina,** and a completely independent and extended Bulgaria. But this was considerably thwarted by the **Treaty of Berlin, 1878,** in which all the chief Powers took part. The independence of Serbia, Montenegro, and Rumania was recognised, and Bulgaria, on a small scale, became autonomous under Turkish suzerainty (thrown off in 1908), but Bosnia and Herzegovina were to be **"occupied and administered"** by Austria-Hungary. In 1878 Turkey ceded Cyprus to be occupied and administered by Great Britain. It has been annexed since Turkey entered the war. **In connection with the abrogation of Treaties,** it is important to note that, at the London Conference of 1871, the plenipotentiaries of the Great Powers signed this protocol: "It is an essential principle of the law of nations that no Power can liberate itself from the engagements of a treaty, nor modify the stipulations thereof, **unless with the consent of the contracting Powers by means of an amicable arrangement.**" And yet, in 1908, we find Austria "modifying" the Treaty of Berlin by annexing Bosnia and Herzegovina; and now Germany claims to "liberate itself" from the Treaty of 1839 as being merely **"a scrap of paper."** In 1912–13 Bulgaria, Serbia, Greece, and Montenegro combined to defeat Turkey, but quarrelled over the division of most of Turkey in Europe; with the result that, Bulgaria having been overcome by the others (assisted by Rumania), the **Treaty of London** ending the first Balkan war was soon upset by the **Treaty of Bucharest** ending the second war. After the second Balkan war Serbia and Greece made a Treaty (1913) by which each agreed to aid the other against attack by a third Power. There was said to be a secret Treaty (July 1915) by which Germany had allotted to Bulgaria, in return for her alliance, Albania and those parts of Macedonia acquired by Serbia and Greece after the second war.

The Triple Alliance of Germany, Austria, and Italy began with a Dual Alliance between Germany and Austria in 1879, kept secret till 1887. In 1883 the alliance was **completed by the inclusion of Italy,** and its terms have been altered. At the beginning of the war, Italy proclaimed herself neutral because the war was not "defensive" on the part of her allies. Later (May 1915) she declared war on Austria.

An **Alliance between France and Russia** was started in 1893, and definitely established in 1897. In 1903 was initiated **L'Entente Cordiale** between **Great Britain** and **France,** which became definite in 1905, after the Anglo-French Convention of 1904 settling disputes as to Egypt, Morocco, etc. Similarly, after the Anglo-Russian Convention of 1907, settling disputes as to Persia, etc., the **Entente** developed into the **Triple Entente of Great Britain, France, and Russia.** Sir E. Grey, in his statement to the House of Commons (Aug. 1914), just after Germany had declared war on Russia, pointed out that "the Triple **Entente** was not an alliance, it was a diplomatic group." **"We are not parties to the Franco-Russian Alliance,"** he said. **"We do not even know the terms of that Alliance."** After the Morocco crisis in 1912 he had exchanged letters with the French Ambassador to make the position plain. Accordingly he wrote: "We have agreed that consultation between experts ought not to be regarded as an engagement that commits either Government to action in a contingency that has not yet arisen and may never arise. . . . I agree that if either Government had grave reason to suspect an unprovoked attack by a third Power, or something that threatened the general peace, **it should immediately discuss with the other one whether both Governments should act together to prevent aggression and to preserve peace,** and if so,

what measures they would be prepared to take in common."

The **Alliance of Great Britain and Japan,** begun in 1902, is based upon the Anglo-Japanese Agreement of 1905 (as revised in 1911). The objects are (*a*) the consolidation and maintenance of general peace in Eastern Asia and India; (*b*) the preservation of the independence and integrity of the Chinese Empire, and the principle of equal opportunities for the commerce and industry of all nations in China; (*c*) the maintenance of the territorial rights and the defence of the special interests of the contracting parties in Eastern Asia and India. It is provided that if by **reason of unprovoked attack or aggressive action, wherever arising,** on the part of any other Power or Powers, either party should be involved in war in defence of its territorial rights or special interests, the other party will at once come to the assistance of its ally, and will conduct the war in common, and make peace in mutual agreement with it. This agreement was modified in 1911, mainly by the addition of a new article that "should either party conclude a treaty of general arbitration with a third Power, it is agreed that nothing in this agreement shall entail upon such party an obligation to go to war with the Power with whom such treaty of arbitration is in force." The proviso as to arbitration had in view the Anglo-American **unlimited** Arbitration Treaty signed in 1911, but not ratified by the U.S. Senate. In this connection may be noted the Anglo-American Treaty (Sept. 1914), by which the contracting Powers agree that "all disputes between them, of every nature whatsoever, other than disputes the settlement of which is provided for and in fact achieved under existing agreements . . . shall, when diplomatic methods of adjustment have failed, be referred **for investigation and report** to a Permanent International Commission . . . and they agree not to declare war or begin hostilities during such investigation and before the report is submitted." Japan has helped in the East, capturing Kiaochau and other German colonies.

The Anglo-Portuguese Alliance has been more or less definitely in existence for many years. Treaties were published in 1898 by which neither party will help another nation in attacking the other party. In case of war or invasion both Powers agree to assist each other when required. In Nov. 1914 the Portuguese Congress authorised the Executive to intervene in the war at the time and in the manner it should judge necessary.

In Sept. 1914 Great Britain, France, and Russia signed a Declaration that they would not conclude peace separately, and that no one of the Allies would demand conditions of peace without the previous agreement of each of the other Allies. Japan and Italy subsequently gave their "full and complete" adherence to this treaty of alliance (**Nov. 1915**).

COMMISSIONS AND COMMITTEES ON PUBLIC QUESTIONS ARISING OUT OF THE WAR

Committee to consider and advise upon applications received by the Treasury for approval of Fresh Issues of Capital.
Secretary, D. F. BUCKLEY, Treasury Chambers, S.W.

The War Trade Department.*
Secretary, Sir N. J. HIGHMORE, K.C.B., 4 Central Buildings, Storey's Gate, Westminster, S.W.

Defence of the Realm Losses Commission.
Secretary, D. DU B. DAVIDSON, 133 Strand, W.C.

Royal Commission on Sugar Supplies.
Secretary, C. S. REWCASTLE, Scotland House, S.W.

Committee on all questions relating to the Export of Rubber and Tin from the United Kingdom and British possessions.
Secretary, J. K. GREBBY, 3 Queen Anne's Gate, S.W.

Committee on the Supply of Chemical Products.
Secretary, F. GOSSLING, Gwydyr House (Board of Trade), Whitehall, S.W.

Committee on Production in Engineering and Shipbuilding Establishments.
Secretary, H. J. WILSON, Offices of the Chief Industrial Commissioner, 5 Old Palace Yard, S.W.

Coal Mining Organisation Committee.
The Secretary, Coal Mining Organisation Committee, Home Office, S.W.

Agricultural Consultative Committee on Home-grown Food Stuffs.
Secretary, A. GODDARD, 12 Great George Street, S.W.

Farm Produce, Purchase of, for His Majesty's Forces.
Secretary, Capt. C. B. ROLFE, 64 Whitehall Court, S.W.

Commission Internationale de Ravitaillement. (International Commission for the purchase of Supplies for the Allied Governments.)
Secretary, R. F. H. DUKE, Board of Trade (Exhibition Branch), India House, Kingsway, W.C.

Parliamentary Recruiting Committee.
Clerk, R. H. DAVIES, C.B., 12 Downing Street, S.W.

Railway Executive Committee.
Secretary, Major G. S. SZLUMPER, 35 Parliament Street, S.W.

Committee on Congestion at Ports.
Secretary, Sir FREDERICK G. DUMAYNE, Admiralty, S.W.

War Risks Insurance Advisory Committees: (*a*) Marine; (*b*) Aircraft and Bombardment.
Secretary, J. W. VERDIER, 33–36 King William Street, E.C.

Executive Committee for the purpose of dealing otherwise than in the Prize Court with Cargo which, though possibly liable in law to condemnation as Prize, might with advantage be released.
Secretary, H. C. HONEY, Board of Trade, S.W.

Prize Claims Committee.
Secretary, L. F. C. DARBY, Goldsmith Building, Temple, E.C.

Over-sea Prize Disposal Committee.
Secretary, R. A. WISEMAN, Colonial Office, S.W.

Foreign Trade Debts Committee.
Secretary, H. MEAD TAYLOR, 119 Victoria Street, S.W.

* This Department was set up to take over the bulk of the work done by the Committee "On Trading with the Enemy," which is now dissolved.

Committee in connection with the War Contingents of the Dominions.
Secretary, H. F. BATTERBEE, Colonial Office, S.W.

Prisoners of War Help Committee.
Secretary, B. W. YOUNG, Savoy Hotel, Victoria Embankment, S.W.

Naval and Military Dependants (Medical Treatment) Committee.
Joint Secretaries, J. A. BARLOW and J. RAE, Wellington House, Buckingham Gate, S.W.

Sub-Committee of the Committee of Imperial Defence to consider and advise on the question of collating material for a future History of the War.
Secretary, Major E. Y. DANIEL, Committee of Imperial Defence, 2 Whitehall Gardens, S.W.

Committee on Destitute Aliens.
Secretary, E. SEBAG-MONTEFIORE, Home Office, S.W.

The Belgian Refugees Committee for Ireland.
Secretary, 62 Upper Mount Street, Dublin.

Government Committee on the Prevention and Relief of Distress.
Secretary, A. V. SYMONDS, Local Government Board, S.W.

Local Government Board Committees appointed to co-operate with the Government Committee on the Prevention and Relief of Distress.

(1) London—
Secretary, A. N. C. SHELLEY, Local Government Board, S.W.

(2) Women's Employment—
Secretary, Miss MARY R. MACARTHUR, 8 Grosvenor Place, S.W.

(3) Professional Classes—
Secretary, J. E. TALBOT, Board of Education, S.W.

The Ulster Central Committee on Women's Employment.
Secretary, Mrs. MERCIER CLEMENTS, 5 College Gardens, Belfast.

The Central Committee on Women's Employment for Leinster, Munster, and Connaught.
Secretary, Miss BROWNING, 63 Dawson Street, Dublin.

Irish War Savings Committee.
Secretary, J. BRENNAN, 51 St. Stephen's Green, East, Dublin.

Indian Wheat Committee.
Secretary, H. D. VIGOR, Board of Agriculture and Fisheries, 3 St. James's Square, S.W.

Committee to make arrangements with a view to the maintenance, so far as possible, of adequate supplies of Fertilisers for the Use of Farmers in the United Kingdom.
Secretary, H. CHAMBERS, Board of Agriculture and Fisheries, 3 St. James's Square, S.W.

Home-Grown Timber Committee.
Secretary, H. G. RICHARDSON, 4 The Sanctuary, Westminster, S.W.

Committee on Grain Supplies.
Secretary, H. D. VIGOR, Board of Agriculture and Fisheries, 3 St. James's Square, S.W.

International Joint Committee for the Purchase of Wheat, Flour, and Maize.
Secretary, H. D. VIGOR, Board of Agriculture and Fisheries, 3 St. James's Square, S.W.

Coal Exports Committee.
Secretary, E. J. ELLIOTT, Broadway House, Tothill Street, S.W.

Contraband Committee.
Secretary, ———— Foreign Office, S.W.

Detention of Neutral Ships Committee.
Secretary, The Hon. S. O. HENN COLLINS, 1 Abbey Gardens, Westminster, S.W.

Enemy Exports Committee.
Secretary, ———— Foreign Office, S.W.

War Trade Advisory Committee.
Secretary, L. C. LIDDELL, M.V.O., Winchester House, St. James's Square, S.W.

Government Committee on the Treatment by the Enemy of British Prisoners of War.

Committee to consider provision after the War for Education of Children and Young Persons Abnormally Employed during the War.
Secretary, J. OWEN, Board of Education, Whitehall, S.W.

Advisory Committee of Shipowners to Director of Transports.
Secretary, ———— The Admiralty, Whitehall, S.W.

Committee to take over all questions relating to the Welfare of British Prisoners (Combatant and Civilian) including those Interned in Neutral Countries.
Secretary,

Committee to consider the position of the Coal Trade after the War, with special reference to International Competition.
Secretary, J. U. SMITH, Board of Trade, Whitehall, S.W.

PENSIONS AND SEPARATION ALLOWANCES

Until the new Board of Pensions is set up by the Bill introduced into Parliament on Nov. 15 the following bodies deal with the applications for allotment of pensions and allowances:—

For naval allowances and pensions: The Admiralty, Whitehall. Usually the Secretary of the Admiralty should be addressed. Applications by officers and men directly employed by the Navy should be made to the Accountant-General of the Navy, at the Admiralty. Widows and children of seamen and marines desiring to claim pensions must address The Director, Greenwich Hospital, Admiralty, London; but in the case of widows and dependants of officers the application is made to the Secretary of the Admiralty.

For military disability and service pensions: The Secretary, the War Office, Whitehall. The payments are made automatically. Soldiers address complaints to the Secretary, Royal Military Hospital, Chelsea; but widows and dependants address the Secretary to the War Office.

The Statutory Committee, 22 Abingdon Street, Westminster, exists to provide *supplementary* pensions, grants, and allowances to officers and men both of the Navy and Army and their dependants. It also undertakes the after-care in health, training, and employment of officers and men disabled in the war.

The Military Service (Civil Liabilities) Committee, Imperial House, Kingsway, London, W.C., affords relief to officers, of rank of lieutenant and second lieutenant, and corresponding ranks in the Navy, and to all men, who joined the forces since Aug. 4, 1914, and who make out a recognised claim to avoid serious hardship in respect of rent, interest on mortgages, instalments on house and furniture purchase, insurance premiums, and school fees.

The Superintendent, Central Army Pension Issue Office, Baker Street, London, W., deals with delays or other complaints in the administration of pensions.

The scale pensions to the dependants of deceased seamen and soldiers are:

	Weekly
Widow without children	10*s.*, 12*s.* 6*d.* at 35, 15*s.* at 45.
Widow with 1 child	15*s.* (or more if the mother is over 35).
Widow with 2 children	18*s.* 6*d.* ditto.
Widow with 3 children	20*s.* 6*d.* ditto.
Widow with 4 children	22*s.* 6*d.* ditto.
Motherless children	5*s.* each child.
Total disablement	25*s.* with 2*s.* 6*d.* for each child.
Partial disablement	The difference between 25*s.* and what the man can earn, with a discretionary allowance of 2*s.* 6*d.* for each child. In cases where a limb is lost not less than 10*s.* 6*d.* a week.

Soldiers serving in Europe and discharged as unfit are entitled to the following pensions:

	Weekly
Warrant Officer, Class I.	40*s.*
Class II. or Non-Commissioned Officer, Class I.	33*s.*
Non-Commissioned Officer, Class II.	31*s.*
Non-Commissioned Officer, Class III.	29*s.*
Non-Commissioned Officer, Class IV.	27*s.*
Privates, Class V.	25*s.*

Plus 2*s.* 6*d.* a week for each child born before his discharge and under 16 years of age, which may be continued beyond that age if the local Education Authority recommends it for apprentices receiving nominal wages, and for children being educated at Secondary Schools, Technical Schools, or Universities.

Pensions on a reduced scale are also awarded to soldiers who have been discharged on account of disease not wholly due to war service, but aggravated by it.

Temporary allowances at the uniform rate of 14*s.* a week are made to men discharged as no longer fit for service, and pending the settlement of their pension claim. Ordinary separation allowance is continued to the dependants of men so discharged for a fortnight after their discharge.

The scale of separation allowances is appended.

ARMY SEPARATION ALLOWANCES

Scale of Allowances to Wives and Children

For families not in public quarters

	Class 15. (Warrant Officer.) Separation Allowance and Allotment.	Class 16. (Regtl. Q.M.S.) Separation Allowance and Allotment.	Classes 17 and 18. (Colour-Sergeant.) Separation Allowance and Allotment.	Class 19. (Sergeant.) Separation Allowance and Allotment.	Class 20. (Corporal or Private.) Separation Allowance and Allotment.
	s. *d.*	*s.* *d.*	*s.* *d.*	*s.* *d.*	*s.* *d.*
For wife only	23 0	22 0	16 6	15 0	12 6
,, and 1 child	28 0	27 0	21 6	20 0	17 6
,, ,, 2 children	31 6	30 6	25 0	23 6	21 0
,, ,, 3 children	33 6	32 6	27 0	25 6	23 0
,, ,, 4 children	35 6	34 6	29 0	27 6	25 0

For each additional child separation allowance at 2*s.* per week is issuable, the allotment remaining as above.

The allotment in Class 20 is 3*s.* 6*d.* per week, and in the other classes 5*s.* 10*d.* per week.

For each motherless child separation allowance at 5*s.* per week, irrespective of the class to which the father belongs.

The above allowances are increased by 3*s.* 6*d.* in the case of families living in the London Postal area at the date of mobilisation or enlistment.

Scale of Allowances to Dependants

Tables showing the amount to be allotted by a soldier to secure the continuance of the weekly sums stated, to his dependants in Class A.

Class 20 (*Corporals and Privates*)

Weekly allowance based on pre-war dependence.			Daily share to be paid by the soldier.
s. *d.*		*s.* *d.*	*d.*
	Not exceeding	3 0	1
Exceeding 3 0	but ,, ,,	5 0	2
,, 5 0	,, ,, ,,	7 6	3
,, 7 6	,, ,, ,,	9 6	4
,, 9 6	,, ,, ,,	11 6	5
,, 11 6			6

Classes 15 *to* 19 (*Warrant Officers to Sergeants*)

Weekly allowance based on pre-war dependence.			Daily share to be paid by the soldier.
s. *d.*		*s.* *d.*	*d.*
	Not exceeding	2 6	1
Exceeding 2 6	but ,, ,,	4 0	2
,, 4 0	,, ,, ,,	5 6	3
,, 5 6	,, ,, ,,	7 0	4
,, 7 0	,, ,, ,,	8 6	5
,, 8 6	,, ,, ,,	10 0	6
,, 10 0	,, ,, ,,	11 6	7
,, 11 6	,, ,, ,,	13 0	8
,, 13 0	,, ,, ,,	14 6	9
,, 14 6			10

The basis of the separation allowance in these cases is the value of the pre-enlistment contribution made by the soldier to the dependant, and the grant of the allowance is conditional on the declaration by him of an allotment in favour of the dependant and on his claiming separation allowance for the dependant within one month of enlistment. Local inquiry is necessary for the purpose of assessing the allowance, and this is carried out by the Pension Officers, whose reports are submitted to the Pensions Committees under the Old Age Pensions Act, and are subsequently referred to the Paymasters.

NAVY SEPARATION ALLOWANCES

(*Extracts from Admiralty Orders*)

Sailor.	Wife, per week.	Children, per week.	Motherless Children, per Week.
Class I.:			
Ordinary Seaman Able Seaman Leading Seaman 2nd Class Petty Officer, and equivalent ratings .	*6*s.*	1st child, 4*s.* 2nd ,, 3*s.* 3rd ,, 2*s.* 4th and subsequent children, 1*s.* ea.	5*s.* each.
Class II.:			
Petty Officer Petty Officer 1st Class, and equivalent ratings	*7*s.*	Ditto.	Ditto.
Class III.:			
Chief Petty Officer and equivalent ratings . .	*8*s.*	Ditto.	Ditto.
MARINE ON SHIP'S BOOKS			
Class I.:			
Private . . Corporal . . Sergeant & equivalent ranks .	*6*s.*	1st child, 4*s.* 2nd ,, 3*s.* 3rd ,, 2*s.* 4th and subsequent children, 1*s.* ea.	5*s.* each.
Class II.:			
Colour Sergeant & equivalent ranks	*7*s.*	Ditto.	Ditto.
Class III.:			
Quartermaster-Sergeant and Staff-Sergeant .	*8*s.*	Ditto.	Ditto.
Class IV.:			
Warrant Officer, Royal Marines (except Royal Marine Gunners)	*9*s.*	Ditto.	Ditto.

* An additional allowance of 3*s.* 6*d.* a week is also payable to a wife whose normal place of residence is in the London Postal area, so long as she continues to reside there.

For the period of the present war Separation Allowance is being paid to the wives and families of all Naval ratings, Marines, and Reservists borne on the books of H.M. ships, provided that in each instance the man declares an allotment of at least 5*s.* a week in favour of his wife. The allowance is in no circumstances issuable in respect of men paid at a Mercantile rate of pay. (*Note.*—The letters "M.F.A." preceding the number of an allotment identity certificate indicate that the man in question is so paid, and that the allottee is consequently ineligible for separation allowance.)

The payment in respect of children is made ordinarily for those under 16 years of age, but may be continued above that age on the recommendation of the Local Education Authority in the cases (1) of apprentices receiving not more than nominal wages, or (2) of children being educated at secondary schools, technical schools, or universities. It may also be continued to the age of 21 in the case of children unable to support themselves owing to mental or physical infirmity, if a medical certificate to this effect is forwarded with the form of application.

NOBEL PRIZES

The Nobel Foundation is based upon the will of Dr. Alfred B. Nobel, the Swedish chemist, and inventor of dynamite (*d.* Dec. 10, 1896). The capital of the Foundation is £1,961,590, and the five prizes are worth about £8,160 each. The Nobel Foundation is administered by a *Board of Control* of five members with a president appointed by the King of Sweden. The *Peace Prize* is awarded by a committee of the Norwegian Parliament.

MAKERS OF THE **"SUPER"** FIELD SERVICE BOOT

NUT BROWN SHADE

¶ The combined laced Legging Field Service Boot. ¶ They set perfectly on foot and round leg, and their utility and smartness are at once demonstrated. ¶ Cut from the finest Willow Calf. Will take a brilliant polish, or can be left dull. ¶ All officers we have fitted with them are loud in their praise.

IN DAYS OF STRESS

it is well to prepare for the future.
There is no better method of providing for the autumn and winter of your days than by buying an annuity. The **new rates** of the Canada Life Assurance Company will, on examination, be found to be more liberal (combined with absolute security) than **those given by any other company extant.**

Here are some examples:

£1,000 paid now will secure the following Annual Incomes:

MALES—Age 55, £85 0 8 .. Age 65, £114 13 6 .. Age 75, £172 14 2
FEMALES—Age 55, £77 12 9 .. Age 65, £102 7 0 .. Age 75, £154 15 1
paid regularly till the end of your days.

Proportionately liberal rates for other ages.

There is nothing better

or more generous in the whole realm of finance. Being under Government control the security is indubitable.
Buy a Canada Life Annuity now, and it will sweeten your life till the end of your days by ensuring a ready, settled, and safe income devoid of any fluctuations whatever. The ups and downs of stock and share markets will not affect you.

Write for the NEW ANNUITY Booklet (58) (post free)

The Homes for Little Boys

Farningham and Swanley, KENT.

Where 500 *Boys of all denominations are received in infancy, properly fed and clothed, given a sound education, taught a useful trade, and thereby thoroughly equipped for the Battle of Life.*

Patrons: Their Majesties the King and Queen,
AND
Queen Alexandra, whose first public act in England was to lay the foundation stone of these Homes.

President: THE MARQUIS OF ABERDEEN.

THE WAR!

Boys have been sent into forty-one of His Majesty's Regiments, and over 500 old Boys are now taking part in the war. **In addition, forty-five of the senior boys at Farningham are now working at Messrs. Vickers, Sons & Maxim, on the manufacture of mines and machine guns.**

Seventy lads, orphaned by the war, sons of soldiers and sailors, have already been admitted to the care of the Homes. Thirty of these are the sons of men who lost their lives on H.M. Ships: "Aboukir," "Amphion," "Bulwark," "Cressy," "Formidable," "Good Hope," "Hawke," "Hermes," "Invincible," "Princess Irene," "Queen Mary," "Viknor."

HELP IS URGENTLY NEEDED. These Homes are supported entirely by voluntary contributions.

Treasurer—LORD BLYTH. Secretary PERCY ROBERTS.
Chairman—WALTER HAZELL, Esq., J.P. 50-57 Temple Chambers, E.C.

"Under Shortened Canvas."

Help us to Weather the Storm!

Hundreds of Disabled, Destitute, and Deserving British Seamen to be provided for.

Patron: HIS MAJESTY THE KING.
Bankers: WILLIAMS DEACON'S BANK, LTD.
Secretary: J. BAILEY WALKER.

Office: 58, FENCHURCH STREET, LONDON, E.C.

—to the Horse what the Red-Cross is to the Man

In every field of the Great War the horses of the British Army are doing their part in the great conflict. Tired and worn by violent and prolonged exertion, overcome by disease and stricken on the field of battle, thousands would die were it not for the efficient help given them. But much more remains to be done. Many more might be saved from pain and agony for further service.

More funds are wanted. Will you help by giving a little to aid the

R.S.P.C.A. FUND for SICK and WOUNDED HORSES

(*Chairman:* H.G. The DUKE of PORTLAND, K.G.)

to minister to these dumb sufferers of the War?

This is **the only organisation approved by the War Office** for rendering assistance to the British horses during the War.

All who wish to help the British horses which are doing such splendid work at home and at the front should send their gifts to the Hon. Secretary—

R. S. P. C. A. FUND, 105 Jermyn Street, London, S.W.

THE DOGS' HOME

OR TEMPORARY HOME FOR LOST AND STARVING DOGS

(An Institution for the Protection of Dogs and Cats)

4, BATTERSEA PARK RD., S.W., & HACKBRIDGE, SURREY.

Patron: His Most Gracious Majesty the King.

President: His Grace the DUKE OF PORTLAND, K.G.

OBJECTS:

1. To provide food and shelter for the lost, deserted, and starving dogs of London and the immediate neighbourhood.
2. To restore lost dogs to their rightful owners.
3. When good dogs are unclaimed, to find suitable homes for them at nominal charges.
4. To destroy, by a merciful and painless method, all valueless and diseased dogs.

Out-Patients' Department (Dogs and Cats only), at Battersea, Thursday, 2.30, by letter only from any Subscriber.

Dogs and Cats can be received as Boarders at Hackbridge, and Dogs for Quarantine under the Importation of Dogs Order, 1914.

Contributions will be thankfully received by GUY H. GUILLUM SCOTT, *Secretary.* [150

2. Skilled Midwives to attend Poor Married Women in their *Confinements at their own homes.*
3. Training for Medical Pupils, Midwives, and Monthly Nurses.

Since the foundation of the Hospital **130,000 poor women have been relieved.** Last year **1,817** patients were received into the Hospital, and **2,223** were attended at their own homes.

Annual Expenditure of the Charity, £7,500. Reliable Income, £4,000 only.

Contributions will be gratefully received by ARTHUR WATTS, *Secretary*

Colonial & Continental Church Society

Patron: HIS MAJESTY THE KING.
Vice-Patrons: THE ARCHBISHOPS OF CANTERBURY, YORK, ARMAGH, DUBLIN, Etc.
Chairman of Committee: S. H. GLADSTONE, Esq.
Secretary: THE REV. J. D. MULLINS, M.A.

This Society exists for the purpose of supplying the means of grace to our fellow-countrymen abroad, especially in those parts of the Empire where they are in danger of drifting into irreligion for lack of the Gospel.

Nearly Fifty Colonial Dioceses receive aid from the Society, including those in Canada, Australasia, South Africa, East Africa, the West Indies, and India. Many Colonial Bishops are applying for far more aid than the Society's Funds can meet.

Owing to the enormous inrush of settlers to the Colonies, the Society started in 1906 a **SPECIAL N.-W. CANADA FUND,** and in 1912 an **AUSTRALIAN FUND.**

249 Clergy and Lay Evangelists have been sent out, 120 prairie churches built, and more than £139,000 has been expended in the West. £12,000 per annum is required to maintain the agents in Canada.

Assistance is also given to ministrations among British Artisans, Sailors, and others in Continental Cities; and Services (self-supporting) are organised for visitors at health resorts.

During the War the Society's Chaplains have rendered devoted service to thousands of British residents, refugees, and sick and wounded soldiers. Three of them, in *Brussels*, *Lille*, and *Croix*, remained at their posts, behind the German Lines.

FUNDS URGENTLY NEEDED.

There are a few Private Wards at both Hospitals

FULL PARTICULARS REGARDING ADMISSION OF PATIENTS CAN BE OBTAINED FROM THE SECRETARY.

Offices: 283 Harrow Road, LONDON, W.

HY. J. EASON, *Secretary.*

CURATES' AUGMENTATION FUND.

This Society makes Grants to Curates who have been more than 15 years in Holy Orders, and are still in full active work. The number of Assistant Curates is now 7,000, and of this number a large proportion have been ordained more than 15 years.

It is **the only Society in England** that directly increases the stipends of Curates of long standing. The "Queen Victoria Clergy Fund" does not assist the unbeneficed clergy. Curates of 25 years' standing get from 30 to 40 per cent. less stipend than those newly ordained.

The Church is multiplying Curates **three times** as rapidly as she is multiplying benefices.

£8,500 was voted last year in grants. The average age of those receiving grants is 7 years.

The average stipend of recipients does not exceed £3 per week.

CHURCH COLLECTIONS, SUBSCRIPTIONS, AND DONATIONS THANKFULLY RECEIVED.

Cheques, P.O.O., and P. Orders, crossed "COUTTS & CO.," should be sent to REV. A. G. B. ATKINSON, *Secretary*
Offices 2, DEAN'S YARD, Westminster, S.W.

Church of England

WAIFS & STRAYS SOCIETY.

Patrons: THEIR MAJESTIES THE KING AND QUEEN.
Patron of Children's Union: H.M. QUEEN ALEXANDRA.
Presidents: The Archbishops of Canterbury and York.

116 HOMES, INCLUDING 3 FARM HOMES, 5 CRIPPLES' HOMES AND 2 HOMES IN CANADA. OVER 21,000 CHILDREN RESCUED.

OVER 4,800 CHILDREN NOW IN THE HOMES, INCLUDING 900 DEPENDENTS OF MEN ON ACTIVE SERVICE.

Contributions gratefully received by the Secretary, Prebendary RUDOLF, Old Town Hall, Kennington Road, London, S.E.

∴ Cheques, etc., crossed, and payable to Waifs and Strays.

LEGACIES

And **DONATIONS** Urgently Needed to continue and extend the work of

The Incorporated Church Building Society

(FOUNDED 1818),

Which has assisted nearly two-thirds of the parishes of England and Wales in building new Churches and enlarging or repairing existing ones. Total grants made, **9,742.**

Total amount granted, **£1,108,320.**

£29,254 has been granted from the MISSION BUILDINGS FUND towards **1,084** Mission Churches, etc.

The Society is entirely dependent on Voluntary Support.

CONTRIBUTIONS should be sent to the Secretary, the Rev. T. T. NORGATE, 7, Dean's Yard, Westminster Abbey, S.W.

N.B.—". . . The valuable work done by the Incorporated Church Building Society must not be overlooked . . . its Support and Advice cannot fail to be of great service. . . ."—*Vide Report of Archbishops' Committee on Church Finance.*

The Royal Hospital for Diseases of the Chest,

CITY ROAD, LONDON, E.C.

Patron—HIS MAJESTY THE KING.
President and Treasurer—THE RIGHT HON. LORD HOLLENDEN.
Chairman of Council—STUART DE LA RUE, ESQ.
Vice-Chairman of Council—ALEXANDER WEDDERBURN, ESQ., K.C.

SUPPORTED BY VOLUNTARY CONTRIBUTIONS.

Ordinary Annual Expenditure	**£8,000**
Income from Investments	**£250**
REQUIRED EACH YEAR	**£7,750**

New ANNUAL SUBSCRIPTIONS and DONATIONS are urgently needed.

Over £8,000 owing to Bankers.

Contributions will be thankfully received by the Secretary, or they may be paid direct to the Hospital Bankers—Messrs. GLYN, MILLS & Co., 67, Lombard Street, E.C.

A few Facts concerning the Hospital.

1. His Majesty the King is Patron.
2. It was the first of its kind established in Europe, *having been founded in* 1814.
3. It has uninterruptedly for *one hundred and two years* carried on its work in the midst of densely populated districts of the Metropolis.
4. Many thousands of useful lives have been prolonged which, without its aid, must have succumbed to the Pulmonary Diseases so prevalent in England.
5. Last year 439 In-Patients were treated, and the attendances of Out-Patients numbered 17,774.
6. The strictest economy is practised in all matters connected with the Hospital.

The Wards are now occupied by Sick and Wounded Soldiers, but the work of the Out-Patient Department is being carried on as in the past.

A. T. MAYS, *Secretary.*

THE POOR CLERGY RELIEF CORPORATION

Established 1856. Incorporated by Royal Charter 1867.

President—THE BISHOP OF LONDON.

THE ONLY SOCIETY of the kind which gives **Immediate Assistance** to the Clergy, their Widows and Orphan Daughters, **IN ALL PARTS OF THE EMPIRE.**

THE PRICE OF FISH.

THE NORTH SEA TRAWLERS since the commencement of the War have been pursuing their calling and maintaining the important national food supply we harvest from the sea amounting in value to upwards of ten millions sterling a year, and many of the fishermen have lost their lives through striking mines. To the fishermen also has fallen the dangerous task of sweeping up the mines laid by our enemy to harass our commerce and food supplies, and many of our brave fellows have lost their lives in this service for the country.

THE ROYAL NATIONAL MISSION TO DEEP SEA FISHERMEN

looks after the spiritual and physical well-being of these hardy Toilers of the deep, ashore and afloat, and the Council of the Society earnestly appeal for help to maintain its work amongst them.

181, Queen Victoria Street, E.C. **FRANCIS H. WOOD, Secretary.**

BRIDGE OF ALLAN (SCOTLAND).

419¾ miles from Euston by L. & N.W. Railway. Population, 3,121. The town has deservedly high reputation as a health-resort. Charmingly situated, well wooded, well watered, and sheltered from the N.-E. winds. Central for Edinburgh, Glasgow, and Perth, and 3 miles from Stirling and Dunblane. Unsurpassed scenery, natural mineral wells and baths, golf, tennis, bowling, fishing.

ALLAN WATER HOTEL.

The Hotel stands in its own grounds of 3½ acres, and is beautifully situated on the slopes of the Ochils overlooking the town and valley of the Forth.

ABSOLUTELY FIRST CLASS.

Large Garden, Lawn Tennis and Croquet, Garage, Electric Light.

Fifteen minutes from Golf Links.

Telegrams: "Braillan."

CARDIFF.

157 miles from Paddington by G. W. Railway. Population 184,900. Water-supply pure and soft from old red sandstone springs. Death-rate low—14 per 1,000. Cardiff is well provided with parks and open spaces, forming admirable recreation-grounds and breathing-spaces for the inhabitants.

QUEEN'S HOTEL, CARDIFF.

This First-class Family and Commercial Hotel is situated in the very centre of the City, within five minutes' walk of the Great Western Railway and ten minutes' from Taff Vale and Rhymney Stations, close to the theatres and places of amusement, and in the midst of the shopping resorts. It contains Coffee Room, Writing and Smoke Room, Drawing Room, Lounge, Large Commercial Room, Billiard Room (four tables), Grill Room, and Restaurant, and is one of the largest and most comfortable Hotels in the City. The stock Rooms are apart from the Hotel, and are unequalled for size, light, and comfort. The prices of these rooms are from 4/- per day. Sanitary arrangements are perfect, Lavatories and Bathrooms on each floor. Electric Light throughout, and heated by steam radiators. Electric Elevator to all floors. The Hotel throughout is well furnished, and the Cuisine, Wines, Liquors, Cigars, etc., are unsurpassed in the City of Cardiff. The general service of the Hotel will be found everywhere efficient and painstaking.

Telephone Nos. 596—1606 *Telegraphic Address, "Queen's Hotel, Cardiff."* A. GOODERIDGE, *Manager.*
